### C. P. R. LINER IN COLLISION.

#### Empress of Britain Runs Down Collier Schooner Helvetia, Crashing Into and Sinking the Schooner.—Officers and Crew Rescued by Steamer.—Empress Disabled and Returns to Port.

Quebec, July 28.—During a dense fog, the Canadian Pacific Railway's steamer Empress of Britain, which left Quebec at 7.15 on Friday evening, collided with the collier Helvetia, a collier from Sydney, bound to Quebec and Montreal, at 4.45 p.m. on Saturday evening. The collision of the disaster was between Cape Magdalen and Fame Point. The first news of the accident came to Quebec about six o'clock on Saturday evening via wireless, and this was followed by another despatch stating that the Empress was returning to Quebec with her bows badly crushed and her forecompartments filled with water.

#### CUT HELVETIA IN TWO.

As far as can be gathered the Empress struck the Helvetia amidships, cutting her in two, the injured vessel sinking shortly afterwards. Those on board the Helvetia, however, were all rescued and taken on board the Empress.

Captain Murray immediately gave orders to have his ship brought back to Quebec, and assistance was sent

to her, the wrecking steamer Lord Strathcona being despatched at once, while the C.P.R. tug cruiser, which was in Montreal, was also despatched to the scene, passing through here this morning, on its way to help the Empress.

#### RESCUED ALL ON BOARD.

The latest news of the disaster showed that Capt. Murray was proceeding through the dense fog cautiously, when suddenly and without warning the Helvetia was seen, but too late to avoid collision, the Empress plunging into the Helvetia and, it is said, cutting her in two. Successful efforts were at once made to rescue the captain and officers of the sinking vessel, a few moments after which she sank.

The occurrence naturally created consternation on the Empress, but this was soon quieted and Capt. Murray had an investigation as to the damages, which his ship had sustained. He then wired news of the disaster to the C.P.R. authorities and ordered his vessel to return to Quebec. The Britain had 29 passengers.

### Inglewood School.

The colored school at this place during the last quarter in session, has been re-enforced by children from the County Home, under the guardianship of Mr. Myers. Six were enrolled, one having a home provided elsewhere, left in two weeks; five being in attendance until end of term. These with five other white children, have swelled the daily average, which otherwise would have been very small.

Owing to removals and irregular attendance the percentage has not been what it should have been during the semi-annual school year. Out of thirteen children in the section only eight have had any real benefit. These deserve honorable mention for a fair degree of industry and perseverance. Those deserving credit in Grade VI are Ethel Tyler, Abby Jackson and Lila Clements. In Grade V, Jack Tyler, Preston Tyler, Gilbert Cuff and Luella Tyler. In Grade III two, and in Grade I eleven make up the whole number in actual attendance.

The majority in Grade I were eligible only for kindergarten work. A nice flag staff was given by Mr. John Tyler, and painting was done by Henry Jones. In view of the possibility of a school during the next school year, any unused books from the town school in any Grade under seven, will be thankfully received, also books suited to juvenile minds for the library.—COM.

### GERMANY WOULD LIVE IN PEACE.

Vancouver, July 26.—"The German menace, now occupying so much attention, is only a myth. Belief in its existence has been encouraged by French Chauvinists or ultra-patriots with the idea of embroiling Great Britain and Germany. I think that war between these two countries is unconceivable. It is unfortunate that an element among the British people misunderstands the aims and aspirations of my countrymen," said Dr. Herman Paasche, vice-president of the Reichstag of the German Federal Parliament, to a representative of the Canadian Press here today.

The distinguished visitor and his wife reached here this morning by the Canadian Pacific Railway from the east, and were met by the residents of the German Embassy. They will sail for the Orient on the Empress of India tomorrow.

### Annapolis County S. S. Association.

The following is a statement of the financial condition of the Annapolis County S. S. Association:

District	pledged	paid
No. 1 Middleton	\$51	\$14.30
No. 2 Lawrencetown	25	9.00
No. 3 Bridgetown	29	10.00
No. 4 Granville	20	11.08
No. 5 Clements	20	5.84
No. 6 Annapolis	26	14.20
No. 7 Nictaux	26	10.45
No. 8 Springfield	11	2.75

The County is pledged to pay \$160 to the Provincial Association aside from running expenses of County Association. We have a little over two months to meet our indebtedness and I appeal to every Sunday School Superintendent in the County to help remain a banner County, by sending a remittance at once, if possible, before the Annual County Sunday School Convention, which will be held at Bridgetown in the Baptist church, Aug. 23rd.

W. C. MacPHERSON,  
Secy.-Treas.

### SIR WILFRID ON SPEAKING TOUR.

Ottawa, July 15.—Sir Wilfrid Laurier and Lady Laurier are to leave tomorrow morning for a few weeks' quiet holiday at Sir Wilfrid's old home in Arthabaska, Quebec. Sir Wilfrid is in splendid health and spirits and is greatly enjoying the opportunities of his first summer in more than fifteen years free from the constant cares and responsibilities of office.

During the autumn months he will probably visit various points in eastern Canada and address Liberal meetings on the present political issues. He has received many requests from all parts of the Dominion asking him to speak at political meetings. The Liberal leaders in every province are evidently prepared to lose no time in the work of organization and education preparatory to the next federal election which is expected to follow the passing of the redistribution bill next session of parliament.

### A HORROR BY FIRE IN LONDON.

London, Eng., July 28.—Seven girls were killed, five girls were fatally injured and several others severely injured in a fire which occurred today in the heart of the city, occupied by celluloid Christmas card manufacturers, who employed many females.

### Middleton Preparing for Visit of Royalty.

(Outlook.) Mayor Goucher called a meeting of the Town Council and Council of the board of trade to consider arrangements for the proposed visit of the Duke of Connaught to Middleton. This meeting was held in the Town Hall on Monday afternoon. After lengthy deliberations a resolution was passed expressing appreciation of the proposed visit of Royalty to Middleton on Aug. 17th and appointing a committee to draw up a program to be submitted to a meeting of the citizens.

The committee was composed of the following—Mayor Goucher, A. L. Davidson, M.P., Fred E. Cox, F. L. Shafner, president of the board of trade, Dr. J. A. Sponagle, vice president, J. R. Harrison, president of the M.A.A.A., A. J. Morrison, president of the Middleton Driving Park Company, Coun. Andrews, J. H. Potter, W. B. Ross and W.F.C. Parsons. This committee met in the Town Hall on Thursday evening.

A public meeting was being held last evening to receive the report of the committee. But as we went to press early last evening, we are unable this week to give any information regarding the outcome of the meeting.

The report of the committee was to recommend that the town give an address, reception and an auto drive to the Duke of Connaught and party; that the MacDonald Greys Cadet Corps form the guard of honor; that Aug. 17th be declared a public holiday in Middleton and that the Middleton Driving Park Co. and the M.A.A.A. be requested to arrange a program of sports for that day.

### Nova Scotia Provincial Exhibition.

The following programme of Foot Races will be held in connection with the Horse Races at the Provincial Exhibition.

Wednesday, Sept. 11th. 220 and 440 yards, open to Maritime Colleges only. Half-mile and one-mile, open to all amateurs in the Maritime Provinces.

Thursday, Sept. 12th. Half-mile, one-mile and one-mile relay, open to all Maritime Colleges only. 220 and 440 yards and obstacle race open to amateurs in the Maritime Provinces.

Monday, Sept. 16th. 220, 440 yards, 1 mile and one mile open to all boys under sixteen years.

The prize for colleges is a valuable Silver Cup, to be won three times before becoming the property of the winner. In all other races, 1st prize, gold watch; 2nd, silver watch. These races will be sandwiched between the heats of the horse racing on the above dates.

The management is in correspondence with a skilled aviator and hopes to be able to announce in next issue that he has been secured. This will not be an airship, but an aeroplane of large design and one that will give daily flights of thirty minutes or over.

### Church Lads' Brigade

To the Editor of Monitor-Sentinel:—As all over Greater Britain there are now ex-members of the C.L.B., and requests have been made from many parts for the formation of means whereby these young men may be kept in touch one with the other, I have been asked to make it known as widely as I can that Headquarters propose to form an "Old Comrades" Association, similar in character to Old Boys' Association of our great public schools, and should develop that "esprit de corps" which has always been the aim of the C. L. B.

Colonel Gee, Secretary and C.S.O., will be in Canada from August 10th, 1912, and will be glad to receive the names and address of any of our old members of the C.L.B., which should be sent to him at the Post Office at Montreal. He will also be glad to see personally any who are able to call upon him.

Truly yours,  
ERNEST UNDERWOOD,  
The Rectory, Bridgetown.

### HYMENEAL

MILES—MOORE.

A very quiet and pretty wedding took place on Tuesday, July 16th at North Williamston, the principals being W. F. Miles of Sussex, N.B., and Miss Edith M. Moore, youngest daughter of Mr. and Mrs. John Moore. The ceremony took place at 11.30 a.m., at the home of the bride. The officiating clergyman was Rev. J. A. Hart, former pastor of the Methodist church at Lawrencetown. Miss Bessie Miller of Lawrencetown, played the wedding march.

The bride looked charming in a gown of white silk, trimmed handsomely with apique trimmings. She carried a shower bouquet of white roses. A wedding luncheon was served immediately after the ceremony and the happy couple then started on their honeymoon trip. On their return Mr. and Mrs. Miles will reside in Sussex, N.B.

Mrs. Miles was a very highly respected young lady. She moved to this community about five years ago with her parents, winning many friends during her stay here, and leaves with the best wishes of her many friends.

During the past year Mrs. Miles has held the position as teacher in the city of St. John, where she won many friends, who presented her with several nice gifts on taking her departure. The bride was the recipient of several handsome and useful presents. The gift of the groom was an elegant piano.

Mr. Miles is a popular and highly esteemed young man and occupies the position in the business of Miles and Eveleigh, Sussex, N.B.—COM.

(Outlook please copy.)

### WHITMAN—LEWIS.

In the home of Mr. and Mrs. David W. Lewis, Skowhegan, at high noon on Tuesday, July 26th, Miss Berle Ethel Lewis was united in marriage to James Ernest Whitman by the Rev. Joshua M. Frost of Auburn, Maine.

The bridal procession consisted of the officiating clergyman and Ruth Gwendolyn Pierpont, carrying the two rings, Harry Rosecoe Pierpont, the best man, Miss Beulah May Ireland as bridesmaid and the bride leaning on the arm of her father. The double ring ceremony was used. After extending congratulations, those in attendance inspected the numerous and valuable presents, following which refreshments were served.

Miss Lewis was recently graduated from the high school where she was exceedingly popular, as is her husband among the young men of the place.

An interesting feature connected with the service was the former relation the minister bore to the families of the bride and groom. Mr. Frost received the parents of both into the Centenary Methodist Episcopal church, he married both couples and baptized the bride in infancy.

The house was beautifully decorated with running vines and potted flowering plants, while the rings were exchanged and the promises made beneath an arbor of evergreen and wedding bells.

The bridal gown was white silk mesaline trimmed with Irish lace and the flowers carried were white carnations. The bridesmaid wore white embroidered voile and she carried pink carnations. The gifts included cut glass, silver and linen. The newly married couple will make Skowhegan their home.—COM.

