Breaks Into Southern Jail and Riddle Prisoner With Bullets.

Shreveport, I.a., April 26.—After working three hours with sledgeham-mers and pickaxes, 25 men broke into the parish jail at Homer, I.a., and shat Dick Craighead, inflicting wounds which will probably prove fatal. Craighead was charged with the murder of Mrs. Isaac McKee, wife of Craighead's half-brother, and her little son. The authori-riss were unaware of the designs on the prisoner until too late to protect him. Every telephone and telegraph wire out of Homer was cut, and the rifles of the Claiborne Guards were seized before the

Nelson, April 26.—(Special)—A mass meeting tonight, presided over by Mayor Houston, and addressed by S. S. Taylor, Liberal lawyer; W. Blakemore, mining engineer; Frank Deane, editor Daily News; and Fred Starkey, wholesaler, passed a resolution condemning the Koo-tenay Shingle Co. for introducing Asiatic Jabor into Salmo, and the goverument for assisting that introduction, calling upon the latter to withdraw the armed force at Salmo, and to use all efforts to prevent any further repetition of this policy, a policy the reverse of that yearly enacted by the British Columbia legisla-ture and yearly disallowed by the Dom-New York, April 26.—The climax in the prosecution of Nan Patterson was reached today when Hyman Stern, the pawnbroker, failed to identify J. Mor-gan Smith as the man to whom he sold the pistol with which "Caesar" Young was killed. This test had been looked forward to with much anticipation and was expected to make something of a sensation. On the contrary, however, it caused but a ripple of comment and sur-prise in the court room. Stern also fail-ed to identify Nan Patterson or Mrs. Smith as the woman with the man that purchased the revolver. The tension of the court room was in-tense as Stern gave his evidence, the ture and yearly disallowed by the Dominion government.

Rossland, B. C., April 23.—The sev-eral mines keep up their production steadily and at the rate of about 1000 tons a day. Up to Saturday night the mines had produced in the 112 days that have elapsed since the first of January 108.952 tons, which is only 3.006 short of 1000 tons a day since the beginning of the year. That the production will be materially increased in the immediate future is evident. The important an-nouncement is made that the Cliff, which has been closed down since last year, is soon to resume operations with C. E. Simpson as manager. The Cliff has exhas been closed down since has year, is soon to resume operations with C. E. Simpson as manager. The Cliff has ex-tensive ledges of ore of a pay grade. It is planned to extend a spur from the C. P. R. track to the foot of the steep de-clivity on which the Cliff mine is located. A chute is to be built to carry the ore down by cravity from the mine to bunk. down by gravity from the mine to bunk-ers at the spur. The Conservative amendment does not raise a question of separate schools, or of race or creed, but a question of what powers it is wise to give to the new provinces. Men may differ from the Government on this without being either bigots or intolerants. The bigots and intolerants, the stirrers up of strife, the fomenters of creed and racial dislike, are the narrow-viewed mortals who are seeking to obscure the

BACK TO THE LAND.

Nearly every writer on social economics for the past twenty-five years has dwelt upon the great evils incident to, and the possible dangers arising out of, the rush of the rural population to the great cities which become congested as a consequence. London, New York and Chicago are <text><text><text><text><text><text><text> examples of this tendency. The poor of London, for instance, are so numer-

than a business man and a practical organizer. Or rather he did not com-bine with his zeal and idealism the same race as ourselves. If having sunk lower than us, it is because of their practical qualities of such men as Brigham Young or the Rev. Dr. Dowie, men of pre-eminent business qualities environments, and man's status in society after all is the result of his environment. Once removed from the tainted atmosphere of London slums to the free, life-giving air of the prairies, with definite prospects and profitable employment in view, there can be little doubt of success. British Columbia can always get plen

ty of attention from Eastern Canada when it comes in conflict with the commercial or political interests of the latter mercial travelers and the alien exclusion law. When British Columbia has a

grievance against the Dominion Government on any score it is discreetly overlooked by the Eastern press and politi-

However, he was successful in arranging the preliminaries and in securing a considerable following Malcolm Island, a tract of land com-prising 35,000 or 40,000 acres, was, after a good deal of negotiations, obtained rom the Government on certain conditions. The Government did not favor the tenure proposed, that of granting the land en bloc to the company, but as an experiment it was finally agreed to. In order to ultimately obtain the to. In order to ultimately obtain the island in fee simple it was necessary for the company to place a settler on it for every eighty acres, and to make improvements to the value of \$2.50 per acre. The company acquired no acre Improvements to the value of \$2.50 per acre. The company acquired no right or title until all the conditions were fulor title until all the conditions were ful-filled and the colonists had resided for seven years on the land. With the ex-ception of schools, they were to pro-vide for all their own public works. It was stipulated, too, that the improve-ments could be performed all in one place, instead of upon each eighty acress. There were other conditions as to the settlers becoming British subjects and educating their children in English. There were grave doubts as to the success of a colony organized on such to carry out their own system, and the Government took no risk, there were no serious objections to their making the trial. In fact, if all the conditions were fulfilled there could be no objec-tion. Everything was carried along smoothly for a time. VICTORIA SEMI-WEEKLY COLONIST, FRIDAY, APRIL 28, 1905.

