IMPERIAL REMEDIES

Estey & Curtis Co. of Hartland
Have Fine Store and a Splendid Proprietary Line

While in Hartland the other day the Victoria Observer man visited the establishment of Estey & Curtis Co., Ltd., and was rather surprised to see a business of such magnitude in this line in a country village. The business was established in 1896 and S. S. Miller has been the manager since the start. He has succeeded admirably. The firm bears the name of two local physicians, who originally held large interests in it, but since incorporation practically all the stock is controlled by Mr. Miller. This gentleman was very courteous in showing the editor around, for he

is a firm believer in advertising and knew that The Observer reached the people he wanted to sell to.

While the company started business in rather cramped quarters, they three years ago acquired a well-located brick block of three stories and basement, making four spacious floors. Adjoining is another large building devoted to their use and owned by them.

The street floor is the retail and dispensing departments. This comprises the finest drug store we have ever seen in a village the size of Hartland and compares favorably with the stores in large cities. Large plate glass windows front on two streets. The retail department has ample room for displaying goods and this is done with good taste and a strong appeal to customers. All the lines of goods usually carried in a drug store are here, as well as stationery, books, magazines, newspapers, cameras, fountain pens and many other special lines. F. A. Aiton, who has been with the firm during all the years, commencing work as a schoolboy, is chief of this department. He is a graduate of the Ontario College of Pharmacy, is a Bachelor of Pharmacy from Toronto University, and a member of the N. B. Pharmaceutical Society. He also holds diplomas from the Ontario Optical College and remedies defects of vision so far as glasses can do it with such skill that it is the boast of the company that they "have not one dissatisfied customer."

The dispensing department is lighted from the street by a large plate glass window and is one of the best appointed laboratories in the province. Estey & Curtis Co., however, consider the retail and dispensing business as comparatively a side line. Their wholesale business is a tremendously greater turnover. In a wholesale way they handle all kinds of drugs and druggists sundries, all the lines they retail, G. B. chocolates and confectionery, wrapping papers and stationery, cigars and tobacco and certain lines of grocers' specialties, including cream of tartar, spices, etc.

What Mr. Miller is most proud of is the success of the Imperial Remedies. These are more than a score in number and are added to just as often as a really meritorious formula is discovered. Who has not heard of Imperial Cough Syrup, Imperial Headache Capsules, Imperial Emulsion, Im-

perial White Liniment? Through New Brunswick and Quebec these medicines are famous, and it was made plain to The Observer, that all were of high merit and none contain deleterious ingredients. Imperial Flavoring Extracts are said to be sold more extensively than all others in the territory mentioned. Dominion analysis discloses them to be stronger than any others and absolutely pure.

With a great deal of careful research Mr. Miller evolved National Stock Food, which has all others "skinned a mile" if a great number of comparative testimonials are to be trusted. It would require columns to do justice to the Imperial and National preparations, if all The Observer saw and heard is true - and Mr. Miller had pretty good evidence to back up his assertions. He convinced The Observer, and the growth of business is evidence that others have been and are being convinced.

W. H. Drake represents Estey & Curtis Co. in the northern part of the province and in Quebec. By constant hustling he is able to get over his territory once every two months. He is a frequent visitor to all the Victoria county towns.

This enterprise is a good thing for Hartland, since it gives employment to two dispensing clerks, two packers, a corps of girls in the laboratory where the remedies are compounded, bottled, labelled and packed, while the business office hums with activity long hours every day.

Watch the columns of this paper for regular announcements from Estey & Curtis Co. Their preparations are on sale at practically every village and cross-roads store in Victoria county.

Coldstream East

Rev. P. J. Quigg held service at Bannock Sunday morning.

On the afternoon of Friday a number of relatives and friends met at the home of Mr. and Mrs. J. D. Cook on the occasion of celebrating their twenty-fifth anniversary. A number of nice presents were received.

Mrs. James Greer and son Ralph attended the U. B. meetings at Centreville; also a number of others from this place.

Harold Shaw met with quite an accident Sunday morning. While riding a bicycle he accidentally fell and was unconscious some time. Two boys were walking along and found him lying beside the road. They got a team and took him home. But we are glad to know he is able to be at work again.

Willie Luskey and family have moved into their residence again for the summer.

Guy and Horace Mean spent Sunday with their parents, Mr. and Mrs. Robert Mean.

Mrs. Charles went to Hartland on Monday to work for Mrs. Rupert Harris, who is in the hospital at Woodstock.

K. of P.s. Elect Officers

On Tuesday evening Brighton Lodge, Knights of Pythias elected the following officers: Rex York, C. C., W. M. Nodden, V. C., Frank Shaw, M. of E., V. F. Nodden, K. of P. and M. F., Rev. T. J. Wilkinson, prelate, Geo. A. Stevens, M. of W., A. A. Mooers, M. A., Geo. Henderson, I. G., Ivan Hovey, O. G.

Born - at Andover, on June 10, to Mr. and Mrs. Wm Matheson, a daughter.

PILES

Do not suffer another day with itching, bleeding, or protruding piles. No surgical operation required, and as certainly cure you. etc. a box, all dealers, or Edmanston, Hales & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 3c. stamp to pay postage.

ALLEGED MURDER AT FLORENCEVILLE

The story of the death of Fred Green of Fielding, coming out last week, is of shocking nature, and Charles Smith and Stephen Derrah of Greenfield are in jail charged with the murder of the man.

It is presumed Green was killed and thrown over the Florenceville bridge, or was thrown over alive, or in a drunken row fell over and was drowned. The body was found at Sugar Island several weeks ago and was unidentified up to last week, when Aaron Green recognized the remains as those of his son, Fred.

The Gleaner gives the following interview with the elder Green:

Aaron Green was almost a complete nervous wreck when he returned to Fredricton, yesterday afternoon after visiting the little country burying ground at Douglas, known as the Hawkins cemetery, where the remains were exhumed and identified.

"There is not a shadow of doubt that it is my eldest son, Fred. I intend to have somebody pay the penalty for his death for the information which I have secured the past few days shows that he must have been murdered."

Mr. Green gave The Gleaner all the details of the story in connection with the young man's disappearance. Fielding, where the family lives, is about three miles back of Bristol, in the northeastern end of Carleton county, and Fred Green left there about May 7 or 8, to go to Bristol to work for a few days. The following evening he went from Bristol down to Florenceville, ostensibly to attend a moving picture show, and some time that night met his tragic fate, as the next morning portions of his clothing were picked up in a pool of blood on the bridge across the St. John river there.

Nothing was known by Mr. Green, or other members of the young man's family of the finding of Fred's clothing until a few days ago, although the owner of the articles was pretty generally known about Florenceville. It is said. At first Mr. Green and his wife thought their son had gone away to work in the woods or on some drive for a short time and that he would turn up all right, as usual; but when a month passed and nothing was heard from the boy, his relatives became apprehensive and Mr. Green started an investigation as best he could.

He went to Florenceville, but some-how or other nobody there would talk with him very much about the case until finally he came in contact with a 9 year old girl, the daughter of Mrs. George Kenney, who lives at the end of the Florenceville bridge. The girl gave him the information he desired. She told him that on the morning following the evening that Fred Green was in Florenceville a blue coat and a tan shoe had been found in a pool of blood on the Florenceville bridge by William Hopkins, a driver employed by B. Frank Smith, M. L. A., in connection with his hay presses. Mr. Green went to the Hopkins home and there identified the coat and shoe as those worn by his son when he left his home.

That showed Mr. Green that his son had evidently been the victim of foul play and this was corroborated when Mrs. Kenney told him that she heard Charlie Smith, of Greenfield, who had been with Steve Derrah, of Gordonsville, and young Green earlier in the evening, declare late on the night in question that he (Smith) would kill Green if he could find him alive before morning. The bereaved father's theory is that Smith killed Fred Green on the Florenceville bridge and threw his body into the river, and he claims that from other sources he has corroborated Mrs. Kenney's statement to the effect that his son spent part of the evening in question with Smith and Derrah.

A sharp eye tooth on the left upper jaw, a white button which his mother had sewn on his un-

A Remarkable Will

The will of Charles Lowmberry, a noted Chicago lawyer, who died in Cook's Asylum—

I, Charles Lowmberry, being of sound and disposing mind and memory, do hereby make and publish this my last will and testament, in order, as justly as may be to distribute my interests in the world among succeeding men.

That part of my interests which is known as law and recognized in the sheep-bound volumes as my property, being inconsiderable and of none account, I make no disposal of in this my will. My right to life being but a life estate in not at my disposal; but these things excepted, all else of the world I now proceed to divide and bequeath.

Item 1.—I give to good fathers and mothers in trust for their children, all good little words of praise and encouragement, and all quaint pet names and endearments; and I charge said parents to use them justly but generously as the needs of their children shall require.