### GIDNEY—VAN BURKIRK.

A very pretty wedding took place at the home of Mr. and Mrs. Thomas Woodman, of Digby, on Wednesday afternoon, July 17th, when their daughter, Miss Nellie V. VanBuskirk, became the wife of Mr. Edwin E. Gidney, son of Councillor E. A. Gidney, of Mink Cove. The marriage ceremony was performed by Rev. L. Danforth. The bride was handsomely attired in white and carried a large bouquet of white roses. Her bridesmaid was Miss Gretchen Vroom, of Deep Brook. The groom was attended by Mr. Edwin Vroom, brother of the bridesmaid. The bride was the recipient of some elegant and useful presents. After luncheon was served and a pleasant hour spent by the guests, the happy young couple left for their home at Mink Cove in Councillor Gidney's automobile, the genial councillor and Mrs. Gidney accompanying them.—Digby Courier.

### Interesting Letter from Rev. G. H. Mellick.

To the Editor of Monitor-Sentinel:—I am thinking a few lines from us will be of interest to our people. Our friends in Lawrencetown gave us this month for a rest and we are enjoying it very much.

We came to "The Island" via Pictou, stopping a night at Truro. The journey was very pleasant. We wished the sea voyage was longer. At Charlottetown we were entertained by Rev. and Mrs. Fash, and their kind attention made our stay there very enjoyable. Rev. Mr. Fash is much beloved by his people in Charlottetown and he is doing good work.

We went from Charlottetown to Victoria, by a small steamer and the trip was delightful. As we skirted the shore we had a fine view of a beautiful part of the Island. We were accompanied by quite a number of delegates going to the Baptist Association at Tryan. Anybody who claimed to be a Baptist and was bound for the Association, of that lovely trip of twenty-five miles for twenty-five cents, and our word was accepted as sufficient credentials. No wonder we like the Island! We were met at the boat by friends who took us to their homes and entertained us for three or four days, and regretted we were leaving so soon.

Tryan is one of the most beautiful and prosperous farming districts on the Island. The people are very comfortably well to do. Our host is a retired farmer. He has a fine estate in a black fox ranch. He and his associates bought a pair of foxes for \$2,000 about a year ago. A litter of five came this spring, and they were sold for \$20,000, so the original pair have already paid for themselves. There are quite a number of fox ranches on the Island. Large money has been made in the business, but these high prices cannot be expected to continue very long. The Island is said to be the native home of the black fox, but we could see them there just as well in Nova Scotia as they do here. The ranch is easily constructed. An acre or so of nice brush or wood land fenced with wire and properly secured would accommodate a large number of foxes. This large enclosure is subdivided, so each fox or litter is kept in its individual enclosure except during certain seasons. We visited a mink ranch. This was all under cover, but the mink are said to do as well this way as in the open. I doubt it, however. If they succeed in these new lines as they seem confident they will the Island will become a very wealthy province. It is a wonder more tourists do not take advantage of the delightful summer climate here. I think probably the Islanders like to look after their homes and hogs better than they do catering to tourists and so they do not give the attention tourists demand.

Automobiles are not allowed to run on the Island. While this does not suit the tourists, generally, it does give us a sense of security to know they are beyond the sea. If the liquor law were as effective as the auto law there would be still greater comfort over here.

Prohibition does not entirely prohibit but it crowds the liquor business into a very close and uncomfortable position. They tell us the Tory government is starting well. They are widening the roads and requiring all road fences to be put back to give the proper width.

The crops are looking fine. Hay, oats, wheat, barley and potatoes are the principal crops. The potato bug is a terrible pest. A man told me there was no doubt but the devil made the potato bug. We would perhaps be willing to suffer that pest if Satan had confined his work to the bug.

We are having a delightful time. We expect to return Aug. 2nd.

H. G. MELLICK.

NOTE.—The Editor regrets that this came to hand too late for publication last week.

### VISIT OF GOVERNOR-GENERAL

#### Great Preparations in Halifax and Elsewhere to Celebrate Visit of Canada's Governor-General, Duke of Connaught, and Party.—Regatta. Naval Review, Etc.

The committee having in charge the arrangements for the Duke of Connaught's visit have drawn up a programme for the reception of His Royal Highness, which has been accepted.

Citizens are asked to decorate and make preparations to give the Governor-General a Royal reception. The Duke and his party including Princess Patricia, will visit Halifax August 14th and 15th. If Her Highness' health will permit the Duchess of Connaught will also be in the party. The party will reach here on the "Earl Grey" on Tuesday evening, August 14th. Wednesday will be declared a public holiday in Halifax and Dartmouth.

Wednesday morning the party will land at the Dockyard and addresses will be presented.

At noon the party goes to Memorial Tower and will be met by the Canadian Club and Boy Scouts and a chorus of five hundred children and later the dedication address will be delivered.

The royal party will then lunch at the Waegwoltic.

The regatta on the Arm will commence at three o'clock, and in the evening an illumination on the Arm will be the feature.

On Thursday, the Duke, who is Field Marshal of the British army, will review the Naval Brigade, the troops of the fortresses and the Veterans of 1866, on the Common, and present certificates to candidates of the Nova Scotia Branch of St. John Ambulance Association.

The Duke the same afternoon will lay the corner stone of Dalhousie, and will then meet the Halifax Historical Society and unveil a bronze tablet to Sir John Moore, and later

will visit the Naval College and the Niobe. He will later visit the Yacht Squadron and then attend an official dinner at Government House.

### PROGRAM THROUGH THE VALLEY.

The approaching visit of the Duke and Duchess of Connaught and Princess Patricia with their party is awakening much interest in Nova Scotia. The city and towns to be visited are planning a royal welcome.

The Kentville Advertiser gives their program as follows:—

The party will spend Aug. 14th and 15th at Halifax. They leave Halifax on the morning of the 16th for a trip through the Valley. The private car of Mr. Giffins "Sanspareil" will be part of the Royal train and Mr. Giffins will accompany them over the D. A. R. line. The train will arrive at Windsor at 11.30 a.m., and leave there at 1.30. Luncheon will be served on the train between Windsor and Wolfville.

Arriving at Wolfville at 2.30 p.m., the party will leave the train there and after the welcome from the town they will take an automobile drive through various points, landing at Kentville some time in the afternoon.

At Kentville a reception will be tendered the Royal visitors, who will remain here until the morning of August 17th, leaving for Middleton at 8.17 and arriving there at 9.30. There another auto trip has been arranged and the party goes on to Annapolis, arriving at twelve noon. They leave Annapolis at 2 p.m. for Digby, and after a stop there, His Royal Highness and party will leave their train and take the S. S. Earl Gray for St. John.

### DIGBY LIFE-SAVING STATION

Work is going on at the life-saving station at Bay View. The new boat "Daring," commanded by Capt. John W. Hayden, is manned as follows:—James Ellis, engineer; Fred Adams, mate; Wallie Abbott, Edw. Bremmer, Samuel Wilson, Orbin Condon, sailors; Albert Hersey, cook. Temporary quarters have been secured which will be used until the new station is built. Capt. Hayden and his crew keep the "Daring" in excellent condition and ready to go to sea at a moment's notice.—Digby Courier.

### EXPRESS OFFICIALS HERE TODAY.

V.G.R. Vickers, superintendent of the Atlantic Division and Foreign Department of the Dominion Express Company, is expected here this evening in his private car and will be accompanied by members of the Railway Commission. Mr. Vickers' visit to the province is for the purpose of arranging with the Commission the area within which the Express Company will be asked to receive and deliver parcels and packages free of cartage charges. Already several places in Nova Scotia are asking free delivery, a privilege which Yarmouth has had for years.—Yarmouth Times.

THE FARM

PEAS FOR DAIRY COWS.

Peas Make One of the Best of Feeds for Dairy Cows. They Contain a Very High Per Cent of Protein. The Straw Also Makes a Good Feed. They Can be Successfully Grown With Oats.

Analysis shows that the Canada field pea contains 23.7 per cent. of protein, 50.2 per cent. of nitrogen free extract, 8 per cent. of fat, 2.4 per cent. ash and 15 per cent. water. As compared with whole cottonseed the peas have about 4 per cent. more protein, 22 per cent. more nitrogen free extract, while cottonseed has 19 per cent. more fat, 1.6 per cent. more ash and about 6 per cent. less water. Thus, we see, from these figures, that this product of our northern latitude is quite as able to furnish us with that most desirable and necessary element, protein, as is the far-famed seed of the cotton plant.

Peas are rich in the constituents which produce muscle, blood and bone and consequently are valuable for all growing animals as well as those at work. The high per cent. of protein also makes it an excellent grain for mixing with others to compound a dairy ration. For feeding the dairy cows, this grain, however, should be ground, according to the careful observations of those who have attempted to determine the best manner in which to feed it. However, pea meal has a tendency to pack and so mechanical condition is improved when mixed with other feeds so as to lighten it up.

Not only is the grain of this plant excellent when compounding dairy rations, but the straw also has considerable value in this regard. The plant, being a nitrogen-gathering one like clover and other legumes, stores up within its different parts, a large amount of nitrogenous material. This makes the straw as well as the grain valuable for feeding purposes.

CULTURAL OPERATIONS.

One of the difficult operations in connection with the growing of this crop is its harvesting. Growers have found, however, that by mixing peas and oats together this operation becomes as easily performed as the harvesting of oats or other grains that stand up well, and inasmuch as the grain should be mixed with other kinds of feeding it is not necessary that they should be grown separately. It has been found that oats make an exceptionally good grain to grow peas with since they mature in nearly the same period, and also because the resultant mixture of grain is admirably adapted to the feeding of dairy animals. For this purpose the grain should be mixed so that about two-thirds will be oats. Then, too in the event that one would run short of hay or fodder while this crop is maturing he could cut a whole or part of his field and put it in the mow for feeding as hay. The result

would be exceedingly satisfactory since the product would contain quite as much protein as clover hay itself. It is, however, a little more difficult to secure than the clover crop, but with this exception, the grower would have little to feel disappointed over.

The growing of peas on the farm where dairy cows are kept would have a tendency to reduce the amount expended for concentrates, which are now being bought in exceedingly large quantities for the balancing up of the dairy feed. By growing a liberal amount of peas and oats together, one can entirely eliminate the necessity of purchasing cottonseed meal and other feeds containing a high per cent. of protein and still continue to feed to his animals a well-balanced ration so that none of the feed nutrients need be fed in such large quantities as to make the grain an uneconomical one.

A still further advantage in the growth of this plant upon the farm is because of its being a legume and having the power to gather nitrogen from the air and leave a portion in the soil, thus supplying the land with additional nitrogen, thereby saving on the fertilizing bill. The excellent mechanical condition of the soil after a crop of peas have been grown testifies to the advantage along the line mentioned.—M. F.

