THE NICKEL.

An All Star Feature
 Holiday Bill.
 Wednesday and Thursday.

The Pathe American Players,
 presenting

A WESTERN MEMORY.

A Poem in Pictures.

"While the golden orb sinks slowly,
 Sinks slowly in the West;
 I'll be waiting, waiting, waiting
 For the one I love the best."

Beautiful in conception,
 theme and execution, this
 Idyll of the Western States is
 without question one of the
 finest subjects of its kind ever
 shown at the Nickel. The
 poetic nature of the picture is
 brought out most picturesquely
 rugged setting of the West.
 Its human appeal can only be
 appreciated by seeing it.

The Little Cripple.

An interesting little story of
 modern incidents, which gives
 a considerable insight into the
 daily life of New York Institution,
 for injured children.

A powerful Drama of the Western
 Forests.

The Backwoodsman's Suspicion.

The tale of a great wrong.
 This is a very vivid virile study
 of character. A capital film of its
 kind—full of action, life and dra-
 matic interest—the sensational—
 adventurous. The dashing chase
 across country is most thrilling
 and gripping.

Musical—Song—Effects

BOVRIL

IS ALL BEEF.

Questions we are often asked.

- Q.—What is the sediment at the bottom of a cup of Bovril?
 A.—That is a valuable portion of the nourishment, and should never be left.
 Q.—Are you serious when you say that Bovril is more nourishing than ordinary Meat Extract or Home-made Beef Tea?
 A.—Certainly! and we have for years offered large rewards to anyone who can prove the contrary.
 Q.—But can you prove your statement?
 A.—Yes—from the pen of Baron Liebig himself, who told the world that the nourishing, as well as the stimulating properties of Beef in a liquid form, would produce something far better than Liebig's Extract, and would be a public benefactor.
 Q.—And you have done this?
 A.—Yes. By a special process, the entire nutritious constituents of prime ox beef are separately treated, pulverized and added to specially-prepared Meat Extract, and that is Bovril.
 Don't experiment with artificial imitations of dubious quality (which are dear at any price) when such a tried and proven nutritious food-beverage "made in England" is within your reach.

Notice to Mariners

Point Platte, Miquelon, St. Pierre.

The following information has been received from the Vice-Consul of France, St. John's:—That owing to the bad condition of the Fog Alarm of Point Platte (Miquelon), guns are fired there, during foggy or snowy weather, every 20 minutes; but those measures having not proved efficient enough, it is thought better to advise navigators to avoid the islands during bad weather, until further notice is given.

Uncle Walt

THE POET PHILOSOPHER.

My friend Whang Baxter's out of work. He used to be a hardware clerk and did his duty passing well, but rheumatism on him fell and bunged him up to such extent that all his coin' to doctors went. And A CAN. now he's on his feet once more, and wants a job in some one's DIDATE store. Your support for old Whang I court; he's far more worthy your support than chronic patriots who chase across the poor old planet's face and beg that you will save their goat when comes the day on which men vote. Let all the chronics go and bang; come out with me and whoop for Whang. He needs a job, the statesmen come out with me and whoop for Whang. It makes no odds to you doff't, he'll earn his pay, the statesmen won't. It makes no odds to you doff't, and me who our next president may be; we'll have to rustle just the same, whae'er the outcome of the game. But old Whang Baxter, out and down, is living here in our town; he needs a job like everything, so let us make the welkin ring; and give a big torch-light parade, and hold a caucus for his aid; and try to influence the press to help old Whang's distress.

Copyright 1911, by George Hathorn Adams. *Chas. Mason*

One large ribbon, velvet or silk flower, roses peonies, poinsettias, etc., with velvet leaves, are worn in the center of the corsage just above the waist line. This is especially striking in Pompeian red, deep pink or bright yellow on a black-and-white, all-black or all-white dress.

Minard's Liniment Cures Dandruff.

The Evening Chit-Chat

By RUTH CAMERON

"My son, if you would be wise, open first your eyes, next your ears, and last of all your mouth, that your words may be words of wisdom and give no advantage to your adversary." Old Indian Proverb.

The value of knowing when to keep one's mouth closed is a very old story, but a letter friend has presented it to me in a new aspect, which is more than worth passing on.

It seems that the above Indian proverb was brought into English three quarters of a century ago by a man named George Catlin. This man, being on the verge of consumption, went and lived outdoors among the Indians. From this wild life he brought back his health and this interesting observation--that the Indians make a very special point always to keep their mouths shut, except when eating or speaking. And as anyone who knows anything about Indians will testify, that latter process wouldn't keep their mouths open very long.

Not only did he notice that the adult Indians observe this rule, but also that all the squaws were most careful to see that the babies' mouths were closed when they were sleeping. He found that the Indians were almost entirely immune from decayed teeth--think of it, with no dentists, nor tooth brushes, nor dental floss, nor tooth powder, to save them, and from throat troubles, and he was so much impressed that he adopted the practice of keeping his mouth closed as

much as possible. To that and to the fresh air, he ascribed his recovery.

Mr. Catlin must have been the original grandfather of health faddists for he was so thoroughly converted, that he wrote a pamphlet to show that all human ills could be avoided if one would always breathe through the nostrils. This pamphlet was entitled "Shut Your Mouth," and closed thus, "If I were to endeavor to bequeath to posterity, the most important motto which human language can convey, it should be in three words, "Shut your mouth."

It is interesting to observe how closely the old Indian wisdom tallies with modern medical teachings. Just the other day, in a progressive dental magazine, I read a long article, telling how many of the defective and delinquent children were found to be protruding teeth, which caused this continual mouth breathing. And to think that the Indians knew all this a century ago.

The letter-friend who sends me all this information, says that he has not only formed the habit of keeping his mouth carefully closed in the daytime, but sleeps with a band tied under his chin and over his head, to make sure that his mouth shall not drop open when he is asleep.

We all know that mouth breathing is harmful, but I think it will not hurt any of us to be reminded anew of the many advantages of keeping our mouths shut. And I especially recommend to mothers the wisdom of the Indian women who, a century before the day of health fads, were forming this health habit for their little papooses.

Ruth Cameron

Patriotism

The stomach is a larger factor in this liberty and the pursuit of happiness than most people are aware. Patriotism can withstand hunger but not dyspepsia. The celebrated dyspeptic "is fit for treason, stratagems and spoils." The man who goes to the front for his country with a weak stomach will not be a fighter.

A sound stomach makes for good citizenship as well as for health and happiness.

Diseases of the stomach and other organs of digestion and nutrition are promptly and permanently cured by the use of

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY.

It builds up the body with sound flesh and solid muscles.

The dealer who offers a substitute for the "Discovery" is only seeking to make the little ones profit realized on the sale of less meritorious preparations.

