

## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires: **Various pagings.**

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below /  
Ce document est filmé au taux de réduction indiqué ci-dessous.

REPORT  
OF THE  
CANADIAN COMMISSION

AT THE  
INTERNATIONAL EXHIBITION OF PHILADELPHIA, 1876.

---

*To His Excellency the Right Honourable Sir Frederic Temple, Earl of Dufferin, Viscount and Baron Clandeboye of Clandeboye, in the County of Down, in the Peerage of the United Kingdom, Baron Dufferin and Clandeboye of Ballyleidy and Killeleagh, in the County of Down, in the Peerage of Ireland, and a Baronet, Knight of the Most Illustrious Order of St. Patrick, and Knight Commander of the Most Honourable Order of the Bath, Governor General, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY,—

We, the Canadian Commissioners at the International Exhibition, Philadelphia, 1876, beg leave to report:—

At an early day after the formation of the Canadian Commission for the Centennial International Exhibition at Philadelphia, the character of the report to be made at the conclusion of its labours came up for consideration. An inspection of the reports of the British Commissions at Paris and Vienna showed that these documents were rendered voluminous by disquisitions in separate papers upon

the progress of science as applied to the arts, and by comparisons between the progress in this direction made respectively by the leading nations of the civilized world. It was a grave question for the Canadian Commission whether they should attempt to present any essays of that kind, as a part of their report, but after mature consideration it was determined that it would be unwise to do so. Several reasons concurred in causing the Commissioners to arrive at this decision. If such a report was to be made, it ought to be of a character intrinsically valuable, and likely to reflect honour upon the Dominion throughout the world. But it was obvious, even if they possessed the necessary amount of varied technical knowledge for such a work, that the Commissioners personally would be too much occupied with the practical administration of the charge committed to them to make it possible for them to devote adequate time to investigation and study. It might have been possible to procure assistance competent to deal with some of the subjects embraced in such a report in a manner creditable to the country; but several men of leisure as well as knowledge would be required for the work if it were to have any completeness, and the expense of a competent and sufficient staff engaged for the requisite time on the subject, and that of subsequently printing several volumes as the result of their labours, seemed to be far greater than would be justified by the fund at the disposition of the Commissioners. It was thought possible that upon some special subjects there might be value in technical reports made from a peculiarly Canadian standpoint; but, in general, it seemed obvious that students of the useful or fine arts would be sure to find a more comprehensive view of the lessons to be earned from the Exhibition in the elaborate productions of the specialists employed by the governments of the great

nations of the world, than could be looked for from anything the Canadian Commissioners could hope to produce.

It is for these reasons that the following report is almost confined to an account of the manner in which the Commissioners fulfilled the duties which arose out of their acceptance of office. Any other observations will be of a very general nature.

# REPORT.

---

When the Government of the United States determined, by way of celebrating the hundredth anniversary of their independence, to hold a great International Exhibition at Philadelphia, it invited all the nations of the world to take part in the festival. Very soon after this invitation had been issued, many gentlemen engaged in the industries of Canada were impressed with the idea that this country should join in the proposed Exhibition. Representations having been made to this effect to the Government of the Dominion, it was determined that Canada should appear in the great assembly of nationalities. In pursuance of this determination, the subject was placed in the hands of the Hon. L. Letellier de St. Just, Minister of Agriculture, and a Commission was appointed, of which that gentleman became the *ex officio* president. This Commission consisted, in the first instance, of the Honourable Senator Penny, of Montreal; Francis W. Glen, Esq., President of the Joseph Hall Manufacturing Company, of Oshawa; and the Honourable Senator Wilmot, of New Brunswick—these three gentlemen being intended to represent the Provinces of Ontario and Quebec and the group of Maritime Provinces. Joseph Perrault, Esq., was named Secretary to the Commission.

Mr. Glen resigned very shortly after his appointment, and the Commission thus lost the advantage of his practical mechanical knowledge, which would doubtless have been very valuable. He was succeeded by David McDougall, Esq., of Berlin; but the Commission afterwards lost the important services of the Honourable Senator Wil-

mot, a practical agriculturist, by his declining to proceed to Philadelphia.

Very soon after the organization of the Commission, it became a subject of great anxiety to its members to determine the method in which the work before them should be carried out, by the collection of an adequate number of specimens of the various products of the Dominion. Canada and some of the other Provinces had already made their appearance at several international exhibitions, but it was felt that the manner in which she should show herself at Philadelphia must be on a much more extended scale than at London, Paris, or Vienna. This was made necessary by the circumstance of the exhibition taking place on the Continent of which Canada forms a part; where, therefore, if she was seen at all, it must be to take rank as an important American power. Moreover, her proximity to the place of exhibition made it obviously necessary that the plan adopted should be a widely comprehensive one, embracing not a few exhibits selected by the Commission itself, but affording fair scope to the ambition of the whole body of the Canadian people. It seemed to be impossible, for pecuniary reasons, to imitate the example of preceding Exhibition Commissions, by purchasing any considerable part of the objects to be shown. It would be, on many accounts, unsatisfactory to accept only a small number of chosen articles; and it would be a task too gigantic and invidious for the Commissioners themselves to make selections of objects deemed meritorious enough for national display. Within certain limits it was desirable that every person anxious to exhibit at Philadelphia should find his appropriate place there; but as it was also found necessary that the Commission should provide for the larger part of the expenditures, this condition manifestly demanded an authority

by which some scrutiny should be exercised to prevent a large expenditure on comparatively insignificant and unworthy articles. The Commission, after mature deliberation, and having first discovered great difficulties in the way of inducing exhibitors to take part in the enterprize, unless guaranteed against unknown expense, determined that it would be necessary to assume the whole cost of the conveyance to Philadelphia, the arrangement of, and the care there, and the reconveyance to Canada of all goods destined for the Exhibition. In order to reconcile this very liberal undertaking with the conditions already described, the Commission invited the assistance of the several Provincial Governments, which was at once heartily accorded them, and each of the Provincial Governments obtained from their respective legislatures some pecuniary appropriation for the purpose of aiding in the general design. An Advisory Board, composed of competent gentlemen, was named in each Province, under the direction of one of the members of the Provincial Ministry, who also appointed a Secretary. The names of the gentlemen composing these bodies will be found in the Appendix. The Chairman of each Advisory Board was also constituted an Honorary Commissioner.

To all these Advisory Boards the Commission committed the task of deciding what articles should be accepted, it being understood that in extraordinary cases only, reference should be made to the Commission itself. By this elastic and comprehensive plan, it was hoped to obtain extended sympathy throughout the country, and that hope was justified. The method adopted enlisted in the public service official and unofficial gentlemen of great zeal, experience, and local and technical knowledge in all parts of the country and connected with all departments of industry ;

and this early opportunity is taken of acknowledging how much the success that may be thought to have been attained is due to the liberal support and confidence of the Provincial Governments, and the active and intelligent co-operation of the Advisory Boards. In spite of the offers to exhibitors, believed to be very liberal, already described, considerable difficulty was still experienced in procuring an adequate representation of our products and industries, but this was overcome by the earnest and judicious efforts of these gentlemen.

It may, perhaps, be fitly stated that two things appeared at first to be great obstacles to obtaining the co-operation of the industrial interests of the country, and, no doubt, did at last prevent many interesting articles from being sent to Philadelphia. One of these was the illiberal tariff of the United States, which made it impossible to hope that any transactions with the citizens of that country could arise from the comparison of goods and prices; the other was the great financial depression so universally felt.

With a view to create emulation and induce exhibitors to offer their goods, it was also resolved by the Commission to give a certain number of gold, silver and bronze medals to Canadian exhibitors only, and in order to secure impartiality in the awards it was promised that they should be made by foreign judges.

When the subject was brought before Parliament, great interest was manifested by members of both Houses, and a strong wish was expressed that the appearance of Canada, as one of the nations of the civilized world, at Philadelphia, should be worthy of the country and its enterprising people. An item was placed in the estimates and unanimously carried, to appropriate a sum of money, which, it will be seen, has proved amply sufficient to carry

out the intentions of Parliament in a manner which the Commissioners venture to hope has been in accord with this patriotic feeling.

In previous exhibitions Canada had gained high reputation for the scientific and complete collection of minerals which she there displayed. The extension of her territory by the addition of other Provinces, some of them rich in mineral deposits, made it extremely desirable that she should maintain this reputation in the United States. For this purpose the Commission early invited the assistance of A. R. C. Selwyn, Esq., of the Geological Survey of the Dominion. A sum of money was also at once set apart for the special expenditure he was expected to incur in procuring new specimens of this kind of public wealth. As many of these were expected to come from the Western Provinces, the intelligent services of this gentleman were also obtained for collecting at the same time, other natural and economical products of these extensive territories. Mr. Selwyn and his staff exerted themselves with much spirit in carrying out the wishes of the Commission in both particulars.

In the Provinces of British Columbia and Manitoba, sums of money were in each case appropriated by the Commission to be used in such a manner as should seem good to the Advisory Board for procuring interesting illustrations of their respective Provinces.

As soon as the Government of the Dominion had determined to accept the invitation of the Government of the United States, and had for that purpose constituted a Commission, application was made for the space likely to be required in the various buildings which it was intended to erect in Fairmount Park, the place chosen for the Exhibition. This application was one of the earliest which reached the

American authorities, and the Commission has reason to believe that its promptitude was regarded as a compliment by those to whom it was addressed. It was acceded to with much cordiality. Large spaces were devoted to the purposes of the Dominion in all the departments of the Exhibition; and it may be said that Canada obtained an excellent position in each of them.

The Exhibition in Philadelphia was placed under the direction of a Board of Commissioners, appointed by the Federal Government, and a Board of Finance, appointed by, and representing the stockholders, who supplied a large part of the capital. The Board of Finance was ably presided over by John Welsh, Esq., of Philadelphia, and all other arrangements, including especially those which concerned Foreign exhibitors, were confided to the Commission, under the Presidency of General Hawley, whose Chief Executive officer was General Goshorn, with the title of Director-General. The ground selected consisted of 236 acres in Fairmount Park, a large space of ground owned by the City and devoted to the recreation of the population.

The buildings, properly belonging to the Centennial Commission, were scattered around this area, and consisted of the following:—

	Feet (Length).	Feet (Breadth).
The Main Building.....	1,880	464
Machinery Hall.....	1,400	360
Agricultural Buildings.....	826	540
Ladies' Pavilion.....	180	180
Carriage Annexe.....	392	277
Judges' Hall.....	152	115
Mineral Annexes to the Main Building.....	500	50
Pomological Hall.....	200	180
Horticultural Hall.....	383	193
Memorial Hall.....	365	210
Art Annexe.....	360	200
Photographic Gallery.....	258	107
Mineral Annexe.....	500	50
Waggon Building.....	150	120
Dairy Building.....	120	110
Shoe and Leather Building.....	392	277
Brewers' Building.....	272	96
Saw Mill Shed.....	200	60

Besides these, special buildings were erected, chiefly at the expense of particular interests. Amongst these may be noted the Federal Building, for collections belonging to the Government of the United States and objects illustrative of the equipment of their army and navy, and of the processes employed in their civil departments. This was under the able supervision of Professor Baird.