NOT ENOUGH EDUCATED FARMERS

The United States Secretary of Agriculture said recently: "The department of agriculture is organizing just now to take farm demonstration work into the northern states. Two classes of men are required for this work: First, in each county a first-rate farmer who has been a success on his farm and who understands practically, without much theory except what he may have incidentally picked up, how to handle the soil, the plant, and the animal; second, over large districts and states a different class of men is wanted, who have an agricultural college training combined with its application to practice in the field. As we read the daily papers and see the reports of the thousands of young men who are graduated in law throughout the country, the reflection naturally comes, what a pity that the great demand of the farm for intelligent men is not being more considered by our educational institutions. There is not law work for more than a small per cent. of these young men. No doubt the education and mental training they have had will make them brighter men, but there are no jobs waiting for them, that is for more than a very small percentage of them, while the fields are crying aloud for trained men. Housekeepers are complaining of the cost of living. It would seem to be wise for our educators in their national meetings to consider these problems. It might be wise to consider about how

many young lawyers will be needed in the next year to take the place of the older men who are dropping out. That could be very easily determined. Then if the attention of this class of students were called to the demand of the industries for educated men, a different direction might be given to many young men who seem to be drawing their bows at a venture.

"This applies to more than the lawyer. There are no doubt, far more young physicians being turned out from the educational institutions of the country than there are patients for. Wrong direction has been given to the education of many young men and yet there is nothing more difficult to change than the old systems of education.

"In his sixth annual report (1911) as president of the Carnegie Foundation for the Advancement of Teaching Dr. Henry S. Pritchett says: "According to the census tables there were in the United States in 1900, 132,080 physicians and surgeons. In the bulletin on medical education issued by the foundation in 1910, it was calculated after careful investigation that two thousand graduates annually from the medical schools would furnish an ample supply of new physicians to take the places left vacant by death and other causes, and to keep pace with the growth of population. Assuming, and it is evidently an extravagant assumption, that the proportion of lawyers to the population should be as large as the proportion of physicians, 1,700 graduates annually from the law schools would be sufficient to maintain even the present crowded stage of the legal profession. As a matter of fact, in June, 1910, the number of students graduated by the law schools numbered 4,183; and this takes no account of the large percentage of lawyers who are admitted to the bar without having received a law school diploma. If we place the per capita need of a physician, and disregard all who enter the profession without completing successfully a law school course, it is evident that the output of the law schools of the present day is far in excess of any necessary demand."

FINE PROFITS IN STRAWBERRIES.

Farmers Who Look After Them Properly Make Big Money.
Saturday, July 20.—Although a great quantity of strawberries is grown in the St. John river valley, it is often pointed out that not one-tenth as many are raised as the land would very easily and profitably produce.
Farmers who raise strawberries alone say that there is great profit in them. One man with a cultivation of five acres, says he can realize \$7,000 profit in one year. Another

A bite of this and a taste of that, all day long, dulls the appetite and weakens the digestion.

Restore your stomach to healthy vigor by taking a Na-Dru-Co Dyspepsia Tablet after each meal—and cut out the "pickings".

Na-Dru-Co Dyspepsia Tablets

are the best friends for sufferers from indigestion and dyspepsia. 50c. a Box at your Druggist's. Made by the National Drug and Chemical Co. of Canada, Limited.

149

with three and a half acres, can earn \$5,000. Considering the success of those in the business and the constant demand for the fruit, the question is often asked, why more farmers do not go in for the culture of strawberries.

The farmer referred to as owning five acres of cultivated land, at Fan-joy's Point, does all the necessary work about the vines himself in the winter and spring, but in "harvest time" he employs no less than fifty pickers, nearly all boys and girls. These he pays at the rate of one cent per box. In the course of a day, they can easily pick two hundred boxes and thus earn from \$12 to \$15 per week.

He estimates that the total cost of raising, picking, packing, etc., is not more than three cents per box, and in the nearby markets he can sell at from six to ten cents per box a profit of from 100 to 250 per cent. By shipping his produce to more remote markets, he can get as high as thirty-five cents a box.

This producer ships in quantities of one thousand boxes.
Another man who has a farm of three acres at Gagetown corroborates what this farmer says as regard the profit derived from the cultivation.
A large quantity of strawberries came down the river during the last few days and were sold at the boats for six and seven cents a box by the crate. Toward the latter part of last week the berries were very scarce and it was thought that the season was beginning to close and prices soared as high as twelve and thirteen cents per box.

It is said that about half the berries shipped from up river go through the city to the States. People often ask the cause of this. But the cause is easily explained when the retail prices there are quoted—thirty cents per box. Of course there is the duty, which is a great handicap.

THE VALUE OF COW TESTING.

One of the most encouraging lines of work which the United States department of agriculture is carrying on in the south is the institution of herd records on dairy farms. By this means the unprofitable cow is detected and can be disposed of for slaughter. The heifer calves from the profitable cows are raised to take the place of the unprofitable animals. In this way the quality of the herd is steadily improved. The daily weighing of milk and the testing for butterfat enable the dairyman to feed the individual animals according to the production and to select such feeds for the ration as are shown to give the best results.

The department receives many letters from dairymen of the south bearing on the value of this work. J.K. Morrison, a dairyman of Grenada, Mississippi, writes under date of March 9th as follows:
"I write to express my great appreciation of the work done for me by your department.
From the records kept, I found two cows that produced over \$200 profit. One, \$110.88, the other \$104.80. A two-year-old heifer made \$97.50 net profit. I began to test with six cows. I have sold two of them as they were unsatisfactory. I have four more that have not finished the year's test, but I will probably

sell three of them and replace with registered stock.
"I built a concrete floor in my dairy barn. Have laid the foundation for a silo, have ordered stanchions and a registered bull.
"The butter I sell is put up in pasteboard cartons and brings thirty-five cents per pound. I get an average of twenty-eight cents for milk.
"I wish to assure you as the head of the dairy department that I shall help to spread the gospel of better cows, better methods of handling, and more feeding of carbohydrate value.
"Excessive use of meal and hulls is doing much to keep us down in dairy work in the south. Cheap protein should be a help and not a hindrance. I thank you that you are trying to help the little dairymen.
"I shall not be satisfied until I have a dairy of ten cows producing a net profit of \$100 each. I should do this at an early date with the aid of the Babcock tester, the scales, a silo, and more grain which I have to raise this season. I am thoroughly imbued with the dairying spirit and hope that I can repay the department for the aid given me by helping others."

Canada's Premier in London

(Canadian Press.)
London, July 23—Over five hundred people including several of London's merchant princes, attended the Chamber of Commerce banquet to Right Hon. P. L. Borden, last evening when Lord Desborough presided and the Canadian premier was given an enthusiastic reception. Amongst those present were the Duke of Argyll, Lord Strathcona, Lord Emmott Cole, Governor of the Bank of England, Sir C. Anderson, George A. Drummond, Sir Robert Peeks and all the visiting Canadian ministers with the exception of Hon. L. P. Pelletier, who was indisposed.
Premier Borden responded to the toast of "Our Guests," and was received with cheers. He declared that the Canadian ministers had everywhere been received in the most cordial manner and there was every reason to believe that good would result from their mission. He and his colleagues were assured they could bring with them a message of greeting, friendship and co-operation to the people of the British Isles. The people of Canada like those of the other overseas Dominions were not afraid of the responsibilities of empire however great they might be. In Canada the King had no more loyal or devoted subjects in the Dominion than those of French descent. The two races were working together in full consciousness of the responsibility which the greatness of their heritage imposed upon them. He felt confident that the overseas Dominions were working together, endowed with a sense of unity and responsibility as an essential for the maintenance of the empire and as an accessory to this were keenly alive to the importance of the best steamship and cable communication.

DOMINION EXPERIMENTAL FARMS.

The dominion experimental farms system involves the central farm situated at Ottawa and branch farms and stations at the following points: Charlottetown, P.E.I.; Nappan and Kentville, N.S.; Cape Rouge and Ste Anne de la Pocatiere, Que.; Brandon, Man.; Indian Head, Rosthern and Scott, Sask.; Lehighbridge and Lacombe, Alta.; Agassiz, Invermere and Sydney, C.B.

In order to lay before the country the character and extent of the work undertaken at these farms for the benefit of agriculture, J. H. Grisdale, the director, appointed last year to succeed Dr. Saunders, was called upon during the last session of parliament to explain the whole matter to the select standing committee on agriculture and colonization. Following a more or less lucid description of the farms and their work, Mr. Grisdale answered many questions which brought out much useful information. During the course of the evidence, it was shown that at the central farm it cost \$11.77 per acre for cultural operations to grow farm crops which yield a return of \$45.47 per acre, as contrasted with ten dollars and sixteen and one-half for the average farmer in same locality. The whole subject as presented has been printed in a bulletin of twenty-two pages which may be procured free by applying to the publication branch, Department of Agriculture, Ottawa.

GEORGE WANTED GRACE'S HELP

"Grace," said he enthusiastically, "I have a question to ask you." "Yes," she said softly, and prepared to listen.

Wilson's Election Predicted

The New York World, the Baltimore Sun and the New York Times are giving the Wilson candidacy the most enthusiastic support, and predicting victory.

"The Democratic party at last has broken the shackles. It has emancipated itself. It has rehabilitated itself in power and principle.

"Woodrow Wilson will be the next president of the United States. But he will be more than that. He will be the first president of the United States in a generation to go into office owing favors to nobody except the American people and under obligations to nothing except the general welfare.

"No political boss brought about his nomination. No political machine carried his candidacy to victory. No coterie of Wall street financiers provided the money to finance his campaign.

"Governor Wilson's nomination means that the rule of the boss is over. It means that the partnership between corrupt politics and corrupt business in national politics is forever dissolved.

"The Taft campaign is marked by a rather discouraging tone, and, out in the Middle West, La Follette keeps on demanding from Theodore Roosevelt a public and detailed account of the money received for the colonel's campaign expenditures and the matter of its distribution.

What Some Women Have Done to Earn Money

One housemother, the wife of a badly paid clergyman in a country town, gave the parishioners to understand that she did not wish to be excused from subscribing to missions and charities, and that she could not detest these subscriptions from the salary that barely met the living expenses of her household.

Three times a week she baked a big batch of brown bread according to a recipe of her own, acknowledged to be incomparable. She soon had regular customers for all the loaves she could turn out.

It may be said that this hardly comes under the head of "self-support." In reality, she saved the money she would otherwise have drawn from the salary designed to maintain the clergyman and family, enabling her husband and children to live more comfortably than if she had no other treasury.

HOW TWO SISTERS SOLVED A PROBLEM.

Two sisters in a southern city had the care of an invalid brother upon their consciences and hearts and little provision for their own needs. None of the three was young or vigorous.

At first they had but a dozen or so families upon their list of customers. These spread the story of their brave enterprise and the admirable quality of the biscuits. Next they began to get orders from bakers, then from women's exchanges all over the country.

An energetic New England spinner left to make a living for herself and aged mother, cast about in her mind for as she put it, "some honest means of support that did not oblige her to stand behind a counter or take in the sewing."

For a dozen years past her stamp upon pickles, preserves, jelly, branched fruit chutney, etc. is considered by grocers and consumers as a guarantee of the quality of what brings the highest prices of any similar products in this country.

PICKLES FOUNDATION OF FORTUNE.

A woman whose husband had served in the civil war and lost heavily by reason of his absence from home set her active wits to work to get the means for educating their children.

QUICK OF COMPREHENSION.

A celebrated Scottish lawyer had to address the Caledonian equivalent of our Supreme Court. His "pleading" occupied an entire day. After seven hours of almost continuous oratory he went home to supper and was asked to conduct family worship.