Ald. Fell thought a better way would be to first request the company to 33-serve the terms of the by-law. Ald. Fullerton agreed to this, and withdrew his motion in favor of Ald. Fell's suggestion, which was adopted. The city solicitor also reported as fol-lows: lows:

C. Electric Railway Co. for the extension up North Park street into lot 49. I have considered the matter and have conferred with the city engineer and I, in the first place, though: an agreement could be prepared in which the company and the contractors and the owners of lots 6 and 7, adjoining the westerly boundary of lot 49, would all join, would best meet the instructions and wishes of the committee; but upon submitting this agreement to Mr. Gow-ard and Mr. Haggerty, I found an ob-jection which oppeared to me to be rea-sonably founded. I have, therefore, pre-pared two agreements; the one with the Tramway Co., and the other between Mr. Haggerty and the contaided with the and 7, which I now enclose for consider-ation. It would seem to me desirable that the council should merely inform the owners of lots 6 and 7 that for their protection they have obtained Mr. Hag-gerty's signature to the agreement pre-pared, leaving them to accept the same or not as they may be advised, at the same time informing them shortly that the circumstances under which the agree-ment has been suggested are the exten-sion of the tram line for the express pur-pose of enabling the excavation of sand from lot 49. It would appear to me doubtful whether at law the council are bound to concern themselves in the mat-ter, nor would they, in my opinion, in-ter, nor would they, in my opinion, in-ter any liability inasmuch as the B. C. Electric Co. possess statutory rights to the termination thereof at lot 49, and no further consent from the city is re-quired. Russian General Staff Makes Japanese Victory Look Small.

Gunshu Pass, April 25.—An exact statement of the losses in all cate-gories in the battle of Mukden from February 1 to March 14, compiled by the general staff, shows that the casualties were greatly over-estimated in earlier reports. Statements from Japa-nese sources indicating wholesale cap-tures of prisoners, enormous booty and cannon, are now denied. In reality the Russian losses amounted to two generals and \$7,777 men, of whom the prostart port obout 55 000 wars generals and 87,777 men, of whom the greatest part, about 55,000, were wounded. leaving but little time for imprisoned miners to escape. It appears that the greatest danger lies in the as yet unsettled question as to whether the fire worked its way up the chutes into the rooms of broken coal overhead. If that proves to be the case it will doubtless be some time before the fire can be entirely extinguished, but those in a position to know express the belief that the fire has not reached the "gob" and if this proves true it will mean nothing more serious than a re-timbering of the entry the distance burned.

the celebration will again prove a great success. Ald. Goodacre and William Moresby made a call on some of the business houses yesterday and were able to give a very gratifying report. The meeting last night was called to order by Ald. Goodacre, who on taking the chair informed the meeting that he had expected Mayor Barnard to be pres-ent, but owing to another engagement he had found it impossible, but he had spoken to Ald. Goodacre, and he thought the programme to be presented at the meeting a very good one, the only ob-jection being, he thought, that the regat-ta should be held up the Gorge as usual. The secretary read the meeting. The report was tabled for discussion. The first subject taken up was the military parade. Secretary Moresby informed the meeting that arrangements had been made with the C. P. R. to bring the Maindard regiments down for a return fare of \$1 per man. This was very pleasing news to all present. It was de-cided that the military parade should be held on Wednesday, May 24, from 9 a. m. till noon. compar 189.000.000 passengers, the total receipts

189,000,000 passengers, the total receipts being \$3,624,250, and the working ex-penses \$1,784,100, or 49 per cent. The average fare per passenger was two cents, which carried each passenger upwards of two miles, the single cent fare covering a distance of .58 miles; and the two-cent fare 2.30 miles. Ninety per cent. of the total passengers were accounted for by the one and two cent fares. m. till noon. The horse and automobile parade was

next discussed. It was pointed out by Dr. Carter and Ald. Fell that it would be next to impossible to hold the parade on any other day than the 24th, because In considering the question of pub lic ownership of such utilities as elec-tric tramways, water works, telephones, etc., etc., the difference in municipal the business men owning horses would not have time to decorate their wagons after working for half a day and they would have to go in the parade. THE OUTLOOK FOR SALMON CAN-NING, 1905.