Special grants were also made gratuitously to the various States of the Union, and to several nationalities, of sites upon which to erect buildings for their particular purposes. The Commission in this way granted to the Canadian Commission one of these sites in the best part of the grounds.

Firms and individuals desirous of making large displays in special buildings were allowed to erect them on payment of various sums. The whole number of buildings of one kind or another within the gates was about one hundred and seventy-five.

It may be interesting to compare the space thus occupied with those which were taken up by the buildings in the previous great exhibitions of the world, with the cost.

#### ACRES UNDER COVER OF VARIOUS EXHIBITION BUILDINGS.

London,.....1851.....	20 Acres.....	\$1,464,000
New York,.....1853.....	6 ".....	500,000
Paris, :.....1855.....	30 ".....	4,000,000
London,.....1862.....	24 ".....	2,300,000
Paris,.....1867.....	41 ".....	4,596,763
Vienna,.....1873.....	50 ".....	9,850,000
Philadelphia,.....1876.....	75 ".....	8,500,000

At a short distance from Fairmount Park was a space devoted to the exhibition of live stock, consisting of an area of forty acres, with suitable sheds.

The duty imposed upon the Canadian Commission embraced the illustration of all departments of Canadian

industry. The mining, lumbering, agricultural and manufacturing interests, as well as those concerned in the rearing of cattle, were all to be suitably represented. Accordingly, some room was required in almost all of the buildings above enumerated, as well as suitable space upon the ground devoted to the display of cattle. In the main building, chiefly devoted to manufactures, the Commission received the allotment of a space of 30,000 square feet, which it may, perhaps, be well to say was exactly equal to that devoted to Spain and Russia together. It occupied the floor between the main avenue and the northern wall in one direction, and two cross avenues of the building in the other, was immediately adjoining the space occupied by Great Britain and Ireland, and faced that of Spain and Russia on the other side of the avenue. The other British Colonies adjoined it on west side. The Canadian exhibits occupied a space, taking all the buildings into consideration, larger than that devoted to any nationality other than the United States, with the possible exception of England.

In the Machinery Hall, the area of 5,000 square feet devoted to Canada was immediately in front of one of the main doors of the building, and consequently remarkably conspicuous. She was favored by a somewhat similar arrangement in the Agricultural building, her space having been allotted at the corner formed by the two main avenues, close to one of the doors. The area here was 15,000 square feet. She had also appropriate spaces devoted to her in the Ladies' Pavilion and the Carriage Hall, a complete room in the annexe to the Art Gallery, two compartments in the Photographic Gallery; about 3,000 feet in the Dairy Building; and 5,000 feet in the Pomological Hall.

Inasmuch as the Commission had undertaken the task not only of transporting, but of caring for the goods com-

mitted to their charge, it became necessary for them to provide the requisite number of show-cases for that purpose. With this object, the Secretary devised a suitable plan for glass cases. It was also necessary that these cases should fulfil certain conditions. They must be sufficiently handsome not to degrade the general effect; at the same time, as a very large number of them were required, they must be purchased at a reasonable rate. It was also desirable that they should be capable of being used after the Exhibition, without loss. To meet these requirements, the cases must be more or less adapted to every class of exhibit, because it was impossible for the Commission to be aware beforehand of the nature and the variety of goods which they might have to display. And, again, economy could only be obtained by the whole being made upon the same plan, so as to permit of the manufacturer repeating in their construction the same process a great many times. It is believed that the design prepared for the Commission met, in a large measure, all these requirements. The cases were almost wholly of glass, and thus enabled the interior space to be fully occupied by goods, which could be seen from all sides. In point of utility, capacity and beauty, they fulfilled, to a large degree, all the essential conditions, and they compared in these respects very favourably with other cases used at the Exhibition, which had been made to meet similar exigencies. The number of the cases of upright pattern was ninety, besides which there were ten counter cases. At the close of the Exhibition they were sent to Ottawa, and are being used by the Government, for the Patent Office and Museum.

Another care of the Commission was, of course, as to the means of transport, and arrangements were at once made with the Grand Trunk, and other railroads of the

country, by which these roads were brought under the general system, adopted by the railroads of the United States engaged in conveying goods to the Exhibition. These railroads undertook to convey all goods to and from the Exhibition for a single fare; it being understood, however, that no rebate would be made on account of goods that were sold at Philadelphia, or that for other reasons were not returned to the place of export. This arrangement was regarded as favorable, and has been carried out by the railway companies with good faith and a manifest desire to facilitate all the operations of the Commission.

To expedite the conveyance of such goods as were to be forwarded from the Maritime Provinces, the Hon. Minister of Marine and Fisheries placed at the disposal of the Commission the steamship "Lady Head." This vessel, under the command of Captain George Matson, accordingly carried all but a small portion of the Maritime Province goods to the port of Philadelphia, from whence they were transported by rail to the exhibition grounds. The Secretary of the Commission arrived at Philadelphia to prepare for the opening, on the 24th day of March. The first cars arrived at that place on the 1st day of April, and the last on the 4th day of May.

The whole number of cars arriving before the opening, which was fixed for the 10th of May, was 150, of these 100 came from Ontario and 30 from Quebec. The goods from the Maritime Provinces, as already stated, were brought by steamship. When unloaded, they required cars for their transport, which together with those coming from British Columbia made up the additional 20.

The Commission, on arriving at Philadelphia, found that the task of receiving, unpacking, and assorting the goods committed to their charge before the opening on the

10th May required no little exertion for its accomplishment. Besides preparing the cases in the main building and filling them with goods, it was necessary that every package should be passed by the Custom House authorities, and that after the packing cases had been emptied they should be duly receipted for, in order to their storage by what was called the Terminal Agency.

Platforms were also required for musical instruments, sewing machines, and some other objects in the main building, and some goods had to be set up in a particular and expensive manner. The Geological Department, and the very striking display of the Ontario Educational Department, provided by the Hon. Crooks, both required much time and labour; but the Commission were relieved from more than the general care of these exhibits by the direct supervision of Professor Selwyn, of the Geological Survey, and Dr. May, of the Educational Department of Ontario.

In the Machinery Hall again, and in the Agricultural Building, machines had to be set up by skilled mechanics, and preparations had to be made to connect them with the shafts or steam pipes by which many of them were to be set in motion. It was also necessary to supplement the shafting and belts provided by the Centennial Commission. Operations were going on at the same time in six buildings, and some of these were at a distance of nearly a mile from the others. This dispersion naturally made the work of supervision much more laborious than it would otherwise have been. However, by the zealous assistance of the superintendents and workmen employed by the Commission, everything was sufficiently advanced by the opening of the Exhibition for that event to come off without discredit to the Canadian Department; and the Commission had the satisfaction of knowing that the work of no other nationality

was farther advanced towards completion than that of Canada upon the 10th of May.

The exhibition of lumber was, from the first, matter of much anxiety to the Commission. Gentlemen connected with that highly important interest were generally anxious to exhibit a large quantity, amounting, according to estimate, to three hundred thousand feet. It was thought by them that the lumber interests of the United States would be very largely represented, and that in order to impress the spectator with the extent of our forest resources it would be necessary that we should cover a great area with this description of goods. The charges, however, of transporting such bulky material were so considerable as to induce the Commission to object to this, as they thought, exaggerated proposal. They finally consented to take ten thousand feet of each description of lumber, on condition that they should be allowed to sell it, and to pay freight out of the proceeds. Several firms engaged in the trade furnished considerable quantities of the choicest description of sawn lumber, and the Quebec and New Brunswick Governments expended money liberally in procuring round and square logs, some of very large size. Much interest was excited among visitors by specimens of the Douglas Pine from British Columbia; four of these had their places in the so-called Log House. The two largest were a section and a plank, both from trees eight feet in diameter. On the arrival of this timber, however, at Philadelphia, the Commissioners ascertained that, as they had warned the gentlemen connected with the lumber interest, no place had been appropriated for the exhibition of sawn lumber in large quantities. Indeed there was no other exhibit of that kind. After much consideration, therefore, they arrived at the conclusion that it would be impossible to show the deals and planks in their hands, ex-

cept it were in the interior of the building designed for the plot of ground already mentioned, as having been conceded to them by the American Commission. This building was at first intended only for the purpose of showing square and round timber, the interior to be vacant and to serve, like the various houses erected by the different States, as a place of meeting for visitors from Canada. They felt that it might be considered a breach of the understanding upon which the ground was granted if they used it as the mere site for a pile of lumber, and for some time there appeared to be a strong objection on the part of the Director General to allow them to do so, partly on account of the combustible nature of the material thus to be disposed. The objection was, however, at last overcome, and both square, round and sawn lumber—the latter, according to invoices, about eighty thousand feet in quantity—were all built up into an edifice, which eventually attracted a great deal of attention, and of which drawings have been published in most of the illustrated papers of the world. For the ingenuity by which this building was contrived and completed, the Commission owes many thanks to J. Larochelle, Esq., of St. Anselme.

The Commissioners are glad to believe that this exhibit was not fruitless in the way of promoting the trade of the country. It is within their knowledge that gentlemen of Toronto and Ottawa have received orders as a consequence of the display in question.

It may be mentioned that at the corner of the Log House, the Canadian flag was hoisted upon the tallest flag-staff in the grounds—a spar from New Brunswick—about ninety feet from the ground to the truck.

In placing the heavy pieces of machinery and lumber the Commission received very material assistance from a

loan by the British Commission of a traction steam engine from the factory of Porter & Aveling, which was capable of conveying weights of several tons at a time over the ordinary paths between the buildings.

One of the most important and rising branches of Canadian Manufacture is that of cheese, of which not less than 35,000,000 lbs. was exported in the last fiscal year. The Commission felt that it was of the greatest importance that a growing interest of this kind should be fairly represented to the world, and that the object of Canada in appearing at the Exhibition could not be better subserved than in promoting the best display of this part of the national products. Accordingly, when it was found impossible to expose dairy products in the Agricultural Hall, it was determined to come to the assistance of the dairymen of the Dominion, who were invited by the dairymen of the United States, to join them in the construction of a suitable building. For this purpose the Canadian Commission acquired two thousand dollars worth of stock of the Centennial Company; the money being expended as the share of Canada in the cost of the Dairy House. The stock is held by the Commission, and will probably be worth from 20 cents to 90 cents in the dollar, U.S. currency, according to the determination of a pecuniary question between the American Government and the Centennial stockholders. In this building monthly exhibits of butter and cheese took place, from July to October inclusive. The collection of Canadian dairy products, however, was entirely managed by the Ontario Association, through Mr. Caswell, of Ingersoll. The Commission merely provided the necessary funds, and they were relieved from all trouble by this gentlemen carrying out their arrangements. There were four car-loads of dairy produce brought to the grounds, from the Dominion.