Item 2.—I leave to children exclusively but only for the term of their childhood all and every, the flowers of the field, the blossoms of the wood, with the right to play among them freely, according to the customs of children; warning them at the same time against thistles and thorns, and I devise to said children, golden sands beneath the waters thereof, and the odors of the willows that dip therein, and the white clouds that float high over the giant trees, and I leave to the said children the long, long days to be merry in, in a thousand ways, and the nights and the moon and the train of the milky way to wonder at, but subject nevertheless to the rights herein after given to lovers.

Tribute to Boyhood.
Item 3.—I devise to boys jointly, all the useful idle fields and commons, where ball may be played, all pleasant water where one may

swim, all snow-clad hills where one may coast, and all streams and ponds where one may fish, or where, when grim winter comes, one may skate, to have and to hold the same for the period of their boyhood, and all meadows with the clover blossoms and butterflies thereof, the woods and their ap-puntenances, the squirrels and strange noises, and all distant places which may be visited, together with the adventures there found. And I give to said boys each his own place at the fireside at night, with all pictures that may be seen in the burning wood to enjoy without let or hindrance and without any incumbrance of care.

Item 4.—To lovers I devise their imaginary world with whatever they may need, as the stars in the sky, the red roses by the wall, the bloom of the hawthorne, the sweet strains of music, and aught else they may desire to figure to each other the lastings and beauty of their love.

To the Young Men.

Item 5.—To young men jointly I devise and bequeath all boisterous and inspiring sport of rivalry and I give to them the disdain of weakness and undant confidence in their own strength. Though they are rude I leave to them the power of making lasting friendships and to them exclusively I give all merry songs and brave choruses to sing with lusty voices.

Item 6.—And to those who are no longer children or youths or lovers, I leave memory and bequeath to them the volume of the poems of Burns and Shakespeare and of other poets, if there be others to the end, that they may live and old days over again, freely and fully, without title or diminution.

Item 7.—To our loved ones with growing crowns I bequeath the happiness of old age and the love and gratitude of their children until they fall asleep.

THE WAY OF THE AGGRESSOR.

The French Review of the War Rises to the Rank of Literature.

Nothing more illuminating has been published upon the trend of the war than the French official review which is appearing in instalments in the newspapers. Those clear and lucid summaries rise to the rank of literature when the reviewer quotes German diaries and letters taken from captured and dead soldiers. Ultimate German victory was at first part of the consciousness of every German soldier. "At the moment of the battle of the Marne," says the reviewer, "the first impression was one of a failure of comprehension and of stupor." But as the retreat continued, a process of conversion began to set in in the German mind. The vast Teutonic force, in the pink of condition, with almost half a century of preparation, was actually shaken and turned back. The official expressions of victory no longer re-echoed in the minds of the fighting soldiers. The battle of Calais, which was in reality no nearer Calais than the Yser, with its terrific loss of probably 300,000 Teutons, seemed to stagger the German mind.

The failure of the capture of Warsaw completed the disillusionment. "Until during the last two months," says the report, "the most intelligent of the prisoners have all admitted that no one could any longer say on which side victory would rest." And recently letters seized on a dead officer speak of "the imminence of a military and economic hemming in of Germany." They discuss "the possibility of Germany finding herself after the war with empty hands and pockets turned inside out."

On January 18 an officer of

the German General Staff, captured, said: "Perhaps this struggle of despair has already begun." Perhaps it has! That is the way of the aggressor. No such struggle of despair can ever set in in the hearts of the scanty Belgian soldiers who have fought valiantly a losing but a glorious battle of sheer defence. Despair is the just part and lot of the aggressor; and despite all our sympathy for the hosts of honest and hard-working Germans who never sought war, who hardly know what they are fighting for, we cannot but feel satisfaction that a sin against the human race should be so fully and certainly punished on earth; that the way of the aggressor should be made hard and perilous, be his name Napoleon or Wilhelm; that the wages of arrogance should be despair and defeat.

Not What She Expected.

The teacher was giving her class of little ones a party, and after they had tested their eating capacity to their utmost it was proposed they should play "menagerie." To this the youngsters agreed readily. The teacher having nominated each one a member of a curiously assorted "menagerie," she espied one little boy sitting all alone in a corner not attempting to join in the game. Now, Bobby, having consumed his fifteenth cake at tea, was in consequence not feeling very happy, and when asked if he would take the part of an elephant he jerkily answered, "No." "Will you be a rhinoceros or an elephant?" asked the teacher. "Well, he would not be either. 'Well, what will you be?' 'I'm—be-sick in a minute,' was poor Bobby's answer."

Grease spots may be quickly removed from clothing with the aid of a small pair of scissors.

Building Good Roads

It costs the average Canadian farmer two dollars a ton to haul produce to the market town, to the railway station or lake port. It is known that the production of field crops alone amounts to about 40,000,000 tons a year. It would be moderate to estimate that 25,000,000 of this tonnage is hauled over roads, one way or another; so we have \$50,000,000 as cost of teaming field crops by the farmers. This cost could be reduced if we had first-class roads to \$20,000,000, a saving of 60 per cent., leaving \$30,000,000 as a saving on one class of product alone.

The building of good roads would increase the value of taxable lands not only in the vicinity of cities but also in the most remote parts. Stupendous amounts could be collected in taxes, and the assets of the nation, as well as the landhold, would increase. New towns would spring up; new railway branches would be built, and Canada would be settled and developed at a miraculous rate.

Our convicts could be profitably employed building roads. Of course, it is useless to have them constructed unless carried on in a

systematic and scientific way. The roads must be "graded, topped and rolled." They should be constructed so that water will quickly drain off and so that the greatest applied pressure will not force open the foundation and cause mud to ooze up and rut to be renewed.

Well-constructed roads shorten distance by reducing the time of travel. They would give rise to a further exploration of sparsely settled districts and would result in the discovery and shipping of more mineral and timber wealth.

I feel confident that smooth, hard roads would mean more to Canada than any other project. I believe that a remarkable awakening, a renaissance, would take place. The economic and national advantages that would ensue are incalculable. The energetic settlement and development of Canada would swell the treasury and the country would enjoy an era of prosperity unequalled in its history. Good roads in Canada would mean a higher standard of citizenship, a people pervaded by education and good morals, and a better understanding and a mutual sympathy between the diverse people in the Dominion.

Austrian Soldiers Repair Bridge in the Carpathian Mountains.

A unique photograph of a bridge in the Carpathians which was blown up by the Russians to cut off the Austrians. The picture shows the Austrians at work repairing the structure.

BENEFITS OF FRESH AIR

Hygeia, a young lady of wide popularity at the present moment, has transformed old Demon Night Air into a good fairy who brings her gifts of clear eyes, radiant complexion, rested nerves and healthy appetite. Old Demon Night Air is no longer death, but life and health. He is a good physician whose services are gratis to those who seek them.

The hygienic friend imagines that she is the one who discovered fresh air. All glory to her. She drinks it, eats it, lives on it, and swears by it. And the headaches that previously plagued her painful ridges in her scintillating nature have dissipated themselves. She no longer belongs to the society of lazy breathers whose lungs are dust bins; she rinses her breathing bellows with clear, fresh air.

It is said that improper breathing, the first cause of diseases of the lungs, is responsible for four-fifths of all indispositions, ill health and actual sickness among civilized people. This general lung weakness is a product of modern civilization and our unhygienic manner of living. Thorough and constant ventilation of the lungs is absolutely essential to a strong heart, a vigorous, healthy circulation and the power of tissues to resist disease. Since most of us are too indolent to exercise freely in the open air, spending most of our waking hours in poorly ventilated houses, public conveyances or public assembly rooms, we can drink of the good fresh atmosphere when we sleep.

Camping Out at Home.

The interest in outdoor sleeping has become keen. If you reside in an old-time house, make a sleeping apartment of the back porch. It is no trick at all, and you can rig up a fine little camp. The stores are well equipped to supply you with everything you may need in the way of comfortable furnishings. Your investment will pay you many times over. Instead of awakening with a before-breakfast groan and a heavy, dull head, you will open your eyes to a day that is like a new experience. Work will look like good fun. The worries of yesterday will be relegated to the everlasting dust heap of the forgotten past. The universe will be quite to your liking, which is very pleasant, indeed, since none has ever been able to change it.

Ozone Makes the Fat Thin.

A swinging couch with protecting side, foot and head of canvas is as comfortable as any bed, being supplied with good springs and mattress. Until very warm weather arrives one should wear the woollen sleeping suit which covers the body from topknot to toe, allowing no chilly breezes to skip down the back of one's neck like an invading icicle, and which is even aided and abetted by fleecy gloves. Unless the sleeper is thoroughly warm and comfortable sleep will not be restful. Paper sheets placed beneath the mattress are a help. A hot water bag or an electric heater is necessary in extreme weather. Even in the warmest season a woollen gown should be worn as a precaution against sudden change of temperature.

Any woman who takes the trouble to learn something about the respiratory and circulatory system of the human body will become enthusiastic about sleeping in the open air, for the wisdom of it is apparent.