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing and 5¢ for one-cent stamps for the paper covered book, or 5¢ stamps for the cloth bound. Address World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

Household Notes.

If you are troubled with rats, try the following: Put on a board or shingle a little mound of dry lye, about a tablespoonful. Mix enough molasses with the lye to moisten it; then pour just a little more over the top. Rats love molasses and will eat the lye unknowingly.

The very best remedy for a bruise is butter. Whenever one of the children has a fall or knock of any kind, apply butter. This relieves the pain, prevents swelling and keeps the hurt place from turning black and blue. It is a very simple salve and one that is always in the house.

The process of gassing may be rendered practically dustless if the dust cloths are occasionally washed in hot suds, dipped in kerosene and then dried thoroughly in the open air. The dustier or dry mop treated in this manner greatly improves the appearance of hardwood floors.

A shirtwaist box in a bathroom will fill a want that is often felt. Very often the room is too small for both a chair and a hamper for soiled clothes. A shirtwaist or utility box will answer both purposes and look better. If not needed for soiled clothes it will do for clean towels.

The beautiful gold lace and trimmings so much worn at present tarnish very quickly. They can be cleaned by the use of powdered rock ammonia. Reduce the rock ammonia to a powder and apply with a soft brush or flannel cloth. If badly tarnished allow trimming to lie wrapped in the powder for several days.

Here is a splendid way to wash dirt or kerosene from woodwork without marling the walls: Take a flat piece of tin about twelve inches long and six inches wide and bend up an inch on the long side to hold it by. Place the opposite side to the edge of the woodwork, slipping the tin along as you wash or scrub it.

To open a stubborn fruit jar, invert the top of the jar in hot water (boiling hot, but not boiling), taking care that the water is not deep enough to touch the glass. The principle is to expand the metal top. Then open as usual. A minute or two is sufficient, should it remain in too long the glass would also be expanded.

Clothes props kept in one place, where they can always be found in good condition on washing days, is easily accomplished by following this plan: Fasten two loops of stout cord or leather against the wall of the house somewhere near the laundry, one placed high, the other low. Through these loops slip the poles as soon as they are no longer needed.

Delicate marabou neckpieces and trimmings may be readily cleaned at home. Shake the marabou very carefully in warm soapsuds of some good white soap. Continue until water is soiled and use clean suds until marabou looks clean. Rinse well. Hang in the sun, if possible, or where the air will strike it; and shake gently, now and then, until dry. Dry as quickly as possible.

Insure Against Serious Colds

Of the many forms of insurance probably that which protects you against the serious results of colds is the most valuable at this time of year when so many are becoming the victims of la grippe and pneumonia.

By the prompt use of Dr. Chase's Syrup of Linseed and Turpentine you can keep the cough loose, prevent further development of the cold and cure it up in two or three days, whereas the usual lifetime of a cold is three or four weeks, to say nothing of the serious results so frequently the outcome.

Mothers insure their children against croup by the use of this great family medicine, for it gives freedom in small doses, it prevents the dreadful choking spasms and soon effects a thorough cure.

Whooping cough, bronchitis, asthma, croup and severe chest colds are quickly brought under control by the use of Dr. Chase's Syrup of Linseed and Turpentine. 25 cents a bottle, at all druggists, or Edman, Baker & Co., Limited, Toronto.

BEDS.

The bed is an ancient health resort which was invented about the time that a sleep was first put on the market. It was not used a great deal until after Noah's time. A dam didn't do much sleeping of any consequence, as he had to keep one eye on Eve and the other on the apple tree, an experience which is still being duplicated in several million localities. Beds can be had in various styles of architecture. One of the most pleasing and ornamental is the twin style, in which a man has to fall out of bed in order to turn over. This bed has the further advantage of permitting one to edge away from a lousy snore without giving offense or confiscating the covering. Then there is the folding bed with foredoor entrance and detachable tonneau. This bed is frequented mostly by people who are in a desperate mood or are anxious to realize on their life insurance. Memory clinics with fond delight to that household joy, the feather bed, and the feather bed has changed to a lot of people in its time. Many a person who climbed into a feather bed in the prime of vigorous manhood, faded away before breakfast time until they had to locate him with a plumb line. The straw tick is another variety of bed which is very popular with people of coarse cuticle and a violent passion for sleep in any form. The trundle bed was originally used to remove children from the corrupting influences of the spirituous hard cider and the Greening apple, to it was a piece in its time. Many a person who climbed into a feather bed in the prime of vigorous manhood, faded away before breakfast time until they had to locate him with a plumb line. The straw tick is another variety of bed which is very popular with people of coarse cuticle and a violent passion for sleep in any form. **A Remarkable
Scene in the
House Yesterday**

At 3.30 yesterday afternoon the Premier rose to reply to the criticism passed by Sir Robert Bond upon his Tuberculosis Resolutions at the previous sitting of the House. It being a half holiday, all available space in the gallery and below was thronged by citizens. For an hour or more the Premier laboured in his effort to combat the arguments of his opponent. First he called in question the accuracy of Sir Robert Bond's statement respecting the late Government's part in starting a crusade against consumption in this country. Then he thought that Sir Robert Bond had misquoted Sir Wm. MacGregor's opinion on the subject of Sanatoria. Next he read extracts from Lloyd George's Insurance Scheme which he thought supported the Government's scheme of establishing seventeen Sanatoria in Newfoundland. This was followed by voluminous quotations from reports, pamphlets and lectures until the House was wearied and bored almost beyond endurance. Not a sound of approval proceeded from the large audience from first to last. His remarks were heard in cold, chilling, stolid silence. When the Premier sat down, and Sir Robert rose to reply the scene changed in an instant, and such an ovation was never witnessed in the House of Assembly before. It is usual for the audience from time to time to signify their approval of a speaker's remarks by stamping on the floor. But as Sir Robert Bond stood up to address the House yesterday afternoon the whole audience burst into loud cheers and clapping of hands, and it was some time before he was permitted silence to begin his speech. As he proceeded and scored his points the cheering and clapping broke forth again and again, and after a ringing speech of more than an hour he sat down amidst the acclamations of an audience which he had carried with him from the beginning of his speech to the end. Sir Robert's exposure of the Government's broken pledges; of their pauper dole; of their pauper immigration scheme; of their connivance in the present railway scandal, and of their Sanatoria blunder, has roused the people to an interest in public matters that was sadly wanting, and has won for the leader of the Opposition the approval and esteem of his fellow men. "Happy is the man whom the people delight to honour."