Fatal Accidents While Filling Gas Tanks

A report from Argyle, Yarmouth County, states that a summer visitor from New York, has met an accidental death.

The young man was William S. Bryant, junior, one of the visitors at the Ardnamurchan Club House, who was in the act of filling the acetylene gas tank with carbon, hoisting the can by a block and tackle.

The young man was a great favorite with those at the club, very athletic in his build and a good sportsman. He was the only son, and leaves, besides his parents, five sisters, who are all prostrate at the news of his untimely end.

MINOR TALENT TURNED TO ACCOUNT

An instance of what a woman may do whose one available talent is of a yet humble order may be of more practical value to our correspondent. A widow, the mother of a boy of eight and a girl of six, lived in a hustling manufacturing town that was in a fair way to grow to a city.

Like our correspondent, she could not endure the thought of parting with her children. If she could but keep the little household together until the boy was big enough to go to work she would be satisfied.

The bundles were left for her as they went to work and called for on the way home. In the course of time the boy was big enough to deliver the parcels of neatly mended garments and to call for the others.

The "gentlemen friends" of the working girls, hearing of the gallant fight the widow was making and of the wonders accomplished by her needle prolonging the usefulness of garments supposed to be past worthy craved permission to be numbered among her regular customers.

Each of the foregoing sketches from real life has the same moral. First, find out what you can do best, and, when you do it, see to it that the task is performed as if the success of your whole undertaking depended on the way in which that particular job was turned off.

Chatham, Ont., July 16.—Twenty-two head of cattle were killed by lightning yesterday afternoon on the farm of Mrs. Ferguson in Harwich township.

JOHN BOARD OF TRADE COMPANY TO SET OUT ABOUT 2,000 TREES NEXT SPRING.

Thursday, July 19.—The St. John Board of Trade Orchard Company has made another step towards the establishment of model fruit farms in the province.

The plan of providing these model fruit farms has been taken up by several boards of trade in the province and these farms will be under the direction of the government experts for six years and accurate accounts of the expenditure and income will be kept so that it can be shown just how successfully this kind of a farm can be operated in New Brunswick.

Members of the St. John company seem very enthusiastic over the land secured by them and it is believed that the farm will be successful from the start.

Edmonton, Alta., July 23.—Forty engineering crews, consisting of eight hundred men with teams and pack horses, will be sent into the field at once to make preliminary surveys for the Northern Territorial Railway Company's line from Edmonton to tide water at Fort Churchill on Hudson's bay country to Port Essington system of 1,450 miles, from the Hudson's bay coast, connecting Edmonton with Lac La Biche, Fort McMurray and Lake Athabasca.

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first then stronger as the sores began to look better, until after three weeks, the sores have healed, and best of all the hair is growing well and is not white as is most always the case in horse wounds.

Chatham, Ont., July 16.—Twenty-two head of cattle were killed by lightning yesterday afternoon on the farm of Mrs. Ferguson in Harwich township.

NOW SHE KNOWS.

"Yes, Henry, I know I'm a silly girl, and don't go in for politics and all that kind of thing, as you do, but I will do my best to make you a good wife, and you can teach me all about them, you know."

"So I can my darling," he cried rapturously, "and you will be an apt pupil I am sure. Of course, it won't all come at once but you will soon be able to play the hostess to my friends as well as any of their wives. Suppose we were to begin now?"

"Oh, yes, do! Now, there's one thing I never could understand. What do they mean by reciprocity? You must explain it in a simple manner, Henry, or I shall not comprehend."

"I will," said he, fondly. "It amounts to this: You receive something and give something in return. Suppose you give me a kiss (like this), then I should return it (like this). That's reciprocity. Do you understand?"

"Oh, yes! Isn't it nice!" exclaimed the unsophisticated damsel. "Now I know why women are so anxious to get into Parliament."

PUT TO THE TEST.

Fitzdaube has all the sensitiveness and color of the true artist, and does not mind showing it.

His neighbors are really very nice people, but they have absolutely no taste, and Fitzdaube frequently criticizes them very severely in the bosom of his family.

One morning little Ethelinda Fitzdaube knocked loudly at the neighbor's front door.

"Show me the new rug in your drawing room?" she said, with childish impetuosity.

The good lady took her to the room and Ethelinda planted herself in a chair and stared at the gaudy rug.

She stared until her eyes watered, and still she spoke not.

Her host was just beginning to wonder what was the matter, when at last Ethelinda pronounced her verdict.

"Well, it doesn't make me sick!" she declared, decisively.

THE VILLAGE FROG.

Under the lily pads and things The big old bullfrog squats; His greenish hide is thick, b'jings, With warts and lumps and knots, And when he swells himself and sings His voice is rough in spots.

His thighs are thick and big and strong Yet he enjoys his ease; And when the echoes of his song Are borne upon the breeze His normal siop, unless I'm wrong, Is forty-five degrees.

Week in, week out, from morn till night, You can hear his bellows blow; You can hear him sound his gong all right, With measured beat, and slow, Like a bruiser spoiling, or a fight, When there isn't any foe.

On Sundays come the village boys, With fishing poles, red rags, And sticks and stones, and then his voice Mysteriously lags, He hides himself—he has no choice— Down deep amid the flags.

Squatting, hiding, bellowing, Onward through life he goes; He eats a little, tries to sing, And warbles through his nose, He doesn't have to do a thing To earn a night's repose.

Thanks, thanks to thee, my warty friend, For the lesson thou has taught; Thus, in the great frogpond of life, Our fortunes must be wrought; There's nothing else on earth to do But keep from getting caught.

THROWN IN.

An alert little five-year-old was taking a walk in a city park with her mother for the first time, and when they arrived at the boat landing where the swan boats were waiting for passengers, little Elsie pulled away and declared very vigorously that she did not want to go, and, as her mother urged her, she broke into tears.

This sudden fear was so unusual that her mother could not understand it until she heard the boatman's call:

"Come along, come along—ride clear around the pond—only five cents for ladies and gentlemen—children thrown in."

M. K. PIPER PROPRIETOR AND PUBLISHER WEDNESDAY, JULY 31, 1912.

The "Maritime Merchant" took an auto trip through the Valley last week and gives an interesting account of the trip.

The "Merchant" discourses entertainingly of the various attractions and many improvements noted while passing from town to town and in summing up its observations it states that scarcely a single note of dissatisfaction was heard with regard to industrial or business conditions the whole journey through; from which the "Merchant" concludes that "the trade outlook for the fall season is excellent, and that the Valley generally has never been in better condition than it is today."

Bridgetown seems to have made a good impression on the "Merchant" and following are its observations:—"Bridgetown, we should think, is at all times a nice looking village, and at this season of the year it is unquestionably at its best. The foliage along the main street, in fact on all the streets, bears evidence to the fact that some prodigious tree planting must have been done during the early history of the place. We have a notion that we should like to holiday at Bridgetown, and perhaps if the fates are propitious some day we shall. Talking with several "Merchant" subscribers we learned that business in Bridgetown this summer has been the best for years. Here as elsewhere from Windsor westward the stores have felt the benefit of last year's apple crop. Debts that had accumulated for two or three seasons have been liquidated, so that even if the pack of apples this year is only normal the situation will not be a poor one. There are a few factories at Bridgetown, all running full time. Everyone who wants work can get it, which is always a satisfactory situation no matter how large or small the community. The apple growers are talking about a half crop, as compared with last year."

What are Bridgetown's civic fathers and board of trade doing that they passively acquiesce in letting the Governor-General and his suite pass through Bridgetown without even a stop at this, one of the most important and charming towns in the Valley, while our sister towns of Middleton and Annapolis are each honored by the favor of a visit from these representatives of the Royal family and the Dominion chief official?

It is not too late now to communicate with the secretary of His Royal Highness, the Duke, and ask him to do this community the favor of receiving a civic address to be presented him on his arrival here in his touring car. Those who are familiar with the Duke's character state that his affability is unfeigned, and that such a request would meet with his willing compliance is quite within the possibilities. Come, Bridgetown! Don't be caught napping. Wake up!

Nictaux, July 29th.—The tennis club held an ice cream social last Thursday evening on the tennis grounds. All over the night was cold and damp. Lucy realized nearly \$25.00. They purpose having a tennis tea in the near future.

Hon. A. P. and Mrs. Welton of Kingston recently visited Miss Ana Morse.

Mrs. Ada Nichols of Lawrencetown is visiting Mrs. Harry Morse.

Miss Marie Spurr obtained her 'B' certificate.

Mr. and Mrs. Will Smith of Lawrence, Mass., are here with their auto, and are spending two weeks with Mr. and Mrs. Edw. Smith.

Mr. Frank Chipman had the misfortune to lose a very nice house on Sunday, 21st. It ate mixed Paris green and flour and only lived a few hours.

Rushed work is going on at three Nictaux granite quarries. Mr. Kline has twelve men here from Halifax getting out paving stones and last week several teams were busy hauling them to Coleman's crossing, where they are loading cars.

A missionary concert, under the auspices of the W.M.A.S., was held in the Baptist church on Sunday evening. One of the interesting features of the program was a short address by Miss Jennie Corbett, missionary elect, who goes to India in October.

Upper Granville, July 29th.—Mrs. Moran of Freeport, Digby Co., has been visiting relatives in this and other parts of the Valley.

Miss Elnor of Bridgewater, is the guest of her uncle, Mr. Gaius Elnor.

Mrs. Edwin Dodge is domiciled for a while with her nephew, Mr. E. P. Fellows.

Miss Annie Ruggles, near Bear River, has been engaged as teacher in Chesley Section for the coming year.

A quartette of young ladies leave shortly for the West, two to pursue their profession as teachers, and two engaging in the millinery art.

Miss Charlotte Walker resumes teaching at Oakdene Academy, Bear River, where she formerly taught.

Miss Claire Parker is engaged as teacher at North Weymouth, Digby County.

Lower Granville, July 29th.—Mrs. Laura Bray and children of Salem, Mass., are visiting Mrs. Bray's parents, Mr. and Mrs. James Morrison, senior.

Mr. Holly of Lynn, has been the guest of Mr. and Mrs. Gilbert Shafner, the past week.

Ernest Shafner, Esq., of Cleveland, Ohio, made his father, H. W. Shafner Esq., a brief visit last week.

Mrs. Wright, senior, and Mrs. Wright, junior, of Digby, visited Mr. and Mrs. Ralph Bohner last week.

DOG-DAYS EXAMS, GENERALLY DISAPPROVED.

To the Editor of the Chronicle:—Sir—I was much pleased with your editorial on the foolish practise of holding the Provincial Examinations during what is usually the hottest week in the year. Your views are endorsed on all sides and it seems strange, that what is so universally desired, should be withheld, namely, a closing of the school, say about the middle of June.

You will be heartily upheld if you continue to press this matter on those in authority who are resisting what is now nearly a universal demand.

J. A. SPONAGLE Middleton, July 16th.

Crowe, Elliott & Co., Ltd. Stores at BRIDGETOWN, MIDDLETON & ANNAPOLIS

**LOCAL AND SPECIAL**

Rev. O. C. S. Wallace, D.D., is visiting friends and relatives in Nova Scotia.