She will appreciate four fundamental facts—that the thorax is a distensible air-tight cage; that it contains and is filled by the heart, lungs and great blood vessels; that the exchange of gases in the blood takes place in the lungs; and that the development of the chest and respiratory muscles depend the development of the lungs and the force of the circulation.

Deep breathing and unlimited fresh air are the finest of all figure-developers. The sunken chest, prominent collar bones and seraway

neck will respond almost at once to outdoor sleeping. Frazzled nerves will be quieted. For the corpulent females it is a godsend, since oxygen burns up fat cells. Fresh air both develops and reduces, because it brings one to normal.

You Want Bright Eyes!

The lungs are the ventilators of the body. They consist of air cells, surrounded by dense plexuses of capillaries and nerves. The woman who pays no attention to her breathing merely sends air into the topmost cavities, which means that the lower ones are positively starving for oxygen. This lazy respiration impoverishes the blood. The result is often the gray, ashen complexion of the sorrowful, bilious one; the dull, listless eyes and soft, unhealthy muscles.

The lack of thorough distension and aeration of every part of the lungs is a cause of weakness of the lungs themselves as well as every part of the body, since those parts that are inactive are inviting to herculean, pneumonia and a trail of miserable human ills. Also the quality of food one eats is not half so important as the purity of the air one breathes. Anemia and emaciation are often produced by air hunger. The lungs must have fresh oxygen for the purpose of filtering or purifying the blood. If the blood is thin and poor the entire physical system suffers.

The woman who is always cold can breathe herself warm by standing before an open window and inhaling and exhaling slowly.

Where Nightmares Come From.

One great advantage of outdoor sleeping is that it is usually dreamless, as all healthy, restful sleeping should be. Dreams require a certain expenditure of nerve force and mental energy. While nightmares are generally associated with indigestion and late supper, they are more often caused by rebreathing foul air that gathers like an atmosphere blanket over the bed. With the winds blowing about your couch you may be sure that your air supply is first-class and guaranteed.

Domesticate Fur Bearing Animals.

Notwithstanding all the art and artifices of the fur dresser, the supply of good fur continues to decrease and one fact stands out clearly, namely, that to meet the demand we must domesticate and breed our fur bearing animals and no longer rely on hunting them. This change is to be welcomed for humanitarian reasons as well as for many others, since the most atrocious cruelty is perpetrated on our wild animals in almost every kind of trapping, the creatures often lying not only for hours but for days with crushed and broken limbs, maimed and smashed before the hunter arrives and finally relieves their suffering or some other animal finds them and tears them to pieces.

Furs can, of course, only be produced under certain climatic conditions and these are nowhere more favorable than in our Dominion. The breeding of fur-bearing animals is an industry of great promise which should, if carried on in a conservative and rational manner—as any other industry must be to meet with success—have a great future in Canada and be an additional source of wealth to the Dominion. It is not generally recognized that a number of the more important of these animals are being bred in captivity—several of them in Canada—with success, although as yet only on a small scale. Among these are foxes of several varieties, mink, martens, fisher, Russian sable, beaver, muskrat, raccoon and skunk. The skins of the animals bred in captivity bring a higher price in the market than the skins of the same animals taken in the forest.

Customer—Waiter, this is the first tender steak I've ever had in your shop.

Waiter—My goodness! You must have got the giv'nor's.

FROM MERRY OLD ENGLAND

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

Owing to the war restricting shooting operations and beagling, there are thousands more hares than usual and consequently greater wastage of crops.

The price of bread has now been raised throughout London to 17 cents for the quarter (4-lb.) loaf. This makes the total rise since the war began 5 cents.

Lieut. General Samuel Holt Lennox, C.B., who served in the Kalenfir and Zuln war and fought at Ulindi, has died in a London nursing home at the age of fifty-nine.

A class for charwomen has been started at the Domestic Economy Training Centre at Islington, instituted by the Central Committee on Women's Employment.

With Major-General Lord Chelmsmore as president, a L.C.C. staff volunteer training corps has been formed, and it is hoped to furnish a complete battalion 1,000 strong.

A resolution protesting against

any proposal to introduce women conductors into London County Council tramway cars was passed at a meeting of tramway workers at Hackney.

While going to get the men's breakfasts, Private Fox, 9th Middlesex Regiment, on duty at Hayward's Heath, stepped on the line, and was killed by the Brighton London express.

The Lord Mayor of London presented the captain of the Thorata with \$1,650, his share of the reward offered for the first unarmed British merchantman to ram a German submarine.

Introducing the Dasheen.

The dasheen, a comparatively new edible, threatens the supremacy of the potato. It is being cultivated in Florida with much success and with much profit to its cultivators, according to the Fruitman's Guide.

The dasheen stalks grow to a height of from four to six feet. The plant has shield-shaped leaves, not unlike elephant's ears. Each hill of dasheen contains one or two large spherical corns, which grow to five pounds in weight; round them are developed numerous tubers. Both corns and tubers are like the potato in composition, but they contain less water. One plant will produce from four to ten pounds of tubers in good rich soil. Both corns and tubers have an agreeable nutty flavor, and are easily digested.

The cook can serve a dasheen in the same way that she serves a potato, and she can also prepare the blanched shoots, tossed from the corns in hot butter, as she does asparagus. The leaves, when tender, will take the place of spinach. Perhaps the dasheen will be a familiar vegetable in our markets before long.

RHEUMATISM ARRESTED

Many people suffer the tortures of lame muscles and stiffened joints because of impurities in the blood, and each succeeding attack seems more acute until rheumatism has invaded the whole system.

To arrest rheumatism it is quite as important to improve your general health as to purify your blood, and the cod liver oil in Scott's Emulsion is nature's great blood-maker, while its medicinal nourishment strengthens the organs to expel the impurities and rebuild your strength.

Scott's Emulsion is helping thousands every day who could not find other relief. Refuse the alcoholic substitutes.

Vol. VII. JUNE 24, 1915 No. 2

SPECIAL NOTE

All subscribers to The Carleton Observer who reside in Victoria Co. have been transferred to the list of The Victoria Observer, and will thenceforth receive that paper instead.

A Woodstock despatch says that Mr. A. R. Gould read the riot act at a meeting of Tory henchmen and hangers on in that town a few days ago. He is said to have intimated that unless there was something doing in the very near future with respect to the Valley Railway he would deal with the matter in a way that would echo from the noble St. John through the provinces of Quebec and Ontario, across the great lakes and broad prairies of the west, over the snow-capped peaks of the Rockies to the Island of Vancouver which is washed by the waves of the Pacific. Mr. Gould's intimate knowledge of the crookedness of the local government has cost him a lot of money in addition to endless worry and loss of sleep, and should he cut loose there will certainly be wigs on the green with our number. It is becoming more evident as each day goes by that the Valley Railway problem is altogether too weighty for a moribund government to grapple with successfully.

Some eminent political purists met in secret conclave at Woodstock on Sunday to consider the case of Ex-Premier Fleming. It seems that Mr. B. Franklin Smith when he re-entered local politics labored under the belief that he was going to land a portfolio. In this, however, he was grievously disappointed and now he would like to get back his old job as Federal Tory candidate. Just how to get rid of Fleming is the big problem which is worrying the Tory bosses at the present time. It is said that Hon. Mr. Hazen has announced that he will maintain an attitude of strict neutrality in the matter.—Mail.

\$8.00 WORTH OF ANY
STICKY FLY CATCHER

Miss Edna Knowles with a lady friend was in town Saturday coming over by auto.

Mr. and Mrs. Gaines of Aroostook Junction spent last Sunday in town with Mr. and Mrs. Geo. Davis.

Geo. E. Baxter and Miss Miriam Baxter went to Woodstock last Monday.

Miss Grace Porter is visiting friends in St. John for a few weeks.

Mrs. Mame Fraser of Easton came to Andover last week to see Mrs. Sarah Williams who has been quite ill, but who is now recovering.

Miss Gertrude Kilburn is spending a few days in town.

Mrs. George Davis and Mrs. G. Porter served tea to the tennis club Saturday afternoon.

Mrs. William Matheson is receiving congratulations upon the birth of a baby girl.

Mrs. Archie Dickinson and little son, Lawrence of St. John are guests of Mr. and Mrs. Henry Baird for a few weeks.

Mrs. T. Baird, Mr. and Mrs. Fred Baird and Mrs. Herbert Baird motored to Fort Fairfield Wednesday afternoon.

Mrs. W. H. Squires of Upper Kent is spending a few days in town with her sister, Mrs. H. A. Howard.

Rev. Mr. Bell returned from St. John last Wednesday.

Mrs. Bert Graham and children from Ottawa spent a few days recently with J. W. Niles.

Miss M. I. Baxter and Mrs. W. A. Gillett were at Fort Fairfield last Tuesday.