THE DOCTOR HABIT

And How She Overcame It

When well selected food has helped the honest physician place his patient in sturdy health and free from the "doctor habit" it is a source of satisfaction to all parties. A Chicago woman says:

"We have not had a doctor in the house during all the 5 years that we have been using Grape-Nuts food. Before we began, however, we had 'the doctor habit' and scarcely a week went by without a call on our physician.

"When our youngest boy arrived, 5 years ago, I was very much run down and nervous, suffering from indigestion and almost continuous headaches. I was not able to attend to my ordinary domestic duties and was so nervous that I could scarcely control myself. Under advice I took Grape-Nuts.

"I am now, and have been ever since we began to use Grape-Nuts food, able to do all my own work. The dyspepsia, headaches, nervousness and rheumatism which used to drive me fairly wild, have entirely disappeared. My husband finds that in the night work in which he is engaged, Grape-Nuts food supplies him the most wholesome, strengthening and satisfying lunch he ever took with him."

Name given by Postum Co., Windsor, Ont.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

THE MAIL SERVICE

Of Placentia, Whitbourne and those Settlements in Trinity Bay, served by the Broad Cove line.

Yesterday the Rt. Hon. Sir Robert Bond asked questions of which he had given notice the previous day in reference to certain mail services. He requested the Hon. Colonial Secretary to lay on the table of the House a statement giving certain particulars. The statement was tabled and the queries and replies are as follows:—

(1) "When the last mail by train was received from Placentia."

P. M. G.'s Answer: "Mail left Placentia Feb. 10th., arrived St. John's Feb. 13th."

(2) "When the last mail by train was delivered at Placentia."

P. M. G.'s Answer: "The last mail delivered at Placentia February 10th."

(3) "Where the mails for Placentia, Whitbourne and those settlements in Trinity Bay supposed to be served by the Broad Cove line, and which have been sent out from St. John's by rail since the 8th February, have been deposited; if at Brigus Junction, what accommodation is provided there for mail matter, who is in charge of such mails, and who is responsible for their safety."

P. M. G.'s Answer: "Mails for Placentia, Placentia Bay, Travelling Post Office Placentia Bay, Whitbourne, New Harbor and Dildo, in all about 25 bags at Brigus Junction in Mail Car in charge of Mail Clerk Grant. The mails referred to in No. 3 were despatched from February 8th to 17th inclusive. All trains after that date cancelled."

It is now the 29th of the month, and according to this statement certain mails which left St. John's have been held up at Brigus Junction for three weeks, and this is the "business government" for which "sapient Morison used to pine. If a tithe of the energy devoted to 'timber' was directed towards getting a move on the 'mails,' people would be less dissatisfied."

In addition to this, Carbonear is up in arms. Harbor Grace and the neighbourhood are indignant. Is this Newfoundland or the North Pole? How would it be to engage Capt. Bob Bartlett to lead a relief expedition through these Arctic wilds?

**A Tribute to
Sir Robert Bond.**

Editor Evening Telegram.

Dear Sir,—I would like to say a word or two in reference to the speakers in the House of Assembly yesterday. Being a stranger to this part of the world, I took a stroll in there and was much struck by the speech of the Rt. Hon. Sir R. Bond. It was worth hearing. The way he literally "wiped up the floor" with the Rt. Hon. Sir Edward Morris on the Tuberculosis question, it was plain to the most ignorant person there which was the better man. Newfoundlanders ought to be proud in having such an able man as Sir Robert Bond, and I think it shows very poor judgment on the part of the electors to have such a man sitting on the opposition side of the House. Sir Robert is a born leader, and as a speaker I give him second place to none, and I have on different occasions heard the leading men on both sides in Canada—Sir W. Laurier, Hon. R. Borden and others; but Sir Robert, in my opinion, puts them all in the shade.

Please publish this as a tribute from a stranger to one of the finest speakers I have ever had the pleasure of listening to.

Yours truly,
OBSERVER.
St. John's, Feb. 29th, 1912.

Train Notes.

The incoming express from Miller Junction left LaManche at 10.15 a.m. to-day with a rotary plow ahead and is due here in about two days. They are up against from 2 to 8 feet of hard pressed snow on this section of the road.

The Bonavista train, which left there on the 20th inst., arrived at Shoal Harbor at noon to-day. She is due at Clarendville this afternoon.

The local train from Carbonear, which left there last Saturday week, will cross Conners' relief gang at Irville Station this afternoon and should arrive here to-night.

The Placentia train is making its way back from Placentia Junction to Placentia with men shovelling ahead and with a plow ahead of the train. If no more snow falls during the next day or so the line will be cleared from the Junction to Placentia.

SCHOONER GETS CLEAR.—The schooner Nellie M., which left here Tuesday for Fernambuco with fish from Monroe & Co., it is thought got past Cape Race all right clear of the ice and that she is now on her way to her destination.

NO WORD OF NASCOPIE.—No word has been received by Messrs. Job Bros. as to whether the s.s. Nascope has left Louisburg yet. She is bringing a load of coal here.

HOUSE OF ASSEMBLY
Feb. 28th.

Sir Robert Bond.—Yesterday my pleasure to congratulate the Government upon its resolute and entirely unobjectionable manner in which he had adopted these Resolutions. I am only sorry that I cannot offer a similar compliment this afternoon. The leader of the Government has played oversensitiveness, and as a result the Government upon the little unnecessary heat in an attempt to discredit some of my observations. He rose apparently to curse his opponent but behold he has not done him, for he has provided the means for his own undoing and to substitute that which he has characterized as misleading. First, then, the Government has declared that it was incorrect in stating that the Government were the first to move the matter of dealing with tuberculosis in this country; he is partly offended because I said that movement was "without flurry" gave me occasion for alarm. He was deeply hurt because he thought my allusions to what the late Government had done would detract from commendation due to the Hon. Mr. Harvey and his associates in the P. C. He says that I alleged 4000 of Dr. Tait's pamphlets distributed to clergy and the laity whereas only 600 were so distributed and that no person in the Government were the first to move the matter of dealing with tuberculosis in this country; and the Premier admits that at least six copies of Dr. Tait's pamphlet distributed is corroboration of the fact that this movement was without flurry or occasion for alarm also corroborated by the Premier who admits that so quietly was work carried on that no person in the country knew anything about it. I related the circumstances yesterday afternoon. He admits that six copies of Dr. Tait's pamphlets were distributed, but he does not know how many of Dr. Knopf's books went out to clergymen and teachers. What I said yesterday was that I have three and four thousand inlets on tuberculosis had been put out, that included both Dr. Knopf's and the Premier's. I discover on further enquiry that approximately correct. Of course I spoke from memory and was not exact figures before me. As Premier declared that I had quoted Sir Wm. MacGregor, he says that in 1908 at a public meeting Sir William advocated the establishment of Sanatoria here, and read from a lecture or address delivered by him at a public meeting. He further says that the words quoted as falling from Sir Wm. were not his full observations, that he was addressing the Society only, whose funds were not distributed. I admit that in 1908 Sir Wm. MacGregor approved of Sanatoria after twelve months consideration. I evidently discovered his error again say that in 1909 Sir Wm. said at a public meeting held in the British Hall on June 1st, "I am against the idea of Sanatoria; are beyond your means." He says alleged by the Premier, still dressing an Association with means he was addressing the at a public meeting; and if words be construed to apply the Association, then my allusion was fully aware that the Government would be prepared to meet the funds of that Association. If such were deemed necessary, entirely clear from the record. Sir William MacGregor's view was a radical change in months and that he condemned he had previously approved. His subject of my serious proposition, and whatever I have felt, or spoken upon it is no calm settled and well considered judgment. In introducing the solutions yesterday, it will be his motion for their acceptance upon statistical information by the Registrar General, of the report of the Commission of Enquiry in 1909 to consider the subject of tuberculosis, or the report of the Special Committee, and it will be also contained in the most recent statistics broadly the legalization of the Government in the act of the 23rd January, 1912, and 50 Chancery Lane, London, England. Over 40 years continuous success. Address F.R.