Another and most important branch of Canadian products consisted of various kinds of horses, horned cattle and other live stock. With respect to these the Commission, after much deliberation, felt it necessary to adopt a rule differing from that which they applied to other exhibits, and to throw all risk of loss or damage upon the owners, who were also obliged to provide the necessary assistants. This regulation no doubt, to some extent, contracted the number of this class of exhibitors, and the Commission feel that much credit is due to those gentlemen—who notwithstanding the possibility of loss—enabled them to demonstrate conclusively the vast capabilities of Canada for the breeding even of the highest class of stock.

The number of animals exhibited at different times between the months of August and November inclusive, were as follows :—

Horses.....	68
Horned Cattle.....	72
Sheep.....	56
Swine.....	50
Poultry and Pigeons.....	300

The number of car-loads of these animals was 45.

The fruit growers of the Dominion were well represented by fruit sent to the Exhibition by Associations in Ontario, Quebec and Nova Scotia. The fruit was sent at different times, as it ripened, and on that which came from Ontario, the Commission paid freight in a lump sum. There was, probably, in all, freight for about 3 cars.

It is not the intention of the Commission to make any report involving special technical studies upon the enormous number and great variety of articles of value exhibited throughout the grounds and buildings of the International Exhibition. The reasons for abstaining from

doing so have been set forth in the preface; nevertheless it is proper for them to speak generally of what appears to them to be the fair conclusions derived from a comparison between the products of Canada and those of other nationalities which were brought together at Philadelphia.

There are, of course, a number of branches of human art in which a country so young as ours cannot hope to compete with the older nations of the world. This is especially the case with painting, sculpture and ornamental industries of various descriptions, embracing jewellery, decorative works in metal, and the finer descriptions of china, glass-ware, and pottery. Comparatively few of these adorned the Canadian department. It may, however, be said that in photography the specimens exhibited by our artists were not inferior to any that graced the building. In painting, our display was creditable, and in sculpture, for purposes of house decoration, our department contained what was universally acknowledged as the finest piece of workmanship in the building—a much-admired marble mantle from the manufactory of Mr. Reid, of Montreal. So again we believe, we may say that the specimen of panelling, consisting of imitations of various woods and marbles, with medallions, birds, &c., by Mr. A. N. Greig, of Montreal, were not surpassed by the work of any competitor. The prizes taken in the Departments representing the Fine Arts were six in number. Here, too, it may be proper to mention the very valuable collection of insects sent from London—a collection which, for comprehensiveness and scientific arrangement, cannot be surpassed, and which was without a rival on the ground.

It was in manufactures of articles of prime necessity that Canada was likely chiefly to excel, and in these she took high rank among the other manufacturing nationalities.

In leather of all descriptions, including the finer classes; in boots and shoes, in tweeds and knitted goods, and domestic cottons, in stoves, tools of all kinds, printed books, and similar articles, she compared favourably with any other nationality. In woollens of all kinds shown by her, it was acknowledged frankly by competitors from various parts of the world that she took the first place, though, of course, she did not show broadcloths, nor other goods of very finest make. She made no great display of cottons; but the few goods in this class were very excellent. In the same way it may be affirmed, without unduly boasting, that her edge tools, amongst which a large case of saws from the works of Mr. Smith, of St. Catharines, was conspicuous, were second to none in the buildings. They were especially noticed and commented upon by gentlemen of high experience from Great Britain, acting as Centennial judges; as were also the assortment of nails and tacks by Messrs. Pillow, Hersey & Co., and of iron goods from Messrs. H. R. Ives & Co., both of Montreal. In this connection the Commission also may remark particularly upon the skates shewn by the Starr Company of Halifax. Large orders from different parts of the United States were the consequences of this particular exhibit. Several lots of woollen goods, and an exceedingly well made case of boots and shoes, by Mr. Sutherland, of Kingston, as well as a large quantity from a New Brunswick manufacturer (the Sussex Company), were disposed of in Philadelphia; but owing to the high duties it is to be feared that little profit accrued upon these transactions to the manufacturers. The sewing machines from different parts of the Dominion also obtained high praise, and a large number of musical instruments of various kinds proved the successful efforts that are being made by our manufacturers in this important branch of the arts.

It is difficult in any comment of this kind to avoid some appearance of invidious selection, but it is intended to point out not such exhibits as were absolutely the best, but those which from special circumstances attracted most attention. We must not pass by the noble display made by the Ontario Department of Education, which excited marked interest among all classes of visitors. It is known to the Commissioners that the representatives of Japan and of other nations, eagerly procured some of the instruments used in the instruction of the children of Canada. Very much of the importance which the school books and implements assumed in the Canadian Exhibition, was undoubtedly due to the intelligent explanations afforded by the gentlemen of the Department who were at Philadelphia, Dr. May and Mr. Hodgins, to whom the Commission are under many obligations for their courteous co-operation.

In manufactures and machinery of all kinds, including books and educational appliances, models of vessels, musical instruments, railway plants, &c., the Canadian exhibitors took 170 prizes.

The Geological Department in the main building was also highly approved, but it, of course, mainly commended itself to persons of scientific tastes and knowledge. The experts who visited it declared it to be one of the most complete and best arranged collections of the kind which the Exhibition could boast of. Among the specimens of minerals having economic value may be noticed especially the wonderful mass of plumbago, and the preparations illustrating its varied application to the arts, shewn by the Dominion Plumbago Company. There was a single block of this mineral which weighed more than 2,800lbs.

A case of petroleum oil and its products, from the manufactory of the Messrs. Waterman, of London, was also

among the more interesting and beautiful attractions of this part of the Canadian Department, nor must we forget to notice the many specimens of coal, as well from Nova Scotia as from British Columbia and the Saskatchewan. The gold column, indicating the quantity of that metal mined in British Columbia, was a source of curiosity and some astonishment to many visitors. This column represented a mass of gold of the value of \$37,000,000, obtained within the last thirteen years.

For the collection and arrangement of the Geological Department, illustrated by an admirable special catalogue, the Commission has again to thank Professor Selwyn and his accomplished assistants, Messrs. Richardson, Bell and Dawson. Dr. Honeyman, the Provincial geologist of Nova Scotia, was also always ready with valuable aid, rendered more important by his long experience in similar exhibitions. In this Department the Canadian exhibitors carried off 28 prizes.

In the larger kinds of machinery, and in the various ingenious contrivances for turning it to account in the saving of labour, the American display was evidently superior to that of any other nationality. The proximity of American manufacturers to Philadelphia would be sufficient to account for this superiority, but it is probable, so far as the Commissioners were able to judge, that in versatility and power of adaptation, their machinists would take the first place in the world. In our own machinery department the display was comparatively small, notwithstanding which some of the machine tools exhibited were spoken of by experienced and practical men as being of high value, not only on account of the excellence of their finish and the solidity of the parts, but for the novelty of their construction and the ingenuity

of the contrivances brought to bear in adapting them to their several purposes. To show that our inventors are not deficient in this capacity, it may be noted that Mr. Ramsay, of Cobourg, was enabled to place throughout the great Pennsylvania Railway, as well as in many foreign countries, his valuable invention for facilitating the removal of railway carriages from their trucks, whether for the purpose of changing the gauge of the wheels or for repairs. Messrs. Mackechnie and Bertram also exhibited a radial drill which attracted great attention from machinists, and would, no doubt, have been sold in the United States but for the high duties. As it was, they placed a very fine machine tool in New York. It must, however, be acknowledged, that in this department the Canadian display was an inadequate representation of the enormous capital, skill, and energy employed in the construction of machinery among us.

In the Agricultural Hall, on the contrary, the show of implements attracted close attention and cordial praise from all who examined them. They had to compete with a very numerous and varied collection of implements of the same class from other manufacturers. But, though the implements sent by the United States were in some cases of an excessively high finish, intended merely for show, the Canadian machines, most of them made for actual work, were admitted to be at least equal to any in the building.

The practical proof of their excellence, combined with their cheapness, is to be found in the desire which gentlemen from Australia manifested to purchase them and to procure for the inhabitants of their Colonies the opportunity of seeing implements of so much simplicity and utility, and capable of being produced at so reasonable a cost. It is not for the Commission to speculate upon the success of the attempts made to inaugurate a trade between Canada and the

Antipodean parts of the Empire, but this much may be said, that but for the opportunity of showing their productions, afforded to our manufacturers at the Exhibition at Philadelphia, there is no reason to believe that any prospect of such a trade would have been opened up. It is, at all events, a matter of good augury that gentlemen acquainted with agricultural life in the Australian Colonies are confident that several of our Canadian agricultural implements will be found suitable and saleable in those distant markets. It is worthy of particular mention that Mr. Mackay, the Commissioner from Queensland, a large agriculturist and a man of great experience, was induced to buy several Canadian implements for the use of his Government, chiefly from Mr. Watson, of Ayr. The Commissioners feel also that this is the place to point out the important services of Mr. R. W. Cameron, of New York, a native Canadian now established in that city, as a merchant. This gentleman largely, we believe, from patriotic motives, by purchase or advances of money upon goods, has enabled a number of our manufacturers of agricultural implements to test the Australian market.

The exhibit of grains was exceedingly satisfactory, and the qualities of many of them were pronounced by good judges to be of the very highest order. Amongst new and very successful attempts at manufactures there were shown in the Agricultural Hall specimens of maccaroni and vermicelli, sent by the firms of Spinelli and Catelli, of Montreal, and various preparations of meat and other edibles by the Sherbrooke Meat Company. The Commission received numerous applications from persons desirous of ascertaining where they could procure these goods. The Commissioners were glad, in connection with this part of their work, to be able to render some assistance

to the agent of the Government of Ontario, the Hon. D. Christie, in procuring several specimens of grain which are thought by good authorities likely to become of particular value to the farming interests of the Dominion. All the Foreign Commissions who exhibited grains, were kind and liberal in affording specimens of this class of their products, but we ought especially to mention the name of Count Bielsky, the Russian Commissioner, who, at the request of the Canadian Commissioners, presented Mr. Christie with a large quantity of wheat, supposed to be of remarkable merit for our climate. He deserves the greater thanks on this account, because the quantity given was very much greater than can be regarded merely as a specimen.

In fruit the Dominion of Canada occupied a place in the Pomological Hall very much larger than would be her fair share, judging by her geographical proportions and her population, compared with that of the United States. So far as the Commissioners were able to form a judgment, they believe that, excepting in grapes, in the growth of which California far exceeds any other part of the North American Continent whose products were displayed in the Pomological Hall, she could find nothing to excite her envy. It may be remarked that the Californian grapes are all from European sources, while it is understood that most of those grown on the eastern side of the Rocky Mountains are derived from indigenous vines. The Californian fruits were very much larger than those from the Dominion, or indeed from any other places, but they lost in flavour the advantage which they might be supposed to have in size. A remark something similar applies with truth to one or two Western States, but in general the apples, pears and plums of Canada were equal in appearance and size to those of the United States, and sometimes superior in flavour.

