SOMETHING NEW UNDER THE SUN

New! New lines, new design, new comforts! If these phrases can still mean anything when applied to a motor car they most fitly describe the new Chevrolet.

So often are yearly models introduced by such descriptions that they have automatically lost some force. That is, as ordinarily used.

In connection with Chevrolet, however, the phrases are filled with meaning. For the Chevrolet about to be revealed is new, actually new, in practically every feature.

It is hard to realize, in this age of rapid automotive development, that a great deal of improvement can be made in a car at one time. But Chevrolet engineers have apparently evolved a state of development which is considered impossible in the small, relatively inexpensive car.

The new Chevrolet at the least merits new consideration. By its startling improvements it will repay the curiosity of even the most casual. And for those interested in the small, light car, it may easily have a great deal to offer.

PUBLIC NOTICE.

Under the Act 10 Edward VII., entitled "An Act Respecting the Discovery of Minerals."

WHEREAS Andrew Colford, of St. John's, in the Island of Newfoundland, has filed in this Office, accompanied by affidavit, Notice of the discovery of Mineral, situate at Workington, Bay de Verde District, about one quarter of a mile ahead of Mare's Pond, North West of Island Cove about three miles and about one mile and a quarter from Island Pond, on the South West of Workington; the said Mineral being described as Iron Ore;

AND WHEREAS the said Andrew Colford claims to be the first and original discoverer of the said mineral under the above-named Act;

I HEREBY GIVE NOTICE that any person disputing the claim of the said Andrew Colford as first and original discoverer of the said Mineral is hereby required to give notice to me in writing, at the Department of Agriculture and Mines, within sixty days from the date of this notice, of any objection to the registration of the said claimant as the first and original discoverer of the Mineral aforesaid; and further, if no notice disputing the said claim be filed within sixty days, the said Andrew Colford will be deemed to be, and registered in this Department as, the first and original discoverer of the said Mineral, as provided by the aforesaid Act.

W. J. WALSH,
Minister of Agriculture & Mines,
Dept. of Agriculture & Mines,
St. John's, Newfoundland,
29 January, 1925. Jan 30.91

NOTICE.

Four weeks after date hereof application will be made to His Excellency the Governor-in-Council for Letters Patent for "New and Useful Improvements in Insulating Material for a Submarine Cable," to be granted to John Johnston, of New Haven in the United States of America, Consulting Chemist.

Dated at St. John's this 7th day of February, 1925.

The Heir to Beecham Park

CHAPTER XXI.

Pauline dressed the slender, graceful figure in the black garments and fastened the sable mantle while she uttered exclamations of delight at her mistress's appearance. She made a slight protest as the veil was produced, but Margery was firm, and the delicate face, with its great blue eyes, was completely hidden beneath the thick folds.

The first visit was to an old marchioness who had fallen a victim to Lady Court's charm and sweetness, and Margery made great progress toward friendship. Several ladies were present, and from one and all she received kind congratulations.

"But now I want to beg a favor, dear Lady Court," said the hostess, after a while; "it is rude of me, perhaps, but I hope you will forgive it. Will you not remove that thick veil? We cannot see your fair young face, and nature has been so lavish to you, child, you can afford to be generous."

Margery laughed softly, and put up her hand to unpin the veil, when the door opened, and a voice announced: "Lady Charteris—Miss Charteris!"

Margery felt the blood surge in her ears and a mist rose before her eyes; she saw again the beautiful, cold, cruel creature who had spoken words that stabbed her to the very heart.

She acknowledged the introduction, with a slight bend of the head, then, murmuring a few words of regret and farewell, went swiftly from the room to her carriage, her breast full of stormy emotions.

"I am so sorry you did not see Lady Court; she has the face of an angel," said the hostess, as Margery disappeared.

"She is very tall," observed Vane, in her most bored manner—"almost too tall for a woman—and she seems to have red hair. I hate red hair." she added, a vision of a sweet, girlish face, framed in red-gold curls, rising before her as she spoke.

"Your taste, dear Vane, is always good," observed the old lady, dryly, and then the conversation drifted into other channels.

Margery gave her orders in a quiet, stifled voice, and was driven back to the hotel. The fear, the dread, she had suffered in anticipation of this meeting was as nothing compared with the agony of pride and pain she now endured. She had thought herself strong, though she was braced for whatever might happen, and at one blow the barriers she had been building were thrown to the ground, and she was the broken-hearted, humiliated girl once again. The sight of Vane recalled all her despair, and

"I Suffered Terribly With Sore, Aching Back"

Mrs. Roland Ferguson, 194 Lake St., Peterboro, Ont., writes:

"For over two years I suffered terribly with sore back. I was almost mad with the pain, and had doctored with it until I was discouraged. Then my father, who is a firm believer in Dr. Chase's Kidney-Liver Pills, advised me to try Dr. Chase's Kidney-Liver Pills. I followed his advice, and am glad to say I was completely relieved of that torturing pain in my back. It is over a year since I used these pills, and I have had no return of the trouble, but always keep them in the house."

Dr. Chase's Kidney-Liver Pills

25 cts. a box of 25 pills, Edmondson, Bates & Co., Ltd., Toronto

GERALD S. DOYLE, Distributor.

was still the Margery of old, the sweet loving Margery she knew so well.

"You are glad, child?" she said, quietly. "So am I to see your dear face again; the months have seemed long since you went, though your letters have told me all you have done. You are the same Margery; yet you are changed, dear."

"I am older and a married woman," Margery responded, with a forced little laugh. "My dignity makes me older. But come and sit with me. How much I have to say, and yet I scarcely know where to begin!"

Miss Lawson let her remove her bonnet and cloak and push her with affectionate hand into an easy-chair in the inner room, close to a blazing fire. With undisguised pleasure her eyes rested on the girlish figure. It was not until Margery had gone from the village that the rectory governess realized how deeply the wait had crept into her heart.

"You are not surprised to see me?" she said, after a while, as Lady Court seated herself on a stool at her feet.

"I have been thinking of you so much and so often that you seem part of my life. You are come to stay with me, dear Miss Lawson? Yes, yes, you must stay; I shall not let you go."

"I must return to-morrow," Mrs. Carr will expect me. I left Hurstley on purpose to see you, Margery."

"How good of you!" exclaimed Margery, warmly, fondling the worn hand between her two soft palms. "This is just what I wanted to complete everything."

"You are happy?" asked Miss Lawson, abruptly.

"I am content," answered the girl, and her great blue eyes met the gray ones with a steadfast look. "And now tell me all the news. Am I quite forgotten in the village? Do none of them ask for me in Hurstley?"

"Margery, I will be candid with you. When you first went I heard very little about you, you know—I seldom go into the village—but in a very short time the news came that you had gone to Australia with Reuben and Robert Bright. The people were hard, dear, and blamed you. The Brights are heartbroken at Robert's leaving them, and all the fault is laid at your door. They do not speak kindly of you, child, and when I first heard them, I had great difficulty in holding my tongue. But you had begged for secrecy and silence, and I had given my word. I meant to have written to or seen you, but then came poor Lady Enn's death, your marriage, and your illness. I could do nothing but wait. I have waited, and now, Margery, I have come here for the very purpose of asking you to take the seal from my lips, that I may explain to the village and silence slander."

Margery had risen to her feet, her hands pressed to her bosom, her face deadly pale.

"How cruel the world is," she murmured, bitterly, "how terribly cruel! They know nothing, yet they speak harshly. They do not know how I begged, how I entreated Robert to go back to his home. You remember how stunned I was when first I learned that he had joined Reuben?"

"I know," answered Miss Lawson, "and I would have all the world do you justice. You are now great; let them know you as you are, and crush their calumny. I do not blame the Brights—their whole life was centered in Robert—but—"

"And for the rest I do not care," interrupted Margery, proudly. "The Brights will hear from Robert soon, and then they will learn the truth and know how they have wronged me. What had I done to the village that they should think ill of me? Oh, Miss Lawson, is the world all like this?"

"The world is cruel, Margery, bitter, hard," the elder woman said, with a sigh; then she added, regretfully, "I am sorry you will not disclose your secret, but you know best, dear, and I have done what I considered my duty."

"You have done as you have done so often—treated me as though I were your own child—and I thank you." "And have you not been my own?" said the elder woman, with a new light of tenderness on her face; "I have seen you spring up from a tiny child to womanhood; I have loved you through all, and I am proud of you. You are to me what the poet says: 'For years she grew in sun and shower, Then Nature said, 'A lovelier flower On earth was never seen; This child I to myself will take; She shall be mine, and I will make A lady of my own.'"

(To be continued.)

Huge Concrete Arch Bridge Built in 244 Working Days

The second largest solid concrete arch bridge in the world—the Jack's Run Bridge at Pittsburgh, Pa.—was completed recently in 244 working days. It is 325 feet long and 170 feet high, and in size is second only to the Cathleen Memorial Bridge at Minneapolis, Minn.

Engineers designed the huge arch so that it will compensate for any expansion in bridge span by rising. This bridge is located on the Lincoln Highway leading out of Pittsburgh to the north. It stands as a monument to modern engineering skill, for within considerably less than a year after the first excavations for its foundations were made, motor vehicles were passing across its wide span.

Trimmings for chiffon dance frocks include the use of ribbons and flowers.

IT'S GRAND! HOW ELECTRICITY CURES

Startling Results in Cases of Neurasthenia, Rheumatic Troubles, Indigestion and Complaints of the Liver, Kidneys and Bowels.

It's grand, magnificent, marvelous to feel well and strong again after being ill and ailing—after feeling run down, nervous, depressed and unable to take your full pleasure out of life.

There is no bar to your full enjoyment of its benefits. It is no system for the rich only, but one that all may freely and confidently adopt. Science has shown nothing more marvellous than the victory of Electric treatment over such terribly painful and harassing illnesses as Rheumatism, Gout, Sciatica, Lumbago; than the splendid rebuilding of weakened nerves in cases of Debility, Neurasthenia, Neuralgia, Nervous Dyspepsia, Lack of Confidence; than the renewal to strength of the digestive system in cases of Indigestion, Liver and Bowel Complaints.