SIR ROBERT BOND

Powerizes the Government.

Text of the Speech of the Leader of the Opposition in the House of Assembly Yesterday in Reply to the Premier's Resolutions on Tuberculosis.

HOUSE OF ASSEMBLY.
Feb. 28th, 1912.
Sir Robert Bond.—Yesterday it was my pleasure to congratulate the leader of the Government upon the dispassionate and entirely unobjectionable manner in which he had moved the adoption of these Resolutions, and I am only sorry that I cannot extend a similar compliment this afternoon. The leader of the Government has displayed over-sensitiveness and not a little unnecessary heat, in an attempt to discredit some of my observations. He rose apparently "to curse his opponent, but behold he has blessed him," for he has provided the material for his own undoing and to substantiate that which he has characterized as misleading. First, then, the leader of the Government has declared that I was incorrect in stating that the late Government were the first to move in the matter of dealing with tuberculosis in this country, he is particularly offended because I said that that movement was "without hurry" and gave no occasion for alarm, and he was deeply hurt because he thought my allusions to what the late Government had done about the commendation due to the Hon. John Harvey and his associates in the A. P. C. He says that I alleged that 4000 of Dr. Tall's pamphlets were distributed to clergymen and teachers, whereas only 600 were so distributed, and that no person in the country knew anything about it until I related the circumstance yesterday afternoon. Now I repeat that the late Government were the first to move in the matter of dealing with tuberculosis in this country, and the Premier's admission that at least six hundred copies of Dr. Tall's pamphlet were distributed is corroborated by the fact. That this movement was "without hurry or occasion for alarm," is also corroborated by the Premier for he admits that so quickly was the work carried out that "no person in the country knew anything about it until I related the circumstance yesterday afternoon." He admits that six hundred copies of Dr. Tall's pamphlet were distributed, but he does not say how many of Dr. Knopf's book were sent out to clergymen and teachers. What I said yesterday was that between three and four thousand pamphlets on tuberculosis had been distributed, that included both Dr. Tall's and Dr. Knopf's, and the Premier will discover on further enquiry that I was approximately correct. Of course I spoke from memory and without the exact figures before me. Again, the Premier declared that I had misquoted Sir Wm. MacGregor's views on the establishment of Sanatoria here, and he has read from a lecture or address delivered by him at a public meeting. He further says that the words I quoted as falling from Sir William were not his full observations, and that he was addressing the A. P. C. Society only, whose funds were limited. I admit that in 1908 Sir William MacGregor approved of the establishment of Sanatoria, but he evidently discovered his error, for I again say that in 1909 Sir William said at a public meeting held in the British Hall on June 1st, "I warn you against the idea of Sanatoriums. They are beyond your means." He was not addressing an Association with limited means, he was addressing the public at a public meeting, and if it could even by any possible twisting of words be construed to apply only to the Association, then my answer is that he was fully aware that the Government would be prepared to supplement the funds of that Association if such were deemed necessary. It is entirely clear from the records that Sir William MacGregor's views underwent a radical change in twelve months and that he condemned what he had previously approved. Now this subject of tuberculosis has occupied much of my serious deliberation, and whatever I have thought or felt, or spoken upon it is the result of calm, settled, and well considered judgment. In introducing these Resolutions yesterday, it will have been his motion for their acceptance either upon statistical information furnished by the Registrar General, or the report of the Commission appointed in 1909 to consider the subject of tuberculosis, or the report of any Specialist, and it will be a grave error to contain in the first paragraph of the act of the Government, without the sanction of this House, the gift of seven Sanatoria at the hands of the Railway Contractors. That was an

illegal act, which the adoption of these Resolutions will indemnify the Government for illegally performing. The subsequent paragraphs in these Resolutions simply provide for the carrying on, maintaining and operating these Sanatoria. The Constitutional aspect of the question I have so recently dealt with that I shall not repeat my argument, and shall confine my observations to the one point, namely, is it desirable that this House should take over and maintain seven Sanatoria in this country. I contend that it is not desirable. I contend that the cost of maintaining those institutions will mean at least one hundred thousand dollars per year if properly equipped and properly managed. I contend that we are not warranted as at present advised to saddle the overburdened taxpayers with this increased burden, while the necessary work of hygienic treatment may be carried on in their homes. I submit, sir, that nothing advanced by the Premier yesterday or today would warrant the House in doing so. The Government is not fortified by the advice of the Special Commission appointed to deal with the subject of tuberculosis, or by the advice of any known person in urging the adoption of these Resolutions, but, on the contrary, the advice given by the Government is directly opposed to such a scheme as the erection of seven Sanatoria. The advice of Sir William MacGregor, who the Government have quoted as an authority on the subject, is directly opposed to such a scheme, and the Government are simply moving on their own impulse or mere impulse diktat. The Premier has quoted from the Report of the Association for the Prevention of Consumption certain lines to indicate that the said Association are not opposed, but he has failed to quote in full from their Report of 1910 which places their attitude beyond the shadow of a doubt. "A large amount of consideration has been given to the matter of the establishment of a Sanatorium, and to the Secretary's (Dr. Keegan's) report in connection with the information gleaned by him on his recent visit abroad. So far, the Commission is not prepared to recommend the Government to establish a large Sanatorium in this Colony. Dr. Keegan considers that the actual results obtained by Sanatoria elsewhere are often exaggerated and frequently 'doubtful.' . . . It would seem as if the principal value to be derived from a Sanatorium would be the educational effect." This, sir, I submit bears out all that I have contended in previous debates, and gives no warrant for the adoption of these Resolutions. It will be observed that not only are the Commissioners opposed to the establishment of Sanatoria, but also to the establishment of even one "large Sanatorium in this Colony"; that not only is the Commission as a body opposed, but that Dr. Keegan, who was specially sent abroad to acquire information on the subject, after doubtless consulting specialists, and profiting by the experience of those Specialists and of those operating Sanatoria in Great Britain and Europe, returned to this country convinced that "the actual results obtained by Sanatoria elsewhere are often exaggerated and frequently doubtful," and he, too, joins with the