In dairy products, notwithstanding the high reputation of the American cheese manufacturers, those from Canada established conclusively that they are not one whit behind the best of their Southern competitors in the quality of their products. This is demonstrated by the large number of prizes awarded to them by the Centennial Judges, who were, except one, American citizens, but who honorably discharged their duty without partiality. The Canadian Dairymen certainly show superior energy, it being a remarkable fact that there was more Canadian than American cheese appeared in the Dairy House—2,086 packages were exhibited, weighing  $55\frac{1}{2}$  tons; there were from the United States 1,012 packages, weighing over 26 tons; from Canada, 1,003 packages, weighing over 29 tons; from other countries, 65 packages, estimated at 500 lbs. 100 awards were recommended for exhibits of cheese. Of these 45 were for the United States, 49 for Canada, and the remainder for other countries. In butter our exhibit was small, reaching only to some 1,700 lbs. out of 9,150 lbs. from all countries; but in proportion to their number, the prizes taken by Canadian butter-makers were very numerous. There were one hundred and twenty-three exhibits from the United States, to which twenty-three prizes were awarded, and sixteen from Canada, which obtained five prizes.

Wine was an article which, of all those shown at Philadelphia, was perhaps the most largely exhibited, as to number of specimens and variety of description, and as to number of nationalities which sent this kind of merchandize. In this article Canada alone had ten or twelve varieties, and some of them were pronounced by competent judges to be very respectable as *vins ordinaires*. The brandy of the Wine Growers' Association of Ontario was especially commended.

Of all departments, however, Canada most excelled

in the exhibition of live stock. About one-third of all the horses exhibited came from the Dominion, and out of 68 exhibited by her, 52 carried off prizes. A considerable number of these animals were also sold. In Horned Cattle the Canadian animals did not bear so large a proportion to those of the United States as in horses, nevertheless a large number of prizes were taken relatively to the number of animals. The number of exhibits was 72, and the number of prizes were 33.

The proposals of the American Commissioners embraced the offer of sweepstake prizes for the best bull and the best cow on the ground. The Commissioners have little doubt that had those sweepstakes been thus given, the prize for the best bull must have been adjudged to a Canadian, even if Canada had not also carried off that for the best cow, of which there was also some prospect. The Judges, however, declined to make this award, and though the Director-General, upon a remonstrance addressed to him by the Canadian Commissioners, issued an express order to the Judges to determine the sweepstakes, it was afterwards found that they had left the city without doing so.

Sweepstake prizes for the best animal on the ground, were, however, adjudged to a Canadian boar, and to two Canadian long-wool sheep. The Canadian sheep were of the long or medium-wool varieties. The American exhibit of this kind consisted of 72 sheep; about 40 of that number were bred in the United States, and of these few were considered by the Judges as worthy of notice—none of prizes. The rest were recently imported from England. The latter obtained 21 awards and a first prize in the inter-state competition. The position which Canadian stock occupied was so superior that, but for the importation of Mr. Coope, she would have swept everything before her in the breeds which she cultivated.

The whole number of sheep of these breeds brought under the notice of the Centennial Judges was 175. Of these Canada showed 56, consisting of Lincolns, Leicesters, Cotswolds and South Downs. For them she received 24 awards, besides the 2 sweepstakes already mentioned and the inter-state award for the best flock of 6 ewes and 1 ram of the long-wool breed. England was represented by 47 sheep all from first-class breeds. She took 35 prizes, and 1 sweepstake for the best ram of any age of the middle-wool breeds.

In swine, the Dominion was well represented; the number of grown animals shown was twenty-seven, some of them accompanied by litters. Twenty-nine prizes were awarded; some of the animals taking more than one prize; the Canadian swine, as already remarked, being also successful in the competition against the world.

No sweepstake prize was given for poultry; but while some breeds of birds from the United States were generally supposed to be superior to those from Canada, in several others it was as generally admitted that Canadian fowls held the first rank. The Commissioners gathered from the judges that the American fanciers excelled chiefly in the larger, and the Canadians in the smaller breeds. But, owing no doubt greatly to the careful choice made for the Canadian exhibits, a very disproportionately large share of the honours fell to their lot. The medal was the same for all awards; but the Judges distinguished three classes of merit in making up their note books, and we are thus able to arrive at the relative excellence of the two displays. Out of one hundred and thirty-three Canadian exhibits, not including pigeons, one hundred and twenty-nine received the highest mark of merit, while the United States exhibitors only had two hundred and twenty-two highest

marks out of four hundred and thirty-four. Fifty-one prizes were obtained for Canadian poultry; but each one was for an exhibit comprising more than one bird.

Taken throughout, there can be no doubt that the Exhibition at Philadelphia has had the effect of enhancing the feeling of self-respect and patriotism of many thousands of Canadians who visited it, and who saw that, except in some special classes of production, sometimes depending wholly upon the climate or other accidental circumstances, Canadian industries were in no respect behind those so much vaunted in the United States. They had reason, indeed, to believe that while they produced articles of as great excellence, they produced them at lower prices than their rivals, and that nothing prevented a valuable trade in many articles between the two countries, except the excessively high tariff of the United States. At the same time, the Exhibition has afforded proof that the demand for useful articles is not limited to a single nation, and has given cause to hope that if our products are debarred from a particular market, they may, nevertheless, find a ready sale in other parts of the world.

Nothing can be more encouraging than the manner in which many of our manufactures have been sought by the Australian colonists, and it is to be hoped that other nations will be found hereafter to be not insensible to the possibilities of profitable Canadian trade. In many visitors to the Exhibition, not belonging to the British Empire, the display made by Canada excited not only lively interest, but great astonishment. The Commissioners were repeatedly told, as well by the citizens of the United States as by highly intelligent gentlemen from other countries, European and American, that until they saw the variety and perfection of the goods in the Canadian department,

they had formed no just idea of the country from which those articles came. They were, of course, aware that the Dominion had a place on the maps of the world, and of North America, but they had no conception that what they had regarded only as a strip of land, remarkable chiefly for ice and snow, could be capable of furnishing domestic animals of the greatest perfection; all the grains used for food in equal plenty and excellence; wine of a quality by no means despicable, and a variety of manufactures which extend throughout all the articles necessary for the use, if not for the ornament and luxury of life. In this respect, even if no direct pecuniary advantage should arise from the Exhibition, there can be little doubt that its value must be incalculable. Hitherto, when Canada has appeared at an international exhibition, it has been as the exhibitor of a few articles, which, excepting lumber and cereals, were looked upon as curiosities. For the first time she has met the nations of the world as a nation, and has held her own with all but those of the very first class, giving indications, at the same time, of an ambition, in due course, of taking place among the latter. The intelligent interest excited in Canada by the Exhibition was manifested by the large number of our fellow-countrymen from all parts of the Dominion who flocked thither. Registers were kept at the office of the Commission, in which Canadian visitors were invited to enter their names. These entries amount in number to 15,000; but as a very large number of persons neglected this formality, it is believed safe to put the Canadian visitors at not less than 30,000.

Among the visitors from the Dominion were members of the Senate and House of Commons, and of the Provincial Legislatures; several members of the Dominion and Provincial Ministries, and the Premiers of the Dominion,

Ontario, Quebec, and Nova Scotia. His Excellency the Governor-General also spent some days in inspecting the most interesting features of the collection, paying especial attention to the various branches of the Canadian Department. He was received with marked respect by the American authorities of the Exhibition, and by Colonel Sandford, the British Commissioner. He did the Canadian Commissioners the honour of residing at their house during his stay in Philadelphia, and after his departure, was pleased to address a letter to them through the senior member, in which he thus expressed his satisfaction with the Canadian display :—

“ Lord Dufferin furthermore desires to express to you  
“ the very great satisfaction with which he has witnessed  
“ the admirable arrangements under which the Canadian  
“ exhibits have been displayed. The whole organisation  
“ of the department is most creditable to you and to your  
“ colleagues, evincing, as it does, good taste, good judgment,  
“ and a thorough appreciation of the manner in which the  
“ products and the industries of Canada should be set out to  
“ the best advantage. Excellent, as were the materials  
“ with which you had to deal, their effect has been undoubt-  
“ edly very much enhanced by the admirable way in which  
“ they have been arranged, and I am sure it must have  
“ been a great satisfaction to you to have perceived how  
“ very much every one has been struck by the Canadian  
“ contributions, and the important part taken by the  
“ Dominion in the general display.”

Highly flattering notices of the Canadian portion of the Exhibition appeared in most of the languages of the civilized world, through articles in the press. It would occupy too much space in this report to quote these complimentary

statements, but the following remark by General Hawley may perhaps not be considered out of place here. It was made on the occasion of a public reception of Canadian Schoolmasters by the General, as President of the Centennial Commission. He said that:—“Canada  
“had done more for the success of the Centennial Exhi-  
“bition, than any eight of the States of the American  
“Union, with the exception of New Jersey and Pennsyl-  
“vania.”

The number of Centennial medals taken by Canadian exhibitors was 564 in all, which shows a large percentage upon Canadian exhibits as compared with the percentage of prizes on the aggregate of the World's exhibits at Philadelphia. Nevertheless, the Commissioners must confess to some astonishment that several valuable articles were apparently overlooked by the Judges. They are not at all disposed to impute these omissions to any partiality on the part of those gentlemen. On the contrary, the large number of prizes awarded to our fellow-countrymen indicates that no spirit of jealousy was consciously present. Mistakes and omissions were more or less unavoidable in a task so extensive as that of adjudication on the merits of this vast assemblage of valuable objects; and it may be a reasonable subject of congratulation, on the whole, that causes of fair complaint were not more numerous. The only case in which the Canadian Commissioners thought they detected anything like unworthy jealousy was in the refusal of the Judges of horned cattle to award the sweepstakes in the manner already described. But if that feeling were present, it was confined to the Judges in that class. The Director-General, on the remonstrance of the Canadian Commissioners, as already mentioned, specially directed that the programme should be carried out, although, in fact, that

was not done. The Commissioners, however, felt it necessary in the interests of their exhibitors, to send in to the Supplemental Judges appointed to correct omissions, a list of articles which the owners believed would have received prizes had they been properly examined. Of the articles on this list only two finally obtained awards.

The whole number of judges were 250; 140 were American, and 110 foreigners. Those named by the Canadian Commission were as follows : —

H. JOLY, M.P.P., Quebec,  
*Animal and Vegetable products.*

Hon. Senator SKEAD, Ottawa,  
*Productions of the Forest.*

E. EMPEY, Esq., Hamilton,  
*Ready-made Clothing and Furs.*

WM. DUFFUS, Esq., Halifax,  
*Carriages.*

IRA MORGAN, Esq., Ottawa,  
*Horses.*

ALEX. BARRY, Esq., Dumfries,  
*Horned Cattle.*

COL. RHODES, Quebec,  
*Swine.*

JOHN D. MOORE, Esq., Dumfries,  
*Sheep.*

F. W. FEARMAN, Esq., Hamilton,  
*Cheese, Butter and Poultry.*

It is proper in this place for the Canadian Commission to give some account of the manner in which their own medals were distributed. This will be best done by the following extracts made from a pamphlet printed for distribution at Philadelphia:—

## PRIZES TO BE AWARDED BY THE CANADIAN COMMISSION.

The Canadian Commission, with the intention of affording inducements to exhibitors at the Exhibition of Philadelphia, offered gold, silver and bronze medals as prizes, promising that the awards of such medals should be made by foreign judges.