The method is as easy and certain as it is convenient. All you need to do is to put on an "Ajax" battery for one hour each day. You can do this while resting, and as you sit in your comfortable chair or recline on the couch it is delightful to feel the mysterious soothing, healing and strengthening power circulating through your system in a beautifully soft flood. Of course, this cannot be done with an ordinary battery, such as those used for electric lights, etc., because in such a battery, naturally, the current is neither radiated nor properly adapted. Shocking coils, too, which irritate the nerve centres, are also useless for the purpose. The correct and scientific method to apply is the "Ajax" Dry-Cell Body Battery, which is specially made so that all the important nerve centres radiating through the system are simply saturated with the new life-giving current.

You will be surprised and delighted beyond measure by the wonderfully stimulating effect of the "Ajax" Body Battery, and to realise the real and permanent manner in which your ailments are cured.

GET IT FREE. Write to-day for the Special FREE treatise on electricity, which will be sent to you by return of post. A host of mysteries will be made plain as the light of day to you. You will receive the cause and effect of many ailments, and exactly how the electric cure can be applied to your own case. There are special booklets for Ladies and Gentlemen; please specify which is required when writing. The one point to remember is DO NOT DELAY. Write to-day while the address is fresh on your mind. In order to save time correspondents should, when writing for the Free Booklet, state their age, sex and full details of their case, for then precise advice can be sent by return mail. All letters are treated in the strictest confidence. AJAX LD.

A New and Better Ironing Board

The Rid-Jid Ironing Board is as steady as a bridge—it will not wobble, sway, bend nor creep when you iron. You can sit on the end and it will not even tilt. No more propping an old board up on two chair-backs and having to lift it each time you wish to iron a skirt or petticoat. The Rid-Jid stands firmly on its own foundation, and is so constructed that a full-length skirt may be slipped on over the end. In spite of its marvelous rigidity, the Rid-Jid is lighter than any other folding board made. It closes as compactly as a pocket knife. We would be glad to have you stop in and see it.

The Labrador Boundary Dispute

The speech delivered yesterday by the Minister of Justice naturally discloses nothing of details discussed in Montreal during the Labrador Boundary Conference, but in an unmistakable manner he has made it clear to everyone that the Government at any rate do not share the view that, because the value of our dependency is problematical, therefore it is valueless, or because our ownership is still in dispute, therefore we have no claim.

The Minister's remarks will, we feel certain, allay any apprehension that may have been felt on this score, and will satisfy the public that this very important question is receiving the consideration which it deserves. The matter may well be left there until such time as the House is given an opportunity to decide whether a settlement is to be made, and what shall be the basis of settlement.

Opinions of Milk Question

The comments made on the Milk question in the paragraphs which follow are intended to show how vital is the issue with which we are dallying. The views expressed are those of men who are in a position to speak with authority, and the statistics only too accurately bear out the truth of their assertions.

We invite the members of our own medical fraternity and others similarly qualified to send us their opinions on this question, in order that it may be brought home to the public and to the authorities that it is one which must be dealt with in a practical and effective manner. Montreal Star:

"Against the purification of our milk supply a prejudice against all efforts at improvement was created on behalf of the small vendors who visioned an injury to their trade, and this prejudice held down the authorities for some years."

Dr. D. A. L. Styles' Protest:

"Health conditions in Montreal are altogether unsatisfactory, presenting unlimited opportunities for rectification. An educated public opinion in this respect would rapidly delimit our morbidity and mortality rates by forcing responsible authorities into protective action. An adequate milk pasteurization by-law, properly enforced, would go a long way in curtailing the spread of certain milk-borne disease, —as, Typhoid Fever, Tuberculosis, Diphtheria and Scarlet Fever, whose prevalence in Montreal is presently overtaxing the capacities of our contagious disease hospitals, besides, causing the outlay of public and private funds in treatment."

As matters stand, the Montreal milk situation is a terrifying proposition. With much impure milk distributed and consumed, our infant deaths are unparalleled throughout the Continent, and our contagious disease index is notoriously high. We have milk producers and distributors whose product is decidedly dangerous, and the consumer has no adequate safeguards against this condition of affairs. It is high time action in the pasteurization by-law was taken by the Civic Executive as safeguarding the welfare of the citizens of Montreal."

Dr. Lapierre's Protest:
Dr. Gaston Lapierre, graduate of the School of Paediatrics of the Faculty of Medicine of Paris, and Assistant Professor at the infantile clinic of St. Justine's Hospital says:

"Impure milk is a killer of children and a sower of tuberculosis."

"All who can contribute to the spreading of sound ideas regarding the feeding of children, and the problem of cow's milk in particular, fulfil an eminently high social duty, for they contribute in a decided way to reducing the general contamination and the mortality of children in their first years."

"Without having knowledge of the fullest details of the draft milk by-law drawn up by the director of the municipal Health Department, Dr. S. Bouchet, we know that the principal recommendation, and the basis of the by-law, is the protection that can be given by pasteurization or sterilization of milk."

"In a big centre, like Montreal this question of milk is complicated further by the fact that the milk delivered to the consumer is gathered by the milk dealers in hundreds of different places."

"Raw milk is rarely innocuous. It is interesting to speak of 'aseptic milking,' but if we come down from the clouds and get into even the most perfect stable, it will be seen that for a long time yet, perhaps even for ever, it will be the exception."

"We have to deal with the microbes coming from the cow, from the milk and its hands, from the receptacles in which the milk is kept, from the insects that can bring to the milk pathogenic germs, from the air and its impurities, and from the water which is fraudulently added to the milk."

Dr. J. A. Ledue, titular professor of the Faculty of Medicine of the University of Montreal, and member of the Council of Hygiene of the Province of Quebec, says:

"I think that if milk could be obtained under completely aseptic conditions, pasteurization or sterilization would not be necessary."

"However, either sterilization or pasteurization is imperative when market milk is used, because such milk is seldom or never obtained under aseptic conditions."

Dr. A. Grant Fleming, M.B., managing director of the Montreal Anti-Tuberculosis and General Health League, says:

"As everyone agrees that children need milk, it certainly seems a very reasonable and logical thing to expect that the milk sold be free from any danger for the child."

"Milk should be obtained from healthy cows and produced and handled in the most cleanly manner. It should then be made safe by pasteurization, which is the only known practical way that we have to make sure that milk is safe, and that any disease germs which may have gained entrance into the milk have been destroyed."

"Health officers all over the world are united in saying that pasteurization is a practical measure of health insurance. The results are seen in the reduced infant death rate that follow wherever it is properly carried out. Education of the mothers and a safe milk supply will bring Montreal's infant death rate down to the level of other cities."

"One thousand children who died last year from diarrhoea and enteritis would have been saved if milk had been better informed as to health needs. The future health of a child was determined in the first two years of its life."

La Presse:

"Examples set by other cities where pasteurization is de rigueur should encourage this city to adopt similar legislation. In Toronto for instance from 1914 to 1924 the death roll as a result of typhoid tumbled from 124 to 99 per thousand. In 1914 tuberculosis was responsible for 102 deaths per 1000 of the population. Last year the deaths from this source were only 62 per thousand. The infant mortality rate in 1914 was 112 per thousand; in 1924 it was but 70. These are established facts and speak eloquently in favour of the pasteurization of milk."

MINARD'S LINIMENT FOR HEAD-ACHES.

CHILD WELFARE

HEALTHY BABIES.

"An Ounce of Prevention is worth a Pound of Cure."
"Habits"—There was a meadow, and across this meadow a man used to walk every day to his work. Of course, he took the same way every day, which was the shortest way. Very soon there was a streak across the meadow like a ribbon—very little later there was a beaten path and every day the path became firmer and more useful."

From Babyhood we are "beating paths" which are going to be of use to us, that is if we make them for the purpose of "work"—by work we mean Health and Strong Character.

So these "paths" or habits are very important. Just as you give baby his food at regular intervals so that he gets the habit of good digestion, train him in all other habits that are good too.

I will name some of them:

1. Sleep—Fourteen hours of sleep in twenty-four hours.
2. Obedience—Teach him, don't let him teach you.
3. Fresh Air—Take him out every day.

4. Daily Getting Rid of Waste Matter—When baby is only a few days old he should be held out every day, so as to establish this habit.

5. Exercise—A bath every day, so that baby can kick in it. Shorten his clothes as soon as you can, so that he can have plenty of movement.
6. Cleaning of Teeth—Before baby is a year old his teeth should be cleaned every day.

Competition—We hope all those who have competition papers are interested in it. Anyone wanting the details can obtain them at the Welfare Centre.

Feb. 28, 1925.

PEPYS BEHIND THE SCENES

Feb. 27th.—Up betimes and abroad, the day somewhat cold yet fine, so I wear my light top coat with comfort.

To Water Street, and meeting Mr. Willis, he to show me the new offices that Bowring Bros. do make for themselves, and are indeed very fine.

Talking with Povey this day, I did tell him how the Government will change the rule of the road for vehicles from left to right, which displeases him mightily, since it did take him such a long time to learn to control a car, that he doubts if he will not have the greatest difficulty to make the change. This a ridiculous thing, as I did tell him.

The House this day still debating the Address in Reply, and Mr. Hickman speaks the greater part of the afternoon, and is followed by Mr. Higgins, he confining himself to two matters, being the Labrador Boundary and the Bell Island situation. Among other things he do say how our case in connexion with the boundary claims is now in readiness for presentation, but of the outcome, he can say nothing. Discouraging of Besco, he says how Mr. Wolvin, the President of the Corporation, did tell him that the smelting clause in the last contract was but a form of camouflage and was never intended to be put into force.

This night my wife and I abroad to play at Bridge, but the women do naught but discourse of the latest decrees of Dame Fashion, and do learn, from what I hear of their discourse, how skirts will not only be knee length, but the dreadful bustles will again be worn. But Lord, though I did say nothing at the time, I am determined as I never was in anything before that my wife shall not disgrace me by wearing such clothes.

Spring Term Commences

The spring term of The United Business College Day and Evening Classes commences on Monday in the Victoria Hall with special teachers for each class in Accounting, Shortland and Typewriting, English and Commercial Mathematics. An additional teacher has also been provided for elementary students in the Commercial Night School—a great advantage to those wishing to improve.

TRAIN CONNECTIONS.—Passengers leaving town by Monday morning's train can make connections with the Argyle at Argentia for points on the Bay run, and with the Glencoe for points of call on the South West Coast.

