WEST KENT TEACHERS' ASSN.

Instructive And Interesting
Sessions Held In The
Central School

VALUABLE ADDRESSES

The afternoon session of the Teachers' Convention was largely attended, and several very instructive and thoughtful addresses were delivered.

Miss A. B. Angus, of the Central School staff, was the first to be called upon, and gave an excellent paper on "Methodizing Mechanical Arithmetic."

Mr. D. S. McPherson also gave an interesting address on the same subject, after which a discussion by the teachers was given.

Next came the lesson on Grammar, with a class, by Prof. J. J. Tilley, Director of Teachers' Institute. Mr. Tilley brought in a class of young students and taught an excellent lesson on Analysis. He made very favorable comments on the attention and discipline and mental attitude of the class toward their teacher, saying that it was a credit to the school and Mr. Plewes.

J. Dearness, M. A., of the London Normal School, again addressed the audience. His subject for discussion was, "Distinction Between Nature Study and Elementary Science." He said: Nature study will make the learner strong. He gets the fresh air and required exercise when out making a study of plants, trees, etc. It fills the mind with knowledge, and the child is made the investigator.

He spoke of sense knowledge and symbol knowledge. The sense knowledge is the knowledge a child learns around home, etc., and the symbolic knowledge is what he learns at school. He spoke very much in favor of the sense knowledge, saying that the child should have much more than he gets. He showed the points in the study of nature which helps the child in such a way. The child gets to see and study for himself, and experience is the world's greatest teacher.

By means of a synopsis he showed how nature study should be studied. Nature study is the progressive training to the action of a child's own environment. The child learns to discover knowledge for himself. He also stated that nature study was not a new study, but a new name, and said that the study of nature was taught before we were born. The results from the study are, information derived, memory exercised, power to enjoy knowledge of general principles and good training in inductive reasoning.

A discussion among the teachers was then held, and a vote of thanks tendered Mr. Dearness for his two valuable and instructive lessons. Mr. Dearness expressed his thanks and said that he was glad to be present to meet the new teachers, also for the excellent papers he had heard, and said that he was well repaid for his trip.

The President, Mr. W. C. Dainty, dismissed the meeting. The convention is being continued to-day.

The teachers of the Central and McKeough Schools gave a very enjoyable evening to the delegates of the Teachers' Convention, and several of the city people, last night at the McKeough School.

The program was an excellent one and consisted mostly of songs. The following popular singers took part: Miss Potter, Miss Carter, Miss McGeorge, Miss Schwemler, Miss Parker, and Mr. McAlpine. Mr. Gordon gave an excellent selection on his violin, and Mr. Collins also won the hearty applause of the audience by his cornet solo.

Mr. D. S. Paterson occupied the chair very ably.

Next came a guessing contest; the prize, a box of bonbons, being won by Miss Parker.

A lunch was served, after which a program of waltzes and two-steps was peacefully indulged in. A special dance by Mr. Al. Woods was given, which won the good will and heartfelt applause of the audience.

Mr. John R. Smith was present and played during the evening in his usual excellent style.

All went away feeling much pleased with the entertainment they had received.

SIR WILFRID WILL NOW GO

Premier Announces He
Will Attend Colonial
Conference

BOURASSA ON WARPATH

Ottawa, March 28.—The fact that Hon. James Bryce occupied a seat upon the floor of the House gave additional interest to a discussion upon the coming colonial conference, and the general questions that group about imperialism and the upbuilding of the Empire.

The Premier distinctly intimated that he would attend the conference.

An echo from yesterday was a notice by Mr. Bourassa that on Thursday, April 4, he would move that Mr. Fowler be compelled to make his charges good or withdraw them.

Sir Wilfrid Laurier preferred next Wednesday.

Mr. Bourassa desired a vote. The House on Wednesday adjourns automatically at six. The motion might be "talked out."

Sir Wilfrid assured him that hereafter the House would sit in the forenoon and on Wednesday evenings.

Mr. Monk (Conservative, Quebec) called the attention of the House to the refusal of C. H. Beddoe of the Interior Department to answer certain questions before the committee of agriculture and colonization, respecting the membership of the North Atlantic Trading Co. He gave notice that on April 4 he would file and discuss a formal motion on this subject.

Mr. Beddoe was the auditor who visited Amsterdam last summer and satisfied himself that the company had expended the sums required under its contract. The motion condemns with an order for Mr. Beddoe to appear at the Bar of the House and show cause why he should not be committed for contempt.

One or two of the questions during the question hour brought out some interesting information.

Mr. Carleton of C. T. P. Mr. Emerson stated that the G. T. P. had placed an order with all the car factories of Canada for their full capacity, i.e., 5,000 a year, and they were being delivered before the road was built, as the G. T. P. would require 20,000 cars a year.

Meanwhile the G. T. P. is using the cars and paying the usual per diem.

Mr. Oliver read the famous interview with W. T. R. Preston, published in The London Daily Express. It seems to be harmless enough and the Government sees no necessity for any action, although it does contain the statement that South Africa can support a larger population than can the country between Winnipeg and the Rocky Mountains.

Not Significant.
Sir Wilfrid Laurier denied that any negotiations were pending between Canada and the United States or that Ambassador Bryce's visit to Ottawa was significant.

"No doubt Mr. Bryce may refer to Canada in his despatches to the Foreign Office," said the Premier, "but I have no access to that correspondence."

"Has there been any correspondence with the Government?" asked R. L. Borden.

"No," said the Premier, in reply. Colonial Conference.

On the motion to go into supply R. L. Borden brought up the subject of the colonial conference. Mr. Borden criticized the policy of the Government in failing to make a single suggestion to the conference, while important questions for discussion were submitted by all the other colonies. There was the question, for instance, of preferential trade, as to which the Canadian delegates had introduced resolutions at the conference of 1903.

The next resolution, as proposed by Australia, has reference to the Panama Canal, in which Canada, too, had an interest. Another suggestion was with regard to British immigration, which the Australian Government thought should be directed to British possessions. Canada had paid too much attention to immigration from the continent of Europe.

Mr. Borden thought Sir Wilfrid Laurier should have given this expression to his opinion on the proposal of New Zealand that the making of reciprocal trade treaties by the colonies should be freed from the embarrassment of

CHILD LABOR IN SHOPS

Committee Recommends
Fourteen Years of Age
As Limit

STARTLING STATISTICS

Toronto, March 28.—Mr. Thos. Crawford (West Toronto) was chosen at yesterday's session of the Legislature as Speaker for the House for the balance of the session, and will henceforth don the robes, hat and gloves of that functionary. Hon. Mr. Whitney, who submitted the resolution for his appointment, assured the House that the news from the Speaker's bedside was not encouraging.

Hon. Nelson Monteth presented the report of the special committee appointed to consider the question of child labor, and it was ordered on his motion to provide for the printing and distribution of the report. It recommends the uniform age for shops, factories and the truancy act of 14 years. The report will probably be followed by legislation on the lines of the report.

Speaking of the report Mr. T. H. Preston (Brant) directed attention to the serious statistics it recorded. They showed the total enrollment of children under 14 years of age in the Province to be 327,000, while the average attendance was only 232,000. Of the 350 municipalities whence the report of the truancy officers were obligatory under the statute only 75 had reported. He (Mr. Preston) hoped the report would have the early consideration of the House.

Mr. E. Dunlop (North Renfrew) moved the second reading of his bill to amend the Ontario Insurance Act. In a brief address Mr. Dunlop set forth the advantages of his measure, which provided that on the expiration of a policy the company is required to keep it in force by borrowing against the cash surrender value of the policy. The bill found endorsement from Hon. Mr. Graham, the Opposition leader, and Col. Hugh Clark and on the suggestion of Hon. Mr. Foy got its reading, and was sent on to the legal committee.

Hon. Mr. Pyne presented a measure "to amend the Department of Education." This bill, the Minister of Education explained, was designed simply to give the department power to disburse the increased grant to the rural schools which is provided for this year in the estimates.

Hon. Col. Matheson made an important announcement relative to what is known as "the Soo loan." The Government guarantee for the \$1,000,000 still outstanding falls due on Monday, April 1st. Owing to the condition of the money market the Canadian Improvement Company had been unable to carry out the sale or arrangement which had been planned to relieve the Government. Accordingly they had been granted a six months' extension, the parties who signed the bonds all consenting to renewal of the loan.

Rules Amended.
On motion of the Prime Minister the rules of the Legislative Assembly were amended as follows:—

1. By adding at the end of rule 53 the following words:—"If the application is for authority to issue debentures to a municipal corporation, the notice shall set out the particulars of the municipality's existing debenture debt and the reasons for requiring a further issue of debentures."

2. By inserting after the word "bill" in the second line of rule 61 the following words:—"or a bill providing for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a municipal corporation."