In pursuance of that engagement, they addressed a letter, of which the following is an extract, to the British Commissioners, Colonel Herbert Sandford, R.A., and Professor Archer. F.R.S.:

“ CANADIAN COMMISSION, }  
“ PHILADELPHIA, May 23, 1876. }

“ GENTLEMEN:

“The Canadian Commissioners have promised to give to their exhibitors gold, silver and bronze medals, to be awarded by foreign judges. In order to carry out this design they respectfully ask the aid and co-operation of the British Commissioners, whose nomination of judges, if they will consent to nominate them from English gentlemen here on the business of the Exhibition, will, they believe, be received with complete satisfaction and confidence by all concerned in the awards.

“The Canadian Commissioners, hoping that you will afford them your assistance, submit the following scheme as one which they think may be successfully acted upon, and they therefore ask your approval or opinion thereon: They propose to subdivide the articles exhibited in the Canadian Section, omitting, for the present, live animals, butter and cheese, new fruits, beers and other fermented and distilled liquors for the table, into several classes, including one for unenumerated articles. They will ask from you the nomination of a judge for each. This judge will be requested to name the persons to whom a definite number of bronze and silver medals shall be awarded. Each judge will be further requested, of the persons to whom he shall have awarded silver medals, to designate any whom he shall think deserving of one of a number of gold medals, limited to five.

“In order to determine who shall receive the gold medals, the judges will be asked, after having made their awards of silver and bronze medals, to select the successful competitors from the candidates for the gold medals, named by the above process: the votes to be delivered in writing on a fixed day to the British Commis-

sioners; and in case of a tie vote for two candidates, one of the British Commissioners, as agreed between themselves, to act as umpire.

"The persons receiving the gold medals will abandon the silver ones; and to prevent delay or other embarrassments in the final determination, it is to be understood that the choice of the successful candidates for the gold medals shall not be rendered invalid by the absence of the votes of any judge or judges, but that the decision shall follow the majority of votes actually cast; and the day for receiving the votes shall be notified to the judges by the Commissioners."

Upon this letter, Colonel Sandford endorsed the following memorandum:

"Copy forwarded to Mr. Trendell, delegate for judges, who is requested to bring the proposal before the British judges, and ask for the co-operation and assistance of any of these gentlemen who can spare the requisite time.

"The sanction of the Lord President of the Council has been already obtained, by telegraph, to any of the British judges undertaking the duty of awarding prizes in the proposed Canadian competition who may feel inclined to do so.

"If a sufficient number of the British judges will be kind enough to consent to the request of the Canadian Commission, backed as it has been to the British Commissioners by a request from the Governor-General of the Dominion of Canada, it will, perhaps, be convenient to call a meeting at St. George's House, when the Commissioners from Canada will be invited to attend.

"(Signed,) H. B. S.

"St. GEORGE'S HOUSE, May 30, 1876."

On the 5th of June, a meeting was held at St. George's House, to consider the request made by the Canadian Commissioners, that the medals to be given by the Dominion to Canadian exhibitors might be awarded by British judges.

Col. Sandford presided, and there were present: The Hon. E. G. Penny and Mr. D. McDougall, Executive Commissioners for Canada, and the following British judges:

Dr. Odling, F.R.S.—*Chemistry and its Applications.*

Mr. J. H. Soden Smith, M.A.—*Ceramics Pottery and Glass.*

Mr. Isaac Watts—*Cotton, Yarns and Woven Goods.*

Mr. Henry Mitchell—*Woollen Goods.*

Major W. H. Noble, R.A.—*Weapons.*

Mr. D. MacHardy—*Hardware and Edged Tools.*

Sir William Thomson, LL.D., D.C.L.—*Philosophical Apparatus.*

Mr. Charles W. Cope, R.A.—*Sculpture and Painting.*

Mr. Peter Graham—*Industrial Designs.*

Mr. John Anderson, LL.D.—*Metal and Wood Machinery.*

Mr. W. W. Hulse, C.E.—*Spinning and Weaving Machinery.*

Mr. Frederick Paget, C.E.—*Sewing and Clothing Machinery.*

Mr. W. H. Barlow, C.E.—*Motors.*

Capt. Douglas Galton, C. B.—*Railway Plant.*

Col. F. H. Rich, R. E.—*Pneumatic and Water Transportation.*

Mr. John Coleman—*Agricultural Machines.*

Mr. A. J. R. Trendell—*Secretary to British Commission and Official Delegate to the Judges.*

The following resolution, proposed by Dr. Odling, and seconded by Mr. Coleman, was put from the chair and carried unanimously :

“That the British judges here present accept with pleasure the proposal made to them to award special medals to the Canadian exhibitors.”

Mr. Penny and Mr. McDougall expressed the warm thanks of their Commission for the ready response thus given to the request made, and anticipated that all concerned would accept the awards of the British judges with entire satisfaction.

The following are the classes and number of silver and bronze medals to be awarded therein, with the names of the judges, any of whom will be competent to make the award ; or, if they think it necessary, they may invite assistance in their several classes :

1. Machinery of all kinds, excepting agricultural machinery, including all objects in the Machinery Hall ; type setting and sewing machines. Three silver and six bronze medals.

*Judges.*—Dr. Anderson, Mr. Hulse, C.E., Mr. Henry Mitchell, Capt. Douglas Galton, Mr. Barlow, C.E., Mr. Paget, C.E.

2. Agricultural machinery and implements, such as plows, harrows, &c., of all descriptions, except spades, forks and similar tools to be used merely by hand. Three silver and six bronze medals.

*Judge.*—Mr. John Coleman.

3. The fine arts, including paintings, photographs and sculpture, whether intended chiefly for decorative purposes or otherwise, and wood carving not on furniture. Two silver and four bronze medals.

*Judges.*—Mr. C. W. Hope, R.A., Mr. Peter Graham, Mr. Soden Smith.

4. Manufactures from all kinds of metals, including iron safes and all descriptions of tools to be used by hand. Four silver and eight bronze medals.

*Judges.*—Hon. J. Bain, Dr. Anderson, Mr. W. MacHardy.

5. Wool raw, articles of clothing, and fabrics of all kinds intended to be made up into clothing, blanketing ; and furs, raw or dressed, no matter for what purpose. Four silver and eight bronze medals.

*Judges.*—Mr. H. Mitchell, Mr. Isaac Watts, Mr. Hulse, C.E.

6. Leather and its manufactures (all boots and shoes). Three silver and six bronze medals.

*Judge.*—Mr. Hulse, C.E.

7. Musical instruments. Two silver and four bronze medals.

*Judge.*—Sir Charles Reed.

8. Carriages and furniture, including frames for looking-glasses and parquetry work. Two silver and four bronze medals.

*Judges.*—Col. Rich, Mr. Peter Graham.

9.—Grains and meals and manufactures thereof, including macaroni and vermicelli. Three silver and six bronze medals.

*Judges.*—Dr. Odling, Mr. John Coleman.

10. Cured meats, fish and other preparations of animal food, and glue. One silver and two bronze medals.

*Judges.*—Dr. Odling, Mr. John Coleman.

11. Minerals, including coal, marbles, slates, clays, and plaster not belonging to either the Dominion or Provincial surveys. Four silver and eight bronze medals.

*Judge.*—Mr. Lowthian Bell, M.P.

12. Pharmaceutical preparations, soaps, candles, &c., and such as result from distillation or other chemical process, except beer, wine, and spirituous liquors, including products of petroleum, together with paints of all kinds. One silver and two bronze medals.

*Judges.*—Dr. Odling, Major Noble.

13.—Ladies' Department. Two silver and four bronze medals.

*Judges.*—Col. Rich, Major Noble, Capt. Douglas Galton.

14. Philosophical instruments, and such as are intended for educational purposes or for measuring with precision. One silver and two bronze medals.

*Judges.*—Sir William Thomson, Sir Charles Reed.

15. All articles not included in the above. Four silver and eight bronze medals.

*Judge.*—Mr. Soden Smith, M.A.

The judges in awarding the medals will be governed by considerations of the skill and ingenuity exhibited in the manufacture or production of the articles submitted to them, and to their value and importance in the arts of life.

In case the judges should think proper to increase the number of silver or bronze medals in any class, their recommendation to that effect, and the awards based thereon, will be carried out by the Commission.

---

The above applies only to such articles as made a portion of the permanent exhibit throughout the season. But the rest of the Canadian prizes, with exceptions hereafter mentioned, were awarded in like manner by Centennial Judges from England, named by the British Commission as follows, viz:—

For Horses, by THOMAS PANNINGTON, Esq.

For Horned Cattle, by S. DUCKHAM, Esq.

For Sheep, by OWEN C. RICHARDS, Esq.

For Swine, by G. W. BAKER, Esq.

All these gentlemen were requested, whenever they might judge it necessary, to associate themselves with experts. It was found impossible to carry out completely the design of taking British judges in every case. For Wines, the Commission therefore requested the assistance of M. Rebours, an eminent wine grower of France ; and for malt liquors, that of Mr. Massey, a very large brewer of Philadelphia. Both of these gentlemen kindly gave the benefit of their knowledge and experience. In Cheese the Commission accepted the nomination of Mr. Fearman, made by the parties interested in that branch of manufacture, and for Poultry they named Mr. Halstead an American judge, who, it was represented, would afford general satisfaction.

Owing to obvious omissions made by some of these gentlemen, such as have already been said to be inseparable from such adjudications, the Commissioners requested Mr. Morris, one of the Commissioners from New South Wales, to act as a supplemental judge on a very few classes of goods, and this gentleman, aided by such experts as he found necessary, awarded a small number of prizes, almost all for manufactured goods. But the Commissioners did not permit these awards to disturb those previously made, and only asked the help of Mr. Morris when they had a moral conviction that articles had been accidentally passed by without examination, or, as in one case, when less than the appointed number of medals had been awarded. It should be noticed that in order to avoid failure on the side of liberality, a special clause in the instructions to the Judges authorized those gentlemen to increase the number of prizes mentioned by the Commissioners for any class whatever, if they should believe that the merits of the articles shown justified such addition. The Commissioners feel that they, and

the body of their exhibitors, owe many thanks to these gentlemen for the pains and care with which they executed the charge committed to them, which they accepted with great cheerfulness, and, as the Commissioners believe, carried out with a most conscientious desire to do justice to all parties concerned.