other Commissioners in withholding approval of the Establishment of Sanatoria. The Commissioners further state, "that at this time and in the light of their present information, it would be a mistake to recommend the expenditure of the very large sum that would be necessary for the establishment and upkeep of a large general Sanatorium for the Colony." This also bears out this matter, and furnishes no warrant for the Government's action in this matter. Again, sir, in their Report for 1911 the Commissioners state that the vital statistics outside of St. John's are by no means satisfactory." This declaration also bears out the correctness of what I have said, and indicates that the Vital Statistics of this Colony furnish no warrant for the Government's proposal. Now, then, where is the warrant to be found? There is none whatever. The Report of our own Commission on Tuberculosis; the Report of our Special Commissioner, Dr. Keegan; the advice of Sir William MacGregor, who the Premier has given as an authority; the Vital Statistics of the Colony, and the experience of Germany and of England all go to show that we shall make a mistake, a very great mistake, if we entertain the idea of maintaining seven Sanatoria in this Colony. In view of this, what right have we to impose fresh burdens upon the people? Look into the long corridors of thought that pulsate around us what do we find? Why, sir, that next to the question of religion, there is no subject more multitudinous and divergent theories as to the nature and care of physical diseases, than the medical journals, the organs of the legitimate and responsible schools of medicine and you will find explanations of certain forms of disease, but he has hygienic recommended that are constantly diametrically opposed to each other. You will also find that to the old established schools of allopathy and homoeopathy modern science added hydrophaty and osteopathy, various kinds of rest, cure, nature, faith, Christian Science, and a whole host of schools involving the mental with the physical in the curative agencies. The special disease of tuberculosis, with which we are dealing has called forth numerous suggestions for its cure and prevention, first, the establishment of sanatoria, then the cold air treatment, then the application of tuberculin, then the auto-inoculation or work cure, and lastly compulsory notification. What does all this constant change of medical opinion, and these various curative agencies or systems point to? It points to the fact that all are merely experimental and surrounded by the conflict of opinion would it not be madness for us to attempt to establish a Sanatorium, and to authorize advice to involve this country in the enormous expense of maintaining seven Sanatoria for an unknown disease of consumptives? In order to try and bolster up his scheme the Premier has quoted from a speech delivered by the Right Hon. George, Chancellor of the Exchequer, in introducing his National Insurance Bill to the British House of Commons, and he has endeavoured to convince this House that between the Sanatorium to be erected under that National Insurance Bill and the Sanatorium to be erected under and by virtue of these Resolutions there is an analogy. What nonsense! It is as absurd as well to compare sunflowers with cucumbers. I have read something concerning that great measure, and let me point out a few facts. First let me say that Mr. Lloyd George's speech in introducing that Bill clearly indicates that the Government of Great Britain have not regarded Sanatoria as the par excellence remedy for maintenance while there is any hope of tuberculosis. For Mr. Lloyd George has stated that "there are four or five hundred thousand people suffering from the disease in England, and that there are only four thousand beds in sanatoria altogether" to meet the requirements of the Government of Great Britain regarded sanatoria as above all else the remedy for consumption, then Parliament would have taken one hundred times more beds than it has provided since sanatoria was introduced fifty years ago. Again, Mr. Lloyd George's sanatorium scheme under the National Insurance Bill provides that the Government shall only pay one fourth the cost of maintenance while there is any hope to be taken from the public by the imposition of a special tax. It is this special tax that has called forth the bitter agitation against the measure. Does the Premier intend to impose a special tax upon the people of this

country to maintain the Railway Contractors Sanatoria? If not, then, there is no analogy between the two measures. Again, Mr. Lloyd George's bill provides that when the head of a family, or the supporting member of a family is removed to sanatoria the wife and children will receive a provision of ten shillings a week to keep them from starvation during the time that the bread winner is being cured. Does the Government propose to take God's afflicted ones from the custody of their friends and force them into the Railway Contractors Sanatoria without making any provision for the support of the family while perchance the bread winners are confined in these sanatoria? Unless the Government intend to make a provision similar to that in Mr. Lloyd George's bill there is no analogy between the two measures. There is no intimation in these Resolutions that such a provision is to be made. Again, sir, the leader of the Government had referred to the discovery of the germ of tuberculosis by Dr. Koch, of Berlin, in 1882, and had appeared to suggest that in the discovery of the germ of tuberculosis by Dr. Koch a sure remedy for consumption had at length been found, and that in the sanatoria to be erected the discovery would play an important part. Sir, I have read a little about this discovery and discovery. A few years ago, in 1904, I was one of the 1905 leading medical men from all quarters met at Davos to raise a monument to Dr. Koch. But after full consideration of the alleged merits of the discovery they left Davos without erecting the monument, and none has been erected to this day. Nine years after the discovery of the germ of tuberculosis the Doctor produced a lymph known as tuberculin R, which for a time was regarded with hope as a cure and prevention against tuberculosis, but that hope has been long ago abandoned and tuberculin is now only recognized as a valuable for diagnosis purposes. It is injected hypodermically in supposed cases of consumption and the reaction from it is supposed to prove the existence of tuberculosis in the system of the patient. That is the only value of Dr. Koch's discovery, so the ablest writers on medical science declare, and to suppose that his discovery of tuberculin could be turned to account as a cure in the sanatoria proposed to be erected here would be absurd. Finally, let me repeat that sanatoria have been put to the test for fifty years in England, and Dr. Balstrode, the medical inspector of the local Government Board in England, has declared in his recent report that to better conditions of life alone must be attributed the reduction of the death rate from consumption in England, to better homes, to better food, better clothing, and he adds that the bringing about of such conditions of living will do more to prevent and cure consumption than millions spent in the maintenance of sanatoria. Germany, which Professor MacWeney, bacteriologist to the local Government Board, in Ireland, says leads the world in stamping out the White Plague, at the expenditure of millions of dollars annually in bettering the condition of the working classes gives us the right guide in this matter. Let us proceed to reduce just the tariff and enable the fishermen and working classes to secure better homes, better food, and better clothing, and we shall be in agreement with the suggestions of the Commissions we have appointed to advise us to what should be done in this matter, and we shall be in our duty. We have no right, no warrant, I repeat again to do other than that. Entertaining these views I move the following amendment to the Resolutions before the chair:—

