acquaintance with them. You think I have a bad memory—th is touches a spot on which I am rather vain, for all my iriends will tell you that I have, all through life, been very remarkable for a most retentive one. You quote a passage from my last letter, in which I submitted, that, as my action in Bathurst was precisely similar to that in Napan, I could not see how my zeal got the better of me. You now say that I myself was your informant and that I said most distinctly that I had prohibited smelt fishing with bag-nets in Bathurst Harbor - " stopped it altogether." You must have most strangely misunderstood me, or drawn a most incolrect inference from what I did say. Mr. Crocker asked me if bag-nets would be stopped in Bathurst. I replied, "whatever may be done in Napan, they must be stopped there altogether." Then Mr. Crocker tried to enlighten me on the subject, I declined to listen, for I had just the day previous returned from Bathurst, where I had very carefully investigated the matter, conferred with the loag-net fishers in company with the local officer, and discussed

arities of Bathurst Harbor. [Hiekson tells me that duce that time some nets were moved to the (Harbor. W. H. V.] and the every that the feel almost ashamed to refute by the configence of Middle and Little Rivers above the Bridge which separates it from the Harbor. In this basin, at low tide, the tells are respectively any orange of the two rivers, which are very sery that time, any water.

As the tide rises, the ise floats, and with the teal and the edges of these channels of the two rivers, which are very complied with the law, by taking the third of the families of the two rivers, which are trained to the feel almost ashamed to refute its occurred to the two rivers, which are trained to the feel almost ashamed to refute its occurred to the two rivers, which are very and the refute to the channels of the two rivers, which are very and the refute the channels of the two rivers, which are very and the refute that the decomet the schools of smelts, which the tide come the schools of smelts, which the tide of them, the simple bag-netters pretending to think they complied with the law, by taking the third of the third of the channel, out of the middle of them, the spent the fifted middle of them, the spent the fifted middle of them, the sum of the time of the two rivers, which the law says saut be kept cleas, one act such end of the angle of the work of the configence of the season for the cide which the law gays sunt be kept cleas, one act such end of the angle of the work of the configence of the section of extending the principal to the configence of the section of extending the principal to the configence of the season for the cide them. The third the tide of the configence of the season for the cide them the configence of the season for the configence of the season for the configence of the season f in the Maritime provinces, but like all

tion to telegraph to Overseer Mowat, one of the coldest and most experienced officers, in enforcing wise laws, are in the course of which you indulgs in more personalities than I think were at all necessary another old and very intelligent officer, and the officers, in enforcing wise laws, are in the service, to join me at Bathurst, and I associated with him Overseer Hickson, another old and very intelligent officer, and the officers, in enforcing wise laws, are in t in the course of which you indulge in more personalities than I think were at all necessary in discussing matters of fact, not of opinion. However, as I am a public servant, and therefore a good mark for the wit or abuse of editors as well as fishermen, I will try not to take offence nor to retort in kind, if you will allow mespace in which to reply to your remarks. The public can take but little interest in any mere bandytake but little interest in being dia on the laties of interest in kind, if you will allow me space in which to reply to your remarks. The public can take but little interest in any mere bandying of epithets, but it is vitally interested in the preservation of the splendid fisheries of this magnificent river,—the most prolific in fish of any river in the Dominion. With these few words of preface I will now confine myself to the matters of fact touch confine myself to the matter once one of the largest for suggesting to me! There is an old trite saving—"teach your grandmother to sunff saving—"teach you now take great cross and familiar with the fisheries since their saving—"teach you now take great cross and familiar with the fisheries since their saving—"teach you now take great cro markets, and to establish ard regulate market days and fairs, and regulate weights and measures in the public market and other places in the City in conformity with the lawful Standard.