The number of prizes awarded for the Canadian distribution were as follows:—

Gold.....	13
Silver.....	174
Bronze.....	230
	—
Total.....	487

The Commissioners think it proper to explain that the delay in returning the exhibits from Philadelphia was caused by the obstacles thrown in the way of repacking and shipping by the rules of the United States Customs Department. The Exhibition closed on the 10th of November, but it was the 22nd before they were allowed to pack anything; and after they had begun to do so, on permission from the Deputy-Collector, many difficulties occurred at each stage of the process up to the actual re-shipping of the goods. The consequence was, that the Canadian Department was not cleared until the 29th December, by which date everything might have been at home, had these obstructions not occurred. As it was, however, on the 1st January when every Canadian package had left, fully two-thirds of the British goods remained, and several of the other foreign countries had hardly commenced shipping, so that Canada was the first to close its department in Philadelphia. Besides the annoyance caused by the delay itself, there is reason to believe that several losses of property, by theft, and some damage occurred during the period between the 10th

November and the 29th December, which would not have happened had greater despatch been possible.

It has been already mentioned that many States of the Union, and foreign nationalities erected houses to serve as meeting places for visitors from these States and countries, and for other purposes on sites granted them by the Centennial Commission. Among the most beautiful of these was the St. George's House, built by the British Commission, and since presented to the City of Philadelphia. In this building the British Commission liberally afforded the Canadian Commissioners two handsome and handsomely-furnished apartments, which became of great use to them during the excessively hot weather of summer, and at times when their office in the main building was so much frequented by visitors as to make it impossible to carry on any continuous work. For this kindness the Commissioners feel themselves obliged to return their warm thanks to the British Commissioners, who, as well as their staff, afforded them every possible assistance. During the latter part of the Exhibition Colonel Sandford remained alone in charge, and to the last afforded the Canadian Commission every kind of help and encouragement which they needed at his hands. Mr. J. K. Trendell, Secretary to the British Commission, and Official Delegate of the Judges, acted as Secretary to the Judges who awarded the Canadian prizes, and it was thought by the Canadian Commissioners that his services required some acknowledgment. They, therefore, requested his acceptance of a watch, with an appropriate inscription.

The Canadian Commissioners also have to express their thanks to all the gentlemen holding office as members of the American Centennial Commission, and Board of Finance, as well as to the heads of departments and officers acting

under them. They would particularly mention (because they had business particularly with them) General Hawley, President of the Commission; General A. T. Goshorn, Director General; Mr. John Welsh, President of the Board of Finance; General Walker, Chief of the Bureau of Awards; Mr. Albert, Chief of the Machinery Department; Mr. Pettit, Chief of the Bureau of Installation; Captain Torrey, of the Transportation Service, and Colonel Asche, Secretary to the Director General.

They also owe much gratitude for hospitality to many of the citizens of Philadelphia, and for that, as well as for services of a semi-official character, with the American Government, to Messrs. George Washington Childs, and A. Drexel, of Philadelphia, who were honorary members of the British Commission.

Above all, the Commissioners feel that they owe cordial acknowledgments to the exhibitors with whose goods they were charged. It was impossible that a business such as they had to transact could be carried out without some inconvenience, delay and occasional expense to individuals. They can truly say, however, that these were lessened as much as lay in their power; but they gladly recognize the forbearance and kindness with which they were met almost universally by those gentlemen whom they had occasion to meet on the business of the Commission in Philadelphia. They have reason to hope that their efforts were understood and appreciated, and they feel that in general everything was done by the owners of goods to aid them in the discharge of their frequently onerous duties.

Trusting that the result will be regarded by their fellow countrymen as not unworthy of the national effort which has been made, and that their part of the work may meet with approval, it is but right for them to acknowledge

that the praise for the honours which the country has received must belong chiefly to the men who, in various branches of industry, supplied the admirable materials which it was their duty to display.

Respectfully submitted.

(Signed)

C. P. PELLETIER,

*Minister of Agriculture, President.*

E. G. PENNY.

## CATALOGUE

OF

# CANADIAN EXHIBITORS

AT THE

## INTERNATIONAL EXHIBITION.

### DEPARTMENT 1.—MINING AND METALLURGY.

Class 100—Minerals, ores, etc.

Hon. A. Robertson, Com. of Mines.....	Halifax .....	S	Collection of Gold bearing quartz, two specimens containing 54 oz. of gold.
T. B. Donaldson.....	Enfield.....	B	Gold bearing quartz.
Gating Gold Mining Co....	Marmora .....	O	Gold bearing arsenical pyrites.
W. W. Russell.....	Ottawa.....	O	Gold in quartz.
J. A. Lindsay.....	Toronto .....	O	" "
Jackfish Lake Gold Mi. Co.	Toronto .....	O	Gold and silver in quartz, 2 spec's.
McKellar Bro's.....	Pr. Arthur's L'g	O	Gold in quartz.
D. McKellar.....	Pr. Arthur's L'g	O	" "
Toronto Gold Mining Co....	Toronto .....	O	Gold bearing arsenical pyrites.
W. P. Lockwood .....	St. François, B.	O	Gold.
Geological Survey.....	Canada .....	Q	Gold and magnetic sand.
Geological Survey.....	Canada .....	Q	Gold in quartz.
Geological Survey.....	Canada .....	Q	Gold alluvial.
Geological Survey.....	Canada .....	Q	Gold nuggets (models).
Geological Survey.....	Canada .....	Q	Gold alluvial, B.C.
Geological Survey.....	Canada .....	Q	Gold, total yield, B.C. (model).
Oppenheimer Bros.....	Victoria .....	C	Gold nugget.
Hon. Robt. Robertson.....	Halifax .....	S	Gold-fields of N. S., repres. of.
T. B. Donaldson.....	Oldham .....	S	Gold in quartz.
A. H. Sibley.....	Silver Islet, L.S.	O	Silver ores, various, 20 spec's.
A. H. Sibley.....	Silver Islet, L.S.	O	Silver native, 7 spec's.
McKellar Bros.....	Ft. William LS.	O	Silver ores.
T. Marks & McKellar Bros.	Ft. William LS.	O	" "

Stirling & Dewar.....	Halifax.....	S	Architectural designs.
-----------------------	--------------	---	------------------------

## Class 442.—Decoration of interiors of buildings.

R. Oliver .....	Toronto .....	O	Imitation of wood, marble, &c.
A. N. Greig.....	Montreal .....	Q	Imitation of wood, marble, &c.
Alex. Walker.....	Halifax .....	S	Glass Panel ornamented.

## Class 452.—Inlaid work in wood and metal, tables, &amp;c.

T. Lardham.....	Ottawa .....	O	Inlaid work.
W. Bevis.....	Hamilton .....	O	Inlaid centre table.
J. White.....	Ingersoll.....	O	Inlaid box and frame.
A. H. Stuart.....	Hamilton .....	O	Inlaid centre table.
W. Lee.....	Toronto .....	O	2 Inlaid tables, 18,000 pieces.
J. A. R. Hammond.....	Hull .....	Q	Inlaid table, 25,000 pieces.
Jos. Bouchard.....	Montreal.....	Q	Chess board, inlaid wood.
Jas. Wright.....	Montreal.....	Q	Parquettry flooring.
James McCandlish.....	“ .....	Q	Table and egg stand.

## Class 453.—Stained glass.

J. C. Spence .....	Montreal.....	Q	Stained glass.
J. McAusland.....	Toronto.....	O	Window.

## Class 454.—Miscellaneous objects of art.

Isaiah Hooper.....	Halifax .....	O	Inlaid whatnot.
J. H. Phair .....	Fredericton.....	B	Ivory etching.
J. D. Robertson.....	St. John.....	B	Designs in ink.

## DEPARTMENT V.—MACHINERY.

### Class 500.—Rock drilling.

Joseph Hannahan..... Ottawa ..... O Rock drilling bits.

### Class 505.—Crushing, grinding, sorting, and dressing machines.

H. Larue ..... Quebec ..... Q Magnetic Iron ore separator.  
 W. S. Symons & Co... .. Halifax..... S Gold quartz crushing machine.  
 L. N. & A. H. Larochelle... St. Anselme, Q Q Magnetic separator.  
 L. N. & A. H. Larochelle... St. Anselme, Q Q Ore & magnetic sand drying machine.

### Class 508.—Chemical manufacturing machinery.

R. Freeland..... Toronto ..... O Soap making machinery.

### Class 510.—Wood planing, sawing, grooving, mortising and moulding machines.

W. Kennedy & Son..... Owen Sound... O Facing and jointing planer.  
 Waterous Eng. Works Co.. Brantford..... O Portable saw mill (20 h. P.)  
 Mitchell & Teeple. .... Harriston..... O Wood sawing machine (4 h. P.)  
 McKechnie & Bertram..... Dundas ..... O Wood moulding machine.  
 J. Harris & Co..... St. John..... B Shingle machine.  
 Lordly, Howe & Co ..... St. John..... B Wood gage turning lathe.  
 Robert Patrick..... Galt ..... O Rotary force pump.  
 Wm. Kennedy & Sons..... Owen Sound ... O Facing and jointing planer.  
 McKechnie & Bertram..... Dundas ..... O Moulding machine, lathe, drill, &c.  
 Lordly, Howe & Co ..... St. John ..... B Wood turning lathe and Scroll saw.

### Class 513.—Casting metals, with specimens of work.

James Harris & Co..... St John..... B Register grates.

### Class 514.—Steam hammers, with specimens of work, forges.

George Campbell..... Toronto ..... O Portable Forges.  
 Coldbrook Rolling Mills Co. St. John ..... B Bar & Knee Iron, nails, &c.  
 R. Mitchell & Co..... Montreal..... Q Lead tube bending machine.

### Class 515.—Iron planing, drilling, slotting, turning and cutting machines.

McKechnie & Bertram ... Dundas ..... O Iron turning laths.  
 McKechnie & Bertram .... Dundas ..... O Radial drill.  
 McKechnie & Bertram ... Dundas ..... O Slotting machine.  
 McKechnie & Bertram ... Dundas ..... O Iron Shaping machine.  
 M. Stephenson..... Stratford..... O Hand drilling machine.  
 J. Smark..... Brockville ..... O Drilling machines. (32 d.)  
 J. Fisher & Co ..... Kincardine .... O Clipping boiler plate machine (32 j.)  
 McFarlane, Thum & Co... Fredericton ... B Vertical power drill.  
 E. R. N. Coore & Co ..... St. John ..... B Nail machine.  
 S. Myers & Son ..... St. John ..... B Small drill.  
 M. Stephenson..... Stratford ..... O Rail drill machine.  
 J. J. Fisher & Co..... Kincardine .... O Boiler plate cutter.

## Class 517.—Brick, pottery, and tile machines.

Geo. S. Tiffany ..... London ..... O Tile and brick machine.

## Class 519.

T. W. Milner..... Charlottetown.. ..... Pipe vice.

## Class 521.—Machine for the manufacture of cotton goods.

S. H. Powers..... Woodstock .... B Self acting hand loom.

## Class 522.—Machines for the manufacture of woolen goods.

A. Becker ..... Montreal ..... Q Sample of card clothing.

## Class 524.—Machines for the manufacture of fibrous materials.

Chs. Boeck..... Toronto ..... O Combing machines for brush makers.