H. H. Tibbitts and LeBaron Anderson spent a day or two recently at Three Brooks dead water fishing for trout.

Master Kenneth Barker of Dover, Maine, is visiting friends in Andover and Carleton Place.

Mrs. E. S. Hopkins and Miss Ryan drove over from Fort Fairfield Thursday and were guests of Miss Sarah Watson.

J. W. Withers of Fort Fairfield passed through Andover en route to Kilburn last Wednesday.

A MILLION DOLLARS IN NEW BUILDINGS

Spent in Past Year by Canadian Ford Company—in Montreal, Toronto, London and Ford, Ont.

Ford, Ont., June 19, 1915.—With the opening of its new factory addition here this month, the Ford Motor Company of Canada, Limited, has completed a building plan in which over a million dollars have been spent within the past year. Beside the factory addition, this includes new branch buildings and assembly plants at Montreal, Toronto, and London.

All of these buildings have been completed since the first of this year. The Montreal building costing \$250,000, opened its doors on January 23, when it housed the annual Montreal Motor Show. The Toronto branch building cost over \$352,000 and was opened late in February. It is one of the handsomest commercial buildings in Toronto. The London building cost \$140,000 and was ready for use March 17th. Now the home factory addition at Ford, Ont., which involved an expense of \$300,000 is practically completed.

The building of the present addition to the Ford plant added 130,000 square feet of floor space, bringing the total space up to more than nine acres. The service department was the first to be installed in the new building. Several of the executive departments will follow in a few days. These will occupy the commodious quarters on the sixth and fifth floors of the new section. There are many modern improvements, including new lunch rooms for both men and women employees. A novel feature will be a motion picture theatre, and all factory visitors will be shown interesting

NO ALUM

films depicting the Ford car in the process of manufacture, the Ford system of assembly by means of a mechanical conveyor, and other subjects.

One of the outstanding features of the enlarged Ford plant is the huge dome-like building made almost entirely of glass and steel which runs along the west side of the new addition and towers higher than the sixth story. This is a crane-way built over railway tracks. Freight cars loaded with raw materials enter this building and an electric crane lifts the supplies to cement balconies on the various floors where they are wanted. This takes the place of freight elevators and is a time and labor saving system.

So great has been the growth of Ford business in the last season and so confident have Ford executives become in the unlimited possibilities of Canada's industrial future, that Ford expansion will continue. Already plans are under way for buildings of equal magnitude in Winnipeg and other branch cities, and these will be started in the near future.

PERTH NEWS

Born—at Kintore, on June 12, to Mr. and Mrs. John Patterson, a son.

Florenceville played Perth in a rattling game of baseball on the C. P. flat last evening.

Little Elsie Baker, daughter of Mr. and Mrs. Wm. Baker, who was brought here for treatment last week, was sent to Woodstock hospital on Friday.

George Larlee, for some time in the service of the telephone company at Andover, has gone to Edmundston to assume the position of local manager there.

A bad accident was narrowly averted last Saturday afternoon, when a horse attached to a buggy and driven by a lady, started to back towards the river bank nearly opposite the post office. Before any of the bystanders could seize the reins the animal had backed the vehicle over the bank, but a post providentially interposed and prevented the whole outfit falling over.

An interesting nuptial event took place at Wapeke on Wednesday morning, when Edith, daughter of Mr. and Mrs. John McNair, was united in marriage to Harold Green, Fredericton, by Rev. Archie Hatfield, of Plaster Rock. Only the immediate relatives were present, including Mr. and Mrs. Henry Green, Perth. The bride and groom left on an early train on a honeymoon trip. They have the best wishes of many friends in this section.

Perth defeated Plaster Rock in a nine-innings game of baseball here last Saturday afternoon. The score was 5 to 4 in favor of the home brews. Two accidents marred the pleasure of the game, Graydon McCrea badly broke his leg in the first inning in sliding to base, and Harry Mallory had his thumb nail torn off while pitching in the fourth inning. Bishop did his usual good work on the mound, as did also McPhail, who relieved him. Both Mallory and Charlie Raymond did stellar work behind the bat. Street Innman of Perth, gave general satisfaction as umpire.

East Florenceville.

Mrs. Theo. Shaw who is on the sick list is gaining slowly.

Miss Erma Everett who has been visiting friends in the village has returned to her home in Waterville.

Mrs. Robt. White of Centreville

spent Sunday with her mother, Mrs. B. F. Smith.

Miss Grace Tompkins is visiting in the village.

Our Base Ball Boys did fine at Perth. We hope the girls who now have a team will do as well.

Mr. and Mrs. Hiram Banks were callers in the village last week.

Rev. G. A. Ross who has been attending conference in St. John returned home on Thursday.

Miss Jean Kilpatrick, Miss Phoebe McLean and Miss Erma Everett spent last Wednesday with Mrs. Edgar Kilpatrick at Wicklow.

Miss Gladys Semple who has been away for some time has returned home.

Mr. Samuel McMullin who has been ill for several weeks left on Tuesday for the hospital in St. John. Harry Smith and daughter Madeline accompanied him.

Miss Della McIsaac of Wicklow is visiting in the village.

Alonso Taylor has started the frame of his new barn.

Mr. and Mrs. James McLean, Summerfield, were callers in the village on Tuesday.

A Complaint

Mr. Editor: There is a sewer in the rear of the post office which has its outlet about fifty or more feet from the river and the odors from it are anything but pleasant, to say nothing of its menace to the health of the people living in the vicinity. The sewer should be extended so that its outlet would be covered at extreme low water.

Sanitary

Arrange your dates so you can attend the

Big Picnic

at Burr's Flat, which will be given by the Band. There will be a good time in the old town on

JULY 1st

with lots of sports, plenty of good music and a big feed of those delicious beans cooked in the old-fashioned bean hole, together with plenty of other good things to eat. Don't forget that all this takes place at

Hartland

and that admission to the grounds is only 15 cents for adults and 10 cents for children under 12. The big feed at 6 o'clock will only cost 35c

The Most Popular Girl

in the Parish who attends the picnic will get a handsome prize, the award to be made at the Lyric in the evening.

Eastlake Steel Shingles

The Oliver Kiding Cultivator stands in a class by itself, by reason of the fact that it is built right, with larger range of adjustments so it can be adapted to do good work under all conditions in the potato field. Oliver quality has a name the world over.

In Aroostook County alone sixty-five per cent. of the Potato Cultivators used are Oliver's.

The feature of the Oliver Cultivator that appeals to all farmers who have used it or have seen it at work is the excellent work that this implement does. By an ingenious arrangement the gangs are held parallel, and therefore always cut a uniform distance apart, no matter how far they may be shifted to the right or to the left. On the Oliver Cultivator neither of the gangs leaves an uncultivated strip between the shovels, nor does one gang cut a narrower width than the other when the cultivator is shifted to the side.

For catalogue and further information apply to the nearest local agent. Also carry the following:

Local News and Personal Items

Band Picnic next Thursday.
Mrs. A. L. Baird has returned from Bangor.

S. S. Miller was in St. John last week.

Remember, "your king and country need you!"

Mrs. Fred Dickinson is ill at the home of her son, Arthur.

Rockland Baptists are calling for tenders for repairing their church.

Mrs. Theo Shaw has been very seriously ill at her home at East Florenceville.

Mr. and Mrs. Cox of St. John have been visiting Mr. and Mrs. Henry Bradley.

Mrs. B. E. Tompkins will spin at her home at River Bank for 2 cents a knot.

Dr. Jewett's office at Hartland will be closed until Aug. 2, and at Bath until Aug. 4.

Miss Miller of Woodstock was a guest at the home of W. H. Sipprell over Sunday.

Archie Stevens, of the Royal Bank staff, Woodstock spent Sunday at his home here.

Mrs. H. C. Hunter of River Bank has been visiting her daughter, Mrs. C. H. Taylor.

Mr. and Mrs. Willard Hunter of River Bank spent Sunday with his sister, Mrs. C. H. Taylor.

Miss Dora Hayward of Edmundston has been visiting her parents, Mr. and Mrs. C. E. Hayward.

On Friday afternoon Perta will play Florenceville a return game of ball on the Florenceville diamond.

Miss Bessie Cheney of Fort Fairfield is visiting her aunt, Mrs. Ed. Caverhill of Upper Brighton, for a few weeks.

J. T. G. Carr has still some Grain Fertilizer on hand and may have some more Timothy tomorrow. First come, first served.

Keith & Plummer Ltd. offer a pair of good working horses cheap, and on time to good parties; also a double wagon and harness.

Word of the safe arrival in England of Lieut. L. de C. MacIntosh, M. D., was heard here on Monday with much pleasure and relief.

Cyr Violette can supply engagement rings, wedding rings, the wedding suit, wedding presents, and the marriage license. See the ad elsewhere.

The pointer got busy with C. E. Allen's harmless little dog on Sunday evening, and all but put an end to it. Prompt and extreme measures brought the dog around.

