Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x
12x	16x	20x	24x	✓ 26x	28x

The copy filmed here has been reproduced thanks to the generosity of:

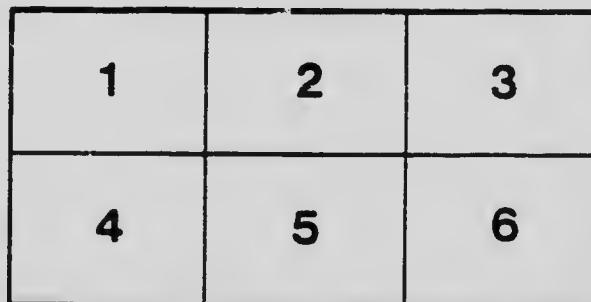

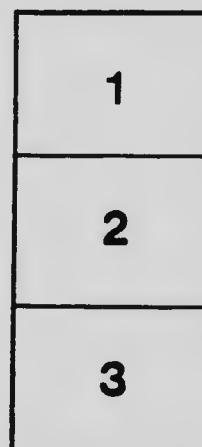

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contains the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

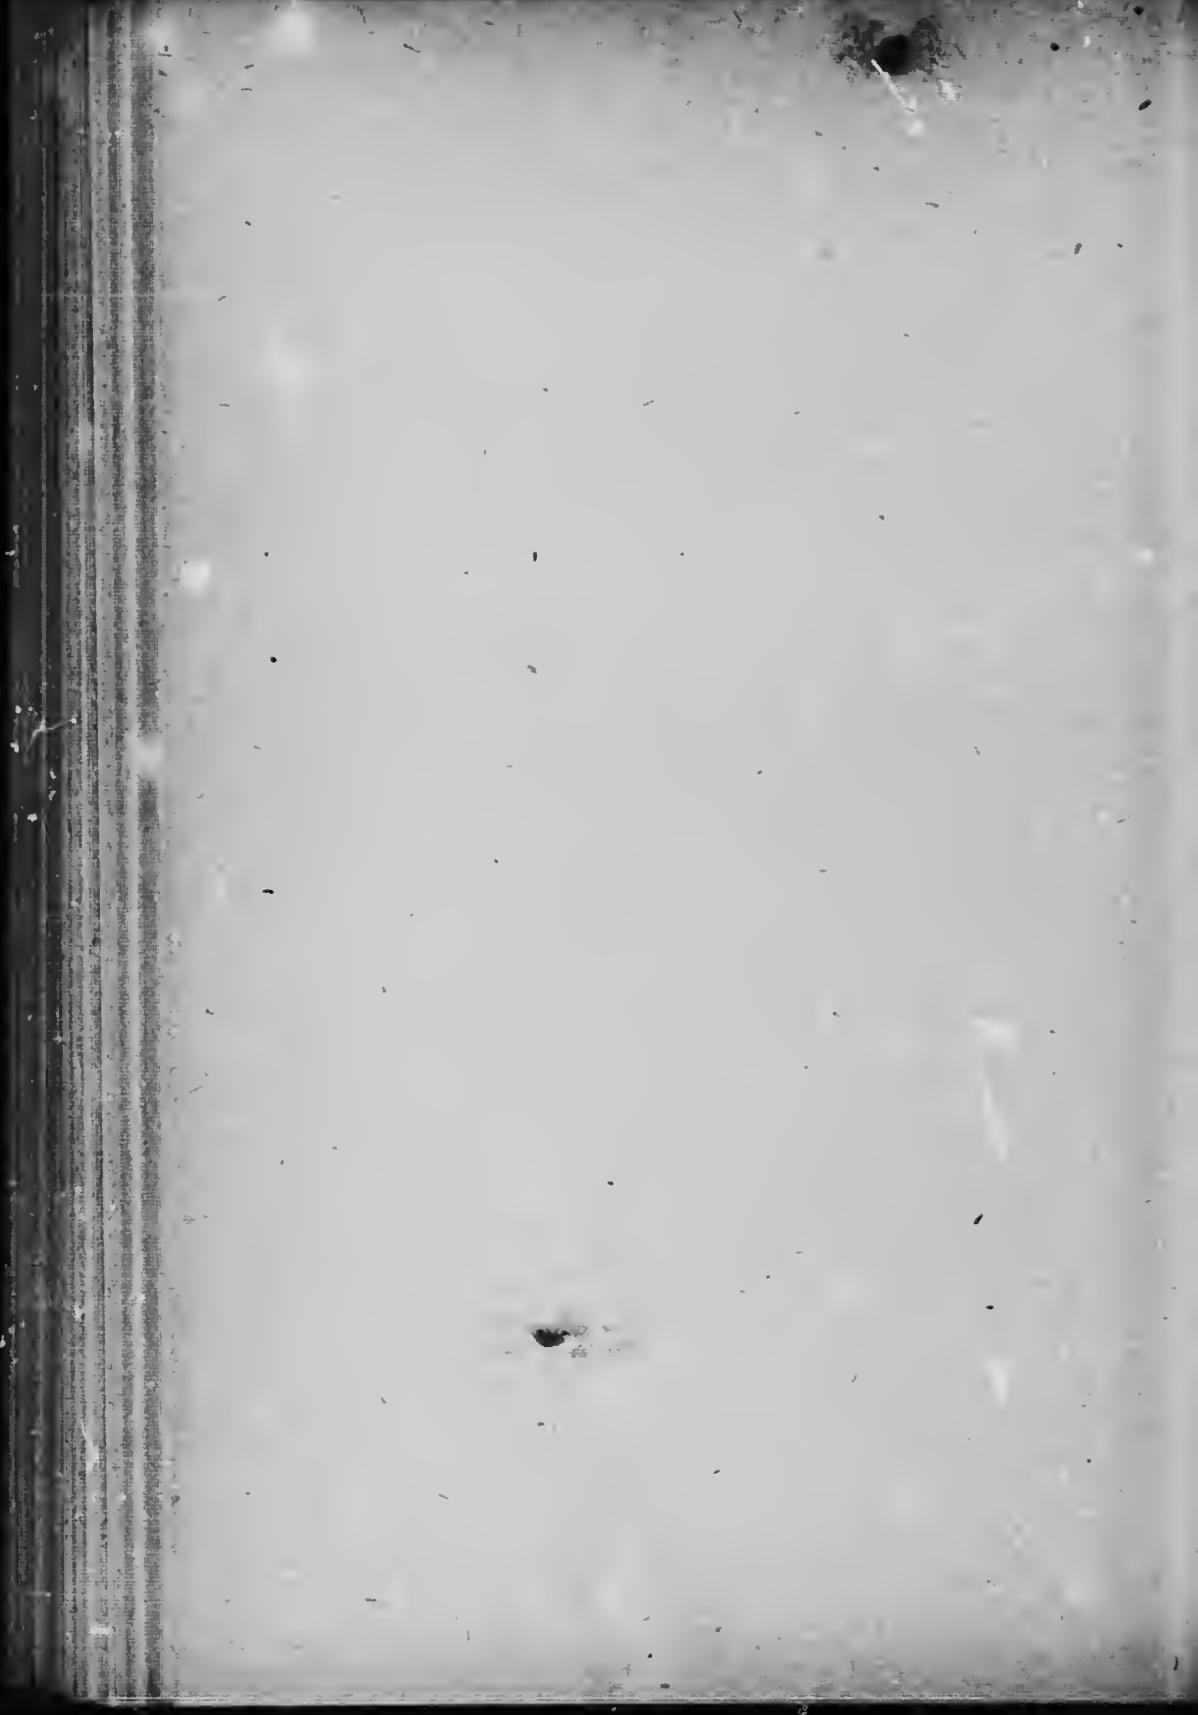

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de télécopie.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plan et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plan, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