Robert Smith of Shelburne and Edna Fowler of Upper Clyde, N.S., were among the injured in the Regina cyclone.

Dr. and Mrs. Horsfall are spending the summer at their bungalow near Annapolis.

The merchants of Kentville are closing their stores on Wednesday afternoons during July and August.

The Maritime Farmer of July 23rd, contains two cuts representing M. W. Graves & Co.'s Vinegar Factory.

The Rev. W. G. Patterson, of Glasgow, will occupy the Presbyterian pulpit in Bridgetown the next two Sabbaths.

July has proved a very good month for adding subscribers to the Monitor list. Is your name on? No? Is the time to subscribe.

Mr. and Mrs. Rupert I. Woodward announce the marriage of their daughter, Lola Montes, to Mr. William Voorheis Spurr, of Torbrook Mines, to take place Wednesday, August 14th.

While at work in his quarry at Nicotax a few days since, Theibert Rice had the misfortune to fall a distance of nearly thirty feet. He received a bad shock and jar but fortunately his injuries were not serious.

Judge Russell has filed decision in the case of Chipman vs. Whitman, affecting the rights and liabilities of the Forest Ranger, finding in favor of the defendant and dismissing the plaintiff's action with costs.

Mr. Boulanger, the expert sent out by the manufacturers of the Monotype line type-setting machine to visit the Maritime Province offices using the machine, was in Bridgetown over the week end, leaving for Yarmouth on Monday.

Dirby is to have a Regatta on August 17th. Their summer tourist business is expected to benefit through moving picture films to be taken on that occasion and to be shown through the United States and Canada.

In connection with the Flower Show to be held at Bridgetown on August 23rd and 24th, Mr. Kilham, of the Nova Scotia Nurseries, Halifax, is offering a prize to the value of \$5.00 of any of his seeds or plants as catalogued, for the best collection of dahlias.

Annapolis Royal is making preparations for a gala day on the 17th of August to welcome His Royal Highness the Governor-General and party. Sports are to be held in the garrison and it is expected a very fine band will be in attendance. It is expected special trains will be put on.

The Haag Circus billed for Kentville and Windsor last Monday and Tuesday, were unable to give their performance on account of the rain. Probably Kentville and Windsor are not much the worse off for the intervention. The performance was put on in Halifax to a large attendance.

Mr. A. D. McRae has been appointed Supervisor of Branches of the Royal Bank of Canada in place of Mr. E. L. Thorne, retired. Mr. Thorne's many friends in Nova Scotia will wish him the best of health to enjoy a well-earned rest. The appointment of his successor is a very popular one.—Halifax Chronicle.

The steamers Prince Arthur and Prince George are having their sailing port changed from London to Yarmouth, the word "London" on their stern being obliterated and "Yarmouth, N.S." substituted. The Boston Post says the two Princes and the Boston will soon be taken over officially by the Eastern Steamship Company.

The Monitor inadvertently omitted to note the change of editorship which took place a fortnight since in the Annapolis Spectator. While welcoming the new editor, Mr. L. DeV. Chipman, to the membership of the Annapolis County press fraternity, the Monitor would not lose the opportunity to extend to the retiring editor, Mayor Seely, who has the honor to be a vice-president of the Maritime Press Association, a remembrance of agreeable correspondence and to extend best wishes for his future success.

The following is the editor of the Spectator's little joke.—"Col. Seth Jones, an old and valued friend of the editor, has drawn our attention to some correspondence in the Bridgetown Monitor addressed to 'Mr. Editor,' and wishes to know if the editorship of that well-known journal confers upon its able editor the brevet title of 'Mister.'" The "editress" of the 2-outor wishes to propound a conundrum. Since one would not say doctress, ministrress, lawyeress, paintress, etc., why should one speak of a woman editor as "editress"?

An unfortunate woman at the County Home by the name of Sabens, who is at times more than a little demented, jumped from a window of her room in the third story Monday night. Striking the floor of the open verandah she broke through the boards, which probably saved her life, her only serious injury proving to be a broken ankle. Dr. Armstrong was sent for to attend her and she is doing as well as could be expected. If she recovers she will probably be removed to the department for the insane, where she can be better cared for.

**PERSONAL**

Mrs. Black of Amherst is a guest at the home of Dr. and Mrs. Jost.

Miss Clarissa Hicks, of Lynn, is visiting her aunt, Mrs. (Capt.) Geneser.

Mrs. C. M. Hoyt and children, of Middleton are guests at the home of W. J. Hoyt.

Mr. and Mrs. Harvey Graham visited Port Greville last week, returning on Monday.

Mrs. W. Donald Craig and children, of Natick, Mass., are visiting relatives in the County.

J. B. Sprowl of Lowell, Mass., is the guest of his sister, Mrs. Everett Sprowl, of Clarence.

Mrs. Major A. Messenger arrived from Lynn on Monday last to visit her old home at Centrelea.

Miss Armstrong, of Boston, who has been visiting friends and relatives here, has returned to her home.

Miss Beatrice Harris of Bear River and cousin, Mr. Parker, of Boston, visited Mrs. and Miss Lockett last week.

Mrs. Stephen Porter and little son Ronald, of Medford, Mass., are visiting her parents, Mr. and Mrs. W. Jefferson.

Dr. and Mrs. Fred Primrose and family of Baltimore, Maryland, are making their annual summer visit to Nova Scotia.

Mrs. S. S. Reed and Mr. George Young of Boston have been visiting their brother, Mr. Abram Young during the week.

Mr. and Mrs. Rawling and children of Clementsport, have been guests of Mr. and Mrs. J. Harry Hicks during the past week.

Miss Sadie Daniels has gone to Berwick on her vacation. Miss Charlotte Dargie is filling her place in Mr. Chesley's store.

Mr. and Mrs. A. P. Clark, Mr. W. A. Clark are guests of Mr. and Mrs. N. E. Chute. Miss Jean McLean of Shubenacadie is also a guest.

Miss Maud Smith of Kingston has been visiting Mrs. Herbert Hicks. Miss Smith was formerly in the millinery business in Bridgetown.

Mrs. E. C. Young returned on Saturday from a pleasant visit of several weeks with her sons and daughters and other friends in and about Boston.

Mr. Henry A. Prat and Mrs. Nixon and little son of Kentville were guests at the home of Mrs. Frank Prat, during the past week returning home on Monday.

Mrs. C. A. Seabury, of Boston, who was visiting her sister, Mrs. M. Kelly at Clarence Station, left with her niece, Miss Lena Pearson on Friday for Caledonia, Queens Co.

Mr. Harry J. Crowe passed through Bridgetown last week en route for Newfoundland, and was accompanied by Mrs. Crowe and two sons, who accompanied him to Newfoundland.

Miss Fanny Clarke, of West Somerville, Mass., and Miss Nellie Burton of Wollaston, Mass., have been visiting Mr. and Mrs. Ashby Hutchinson. Mrs. Denton and children have gone to St. John.

W. L. Bars, Esq., who has been touring the Maritime Provinces and who has been the guest of Mr. and Mrs. Alonzo Daniels for the past week, returned to his home in Halifax on Monday.

Miss Odessa Elliott of East Boston who was on her way home from Europe at the time of her father's death, arrived here a few days after the funeral and is spending a few weeks with her mother, Mrs. C. A. Elliott, Outram.—Outlook.

Mrs. (Capt.) Judson Foster, of Hampton, N. S., is visiting in town, the guest of her son, Mr. Arthur DeW. Foster, M.P. Mrs. George Jones of Lynn, and Mrs. B. M. Foster, of New York, are also guests of their brother, Mr. Foster.—Kentville Advertiser.

A party of upwards of thirty Bridgetownians have been guests at the Sea Side House, Hampton, during the past week. They returned on Monday highly pleased with their week's outing and with many words of praise for the Sea Side House and its hostess.

Mrs. L. D. Shafner, with Miss Helen and Clarence, left on Friday last for Monson, Maine, to visit Mrs. Chapin, after which they will visit in Lynn and other places before joining Mr. Shafner in the West. Mrs. Dennison left on the same day to visit her son, Dr. Dennison in Lynn, Mass.

Mr. Owen Neily, of Toronto came home last week to be present at the funeral of his brother, J. Alburn Neily. He returns home today and will be accompanied by his sister-in-law, Mrs. J. A. Neily, who, after a visit in Toronto, will return to her home in Regina.

Mr. Arch Kinney, who has been a patient at the Halifax Infirmary, since he was injured in the railway accident, returned home on Thursday last. It will be some time yet before he has the use of his hands. His many friends are congratulating him that he escaped without even more serious injuries.

**IMPORTANT NOTICE**

It is especially desired that all accounts due the Monitor-Sentinel up to July first be settled without delay. Accounts have in most cases been rendered to customers within the past few weeks. If you have been overlooked, remind us. M. K. PIPER

**THE NEW PSYCHOLOGY**  
CLEARING THE WAY.  
(By E. B. Warman, A. M.)

It is sometimes necessary to be destructive before one can be constructive; in other words, a building must sometimes be razed before another and better can be erected. But because one is destructive he is not necessarily a knocker; such, I assure you, is not my purpose. It is not the spoken or written word, but the spirit back of it that must be rightly interpreted. I purpose dealing briefly, concisely, and, as far as possible, convincingly on subjects of interest and great importance in this particular epoch of our world's progress in the field of thought.

**PSYCHOLOGY.**  
Correct terminology is essential to a clear understanding, and a clear understanding depends largely on correct terminology. Do not, therefore, confound the terms psychology and metaphysics. There is as much difference between them as there is between personality and individuality, between soul-hunger and bodily-hunger. It is said that when one man talks to another who does not understand him, and the talker does not understand what he is talking about—that is metaphysics.

Metaphysics is the science of the mind; Psychology is the science of the soul. The mind, metaphysically speaking, is the function of the physical brain, the mind, psychologically speaking, is a function of the soul. These two minds are sometimes called the "conscious" and the "sub-conscious," but the terms are misleading to the degree that they suggest two phases of one mind; whereas, they are, to be strictly scientific, two distinctly separate minds. On this point even psychologists have agreed to disagree. However, herein lies "the new psychology."

When the terms "conscious" and "sub-conscious" are understood in place of the terms I shall hereinafter substitute—the objective and subjective—then it becomes but mere matter of choice; but when used as two phases of one mind to correspond with the objective, then the term super-conscious should be used to correspond with the subjective; thus, conscious, sub-conscious, and super-conscious.

The conscious and sub-conscious are two phases of one mind, as metaphysically considered, then they are, as generally understood, two phases of the objective, or mortal mind, which, as a separate entity, perishes with the body. This would preclude the possibility of considering the immortal, the imperishable, the soul-mind. Let us consider, briefly, the two minds of which I have spoken:

The objective mind is the function of the physical brain. It has, for its media, the five physical senses. It comes with the body, develops with the body and, as a separate entity, perishes with the body. It controls all voluntary motion. It depends upon the body for its existence. Its highest faculty is reasoning. It reasons both inductively and deductively.