The examination of Charles Green and Stephen Derrah, charged with the murder of Fred Green, is postponed until Monday next in order to secure witnesses.

William Clements' house at Danville was totally destroyed by fire on Friday. Most of the household goods were also destroyed, but there was some insurance.

Owing to Thursday being a holiday The Carleton Observer will go to press on Wednesday next. All ads should be in on Monday and no locals can be accepted after Wednesday noon.

Mr. and Mrs. Fred J. Boyer, McLeod Boyer and their guests, Mr. and Mrs. Blanchard Fowler of St. John, have started on what will undoubtedly prove a most pleasant auto trip, going to Montreal, Ottawa, Boston and return.

Another meeting of ratepayers of the Hartland school district will be held in the hose house Monday night at 8 o'clock, sharp, to take action on the scheme of amalgamating the Hartland and Somerville districts.

There was a meeting of the ratepayers in Somerville school district on Monday evening to discuss union with Hartland district. A majority seemed to favor the idea, as the union will provide a better school and no higher rate of taxation.

A couple of weeks ago James McLary of Lower Brighton fell and broke his arm. While he is able to be around, with his arm in splints, the accident is most unfortunate for a man of advanced years. His wife continues in very poor health.

Pneumatics Stop Your Pain
It breaks up your cold in one hour. It's marvellous. Applied externally. All Druggists.

Dominion Day—Band Picnic.

Church of England service next Sunday at 11 and 7.30.

By error Florenceville items, on the 8th page, bear the heading "Rowena".

Gillin Bros. shipped a carload of hogs to Montreal on Tuesday. The price is good.

Miss Georgia Reid has been visiting her sister, Mrs. George Wilkinson, at Centreville.

Roy Taylor of Griswold, Me. has been visiting his sister, Mrs. George McGoldric.

Deputy P. O. Inspector Thompson of St. John was here on official business on Tuesday.

Try Carr's BUG FINISH. You'll like it—not so dangerous, more effective and cheaper than Paris Green.

Miss Grace Thompson went to Perth on Friday returning Saturday. She spent Sunday at East Florenceville.

Rev. T. J. Wilkinson will leave next week for a trip through Nova Scotia, combining duty with pleasure.

Horse for Sale—3 years old, kind, good roader, weight 1050, reasonable price. Roy E. Green, Tracey Mills.

Belyea & Estabrooks are offering their new line of house furniture at prices equal with the mail order houses.

Enough rain fell this week to last until after haying. There should be a good crop if the sun comes out warm.

J. T. G. Carr advises to buy Molasses and Tea NOW. There is going to be a great shortage and prices will be higher.

Dominion Day all roads lead to Hartland. Hitch in, help to celebrate. Reduced fare on the railway. Come and share in the fun.

On Sunday July 4, Mr. J. D. Carey of Woodstock will conduct the evening service in the Methodist Church. He will also address the Sunday School.

All the stores in Hartland, Coldstream, etc., as well as Bristol and other upriver villages will remain closed all day on Dominion Day, Thursday, July 1.

Keith & Plummer Ltd. are head quarters for Lime, Brick, Cement, Zinc, Nails and Sherwin-Williams Paints which cover more surface per gallon than any other paints.

The article entitled "Imperial Remedies," appearing on the first page of this issue, came out in the The Victoria Observer last week and should have been credited to that journal.

On Monday at Smith's mill at Coldstream Perley Clark had two fingers badly mutilated by a circular saw connected with a bolter. Mr. Shaw has also been in poor health for quite a while.

On the evening of Dominion Day there will be 1 mile, 1/2 mile and one mile bicycle races, starting and finishing at the Lyric before the opening of the show by the Band, which will be composed of special pictures and band music.

A hundred thousand baby salmon have been placed in the Beagumac and Coldstream and in a few years there should be good fishing. The tiny salmon were sent from the hatchery at Rapide de Femme to Ercell Belyea who liberated them.

New spring samples of suitings and overcoatings are now being displayed at McLauchlan's. Come in and look over the lot and see the latest style book. This will cost you nothing. A complete suit will cost you little more.

Beginning on Saturday Misses MacCallum & Thompson will offer the balance of their trimmed hats and early summer millinery at greatly reduced prices. This is a splendid chance for those who have not yet bought their summer hats to get a bargain and in the latest styles.

The Red Cross Society intend making July 1 a Tag Day for the purpose of raising funds to carry on the noble work. The need for hospital and field supplies is increasing daily and enthusiasm must not wane. Give for your country's sake. Before the war is ended all must give to its needs as they have never sacrificed money before. Thousands of Canadians have given their lives; thousands today are lying wounded, homesick, helpless, prone to sun or the more bitter elements. In the name of your Savior, help these poor people bear the cross.

HE STRUCK IT RIGHT AT LAST

After Suffering Almost Two Years, "Fruit-a-lives" Brought Relief.

MR. WHITMAN.

882 St. Valer St., Montreal.

"In 1912, I was taken suddenly ill with Acute Stomach Trouble, and dropped in the street. I was treated by several physicians for nearly two years. I was in constant misery from my stomach and my weight dropped down from 225 pounds to 100 pounds. Several of my friends advised me to try 'Fruit-a-lives' and I did so. That was eight months ago. I began to improve almost with the first dose. No other medicine I ever used acted so pleasantly and quickly as 'Fruit-a-lives', and by using it I recovered from the distressing Stomach Trouble, and all pain and Constipation and misery were cured. I completely recovered by the use of 'Fruit-a-lives' and now I weigh 208 pounds. I cannot praise 'Fruit-a-lives' enough."

H. WHITMAN.

50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

H. H. Wade of the Wade Drug Company spent several days in St. John last week on business.

Mr. Farmer: Don't put off ordering your repairs for your haying machinery until the day they are needed, and then curse the repair man because he hasn't them. Look them over and order now— from H. N. Boyer, Hartland, McCormick, Frost & Wood, and Massey-Harris.

Scott Sipprell has moved into the fine new house he has made of the old F. C. B. Church, which he recently purchased. While the ground floor is used for a garage, the second story provides eight good-sized rooms, with a magnificent outlook from every window. The location is ideal.

The recent refreshing showers, followed by plenty of sunshine, have brought on vegetation nicely, and produced a beautiful wild strawberry crop. One lady has been fortunate enough to secure over a quart. The Observer has not yet had an opportunity to sample the product, but lives in hope.

Spring and summer caps in latest fabrics, shapes and colors; correct styles in men's and boy's hats, felt, cloth and straw. If you bought in London, Paris or New York you could get nothing more exactly in style, and you can get no better value anywhere. Quality and price are hand in hand here—high quality, low price. At McLauchlan's.

A. R. Gould of Valley Railway fame was in the city last week en route to his home at Presque Isle. He saw Premier Clark while here but there was nothing doing so far as the Valley Railway is concerned. It is said that the chances for work being resumed on the road this year are very remote. The do nothing government is living up to its reputation.—Mail.

The Band will have a big day next Thursday, Dominion Day, when a big field picnic will be provided on Burt's flat. There will be lots of music, a ball game and a mighty good time altogether. Good meals furnished at moderate prices. The Band has never "passed around the hat," it has never asked or received public subscription. The organization is splendid for the boys, and in this picnic they offer good value.

About a month ago the C. P. R. dumped several thousand tons of sand and fine dust along its tracks through the village, and it still lies in unsightly heaps. In dry weather every puff of wind raises the dust while when it is damp the sand is tramped into people's houses. It is a nuisance. A crew of Italians had been at work placing the stuff in the railway road-bed for ballast, but before they got as far as Hartland they were taken off the job and sent further up the line.

"Rough on Rats" clears out Rats, Mice, etc. Don't Die in the House. 15c and 25c at Drug and Country Stores.

A Hartland Man At the Front Again!

Some three years ago the undersigned sold his store and intended to abandon the General Merchandise Business and devote his time entirely to Western Real Estate and Insurance. Owing to the Great European War, however, money has tightened up so that real estate is not in the demand it was. I have therefore decided to again enter

The Firing Line

and will be found in the Forefront of Battle, entrenched in the Taylor Brick Block, corner of Main and Station streets.

This is perhaps the most strategic position (commercially speaking), as more people pass this point than any other in the village.

Whilst doing a General Mercantile Business we will specialize in

Flour, Feed, Provisions, Heavy and Shelf Groceries, House Furniture, Clothing, Dry Goods

and some other lines in constant demand, leaving out some lines of less importance.

Shall be glad to welcome our old customers and as many new ones as may be good enough to favor us with their patronage.

Yours for Good Goods at Fair Prices.

JOHN T. G. CARR

P. S.—I shall still attend to the Insurance Business and represent some of the oldest and strongest companies doing business in Canada.

