UPPER CANADA COLLEGE, TORONTO.

FOUNDED 1829.

The College was founded in 1829 by Sir John Colborne (Lord Seaton) after the model of the great Public Schools of England, and continues to be carried on with special regard to the ideal aimed at in those institutions. It is situated about a mile from the city limits in Deer Park, a suburb of Toronto. It is built upon a gravel soil facing the south and is about 3 miles from the lake front. The lawns and park cover an area of 30 acres. The landscape scenery around the College is the finest about Toronto, and from the windows of the College the country may be seen for miles around; to the north may be seen the Oak Ridges 25 miles distant; to the east the Scarboro' Heights, to the west the hills of Caledon, and to the south overlooking the city and the island the broad expanse of Lake Ontario.

SCHOOL BUILDINGS.

The school building is in the form of an E, the main part facing the south and the wings running to the north. The foundation is of brown Credit Valley stone for about 6 feet above the ground line; the upper structure is of brick. The class-rooms are spacious and well lighted; each bed-room is furnished for one or two boys, and the whole building throughout is heated by steam, and ventilated by large exhaust fans driven by electric motors at the base of tall ventilating shafts. The system of lighting is the Edison Incandescent Electric Light supplied by large dynamos; the all-night lighting in the halls is kept going by storage batteries. The hot-water system is supplied by rain-water tanks of 60,000 gallons capacity; the drinking water is supplied either from the large well sunk to a depth of over 100 feet, or from the city water system. The plumbing is of the most modern description, and the drainage is perfect.

STEAM LAUNDRY.

The steam laundry is fitted up with the most approved appliances. It is for the exclusive use of the College. In this way the possibility of infection is avoided

THE LIBRARY.

A carefully selected library and a well furnished reading room are open to the pupils. The library is being largely added to each year. It is expected that novels brought back by the boys will be submitted to the Principal.

THE LABORATORY.

The Laboratory is well furnished with apparatus and chemicals. Adjoining the laboratory is the lecture-room built in the form of an amphitheatre. A carefully devised system of mechanical ventilation keeps the air in these rooms always fresh. Models and charts of the highest excellence are provided for the teaching of botany and physiology.

THE GYMNASIUM.

The Gymnasium is a lofty building 80 feet long and 40 feet wide. It is fitted with the usual appliances, and regular instruction will be given in Gymnastics, Calisthenics and Military Drill. Physical culture is under the supervision of the College Physician, who will examine the boys from time to time as to their fitness to undergo gymnastic training. The instructor, Sergeant Halfpenny, will always be in attendance when the gymnasium is opened.

THE MUSEUM.

The School Museum contains a collection of Fossils and other specimens illustrating the Geology of the Dominion. The Geological specimens were given to the College by the director of the geological survey of Canada.

SCHOOL GAMES.

Much attention is paid to the physical development of the boys. Physical training forms part of the regular school routine, and all boys who are not hindered by weak health are expected to take part in school games. The part of the grounds set apart for this purpose covers over 20 acres. The boys will be divided into sets for cricket and football, according to their proficiency. There are several lawn tennis courts, and a $\frac{1}{4}$ milé race track is now in progress and will be completed at an early date. For winter sports there is an open air skating rink.

EXAMINATIONS.

There are two Annual Examinations of the whole College, one in unseen subjects held after the Christmas Holidays, and the General Promotion Examinations

held immediately before the Mid-summer Holidays. The boys who fail at the Promotion Examinations, in any or all of the subjects, may be re-examined at the opening of the College in September, if it be desired.

EXHIBITIONS.

Ten exhibitions are annually competed for; one in each of the Departments of Classics, Mathematics, Modern Languages, Science, and General Proficiency in the Fourth and Fifth Forms respectively. The holder of an Exhibition is entitled to free tuition for the year next ensuing the winning of the same. The Examiners for Exhibitions are unconnected with the College.

MEDALS.

1. HIS EXCELLENCY THE GOVERNOR-GENERAL'S SILVER MEDAL.—This Medal is awarded annually to the boy who ranks first in General Proficiency at the Leaving Examination of the *Sixth Form*. It carries with it the rank of "Head Boy" for the year.

2. THE J. HERBERT MASON MEDALS (Gold and Silver).—These Medals are awarded annually to the two boys, members of the upper school, who are considered by the masters and pupils to possess in the highest degree the following characteristics: "Cheerful submission to authority; self-respect and independence of character; readiness to forgive offence; desire to conciliate the differences of others; and, above all, moral courage and unflinching truthfulness." It is through the liberality of Mr. Mason, who donated to the College Board \$1,000, that these Medals are annually offered for competition.

PRIZES.

I. SIXTH FORM PRIZES (awarded at the Leaving Examination each year)—
 1. *The Classical Prize* to the boy who ranks first in Latin and Greek. 2. *The Mathematical Prize*. 3. *The Modern Language Prize* for proficiency in English, French, German, History and Geography.