2nd. To regulate the manner of selling, weighing and measuring butchers' meat, fish, regetables, grain, hay, straw, and fodder, and to grant licences for the due weighing and admeasurement thereof:

3rd. To restrain and regulate the purchase and admeasurement thereof:

3rd. To restrain and regulate the purchase and manner of selling of vegetables, fruit,

4 over monopolise our space for line myself to the matters of fact touch end upon in your remarks, and will be as brief as I possibly can, with due regard to a clear statement of the case, and that the official mistakes made must, in the light of future in own in our rivers, that they are depositing the fisheries on the "silver back" is the variety of smelt now in our rivers, that they are depositing the fishery and will be as brief as I possibly can, with due regard to a clear statement of the case, and though I shall speak my convictions plainly. I wait in your offensive personalities of truth in your offensive personalities, then on my own, that the Minister's action weeks, and will be as brief as I possibly can, with due regard to a clear statement of the case, and though I shall speak my convictions plainly. I wait in your offensive personalities of truth in your offensive personalities of truth in your offensive personalities. I then on my own, that the Minister's action on the dupon in your remarks, and will be as brief as I possibly can, with due regard to a clear statement of the case, and though I shall speak my convictions plainly. I wait in your offensive personalities of truth in your offensive personalities, in the light of the matters of fact touch was taken in the Smelt fishery, and will be a shrief as I possibly can, with due regard to a clear statement of the case, and though I shall speak my convictions of the convention of the present of the case, and thoug In the very first sentence of your remarks you appear to show but little real knowledge of facts. I am not Inspector of Fisheries for Nova Scotia, nor have I been my own views, and very fortunately for me, as an offset to your baseless charges, my second in Ottawa will prove that I have never yet reported on any one important question on the aniget of the fisheries of your river. I have been thirty five, and even after making allowance for your immensely superior bolity, still you ought to allow me, in fairness, some slight and wown after making allowance for your immensely superior bolity, still you ought to allow me, in fairness, some slight and wown after making allowance for your immensely superior bolity, still you ought to allow me, in fairness, some slight and wown after making allowance for your immensely superior bolity, still your adventage on the fact of the case. In this particular case, both Overseers Hickson and Mowat made their own independent Reports, and on these as well as you should do so in two summers tany up that the facts of the case. In this particular case, both Overseers Hickson and Mowat made their own independent Reports, and on these as well as you should do so in two summers tany up the facts. Your very limited acquaintance

you feel ashamed, I pass to your next quotation from my letter.

You object to the way in which I put your opinions on the smelt, and you attempt to "mend your stroke." Well, as the question is too simple and too easily verified, for any real doubt to exist, all you need do is to get from Napan now a "black-back" smelt with ripe spawn in it, or in May or June, a "silver-back" smelt at all. The question is so simple and so well and so that I have stated above, long before you drew breath. I cannot forbear saving that—on the subject of the fisheries of Nato Bruns-well at all. The question is so simple and so well and sudgestood by those who have each that I should be quite unit for the office I better condition than the spring smelt, and also having marked differences in about the mad for than Mr Crown in Submres and Napan, both place, and It old Mr. Crocker in Submres and Napan, both is opiners, and that if any instance of mine could stop them, it should a used to that effect. I appeal to Mr. and that the host in the facts as we do, I will ask you to remark about the "period of the plant and the same of mine could stop them, it should a used to that effect. I appeal to Mr. and that both with the reads we do, I will ask you to remark a doubt at all that they are as a distinct variety from the spring or summer fish, and that both with the reads we do, I will ask you to remark a doubt the "period of the plant attach to the effect of the whole subject." In conclusion I begins of the proposition of the summary of the passage, but you show most conclusively that you go not the passage, but you show most conclusively that you proved the their spars and all the reads the passage with the passage, but you show most conclusively that you proved the their spars and the sample of the Minute and the subject that is an all the sparses that the columns that I have not made the passage, but you show most conclusively that you proved the feet appears the bags passaged in color by Jack Frest, and then you not be water and caught my of the most things through they are appeared by the collection of the Minute and the passage, but you show most conclusively that you proved the three passages but you show most conclusively that you proved the feet and the passages but you show most conclusively that you have you of the most things through the passages but you show the service of the Minute and the passages but you show the service of the Minute and the passages the bag possage and caught my of the passages the bag possage and caught my of the passages the bag possage and the passages the bag possages the bag possages the passages the bag possages the passages that the passages the passages the passages the passages that the passages that the passages the passages the passages that the passages the

Hickson and Mowat made their own independent Reports, and on these as well as on my own, has the Minister acted. Having stated these facts, which ought to make you feel ashamed, I pass to your next quotation from my letter.