3. By adding the following as rule 61a:—

61a. Every private bill, in so far as it provides for the consolidation of a floating debt or for the consolidation or renewal of debentures (other than local improvement debentures) of a municipal corporation, when the bill has been read a first time, shall without special reference stand referred to the Ontario Railway and Municipal Board for their report; and a copy of such bill and of the petition on which the same is founded shall be forthwith transmitted by the clerk of the House to the board in order that the board may, after an enquiry into

THAW GETS FIRST PEEP

At The Commissioners Who
Will Decide His
Fate

PRIVATE CONFERENCE

New York, March 28.—After the Thaw jury was excused yesterday until next Monday morning and the members of the lunacy commission selected Tuesday by Justice Fitzgerald to enquire into Thaw's present state of mind had been sworn in, it was suddenly announced that ex-Supreme Court Justice Morgan J. O'Brien, chairman of the commission, had resigned.

In a letter to Justice Fitzgerald, Mr. O'Brien explained that he was forced by the condition of his health and his professional engagements to decline to serve.

Justice Fitzgerald made a new order, appointing David McClure, a member of ex-Police Commissioner McAdoo's advisory committee of citizens, to fill the vacancy.

Mr. McClure met the other members of this commission yesterday afternoon and was elected chairman. He stated that the first session will be held to-day at 2 o'clock in the courtroom where the trial has been in progress. The enquiry in general will be open, although there will be executive sessions from time to time.

After Justice Fitzgerald administered the oath of office, Thaw was brought into court and found all the members of his family there.

He looks exceedingly well, and smiled a greeting to his mother, his wife and his sisters and brothers. He then turned to where the three commissioners sat and gazed fixedly at them for several minutes.

Justice Fitzgerald, in discharging the jury until next Monday, warned them to be careful not to discuss the case in any way nor to read any newspaper accounts of what is taking place.

TWO THINGS ESSENTIAL TO PERFECT Wall Decorations

- 1—Correct Style and Tone in Your Paper.
- 2—Artistic Design, Blended with the Proper Color in Its Finish

These two things are the distinguishing characteristics of our Spring purchases of WALL PAPER. Years of experience have furnished us with the wit to buy the right goods and offer them to our customers. Remember any old paper will cover a wall and make a change in its appearance, but if you take the advice of twenty years experience you will get greater and more pleasing effects for less money from us than from any of our competitors. We pride ourselves in our excellent assortment of Wall Paper, which is unequalled in Ontario.

Headache Powders vs. Spectacles and Eye Glasses

We sell several thousands of Headache Powders every year, and many a bad headache is relieved by the glasses we sell. The great difference between the results from the taking of Headache Powders and the use of glasses lies in the fact that POWDERS RELIEVE HEADACHE and GLASSES CURE HEADACHE. It you take medicine for your headache you may be sure you will have to do so again, for the pain is sure to return; but, if you get a pair of our lenses, properly fitted, your headaches will not return. We believe we can permanently cure nine-tenths of headaches by the proper use of Glasses. Examination Free.

WHAT'S THE MATTER WITH CHATHAM?

As the result of the indefatigable efforts of Ald. Lyon, chairman of the Railways and Manufacturers committee of Guelph, another factory has been landed in that city. For some time past Ald. Lyon has been negotiating with certain outsiders who propose erecting a new plant. On Friday they visited the city and were shown what advantages could be offered there. As a result an agreement has been reached and the factory will be built this summer.

What's the matter with Chatham? Two industrial by-laws were voted upon and carried in Stratford recently. That city is making strenuous efforts along the line of getting next to desirable industrial concerns.

What's the matter with Chatham? In the Maple City there was once a Board of Trade, looking for these industries. It has not even met for some time. The annual meeting is long past due, and it looks from present appearances as if it never will be held.

What's the matter with Chatham?

DRINK FIGURES.

Some figures given in the Canadian Gazette (London, England), show that while the people of the British Islands are becoming less alcoholic, the drinking habit is growing upon our Canadian people. According to the new statistical abstract for the British empire the abstract for the British empire the comparison stands as follows, in gallons per head of the population:

Beer—	1801	1898	1905
U. K.	30.2	31.8	27.7
Canada	3.8	3.9	5.4
Australia	11.7	11.7	11.3

Spirits—			
U. K.	1.03	1.04	0.91
Canada	0.74	0.50	0.94
Australia	1.13	0.79	0.96

Wine—

U. K.	0.39	0.41	0.28
Canada	0.11	0.08	0.19
Australia	1.09	1.00	1.27

The Gazette says: "Canada is, of course, still easily first in the smallness of her alcohol consumption; but we can imagine the disquietude which her increased enjoyment of beer and spirits will occasion in not a few Canadian breasts."

There is something remarkable about the liquor traffic, points out the Hamilton Spectator. Since the Whitney Government came into power the number of licenses in the provinces has decreased about 10 per cent. But figures which we have seen show that the consumption of liquor has increased. Which should not be very encouraging to the ladies and gentlemen who, year after year, persistently agitate for the cutting off of another license or two.

NO HOME RULE FOR IRELAND.

Lord Rosebery Says Irish Are Disloyal People.

London, March 27.—Presiding at a meeting of the council of the Liberal League, held here yesterday, Lord Rosebery said Great Britain would never tolerate a separate Irish Parliament. Such a proposal went far beyond anything the late Mr. Gladstone intended.

"A system suitable for Canada and Australia," Lord Rosebery added, "would be different in a contiguous island, which, in its public declarations, prided itself on its disloyalty."

Continuing, the speaker said he doubted if the Government's promised measures for Ireland would go to extremes, but it was a pity the Government's principal men were making speeches leading the country to believe that something radical was intended.

He, Lord Rosebery, owed no allegiance to the present Government, nevertheless he congratulated it on its success thus far.

He feared, however, it was promising too much. If it made any general attack on property, as was threatened, its existence would be speedily ended.

TO IMPROVE OUR EARTH ROADS.

In order to start a movement to improve the condition of earth roads in Ontario, "The Farmer's Advocate," in co-operation with the Public Works Department of the Ontario Government, is offering \$100 in prizes for the best results from a season's use of the inexpensive implement called the split-log drag. There are two sets of prizes, one for the Eastern and one for the Western part of the Province. The first prize in each case is \$25, second prize \$15, and third prize \$10. There is no fee to enter, and the conditions are very simple. The judging will be done by Mr. A. W. Campbell, Good Roads Commissioner. Fuller particulars may be obtained by dropping a card to "The Farmer's Advocate," London, Ont. We might add that the entries for this exceedingly interesting and practical competition will close on March 27th.

Lord Lake is the best 10c. cigar in the market—made by O'Brien Bros.

SKIN DISEASES

Salt Rheum, Pimples, Erysipelas, Ringworm, Shingles, Scald Head, Itching Sores.

All diseases of the skin are more or less directly caused by a bad state of the blood, which produces acid humors and corrupts the secretions.

No one can expect to have a clear, bright skin when the blood is in a disordered condition, and the stomach, liver and bowels acting feebly in consequence.

All the above skin diseases, in fact, any disease arising from a bad condition of the blood, are curable by

BURDOCK BLOOD BITTERS

through its wonderful cleansing, purifying powers on the blood, and its renovating action on the system.

Mr. A. Squire, Dominion, N.S., tells how he was cured of Salt Rheum. He writes: "For years I suffered with Salt Rheum, and was unable to find a curable remedy out of all the medicines I took, and Physicians consulted. Finally I was urged by a friend to try Burdock Blood Bitters, and after a very short space of time I was completely cured. I shall always recommend B.B.B. for such cases, as I consider it an indispensable remedy." Price \$1.00 per bottle or 6 bottles for \$5.00.

ANNOUNCEMENTS.

(Supplied to The Planet by Press Agents.)

At the Brisco Theatre—
Moving Pictures—Mar. 29-30.
King & Tramps—April 2.

Remember the Big Bargain Five-cent Matinee at the Brisco Opera House to-morrow. Special comic, educational and amusing pictures have been secured for the occasion, and Friday night and at the Ladies' and Children's Matinee, Saturday. Follow the crowds and have a good time.

Many new and novel features are promised in the Yankee Doodle comedy, "The King of Tramps," which will be at the Brisco Opera House on Tuesday, April 2nd.

The company is headed by the well-known comedian, Dave Dorden, who is supported by a cast of well-known players, including the little singer and dancer, Clyde Long, who has been specially engaged to introduce his latest and most novel specialty, "The Scarecrow," so familiar to the little folks who have read of the wonderful adventures of the "Tin Woodman" and "The Scarecrow" in the beautiful story book of "The Wizard of Oz." "The Scarecrow Dance," as done by Mr. Long, is pronounced by press and public as being in a class by itself.

Every man is like the company he is want to keep.