NING, 1905. The Pacific Fisherman devotes con-siderable space in its April number to the preparations and prospects of the coming season's pack of salmon. It is stated that unrestrained optimism is evi-dent on Puget Sound and that a little more conservatism is manifest in British Columbia, although the packers here are hopeful of a big pack. In Alaska the same hopeful feeling does not seem to prevail and only a portion of the pres-ent cannery properties will be operated. Low water and other untoward condi-tions have hurt the prospects on the Co-lumbia River, and preparations are in-fluenced thereby. On the Washington, Oregon and California coast, nothing will be done until the prospects of the Puget Sound pack can be more fully de-termined.

termined. The Pacific Fisherman estimates that

Puget Sound pack can be more fully de-termined. The Pacific Fisherman estimates that the number of canneries to be operated during the present year with the excep-tion of the coast canneries, which are still in doubt, will be 139. It looks for-ward to a big season on Puget Sound, where preparations are being made on as large a scale as in 1901, the last year of the big run, and it is estimated that 25 canneries will be running. Every-where arcive preparations are going on in anticipation. Only 39 canneries will be operated on the Fraser river and English bay, as compared with 48 in 1901. Preparations are being made for a pack of 750,000 cases. The Pacific Fisherman says: "The Fraser river packers base their belief that the run in that section" will be smaller this year than in 1901 on the fact that the Ques-nel dam during that year effectually bar-red the progress of the fish to the spawned below the Quesnel in 1901." Its Vancouver correspondent is quoted as follows: "There will be hardly an exception to the statement that every cannery in B. C. will pack salmon this season—always providing the salmon are provided to pack. Of that there are now beginning to be yank the rest of humanity, and therefore subject to the same weaknesses. So they many be for-given if their sleep is disturbed with visions of the aborginal Siwaeb shaking in head and predicting 'Halo salmon.'" The general impression among the cannerymen of British Columbia is that the pack will not be a large one, al-tought to be a big year. The Indians are quoted as predicting a small run. This belief is based on the absence of snow from the big coast ranges of moun-tains, as indicated by the Siwash pro-verb, "Halo snow, halo salmon." Never-theless, the cannerymen are getting ready for a big run, in order not to be canght unawares. Several Matrimonial Events in

Wildey and John Welch had both been members of the English society, and when they came to the new country to make their homes they conceived the idea of found-ing the order on this side of the water. They published a call, and John Dun-can, John Cheatham and Richard Rush-worth responded April 13, 1819. They were members of the British order. which allowed any five members to or-ganize a legal lodge where none existed, and on April 26, 1819, the first lodge of Odd Fellows in the United States came into existence. W. C. Moresby, Esq., Secretary Victoria Day Celebration, Victoria, B. C.:
Dear Mr. Moresby, —In reply to yours is of the 17th instant, I will be pleased to render any assistance possible to interest the Indians in the celebration at Victoria. I have seen the chiefs at Clemclemaluts, Comeakeu and Khenipson reserves, and I think they will send two canoes, perhaps three. I will visit Valdez and Kuper islands and Chemainus reserves about May 1, and will let you know later the results.
I have been advised by Mr. Helmcken that the committee has cut out the ward dances. I am glad to know it. The Indian pagan dance is a great drawback to the civilization of the Indian; the money would be far better spent in encouraging legitimate sport amone them.

It was announced some time ago that the Dominion Government would shortly appoint a commission to investigate and report on the whole sub-ject of fishery matters in British Colum-bia, having in view international rela-tions as well, but whether the commis-sion can be appointed in time to deal with the situation during the present sea-son is not known.

The British Columbia Mining Record

tit The British Columbia Mining Record for April has been lying on our table for several days. It well deserves attention as a home product of much merit. The present number gives evidence of that scrupulous care so characteristic of the editor. If it lacks anything of lightness and popularity, which we do not look for, of course, in an industrial and more or less technical journal. it is made up in reliability and instructiveness. There several appendix articles worthy of perusal and note: "Transportation and Power Supply for Mines": "Hall Min-ing & Smelting Company's Smelter, Nel-son": "A New Gold Saver in New Zea-land": "Report of Dominion Superin-tendent of Mines": "Uniform Mining Statistics in Canada": and "Crow's Nest Pass Coal Company's Profits."

there is running through it a double love plot which proves the old adage as to the course of true love. A horrible tragedy fires the blood of the reader, carrying all his sympathy with the "In-visible Empire" that arose in the South, it is sympathy with the "In-visible Empire" that arose in the South, the secret of Klan which secured for Southern whites that justice which was denied them in the courts and in the legislatures. The war between the North and South is now far enough away to be viewed dispassionately, and doubtless Mr. Dixon's series of histori-cal novels dealing with that period will help the North to see things with the eyes of the South and will to some ex-tent explain the horrible lynchings of which we hear now and then and which disgrace that part of this continent.