well understood by those who have even an ordinary knowledge of the subject, that I think it quite unnecessary to argue the point, but for the benefit of some few of your readers who, not knowing you as well as I do, may put some faith in your preas I do, may put some faith in your pre- fish is limited, and because the main tentions to knowing what you are writing about, I quote an extract from Overseer John Mowatt's report to the Minister, which can be supplemented, if, necessary to convince them, by extracts from Overseer Hickson's, but which, unfortunately I have not with me, as it is on file in Ottawa. — "From long observation, I find "the winter Smells to be a distinct variety "of these fish, being both larger and in "better condition than the spring smelt, it is is limited, and because the main river from Douglastown and the North Weat Branch are fine only waters in the Dominion, so far as I know, where this fish in winter can be taken in such quantities as to make their export an object. This being teach the case, you will see how important a matter it is that it should be saved from speedy destruction. As you have attempted to dispose of my four facts in rather a pooh, pooh, and cavalier manner, I think it important to take some trouble to show "hetter condition than the spring smelt, wand also having marked differences in shape and color; these are known as "silver-backs" in contradistinction to the superior ones, known as "black-backs."

"From examination of these now being taken in Bathurst and Napan. both "gravid and spent fish, there can be no is doubt at all that they are a distinct "variety from the spring or summer fish."

shout the 24th May, at which date you said these Napan fish were got, now, sir, I suppose you will hardly contend that there are two species of striped bass in the Miranichi; well, then, as you cannot resort to this subterfuge, and as you adunit the bass do not winter in Napan, it follows that again you have convicted yourself not only of ignorance, but of a poor attempt to be "smart" at the expense of your honesty.

The taking of this fish

under head of "first fact," they would be very poor food fish, and their capture and destruction would be as "terrible" as that which the Inspector says is carried on in the Northwest and Main River, but from our reply to "first fact" the Inspector ought to be convinced that his premises are not entirely correct.

And this you consider argument:

All of them spawning fish or those that all of them spawning fish or those that

Still again, sir, it becomes my duty to show your readers that even of so simple a practical matter as drawing a seine, you are totally ignorant, and every fisherman who has read the above reply must be quite convinced that you never in your life saw a seine hauled for any kind of fish, or if you did, your powers of observation are very limited. If you had and your eyes were open, it is quite impossible that you could seriously have written the above. Any man on the river, any fishery officer, your near neighbor Overseer Wyse, had you taken the slight trouble to ask him, would have told you. that as a matter of absolute necessity, from the very nature of the action, the large fish get into the bunt of the seine, and pressing against the meshes in a compact mass, tetally her the sevene of core are reversed. against the meshes in a compact mass.

poor attempt to be "smart" at the expense of your honesty.

Third Fact.—The taking of this fish in any way at that time and in their condition, is not only destroying a very poor food fish, but all its progenty, upon which depends the very existence of the species in the river. This, I think, needs no further proof. Reply to "third fact":—If the fish taken in Napan in May were "mature ish" as mentioned by the Inspector under head of "first fact," they would

to them such childish stuff as this and call it a Reply. As Llave shown them that in your attempt at a Reply to my first fact you have only more clearly proved it. I think they will admit that this Reply once again convicts you, out of you own mouth, of pitiable ignorance and unbounded audacity.

Fourth Fact.—In addition to the mature arears fish and all their convents. Fourth Fact.—In addition to the mature parent fish and all their progeny thus destroyed while in the very act of procreation, the seines then used destroy very large quantities of young Bass, too small for market, and wholly valueless to a commercial fish. This, no Napan man can honestly deny. less to a commercial fish. This, no Napan man can honestly deny.

Now, in view of these four most true and indisputable, facts, I appeal to your common sense whether these fish ought to be taken at all during their spawning time, and whether seines should be allowed at any time in this fishery.

Reply to "fourth fact":—The size of the mesh of seines being entirely within the power of the Department to regulate, the "very large quantities of young bass too small for the market" ought to escape through them.

escape through them.

Still again, sir, it becomes my duty

HERENY SHAWETH:

That your Petitioners have learned with surprise that you have made an order directing that no smelt fishing be allowed with bag nets but that it must be confined to hook and line in the County of Glonces-

Your Petitioners deem this an injustice as by a recent order, these nets are allowed in other Counties in this Province until the fifteenth day of February next. Your Petitioners consider it a great hardship that the fishermen who have invested so much money in nets should be so suddenly required to withdraw.