Trepassey Train Reaches Portugal Cove

Special Evening Telegram.
CAPPANAYDEN, Feb. 28.
Trepassey train arrived here at 8.30 last evening; remained at Chance Cove all night; arrived at Portugal Cove at 11.30 a.m. Not much snow on track between Cappanayden and Portugal Cove. Not at Trepassey yet as there is some snow on the latter part of line.

OPERATOR.

C. I. System Effects Considerable Saving

The value of the criminal identification system introduced some time ago by Inspector General Hutchings has on many occasions saved considerable expense in securing the records of culprits who come before the local courts. On one occasion it cost the dept. \$600 to secure a prisoner's record and on another the expense amounted to about \$300. Under the finger print system now in operation the above records might have been obtained for a few cents. Recently it was desired to obtain information of a man now serving a term in the penitentiary. For the cost of postage this was obtained from the Criminal Identification Bureau at Washington. The prisoner in question had no record here but it was learned that he had been convicted at Atlanta for a breach of the Drug Act for which he served a three year term. Many instances of the value of the system could be given and the Inspector General is to be congratulated on having introduced it.

Drowning Fatality Feared

It is feared that John Cox, aged 77 and residing with a man named Harvey on Pleasant Street has been drowned in Petty Harbor Long Pond. Mr. Cox left home at 9 o'clock Friday morning to spend a day trouting at Petty Harbor Long Pond. As he did not return at 8 p.m. Mr. Harvey set out for Petty Harbor accompanied by two companions. Reaching Long Pond they discovered a trout basket, lines, and other fishing gear lying on the ice. Not seeing any sign of the man, they went over the pond and at the western end discovered a large hole, apparently made by some one who had fallen through the ice and struggled to get out. The water at this place was from 12 to 15 feet deep but no sign of the body could be seen and the searchers returned to town and reported the matter to the police. Constables Myers and Morgan, taking the necessary precautions, were sent out early this morning to make a search, but up to 2 p.m. they had not found any trace of the missing man.

Magistrates Court

A drunk and disorderly was fined \$2.00 or 7 days and blacklisted.
Two drunks were each fined \$1.00 or 3 days and blacklisted.
A 31-year-old seaman, Holland, taken in for safekeeping, was discharged.

Train Notes

Thursday's express reached Port aux Basques at 10 a.m. to-day. The train for points as far as Grand Falls arrived there 7.30 last night. The express with Kyle's mails and passengers reached the city at 6 o'clock this morning. The local from Carbonear arrived at 12.50 p.m. A large number of sealers from Briggs and vicinity arrived by this train. The regular cross country train goes out to-morrow at 1 p.m.

McMurdo's Store News

Biozone, this natural salts, has been approved and used with success by an eminent medical authority in many cases of Rheumatism, Arthritis, Gout, Eczema, Intestinal Dyspepsia, Anemia, Pyorrhea and Malaria. The salts being very active in the system, there is no objection on the part of the patient to take it regularly. Price \$1.00.

Wesley Church Choir

ENTERTAIN METHODIST ORPHANS

On Thursday night last the members of Wesley Church Choir treated the Methodist Orphans to a tea and concert. The affair proved to be an evening of great fun and amusement for the little ones. The ladies of the choir supplied the tables, and full justice was done to the delightful spread which had been provided. The concert began at 8 o'clock with Rev. G. J. de la Roche, choir. Among those who assisted in the programme were: Mesdames Joyce, Vey, Miller, Misses Brown, Hayse, Driscoll, Messrs. Vey, Chaplin, O. Green, Redmond, B. Colton, H. Whitten, Morgan, F. King, H. Diamond, H. Hutton, Messrs. H. G. Christian, L.R.A.N., J. H. Chapman, M. Drover and Miss Florence Daws were the accompanists. The Methodist Guards Band and Prince's Orchestra were also in attendance and rendered pleasing selections during the evening. It is the intention of Wesley Church Choir to give the Belvedere Orphans a similar entertainment in due course.

Annual Meeting of Golf Club

The annual meeting of Bally Haly Golf Club took place yesterday at the office of the Nfld. Fire Underwriters. The election of officers resulted as follows:

President—R. B. Job.
Vice-President—B. A. Bowring.
Capt.—W. A. Reid.
The Board of Governors are: J. A. Paddon (Hon. President); C. McK. Harvey, R. G. Reddell, B. C. Gardiner, H. W. Dickinson, W. R. Warren, R. A. Young.

Com. Howley, R.N., tendered his resignation as Secretary of the club. Mr. C. McK. Harvey, who had been President for the past two years, expressed regret at having to accept Com. Howley's resignation, and voiced the appreciation of the club for the excellent services he had rendered. A vote of thanks was tendered Com. Howley.

Personal

Mr. J. I. Vinicombe was discharged from hospital yesterday fully recovered.
Master Willie Comerford son of W. B. Comerford, was operated on by the General Hospital yesterday for appendicitis, and is doing as well as can be expected to-day.
Miss Bessie Johns, who was confined to the General Hospital for the past ten days receiving treatment, expressed regret at having to leave the institution in a few days.
Capt. Wm. Bartlett, the well known seal killer, arrived in the city from Brigus by to-day's train.

Here and There.

SNOW ON GOLF TROUSERS.—Altogether the past night a S.W. wind with snow and drift prevailed for several hours.

CLEARING TREPASSEY LINE.—A train with pusher last night a S.W. wind with snow and drift prevailed for several hours.

STAR MOVIE TO-DAY!

A rousing Melodrama of Terrific Storm Scenes, Sensational Dramatic Moments, Realistic Battles, Spine-Tingling Encounters, with a pretty romance of love and passion.

"HARBOR LIGHTS," in 8 Parts

A Two-Act Star Comedy that will cure the Blues.

Send the Children to our usual BIG MATINEE TO-MORROW

NOTE—As we have been repeatedly asked by our patrons to again show that wonderful picture, THE SEA HAWK, we have wired New York to return it. It is due here by Rosalind on Monday or Tuesday, and will be shown next week. See this space for nights of showing.

Montreal Star Draws Attention

Canadians, with a burden of taxation that is fast becoming unbearable and with remote prospects of any reduction of that burden in the immediate future, can only contemplate with a melancholy satisfaction the cheerful picture presented by the adjacent colony of Newfoundland. Recent political history threatened at one time to cast an unpleasant shadow over the oldest Colony under the British Crown, but the Speech from the Throne at the opening of the island Legislature on Wednesday proves conclusively that not only has this shadow passed, but that the outlook for the future is astonishingly bright. Industry is flourishing. The revenue shows a surplus over expenditure for the fiscal year 1924-25, and the prospects are so bright that the Government finds itself in a position to announce a series of tax reductions. The business profits tax, for instance, is to be repealed entirely. The proposed Income Tax Bill is to be suspended. Beef, pork and kerosene oil are to be added to the free list on the tariff, and the taxation on banks is also to be reduced. A new dock is also to be constructed at an estimated cost of \$4,000,000. No wonder Newfoundland is feeling cheerful. The island has passed through many vicissitudes in the past; but they are behind; the future is full of hope. A people who have justification for optimism can face their responsibilities with light hearts.—Montreal Star.

TAKEN SUDDENLY ILL.—A man named Goodall was taken suddenly ill on Water Street yesterday afternoon, and had to be assisted to Dr. Anderson's surgery for treatment. An examination showed that there was nothing serious wrong.

(From Our Boston Correspondent)

A sharp movement in stock in variously occasions comment as to the reasons. After the decline which occurred last Monday, any number of explanations were offered. It was pointed out that money rates had been gradually tightening; that commodity prices had declined; that the decline in the franc offered renewed evidence of unstable financial conditions abroad; that the grain markets had been weak; that the steel industry was showing signs of slackening. As a matter of fact, the business situation has not changed. It is just as favorable, in our opinion, as it has been right along. There have been no developments which should dispel the hopeful expectations with which the year was entered. But stock prices cannot keep going up continuously just because industrial conditions remain favorable. If they did, stocks would obviously reach a level far above their intrinsic value.

As regards the stock market, comment generally leans too far toward theory and contains too little common sense. It stands to reason that, on account of the enthusiasm generated by advancing prices since last November, many stocks have been marked up to prices which have discounted possibilities rather than probabilities. A bull market puts many people in a frame of mind which makes them desirous of believing rumors of large profits, melons and favorable developments which will affect certain stock issues, regardless of their source or reasonableness.

On the other hand, there are many stocks which have fallen far short of exhausting their possibilities and which analyses show to be still very cheap. But a period of readjustment of stock prices, in which issues have been advanced more rapidly than their prospects justify would be brought back to a more equitable level and prices in general made sufficiently attractive to cause investors who make profits on recent strength to repurchase, would seem likely.

It hardly seems possible that the technical position of the market, which became so weakened as to bring about the decline of last Monday, was corrected by a single day's decline. It would seem probable that for perhaps a month or more the major action of the market will consist of readjusting the prices of stocks which have advanced too rapidly, rather than exploiting the favorable prospects of other issues. But we believe that there are many stocks which, in such an event, will prove profitable to accumulate.

Propose 88-Story Sky-scraper for New York

An 88-story office building towering above the Woolworth Building, now tallest in the world.

A building, rising 88 stories above the Woolworth tower is being discussed by eminent architects and engineers as a possibility of the future. An interesting phase of this discussion concerns the problematical engineering difficulties to be encountered in going so high above the loftiest structure so far attempted by man.

The new building would be about 1250 feet high, or nearly a quarter of a mile, assuming that the floors would be similar in height to those of the Woolworth Building. This would make it 250 feet higher than the Eiffel Tower in Paris, the highest structure of any kind in the world, and about 400 feet higher than the Woolworth Building.

Engineers point out that exhaustive tests would have to be made to determine not only the usual stresses and strains of such a structure, but also the strain caused by resistance to the wind. When the Woolworth Building was finished tests made in an 80-mile gale to determine what effect wind pressure had on it, showed that the building was unaffected by the strain. But just how much stronger a building half again as high would have to be to withstand the pressure of a hurricane is one of the problems that would have to be worked out carefully. To this end a detailed study of the reactions of New York skyscrapers during heavy blows is reported to be in progress.

Sachem Off Dock

The steamer Sachem came off dock at 9 o'clock this morning, and hauled down to the Furness Withy premises. The ship will probably get away for Halifax and Boston to-morrow morning.