II. J. ROSS ROBERTSON PRIZES.—Books to the value of \$150 are annually presented to the College by J. Ross Robertson, Esq., to be awarded in each form of the College for proficiency in Canadian History and Geography. No boy will be allowed to take two prizes in the same school—that is, he may take it once in the lower, once in the middle, and once in the upper school, and to be eligible for the prize in the upper school he must be a pupil of the College for at least a year.

III. THE HOWLAND PRIZE.—Given by W. H. Howland, Esq., late Mayor of Toronto, to the pupil (who must be the son of an old College boy) who ranks highest in his form.

III. THE MAYOR'S PRIZE.—Presented by Edward F. Clarke, M. P. P., Mayor of Toronto, for proficiency in Mathematics.

IV. THE YEAR PRIZES.—From two to five prizes, according to the size of the form, are awarded in each form to the boys who have the highest average rank as shown by the daily class marking during the year.

IV. EXAMINATION PRIZES.—These prizes are awarded in each form to the boys who rank highest at the Promotion Examination in each of the following departments: Classics, Mathematics, Modern Languages, Natural Sciences, and Commercial subjects. A boy who wins a Year prize will receive credit in the prize list for any of these prizes he may win, but he cannot hold both.

V. COMPOSITION PRIZES (either Prose or Verse).—(1) English. (2) French (3) German. (4) Latin. (5) Greek.

VI. DRAWING PRIZES.—(1) Water Color Drawing. (2) Oil Painting. (3) Free-hand Drawing. (4) Mechanical Drawing.

VII. GYMNAS TIC PRIZES.—(1) Open to all the College. (2) Under 16 years of age. (3) Special prize. (4) Fencing prize.

VIII. PHONOGRAPHY PRIZES.—Two.

COURSE OF INSTRUCTION.

The College Class-rooms can accommodate from 250 to 300 pupils; already over 8,000 of the youth of the Province have received their education in whole or in part within its walls. The number in each class is strictly limited in order that the pupils may enjoy as far as possible the combined advantages of private tuition and public school education.

The School is divided into—

- (1) THE UPPER SCHOOL, comprising the
 - Upper Sixth Form* (Senior Leaving or Honor Matriculation Classes).
 - Lower Sixth Form* (Junior Leaving or Pass Matriculation Classes).
 - Fifth Form.*
- (2) THE MIDDLE SCHOOL, comprising the
 - Fourth Form, Upper Modern and Upper Commercial Forms.*
 - Third, Lower Modern and Lower Commercial Forms.*
- (3) THE LOWER SCHOOL, comprising the
 - Second Form.*
 - First Form.*

The course of instruction consists of:—

I. The Classical Department :

In this course the College is divided into Six Forms or Grades, and the regular curriculum extends over a course of six years, though by steady application and hard study some boys are able to pass through the Six Forms in five or even four years. The full curriculum embraces an extended course in Biblical knowledge ; Latin, Greek ; Arithmetic, Algebra, Euclid, Trigonometry ; French, German, English Grammar, Literature and Composition ; History and Geography both ancient and modern ; Chemistry, Physiology, Physics, Botany ; Freehand Drawing, Vocal Music, Gymnastics, Fencing, and Drill Exercises.

To complete the Classical Course the following subjects must be taken :— Latin, Mathematics, English, History and Geography and one of the following groups : (a) Greek, (b) French and German, (c) French and one of the Natural Sciences, (d) German and one of the Natural Sciences.

Pupils may enter at any time, and at any period of the course ; the best time to enter, however, is at the commencement of the session in September, when the classes are organized for the year.

II. The Modern or Science Department :

This course includes French, German ; English Grammar, Literature and Composition ; Modern History and Geography ; Arithmetic, Algebra, Geometry, Trigonometry ; Physiology, Botany, Physics and Chemistry (Theoretical and Practical) ; Drawing (the Primary course of the Government Art School Curriculum) ; Vocal Music ; Gymnastics, Fencing and Military Drill.

To complete the Modern Course the following subjects must be taken :— Mathematics, English, History and Geography, Natural Sciences and either French or German.

To enter this Department the pupil must have passed through the First and Second Forms of the Classical Course, or must have passed the High School Entrance Examination.

It extends over a period of two years, and is a preparatory training for the School of Practical Science.

III. The Commercial Department.

The design of this Department is to afford boys intended for business a thorough grounding in the English and Mathematical subjects of the Classical

Department together with French and German, and at the same time to give them an efficient training in *Book-keeping* in all its phases possible, and a general knowledge of the routine of *Banking, Store-keeping, Shipping, Insurance, Business Correspondence*, and the *handling* of Commercial paper of all kinds. *Shorthand* will be carried up to the point of efficiency as to speed, and *Type-writing*, as practically applied in turning out commercial documents, will also be taught. The complete course will extend over a period of two years, and an effort will be made in this Department to combine all the advantages of a practical business education with the mental culture of a classical course. The qualifications for admission to this Department are the same as those required of boys entering the Modern Course, viz.:

- (1) Having "passed out" of the Second Form.
- (2) Having passed successfully the High School entrance examination, or the equivalent of these.