THE 2 T'S FOR QUALITY

THE HOME OF GOOD CLOTHES FOR MEN

A Matchless Showing of Men's Easter Apparel

A Fashionable Clothes Exhibition, Absolutely in a Class of Its Own and Leaves Nothing to be Desired.

Suits, Topcoats, Raincoats, Priced From \$7.50 To \$25.00

There's an indeffable something about The 2 T's clothes that says they're right and that indefinable something is the very something that the particular man and the critical dresser wants most. Our Easter showing of Men's and Young Men's Suits, Topcoats, Overcoats and Raincoats is not only the largest and best gathering ever displayed in Chatham, but it presents that distinctiveness, originality, character, style and high quality so much sought for and so seldom found except in the highest type of merchant tailor productions. The Hart, Shaffner & Marx New Method and Fit Reform line (represented exclusively by us in Chatham) is the distinctive feature of the exhibition, which portrays every approved fashion innovation in all the correct weaves and fabrics, in variety to meet every taste, in size range to exactly fit every figure. See our windows! Every garment pressed and altered before leaving our store.

Swell Easter Neckwear.

Unnecessary friction with your fellows takes from life's force, but the necessary friction adds to it.

GUELPH WRECK VERDICT.

Train Was Going Sixty Miles An Hour, "a Dangerous Rate."

Guelph, March 27.—The finding of the jury, empanelled to examine into the recent wreck on the G.T.R. near Guelph, shows that the train was going at the rate of sixty miles an hour, which they considered "a dangerous rate of speed, considering the season, the weight of the rail and the engine."

Rebel Defeated.

Willemstad, Island of Curacao, March 27.—A letter received here yesterday by the Venezuelan Consul from Caracas says that Gen. Juan Pablo Penabaz, who was reported early in the month to have started a serious rebellion in the State of Tachira, Venezuela, has been defeated; that he is being pursued by the Government troops, and that his capture is shortly expected.

Held for Robbery.

Windsor, March 27.—Norman Livingston, the wayward son of a Canadian clergyman, is held by the police on suspicion of being implicated in a highway robbery which occurred after midnight on London street west, when James McCleary, a tunnel employee, was held up and robbed of \$45 by two men.

TROOPS INVADE PERSIA.

Russian Soldiers Sent to Quell Enraged Natives.

Tehran, Persia, March 27.—Serious disorders have broken out at Sebzar, necessitating the intervention of Russian troops.

The lawless natives of the vicinity have risen, and are attempting to force an entrance into the city. Two Russians have been killed and a number wounded.

The lives of all the Russians are in danger.

Reinforcements of Russian troops are reported to have started for Sebzar.

What Russian troops were doing in Sebzar has not been stated. Recently it was denied that Russian troops were entering Persia. Sebzar is a city of 18,000 people, in the Province of Khorasan, and is about a hundred miles from Russian territory. Great Britain has been reported to be very closely watching developments in Persia, where Russian aggression is feared.

BE A STRONG MAN.

Increase your vitality and nerve energy, restore vim and force to the overworked body. Ferrozone will do this for you as it did for Mr. Walter Wood of Beauport, N. B., who says, "I can say Ferrozone has given me a new lease of life. A year ago I suffered so from nervous exhaustion I was scarcely able to drag myself around. My appetite was gone, I had no color or ambition and felt used up. One box of Ferrozone started me back to health. I took a number of boxes and my health was completely restored. For months who are tired, pale, nervous and thin-blooded nothing compares with Ferrozone. 50c. per box, at all dealers."

Threw a Bomb.

Bialystok, Russia, March 27.—A bomb was thrown yesterday at Governor-General Bogachev while he was out driving. The Governor-General was uninjured, though the force of the explosion broke all the windows in the street, and his coachman was slightly wounded. The bomb-thrower escaped.

Cigarette Kills Paralytic.

Philadelphia, March 27.—Campbell A. P. Snodgrass, a helpless paralytic, 56 years old, was burned to death in his bed here yesterday. He was an inveterate cigarette smoker, and accidentally set fire to the bed clothing.

DOCTORS MISTAKES

Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with rheumatism, and there, and in this way they present alike to themselves and their easy-going or over-busy doctor, separate diseases, for which he, assuming them to be such, prescribes his pills and potions. In reality, they are all only symptoms caused by some uterine disease. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better, in reason of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured."

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is entirely harmless in its effects in any condition of the female system.

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out, run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest boon ever known, being unequalled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nerve tonic, "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysterical spasms, vertigo, dizziness, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three doses. Easy to take as candy.

APPOINTS COMMISSION

Will Examine Thaw as to Present State of Mind.

Men Who Will Decide Thaw's Fate—Evelyn Weeps On Learning Judge's Decision—Thaw Has No Doubt of the Result—Jury to Be Excused Indefinitely—Affidavits Were Too Much At Variance.

New York, March 27.—Justice Fitzgerald yesterday unexpectedly handed down a decision ordering a commission in lunacy to enquire into the present state of mind of Harry K. Thaw. The decision of the three disinterested men named to conduct the enquiry will guide the future action of the court as to ordering Thaw to an asylum for the insane or directing that the indefinitely interrupted trial for his life shall proceed.

Justice Fitzgerald announced the appointment of the commission privately in his chambers. Evelyn Weepbit Thaw was there with the lawyers, and it became her task to break the news to her husband in the Tombs. Fearful when she left the judge's rooms in the criminal courts building, the young woman, who has been such a conspicuous figure in the trial from first to last, was smiling and cheerful when Thaw was brought from his cell to the hospital ward of the prison to meet her.

Thaw accepted the court's decision philosophically and once more declared he had no doubt the commission would declare him a sane man.

The personnel of the commission named by Justice Fitzgerald lends a new distinction to this already notable case.

Personal of Commission.

The men who will determine Thaw's mental capacity are Morgan J. O'Brien, former justice of the appellate division of the state supreme court; Peter B. Olney, former district attorney of New York County; and a lawyer of high legal attainments, and Dr. Leopold Puzel, a practicing physician and authority on mental disorder.

Former Justice O'Brien is one of the trustees, with Grover Cleveland, of the Hyde Stock in the Equitable Life Assurance Society purchased by Thaw. P. Ryan, just prior to the insurance investigation. When he was a candidate for re-election to the bench in 1901, as a Democrat, Justice O'Brien was unopposed. President Roosevelt made a trip from Washington to Oyster Bay to cast his ballot for him.

Before being elected district attorney of New York County in 1883, Mr. Olney had been a member with Wm. C. Whitney of the commission appointed in 1879 to revise the laws of the state affecting public interests in New York City. He is a graduate of Harvard.

Dr. Puzel is a graduate of the Bellevue Hospital medical school, and has had a long experience in that institution. He is qualified before the state medical board as an examiner in lunacy.

Will Excuse Jury To-Day.

The Thaw jury was ordered on last Friday to report before Justice Fitzgerald to-day at 10:30 o'clock. At that hour there will be a brief court procedure, the jury being excused indefinitely.

No date has been fixed for the first meeting of the commission. There probably will be some definite announcement on this matter to-day, as the first under which the commissioners appointed directly that they proceed with their enquiry forthwith.

It is probable that Thaw will be asked first of all to submit to a rigid physical examination. Having undergone several of these since his incarceration, he is somewhat nervous on this subject, but it was said last night by his counsel that he would do everything in his power to aid the commission with its work, and that he hoped for an early opinion as to his sanity.

Justice Fitzgerald based his decision on the conflict of affidavits as presented by the opposing counsel, saying they were too diametrically at odds to permit of a decision other than in favor of an impartial enquiry.

alone in her room all evening, except on occasions when the night porter called. He was up three times, twice to ask if the Murphy woman were in. Witness said that she never had anything to do with defendant's husband. She said that she smelt whiskey on Mrs. Murphy's breath while the latter was wrestling with her.

John Wilson, the night porter, and Miss Annie Currier, the dining-room girl at the hotel, were also called as witnesses. Wilson said that Mrs. Murphy was intoxicated when she called. The noise of the row had brought him to the room.

Mrs. Murphy was called, but a few moments after she had been placed in the stand the lawyers for the defense and prosecution held a long whispered conversation. Finally they adjourned into a side room where they held a long consultation behind closed doors.

The final outcome of it all was that Mrs. Murphy's testimony was not taken. She was not called as a witness for the defense called. The lawyers for the prosecution agreed to reduce the charge to common assault, and the counsel for the defense allowed his case to rest on the evidence already taken.

Ward Stanworth, who appeared for the defendant, made a strong plea for Mrs. Murphy, claiming that the latter was under the hallucination that her husband was in the room with the Simmons girl, and that this delusion was sufficient to arouse the jealousy of any woman. In other words, it appears that the fracas was the result of a "brain storm." Mr. Stanworth said that Mrs. Murphy had to earn her own living, and asked Judge Houston to deal leniently with her.