Whereas the Government in 1909 appointed a Commission to take into consideration the subject of Tuberculosis; and whereas the Secretary of the said Commission proceeded to Great Britain for the purpose of acquiring information in reference to the said subject. And whereas the Commissioners after considering the matter of the establishment of Sanatoria and the Secretary's report in connection with the information gleaned by him on his visit abroad, reported that, "so far, the Commission is not prepared to recommend the Government to establish a large sanatoria in this Colony; Dr. Keegan considers that the actual results obtained by sanatoria elsewhere are often exaggerated and frequently doubtful." And whereas the procedure provided for in the resolutions submitted to this House, and now under consideration, is not in accordance with the said authority or any other expert authority on the subject of this Colony, Sir William MacGregor, who has been quoted as an authority in the course undertaken by the Government, has declared in a public address, as follows:—"In the first place I warn you against the idea of Sanatoriums." And whereas the establishment of seven Sanatoria in this Colony is unwarranted by any reliable statistics or recommended by any competent authority. Be It Resolved that this Committee is of opinion that existing conditions in relation to tuberculosis can be best dealt with by the Government immediately procuring the services of a medical man, expert in the subject of tuberculosis, otherwise a specialist, who shall advise this Legislature as to the best means that can be adopted with a view to the extermination of this disease in the Colony and that in the meantime such sum of money be provided by this House, as the said Commissioners shall report to be necessary to prevent the spread of and to remedy existing cases of tuberculosis in this Colony, and that the recommendations made by the Commissioners in their reports shall so far as possible be acted upon. Be It Also Resolved that in the opinion of this House, it is not desirable for the Governor in Council, out of any moneys appropriated by the Legislature to construct, equip, manage or operate sanatoria, or to accept, manage, or operate, or to control any Sanatoria which may be erected by any person or corporation in this Colony for the treatment of Tuberculosis. Be It Further Resolved that such a re-adjustment of the tariff be made as will raise the standard of living amongst the various classes of this Colony, which is regarded, both in England and Germany as the primary and best means of securing the reduction of the death rate from Tuberculosis.

The Butler Trial.

Prisoner Pleads "Not Guilty"—Court Room Thronged With Citizens.

The much delayed trial of Mrs. Charlotte Butler, charwoman, of Colonial Street, was heard in the Magistrate's Court before His Honor Judge Knight yesterday forenoon, and was continued up to 1.15 p.m., when an adjournment took place. The court room was filled to overflowing. Four charges of larceny were entered against her by the authorities, one of which, we understand, is withdrawn. Mrs. Squires appeared for the defendant and Mr. Howley for the prosecution. After His Honor took his seat on the bench, Mrs. Butler's name was called out and she stood before the bar. Hereunder is a digest of the proceedings:—

The Judge—You stand charged with, during the past six months, "feloniously stealing, taking and carrying away, contrary to the law in such cases made and provided, etc." the property of a telegraph form book, the property of Charles F. Karnopf, what say you to the charge?
Prisoner—Not guilty.
Mr. Karnopf, manager of Seaman's Institute, was then put in the witness box and cross-examined.
Mr. Howley—Do you know this woman?
Witness—Yes, I had her engaged as charwoman.
Mr. Howley—Did she have access to your office?
Witness—Yes, she had access to my office, looking after it and cleaning it up from June up to November last.
Mr. Howley—When did you discover your book missing?
Witness—Trying to verify messages for the chartered accountants.
Mr. Howley—Was your name written on it?
Witness—Yes. (Book produced, which witness identified.)

Health Matters.

Raymond Butt, who has scarlet fever, was released from the Fever Hospital on Monday.

Clifford Bennett, who broke his collar bone at the Arcade Rink, is now down with scarlet fever, having contracted it at the General Hospital.

Yesterday afternoon a house on Queen's Road was placarded for the same complaint. The patient is a man, who has the disease in a mild form.

New M. G. B. Company

After school closed yesterday the ladies attending the Methodist College met and decided to join the Methodist Guards Brigade in a body. They will form up a new company to be known as "C" Co., and sixty names were placed on the roster. This will greatly strengthen the Guards, not alone numerically but also in other departments, especially in athletic exercises.

Here and There.

24 hours more for a guess in STAFFORD'S LINIMENT Competition.—Feb. 29, 11.

TO CORRESPONDENTS.—We are in receipt of a large number of letters which we have not been able to publish yet.

IS GETTING BETTER.—Mr. James Hanley, who was very ill for a while past, is now much improved and his friends are confident of his complete recovery.

RINK WELL ATTENDED.—Yesterday the Parade Rink was crowded with skaters and the same at night. The ice was fine and the Terra Nova band discoursed excellent music.

WILL DISCUSS WAGES.—The Laborers' Union will meet this evening when the advisability of asking for an increase in wages will be discussed by the members. The matter will admit of much discussion.

INSPECTOR BAMBURCK HURT.—While crossing the street car track in the West End yesterday, Inspector Bamburck, of the Municipal Council, slipped and fell and severely hurt one of his legs.

BIRTHDAY GREETINGS.—We extend to E. M. Jackson, Esq., hearty congratulations on the attainment today of his 44th birthday, and wish him many more returns of the event. To Inspector General Sullivan, who celebrated yesterday the 66th anniversary of his birth, we also extend hearty felicitations.

PROCEEDING NORTH.—The s.s. Stella Maris left Bay de Verde yesterday morning, arrived at Trinity at 3 p.m., and arrived at Catalina during the night. She landed her passengers for Bonavista, there, and if an off shore wind gives the ice a shift she will make an effort to go further north.

AN ELOQUENT SERMON.—Rev. Monsignor Roche preached a very eloquent sermon at St. Patrick's Church last night on the Lenten season and the duties of Catholics in observing it. He emphasized the necessity for self-denial, aims deeds and performing the devotions prescribed by the church for this holy period.

EARNEST WORKERS MEET.—The Earnest Workers Mission Band of St. Andrew's Church met in the Presbyterian Hall last evening when an interesting and enjoyable programme of music was discussed. All the little ones acquitted themselves well, including Misses Little and Gladys Hamlyn and Miss Susie Irving, who delighted all present.

CURLIANA.—In the play off in the Single Rink Competition for the prize presented by Mrs. Clapp, Mrs. R. G. Reid secured the highest score and was declared the winner. In the competition for prizes presented by Mrs. Browning, the winning team was composed of the following ladies: Mrs. Alderfer, Miss Linton, Miss Hayward and Mrs. Brehm, skip.