BAND Hartland Woodworking Factory

CAN SUPPLY YOUR REQUIREMENTS IN

All Kinds of Building Material

Doors, Sashes, Mouldings, Stair Finish, Hardwood, Spruce and Pine Flooring, Verandah Posts (solid or built), Rail Flooring and Balusters, Clapboards and Siding, Douglas Fir, Doors, Sheathing, Flooring, Clear Cedar Clapboards, Bishopite Wall Board.

655 DROLET STREET, MONTREAL

Woman Against Woman

or A Terrible Accusation.

CHAPTER X.—(Continued.)

She did not understand her own emotions, but she felt, after a long time, that she was not alone. She had been alone for so long, that she had almost forgotten what it was like to have another person. She had been alone for so long, that she had almost forgotten what it was like to have another person. She had been alone for so long, that she had almost forgotten what it was like to have another person.

A searching fire, and yet Alisa stood there like a stone. Will you answer the questions which I have asked you? "I will answer," came the reply, low and gentle, faintly. "I will answer." "Why did you come here?" "I had no other place to go." "For a moment Alisa hesitated. She suddenly remembered the scene in the dance-hall, the scene at the end of the cold street, the scene at the end of the cold street, the scene at the end of the cold street.

was through the half door the vision had vanished; yet it was both looked and held upon the hands. She moved that unspoken, absolutely forgetting the existence of Ethel Dunraven until a low moan from the bed recalled her. Holding her throbbing temples with both hands, she stared once more at the bed. Ethel was lying there upon her back, her face swollen and distorted, her hair disheveled, looking as little like anything human as one in that stage could possibly appear.

CHAPTER XI.

It was fully daylight before Alisa awoke from that long swoon. The winter sun, streaming through the window and shedding its warm rays straight across her face. She lifted herself with difficulty, and managed to sit up. At first it seemed to her that she was back with her father in the little, foul, bare room. She even heard the tone of his brutal voice, and felt the touch of his heavy fist upon her breast.

She lifted her hand to her aching head and pressed it there, then looked about her in half-dazed wonder. That creamy lace and those hangings of rich brocade surely did not belong in a tenement; that great tiger-skin rug, before the fireplace, did not belong to the daughter of David Valworth.

Then, with a sudden sigh, she remembered, and started so violently that she barely repressed a scream. It had all come back to her—that wild night, the unholy gleam of those great dark eyes, the uncanny touch of those chill fingers, the words spoken by those pallid lips. But it was all pale now—pale in memory, like the recurrences of some unfinished dream. "Was it true? Had Muriel really been there? Or had she merely dreamed?" Her head ached so that she could not think clearly; yet she thought it must be a dream. The remembrance of every thing, while sending a thrill of horror to her very soul, was vague and shadowy.

She half decided that it was a dream, and was about to smile at her own folly, when it occurred to her. She knew that she had lain upon the couch when the others had left her. She remembered that she had tried to sleep. Had she, in her dream, arisen and fallen upon the floor? She arose blindly and groped her way to the door, the pain in her head dragging her. The door was locked. She tried this one leading to her own room. It, too, was locked. As well as she remembered, she recalled the fact that it

For a moment it seemed to Alisa that the strain upon her mentality would snap the thread that held reason in place. She could hear the beating of her own heart like the rumble of thunder. She could feel the heat of the room as if it were a furnace. She could feel the heat of the room as if it were a furnace. She could feel the heat of the room as if it were a furnace.

There followed a scene which rivaled the one of the night before in frenzy, in passion, in wild ravings, blood-curdling screams. Oh, it was horrible—horrible! And though it all passed, yet upon the couch where she had fallen, silent, cold, apparently unable to speak, holding her head between her knees, and listening to the wild beatings of the blood in her own veins.

The sensation was one which she could never afterward recall. It seemed to her that she must have been dead for those moments, for she remembered nothing of it all—nothing whatever. When she came to herself, she was in her own little sitting-room, with Lloyd Ogden changing her hands. "It was foolish of us to allow you to remain in there alone with her," he was saying. "We should have known that you would be here."

When A Woman Wants

her summer Dresses—her "filly things"—her fine linens—to look their whitest and daintiest—she is very particular to use

Silver Gloss LAUNDRY STARCH

It gives that bright fully satin finish. : : YOUR GROCER HAS IT

The Canada Starch Co. Limited, Montreal

chological and clearly demands a most careful and minute study of the evolution of character. It would seem that as the result of severe and sudden shock the conscious mind, with its high attributes of control and determination, is thrown out of action; the "subconscious mind" supervenes. This subconscious mind, about which so much has been written of late, is a kind of storehouse of forgotten and unremembered things—events and ideas which belong to the past of the race as well as to that of the individual, but of the presence of which within him the individual is scarcely conscious, or not at all conscious, as the case may be. The highest centres in his brain cease to functionate. Powerful primal instincts resume away and a "block" occurs between the mechanism and the perception of light which is in some respects comparable to the block which is often noticed when reading an undisturbed book, and by reason of which nothing is conveyed to the mind though the words are seen quite clearly.

CAUSES LOSS OF THE SENSES.

Soldiers Become Blind from "Wounds to Consciousness."

That blindness can be caused by concussion is one of the many medical surprises of the war. A man, says a writer in the Lancet, after more or less prolonged fatigue, induced by marching and exposure in the trenches, is incapacitated by the explosion of a shell in his immediate vicinity. He may be merely knocked down or thrown into the air and more or less seriously injured, or wounded by concussion, shrapnel bullets or shell splinters. Consciousness is lost for a variable time, but often not so far as to prevent automatic movements, so that the man may walk in a dazed condition to a dressing station. At this stage, it would appear, the mental balance is very much disturbed, nor does memory retain any record of the phases. But the man is "instantaneously struck blind," and this may be associated with deafness, loss of smell and taste. The eyes are found to be watering freely and the lids tend to keep tight shut. After the lapse of a week or two they become less tender, and then on examination it is found, very often, that the eyes are quite normal. By this time, too, some sight has been recovered, and light can be distinguished from darkness. The patient gropes about, but curiously enough, does not seem to stumble up against objects in his path; yet it is found that his field of vision is restricted. "Indeed, to a degree which," seems to be a common complaint, "is almost comparable with the avoidance of obstacles in walking." Eventually complete, though slow, recovery takes place. It appears curious to the oculist who contributes this record that the eye to recover last is frequently the "shooting eye," and that some of the patients candidly admit to being in a "blue funk"; also that in all these cases there is a complete mental upset. He dismisses, however, as a cruel injustice the suggestion that shamming may be an explanation. These cases, he says, are to be regarded as 'examples of injuries or wounds to consciousness.' The problem is psy-

Beautiful Walls For Your Home Sanitary, Fire-Proof, Inexpensive

Make your home more attractive, and protect it from fire with these beautiful, sanitary

"Metallic" Ceilings and Walls

They will out-last the building and are very inexpensive. They can be brightened from year to year with a little paint at a trifling cost. Made in innumerable beautiful designs suitable to all styles of rooms. Can be erected over old plaster as well as in new buildings. Write for catalogue.

Redbath Sugar

Canada's first refined sugar, "Ye Olde Sugar Loafe" of 1854, was REDPATH; so was the first Canadian granulated sugar, in 1880, and the first Sugar Cartons in 1912.

The leader in every advance, Redbath Sugar stands to-day first in the estimation of tens of thousands of Canadian families. 131 Ask for "REDPATH" in Individual Packages. 2 and 5 lb. Cartons. 10, 20, 50 and 100 lb. Bags. CANADA SUGAR REFINING CO., LIMITED, MONTREAL.

THE MODERN GROCER

The AUTOMOBILE

FARM LIFE HAPPIER.

The farmer does not now have to stay at home if he has a car. He does not feel himself rooted to the spot. His wife and children will be happier and more contented. An automobile brings freedom from isolation, freedom from the limitations of time and distance.

To the farmer a car is far more than a mere luxury. It is a vital necessity to him and his family. It offers a welcome relief. It makes him a better worker by giving him recreation and pleasure he could not otherwise have. Its broadening mental effect is one of its greatest benefits to him.

Once the farmer has an automobile he soon finds himself looking forward to summer evening rides with his family, with the cool breeze blowing away the fever heat of the day's work in the fields. He finds himself able to go on pleasure trips, to picnics, and so on, with his wife and children, which hitherto he was unable to enjoy because of the distance to be covered in the time at his disposal. Many a man has reported that he doesn't feel the

Hard Work of the Farm as much as he did before his car gave him the needed relaxation.

A man can't get the same rest and relaxation out of a horse. In the second place, the chances are he is sorry for the brute. If a man has any sympathy and feeling for animals he knows that they must have rest over night and on Sunday. A horse is too slow and the distance he can cover is so small for any one really to get any great amount of recreation from an evening's drive. At the same time, an automobile costs money only when in actual use, unlike the horse, which is a constant expense.

In winter instead of hugging the fire, trying to keep warm, and dreading the next trip, he will have to make to town, the farmer can go and come with comfort and just as often as he pleases.