A fine of \$5 was imposed with the costs, which amounted to \$10.25. Crown Attorney H. D. Smith and O. L. Lewis prosecuted, and Ward Stanworth appeared for the defense.

Bailey, the young man who was accused of defrauding H. MacLay, was dismissed on agreeing to make things right with his employer.

One of the Jenkins Bros., who keep a clothing store on the market, was charged with breaking a pane of glass in Joseph Harvey's house on Park avenue.

Harvey says that Jenkins came to collect a bill from him Saturday evening. Harvey told him he could not pay it just then, but that he would pay Monday morning. Shortly after he had closed the door in Jenkins' face, a stone came sailing through the plate glass. He did not see Jenkins throw the stone.

A Mr. Tilley, who was also called, brought with him a large piece of rock, wrapped up in brown paper. This was the missile which it was claimed came through the plate glass.

"Looks like a Bobalt specimen," remarked Barrister Lewis, whereat the gravity of the Court relaxed in a broad smile.

Mr. Tilley said that he heard the noise but he could not swear that Jenkins threw the stone. Mrs. Harvey and Miss Harvey were also called as witnesses.

The magistrate reserved judgment. O. L. Lewis acted for the defense.

Judgment was also reserved in the case of Wemp vs. McDonald, where the former charged the latter with theft in the matter of \$1.55, collected from a customer. This case presented many difficulties to the Crown, as Mr. Wemp apparently kept no cash book, and some of the entries in his other books appeared to be faulty. McDonald claimed that he handed the money to Wemp as soon as he returned from delivering the coal, but the memory of both men was proven to be slightly out in some respects.

The young man who came up charged with indecent exposure, was found guilty, and will be sentenced Tuesday.

Excursion by trolley to Wallaceboro, tomorrow. Tickets at Dyer's Store. Special rate.

BIG POLICE

COURT DOCKET

Judge Houston Hands Out Justice In Interesting Cases

CROWD IN ATTENDANCE

There was a very heavy and interesting docket at the Police Court this morning. The various hearings occupied four full hours, as it was one o'clock before the last case was disposed of. A larger crowd than usual gathered in the auditorium, probably owing to the fact that the Simmons vs. Murphy case was to come up, in which it was expected the evidence would prove quite spicy.

"Your Honor, when I ordered her out of my room she clim' into me, and I clim' into her. She tore my night-dress, scratched the back of my neck and my right arm, and ran her finger in my eye so that I can hardly see out of it this morning."

So testified Emma Simmons this morning when she brought Mrs. Ada Murphy before Judge Houston on a charge of assault, doing bodily harm. The fracas occurred in the complainant's room in Hotel Sanito, on the evening of the 21st inst. The Simmons girl is cook at the Sanita, and Mrs. Murphy, it appears, came over to the hotel on the evening in question and accused her of alienating her (Mrs. Murphy's) husband's affections.

"I was in bed at the time," continued the witness, "and I heard someone coming up the stairs. I thought it was the second cook, and I called out, 'Is that you, Bella?' and a voice answered 'No.' Then Mrs. Murphy came into my room, and said that I had her husband. I said, 'If I have your husband, find him.' He was in the room, and he hadn't been there all day.

"Then when I lit the gas, she tore a calendar off the wall, and tore my night-dress off me, and ran her finger in my eye."

The witness claimed that after the defendant "clim' into" her, they clinched, and the Murphy woman grabbed her by the hair of the head. Quite a row must have ensued, as the combatants knocked down a stove-pipe and alarmed the whole household.

Both Mrs. Murphy and Miss Simmons are tall, well-built, fine looking women. Both were elegantly attired for the occasion this morning, and both carried themselves like injured queens.

During her cross-examination, the Simmons girl said that she had been

Cameron, Elizabeth street, until next week, when they will leave for their homes in White Fish and Lewistown, Montana.

Cunningham and Mrs. Strong were called to the city in January owing to the illness of their mother, who is with Mrs. Cameron.

NO PLANET TO-MORROW

To-morrow being Good Friday, and a statutory holiday, there will be no issue of The Planet.

Weak Stomach Causes Sickness

Different Symptoms That Result From Indigestion. How to Cure By Strengthening the Stomach.

If you have ever suffered with a weak stomach you must realize that the digestive system is to the body what the foundation is to the house—the base of support and strength.

Whatever hurts your stomach or lessens its power, hurts all other parts of the body and impairs their powers.

If the stomach is weak and distressed, one organ after another will be involved until the heart, kidneys and liver are all distressed.

Get the stomach right and health will naturally come to the other organs. This explains why a good many people who have doctors for years for diseases of the heart, kidneys or liver, have at last been cured by Mi-o-na stomach tablets.

They found to the astonishment and happiness that, when the weak stomach was strengthened, their health returned, the heart became regular, the liver active and the kidneys healthy.

Do not think we claim Mi-o-na is a "cure-all." It is not. It is a specific for all distresses of the stomach, and when it strengthens the stomach and cures indigestion, you will soon be well all over without further medicine.

Mi-o-na is sold only in 50c boxes, never in bulk. It is sold under an absolute guarantee by C. H. Gunn & Co. to refund money unless it cures.

BANKS—TERRICE

(From Our Own Correspondent.)
Dresden. Mar. 27.—One of the prettiest events of the season took place on Wednesday at high noon, in the Presbyterian Church, when Miss Elsie Irene Terrice, only daughter of Mrs. Emma Terrice, was united in marriage to Mr. Henry Ewart Banks, of Birmingham, England. The marriage services were read by the Rev. Norman Lindsay, B. A., in the presence of only the immediate friends and relatives.

The bride wore a handsome travelling gown of brown broadcloth, with hat to match, and was given away by Dr. Galbraith, Miss Delia Baird, of Parkhill, attended the bride, wearing a brown silk gown and white picture hat, and Mr. V. Dunn assisted the groom.

The bridal party entered to the strains of Mendelssohn's wedding march, played by Miss Mae Cuthbert. During the signing of the register Miss Alice McVean sang Mendelssohn's wedding hymn. Messrs. Jack McVean, Chester Watson and Harold Watson acted as ushers.

After the ceremony a reception was held at the bride's home, and the bridal couple left for their future home in Halifax City, on the evening train.

The groom's gift to the bride was a dinner ring set with diamonds, to Miss McVean, Miss Baird and Miss Cuthbert, pearl and safety pin brooches, and to the ushers pearl scarf pins.

The out of town guests were, Mr. and Mrs. Norman Wade, of Burford, Mrs. Baird, of Parkhill, and Harold Watson, of Leamington.

THE ADOLESCENT RACES

INDIANS IN FAR NORTH ARE RAPIDLY DISAPPEARING.

Consumption Works Ravages Among Them—Is the White Man Responsible?—Tragedies Due to Wanton Cruelty—Villainies of Fur-Traders—Barbarities of Trappers—Canada's Obligation to the Indian.

Mr. E. Stewart, Dominion Superintendent of Forestry, in a report given in Ottawa a few days ago, said that the Indians of the far north are dying off very rapidly. He instanced Fort Simpson, an important post, which had in 1887 an Indian population of over eight hundred, but which has now been reduced to less than three hundred souls. The cause of this excessive mortality, Mr. Stewart says, is consumption. The Indian builds a small house, which he keeps excessively hot and altogether unventilated during the winter, and he does nothing in the way of guarding against infection, so that the White Plague with him becomes in many instances a veritable scourge. The suggestion is made that physicians be sent among these Indians in the north, not only to give them medical treatment, but also to instruct them in sanitary laws. That suggestion is certainly an excellent one, and should be acted upon at once, to prevent the extinction of whole tribes of the red-men of Canada.

Cannot Shut Indian Out.

This announcement of Mr. Stewart's has, we doubt not, given a very real feeling of sorrow to many who have no particular reasons for having an interest in the Indian or his welfare. The majority of Canadians cannot, if they would, shut out the Indian from their thoughts altogether, or quite escape the conviction that the white man, as his supplanter over the broad stretches of our fair land, is in some degree responsible for him. They realize that the Indian is a problem, a problem that it would be much more comfortable to be rid of, but they have never been able either to shift the blame or to solve the problem that his presence makes. And we believe there are thousands of Canadians to-day who can never think of the Indian of to-day without a keen sense of regret.

But the problem of the Indian is only a part of that larger problem of the adolescent races in general. These make up, it is estimated, nearly one-third of the human race and occupy nearly two-fifths of the land surface of the globe. They are not inferior races in every particular. In fact, in many ways they may be naturally superior to those who have conquered and hold sway over them. But there is a something lacking that makes their subservience, the struggle for life and life's good, a foregone conclusion. They are the child races, attractive and interesting from many points of view, but to a large degree unequal to the full burdens and responsibilities of life. They ought to be treated in some measure as children, but unfortunately the dominating races have not always understood their responsibility, and the history of many of these so-called adolescent races has been marked by some of the most pitiable tragedies ever shown upon the world's stage.