The subjective mind is of the soul. The soul is a distinct entity and, as such, possesses independent powers and functions, having a mental organization of its own. It does not depend upon the body for its existence. It controls all the silent, involuntary, and vegetative functions. Its highest faculty is intuition and, as such, reasons only deductively. It is amenable to control by suggestion. It is the seat of the emotions and the storehouse of memory; in fact, its memory is perfect. Think of it! Everything you have ever heard or read or seen or said or even thought is registered in your subjective mind. In the case of one rescued from drowning (I speak from experience) the curtain which separates the objective from the subjective is thrust back and objective mind receives a panoramic view of the deeds of the past life—yes, straight and true from your own Book of Life.

The subjective mind performs its highest functions when the objective senses are in abeyance; however, under ordinary conditions, in our everyday round of duties, the objective mind has the floor.

These points are essential to a clear understanding of the subjects that follow inasmuch as they—the objective and subjective—are the real foundation stones upon which rests the psychological structure with its many and varied departments.

**IMMORTALITY.**  
Inasmuch as the subjective mind is the soul-mind, the immortal mind, we are led to the consideration of that much-mooted question of the soul's immortality.

If immortality is not true, it matters little whether anything else is true or not. Have we no proof? Is it all speculative theory? The belief in immortality has at least this

much in its favor—the negative cannot be proved.

"Prof. Ernest Haeckel of the University of Jena, admittedly one of the world's greatest living scientists," says the Los Angeles Times in a recent editorial, "has just written an exhaustive work to prove that the accepted belief in the soul's immortality is a myth and without foundation. Like other naturalistic thinkers, he attributes all inspiration, all intellectual activity, all noble visions, to a physical function of the brain cells, which cease at death. Practically he reduces the soul to a mechanical vibration of nerves and muscles."

"These theories, though not new, would command much more attention were it not that for the majority of the human race the belief in immortality does not hinge on chemical analysis and is not to be shelved by dogmatic scientism. The actuality of another existence beyond the grave does not depend on human belief or human disbelief. The ultra-materialist doubts and denies a future life because it involves the element of mystery. Why, every man and woman we pass in the crowded street is to us a mystery, and insolvable enigma. Shall we expect to penetrate the great beyond with eyes too dim to see through the simplest things on earth?"

"When all has been written, who would exchange the faith of the child, seeing in the myriad of stars at night gateways to glory where tread the feet of angels, for the colossal knowledge of the astronomer, measuring interstellar distances with a million-mile yardstick or weighing, Jupiter-like, a bale of merchandise?"

"Would Prof. Haeckel himself wish to go into the death chamber where the stricken mother weeps beside the bier of her only son, and rob her of her last fond hope of meeting him again among the spirits of the blest, by propounding his frigid theory that immortality is a myth, the supposed soul but a physical function of the brain cells?"

We are well aware that "In the natural world," as he so well expressed in "Psychama," annihilation is a myth. Man's soul, at the death of his body, is released, and like the homing pigeon, returns to the region of its nativity.

**WHENCE CAME THE SOUL.**  
Where is the soul's nativity? Whence came the soul? I think we will say without any hesitancy—from the All-Soul.

What is the soul? The soul of man is a part or spark of the All-Soul (God) and, as such, possesses all the potentialities of God—omnipotence, omniscience, omnipresence—these, of course, only in the degree of the spark to the whole, the soul to the All-Soul; just as one drop of the ocean represents, in miniature the qualities of the ocean as a whole.

Again, the soul (psyche) is the spirit—*oneuma*—which is confined in the body (*soma*). God is spirit. When God breathed into man the breath (*pneuma*) of life, he became a living soul. The soul, then—the psyche—is that phase of the spirit—the *pneuma*—which is committed to the earth for embodiment. It is, as so well stated by Dr. Quackenbos, "the sam: in substance with the *pneuma*."

**THE SOUL LOCATED?**  
There are those who think the soul is located in the solar plexus, or in the spinal column, or in the medulla oblongata. I do not think so; but they have as much right to their opinion as I have to mine; however, I know as much about it as anyone but there isn't anyone who knows anything about it; yet it is well to express an opinion if only to agitate the subject.

I hold that the soul holds the same relation to the body that God does to the universe. If you can locate the one you can locate the other. God is immanent (indwelling) in the universe, but He does not depend upon the universe for His existence. In the same manner the soul (the spirit of God made manifest) is immanent or indwelling in the body, but does not depend upon the body for its existence.

Because the soul cannot be located, or has not been located; because the surgeon cannot find it and dissect it with his scalpel, the materialist (who does not believe in anything that he cannot touch, taste, see or smell) does not hesitate to declare: there is no soul, there is no God!

**PERSONALITY.**  
Is there a personal God? The answer upon this depends very largely upon your viewpoint, as it is one of individual consideration and judgment. However, I am inclined to think that the negative of the question is due to a misconception of the terminology—the confounding of the terms personality and individuality, the failure to grasp the true meaning of these words which, too frequently, are used interchangeably.

Personality cannot be cognized by any of the five physical senses—only by the so-called sixth sense. Personality is perceived; individuality is seen. We may feel (perceive) God's presence, but we cannot see it; we may perceive His power and see manifestations of it, but we cannot see the power.

Because it has been taught that "Man is made in the image and likeness of God," we are apt to measure God's perfection by man's imperfection; in other words, we are led to think of God anthropomorphically. It seems so difficult for the finite mind to get a concept of the Infinite; so difficult to think of Him as Spirit having form and personality without a physical constitution. We even go as far as to look for human attributes in God instead of divine attributes in man. God should be man's inspiration; man should be God's expression. The created, the creature, should reflect the Creator. I can think of man as an involuted spirit, but cannot bring myself to think of him as an evolved brute.

Instead of denying the personality of God, is it not better to recognize Him as even greater than we have been accustomed to think? But, great as is the universe, do not belittle Him by saying that the universe is God or that we are God; these, all these are but manifestations of His power. God works through Nature, and Nature is the Spirit of God at work. To claim that Nature is God is to declare oneself a pantheist. The late Dr. Thompson Jay Hudson so aptly put it thus: "The Deity is a divine immanence without pantheism and a personality without anthropomorphism."

Right here I should like to say a word to that large class of otherwise intelligent people who seem to be possessed or almost obsessed with the idea that God and good are synonymous; therefore they substitute the word Good always with a capital G, hesitating to use the word God for fear they will not be thought to be up-to-date, or, should I say, down-to-date?

"What we mean by personality," says Dr. Lyman Abbott, "is this, the infinite and eternal energy from which all things proceed is an energy that thinks, that feels, that purposes and does; and is thinking and feeling, purposing and doing as a conscious life, of which ours is but a poor and broken reflection."

I think I may safely say that all conclusions point to the fact of a personal God if we tightly interpret the meaning. He being immanent in the universe and His impersonality being everywhere manifest, the highest, fullest, possible conception of which the human mind is capable—the *Being of the Infinite*—is that of an impersonal personal God; everywhere yet near, as so beautifully and impressively expressed by Tennyson:

Speak to Him, thou, for He hears,  
And spirit and spirit can meet;  
Closer is He than breathing,  
And nearer than hands and feet.

**Marked Scarcity in Supply of Potatoes**

Old Stock Low and New Crop Not in Yet—Prices Are High—Prospects For Crop.

(St. John Telegraph, July 22nd.)

There was a marked scarcity in the supply of potatoes on the local market today either of old or new stocks, and dealers who still have a supply on hand found orders most plentiful but in many cases they were unable to furnish the required number of barrels. The price ranged from \$2.25 to \$2.50. Should the present situation not be relieved before long it is likely that a sharp advance may be made.

The arrival of new potatoes on the market has yet become hardly noticeable. While it is true that there have been some brought in, supplies have not been as numerous as would be the case under more favorable weather conditions. Last week \$1.80 was asked per bushel, but today they would have brought \$2.00. It has been said that the crop this year will be meagre but experienced heads say that it is really a little premature to make such an announcement, because of the backwardness of the season and the consequent delayed growth. The weather is the great factor in determining the size of the crop. Last year reports of this nature were circulated but it was one of New Brunswick's best years for potatoes and thousands of barrels were shipped from the province in addition to supplying the local trade.

**IS THE CAPTAIN OF THE TITANIC ALIVE?**

A Baltimorean Says He Talked With Him in That City on Friday

Baltimore, Md., July 23.—The statement that Captain E. J. Smith, commander of the ill-fated "Titanic," was not drowned, but was seen Friday morning in Baltimore, is made by Peter Pryal, a retired mariner of this city who was quartermaster on the steamship *Majestic* of the White Star Line thirty years ago when Captain Smith commanded the vessel.

Pryal said that he had not only seen the captain but talked with him. Pryal also said that he saw Captain Smith last Wednesday morning but was skeptical as to his identity and to confirm his belief that the captain was alive and went to the same spot on Friday morning and again saw the Captain. Walking up to him he said "Captain Smith, how are you?"

Then, according to Pryal, the man answered, "Very well, Pryal, but please don't detain me; I am on business."

Without realizing what he was doing, Pryal followed the man, who later bought a ticket for Washington.

**FOR AUTOMOBILISTS.**

Never start the engine when the car is standing over gasoline. Frequently when filling the gasoline tank some of the fuel finds its way to the ground, either from overflowing or because of carelessness in pouring into the filler hole or funnel. To start the engine above this overflow is to invite serious trouble, for it is often that sparks are discharged from the muffler when the engine races and this is especially true if the muffler contains much soot. Occasionally a leak in the gasoline pipe or tank, or maybe a carburetor float chamber, in which the seat of the needle valve needs grinding, will permit of the gasoline forming in a puddle on the street. It is important to stop such leaks and it is better to keep the car in motion than to stand over exposed gasoline, which a match carelessly thrown in the street, may ignite.

**MAKES HAIR GROW**

All drug stores sell SALVIA, and it is guaranteed to grow hair or money back.

The time to take care of your hair is when you have hair to take care of.

If your hair is getting thin, gradually falling out, it cannot be long before the spot appears.

The greatest remedy to stop the hair from falling is SALVIA, the Great American Hair Grower, first discovered in England. SALVIA furnishes nourishment to the hair roots and acts so quickly that people are amazed.

And remember, it destroys the Dandruff germ, the little pest that saps the life that should go to the hair from the roots.

SALVIA is sold by first-class druggists under a positive guarantee to cure Dandruff, stop falling hair and itching scalp in ten days, or money back. A large bottle costs 50c. The word "SALVIA" on every bottle.

**STRANGE THING HAPPENED.**

"The sexton of a quaint old church" says a traveller, "showed me around the cool, dim building one warm afternoon, and as we were departing, pointed to the Bible on the lectern and smiled. 'A strange thing happened last Sunday in connection with that Bible,' he said. 'We had a strange minister preaching here, and when he opened the book he came upon a notice and read it out with all due solemnity. It was a request for the congregation's sympathy and prayers for John Brown, who had been deeply afflicted by the loss of his wife.' The sexton passed and chuckled softly. 'You see, sir,' he said, 'our minister had been using that paper for a book-marker for more than a year, and John Brown, in a natty grey suit, sat in a front pew with the new wife he had taken just a week before!'"

**A MORNING THOUGHT**

"With the day, the light; with the road, the strength to tread it."—Johnson

**RHEUMATISM, LUMBARGO and LAME BACK**

can be cured by the great fruit kidney and liver remedy.