The Correct Thing

Women like to be correct in their toilet preparations—to know you are using the best, the most refined is welcome knowledge. Ladies who use THREE FLOWERS toilet articles can feel sure they are in the best company for these are the chosen cosmetics of refined and cultured ladies all over the world. When you experience the delights of using these dainty things you will understand why they are so popular. The Three Flowers Face Powder is a charming cosmetic with a divine odor.

The Sailors' Snug Harbor,
New Brighton, Staten Island, N.Y.

Buick Motor Company,
Flint, Michigan.

Dear Sirs:

There isn't any use of your sending me a solicitation to buy a Buick as I would buy no other.

I have owned five cars, the last two being Buicks. My 1920 Buick I drove 43,000 miles with no repairs except reoilng the brakes and renewing the spark plugs when needed. The car, of course, was well taken care of mechanically and was not abused. At present I own and am driving a 1925 Buick Master Six Coupe and it has everything beaten that I have ever owned or driven for dependability.

During September I drove it 4226 miles and its total mileage now is 7500 miles, without a scratch or a puncture or any repairs. So far by actual measurement I have averaged twenty miles to the gallon of gasoline, and have only added oil when the crank case is drained and refilled every 500 miles, when there is but slight difference in the oil level on the oil gauge.

September 7th, I had breakfast at the Hotel Windsor in Montreal, Canada, and slept the same night at home on Staten Island, a distance by my speedometer of 420 miles.

After a day's rest I drove to Washington, D.C., 251 miles and so on for the month of September.

The Buick in my opinion cannot be beaten for reliability, economy and comfort. The secret of good service is in following the instructions given in your Reference Book and in looking after the car every time it is driven.

Yours very respectfully,
HOWARD C. WILLIAMS, M.D.
Medical Director.

Methodist College

REPORT OF THE EXECUTIVE BOARD TO A SPECIAL MEETING OF THE BOARD OF GOVERNORS, WEDNESDAY, FEB. 26th, 1925.

The particular circumstances which makes this special meeting necessary is the fire by which the College Building was destroyed on the evening of Monday, Jan. 19th. This, occurring in the very middle of the school year, must be regarded as a calamity, both in the loss of a valuable building and furniture and in the interruption which is almost fatal to the successful work to which the College has been accustomed. As a result of this fire, your Executive and the Staff were faced with difficulties which at first appeared insurmountable, but kindness and generosity from a variety of sources soon provided means for housing and accommodating the classes, so that in less than one week the work of the College was proceeding, not without handicap, but with advantages which could hardly have been conceived as possible in so short a time. For this accomplishment we must ever be grateful to the Educational Authorities controlling the Normal School, to the Board of Directors of the Presbyterian College and to the Trustees of Gower Street Church, for it is in these three buildings that our Classes were comfortably housed and are now continuing their work.

The loss of books and furniture was a handicap from which we could not so quickly recover, but even this has, at last, been overcome and the work of the School is now proceeding with results and prospects which no one could have anticipated when looking at the blackened ruins which was all we had left of our College on the morning of January 20th, succeeding the fire. Not only must we be grateful to the controlling bodies of the buildings in which our Classes are now housed, but also to the Denominational and Societies which, with a fine spirit of helpfulness, came forward with assistance and encouragement. The Vestry of St. Thomas' Church, the Congregational Board of Management of the Synod Hall, the Seamen's Institute Committee, the Knights of Columbus, the Sons of England Society, the Benevolent Irish Society, the British Society, the Society of United Fishermen, the Total Abstinence Society and many others who promptly came forward with offers of help and sympathy. Such a delightful spirit of fraternity and co-operation goes far to relieve a situation however calamitous and distressing.

Our Principal and Staff have shown the greatest courage and devotion in

very trying and difficult circumstances. Having secured temporary housing accommodation, and arranged for furniture and supplies, and the work of the School now proceeding, your Executive faced the situation in its more permanent and general aspects. Before convening this Board it was deemed proper that a study of the whole problem in all its aspects should be made so that conclusions should be reached and recommendations made for your consideration.

The first necessities were to collect the Insurance and protect the salvage remaining from the fire. Committees of the Executive at work on these matters report successful progress. Appraisals and adjustments have been made and the full insurance, \$92,000.00, will shortly be in hand. Furniture and plumbing have been rescued, installed in use again or sold, and the walls of the building still standing, protected, scaffolded and water-proofed.

It was apparent at once to your Executive that the first constitutes a crisis and an opportunity, a time for reconstruction, not only of buildings, but of ways and methods, a time for consideration of to-day and tomorrow and to provide for a generation in advance as our fathers did, in their turn, thirty-three years ago.

Conferences were held and counsel taken with the Presbyterian and Congregational Bodies and with the East and West End Boards of Education. Bases of union and co-operation were discussed and conclusions reached from which the recommendations of this Report were framed. They embody an administrative union between our College and the Presbyterian College, the co-operation of the Congregational Board, the union of the East and West End Boards of Education, a building Programme covering four schools and a Residence and costing half a million dollars, and a financial appeal which may be successful in securing money to carry these matters into effect.

These conclusions were reached after numerous meetings and lengthy sessions. Four meetings of a special Committee were held, ten meetings of the Executive Board, two meetings of the Boards of Education and three meetings with Presbyterian Directors. Advantage was taken of the presence of those members of the Board of Governors who were in the city and who were called into counsel; representatives from the East and West End Boards of Education, Rev. Dr. Curran, the Principal of the College, Mr. S. T. Harrington, and the Chaplain of the College, Rev. Dr. Darby, were present with their counsel at our meetings and professional men of tried judgment and ability were called in to add their trained knowledge, and test the soundness of our conclusions before these recommendations were made.

Finally, these Recommendations are now submitted to your judgment for your approval or otherwise as you may determine. They are in the form of Resolutions in chronological order, covering the scope of survey which was deemed necessary.

(1) A resolution passed by the meeting of Joint Boards held Friday, February 6th, viz:—

"That this joint meeting of educational Boards, namely Executive of the Methodist College Board of Governors, West End

Board of Education and East End Board of Education, in view of circumstances in relation to education in this city and the particular circumstances of the burning of our College, consider that the present opportunity is one that demands a united front and we pledge ourselves as one body to consider the situation, to make one programme and to make a united appeal for the financial support necessary to meet the present situation. Further, we commit ourselves to the principle of organic union of these Boards as soon as necessary legislation can be secured."

(2) A Resolution passed by joint committees of the Executive Board and Presbyterian Directors to the effect that the united committees were in unanimous sympathy with the question of school union, but recognizing the difficulties and complications in the way of immediate organic union and the delay inevitable in carrying it out and that time is of the greatest importance, resolved that an administrative union only is immediately feasible and should be recommended to both bodies.

(3) At a meeting of the Executive Board, February 12th, the decision of the Board of Governors at last annual meeting was recognized as the immediate basis of union with Presbyterians, viz:—

(a) "That the work of the College be carried on jointly with the work of the Presbyterian College under a single, suitable name and by a Committee composed of the membership of both boards proportionately appointed as soon as it is found convenient to consummate the union; (b) That the executive Board be authorized to continue negotiations with this end in view, and (c) That the selection of a suitable name for the United Colleges be left with the Executive Board in conference with the Presbyterian Board."

(4) A Resolution was received from the Congregational Board of Management, viz:—

RESOLVED that Mr. N. M. Duley, Mr. H. E. Cowan and Rev. D. L. Nichol, be appointed a sub-committee to meet with Representatives of the Methodist and Presbyterian Boards of Education to explore the situation; this sub-committee to make clear that no deflection of money grants can be made from the Educational work of Fortune Bay (unless at the end of any financial year there should be a balance on hand) but the Committee to express hearty sympathy with the proposals for a United Board of Education for St. John's as is possible, by personal service and raising of funds for building, equipment and maintenance of a United College.

(5) The reply of the Executive Board is in the following terms, viz:—

"That this Board heartily appreciates the readiness of the Congregational Board to assist in establishing sufficient educational facilities in the city and will be glad to have their co-operation so far as it is possible for them to extend it within the condition of limitation which the Resolution sets forth."

(6) At the same meeting, February 12th the Executive Board passed the following Recommendation as to building, viz:—

(a) That every effort be made by direct action and through the co-operation of Educational Boards to cover an adequate building programme to serve the whole educational needs of Methodism in the city.

(b) That a College Building with ample accommodations be erected on the LeMarchant Road property.

(c) That the former College Building be immediately restored from its ruins and used for temporary housing College students, and later as an Elementary school."

(8) At a meeting of the Executive Board held Feb. 13th, the following recommendations, respecting building, were passed, viz:—

(a) That a school building of

adequate proportions be acquired or built in the West End of the city.

(b) That a school to accommodate about two hundred and fifty pupils be provided at a suitable site in the far east of the city.

(c) That this Building Programme be entered and pushed to completion with every energy on the part of all those responsible for the education of our young people.

(8) At the same meeting the following recommendations respecting finances were passed, viz:—

(a) That in the opinion of this Board the 1919 Educational Campaign cannot be generally utilized as a basis for financing the new Educational project, because it is altogether inadequate for the present requirements and that a new appeal should be made, which would, where advisable, take into consideration contribution to the 1919 Fund.

(b) That a bureau be appointed to engage an organizer and proceed immediately with an intensive financial campaign in St. John's.

(c) That a Campaign Bureau be appointed to conduct a financial campaign in the Outports by correspondence and visitation, the proceeds to be devoted to College purposes.

(d) That a careful survey of the cost of the Building Programme indicates that a sum of at least five hundred thousand dollars will be required, of which one hundred and twenty thousand dollars is presently in hand; that this Board recommends that a fund of three hundred thousand dollars be accumulated as speedily as possible by means of (1) an intensive campaign in St. John's; (2) a campaign in the Outports, and (3) an appeal to Canadian friends.

(9) At a meeting of the Executive Board with members of the Board of Governors and others present, the following recommendation was passed, viz:—

"That this meeting approves of the general scheme outlined and to put it in operation, endorses the Resolution passed by the Board on Friday, Feb. 13th. (Marked D)."

(10) At a second meeting of the three Educational Boards, Executive of Board of Governors of the College, West End Board of Education, and East End Board of Education, the following Resolutions were passed, viz:— Friday, Feb. 20th.

(a) "That these Boards in joint meeting having heard and considered the different recommendations forming the programme for building and necessary change, they are in general harmony with and approve of the plan so outlined and pledge themselves to support and assist it to completion."