PARTY AT BRITISH HALL.—Twenty-five young ladies invited their gentlemen friends to a party at the British Hall last night. Tea was served at 8 p.m., and after that games were indulged in to 10 p.m. The affair was very successful and the gentlemen desire to thank the ladies for their kindness, especially Miss Ethel Fleet, who organized the affair. There will likely be a return party next month.

Another Local Option Election

Some folks say that some time during the coming summer a local option election will be held for the West End of the city only. Certain prominent temperance workers are behind the movement and feel confident that the people of this section of the city will "come in out of the wet."

Meets Accident.

A milkman named Carter of Topsail, was coming to the city yesterday accompanied by his son, when suddenly his horse took fright and bolted, throwing both occupants out on the roadside. The father received a broken arm, and was also badly bruised, but the son escaped unscathed. The injured man was brought to a nearby house and the son, after bringing the horse to a halt, drove to the city for a doctor.

Glencoe Being Reclassified.

The S. S. Glencoe will shortly be docked and will be put under thorough repairs. She will be from five to six weeks on the stocks and will be in splendid order when she resumes her service. Capt. Taylor, her commander, goes to his home in Carbonara, and will take charge of the government when she takes up the daily service between Port aux Basques and North Sydney on the first of May.

Coastal Boats.

REID NEID, CO.
The Argyle left Marystown at 5.30 p.m. yesterday bound west.
The Bruce arrived at North Sydney at 11 last night. She passed Low Point at 3 p.m. yesterday and had to bore her way through 50 miles of heavy ice to her pier so that she proved her ice breaking qualities in doing so with such despatch. She leaves Sydney to-night for this port coming direct.

Escaped Being Poisoned.

Mr. Chas. Simms, of Cornwall Avenue, a couple of nights ago came to the city to get two powders prescribed by a doctor, one for his mother, who was dangerously ill, and another for his wife, who suffered from a severe cold. In some way he got the powders mixed, and one contained ingredients highly dangerous if given to the older woman being taken by the younger. The outcome was that she became dangerously ill, and Dr. Anderson, who was called, had to use a stomach pump to get the deleterious ingredients of the powder out of the woman's system. She might have died if medical aid was not quickly at hand.

The Tritonia's Progress.

Messrs. A. J. Harvey & Co. yesterday expected to hear of the Tritonia arriving at Botwood but she had not done so up to last night. It is now about 40 days since she left London for Botwood and she has a full general cargo on board for the Harmsworth Co. of Grand Falls. Her arrival is anxiously awaited there as she has a badly needed supply of coal for the mills which are short of this necessary material. She has been caught in the ice in the Exploit for over a month and though dynamite was liberally used in smashing the ice she only covered in that period about 18 miles. It is likely she will tie up at her pier to-day or to-morrow.

Play Next Week.

It is not now likely that the final game of the hockey series between the Crescents and Victorias will take place next week. McPherson and Bulley of the Vics. are still ill and may not be able to play again during the season. The Crescents it is thought will win out this season.

Not Convinced.

The Hon. P. T. McGrath declares he is "of the same opinion still," as to our attitude towards the Reid gifts. That is not surprising. "He who is convinced against his will, is of the same opinion still."

"He Never Smiled Again."

After enduring as best he could a succession of bad falls from Sir Robert Bond, the valourous Premier screwed up his courage towards the end of the sitting sufficiently to try a fall with the member for St. Barbe. In ordinary course, Mr. Clapp read a question of which he was giving notice. Then the doughty Premier rose in might and main, but to use the words of the Hon. Sydney, "his articulation was bad." Having wrestled for a time with this "articulation," he was heard to ask if the question had reference to the Bowring Contract. Mr. Clapp courteously replied, he presumed it had. Derisively and discourteously this high stomach leader of the Picnic Party laughed at him and wretched his countenance with a smile of satisfaction at the "rise" he thought he had got out of an inoffensive member. But the ripple was transient, and the smile vanished, as Mr. Clapp welcomed in pointed words the first appearance of joy on the Premier's face since he had heard the ovations tendered Sir Robert Bond, and the warm rounds of applause which greeted every sally he made. The Premier's jaw fell and he became again a knight of the woeful countenance, and, in the words of the poet, "He never smiled again."

Cable News.

Special Evening Telegram. LONDON, Feb. 28. Queen Alexandra will soon proceed on a voyage along the Mediterranean coast.

Special to Evening Telegram. GLASGOW, Feb. 28. The grave diggers are threatening a strike for shorter hours and higher wages.

Special to Evening Telegram. SYDNEY, Feb. 28. Tony Gario has been sentenced to be hanged on May 2nd for the murder of Lewis McLaren.

Editor Evening Telegram. STOCKHOLM, Feb. 28. The Crown Princess of Sweden, daughter of the Duke of Connaught, has given birth to a son.

Special to Evening Telegram. WELLINGTON, New Zealand, Feb. 28. The "No Confidence" motion resulted in a tie vote, the Speaker giving his casting vote in favor of the Government. Three of the Labour members voted for the Government, two of them contrary to their election pledges. It is expected that Sir J. Ward may be induced to withdraw his intended resignation.

Special to Evening Telegram. LONDON, Feb. 28. Samuel Henry, the clergyman arrested for firing a revolver in the Lobby of the House of Commons, appeared in the police court to-day. He said that his object was to draw attention to the fact that he had written a book entitled "Tolstol and Messiah," which the Government suppressed. The magistrate ordered a remand so that he might be medically examined.

Special to Evening Telegram. ROME, Feb. 28. A severe battle resulting in the defeat by the Italian troops of the Turkish forces and their Arab allies, with great losses, is reported, according to despatches received here from Honis, also known as Tebba, 70 miles east of the city of Tripoli, on the coast line. The engagement occurred at Mount Morphel, lying some distance behind the town. The Turks and Arabs had taken up a strong position on the slopes, where they were attacked by the Italian infantry and artillery. After a battle, lasting all day, the Italians put the enemy to flight by storming the heights. The Italian losses were 11 killed and 82 wounded.

Special to Evening Telegram. ROME, Feb. 28. A severe battle resulting in the defeat by the Italian troops of the Turkish forces and their Arab allies, with great losses, is reported, according to despatches received here from Honis, also known as Tebba, 70 miles east of the city of Tripoli, on the coast line. The engagement occurred at Mount Morphel, lying some distance behind the town. The Turks and Arabs had taken up a strong position on the slopes, where they were attacked by the Italian infantry and artillery. After a battle, lasting all day, the Italians put the enemy to flight by storming the heights. The Italian losses were 11 killed and 82 wounded.

MAGIC BAKING POWDER advertisement with logo and text: NEVER ANY FAILURE OR DISAPPOINTMENT WHEN MAGIC BAKING POWDER IS USED.