IV. The Musical Department.

This Department includes a training in Vocal and Instrumental Music; Harmony and Counterpoint. Arrangements have been made for instruction on the Piano, Violin, Violoncello, Flute and Piccolo, Cornet and other brass instruments. It is fully expected that an organ will be placed in the public hall before the close of the session.

V. The Art Department.

In this Department will be taken up the subjects of the Advanced Art course, and of the Mechanical course in the work prescribed for Government Art Schools.

The pupils of the Musical and Art Department must take some of the subjects of the Classical, Modern or Commercial Departments—to be selected by the Principal and Masters—so as to fully employ the time of the pupil and to make the work equivalent to the work in the other departments.

ENTRANCE QUALIFICATION.

The qualification for admission into the First or Lowest Form is the possession of a fair knowledge of English, Reading, Spelling, Writing, and the first Four Rules of Arithmetic. Pupils ought to enter the First Form at about ten or eleven years of age, though they may be received at an earlier age, if qualified, as systematic early training is very important.

Applicants for admission to the higher forms are subjected, if necessary, to an examination corresponding to the form for which their previous general studies

may have fitted them. If above fourteen years of age, they are required to present a certificate of good moral character from the Head Master of the school last attended by them.

After one week from the commencement of the term, pupils are not allowed to attend College until the fees are paid.

No deduction in Tuition Fees is made for withdrawal or absence of a pupil. An abatement of \$4 per week is allowed boarders for absence through illness for any period exceeding six weeks; the College physician in every case to furnish the certificate that sickness is the cause of the absence.

SCHOOL TIME TABLE.

9.20 to 9.30 A.M. Roll Call and prayers.

9.30 to 12.30 A.M. Classes.

12.30 to 1 P.M. Lunch.

1 to 2.30 P.M. Classes.

2.30 to 3.30 P.M. . Detention for idleness, misconduct, or badly prepared lessons.

THE BOARDERS.

Occupy the houses of the College building, and are under the immediate supervision of the Principal and the Dean of Residence. In each house there are from 20 to 30 boys, presided over by a resident Master. The system adopted is that of single or double bed rooms, furnished in a substantial home-like manner. The bedsteads are made of iron, furnished with steel woven spring mattresses, also a horse hair mattress made especially for the College, of the best quality. The health and comfort of the boys are looked after by an experienced matron. There are spacious and comfortable quarters, isolated from the rest of the boys' rooms for sick boys who will be under the immediate care of the matron. All the boarders except the senior boys prepare their work in the presence of the masters, whose duty it is to supervise and direct the boys in their studies. Boys in the Sixth Forms, as a rule, are allowed to prepare their work in their own rooms.

On Sunday, all boarders, whose guardians do not object to it on religious grounds, receive instruction in the College Sunday Schools; a class for the study of the Bible will be held every Sunday morning before church; and in the evening at 9.30 o'clock, when all the boarders must be present, there will be a service chiefly musical in the College Hall.

For the convenience of boarders living at a considerable distance, it has been arranged that they may remain in the building during the vacation at Christmas and Easter; but a special charge of four dollars and a half per week will be made in each case.

The boarding house is conducted as an integral part of the institution, and the charges are as low as is compatible with the liberal style in which the establishment is conducted—profit not being the object, but the supplying of a need felt by the country at large; namely, a well managed boarding house, in which, while the boys enjoy all the advantages of the educational system of Upper Canada College, their parents may feel confident that the physical and moral culture of their sons is a subject of serious attention.

Every boarder is required to bring with him a certificate of good conduct from the Master or Tutor under whom he has been previously educated. The enumeration of the contents of his wardrobe is to be given to the Matron. *One month's notice is expected before the removal of any pupil.*

A limited number of Day Pupils residing at a distance from the College may have the privilege of lunching at mid-day in the College Boarding House on paying \$9.00 per term.

MILITARY DRILL.

A Drill Association is organized among the various forms of the school; boys over 14 years of age, who are qualified physically for the work, may join the Rifle Company—a uniformed infantry company formed in accordance with the regulations of the Militia Department of Canada, and under the supervision of the Deputy-Adjutant General of Militia. The cultivation of an erect bearing, of a spirit of proper subordination to authority, and of a manly *esprit de corps* is the design of this department. The uniform, which each member purchases for himself, consists of a dark blue shell jacket trimmed with white; trowsers same material; Forage cap with College badge. The company is furnished, free of charge, with belts, bayonets and the Peabody rifle. The armory is thoroughly fitted up with racks for rifles, and lockers for clothing are also provided, and a bugle band will be organized among the boys belonging to the company.

THE PAUL E. WIRT FOUNTAIN PEN.

WRITES LIKE A LEAD PENCIL.

THE CENTRIC PEN

An instrument free from every objection which has ever been urged against pens and penholders. The advantages claimed are :

- 1.—It will not cramp the fingers.
- 2.—It writes with the rapidity and ease of a pencil.
- 3.—It may be laid down without risk of blotting.
- 4.—It will not ink the fingers.
- 5.—Its flexibility is superior to that of any other pen.