(b) That these Boards in joint meeting having heard and considered plans for financing the educational needs at the present time, as set forth in Resolutions grouped under No. 8 and endorsed and supported the same as reasonable and adequate for the needs of the occasion.

(c) That this Board recommends that the question of Syllabus and division of grades in the different schools and College be referred to a Committee of Educationalists to consider and report in the proper quarter."

These recommendations are submitted with the conviction that the interests of the College are best served by associating and uniting as far as possible with the Methodist Educational Boards of the City and with other denominations as opportunities arise, so that unification and co-ordination may bring about the greatest economy and efficiency that can reasonably be attained.

Home-made Remedy Stops Coughs Quickly

The best cough medicine you ever used. A family supply costs only a few cents. Makes a cough stop in 10 minutes. Saves about \$2.

You might be surprised to know that the best thing you can use for a severe cough, is a remedy which is easily prepared at home in just a few moments. It's cheap, but for prompt results it beats anything you ever tried. Usually stops the ordinary cough or chest cold in 10 minutes. Tastes pleasant, too—children like it—and it is pure and good. Pour 2½ ounces of Pinex in a 16-oz. bottle; then fill it up with plain granulated sugar syrup. Or use clarified molasses, honey, or corn syrup, instead of sugar syrup. If desired, thus you make 16 ounces—a family supply—but costing no more than a small bottle of ready-made cough syrup.

And as a cough medicine, there is really nothing better to be had at any price. It goes right to the spot and gives quick relief. It promptly heals the inflamed membranes that line the throat and soothes the aching throat. It loosens the phlegm, and soon your cough stops entirely. Splendid for bronchitis, croup, hoarseness and bronchial asthma.

Pinex is a highly concentrated compound of Norway pine extract, famous for its healing effect on the membranes. To avoid disappointment, ask your druggist for "2½ ounces of Pinex" and directions and don't accept anything else. Guaranteed to give absolute satisfaction or money refunded. The Pinex Co., Toronto, Ont.

Mother!

Watch Child's Bowels

"California Fig Syrup" is Children's Harmless Laxative

When your child is constipated, bilious, has colic, feverish-breath, coated-tongue, or diarrhea, a teaspoonful of genuine "California Fig Syrup" sweetens the stomach and promptly cleans the bowels of poisons, gases, bile, souring food waste. Never cramps or overacts. Contains no narcotics or soothing drugs. Children love its delicious taste.

Ask your druggist for genuine "California Fig Syrup" which has full directions for babies and children of all ages, plainly printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

They are also submitted with due regard to economy in capital expenditure, but with the expectation that when you approve the Building Programme set forth you will authorize your Executive to associate with the St. John's Boards of Education in carrying it into effect.

Respectfully submitted,
R. F. HORWOOD,
Secretary.

Cabot St. Mother Now 'Rubs Away' Children's Colds

Uses New Vaporizing Ointment that Replaces Internal Dosing. Nothing to Swallow.

To-day millions of mothers treat croup and children's colds by the "vapor" method.

They use Vicks Vapo Rub, the vaporizing ointment, because it is externally applied. There is no dosing to upset delicate little stomachs.

Mrs. I. Ledrew of No. 9 Cabot St., St. John's, writes: "My little boy, five years old, had a bad cold in his throat. I rubbed him twice with Vicks and cured him. I also used it for my little baby girl and recommend it."

For hours after Vicks is applied over the throat and chest, medicated vapors are inhaled directly into the affected air passages. At the same time Vicks is absorbed like a liniment and thus helps the vapors inhaled to break up the congestion.

Vicks contains Menthol, Camphor, Eucalyptus, Thyme and other of the best time-tested remedies for inflammations, whether of the air passages—i.e., head or chest colds, croup, catarrh, bronchitis, etc.—or surface inflammation such as burns, bites, cuts, stings, etc.

Vicks is a standby in millions of homes. Over 17 million jars are used annually in Canada and the States.

Old Prophecy Recalled

City of Mexico Reported Slowly Sinking—Great Cathedral Now Below Its Original Level.

San Antonio, Feb. 18.—The old prophecies of the Aztec priests that lakes of the city of Mexico would rise and engulf the Spanish conquerors who profaned their temples and shattered their idols have been recalled following reports of engineers appearing in "Excelsior" published in the Mexican capital that the city is slowly sinking.

Settling of heavy buildings is easily seen in parts of the city, the paper says, while in other sections scientific tests are necessary to show that the foundations of buildings are steadily sinking into the sub-soil.

The great cathedral of Mexico, one of the largest buildings in the world, is from one to three centimeters below its original level. Its foundations are said to have been composed of idols from Aztec temples, broken and mingled with the other stone.

SEIZURE OF OVER THE TOP

NEW HAVEN, Conn., Feb. 27.

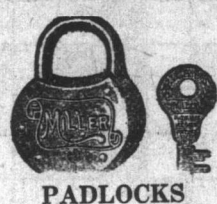

The seizure of British schooner Over the Top, following the sale of twenty-five cases of liquor to special agents of the United States Revenue Department, who visited the vessel at anchor 19 miles off the coast on October 18th, 1924, was illegal according to a decision handed down in the United States district court by Judge Edwin S. Thomas, inasmuch as the sale, beyond the 12 mile limit, was a legal transaction. Libels against boat and charges were dismissed.

SIDE TALKS.

By Ruth Cameron.

ARE WOMEN GOOD SPORTS?

On a shopping trip to the city not long ago, I ran across a friend who has taken up the teaching of physical training. We were talking of her work as we walked along the avenue. "Here comes one of my girls," she said as a young girl came toward us. But her teacher's smile and word of greeting she responded with a stiff nod, and passed on with her head in the air.

"That sort of thing would be amusing if it weren't significant of a certain character deficiency which I lay to the sex rather than to any particular girl," said my friend as we walked on. "In other words, my experience in teaching young folks has taught me that girls are poorer sports than boys—poorer losers."

Being interested in her deductions, I urged her to explain further.

"Can't get over a call down."

"Well, take that girl for example," she said. "She has given me a lot of trouble in class. She doesn't care for gymnastics particularly; and she's always getting excited on one score or another, and then she sits on the side lines and looks at the girls who are going through the drill and laughs at the awkward ones and is generally annoying. I spoke to her sharply a week ago and she has never forgiven me. On the other hand, I had occasion to single out a boy in one of my classes for a call-down not long ago, and instead of resenting it, he tacitly acknowledged the justice of the rebuke, seemed to have more respect for me because I hadn't let him get away with it and has been one of my stand-outs ever since."

"Another instance," she said, "was when I was in a newspaper interview recently, she thought that women in politics had reached the stage yet where they can give and take, win and lose, as dispassionately as men."

"They give but don't forgive."

"They can give all right," she answered, "believe me, I've heard some pretty snappy propaganda from the party politicians. But when it comes to taking as strong as they give, forgetting it, and meeting on the old friendly pre-war basis next day—no, they haven't gotten there yet. As to losing gracefully and winning temperately—well, I think they have a lot to learn from experience there. I know some women who voted on the losing side in the last election who declare they are through with politics, they are

never going to vote again, as long as they live, just because they lost. On the other hand, I know of more than one woman whose party rode to victory who took occasion to 'rub it in' in a very nasty manner when she met her erstwhile opponents, forgetting that it is the part of the victor to be magnanimous.

What Has Been Your Experience?

These are the opinions of two acquaintances of mine.

How about it, Reader Friends? Do you think that women are poorer sports than men? Are we less willing to admit when we are in wrong and take our medicine? Do we lose out in our arguments and our games less gracefully? Are we less willing to yield the victory to the winner cheerfully? Less level headed in our victorious moments? More vindictive generally?

What do you think about it? I wish you'd write and tell me.

He Would Not Be Without Them

Quebec Man Absolutely Relieved of Backache

Mr. Alfred Gagon recommends Dodd's Kidney Pills to all who suffer.

Moulin Bersimis, Que., Feb. 27.—(Special).—A few words about your Dodd's Kidney Pills. They have done me much good," states Mr. Gagon, a well known and highly respected resident of this place.

"For pains in the back and kidneys, I have taken Dodd's Kidney Pills and they have done me good immediately. I always keep a box in the house. Today, thanks to your pills I am quite relieved of my trouble and recommend them to all who suffer. Kindly send me one of your almanacs."

Dodd's Kidney Pills are purely and simply a kidney remedy. They act directly on the kidneys, strengthening them and putting them in condition to do their full work of straining the impurities out of the blood. Dodd's Kidney Pills have been in use in Canada for more than thirty years. They demonstrated their worth in the most serious forms of kidney disease, such as rheumatism, dropsy, diabetes, neuralgia and sciatica.

They give but don't forgive.

"They can give all right," she answered, "believe me, I've heard some pretty snappy propaganda from the party politicians. I know some women who voted on the losing side in the last election who declare they are through with politics, they are

never going to vote again, as long as they live, just because they lost. On the other hand, I know of more than one woman whose party rode to victory who took occasion to 'rub it in' in a very nasty manner when she met her erstwhile opponents, forgetting that it is the part of the victor to be magnanimous.

What Has Been Your Experience?

These are the opinions of two acquaintances of mine.

How about it, Reader Friends? Do you think that women are poorer sports than men? Are we less willing to admit when we are in wrong and take our medicine? Do we lose out in our arguments and our games less gracefully? Are we less willing to yield the victory to the winner cheerfully? Less level headed in our victorious moments? More vindictive generally?

What do you think about it? I wish you'd write and tell me.

He Would Not Be Without Them

Quebec Man Absolutely Relieved of Backache

Mr. Alfred Gagon recommends Dodd's Kidney Pills to all who suffer.

Moulin Bersimis, Que., Feb. 27.—(Special).—A few words about your Dodd's Kidney Pills. They have done me much good," states Mr. Gagon, a well known and highly respected resident of this place.

"For pains in the back and kidneys, I have taken Dodd's Kidney Pills and they have done me good immediately. I always keep a box in the house. Today, thanks to your pills I am quite relieved of my trouble and recommend them to all who suffer. Kindly send me one of your almanacs."

Dodd's Kidney Pills are purely and simply a kidney remedy. They act directly on the kidneys, strengthening them and putting them in condition to do their full work of straining the impurities out of the blood. Dodd's Kidney Pills have been in use in Canada for more than thirty years. They demonstrated their worth in the most serious forms of kidney disease, such as rheumatism, dropsy, diabetes, neuralgia and sciatica.