The automobile also facilitates communication and intercourse.

and because it does it is one of the foremost influences in fostering a strong sense of good fellowship and fraternal co-operation among farmers.

When the church, the school and the grange flourish, the opportunities for recreation and

Social Betterment are naturally multiplied. In enabling the farmer to make the most of these institutions the automobile helps to support and develop them and also renders its owner one more invaluable service.

This influence of the automobile is only natural. When a man shuts himself off from his neighbors and sees very little of them he soon loses interest in them or what they are doing. He gets so that he cares very little about anything but what is taking place in his own little sphere. He builds about himself, as it were, a Chinese wall of indifference.

Another argument for the car on the farm lies in the fact that while in the city the working unit is generally only the head of the family, on the farm all hands turn in and help. There is work for young and old. And while the farmer himself does his full share, he has certain advantages, as compared with his faithful helpmate, who is not only tied down to the house, but also probably has the cares of a family of little ones.

Progressive farmers to-day appreciate that the women folk deserve a better, brighter life. And nothing has made the life of farm women brighter and broader than the automobile. An hour's ride—a visit with laughter, song and gaiety—do more to erase the marks of care and preserve the roses of youth than any other means.

And of course if an automobile in the family proves beneficial to a man and his wife, it cannot help making a big difference in the upbringing of the children. A car provides just the excess energies and spirits of the growing boys and girls on the farm. It gives the former city advantages, without city drawbacks.

KRUPP'S BIG STEEL WORKS

WHAT AN OUTSIDER SAW IN THE GREAT STEEL PLANT.

It Is Remarkable the Easy Way Metal is Worked in Making Gun Barrels.

I thought it very strange that Krupp's should take my photograph surreptitiously. It savored somewhat of prison procedure, writes a correspondent in the Philadelphia Ledger. Undoubtedly, they required my photograph for some means of identification if need arose. They desired to make sure of recognizing me again. I have no doubt now that they wanted my portrait for their secret service. For Krupp's have the most perfect secret service in Christendom, with agents all over the world—and when the Allies get to Essen I expect they will find that photograph of mine in the archives of Krupp's. At the time I thought it queer treatment to mete out to a guest.

Dealing a Heavy Blow.

"You mustn't be surprised at anything that happens here," said my friend. "The officials here have to take care. By the way, is isn't wise to go wandering about or you might get into trouble. You won't forget to keep close beside me."

"Fritz," I found out, was the pride of Krupp's—a giant steam hammer that has been in use since 1860. People thought Alfred Krupp had when he started to build "Fritz." The hammer cost \$500,000, and is as good to-day as ever, so it has repaid its cost many times over in its half-century of hard hitting. Kings have cracked nuts with it. I did the same. I placed a nut beneath it, and "Fritz" cracked it perfectly without so much as touching the kernel. Yet the same hammer can deal a blow of 50 tons which no metal can withstand.

I was told that there were 160 of these great steam hammers in the place. I can quite believe it, for I saw a large number, and if the facts are correct, they must have cost several millions of dollars to build. I noticed, however, that even in Krupp's they cannot get on without Britain, for at least one steam hammer I saw was made in Sheffield.

Miracles of Science.

The noise, of course, was maddening. Wherever you go at Krupp's you cannot get away from the clanking and hammering of metal. Even where there is no hammering going on you can hear the sounds from afar.

An official said something to my friend, who turned to me and remarked: "Come along. If we hurry we shall be just in time to see a sight you will never forget."

So we hurried to a great steam hammer at the other end of the long workshop. "Don't stand too close," came the injunction.

A mighty mass of glowing white-hot metal came gliding along an overhead rail and came to rest under the hammer. Then the hammer began to work. The steel seemed like dough. It was kneaded and stretched and pulled, and shaped until it got longer and longer. I have never seen anything like it before.

"What are they doing?" I asked.

"Making a gun barrel."

What struck me as remarkable was the easy way the metal was worked. It might have been potter's clay instead of steel, so soft did it appear to be. Of course, it was the tremendous force exerted by the hammer which made the metal so ductile.

Before I had time to wonder I was conducted to another workshop, where I saw some huge shears cutting through armor-plate four inches thick just as though it had been putty. It seemed incredible, but then most of the things at Krupp's savor of miracles. A few minutes later I saw armor-plates 10 inches thick being bent as though they were sheets of tin.

Wheels of War.

I saw the Krupp armor made, but I have not the space to describe the process. It was very strange to see the armor, rolled out to various thicknesses just like so much pastry. After witnessing the various temperings it has to go through and the baths and scourings and rollings, I realized it must be costly. But I was rather staggered when I found that armor-plate made on the Krupp principle costs \$560 a ton, and that there is about \$2,500,000 worth around the hull of a modern battle cruiser.

"It's wonderful!" I exclaimed. My friend only smiled. "We'll go along and see how they make the celebrated weldless steel wheels for artillery," he said, "and then we'll let you into the great secret of making crucible steel—the secret which gave birth to these works."

We went outside. A motor-car was waiting. "Get in," said my friend. "It's a bit too far to walk."

In a few minutes, after having to pull up once or twice to let a works train of trucks go by, and after being jostled across railway metals, we stopped outside another big workshop.

The Emergency Marine Gangway—It Might Have Helped in Case of Lusitania.

This ingenious and practical means for enabling passengers to embark to lifeboats, or for the reverse operation after rescues have been performed during stormy weather at sea, is the recently patented invention of Captain Arthur N. McGraw, a widely known ship-master. It has been carefully examined by many experienced authorities and officers who have participated in recent noteworthy rescues and bears their highest endorsement as answering the recommendation of the London Conference on Safety at Sea that "suitable arrangements shall be made for embarking the passengers in the boats."

This structure is portable and quickly thrown into operative position. It consists of two long booms, which are swung out at right angles to the side of the ship, about fifteen feet apart, and have suitable floats attached to their outer ends. Between the booms is stretched a strong wire net over which passengers can readily pass. The equipment is held securely in place by guy-ropes. Thus, lifeboats are lowered to the water with only a working crew in them. When safely afloat the boat is brought head-on to the outer end of the emergency gangway and there temporarily moored, while, under the direction of an executive officer, the proper number of passengers only are permitted to enter the gangway and thereby "safely and sanely" reach the waiting boat.

In the case of the Lusitania, several boats full of passengers were capsized as they struck the water, and many lives were lost which might have been saved had some such device as that shown above been in operation.

"Here we are. This is where the wheels are made."

In the Hands of the Potter.

It was a vast workshop, and all over it were molds for wheels. We men poured the boiling liquid into the molds. And we watched the metal gradually harden. And we watched the workmen lift up the molds and disclose the completed wheel. Some of the wheels seemed to me to be more like the wheels of locomotives than of gun-carriages. It seemed I was right.

The output of this one workshop alone must have been tremendous. For it was between two and three hundred feet wide and over an eighth of a mile long. A big gallery ran all round it and there was a perfect maze of girders about the roof, with several suspended cranes swung up huge boilers in the making and ran about with them from one end of the building to the other. Nor did the workmen stop to stare at us. They ignored our very existence and went on with their work as usual.

"I think we'll go now and have a look at the pottery."

"Pottery?" I echoed.

"Yes. The molten metal for making cast steel is carried in clay pots and they turn out five thousand of these pots in the pottery every day."

So to the pottery we went, and when we had seen the men busily engaged in making crucibles, as the earthenware pots are called, we departed for the place where the celebrated crucible steel is made.

What an animated scene met my eyes. Men walked about rapidly in pairs carrying between them crucibles full of white-hot liquid steel on long metal bars. There was no faltering or hesitation on their part. They journeyed straight to the particular mold at which they were engaged, with the assistance of many other men, in filling and pouring in their quota of metal.

Back and forth walked the men with their burdens of scalding metal in their clay pots. Every moment I expected to see some of those pots split asunder and spill that deadly liquid on the carriers. But the pots did not split because they were made of a particular kind of earth which can withstand a greater heat than vessels made of armor-plate itself could withstand.

Steel Without a Flaw.

I watched the men filling a huge mold which, when it was completed, would be a 60-ton block of steel. Drop by drop the molten steel was being poured into it. And that is the secret Krupp discovered. By pouring in comparatively small quantities of molten metal at a time air bubbles were given a chance to escape, and a flawless block of steel was the result. A simple idea, but it was worth millions of pounds.

My head was beginning to ache, so I was rather glad when my friend suggested luncheon. We rode back to the Eschenhof Hotel and partook of a meal, after which, as a change from the inside sightseeing, I was taken over the ranges where the big guns are tested. Like everything else at Essen the ranges are gigantic, one of them being 16 miles long. This is used solely for test-

ing the biggest of guns. Unfortunately, there were no big guns being tested at the time, and I had to be satisfied with examining armor-plates that had been used for previous tests.

"Before we start I want to see some one in here," said my friend next day, and I followed him into one of the offices. While I was waiting, the official to whom my friend was talking looked up some letters in a case, and calling a messenger told him to take the letters along to some one in the next department. I commented on this a little later, and learned a lot about Krupp methods.