## Class 531.—Sewing and knitting machines.

Wilkie & Osborne..... Guelph ..... O Sewing machines.

Wanzer & Co ..... Hamilton..... O Sewing machines.

J. D. Lawlor..... Montreal ..... Q Sewing machines.

C. W. Williams Manf. Co. Montreal ..... Q Sewing machines.

Th. Harris..... Montreal ..... Q Sewing machine needle sharpener.

O. St. Amant ..... Quebec..... Q Improved Wheeler & Wilson.

## Class 533.—Machines for making boots and shoes.

R. Clarke..... St. John..... B Assortment of lasts.

E. Popham..... Montreal..... Q 2 Steam peg breaking machine.

## Class 541.—Type-casting machines, apparatus of stereotyping.

John Fleming..... Toronto ..... O Electrotyping machine.

## Class 542.—Types and type-setting machines.

Geo. P. Drummond..... Ottawa ..... O Type setting and distributing mach

## Class 543.—Printers' furniture.

Chs. Samson ..... Fredericton.... B Small printing stand.

## Class 551.—Water-wheels, water engines, hydraulic rams.

Wm. Kennedy & Sons .... Owen Sound... O Loffel water-wheel.

F. W. Tuerk ..... Berlin ..... O Water-wheel, working model.

Barber & Harris..... Meaford ..... O Water-wheel, Barbers' improved.

Goldie & McCulloch..... Galt ..... O Turbine water-wheel.

J. Harris & Co..... St. John..... B Water-wheel.

Goldie McCulloch & Co..... Galt ..... O Turbine water wheel.

## Class 552.—Steam, air, or gas engines.

A. Fleck ..... Ottawa ..... O 20 horse power oscilating P. st. eng.

Goldie & McCulloch..... Galt..... O Steam engine.

Geo. Brush..... Montreal ..... Q Steam engine.

James Tyzick..... St. John..... B Patent moter.

Geo. Fleming & Sons..... St. John ..... B Oscillating engine.

J. G. Smith ..... Dartmouth .... S 2 miniature steam engine.

J. P. Wilson..... Montreal..... Q 2 Steam valve.

Thompson & Williams ma-  
nufacturing Co..... Stratford ..... O Stationary Engine, 20 H. P.

Eagle Foundry ..... Montreal..... Q Hoisting engine.

## Class 553.—Apparatus for the transmission of power, shafting, belting, gearing.

Dixon, Smith & Co .....	Toronto .....	O	Belting.
Murphy, Lymans & Co.....	St. John.....	B	Light and loose pulley.

## Class 555.—Steam gauges, manometers.

James Morisson.....	Toronto .....	O	Steam, vacuum, hydraulic gauges.
S. Myers & Son .....	St. John .....	B	Governor.
Thos Piper .....	Hamilton .....	O	Steam boiler detective guages,—also 4 cylinder engine models.

## Class 560.—Pumps.

Rob. Patrick.....	Galt.....	O	Rotary pump, double act'g & revers.
H. W. Cox .....	Peterborough .	O	Rotary force ptmp No. 1.
Oakville Manufact'g Co..	Oakville .....	O	Force, well, and two cistern pumps.
C. P. Mills.....	Ste. Catherines.	O	12 Iron pumps.
H. W. Cox .....	Peterboro .....	O	Rotary force pump No. 2.
E. Bowes & Son .....	Stratford .....	O	Case force pump. (32 c.)
Stephen Webster.....	St. Catherines..	O	Oil storing tank.
C. C. Burns.....	St. John .....	B	Rotary pump.
C. C. Jones.....	Fredericton ....	B	Barrel Pump.
Wilson, Clarke & Co.....	Yarmouth .....	S	Ship pump.
E. Bowes & Son.....	Stratford .....	O	Swing force pump.
Oakville Manufactur'g Co..	Oakville .....	O	Cistern and force pump.

## Class 562.—Blowers.

S. Myers & Son .....	St. John .....	B	Sturtevant Blower.
Geo. Campbell & Co.....	Toronto .....	O	Portable hot blast fan forge.
K. H. Ives .....	Montreal .....	Q	Portable forge.

## Class 564.—Fire engines, hand, steam, or chemical.

John D. Ronald .....	Chatham .....	O	Steam fire engine.
Fire Extinguisher Ma. Co.	Toronto .....	O	Fire King stationary eng. & O. style.
A. A. Murphy .....	Montreal .....	Q	Pneumatic fire extinguisher.
Robert Bustin.....	St. John .....	B	Fire escape.

## Class 565.—Beer engines, soda-water machines.

H. J. Smith.....	Toronto .....	O	Soda water apparatus, hotting machine, engine pump.
------------------	---------------	---	---

## Class 567.—Diving apparatus and machinery.

John Date .....	Montreal .....	Q	Diving apparatus.
-----------------	----------------	---	-------------------

## Class 570.—Locomotives, models, drawings, plans.

F. W. A. Meyer.....	Montreal .....	Q	Drawing of engine and tender.
---------------------	----------------	---	-------------------------------

## Class 571.—Carriages, wagons, trucks, cars.

R. D. Chatterton.....	Cobourg .....	O	Railway collision springs.
Jones & Burland .....	Montreal .....	Q	Railway springs.
R. H. Ramsay.....	Cobourg .....	O	Model of truck, shifting apparatus.

## Class 572.—Brakes, buffers, couplings.

S. Cornell.....	Widder .....	O	Car coupling.
R. N. Chisholm.....	Oakville .....	O	Car coupling Tail's automatic.
R. D. Chatterton.....	Cobourg .....	O	Self acting coupler.
Thomas Muir.....	London .....	O	Rail joint protector and car coupler.
M. McNab .....	London .....	O	Car coupler.

## Class 573.—Wheels, tires, axles, bearings, springs.

Car Wheel Co.....	Toronto .....	O	Car wheels and axles.
J. Harris & Co.....	St. John .....	B	Railroad car wheels and axles.
John McDougall.....	Montreal .....	Q	Car wheels.
Henry Osburn.....	St. Andrews ...	B	Car axle model.

## Class 574.—Permanent ways, ties, switches.

R. Taylor .....	Guelph.....	O	Railjoint and nut lock.
Wm. Dunn.....	St. Mary's.....	O	Safety switch.
R. Dixon .....	Montreal .....	Q	Patent switch.

## Class 575.—Station arrangements, signals.

W. C. Nunn.....	Belleville .....	O	Railway telegraph or train order.
W. C. Nunn.....	Belleville .....	O	Signals with revolving, fixed lamps.
W. C. Nunn.....	Belleville .....	O	Signals with electric gong.
W. C. Nunn.....	Belleville .....	O	Railway telegraph or train order and signals, &c.

## Class 576.—Miscellaneous locomotive attachments.

R. Brydon .....	Newbury .....	O	Grain car door fastener.
Wm. Dunn .....	St. Mary's.....	O	Safety car coupler.
R. H. Ramsay.....	Cobourg .....	O	Self acting truck reliever for cars.
F. B. Edgecomb.....	Fredericton ...	B	Miller patent hangers Co.
E. Kennedy.....	St. John .....	B	Locomotive ash pan cleaner.
D. Hawkesworth .....	Digby .....	S	3 Spark arresters.
J. K. Griffin .....	Toronto .....	O	Model of car coupler.
H. Colford .....	Halifax .....	S	Spark arresters.

## Class 580.—Flour mills.

Samuel Plate .....	Goderich .....	O	Cylindrical mill stones.
--------------------	----------------	---	--------------------------

## Class 582.—Confectioners' machinery.

G. W. Copping .....	Toronto .....	O	Patent Canada Lozenge machine.
---------------------	---------------	---	--------------------------------

## Class 584.—Tobacco manufacturing machines.

J. L. Adams .....	Montreal .....	Q	Tobacco cutter.
-------------------	----------------	---	-----------------

## Class 594.—Boats and sailing vessels. Rowing boats of all kinds.

D. Herald.....	Gore's Land'g..	O	Canoe.
D. Herald.....	Gore's Land'g..	O	Canoe.
D. Herald.....	Gore's Land'g..	O	Canoe.
W. English .....	Peterborough..	O	Hunting canoe.
John Semmens.....	Hamilton.....	O	Model life boat.
W. Power & Co.....	Kingston .....	O	Ship models.
Zephyrin Lapierre .....	St. Laurent....	Q	Rowing boat.
Zephyrin Lapierre .....	St. Laurent....	Q	Winter canoe.
F. H. Oliver.....	Quebec.....	Q	Ship models.
Quebec Advisory Board..	Quebec .....	Q	20 ship models.
E. W. Sewell.....	Levis .....	Q	Winter canoe.
E. W. Sewell.....	Levis.....	Q	Ship model.
J. D. Bradshaw.....	St. Martins....	B	Ship model.
J. H. Bradshaw.....	St. Martins....	B	" " "
Elijah Ross .....	Portland.....	B	Set 6 oars, spoon.
Elijah Ross .....	Portland.....	B	Set 2 single scull oars.
Elijah Ross .....	Portland.....	B	Set 2 oars.
Elijah Ross .....	Portland.....	B	Life boat model.
Jos. Barrill .....	Yarmouth .....	S	Improved gear for reeling sail.
E. Moseley.....	Dartmouth .....	S	2 Ship models.
A. Golding.....	Hamilton .....	O	Trincornatee.
J. Crobie.....	Yarmouth .....	S	Model ship.
Wilson, Clark & Co.....	Yarmouth .....	S	Ship pump.

## Class 595.—Steamships, steamboats.

Richelieu & Ont. Nav. Co.	Montreal	.....	Q	Steamboat models.
F. H. Wildgoose	Montreal	.....	Q	Steamboat model.
F. W. A. Meyer	Montreal	.....	Q	Drawing longitudinal Sect. St. boat.
E. W. Sewell	Lévis	.....	Q	Drawing of steamship for Can. trade.
A. Cantin	Montreal	.....	Q	Ship Models.
B. F. Masher	Fort Nelson	.....	O	“ “ steamer.

## Class 597.—Steam capstans, windlass and steering apparatus.

D. H. Pitts	Halifax	.....	S	Ship Windlass and cable brake.
Geo. J. Mosler	Maitland I'd	..	B	Ship wheel.
James Harris & Co.	St. John	.....	B	Capstan.
D. H. Pitts	Halifax	.....	S	Mast hoop clamp.
D. H. Pitts	Halifax	.....	S	Metal Jib clamp.
Couvrette & Frigon	Montreal	.....	Q	Stern of ship (model).

## Extras.

W. G. Von Staden	Strathroy	.....	O	Bent posts and rafters for R. R. cars.
Small & Fisher	Woodstock	....	B	Barrel litter.
M. E. Dailey	Ottawa	.....	O	Telescope Trestle.
S. Webster	St. Catherines	..	O	Model of tank for refined oil.
John Sandall	Moncton	.....	B	Valve Link motion (model).
J. B. Weddleton	Yarmouth	.....	S	Head gearings for ships sails and rigging.
J. P. Wilson	Montreal	.....	Q	Vacuum Pan.
Edwin C. Griffin	Watertown	....	O	Model of bridge.