**FIG PILLS**

Brantford, Ont., Aug. 13, '11  
Your medicine, Fig Pills, has worked wonders for me. The rheumatic pains have entirely left me and I owe everything to your remedy. You are at liberty to publish this.

R. H. HALLMAN,  
At all dealers 25 and 50 cents or mailed by The Fig Pill Co., St. Thomas, Ont.

For sale in Bridgetown by W. A. Warren, druggist.

**HEAVY GALE AT YARMOUTH**

A violent gale and heavy downpour of rain set in during Sunday night, doing much damage to shrubbery, trees and flowers. Limbs and leaves were stripped from the trunks and were found in all directions. The streets were deluged with water, many of the gutters overflowing. Several electric light and telephone poles were thrown over and a large willow tree in Arcadia was completely uprooted. It was an unusually heavy storm for this time of the year.—Herald, July 22nd.

# THE HOME

PAPER ON INFANT FEEDING  
BY DR. McVEY OF ST. JOHN.

Matter of Practical Interest and Value Presented at Meeting of Medical Society in Moncton.

The subject of infant nutrition is one of much importance, when we take into consideration the fact that an infant normally doubles its weight in the space of five months, and triples it in twelve months. It shows the wonderful activity of tissue building that is taking place to supply the necessary constructive material for such very rapid growth and development during this important period of life. It is therefore very essential to be extremely careful as to the proper kind of food given, also the frequency it is given, as well as the quantity, and above all the food should be given in such a form that it should be capable of ready absorption and assimilation. And the only food which will perfectly fulfil all these requirements of early infancy is normal human milk.

When, for certain reasons, such is impossible to procure, we are compelled to substitute, and the nearer such a substitute approximates in its make-up to human milk the more suitable it is for the purpose of construction.

Now to build up tissue or repair the system, the food must contain five important elements in certain proportions, namely, proteins, hydrocarbons or fats, carbohydrates, salts, water.

In case of an infant, the digestive powers of the saliva is very gradually developed. The saliva does not exert its action on starchy foods until the age of three months. The pancreatic secretion, which plays the most important part in the digestion of starch, does not fully develop until the end of the tenth or eleventh month, for this reason a food of a starchy nature should be given an infant during the early months of life. The required carbohydrate elements must be supplied in the form of sugar, and in order to supply the amount of warmth necessary for an infant, a considerable large amount of hydrocarbon is necessary. If the food is deficient in fat, the growing bone is apt to show rickety deformities.

INFANT MORTALITY.  
The very great mortality of infancy is largely due to faulty feeding; and artificial feeding is responsible for the vast majority of disorders in infancy. The statistics of the hospital for sick children, London show that ninety per cent. of the fatal cases of diarrhoea in infancy occur in those partially or entirely fed artificially and only ten per cent in infants entirely fed at the breast.

REGULAR FEEDING.  
It is important that the feeding should be at regular periods. The great tendency is to feed too much and too often. The infant who is fed whenever it cries, cannot be expected to digest its food. Such error, if not relieved by an attack of vomiting, will cause over distension of the stomach. It is well to adopt a regular rule, and one that will meet all requirements as to this, viz:

The first week feed every two hours not more than one ounce at ten regular intervals.  
From second to sixth week of age every two hours not more than one ounce at eight regular intervals.  
From sixth week to three months every two and a half hours three or four ounces at six regular intervals.  
From three months to six every three hours four to six ounces at six regular intervals.  
If cow milk is selected the following additions will bring it up to all requirements in order to meet the different ages:

- 1st week.  
Milk, one tablespoonful.  
Water, two tablespoonfuls.  
Lime water, one tablespoonful.  
Thick cream, one teaspoonful.  
Milk sugar, one-half teaspoonful.  
Half of this quantity to be given as a feed.
- 2nd to 6th week.  
Milk, 2 tablespoonfuls.  
Water, 3 tablespoonfuls.  
Lime water, 1 teaspoonful.  
Cream, thick, 1 teaspoonful.  
Milk sugar, 1 teaspoonful.
- 6th week to 3rd month.  
Milk, 3 tablespoonfuls.  
Water, 3 1-2 tablespoonfuls.  
Lime water, 1 1/2 teaspoonfuls.  
Milk sugar, 1 1/2 teaspoonfuls.  
Cream, thick, 1 1/2 teaspoonfuls.
- 3rd to 6th Month.  
Milk, 4 tablespoonfuls.  
Water, 3 1/2 tablespoonfuls.  
Lime water, 1 1/2 teaspoonfuls.  
Cream, thick, 1 1/2 teaspoonfuls.  
Milk sugar, 1 1/2 teaspoonfuls.
- 6th to 8th month.  
Milk, 5 tablespoonfuls.  
Water, 2 1/2 tablespoonfuls.  
Lime water, 3 1/2 teaspoonfuls.  
Cream, 1 1/2 teaspoonfuls.  
Milk sugar, 1 1/2 1/2 teaspoonfuls.
- 8th to 12th Month.  
Milk, 12 1/2 tablespoonfuls.  
Water, 2 1/2 tablespoonfuls.  
Lime water, 2 1/2 teaspoonfuls.  
Cream, thick, 1 1/2 teaspoonfuls.  
Milk sugar, 2 1/2 teaspoonfuls.

### GUARDING AGAINST BACTERIA.

Milk and cream are very susceptible to bacteria influence and contamination from unhygienic surroundings and the risk of infection from their contamination is a real one. But the frequency of such has been greatly exaggerated. However in the occurrence of the fatal summer diarrhoeas and the great mortality there can be little doubt that milk infection is largely a responsible agent in many cases. Hence various methods, tedious and bothersome to carry out, have been devised, such as boiling, pasteurization, sterilization, etc., to overcome this. But these are to be regarded as necessary evils, not a virtue in themselves. The idea aimed at is not the destruction of micro-organisms by processes which may and almost certainly do diminish the nutritive value of milk, but the prevention of such contamination. No method of preparation can make a bad milk good.

As to the process known as peptonizing milk this embraces two different processes for the peptonization of food, by the use of pepsin and pancreatin respectively. The latter agent is preferable, because it acts in an alkaline, or neutral medium, whereas pepsin requires an acid. Cases where the stomach seems to have lost its digestion power are often benefited by it, but it also has certain disadvantages, as the stomach often refuses to do its own work after having used these pre-digested preparations.

A word as to the host of proprietary or infant foods. Almost all of them are preparations of cereals, and as such most all contain starch, but with this important difference, that in some the starch is partially, or completely converted into soluble carbohydrates, dextrine, maltose or glucose. In others it remains unaltered.

It is upon the degree of this conversion of starch and the amount of fat present that the value of these foods depends. None of the so-called infant foods, which contain unconverted starch should be given to an infant, until it reaches the age of nine months.

A very serious defect in all these foods is the low proportion of fat, indeed some have scarcely any, and prepared as they are by simple addition of water, they are totally unfit for infant food, and Professor Stilles states in the majority of cases of pronounced infantile scurvy which have come under his observation the infant had been fed on one or another of these so-called infant foods. There are very few cases in which any of these proprietary foods should be allowed to become the principal article of diet and in spite of all the advertisements there is not a single infant food in the market which can adequately replace cow's milk as a food for infants.

## CURED OF THIS HORRIBLE DISEASE

### Edmonton Girl saved By "Fruit-a-tives"

EDMONTON, ALTA., Nov. 20th 1911.  
"I had been a sufferer from babyhood with that terrible complaint, Constipation. I have been treated by physicians and have taken every medicine that I heard of, but without the slightest benefit. I concluded that there was no cure for this horrible disease. Finally, I read of "Fruit-a-tives" and decided to try them, and the effect was marvellous. The first box gave me great relief, and after I used a few boxes, I found that I was entirely well. "Fruit-a-tives" is the only medicine that ever did me any good for Chronic Constipation and I want to say to all who suffer as I did—Try "Fruit-a-tives"—why suffer any longer when there is a perfect cure in this great fruit medicine."  
(Miss) E. A. GOODALL.  
"Fruit-a-tives" is the only remedy in the world made of fruit and the only one that will completely and absolutely cure Constipation.  
50c a box, 6 for \$3.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

### BABY'S SECOND SUMMER.

Don't keep him in the city during the summer. Second summer or any other summer, he will thrive best when kept out of doors most of the time. If the sleeping-on-the-porch habit has been cultivated, so much the better. If mother has kept herself in good health and baby is not weakened, from the fourteenth to the eighteenth month he should be allowed five meals a day if he is awake long enough to take them. The first meal at 7 a.m., should consist of a slice of stale bread broken and soaked in a breakfast-cupful of well-cooked and strained porridge (oatmeal or cracked wheat) with two tablespoonfuls of cream, and a little salt, no sugar—and a breakfast-cupful of milk. For variety the breakfast may consist of the yolk of an egg, lightly boiled, with breadcrumbs and a teaspoonful of milk.

The second meal at 10 a.m., may consist of a teaspoonful of milk with a soda biscuit, or a thin slice of lightly buttered bread.

The third meal, at 2 p.m., may consist of a teaspoonful of beef, chicken or mutton broth, with a slice of bread, and one good tablespoonful of rice and milk pudding. Upon another day it may consist of a mashed potato, moistened with four tablespoonfuls of meat broth; also two tablespoonfuls of junket, with the same quantity of cream.

The fourth meal, at 6 p.m., should be of bread and milk or strained porridge and cream with milk as at the first meal.

The fifth meal, at 10 p.m., if baby is awake, should consist merely of a breakfast-cupful of milk, with or without one tablespoonful of good Liebig food. He must never be awakened from sleep for it. If he awakens at five or six in the morning, he should be given a half cupful of warm milk.

NOTE.—This sensible article taken from the health department of the Los Angeles Times, is reprinted this week owing to a typographical error occurring in last issue.

### THE ROYAL VISIT.

(Canadian Press.)  
Quebec, July 21—His Royal Highness, the Duke of Connaught, Princess Patricia and party returned to Quebec on Saturday from their trip to Winnipeg. The Royal party, including the Duke and Duchess and the Princess attended service in the Anglican Cathedral this morning, occupying the state pew. There was a large congregation in attendance.

The Royal party leave Wednesday morning on the government steamer Earl Grey for the trip to the Maritime Provinces.

### THE HALIFAX GIBBET.

A Sort of Guillotine That Was Once Used in England.  
An ancient law of Warwick forest, a tract commensurate with Halifax parish, is sung by Taylor, the water poet. At Halifax the law so sharp doth deal, That who more than thirteen pence doth steal. They have a gin that wondrous quick and well. Sends thieves all headless into heaven or hell. This "gin" resembled the guillotine in construction and stood on a stone scaffold, unearched when Gibbet hill was leveled. The ax is preserved. This, the only guillotine used in England, was the forerunner of the "malden" introduced into Scotland by Regent Morton and now in the Edinburgh Antiquarian museum. The "Halifax gibbet" was last used in 1650 and the "malden" for Lord Argyll in 1681 and his son in 1685, who spoke of it as the sweetest maiden he ever kissed. Dr. Guillotine did not invent the machine. Dr. Louis constructed one in 1791, the "Loulouin," but the name "guillotine" became general from the burst of surgical enthusiasm, in which Dr. Guillotine in 1789, after deploring the tedious torture of hanging, exclaimed, "With my machine I strike off your head in the twinkling of an eye, and you never feel it!"—London Globe.