Wanton Cruelty.

These tragedies have been due in some instances to wanton cruelty and inhumanity. The well-known case of the aborigines of Newfoundland affords an illustration. Here we have the utter extinction of an ethnic stock of unknown origin and affinities, but showing in many ways high qualities, the extinction being due altogether to the barbarities of so-called Christian traders. The Government considered that loyalty to England made it imperative to depopulate Newfoundland, and a war of extermination was kept up until in 1819 the one single individual of a race that numbered thousands was captured and kept until his death in 1828. These settlers were first disposed to be friendly, and if they had been met in a similar spirit there is little doubt but they would have accepted all the factors of civilization which they could have understood or assimilated. And the pathos of it is heightened by the fact that the white race passed away without having heard of Christianity, perished, too, at the hands of a Christian nation, and that not a drop of Beothuk blood flows in any one's veins to-day, but all cries to us from the ground.

Due to New Conditions.

But these tragedies seen in the history of the adolescent races have not always been due to wanton cruelty. Sometimes they have been the largely unavoidable results of new conditions and associations. And of this class our own North American Indians are an example. We have not wished to do badly by the Indian; in fact, we have done much in an effort to help him. But the conditions, both from the moral and the physical point of view, that our civilization has brought to him have, in many ways not intended, hampered and hurt him. The barbarities of trappers, the villainies of fur-traders, and the vices of borderers are mainly responsible for the present bad moral character ascribed to the Indian. Some of these might have been prevented, but it was not possible, as the white man used to be, to prevent the conditions and surroundings in which our civilization has placed the Indian, and for which he was not suited, and through which he has suffered much, both from the physical and the moral point of view.

The question of the dominant race's responsibility to the subject race is a serious one, demanding careful thought and consideration. The question of Canada's obligation to her adolescent race, the Indian, is one that must be continually and honestly faced. Some people grow impatient over the smallness of returns from all the effort made on his behalf, but this must be borne in mind, he is in many ways a child still, and our child, too, and nothing so becomes us in dealing with him as an infinite patience.

JOYS OF SKEE JUMPING

FLYING MACHINES ON A LIMITED SCALE.

Norwegian Sport Is Becoming Popular—Introduced by Pioneers—Method of Taking the Jump—Over One Hundred Feet Can Be Covered at a Time—Accidents Seldom Happen—Regular Skee Regiments.

The Norwegian sport of skeeing is becoming popular in those parts of the Dominion where there is enough snow. Skees are elongated and narrow snowshoes. They are intended for carrying the traveler more rapidly over the snow than he could go on the ordinary snowshoe used by some of the northern American Indians. As a matter of fact, skees are used also as flying machines on a limited scale. That is where the fun comes in. Skee jumping is it called.

The Norwegians and Swedes who were pioneers introduced the skee. They had been used to it at home. They found plenty of deep snow and the necessary hills for the sport in their adopted country and gradually taught their neighbors, the usefulness and the joys of skeeing.

For skee jumping a steep, long hill is selected, where the snow is several feet deep. If no satisfactory hill be found, a sort of toboggan slide is rigged up for use as the first and

SKEE JUMPING.

steepest part of the course. The skeepmen climb to the top of this on ladders or walk up along the side of the snow covered track. Far down the course is the bump or take-off, which is an obstruction built of wood and covered with snow. The runner strikes this and leaps into the air. This is where the jump begins. The skillful jumper will make a hundred feet or more before landing.

The world's record jump was made four years ago in Norway. It is 134 feet 6 inches. That is almost phenomenal. But a number of Americans, most of them of Scandinavian extraction, however, have made better than a hundred feet. It is said that at a tournament where a hundred men are in competition the jumps will average sixty feet. The highly skilled men, of course, far surpass the average.

Skees are simply long strips or runners of pine or ash wood, about four inches wide and from six to ten feet long. They are turned up at the front end and are strapped to the feet about the middle. At this point the wood is an inch thick. The thickness tapers off toward the ends. The runner usually carries a long pole for steering or braking when going down, and for balancing himself when he takes the flying leap from the bump. Men who are experts in skeeing disdain the assistance of the pole. It is advisable for most persons to carry one, however.

The jumper who lands upon his feet and keeps going wins over the one who may jump farther, but falls into the snow. While this sport may seem dangerous to the uninitiated, accidents seldom happen. It is highly exhilarating, as may be imagined.

In Norway, Sweden, Russia and Denmark there are regular skee regiments in the armies. These soldiers carry their rifles and a bag containing thirty-six pounds of provisions, blankets and clothes. They carry triangular canvasses, which they put together at night to form tents.

10,000,000 Customers.

The British Government Postoffice Savings Bank, with its 10,000,000 customers, is quite entitled to call itself the bank of the people. A sum of over \$152,000,000 sterling is deposited, and one in every 4.35 of the population of the United Kingdom man, woman, and child, is a depositor. The average amount to the credit of each depositor is \$15 5s 4d.

The number of savings bank accounts opened by registrars of Companies under the provisions of the Workmen's Compensation Acts and the County Courts Acts continue to grow steadily. During last year 1,172 such accounts were opened and £93,508 deposited in them, an increase of some 20 per cent. on the previous year. The amount transmitted by soldiers stationed abroad shows an increase of nearly 40 per cent.

Ireland, curiously enough, has over 32,000 more depositors than Scotland, England and Wales, and, of course, heads the list.

A Musical Child.

She—Just look at this dear little boy. He always comes to the piano when I am playing. A musical child, isn't he?
He—Oh, very! I think he wants to blow the piano candles out.

DOVER COUNCIL.

The council met March 19th. The minutes of the last meeting were read and adopted. A communication was read from the Clerk of Tilbury East re a proposed ferry across the River Thames at or near the Townline road between Tilbury East and Raleigh. Tilbury council would furnish a sufficient grant to assist in running the ferry. No action taken.

A report was read from the committee re widening the River Road, etc., at lot 1, Dover East. From W. O'Mara and others asking that the Marden drain be repaired from lot 34, Baldon East, to the 16th concession line. A by-law was read and finally passed appointing fence viewers, poundkeepers and pathmasters. Two by-laws were read and finally passed, to confirm the agreements entered into between the townships of Dover and Chatham re the repair and improvement of the Doyle and Ouellette drains respectively. Mr. Foy reported re Bazile Matt's case at St. Joseph's Hospital.

Moved by Foy and Carron, that having examined the tenders received for printing, and compared figures, Con. E. Shea's tender be accepted for the whole work required to be done, his tender being the lowest.—Carried.

Moved by Crawford and Foy, that the report of the committee re widening the River Road be adopted.—Carried.

Moved by Foy and Fox, that 20 per cent. be deducted from the amount of statute labor tax of each beat, and the same be credited to

roads and bridges account in each respective division; also 20 per cent. of the amount to the credit of each beat on December 31, 1906.—Carried.

Moved by Fox and Crawford, that J. D. Johnson having lost his entire crop, buildings and a span of horses by fire, his taxes, \$21.40, be remitted.—Carried.

James Emery, Charles Jackson, A. Alexander and P. O'Mara were each paid \$1 for pathmasters' returns.

Moved by Fox and Carron, that the application of W. O'Mara, and others to clean out the Mardon drain be adopted and A. McDonnell be instructed to examine said drain, make an assessment, etc., and report.—Carried.

Mr. Fox was appointed commissioner to let and superintend the work of repairing the Hendrick South extension drain.

Moved by Mr. Carron, seconded by Mr. Fox, that the deficit charged to the McKenzie drain ratepayers be refunded to them, and charged to Roads and Bridges account, and the Reeve be instructed to give an order to each ratepayer for the same, and that the amount charged against the Hyatt drain, north of the 12th concession and east of Bear Line, for grading the Bear Line road, be placed to the credit of said drain, and charged to Roads and Bridges account; and that the motions passed on Dec. 27th, 1906, relating to these matters, be rescinded.—Carried.

Moved by Crawford and Foy, that St. Joseph's Hospital be paid \$40.00 for the keep of Bazile Matt to date, and that the Reeve be instructed to have Mr. Matt removed at once to the House of Refuge if possible.—Carried.

Moved by Fox and Carron, that Mr. Crawford be appointed to attend to the matter of widening the River road, according to the report in reference to the matter.—Carried.

Moved by Fox and Crawford, that \$800 be appropriated for roads and bridges for 1907, and apportioned in proportion to the assessment of each division for 1906.—Carried.

A number of accounts were ordered to be paid.

JOHN WELSH, Clerk.

Happy at Last

Her Husband no longer gets Intoxicated—Samaria's Tasteless Remedy Cured Him.

This lady says: "For the first time since I have been married I can be happy and content—my husband is cured of his bad habit of drinking. Several months ago you sent me a free sample of your remedy at my request, and without my husband's knowledge I gave it to him in his tea and food. I then got a full treatment and gave it regularly. It is wonderful, and I cannot sufficiently thank you for the blessing change it has brought to my home."