LABORATORY

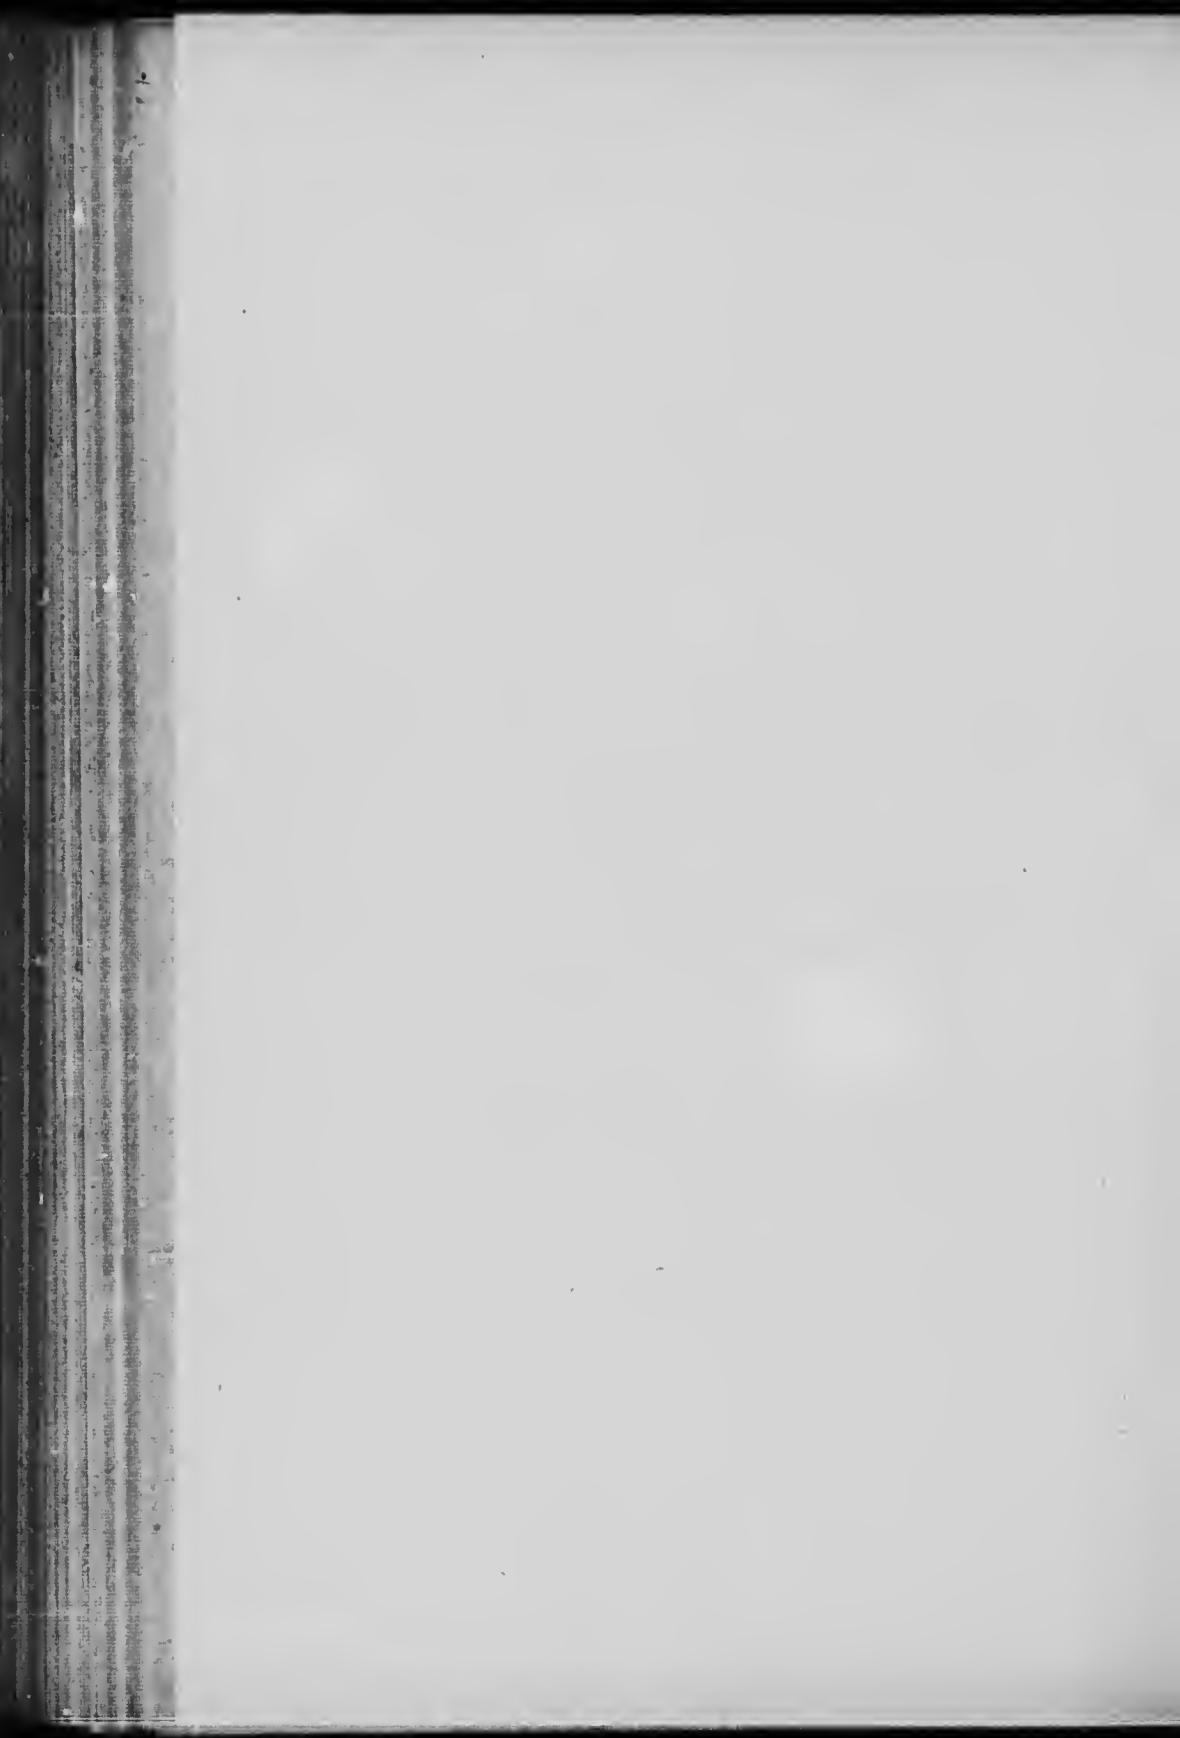

OF THE

INLAND REVENUE DEPARTMENT

OTTAWA, CANADA

BULLETIN No. 365

CARAMELS

NOTES AND COMMENTS.