### MEERSCHAUM MINING.

The Pits at Namiau Have Been Worked For Twenty Centuries.  
Meerschaum mines at Namiau have been worked for 2,000 years, it is claimed, and the process is quite simple. The mines, which at one time reached from Kabo to Mihalitch, on the sea of Marmora, are concentrated around the city of Eski-Shehr and give employment to some 5,000 miners. The mines are worked in the most primitive manner by a foreman and two to five workmen with picks. The depths of the pits vary greatly and depend upon the depth at which a reddish brown earth is met, which is the first indication of the existence of magnesite. Sometimes this red earth is found only a few yards beneath the surface, but ordinarily at a depth of twenty yards, often forty and even sixty. In this layer of red earth meerschaum is found, disseminated in nuggets of irregular shape. The size of these rarely exceeds twelve to sixteen cubic inches. The greater part are of the size of a walnut. No explosives are used, the ground being soft. Almost the entire output of this article is exported to Vienna and thence distributed to the various European countries and to the United States, the latter buying only the finest selections.

### Well and Truly Laid.

The laying of the British royal table is attended with considerable ceremony. First come the "aphors," whose duty it is to see that the table is in its proper place and in good condition to bear its precious burden of gold and silver plate. The weight of the famous Flaxman service designed for George IV, is so tremendous as to justify fully this precaution. The apothecaries give place to the "table deckers," who arrange the snowy napery worked with the royal arms and the plainly folded serviettes. Fanciful shapes are inadmissible on the royal table. This accomplished, there enter the "yeomen of the silver-pantry," whose task it is to place the silver in position. The "deckers" then arrange the flowers, after which the royal table is considered "well and truly laid."

### The Deep Sea Lead.

In order to find a ship's position when approaching the land in a fog soundings are taken with the "deep sea lead." This lead weighs twenty-eight pounds and is attached to a line which is marked off in fathoms by bunting of various colors, pieces of leather and knots. Bored in the base of the lead is a hole about two inches deep, and this is filled with tallow, so that the gravel or shells at the bottom will adhere to it, and the nature of the bed may be thus ascertained. When the lead is thrown overboard the water's depth is noted on the line, and this and the adherence to the tallow when compared with the description given on the chart will give the ship's position with tolerable accuracy.

### Silbiant Praies.

One of the ushers approached a man who appeared to be annoying those about him.  
"Don't you like the show?"  
"Yes, indeed."  
"Then why do you persist in hissing the performers?"  
"Why, m-man alive, I w-was'n't b-b-hissing. I w-was s-s-s-saying to s-s-s-sammie that the s-s-s-singing is s-s-s-superb."—Judge.

### Hadn't Seen Him.

The Vicar—Did you see a pedestrian pass this way a few minutes ago? Fern Hand—No, sir. I've been workin' on this tater patch more'n a nowar, an' nothin' thing has passed 'cept a solitary man, an' he was trampin' on foot.—London Telegraph.

### Good Reason.

Mrs. Wright (to vicar's wife)—Why is your husband always asking for money, money, money? Vicar's Wife (wearily)—I presume it's because he never gets any.

### Unkind.

"Mighty men man 'is workin' fer."  
"Wat's de matter?" "Took de laigs off de wheelbarrow so's I can't set down an' rest."—New York World.

## Men's Cool Furnishings

FOR WARM SUMMER DAYS.

### Shirts--

Clarence, July 29th--Miss Mabel Leonard left for Falmouth last week to visit her sister, Mrs. T.B. Akin.  
Mrs. Reynolds of Ottawa is visiting her sister, Mrs. M.C. Marshall.  
Mr. Isaac Freeman, Berwick, spent the week end with friends here.  
Miss Irene Jackson, who has been spending the past two weeks with her aunt, Mrs. VanFassel of Dirby, has returned, accompanied by Miss McKeown, of Lynn, arrived on Monday to spend their holidays with their grandparents, Mr. and Mrs. M. C. Marshall.  
Miss Amberman of Granville Ferry, is the guest of the Misses Flossie and Addie Chute.  
Mr. and Mrs. T. B. Johnston are moving to Lawrence town, after a residence of three years here.  
The monthly missionary service of the B.Y.P.U. was held on the evening of the 28th inst. The program was of interesting character. Letters were received from the following missionaries: Rev. J. Clark, M.D., Fort Fairfield, North West; Misses Ida Newcombe Archibald, Blackadar and Cora Elliott, of India. Music was furnished by the choir. Mrs. S. B. Marshall conducted the service.  
Officers of the B.Y.P.U. for the half year:-- President, Mrs. V.B. Messenger; vice-president, Wm. Crelman; Secretary, Miss Hattie Banks; Treasurer Miss Evangeline Elliott.  
Services for Aug. 4th: Conference on Saturday at 2.30; Bible School

on Sunday morning at 10 o'clock; preaching at 11 o'clock. Lord's Supper at close of service; B.Y.P.U. at 8 o'clock.

**Belleisle**

Belleisle, July 30th-- Mrs. A. D. Munroe and daughter, who have lived for some time past in Chicago, Ill., are now occupying their residence here. They will be joined by Mr. Munroe, who is at present in Truro, in a few days.  
We are sorry indeed at this time to have to chronicle the death of one of our most respected residents, that of Capt. Hiram Longmire, which took place at his home on Sunday afternoon, after many weeks of illness suffering.  
Mrs. Borden Chapman and little son, Maurice, of Amherst, are visiting her parents, Mr and Mrs. Israel Parker.  
Mr. Jacob V. Bent of Boston, former resident of this locality, is visiting his sister, Mrs. Minetta Troop.  
Mr. Ernest Bent of the Boston Electric Railway, is spending his vacation at his old home here.  
Miss Mary Harris, Miss Agnes Gardner and Miss Hattie Parker, three of our popular young lady teachers, are spending their vacations at their respective homes here.  
Miss L. Gertrude Luxton, of Salem is the guest of her cousin, Miss Gussie Wade.

Mr. Reginald Longley of the Boston Elevated Railway, is spending his vacation at his old home here.

Mr. Thomas Hyland and son of Halifax, are guests of Mr. Fred Tutts and mother.

The heavy rain that is falling today (Monday) is in all verity a perfect Godsend to vegetation.

Mrs. Fred Morris, of Wakefield, Mass is visiting her father, John B. Gesner.

Mr. George B. Young of Boston, is the guest of Mr. and Mrs. Abner P. Nelly.

**Port Wade**

Port Wade, July 29th--A large party came down from Annapolis on Friday, 26th on a picnic excursion, per S. S. Granville, Capt. Collins. The picnic was by Baptists and Methodist Sunday schools, and judging by the excellent decorum and smiling faces, inhabitants as well as visitors spent a very enjoyable day.  
Mr. and Mrs. W. Barnes and family visited the past week with Mrs. Barnes' mother, Mrs. A.E. Kendall.  
Sch. Albert J. Lutz, Capt. Apt, is in port and will now get cleaned and painted, preparatory for the Regatta on Aug. 17th.  
Mr. Edward Johns went to Lynn on Saturday, 27th to engage at carpenter work there.  
Mr. Harry Reynolds spent the week end here visiting at the home of Mrs. Jane Anthony.

Mr. and Mrs. Alec Nelson came from Lynn on Wednesday, 24th for a short visit with relatives and friends.

Fishing business is very dull at present. Low prices prevail both here and across.

**Granville Centre**

Mrs. David Wade visited relatives at Granville Ferry last week.  
Miss Lena Withers of Boston, is visiting her parents, Mr. and Mrs. George Withers, senior.  
Mr. and Mrs. Allen are spending a few days with Mrs. W. A. Piggott in their bungalow at Port Wade.  
Miss Hester Withers, who is in training at the Baptist Hospital, Roxbury, Mass., is spending her vacation with her parents, Mr. and Mrs. C. E. Withers.  
Miss Gourlay, of Amherst, is the guest of her friend, Miss Mabel Troop.  
The funeral of the late Mr. Hiram Longmire, who passed away Sunday afternoon after a long illness, will take place from his late residence on Tuesday afternoon at two o'clock.  
The W.M.A.S. for the month of August will meet at the home of Mrs. Weston Eaton, Thursday afternoon, Aug. 8th.  
Miss Barbara Willett is visiting her grandparents, Mr. and Mrs. Gilbert Shaffer at Goat Island.

**Hampton**

Hampton, July 29th--Haying is at a standstill as the weather for the last nine days has been a record breaker--not one clear day in all that time.  
The guests of the "Seaside Hotel" gave a fine concert in the Hall on Friday evening, the 26th inst., which was highly appreciated by the audience, there being a full house. The sum of \$14.00 was realized, which together with a sum raised by the guests at the hotel, brings the fund up to \$30.00, which is to be used towards the education of Fove Farnsworth, the little deaf and dumb son of the host and hostess, who will go to the Deaf and Dumb School at Halifax in the fall.  
Steamer Ruby L. made her usual weekly call at this port this morning, landing and taking freight to St. John. Mrs. Lizzie Messenger and children and Miss Ethel Farnsworth were passengers to St. John.  
Mr. J. P. Titus showed your correspondent some work done by the Brown Tail moth. A young willow tree close to his orchard was stripped of every leaf, just leaving the bare branches.

**Keene**

Mr. Murray Brown of Winchendon, Mass., Mr. Russell Brown, of Brockton, and Mr. Vernon Brown of Watertown, came home to attend the funeral of their father, Mr. Henry Brown last week.  
The death of Mrs. James P. Foster took place on Monday, 22nd, after a long illness. Mrs. Foster was in her eighty-first year.  
Mrs. John Hall of Lynn and family is visiting friends in this place.  
Mrs. J. I. Foster of Bridgetown spent last week at the Bay View.  
Con. Addy Nichols, Capt. S. M. Beardsley and Mr. Frank Charlton spent Sunday with their families here.  
Miss McGill of Middleton is visiting friends in Keene, N.H.

**Torbrook**

Torbrook, July 24th--Mrs. Frank Woodbury underwent what, it is expected, will be a successful operation on Thursday last for appendicitis.  
Mr. James Bartheaux and wife and Son, Ross, of Truro, spent a short time here visiting friends.  
Mr. Geo. McMillan is home from Cohet for a short stay.  
Miss Carrie Spurr is visiting her brother, Mr. Edgar Spurr, Middleton.  
Mrs. Elinor Spinney is ill at time of writing.  
Mrs. A. C. Charlton is visiting at Springfield for a few days.

**Port Lorne**

Port Lorne, July 29th--Mrs. Maurice Dalton and Mrs. George Daulie and family returned to their home in Brockton on Saturday.

**Bear River**

Bear River, July 30th-- Rev. S. J. Cann, wife and children, of Providence, R.I., are visiting Mrs. Cann's parents, Mr. and Mrs. C. W. Phinney.  
Mr. Chas. Meuse, Bangor, is visiting friends in his native town.  
The Maritime Telephone Co., has placed two extra cables across the river to meet the requirements of its additional customers.  
Miss Florence Nelson, who has been visiting her aunt, Mrs. C. Chisholm, returned to her home, Grand Falls, N.B., on Tuesday.