Free Package and pamphlet giving full and price sent in plain sealed envelope. Correspondence sacredly confidential. Address: THE SAMARIA REMEDY CO., 11 Jordan Chambers, Jordan St., Toronto, Canada.

Reciprocity Not to Be Negotiated By Bryce.

London, March 27.—Replying in the House of Commons yesterday to a question of Mr. Arnold Forster, a former war secretary, Foreign Secretary Grey said the general regulations respecting commercial reciprocity between the United States and Canada, which had been left unsettled in 1896, had not been re-opened in the recent negotiations of Ambassador Bryce and would form no part of them.

Secretary Grey had not heard that Secretary Root proposed the adoption by Canada of the United States tariff against Great Britain and all other countries and then the establishment of free trade between Canada and the United States.

Mr. Bryce had been empowered to do his best to settle the outstanding questions between the United States and Canada. Negotiations respecting commercial reciprocity would technically form part of such outstanding questions, but neither the United States nor Canada, so far as Great Britain was aware, had shown any desire to reopen the matter.

STRUCK BY LIGHTING.

Neatly describes the ceterity of Putnam's Corn Extractor. Roots corns out in short order. Causes no pain, leaves no scar, and gives perfect satisfaction. Remember there is only one "best"—that's Putnam's—fifty years in use.

Ran Down By Royalty.

Lisbon, March 27.—While Mia Pia, the Dowager Queen, the mother of King Carlos, and Prince Alfonso, brother of the King, were going to a theatre last night in an automobile the car ran over a woman carrying an infant. The child was killed and the woman dangerously injured. The Dowager Queen was overcome with emotion and wept. She had the woman taken to the hospital in the automobile.

READ AND YOU WILL LEARN

That the leading medical writers and teachers of all the several schools of practice endorse and recommend, in the strongest terms, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, "liver complaint," torpid liver, or oiliness, chronic bowel affections, and all catarrhal diseases of whatever region, name or nature. It is also a specific remedy for all such chronic or long-standing cases of catarrhal affections and their results, as bronchial, throat and lung diseases—except consumption—accompanied with severe coughs. It is not so good for acute colds and coughs, but for lingering, or chronic cases it is efficacious in producing perfect cures. It contains Black Cherrybark, Golden Seal root, Bloodroot, Mandrake root, Stone root and Queen's root—all of which are highly praised as remedies for all the above mentioned affections by such eminent medical writers and teachers as Professor Bartholow, of Jefferson Med. College; Prof. Finley Ellingwood, M.D., of Behnet Med. College, Chicago; Prof. John King, M.D., late of Cincinnati; Prof. John M. Scudder, M.D., of Hahnemann Med. College, and scores of others eminent in their several schools of practice.

As a rule, one must either climb ordig for things that are worth having.

Envy is a passion that everyone cultivates and everyone is ashamed of.

WILL TRY TO LIFT CUP.

Famous Aeronauts Who Will Represent Great Britain In Race.

Although four men have been chosen as the British team for this year's Coupe Internationale, Professor Huntington and Mr. Perrin are certain to be the actual team.

Mr. A. K. Huntington is professor of metallurgy at King's College, London. He first showed his interest in

PROF. HUNTINGTON.

ballooning about five years ago. Since then besides making private experiments, he has made between forty and fifty public ascents. He took part in last year's Coupe Internationale. For the last two years Professor Huntington has devoted a great part of his spare time to solving the question of obtaining a reliable aeroplane. His models are numerous; his experiments have been many; yet he is still to be reckoned among the pessimists so far as the immediate future is concerned.

Mr. Harold E. Perrin is the secretary of the Aero Club of the United Kingdom, and all the work of the organization on this side of the Atlantic with regard to England's share in the Coupe Internationale of 1907 falls upon him.

Mr. Perrin has always taken great interest in the question of locomotion. He holds the position of secretary of the Institute of British Carriage Manufacturers, which institute is similar to the Carriage Builders' National Association of the United

HAROLD PERRIN.

States. He took an active interest in the automobile movement in its early days in England, and is one of the founder members of the Automobile Club of Great Britain. Mr. Perrin has now soared higher and has already shown a personal and practical interest in his new position, by making several balloon ascents. Though definite arrangements have not yet been made, Mr. Perrin will probably accompany the English team to St. Louis in October next.

Consumption and Milk.

After five years' deliberation the Royal Commission on Tuberculosis has issued a most important report, which points to the danger of human beings contracting consumption from cow's milk infected with tubercular germs.

This conclusion directly contradicts the theory of Dr. Koch, who recently startled the scientific world by the statement that bovine and human tuberculosis was not inter-communicable—in other words that human beings could not contract consumption from eating meat or drinking milk.

The main conclusions at which the Commission arrived at were these: "There can be no doubt but that in a certain number of cases the tuberculosis occurring in the human subject, especially in children, is the direct result of the introduction into the human body of the bacillus of bovine tuberculosis, and there can also be no doubt that in the majority at least of these cases the bacillus is introduced through cow's milk. Cow's milk containing bovine tubercular bacilli is clearly a cause of tuberculosis, and of fatal tuberculosis in man."

The facts indicate that a very large proportion of tuberculosis contracted by infection is due to tubercular bacilli of bovine source. A very considerable amount of disease and loss of life, especially among the young, must be attributed to the consumption of cow's milk containing tubercular bacilli.

"Our results point clearly to the necessity of measures more stringent than those at present enforced being taken to prevent the sale or the consumption of such milk."

The least interesting portion of the report is a brief critical and historical sketch of the whole question of consumption research. Here uninteresting tribute is paid to Dr. Koch for his remarkable discovery of the "bacillus tuberculosis." At the same time, what are now considered the mistakes of that scientist are duly recorded.

Not Everything.

"Why do you have everything in your wife's name?"
"I don't. We have our children in my name."

From the Ovens to You

We bridge distance with our moisture-proof, dust-proof packages. Halifax and Vancouver are brought to the ovens' doors. Farms and small towns are put on the same plane with the big cities.

Mooney's Perfection Cream Sodas

are packed in 1 & 3 lb. air-tight packages, fresh, crisp, delicious—and reach you in the same condition, no matter where you live. AT ALL GROCERS

Mr. St. John Improving.

Toronto, March 27.—Hon. J. W. St. John, Speaker of the Legislature, who underwent an operation for appendicitis in the general hospital Sunday night, made splendid progress yesterday and at midnight was resting easily. It was stated that he was out of danger, unless unforeseen eventualities occur.

Two Cent Fare Bill Passed.
Harrisburg, Pa., March 27.—The Senate yesterday passed finally the House two-cent railroad fare bill.

ONE OF THE SADDEST STORIES.

First it was a cold, neglected, of course, and catarrh developed. Nothing was done and consumption followed. Watch the little cold, keep it from growing by using Catarrhoxone. Nothing simpler than inhaling the germ-killing vapor of this grand remedy. Colds and catarrh flies as before fire. Every trace of throat and bronchial trouble yields immediately. Catarrhoxone is scientific and absolutely guaranteed for preventing and curing catarrh and kindred ills. Two sizes, 25c. and \$1 at all dealers.

Kills Prohibition Bill.

Halifax, March 27.—The prohibition bill came up in the House of Assembly yesterday for a second reading. The galleries were packed, and great interest was taken in the anticipated debate.

Things took a quick turn, however, and the bill was killed by the Speaker, who ruled it out of order as unconstitutional.

SELECT YOUR MEDICINE WITH CARE.

In debility and weakness medicine should be mild and far-reaching. Many pills and purgatives are too harsh, are drastic instead of curative. Excessive action is always followed by depression, and knowing this, Dr. Hamilton devised his pills of Mandrake-Butternut so as to mildly increase liver and kidney activity, flush out the elementary canal, tone and regulate the bowels. Thus Dr. Hamilton's Pills eliminate poisons from the body, restore clearness to the skin, bring strength and that sweet restorer of health—sleep. Best medicine on earth, 25c. per box at all dealers.

Shot a Chinaman.

Port Arthur, March 27.—The coroner's jury in the case of the Nepigon shooting returned a verdict in effect that Ching, the Chinaman, came to his death from a bullet fired from a pistol in the hands of one Derome, but that in the opinion of the jury the shooting was accidental and without intent to do harm.

DON'T USE GREASY LINIMENTS.

A century ago they were popular. To-day people want something easy to apply, certain in result, and above all, a clean liniment. When Nervine is applied aches and pains disappear, as the pores absorb its soothing, healing properties. Nervine penetrates to the core of the pain, eases instantly, and leaves no oily, bad smelling memory behind. Good to take in, capital to rub on, and five times more powerful in destroying pain than any oily liniment. Don't fail to get a large 25c. bottle.