They give but don't forgive.

"They can give all right," she answered, "believe me, I've heard some pretty snappy propaganda from the party politicians. But when it comes to taking as strong as they give, forgetting it, and meeting on the old friendly pre-war basis next day—no, they haven't gotten there yet. As to losing gracefully and winning temperately—well, I think they have a lot to learn from experience there. I know some women who voted on the losing side in the last election who declare they are through with politics, they are

Largest and Smallest Engines

A young jeweller of Hillsboro, N.D., has made a tiny engine, run by compressed air, which is only three-quarters of an inch long and weighs only 2½ grains. The diameter of the cylinder bore is 28-1000 of an inch, the diameter of the flywheel is 9-64 of an inch and its stroke is 38-1000 of an inch. Contrasted with this is a valve used by the Ontario Power Company of Niagara Falls, which is 31 feet high, weighs 65 tons, and has a water-opening 9 feet across, so that an automobile full of men can stand in it.

Frightened Passenger

PULL RUDDER CONTROL CAUSING CRASH, AND FOUR ARE KILLED.
 Buenos Aires, Feb. 17.—Four passengers in an airplane were killed and the pilot was seriously injured when the airplane crashed at Ceres, in the Province of Santa Fe. The crash was due to a frightened passenger in the plane seizing and pulling the rudder control.

"Cascarets" 10c if Dizzy, Bilious, Constipated

To clean your bowels without cramping or over-acting, take "Cascarets." Sick headache, dizziness, biliousness, gases, indigestion, sour upset stomach and all such distress gone by morning. Nicest laxative and cathartic on earth for grown-ups and children. 10c, 25c, and 50c boxes—any drugstore.

Clears Show Window

The fogging of show windows, if they are of the boxed-in type, may be prevented by placing a flat glass or porcelain dish containing calcium chloride in the window. This chemical substance quickly absorbs moisture from the air, with the result that the moisture is prevented from condensing against the outside glass. The contents of the dishes must be renewed every two or three days, and the moist calcium chloride thoroughly dried, after which it may be used again.

Fads and Fashions

The silk suit is excellent for spring. Pastel shades lead in all woolen materials. A chic neckline is the deep, loose narrow V.

The slender silhouette becomes more supple.

In kasha, natural shades, beige and gray lead.

Paris clings to its devotion to natural kasha.

On every frock, the back is invariably plain.

The vaudeville consisted of songs by Mickey Kane; Violin selection by

Merle Scott; L. E. Perrin in Watermelon and The Lads and Lassies in Irish Review. It is impossible to define the best items as they were all faultlessly rendered and warmly applauded. Monday's play is "The Other Man's Wife," tickets for same are now selling at Hutton's Music Store.

Try freezing mince pie and serving it with Roquefort cheese.

With red outlets one might serve slightly salted grilled almonds.

THE POMPEIAN COMPANY

Cleveland, Ohio, U.S.A.

THE POMPEIAN BEAUTY TOILETTE has long been the choice of the loveliest women in every clime to accentuate their charms.

The use of Pompeian Beauty Powder will not change your looks but will greatly enhance those you already have.

If your skin lacks clearness or velvety smoothness, Beauty Powder will modify these faults—if it is naturally lovely then the correct shade of Pompeian will make you even more attractive.

To attain a creamy skin suffused with that delicate glowing color which lends charm and speaks youthful beauty, you must choose the right shade of Powder and Rouge. Study your skin and select the tone that will harmonize with your natural coloring.

The best results are obtained by first using Pompeian Day Cream (vanishing) which forms an excellent base for Beauty Powder, causing it to adhere for hours.

Antennae and Lead-ins

EDITED BY JOHN M. CLAYTON.

It is highly essential that your antenna be clear of all objects. Don't run it through trees; don't run it directly over your house if it is at all possible to keep it away from it; if the antenna must be attached to a tree, use a length of rope to attach the end of the antenna to the tree and be sure that the insulator is so placed that the antenna is at least 5 feet away from any branches. Of course you can still hear stations if all these "don'ts" are violated, but the chances are that you will hear many more if you adhere to these rules, than you would if you don't.

In the matter of lead-ins, it seems to be the universal thing that practically all broadcast antennae have lead-ins which have a great deal of losses. KEEP THE LEAD-IN AS FAR AWAY FROM THE HOUSE AS POSSIBLE. DON'T "back" the lead-in to the house by means of porcelain knobs. This is perfectly satisfactory in general house wiring practice, but a radio installation is far from being an ordinary electrical installation. If possible, dead end the lead-in end of the antenna so far from the house that the lead-in

Archie Marks Co. in Splendid Play

The performance at the Casino last night by the Archie Marks Players was cleverly interpreted and the Company again scored a success.

Miss Archie Marks is charming as Bobby Howard, the unspooled daughter of Colonel Howard, and gives the role beautiful touch of finesse. Lindsay E. Perrin provides some sure-fire comedy as Uncle George, the humourous colored character. Mr. Perrin's humour is strikingly original. Miss Agnes Stutz scores well as Mathilda Martin. Paul Brady is every inch the southern colonel and the role gives him broad scope for the development of this character. W. L. Phillips as Aunt Caroline provides comedy in galore and his impersonation is of exceptional quality. The remainder of the cast is seen to good advantage in the various roles. The setting clearly shows that special attention has been given to every detail as it is typically original.

The vaudeville consisted of songs by Mickey Kane; Violin selection by

Merle Scott; L. E. Perrin in Watermelon and The Lads and Lassies in Irish Review. It is impossible to define the best items as they were all faultlessly rendered and warmly applauded. Monday's play is "The Other Man's Wife," tickets for same are now selling at Hutton's Music Store.

House of Assembly Proceedings

FRIDAY, Feb. 27th.

The House met at 3 p.m.

HON. M. S. SULLIVAN presented a petition from the residents of St. Mary's respecting the opening of a new road. Messrs. Walsh and Sinnott supported the petition.

MR. CASHIN presented a petition from the residents of Admiral's Cove praying for the construction of a telephone line. Mr. Moore supported the petition.

A number of Answers to Questions were tabled. These will appear on Monday.

DEBATE.

debate on the Speech from the Throne was taken up by Mr. Hickman, leader of the Opposition. In his opening remarks, he referred to the reluctance with which adjournment was granted on opening day and said he did not blame the Prime Minister who evidently desired to complete the business of the session with as much despatch as possible. With regard to the reference in the Speech from the Throne to the fishery, the speaker observed that the fishermen did not reap the reward of their seasons work to the extent that might be inferred. Intimating the possibility of legislation with regard to cull of fish, he pointed out the necessity of a law in relation to the different kinds of fishery and also the need of fish inspection and a means of getting statistics of the fishery. Alluding to the industry on the Humber, he was glad to know that it was giving employment but he lamented that through absence of provision in the contract, Newfoundland workmen were not deriving the benefits they were entitled to. Speaking on the amount of money expended on the project, he expressed the opinion that the more it exceeded the original twenty millions the greater was the possibility of our having to pay the interest on the guaranteed bonds. Referring to the Labrador Boundary Delegation, the speaker said he expected that all the information in connection with the negotiations would have been given to the house. His opinion was that the Delegation had no information to give and the visit was a finale from start to finish. He regarded the Boundary Dispute as a much cow for lawyers. He would possibly consent to the disposal of our rights on Labrador for little less than our national debt. In view of the possibility of the matter coming before the Privy Council, he doubted the wisdom of the commission going to Ottawa for the purpose of making sale. He was very pleased, however, to note that whilst they were in Canada they took up the matter of Trade Relations with the West Indies. This, he claimed, was a most important matter to the colony. Direct and reliable steam connections with the West Indies was a necessity and he regretted that a former proposal, (Sir Wm. Coaker's) had not been adopted. Regarding the new steamer for the Gulf service, the speaker expressed his conviction that a day steamer, such as is used between Dover and Calais would be cheaper and more suitable than the

one under construction. He regretted that the steamer had not been obtained in England and the benefits of the Trade Facilities Board availed off. He inferred that the Prime Minister had forgotten about the Board until the contract was signed.

THE PRIME MINISTER replied that the inference was wrong and requested the speaker to quote the correspondence.

MR. HICKMAN in answer endeavored to show that the Government had made a bad deal and instead of the saving of 50,000 there was an actual loss of that amount. The unemployment question was next touched on, and the speaker expressed his disapproval of breaking stone or the present relief methods. The unemployed, he thought, could be given work by building large customs warehouses and cleaning up the streets of St. John's. Referring to the commission on Public Charities the speaker said it was a good move on the part of the Government the procuring of the services of Mr. Ross in connection with the Post Office was likewise a pledge of earnest intention although he appeared to be unable to institute any improvements. The speaker also approved of the steps taken by the Minister of Agriculture in formulating a policy. He felt that there was great need of a proper ware house wherein the farmers could store vegetables until marketed. As to the finances of the colony, he was glad to learn that they were in a highly satisfactory condition, but he believed this was due mainly to the work of the previous administration. He thought that our London loan should have been obtained at par. He did not get the best bid obtainable but he believed that the results would have been better had notice of the loan been widely advertised. The proposal to pay a bounty for ship repairing had his hearty support. Regarding the dock repairs he thought earnest consideration should be given to the matter of its disposal rather than attempt at repairs if the expenditure would amount to four million dollars. He thought we should give the dock to some one to repair and operate.

PRIME MINISTER.—We are looking for a customer.

MR. HICKMAN continuing intimated that the removal of the Profits Tax was another feature of the Government's programme which he approved of. As the system was it could not be carried into effect, and besides it was a hindrance to business progress. Mr. Hickman was trenchant in some observations he made on the Auditor General's Department. This department, he said, should be done away with. He would sweep it clear out with a broom. Approval of the Redistribution Bill was expressed, although the speaker claimed that the number of representatives should be reduced instead of increased. In connection with the roadbuilding programme he doubted the wisdom of expending 2 million dollars on roads before a first class hotel was erected. He saw the necessity of improved roads and the appointment of a Highway Commission, but he did not think that the Government Engineer was the most suitable man to appoint as Chairman. He thought that the man recommended by Mr. Hibbs would be the proper person to have. Dealing with the United States claims against the Colony Mr. Hickman pointed out some of the laws of that country which hampered our trade and then urged that we institute retaliatory measures. As to finding new fish markets he thought it would be of little avail to send out Commissioners or Trade Agents as suggested by Mr. Warren, because those in the fish business had explored every possible market. Mr. Hickman closed his address with a reference to the Crown Lands Act which, he said, had not been amended.