No man in Krupp's is allowed to know too much. Correspondence going from one room to another is looked up, so that the messengers cannot read it. A man may have been employed there all his life without knowing anything outside his particular department and without being allowed to go over other parts of the works. Even high-placed German army officers are not allowed to see all the works. In fact, every precaution is taken to prevent a man gaining more information than is necessary. Krupp agents are everywhere in the building, but I thought they were merely workmen who were not very busy.

Children's Sleep.

Much information as to the health of a child may be gained by careful watching of its attitude, movements, and expression during sleep. The child who sleeps best with the mouth wide open, and the head thrown back, is most likely suffering from enlarged tonsils, which impede its breathing; if it can only sleep when the bedclothes are rubbed off the nose. Restless sleep, broken and uneasy, is a common symptom of the onset of serious illness, but any extreme torpor and drowsiness should also be suspected, as these frequently precede feverish ailments, such as scarlatina and measles. Convulsive attacks are nearly always preceded by the tight claspings of the hands, with the thumbs folded into the palms, and the stiffening and curling up of the toes.

New Bullet Cures.

Mr. Alex. F. Humphrey of Pittsburgh, Pa., has invented a bullet for war use that is the absolute opposite to some respects of the "poisoned bullets" mentioned in the early dispatches of the war, for it carries in its nickel jacket anesthetics to deaden the pain of its wound, and antiseptics to help to heal it. Enough narcotics are contained in the bullet to greatly lessen the pain or shock in the nervous system of a wound even in the most vital organs.

IN GREAT DEMAND.

Immense Quantities of Ice Cream Consumed.

Ice cream dealers are making plans for a busy summer, the period of their greatest prosperity. A large city on a good hot day, consumes about 50,000 gallons, or 200,000 quarts of ice cream. One big firm alone has been known to sell 20,000 gallons in the space of twenty-four hours, which shows just what a great city can do when it goes out upon an ice cream celebration.

The trade is one which is affected very quickly by weather conditions and the reports from the weather bureau are scanned closely in order that the proper amount of ice cream for a certain day can be made. While the product can be manufactured and stored in coolers for future use without the slightest deterioration, still the fluctuations are so great that a uniform output each day cannot be maintained. A drop in temperature coming over night will send the ice cream business to a fraction of what it was on a previous hot day.

The first indication of a hot spell in summer finds the big freezers working at full capacity to prepare for the emergency. Cooler weather will mean a decided diminution of the product and a building up of the stores of milk and cream in country depots to be drawn on as soon as the situation improves. By making a study of the business and through the experience of long years, the larger concerns know their proper way to go about assuring themselves of steady incomes. As their production decreases their supplies increase, and vice versa, so there is no real loss.

Vanilla ice cream forms about two-thirds of the output, with chocolate second and strawberry third. Vanilla, while being the most popular, is used to a great extent in soda fountains, where it is put up in drinks of various other flavors. This accounts in a large way for its supremacy.

TORONTO'S MOST POPULAR SUMMER DISSIPATION IS CITY DAIRY ICE CREAM—the demand has spread from year to year until it is now on sale in nearly every town in Ontario. There seems to be something about the climate of Canada that makes it the confection that everybody craves in warm weather—infants, invalids, children or grown-ups, it makes no difference what your state or station, City Dairy Ice Cream is most refreshing, nourishing and digestible.

For Sale by discriminating shopkeepers everywhere

We want an agent in every town.

POOR COPY

Alleged Murder at Florenceville

(Continued from first page)

On the day he left home, a heavily bowed left leg, the hair and other means of identification served to convince Mr. Green that the body was that of his son. When he took the cover off the box in which the body has been resting, declared the old man.

Fred Green was mourning 30 years of age and his is the first break in the family of Mr. and Mrs. Aaron Green. Besides his parents he is survived by one sister, Mrs. William H. Scott, of Florenceville, Centre, and two brothers, Charles R. and Percy, both of whom reside with their parents.

The story of the arrest is given in Monday's Telegram as follows:

The arrest of Charles Smith and Stephen Derrah in the charge of murdering Fred Green of Florenceville was effected by Officers A. E. Foster and David Bell on Friday night. The warrant was placed in the hands of Foster and Bell on Friday morning. They had a clue that led them to a lumber camp about 20 miles from Perth. A part of the trip was made by auto, but seven miles of the distance was a tramp through the deep forest.

The men listened to the charges with little concern and put up no resistance. While waiting for Foster not to say anything, both seemed quite willing to talk. They denied knowledge of the crime, saying they were not drunk and could recall the night's events.

When the men were taken to the station, they were kept in separate cells. They were then taken to the court house where they were assigned a room and furnished with all drinking water. A. E. Foster, who is the local constable, said that the men were very calm and did not seem to be in any hurry to get out of there. He said that the men were very calm and did not seem to be in any hurry to get out of there.

Wedding at East Garville

At two o'clock on Wednesday afternoon, June 10, a quiet wedding took place at the home of Mr. and Mrs. J. H. Hynes, when their daughter, Miss Mary Hynes, was united in marriage to Vernon Tracy of Garville. The marriage took place in the lawn in presence of a large number of friends and relatives, the ceremony was performed by Rev. W. J. Harlow.

While the wedding party were retiring to the lawn, Frank Nixon did undivided justice to a beautiful wedding feast. The bride was attended by her sister, Miss Beulah Hynes, while the groom was assisted by his brother, Vernon Tracy. The bride was given away by her father, Mr. J. H. Hynes, and looked charming in a dress of white with a blue sash. The bridegroom wore a suit of blue with a white shirt and a blue tie. The bride and groom were the recipients of many beautiful and costly gifts. The guests present to the bride was a handsome silver tea set and the bridegroom a gold watch.

At five o'clock, Mr. and Mrs. Tracy left by auto for their home in Tracy Mills.

WOODSTOCK, N. B.

Royalton News

Our teachers are preparing programs for closing day, June 30. The Red Cross society met with Mrs. Tom Cowan on Thursday last.

Our fishermen did not meet much success on their recent fishing trip.

Mrs. Willis Burke of British Columbia is visiting her many friends in this place.

Since Curtis is doing carpenter work in the village.

Mr. Harry C. Chalkley is getting on well since her return from the States.

Miss L. M. Smith of Bristol is visiting her friends here.

Florenceville vs. Perth

Florenceville played Perth to a draw on Friday evening in a snappy game of baseball. Replete with interest from start to finish. The visitors were a husky bunch, and for a while it looked as if they were going to put it all over the homesteaders, but good generalship saved the day. Bishop and McPhail were the twirlers for Perth and did good work; Reid Lewis, Harry Mallory and Bishop made three-base hits, and there was hardly a weak man in the team. But daily practice is necessary to straighten out the kinks if championship form is to be attained. A returned match will be played in a fortnight.

Newsmag

Mrs. Sam Dickerson and daughter have returned to Hartford Falls, N. B.

Rev. A. G. Peters of Campbellton, who is now located at Lower Bridge, was with us on Sunday, May 27, and after preaching in the church in the afternoon organized the Sunday school which seems to be carried on with some success.

Mrs. Kapp is expected here to spend some time with her son, Martin Kapp.

Mr. Peters preached in the church again Sunday June 13, and is expected to be here for services every two weeks.

Beulah Camp Meeting

Beulah Camp Meetings will be held July 3-12.

Rev. Joseph H. Smith of Chicago, Ill., an evangelist of national reputation as a writer and Bible expositor, will preach twice daily. Fares - C. P. R. purchase one

Rowena

B. Charlton and son Ernest who are working in Houlton spent Sunday at home.

Mrs. H. Gillespie of Woodstock was calling on friends in the village on Sunday.

Mrs. Weyman of Woodstock and Mrs. Ebbott of Simonds were guests of their sister Mrs. Charles Boyer on Sunday.

Miss E. E. Gaunce, returned missionary from India, spent a few days last week at the home of Mrs. A. H. Hayward.

Miss Helen Orchard of Knoxford spent a few days last week with friends in the village.

Mr. Peacock, inspector of Manual Training, visited the Consolidated School one day last week.

James Boone, of Rowena, while working in an excavation some days ago, had his left leg fractured by a heavy mass of earth falling on it. The accident took place at Plaster Rock.

Cured Fifteen Years Ago of Piles and Eczema

By Using Dr. Chase's Ointment—Certifies That the Cure Was Permanent.

Some people have tried so many different treatments in their search for cure for piles and eczema that they find it difficult to believe there is an actual cure. The story point about Dr. Chase's Ointment is that it not only brings relief promptly, but actually cures. As follows:—I was troubled for years with itching piles and eczema. I could not sleep at night, and when I got up in the morning I was miserable. I had tried everything I could find, but all I had done was to make it worse. I had tried Dr. Chase's Ointment, 50 cents a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

DR. CHASE