May Shell the Peasants.

Bucharest, Roumania, March 27.—Four thousand peasants from the districts of Teleorman and Vlaschia have joined forces, and are now marching on Bucharest.

A minor state of siege has been proclaimed here, and the military authorities have taken measures to prevent the revolted peasants from invading the city.

Should the latter refuse to retire, orders have been issued to the troops to use shrapnel shells.

The Pall of Rheumatic Pains.—When a sufferer finds permanent relief in such a meritorious medicine as South American Rheumatic Cure, how glad he is to tell it.

—four years ago three bottles of this great remedy cured him—not a pain since—isn't that encouragement for rheumatic sufferers? Sold by W. W. Turner, Chatham.

SLAVIC SOCIETY CUP

HEAD OF MOVEMENT MAKES PRESENTATION TO ROOSEVELT.

Recognition of His Efforts in Behalf of Peace—Trophy Stands Two Feet High—General Count Tcherep-Spiridovich Travels From Moscow to Bring the Gift—Fine Example of Slavic Silversmith's Art.

Gen. Count Arthur Tcherep-Spiridovich, president of the Great Slavic Society in Moscow and head of the Slavic movement in Europe, has presented President Roosevelt, in behalf of the Slavic society, a handsome cup, in recognition of Mr. Roosevelt's efforts in bringing about world peace. The presentation recently took place in Washington.

What the Slavic society is hardly realized in Canada, though it is estimated that in America the number of persons of Slavic origin or immediate ancestry is something like ten millions.

Though the society is in a sense a secret order, and has five thousand se-

cret agents scattered about Europe, its policy is of a peaceful order, though some European Governments have not always regarded it in that light.

Gen. Tcherep-Spiridovich has been the recipient of many medals for bravery. He has a brother who is a member of the Tsar's bodyguard. His family is descended from the former Dukes of Lithuania, one of whom for his bravery in the battle of Gruznwald, in 1410, received the appellation of "Tcherep," which means "daring."

The cup which was presented to President Roosevelt is a fine example of Slavic art. It was made in Moscow by the most skilled silversmiths, and is of silver and gold, ornamented with enamel. The base is three lion's legs. Standing two feet high, it is inscribed in Slavic characters and bears also the initials "T. R." Cups of this sort are presented, it is said, only to crowned heads and great rulers.

AMEER RETURNS HOME.

Has Learnt Many Things During His Stay in India.

After more than a two months' visit to India, the Ameer of Afghanistan, Habibullah Khan, has recrossed the frontier into his own country, and has started for Kabul. His Majesty, who was for the first time in India, was for the first time officially designated as "Your Majesty," in a telegram of welcome from King Edward when the Ameer entered India, which is regarded here as significant.

While no proposals of a political or military character have been made on either side, and no modification of the British Afghan relations as established by the treaty of Kabul in 1905 was suggested, the visit is regarded as further welding the ties which make Afghanistan a buffer state against a possible Russian advance on India.

The Ameer, during his stay in India, went up in balloons, became a keen motorist, as a result of which he has taken several automobiles back to Afghanistan with him; developed an immense liking for playing bridge whist, and made the Afghan courtiers learn the game, so that he could play it at Kabul.

The Ameer sent from the frontier a message, the original of which was written in his own hand, which has caused marked satisfaction among the Indian officials. The message begins: "In the name of God, and goes on to declare that 'during my short tour of India I have made more true friends for Afghanistan than could have been made in twenty years if I had not paid the visit.' The Ameer concludes with expressing the significant desire that his message be published in the newspapers 'for the information of the whole world.'"

For the Royal Baby.

Word from Madrid says that preparations for the reception of the expected royal heir are about completed. The statement says the baby's cradle will be the one in which Alfonso XIII. slept. It is surmounted by two pillars bearing the royal crown of Spain, the pillars support columns of old Brussels lace. The coverings are hand-embroidered in garlands of rosebuds and butterflies. At the request of Alfonso, all the baby's clothes are of Spanish make, a great portion of it made in the Spanish royal family.

The trimmings used are of priceless old Mechlin lace, which has been used by the Spanish royal family since the days of Ferdinand VII. The christening robe, which is made by a Madrid firm, is lavishly adorned with Irish lace.

It's so easy to Cure Rheumatism.

Such a simple treatment. So absolutely certain to cure. Just take Bu-Ju. Not a few doses—don't stop even after a few boxes. Give Bu-Ju a fair chance—take it faithfully; carry out the directions exactly; and Bu-Ju will cure you as surely as 2 and 2 make 4.

Bu-Ju
The Gentle Kidney Pill

cures Muscular Rheumatism, Inflammatory Rheumatism, Sciatica, Lumbago, because it removes the CAUSE of these troubles.

YOUNG'S POINT, P. O.

"Have tried your Bu-Ju Kidney Pills, and found them very beneficial for Rheumatism and pain in the back. They are certainly a blessing. My husband is also receiving great benefit from Bu-Ju. He has had great pain in the small of his back, but is so much better now."

Mrs. A. C. KIDD.

Rheumatism, in any form, means irritated nerves, and is caused by uric acid being deposited in the blood stream. The only way uric acid reaches the blood is through weakness or disease of the Kidneys. The only way to cure weak, diseased Kidneys, and thus cure Rheumatism, is to take Bu-Ju.

sec. a large box. At all druggists, or sent on receipt of price.

THE CLAFIN CHEMICAL CO., LIMITED
WINDSOR, ONT.

Man and His Dress.

The well dressed man wears clothes that no one ever notices; at business, except in the very warmest weather, usually dark. No one ever notices clean linen, while linen soiled ever so slightly is very conspicuous. No one ever notices a hat unless it is of ultra shape, dirty or shabby. No one ever notices shoes unless they are loud or need blacking or are run down at the heels or shabby. No one ever notices clean finger nails, while those needing attention are always conspicuous. The man should not be lost sight of by the conspicuousness of his clothes, either from being overdressed or shabbily dressed.

NERVOUS DEBILITY

muscular weakness—all wasting blood and nerve diseases—yield quickly to the tonics contained in Mira Tablets.

They increase the red corpuscles in the blood and oxygenate the system. Most helpful in many forms of female weakness, anemia, pain in the back, loss of memory—and other evils attendant on a debilitated condition of the body.

At druggists—50c. a box—or for \$2.50—order from The Chemists' Co. of Canada, Limited, Hamilton—Toronto. (Note the trademark—)

About the Only Place.

A company of settlers in naming their new town called it Dictionary, because, as they said, "that's the only place where peace, prosperity and happiness are always found."

The notion of God which makes him a manufacturer of footstools, our enemies being the raw material, is still popular in some quarters.—Puck.

Every grocer keeps WINDSOR SALT. No other is so pure, so delicate. Best for the table.

Her "No."

Tom—Bess said "No" to me last night, but I don't think she really could tell why she did it. Nell—Oh, yes, she could. She told me. Tom—Did she? Nell—Yes; she said she didn't think you'd take "No" for an answer.

NO WOMAN CAN BE STRONG AND HEALTHY UNLESS THE KIDNEYS ARE WELL

When the kidneys are ill, the whole body is ill, for the poisons which the kidneys ought to filter out of the blood are left in the system. Then how important it must be to see to it that this system of sewerage be not clogged up. Those who have never been troubled with kidney trouble know not the misery and suffering which these afflicted undergo.

Doan's Kidney Pills are a specific for all kidney troubles. They begin by healing the delicate membrane of the kidneys and thus make their action regular and natural.

They help the kidneys to flush off the acid and poisonous impurities which have collected, thus clearing out the kidneys, bladder and all the urinary passages.

Doan's Kidney Pills are entirely vegetable, and may be safely taken by young and old. Let Doan's Kidney Pills do for you what they have done for thousands of others, that is, cure you. Mrs. John Young, Harwood, Ont., writes: "I was troubled with my kidneys for some time and was so lame I could scarcely get around. After using two boxes of Doan's Kidney Pills, I am completely cured. I find there is nothing like them for the cure of all kidney troubles."

Doan's Kidney Pills are 50 cents per box or 3 boxes for \$1.25 at all dealers or mailed direct on receipt of price by The Doan Kidney Pill Co., Toronto, Ont.

TO REFOREST SPRUCE.

Paper Required For Printing Daily News May Run Short.

A Timber Valuator writes regarding the pulpwood situation: "In view of the growing scarcity of forest products many substitutes have been offered and suggested to take the place of wood for building material, yet, notwithstanding the near approach to a timber and lumber famine, and the high prices now being paid for lumber, it is still the cheapest, safest and best building material. Brick, cement and steel have been experimented with to a considerable extent, but nothing has yet been discovered or invented that will serve to check the increasing demand for lumber as a building material. When I was a boy boys were used almost exclusively for making all kinds of paper, but to-day I have it from good authority that 85 per cent. of all the paper manufactured is made from wood pulp, chiefly spruce. I was recently given a list of ten newspapers the daily issue of each of which required the product of a well-timbered acre of spruce. To one that knows approximately the total amount of raw material available it does not require much of a mathematician to figure out how long it will require to exhaust the supply at the present rate of consumption."