THE MINISTER OF JUSTICE explained that the Act did not need to be amended, and if it had been carried out in the past there would be none of the abuses complained of.

THE MINISTER OF AGRICULTURE stated that not an inch of timber limits had been granted since he assumed control with the exception of a block near the Gander area. In the past who ever had the most political pull had the best chance of getting any timber areas going. Numerous politicians had applied for the limit near the Gander and he turned them down. The Reid Co. needing it in connection with their enterprise he has sold them the limit on bonus rights for the sum of \$45,800. Under these rights the Company must pay rentals.

HON. MINISTER OF JUSTICE.—Mr. Speaker, I just want to add a few words to what has already been said, more by way of explanation than by way of answer. As a matter of fact I think I may speak for every member on this side of the House when I express the very sincere appreciation of the spirit in which all the honorable members have spoken. The Leader of the Opposition has carried out his promise to deal with the Speech in the spirit of helpful and constructive criticism and not by way of obstruction. The addresses given by the honorable members have certainly typified that spirit, and I think it is a unique happening in the history of this House to have the policy of the Government since the House last met receive the unanimous con-

densation of the House in every respect. The Prime Minister must have reason to be proud to have his policy so unanimously approved by every member of the House.

The public outside the House naturally expect and demand from the Opposition that the attention of the public be drawn to all the misdeeds of the Government, and surely it must be a matter of great satisfaction to the Government that no such reference has been made in his case, because, and the public and everyone must agree with this, they have no material facts on which to base them.

So much by way of generalities. There are one or two things that I think I ought to explain. The honorable the Leader of the Opposition no doubt thought that he was saying something new when he talked of a straight line from Blanc Sablon to Cape Chidley, and said that it would cut off part of our coast on the Labrador. There is no question about that. In order that I might explain this matter better to the House, I sent down for a map. The Labrador Boundary that we claim is not a straight line from Blanc Sablon to Cape Chidley. If we had a line from Blanc Sablon to Cape Chidley it would run thus (indicates line on map) and it would cut off a certain piece of the Labrador here (indicates place on map). But the boundary that Newfoundland claims is here, (shows line on map). It is not an absolutely straight line, and it retains all our coast line.

Mr. Speaker, in connection with this idea of selling the Labrador there are two things that must be thought of. When you talk about selling Labrador you must remember that it means the selling of the land right out to the coast. In other words selling, as I say, our territory, not alone the territory that is in dispute—the hinterland between the height of land and the sea—but selling in addition to that what is indisputably admitted to be ours. Our rights to that part was not disputed at our conference, but what may be in the pleadings I do not know. What may be raised in the pleadings as to Newfoundland's undoubted right to the coast is another matter. The territory that we understand is in dispute is the territory between the land near the sea coast and this height of land.

Now, as I said, there are two things to be considered in the matter of a sale. There is first the matter of selling the land right out to the coast, and having the sovereignty of this land go to Canada, with Newfoundland getting rights of fishing, and rights to use the land by treaty. That is one method of sale, and that method would naturally involve very much more and very much greater thought both as to price and as to the sale itself than the second form of proposed sale. Under the second form of sale, we would consider only that portion of Labrador lying between the height of land and our own Newfoundland Labrador territory of which so far as this country is concerned, we have only the most meagre knowledge. I do not know that we have any more meagre and scanty knowledge than Canada has. We have purely hypothetical ideas as to its timber, but we have assured ideas as to its water powers.

One of the things that we have to sit down and consider would be the price which we would ask for it. Even supposing for the moment that you wanted to sell that land—that you had agreed to sell it, and you had destroyed all idea of sentiment about parting with Labrador and the coastline, can you say what it is worth, apart altogether from what you would try to get for it. There is no method known to ordinary business science that can value that land. You can only approximate something. Even supposing that you were certain of your rights, and that the Privy Council was going to render judgment in our favor, there is no one here to-day that can do any more than give a guess at what we ought to sell for. I think that our friends in Canada are in practically the same position as to knowledge of what is down there.

There is just one word more I want to say in this connection, and that is as regards the position of the delegation. I want to explain this to the members of the House. The delegation did not go up to Canada to sell or try to sell Labrador. They did not go up even to endeavor to negotiate a sale of Labrador or any part of it. All this talk about a sale was naturally brought in by the Opposition as a means of saying something as something must be said from the Opposition standpoint. We did not go there to sell the Labrador and come back with a bag of money in our pockets. That could not happen, because, in the first place, we would have no authority to even attempt it. Even if Canada had offered us five hundred thousand millions for Labrador the delegation had no power to even attempt to accept it. The only thing that we did was to go up there in response to the invitation that was sent to us. And despite the natural interest that those who had claims were exhibiting, the Government took care to make clear that the Conference was between the Governments of Quebec and Ottawa and Newfoundland, and no outsiders were to be represented. The delegation only went up to ascertain, without any prejudice whatever, what possibilities there were of discussing a legal settlement. Perhaps before long it one may judge from the talk that is being advanced, we may

be able to come into the House with a settlement. But members on both sides of this House must remember that nothing whatever can be done by any individual of the delegation, or by the Government itself, except in the proper way through this House, so, therefore, there is nothing to be afraid of or worried about. As a certain clergyman was accustomed to say in the course of his sermons, "the hour has not yet come," and that is the situation at present, the hour is not yet arrived.

As Mr. Warren has said, we have not the control of the situation in our hands. He left office with the Newfoundland case, signed and sealed, and placed it in my hands only to be printed. The arrangement was that when our claim was printed the Canadian case would be exchanged with us, but this did not transpire. On our return, so that there would be no excuse on the part of the Canadian Government to complain of delay on our side, I immediately wrote the Attorney General at Ottawa to hurry up and expedite their case, and I make the statement now that there was nothing whatever done on our part to cause delay in any way. But

our case was not filed, and the position is, that when it is filed with the other, and they go to the Privy Council, I would not undertake to forecast the result. It must be remembered that Canada is just as sure of her case being right as we are of ours. Ours, it is true, looks good on paper, but I have known hockey and football teams which looked good on paper, but when they got on the field were cleaned up. As far as our case is concerned, I think the expense in connection with it has been justified, and as one who has not yet been able to get my hand in the chest, though I need the money, I must say in justice to those who have been conducting the case, that they have had to deal with a matter that is entirely different from going out and selling a fire ladder or a hose. This matter of the Labrador is one in which the territory involved is three times the size of Newfoundland, and none should regard it in any, but a serious light.

The question is really a tremendous one. It is not a partisan question, or one affecting only this side of the House, but one in which the people outside are most vitally interested, and anything that we can do to conserve our rights must, therefore, be done.

Now there is one other matter that I would like to clear up, and which has been referred to by the honorable member for Fortune Bay. I wish to make an explanation of what appeared to be an interruption on my part when he was speaking yesterday. He was referring at the time to the conduct of Besco, as to the export tax on ore after the contract had been passed. As I said before when Mr. Bennett and myself as representatives of the Opposition were appointed on the Committee not alone was it a surprise to us that the Besco representatives who had not yet been able to give us word at first, but that the matters were so ridiculous and so difficult to follow that we agreed we should have tried to get a new contract drawn up. No lawyer could interpret the contract in its existing form,

and it was made so intentionally clear and explicit, that it was brought in. We had two things in mind, the continuance of work, and the fixing of wages as far as possible, because if we secured the export taxes ore would be an incident and nothing at all comparison to the benefits to be derived from these other factors. More men at work and the higher rate of pay, the more revenue result. But what happened? We told the contract had to go to the without crossing a T or dotting an i. We came back into the House and contract went through. Now I want to resurrect what has happened since—as it was not the fault of the present Opposition—because, to-day the day, as I told Mr. Warren, the men at Bell Island were wrongfully, the men at Bell Island lost faith in the outfit and we never got back again to the old position at that industrial centre of popular status of the Besco concern.

A few cents each week . . . Vigorous, glowing Health again!

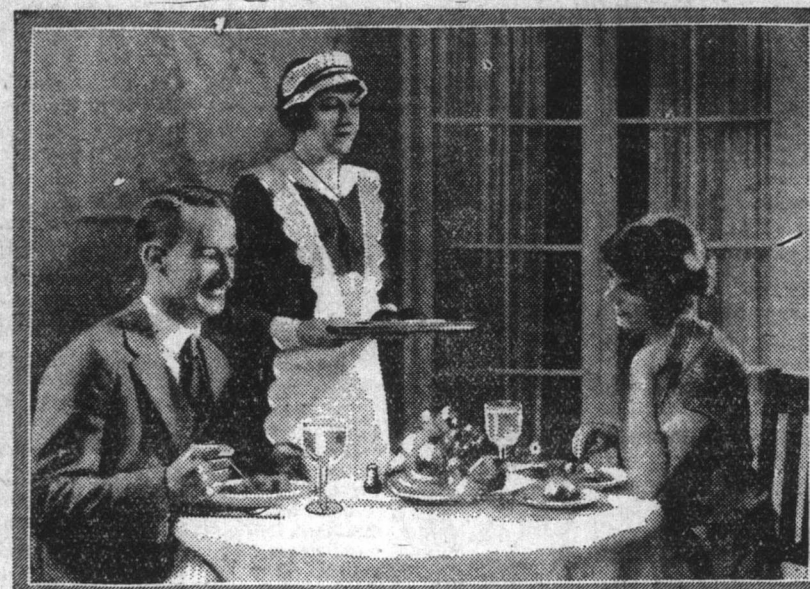

THESE remarkable reports are typical of thousands of similar tributes to Fleischmann's Yeast.

There is nothing mysterious about its action. It is not a "cure-all," not a medicine in any sense. But when the body is choked with the poisons of constipation—or when its vitality is low so that skin, stomach and general health are affected—this simple, natural food achieves literally amazing results.

Concentrated in every cake of Fleischmann's Yeast are millions of tiny yeast-plants, alive and active. At once they go to work—invigorating the whole system, clearing the skin, aiding digestion, strengthening the in-

TESTINAL muscles and making them healthy and active.