Your Petitioners therefore humbly pray that the fishermen of this County may receive the same priveleges as are accorded in other parts of the Province.

And as in duty bound will ever pray

And as in duty bound will ever pray. Special Despatches to the "Miramichi Advance."

Concert at Bathurst.

On the evening of Monday the 15th inst. a concert of vocal and instrumental music was held in the Masonic Hall Bathurst. The programme, an unusually long one, faction to the large audience, they being unanimous in stating it to be the best ever given there. The chorus party had but three practices together, and deserve all praise for the manner in which they executed their part, while at the same time present an address which had been handed him with the request to do so. It was as

Continued from last week. An obliging correspondent, writing from District 2 No. West Branch, Kent, says: "We held our annual school meeting is the school house West Branch on Thurs day 11th inst. There was a very fair attendance of rate-payers. The meeting was appointed Chairman and James Johnson Secretary. Mr. Henry Wathan being the retiring truster, Mr. James Murray was elected in his place. The Board is now composed of Messrs. Thos. Curran. Alex. Michael and James Murray. The meeting was conducted very harmonious ly and \$100 were voted for school ex penses for the current year. On account of the scarlet fever breaking out in our district the Trustees have decided not to again open the school until the beginning

of the next term." At District No. 51 Glenelg the chair was occupied by Sam'l T. McKnight, Mr. John Fenton, Trustee, being Secretary. Mr. Fenton was the retiring Trustee and he was re-elected. An assessment of \$70 the present year:—
John Robertson, W. M.; John Mitchell and Donald McGinnis were excused from payment of their District tax. It was also voted that the school

ouse should be removed to a more con venient place than where it now is. At the meeting in No. 3 District Black Brook, Mr. John Rice was chairman and Mr. McIntosh, Sec'y. The amount of assessment voted was \$350. Mr. John Loggie was retiring Trustee and Mr Alex. Loggie Jr. was elected in his place. Wm. McRae Esq., was re-appointed auditor. The Board of Trustees is now composed of Messrs. Rice, John Blake and Alexander Loggie Jr. The balance on hand in this district at the end of the year was \$130.

A Newcastle friend furnishes the follow

events that we have ever recorded :--On the afternoon of Thursday last the monotony of this quite town was disreflecting great credit upon their conducturbed by the startling announcement reflecting great credit upon their conductor and teacher Mr. J. R. Burwood. Just that Thomas Marshall, a promising and respected young merchant, had committed suicide. The consternation was suicide. The consternation was great to hear of his demise. asking a few minutes in order to read and heightened by the absence of any previous gret to hear of his demise. indication which would lead to the supposition that such a desperate act was contemplated by the unfortunate young man. and landlady of the "Kent" who recently Though but 25 years of age he had been in gave a private ball, a number of spirited the employ of various concerns, where his industrious and steady habits were such Ball to be held in the "Kent [Hotel" on heartfelt thanks for the assiduous and disinterested manner in which you have all east concert and bringing it to so successful an issue.

THE GREAT SHOSHONEES REMEDY .- IS an Indian vegetable compound, composed of the juices of a variety of remarkable medicinal plants and herbs; the various properties of these different ingredients when combined, is so constituted as to act simultaneously upon the Blood, Lungs, Liver, Kidneys, Digestive Organs, Nervous System, &c., restoring their function, table, is as harmless as Nature's own beverage. This medicine is a decided benefit in all, and a permanent cure in a large majority of diseases of the blood, such as Scrofula, Erysipelas, Salt Rheum, Canker, Pimples, &c. In prescribing this medicine we do not claim that it always performs cures; but this we do say, that it purifies and enriches the blood, permanently curning a large majority of diseases arising from its impurities. It stands far ahead and unequalled among the hundreds of competing medicines of the day. It has stood the test of ten years, and is to-day more popular than ever. As a summer restorative it stands unequalled any more popular than ever. As a summer restorative it stands are more propular than ever. As a summer restorative it stands are more popular than ever. As a summ storative it stands unrivalled: it enables storative it stands unrivalled; it enables the system to bear up against the constant drain to which it is subjected by high temperature. Persons who are subject to Billious Colic, Dysentery, Indigestion, &c., should take the "Shoshonees Remedy." Price of the remedy in pint bottles \$1. Pills 25 cents a bux.

Sold by all medicine dealers.