Under this heading, as occasion arises, the Bulletins issued by this Department will contain, as an appendix, such comment as may seem necessary or advisable upon matters relating to the work of the Department in connection with the administration of the Adulteration Act, the Fertilizers Act, the Feeding Stuffs Act or the Proprietary Medicines Act.

It frequently happens that correspondents ask information regarding the above Acts, of such a nature that the matter in question possesses general interest, and comment upon it would prove acceptable and useful to others than the immediate questioner. In such cases the reply may find a place in these columns. For convenience of reference these notes will be numbered in series.

A. MCGILL,
Chief Analyst.

LABORATORY
OF THE
INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 365

CARAMELS

OTTAWA, March 12, 1917.

J. U. VINCENT, Esq., K.C.
Deputy Minister of Inland Revenue.

SIR.—In Bulletin No. 346 (published in July of last year) I drew attention to the alleged extensive employment of paraffin as a stiffener in the form of candy sold as Chocolates. Seven samples of the 151 samples therein reported were found to contain paraffin; but the amount was not determined.

Concerning paraffin as a component of a food product I made the following statement:—

“The National Confectioners’ Association of the United States, issued a Food Law Circular under date May 20, 1913, containing a list of substances prohibited in confectionery, among which appears paraffin.

The food laws of Illinois, Nebraska and Utah, specifically forbid the use of paraffin in candy; and those of many other States are interpreted in such a way as to condemn its use.

It is certain that so-called paraffin or paraffin wax is wholly without food value; is quite indigestible, and is not a normal component of any natural food material. Its melting point (about 54.5°C. = 130.1° Fah.) is so high as to keep it solid at the body temperature, and being quite insoluble in the digestive fluids, it is conceivable that serious results might ensue from its presence in foods consequent upon mechanical disturbances.”

Several correspondents have claimed that, while paraffin is occasionally employed by manufacturers of the cheaper grades of so-called Chocolates, it is much more largely used in that form of confection known as Caramels.

It was considered desirable to ascertain the facts of the case, and in consequence a collection of caramels was ordered in October and November of last year.

This report, dealing with 110 samples may be summarized as follows:—

Caramels containing no paraffin.....	30 samples.
" " traces only.....	8 "
" " less than 0.5 per cent.....	8 "
" " more than 0.5 per cent but less than 1.0 per cent.....	13 "
" " more than 1 per cent.....	51 "
	—
Total.....	110

Of 51 samples which contain above 1 per cent by weight of paraffin, the subjoined table gives particulars:—

From 1 to 2 per cent paraffin.....	23 samples.
" 2 " 3 " "	12 "
" 3 " 4 " "	10 "
" 4 " 5 " "	5 "
" 5 " 6 " "	0 "
" 6 " 7 " "	1 "
	—
Total.....	51

We have no direct legislation against the use of paraffin in candy. Whether or not the amounts above indicated can be regarded as harmful to health is a matter for very careful consideration, and will be duly investigated.

Since writing the above I have received the following expression of opinion from Dr. A. D. Blackader, Professor of Pharmacology at McGill College, Montreal, and Medical Adviser to this Department.

"It is a subject to which my attention had never been previously drawn, and I have taken time to consult my confrères and made enquiries from all whom I thought might give me an opinion. The answer I received from most of my confrères was to the effect that in amount so small as 1 per cent it was not likely to do any harm, one might even say 2 per cent, but that in larger amounts there was a possible risk in persons or children who consumed large amounts of candy.

In his very recent volume on Pharmacology (1916) Sellman states that pure paraffin is harmless, ill-refined paraffin may give rise to toxic symptoms. Any impurity in the paraffin used for caramels may do harm in several ways. Care therefore must be taken that only pure paraffin is employed. If the paraffin is pure, and in amount does not exceed 1 per cent I do not think its employment can do harm. The objections to it is that it is of no use as a food, and in candy may be regarded as an adulteration."

In the meantime I would respectfully advise publication of this report as Bull. No. 365.

I have the honour to be, Sir,
Your obedient servant,

A. MCGILL,
Chief Analyst.