Almost Denuded of Trees.
Pulp mills on the west side of Lake Michigan have been getting their supply of spruce from Ontario for several years. Going east through Ontario and nearing the Ottawa River we gradually run out of the pine belt and find the spruce timber predominating through the Provinces of Quebec, New Brunswick, Nova Scotia and the State of Maine. But, like the Western States of Michigan, Wisconsin and Minnesota, they have become almost entirely denuded of spruce, even that suitable for pulpwood, with the exception of the Province of Quebec, which is now producing more pulpwood, pulp and paper than all other Provinces or States. Within the past two years there have been established seventeen pulp mills or roasting plants north of St. Lawrence River, the products of which are shipped to New York and other eastern markets. I would suggest that the Forestry Association give some attention to the reforestation of spruce pulpwood as well as to the reforestation of pine, or some day we may be short of "news" paper.

BORN NEAR BRANTFORD.

Distinguished Leader Commenced Education in Industrial Indian School.

As is generally known, Dr. Oronhyatekha was a full-blooded Indian, his parents being of the Mohawks, whose reservation is near Brantford. His English education was begun in the Industrial School, near Brantford, established for the training of young Indians, and supported and maintained by the New England Co., whose headquarters are in London, England, wherein he acquired the rudiments of

DR. ORONHYATEKHA.

an English education. His desire for knowledge took him away from home, and for a time he studied at the Wesleyan Academy, at Wilbraham, Mass. Being without means, he had at the end of his career an opportunity of developing those qualities of self-reliance, perseverance, and resolution that have been such essential factors in the success that has since attended his efforts.

Canadians had reason to honor Dr. Oronhyatekha. He was a man who could be traced to an origin in the old lands across the sea. Oronhyatekha was a Canadian by birth. So are other able men. But Oronhyatekha was Canadian by ancestry. In this double sense of birth and ancestry he was a unique representative of his country, perhaps the greatest Canadian of his time.

The life of Oronhyatekha has left its memorials in clothing for children orphans who would be hungry, in comfort for widows who would be in want if the genius of this Indian chief had not carried the blessings of insurance into lives and homes that would have never been reached by the activity of the old line companies.

Great Boon In Trade.

Mr. J. S. Larke, Canadian Trade Commissioner to New South Wales, reports to the Trade and Commerce Department that there is a great boom in trade in Australia. The total trade produced 24,000,000 bushels of wheat, which will allow of 13,000,000 bushels being exported.

The New Zealand drought has been broken, and trade prospects, which had been very poor, are now improved.

Mr. Larke says he is distributing catalogues of goods furnished by the Canadian Manufacturers' Association, especially as regards rubber goods, saddlery and carriage materials, engines, machinery, brushes, glassware and brass goods. He, however, does not expect much result unless Canadian firms appoint direct agents.

A RECREATION CLUB

(From Our Own Correspondent.)
Blenheim, Mar. 27. — The annual meeting of the Blenheim Recreation Club was held last evening.

The Treasurer's report showed a balance of \$475 in Trust Fund, which with accrued interest and balance in Treasurer's hands amounts to over \$500.

Officers for the ensuing year were elected as follows:
Hon. Pres.—R. L. Gosnell.
Pres.—Geo. A. Carnes.
Vice-Pres.—Geo. Taylor.
Secy.—Thomas E. Taylor.
Treas.—W. H. Lugsden.
Directors—E. G. Thompson, W. J. O'Brien, E. W. Knight, Theo. Pickering, N. L. McLeod.
Concert Committee—J. Mercer, C. L. VonGuten, Denholm and Wm. Henry.

The committee are planning to have the celebration to be held on May 24th the biggest and best yet held.

The longest day soon comes to an end.

SIR WILFRID WILL GO

Continued from Page One.

Britain's treaty obligations to foreign countries. When approached on the subject of imperial defence Sir Wilfrid's reply to the imperial authorities had been that Canada was establishing a local naval force in the waters of Canada. Mr. Borden would like to know how far the Government had progressed with its naval scheme.

The Cattle Embargo.
He would like to have known what was Canada's attitude on the cattle embargo? It was known the embargo had been instituted and maintained, not because of disease in Canadian cattle, but as a measure of protection to the British farmer. The British Government could protect as they liked, but it was not fair that that protection should be effected by an embargo which casts discredit on Canadian cattle.

Sir Wilfrid Laurier, in reply, said the very fact that Canada had offered no suggestions to the conference was the best evidence that the relations between Canada and the Empire were so satisfactory that they could not be improved. He was ready to go to London, not to make suggestions, but to receive those of the Home Government and the sister colonies.

He did not view with a permanent imperial council. The only question in which Canada was particularly interested was the trade question, and in this Canada had nothing to offer.

Her position had been laid down at the conference of 1902, namely that Canada had already given a preference, and if the British people would reciprocate, Canada would go one step further than she had done. But this policy had not found favor with the British people, and it was for them to make up their own mind without dictation from Canada.

The British Empire could only be maintained upon the principle that every one of the nations which compose it shall be allowed to determine for itself what is best for it. Sir Wilfrid's own view was that the ideal condition would be to have free trade between all parts of the British Empire. But at present that was not possible.

Will Not Consent.
As for imperial defence, he did not know that existing conditions could be improved upon. Certainly Canada would never consent to be drawn into the vortex of European militarism. In the way of immigration he thought the present policy a good one. Owing to it an increasing number of immigrants were coming from the British Isles.

When in London he could take up with Premier Deakin the question of preferential trade with Australia, and would doubtless accomplish an arrangement.

The cattle embargo did not seem to be a proper matter for the conference, but the Government would continue to press upon the imperial authorities the advisability of its withdrawal.

IF IT'S FROM LYONS IT FITS.

LYONS' CUSTOM-MADE GARMENTS.

are entirely different from the so-called "made-to-order" clothes that you buy at ready-made stores.

LYONS' garments are cut to a measure and tried on and fitted by a practical tailor and cutter of long experience.

The requirements of each particular form are carefully noticed and changes made accordingly.

They are built by expert journeyman tailors in our own work shops, and in every detail of style, fit, workmanship, etc., are unsurpassed.

Our system of purchasing direct from the mills and selling for cash eliminates the middleman's profit on the one hand and the losses of a credit business on the other, and enables us to put our well tailoring clothes on your back at

CHILD LABOR IN SHOPS

Continued from Page One.

the allegations set out in the bill, and into any other matters which the board may deem necessary in connection therewith, report to the House whether or not it is reasonable that such bill or the part thereof relating to the matters aforesaid, should be passed, and what alterations, if any, should be made in the same, and the board shall make such enquiry accordingly and shall sign the same; and the said report, bill and petition shall be transmitted to the clerk and the report shall be read by the clerk at the table and shall be entered on the journals of the House, and the bill together with the report shall stand referred to the Standing Committee on Private Bills.

Municipal Debts.

Hon. Mr. Whitney, speaking on his motion, said the Legislature daily was subject to the greatest possible danger in private legislation getting through which should not be allowed to pass. He therefore thought the Railway and Municipal Board should pronounce on its propriety and desirability.

Mr. Graham concurred. Some municipalities, he said, were up to the limit in indebtedness and carrying illegal overdrafts from year to year. The proposal would not divest the Legislature of the ultimate responsibility.

Law Reform Motion.

The first "want of confidence" motion is promised by the following notice:

Mr. Cameron (West Huron) gives notice that he will on Thursday next, the 4th day of April, move that this House regrets that His Majesty's advisers have not introduced in the House any measure respecting the subject of law reform.

The House adjourned for a week for Easter tide.

TWO MORE WELLS

The Volcanic Oil & Gas Company, who have the franchise for supplying the natural gas used in the city, have added two more wells to their possessions in the Tilbury field. One of these is situated on the Richardson property, just across the road from the Maple City Oil & Gas Company's well. Gas was struck there yesterday and they now have a well producing a million and a half feet per day. It will be drilled in and improved right away.

The other new well is on the Graham property. This well is a good producer, now making two million and a half feet per day.

This amount of gas added to the amount they already have in the field assures them of enough gas to supply this city for almost an indefinite period of time.

YOUR EASTER HAT

Is of importance this week. We are showing the most popular of the new shapes of such makers as Christy, Stetson and Mallory.

The hat to exactly suit you is bound to be here. See our Easter window. Step in and see some on. You can never tell how they'll look till you see one on your head.

Prices \$1.50 to \$5.00.

(BOTH HARD AND SOFT HATS).

OPEN THURSDAY NIGHT.