Write us for further information, or let us send you a free copy of our latest booklet on Yeast for Health. Address: Health Research Department The Fleischmann Company, 201 Duckworth Street, St. John's, N.F.

"Until six months ago I was virtually a hermit, only going out to work every day and then spending the evening reading in my room. I was an extreme example of a pin-faced youth. It seemed nothing could remove these eruptions. Then I tried the Fleischmann treatment. In one month my face had indeed cleared up greatly. I continued the treatment for three months, and by that time my face had become as clear as anybody's. I go everywhere now and bless the day I started to use Fleischmann's Yeast."
(Mr. Bernard Kliman of Philadelphia, Pa.)

"Fleischmann's Yeast gave me everything that four years' chronic constipation, with its then continual purgative taking, took from me. As a 'rifleman' I saw active service on four fronts, and constipation undermined my constitution until I became a nervous wreck, invalided from the service; classified neurasthenic. I was awarded a pension with disability 40%. Life was hell. After persuasion I tried Fleischmann's Yeast and now eat well, sleep well and what's better, work well and cheerfully. 'A month ago, I wrote the pension authorities asking for a 'well' award. I don't need my pension any longer.'
(A letter from Mr. Charles H. Ward of Halifax, N. S.)

Fleischmann's Yeast for Health comes only in the tinful package—it cannot be purchased in tablet form. All grocers have it. Start eating it today! You can order several cakes at a time, for Yeast will keep fresh in a cool, dry place for two or three days.

Fleischmann's Yeast is prepared for market in Newfoundland.

With this you can make your hair stay combed—all day

Men are finding in Stacom what they have always sought—an easy, natural way to keep the hair looking always as trim and neat as their favorite barber leaves it.

Women find Stacom just the thing to control stray hairs, to make the curl stay in, and to keep bobbed hair in place.

Stacom is a smooth, velvety, invisible cream—non-staining and non-greasy. It

comes in jars and in tubes—compact, economical. You can get it at all drug and department stores.

At all Drug and Departmental Stores

"DIAMOND DYE" IT A BEAUTIFUL COLOR

Perfect hair dyeing and coloring is made with Diamond Dye. Just mix with water, wash, and dry. No heat, no steam, no chemicals. It's the only hair dye that gives you a beautiful color that lasts. It's the only hair dye that gives you a beautiful color that lasts.

can dye or tint lingerie, silk, stockings, waists, dresses, coats, sweaters, draperies, coverlets, etc. Buy "Diamond Dye"—no other material you wish to color is so easy to use, or whether it is linen, mixed goods.

House of Assembly

(Continued from page 10.)

I have no desire to re-
what happened after the passing
the contract, as perhaps it would
be fair because the man chiefly
responsible is not now in the House.
The governor said to me in answer
to a question when I was talking to
him in Montreal, the clause in the con-
tract relating to the smelter was
not in the original, but was put in because
of the day, who was a big
man in the Government, had ap-
parently given the idea to the Besco
company, that if this thing was not done
there was the danger of a
tax being put on. I said that
was absurd and ridiculous because
the Besco company was in session it was
able to withdraw the clause.
I said we could not withdraw that
clause regarding the smelter as that
was thrown in as a camouflage and
was the Government of the day,
and those who were negotiating
wanted something nice on paper.
There was no intention to put
the smelter, and he said himself
the reason why Besco did not
do it was because in the event of
the smelter not being put up in five
years the tax would begin to oper-
ate; but from the moment the
tax was put in force, not only was
a cent paid under the contract,
but the money in this country shows
that steps were taken to have this
smelter removed. Now the present Gov-
ernment does not want to talk fire-
works, but without making any sug-
gestions as to the future this Gov-
ernment will try and see that some
arrangement is arrived at.
The contract and that Act as it is
in the Statute Book is an imposition
on the people, and a joke on the people.
I never intended to get it carried
out, and it cannot be carried out and it is
impossible to bring it down from
the electric smelting plant.
The island was never intended to
be put up to. I therefore must sub-
scribe to the sentiments expressed by
others on the other side of the
House that we try and get a new
contract drawn up and stop this an-
nual lockout and this annual farce.
There is one thing, though, in this
contract, and that is that one cannot
say and idly say that this must be
done and that must be done. The hard
position is that those people
on Bell Island are like a crowd
of men. They are over there today
for less wages than they
were to get, and they are work-
ing for less wages than
shovelers for less wages than
shovelers to get. But, God help
them, they've got to work under these
conditions because there is no place
for them to go now, and, if, as I
said, Mr. Wolvin, there was some
one else for them to go there would
be a loss to Bell Island shovelling
that one must not lose sight of
the other side of the story. We do not
want Bell Island mines closed if they
are kept open, because the day
they are closed a hardship will
befall upon our people. We
keep them going and accept
the position for what they are.
For these reasons I en-
tirely agree with the idea that there should be
a new agreement and a
new inquiry into Besco affairs.
Question taken to-day by the
House and workmen generally in
the island that they refuse to have
any inquiry, except an inquiry on
our position here is somewhat
different and the nature of such an
inquiry would be advantageous to
the island and Newfoundland.
Today the position is that
the Besco company produce their
statement and their over-
charges and expenses showing
every time they shipped ore last
year they lost money on it. We do
not know whether this statement is
true or not, and we have no means of
knowing it. Of course, it must be
in mind that this is mine ore
and that it is mined on
the island in competition with
other countries that have more
modern methods and
modern fridges of machinery. At
the same time the ore is mined
for the purpose of mixing to a pro-
portion of three to one. There are at
present time a couple of hundred
men and the only hope is by min-
ing the ore to raise the quality.
The Prime Minister moved the ad-
journment of the debate, and the
House rose until 3 p.m. Monday.

Harbor Grace Notes

Card Party and Dance held at
the Dalton Ladies' Association.
Most enjoyable and was well
attended. Over eighty persons took
part in the card games, auction forty
were played and the prizes, tickets
for the Association's weepstakes, were
won by Madames H. H. Archibald, H.
March and M. Thomey, and Misses
J. O'Brien, R. Walsh, Capt.
Sullivan and E. D. Han-
ley. At the conclusion of the card
game a supper was served by the la-
dies' refreshment committee.
The dancing was indulged in
for the early hours of the morning.
Details of Mr. Samuel Stowe—a
former Harbor Gracean, occurred at
the funeral on Friday last. He was a

G. KNOWLING, LTD.

Feb 27, 28, mar 6

son of the late Richard Stowe, of this
town, and was in his sixty ninth year.
Deceased had been living in St. John's
for years, working at Reid's plant as
blacksmith, and was considered the
best temper of steel in the country.
He resided in England for some years,
going there from Labrador and re-
turning on one of our sealing steam-
ers. Mr. Stowe was unmarried, and is
survived by his brother, Richard, of
St. John's. The body was brought here
from the city on Saturday, and the
funeral took place from the home of
his sister-in-law, Mrs. Eli Dawe, on
Sunday, to the Methodist Church. Rev.
Mr. Harris performing the last sad
rites at the church and graveside. To
the bereaved, we extend sympathy.

RICHARD HUDNUT
THREE FLOWERS FACE POWDER
The Face Powder that is Different
Having the Particularly Desirable
Quality of Adhesiveness and per-
fumed with the Distinctive and
Appealing odor of Three Flowers
in All Popular Shades

Some cases of scarlet fever have
been reported in town recently, and
on Monday last, Mary, the five year
old daughter of Mr. and Mrs. Edward
Moriarty, succumbed to the malady,
after being ill for a short while. In-
terment was made in the R. C. Ceme-
tery. The deepest sympathy of the
community goes out to the parents and
family in the sad loss of their little
girl.

A number of our amateur players
are now preparing for the presenta-
tion of the usual St. Patrick night's
play. Our popular Postmaster, Mr. W.
H. Kennedy is directing the play, and
it is entitled, "Paddy Casey." It would
be wise to keep the date open, for St.
Patrick night's play is sure to be a
good one.

Mr. Wesley J. Parsons, manager of
the Harbor Grace Boat and Shoe Mfg.
Co., Ltd., who was on a brief visit to
the U.S.A., in the interest of his busi-
ness, returned again on Tuesday week,
having had a successful trip.

Mrs. (Rev.) A. B. S. Sterling, of St.
John's, who had been visiting friends
at Bay Roberts, came here recently on
a visit to her sister, Mrs. (Dr.) Cron.

Mr. Ernest Godden, who has not
been feeling in good health for some

DEMAND
"Phillips" Milk
of Magnesia

Accept only genuine "Phillips," the
original Milk of Magnesia, prescribed
by physicians for 50 years as an an-
acid, laxative, corrective.
Full directions with each bottle—
no drug store.

time past, is at present in St. John's
to undergo medical treatment. His
many friends here wish him a speedy
recovery to health again.

Mr. Josiah Gosse of Spaniard's Bay,
has been among the visitors to town
during the week.

Col. T. Cloud, S.A. Territorial Com-
mander for Newfoundland, will be in
town for the week-end, and will con-
duct services at the B. A. Citadel.
Lantern slides will be shown on Sat-
urday night.

Messrs. Archibald Bros. have re-
cently made improvements in their
factory and office buildings. The latter
being moved and raised one storey,
while the old tannery has been re-
modelled and a new flat added. These
changes and additions are a great con-
venience and improvement for the en-
terprising firm.

An Ave Maria, composed by Mrs. M.
T. Jones of this town, was sung at the
Roman Catholic Cathedral at St.

John's on Sunday week. It has already
been performed in the United States,
where it met with most favourable
comment. Mrs. Jones' musical talent
and ability is well known here, and
we join with her many friends in ex-
tending congratulations on her suc-
cess as a composer.

Mr. Thomas Peddie, of Bristol's
Hope, went out by this morning's
train for Deer Lake, where he will
spend the remainder of the winter
months with his daughter, Mrs. George
Nichols.

Messrs. Reuben Gordon and John
Beckham, a deputation from the un-
employed of the town, as the result
of several meetings held here lately.

For Coughs and Colds

Stafford's Phoratone

This excellent mixture will cure almost every ordinary cough or cold in very short time. The best time to take it is the minute you feel you have taken cold.

**WE GUARANTEE IT
WE RECOMMEND IT**

because we have sold thousands of bottles and because customers are continually asking for PHORATONE in preference to other mixtures.

You can purchase PHORATONE in two sizes
35c. and 60c. Per Bottle.