Annual Report OF THE ST. VINCENT DE PAUL SOCIETY, 1911.

In presenting our Annual Report for 1911, our first duty is to return our sincere thanks to the public for their very generous response to our appeal for contributions...

TREASURER'S REPORT, 1911. To amount received from all sources \$2,296.72. By amt expended for coal, food and net making, \$2,218.24. Balance on hand 78.48.

LIST OF SUBSCRIBERS To St. Vincent de Paul Society. His Grace Archbishop Howley (yearly bequest of the late Hon. J. Talbot), \$200; collected at T. A. Club rooms, \$28.40; collected at K. of C. rooms, \$39.35; Longshoremen's Protective Union (proceeds of card tournament), \$50.50; Star of the Sea Association (proceeds of lecture by Rev. Fr. O'Callaghan), \$53.58; Franklin & C., one ton coal; J. J. Mullaly & Co., one ton coal; Employees of Harvey's Butterine Factory, \$6.20.

Only One "BROMO QUININE," that is Laxative Bromo Quinine Cures a Cold in One Day, Grip in 2 Days. E. M. S. on box, 25c.

Thief Gets Six Months. The sailor, one Pond, who was arrested for the larceny of \$30, which amount he took out of Ludwig Hodmond's trunk, appeared before His Honor Judge Knight yesterday. He pleaded guilty to the charge. On being asked by the Judge if he desired to be tried by a jury in the Supreme Court or before him, he chose the latter, and was sentenced to six months' hard labor.

Grows Hair Abundantly. This is an age of new discoveries. To grow hair after it has fallen out to-day is a reality. SALVIA, the great Hair Tonic and Dressing, will positively create a new growth of hair.

Boy de East, A. S. Rendell, "Bill Sykes," M. G. Winter, M. P. Cashin, Rev. Bro. Culhane, Jas. Morey, Empire W. W. Co., G. M. Barr, Friend, G. Browning & Son. \$4.00 each—Martin Hardware Co., A. H. Murray, Thos. McNeil, Jas. Stott, Jas. Boggan, Thos. Kavanagh, J. S. Winter, C. O'N. Conroy. \$3.00 each—Ice Truckmen, W. A. O'D. Kelly, Dr. Brehm, Friend, Harvey's Butterine Factory, D. J. Greene, J. McGregor, Jas. P. Cash, F. J. Conroy, Furlong, & Conroy, Agnes Mitchell.

One Dose Makes Indigestion Go. Heartburn, Gas, Sourness and other Stomach misery vanishes. If your meals don't fit comfortably, or you feel bloated after eating, and you believe it is the food which fills you; if what little you eat lies like a lump of lead on your stomach; if there is difficulty in breathing after eating, eructations of sour, undigested food and acid, heartburn, brash, or a belching of gas, you can make up your mind that you need something to stop food fermentation and cure indigestion.

Inter-Colonial Hockey Match. ST. JOHN'S TEAM DEFEATED BY WINDSOR BY 5 GOALS TO 4. Before a large, excited and enthusiastic gathering of spectators the third Inter-Colonial hockey match between Windsor and St. John's was played in the Prince's Rink last night.

Ask your Druggist for SERRAVALLO'S TONIC (Bark and Iron Wine). Cures: ANAEMIA, CHLOROSIS, DEBILITY, Delightful Taste.

A Royal Smoke BENGAL Little Cigars. Win immediate favor everywhere through their attractive Mildness, Delightful Fragrance and High Quality. Ten for 20 cents. CASH'S TOBACCO STORES.

Minard's Liniment Cures Garget in Cows. Tobin made a surprisingly good run and scored the second goal for the City. Very soon after half time sounded.

All Hope Not Abandoned. Special Evening Telegram. LONDON, Feb. 28. The Government to-night acknowledges its failure to settle the dispute between the coal owners and miners. By breaking the rule of necessary abstinence, which heretofore had been rigidly observed during the course of the negotiations, an official statement has been issued regarding the proposals submitted by the Prime Minister to the representatives of the owners and miners.

McMurdo's Store News. THURSDAY, Feb. 29, 1912. We have just opened a line of rubber goods which will repay inspection; including Perfume Sprays—the very thing for Barber's use; Bath Syringes, a reliable but inexpensive line; Nipples—Tyrian and Excel, American style; and all rubber Eye, Ear and Ureter Syringes. These are from the Tyrian Rubber Company and are good, well made, and serviceable stock.

Cape Report. Special to Evening Telegram. LONDON, Feb. 28. Wind, W.N.W., fresh, weather dull; preceded by snow; ice packing on land west clearing on east side. The S. S. Invermore passed in at 9.25 a.m. A three masted scho. is in sight in ice near Cape Ballard, her signals cannot be distinguished from here, the S. S. Invermore will probably distinguish them in passing her, she's apparently deeply laden and have no sails set. Bar. 29. Ther. 33.

Dropped Dead. Special to Evening Telegram: MEREDITH, N.H., Yesterday. William Hutchings, of St. John's, dropped dead at Portmouth, N.H. All hats fit well down over the head; startling combination of color are unknown. A touch of red usually a knot or small rosette of velvet, appear recently on black hats. The small hat, in width, has appeared and coarsened; the large ostrich feather is daily increasing in size.

You judge a Man by the company he keeps, likewise you can know what to expect from Soda Water which win approval amongst discriminating people. Wherever refinement and good taste prevail you will find men keen in their appreciation of the delightful flavor and absolute purity of Reliable Soda Water.

**KNOX
Marine Motors.**

THIS ENGINE is made in Camden, Maine, U. S. A., especially for fishing purposes along the coast of Maine. It is the one which has given the best results for fishing purposes obtainable. It is noted for its simplicity. Any person can operate it when once instructed. It will run with gasoline or kerosene. This cut represents 7 1/2 h. p. single cylinder. Make & Break Knox. Compare the description of its power with any other engine and you will find it beats most of them 25 per cent.
Note: Revolutions per minute 500
Bore 5 1/2 in.
Stroke 6 1/2 in.
Weight of Motor 500 lbs.

J. LeDREW & SONS have accepted the Agency for this Engine and intend to establish a branch business at Harbor Grace, where Motors will be installed and purchasers will receive instructions, be taught to run the Engines and where all parts for repairs will be kept on hand. The principal of this concern, W. R. LeDrew, is going through a course of training in the Camden Anchor-Rock-land Machine Co.'s Factory. Any person wishing to order one or more of these Engines would do well to send in their order so that W. R. LeDrew will see them tested, packed and shipped, as he wants to make up a car load so as to save freight. For Catalogues, Price Lists, etc., apply to