## DEPARTMENT VI.—AGRICULTURE.

Class 600.—Timber, masts, spars, knees, sections, lumber.

Advisory Board .....	N. Brunswick ..	B	Trophy of Woods from New-Brunsw'k.
H. P. Cusack .....	Newbury .....	O	Black ash hoops.
Pike & Richardson.....	Chatham.....	O	Barrel hoops.
M. Brennen .....	Hamilton .....	O	Sash blinds, doors, mouldings.
D. R. Allen .....	Chatham .....	O	Specimens of wood.
Coleman & Goninlock.....	Seaforth .....	O	Coiled barrel hoops.
St. Martin Bobbin Spool Co	St. Martin.....	B	Bobbin spools. Turning work.
John Clarke .....	St. John .....	B	Kegs & barrels.
D. R. Munroe .....	St. John ..	B	Native woods.
T. G. Murphy .....	Petitcodiac.....	B	Native woods. Cabinet work.
G. & G. ....	Hampton .....	B	Turned work. Native woods.
H. L. Lovejoy .....	St. Stephens ...	B	Samples of fret and gig sawing.
Daniel F. George.....	Fredericton.....	B	Shingles and clapboards.
A. G. Wells & Co.....	St. John.....	B	Haematack ship knees.
Quebec Advisory Board...	Ottawa Valley.	Q	White pine.
" " " " " "	" " " " " "	Q	Sugar maple.
" " " " " "	" " " " " "	Q	Ash log.
" " " " " "	" " " " " "	Q	Birch log.
" " " " " "	" " " " " "	Q	White pine log.
" " " " " "	" " " " " "	Q	Soft chesnut log.
" " " " " "	" " " " " "	Q	Birch log.
" " " " " "	" " " " " "	Q	Elm log.
" " " " " "	" " " " " "	Q	Hemlock log.
" " " " " "	" " " " " "	Q	Butter nut log.
" " " " " "	" " " " " "	Q	Yellow pine log.
" " " " " "	" " " " " "	Q	Red cherry log.
" " " " " "	" " " " " "	Q	White pine log.
" " " " " "	" " " " " "	Q	Spruce log.
" " " " " "	" " " " " "	Q	White maple log.
" " " " " "	" " " " " "	Q	White pine plank.
" " " " " "	... Ottawa .....	O	White cedar plank.
" " " " " "	... " .....	O	Section of white pine.
" " " " " "	... Three Rivers...	Q	Section of white cedar.
" " " " " "	... Ottawa .....	Q	Section of sugar maple.
" " " " " "	... " .....	Q	Section of pine.
" " " " " "	... Chaudière River	Q	Section of ash.
" " " " " "	... Ottawa Valley..	Q	Section of yellow pine.
" " " " " "	... Three Rivers...	Q	Section of birch.
" " " " " "	... Ottawa Valley..	Q	Section of cherry.
" " " " " "	... " .....	Q	Section of chesnut.
" " " " " "	... " .....	Q	Section of elm.
" " " " " "	... " .....	Q	Section of soft pine.
" " " " " "	... " .....	Q	Section of black walnut.
" " " " " "	... " .....	Q	Section of peartree.
" " " " " "	... " .....	Q	Section of poplar.
" " " " " "	... " .....	Q	Section of spruce.
" " " " " "	... " .....	Q	Section of hard pine.
" " " " " "	... " .....	Q	Section of oak.
" " " " " "	... " .....	Q	Section of oak.

Quebec Advisory Board...	Ottawa Valley.	Q	Section of hard oak.
" " " " " " " "	" " " " " " " "	Q	Section of oak.
" " " " " " " "	" " " " " " " "	Q	Section of oak.
" " " " " " " "	" " " " " " " "	Q	Section of white pine plank.
" " " " " " " "	" " " " " " " "	Q	Square pine.
" " " " " " " "	" " " " " " " "	Q	Square yellow pine.
" " " " " " " "	" " " " " " " "	Q	Square white pine.
" " " " " " " "	" " " " " " " "	Q	Square pine.
" " " " " " " "	" " " " " " " "	Q	Square pine.
" " " " " " " "	" " " " " " " "	Q	Section of spruce.
" " " " " " " "	" " " " " " " "	Q	Section of birch.
" " " " " " " "	" " " " " " " "	Q	Section of elm.
" " " " " " " "	Three Rivers...	Q	6 knees.
" " " " " " " "	Ottawa Valley.	Q	Section of white pine.
Quereus & Gerrana.....	Victoria .....	C	Section of oak.
Canadian Commission.....	" .....	C	Section of arbutus.
" " " " " " " "	" .....	C	Section of pinus contorta.
" " " " " " " "	" .....	C	Section of arbutus.
D. F. George.....	Fredericton .....	B	Shingles.
" " " " " " " "	" .....	B	Clapboard.
Moody & Nelson.....	Burrard Inlet...	C	Hoop poles in vine maple.
" " " " " " " "	" " " " " " " "	C	Hoop poles in hazel.
" " " " " " " "	" " " " " " " "	C	6 pieces, tongues and grooves.
" " " " " " " "	" " " " " " " "	C	4 pieces of lumber.
W. P. Sayard.....	Victoria .....	C	3 pieces of flooring.
" " " " " " " "	" .....	C	2 pieces of oak.
M. G. Dawson.....	" .....	C	4 axe handles.
W. P. Sayard.....	" .....	C	1 piece of pine.
Moody & Nelson.....	Burrard Inlet...	C	6 pieces of douglas pine.
" " " " " " " "	" " " " " " " "	C	1 bundle of shingles.
" " " " " " " "	Victoria .....	C	Staves of red cedar.
" " " " " " " "	" .....	C	Staves of red cedar.
" " " " " " " "	" .....	C	Staves of hard wood.
H. F. Casack.....	Newberry.....	O	Flour barrel hoops.
Pike & Richardson.....	Chatham .....	O	Large hoops.
J. B. Hull.....	Quebec .....	Q	3 in. planks of yellow pine.
" " " " " " " "	" .....	Q	2 in. plank of yellow pine.
" " " " " " " "	" .....	Q	1 in. plank of soft pine.
Lachlan Bros.....	Arnprior.....	O	2 in. planks of yellow pine.
J. Rochester.....	Ottawa .....	O	3 in. plank of yellow pine.
" " " " " " " "	" .....	O	1 in. plank of yellow pine.
James Skead.....	" .....	O	10 bundles laths.
J. Rochester.....	" .....	O	1 in. plank of yellow pine.
Perley & Co.....	" .....	O	1½ in. plank of yellow pine.
" " " " " " " "	" .....	O	2 in. plank of yellow pine.
" " " " " " " "	" .....	O	1 in. plank of yellow pine.
" " " " " " " "	" .....	O	3 in. plank of white pine.
" " " " " " " "	" .....	O	10 bundles of laths.
James Skead.....	" .....	O	3 in. planks of white pine.
" " " " " " " "	" .....	O	1 in. plank of yellow pine.
" " " " " " " "	" .....	O	1½ in. plank of pine.
James R. Silleman.....	Toronto. ....	O	1½ in. plank of yellow pine.
" " " " " " " "	" " " " " " " "	O	1½ in. plank of white pine.
" " " " " " " "	" " " " " " " "	O	1½ in. plank of white pine.
James Skead.....	Ottawa .....	O	10 bundles of shingles.
John Oliver.....	Toronto .....	O	1 in. plank of chestnut.
" " " " " " " "	" .....	O	1 in. plank of ash.
" " " " " " " "	" .....	O	1 in. plank of oak.
" " " " " " " "	" .....	O	2 in. planks of balm of Gilead.
" " " " " " " "	" .....	O	3 in. plank of white wood.
" " " " " " " "	" .....	O	1 lot of sycamore.
" " " " " " " "	" .....	O	1 lot of ash square timber.

John Oliver .....	Toronto.....	O	1 lot of butter nut.
" " .....	" .....	O	1 lot of sherry.
" " .....	" .....	O	1 lot of balm of Gilead.
" " .....	" .....	O	1 lot of maple.
" " .....	" .....	O	1 lot of 2 in. planks of elm.
" " .....	" .....	O	1 lot of 1 in. planks of white wood.
H. Caldwell & Son.....	Carleton Place.	O	1 specimen of ash.
Canadian Commission.....	Victoria.....	C	1 piece of maple.
" " .....	" .....	C	1 plank of maple.
Quebec Advisory Board...	Quebec .....	Q	1 plank of ash.
" " " .....	" .....	Q	1 plank of cherry.
" " " .....	" .....	Q	1 plank of soft walnut.
" " " .....	" .....	Q	1 plank of chesnut.
" " " .....	" .....	Q	1 plank of butter nut.
Levi Young.....	Ottawa .....	O	1 in. board, pine.
Quebec Advisory Board ..	Quebec .....	Q	1 plank of oak.
Brownsons J. Weston.....	Ottawa .....	O	1½ in. plank of white pine.
Lachlan Bros.....	Arnprior.....	O	1½ in. plank of pine.
Quebec Advisory Board...	Quebec .....	Q	1 section of hemlock.
" " " .....	" .....	Q	White pine log.
Canadian Commission.....	Victoria .....	C	Section of douglas pine 9 feet.
" " .....	" .....	C	Dog wood.
George Newell.....	Ottawa .....	O	Ash column.
" " .....	" .....	O	Ash column.
New-B. Advisory Board...	St. John .....	B	1 elm log.
" " " .....	" " .....	B	Sugar maple log.
" " " .....	" " .....	B	Ash iog.
" " " .....	" " .....	B	Birch log.
" " " .....	" " .....	B	16 pieces of square birch.
Quebec Advisory Board...	Quebec .....	Q	1 ash board varnished.
" " " .....	" .....	Q	1 ash board.
" " " .....	" .....	Q	1 black ash board.
" " " .....	" .....	Q	1 ash board varnish in oil.
" " " .....	" .....	Q	1 piece of butter nut.
" " " .....	" .....	Q	1 board of red walnut.
" " " .....	" .....	Q	1 board of white walnut.
" " " .....	" .....	Q	1 board of butter nut and oil.
" " " .....	" .....	Q	1 board of red walnut, oil and varnish.
" " " .....	" .....	Q	1 board of red walnut and varnish.
" " " .....	" .....	Q	1 board of red walnut.
" " " .....	" .....	Q	1 plank of pear wood.
Canadian Commission.....	Victoria.....	C	Moulding.
" " .....	" .....	C	Top flag poles.
" " .....	" .....	C	Table log.
N.-B. Advisory Board.....		B	Flag staff 100 feet high.
" " " .....		B	Collection of pine and other logs of large size.
M. Morley.....	Victoria.....	C	2 Mallets native wood.
Smith.....	Victoria.....	C	3 pieces wood mouldings.
Hayard & Jenkins.....	Victoria.....	C	4 turned legs.

## Class 602.—Dye-woods and barks for tanning and coloring.

Dolby .....	Victoria .....	C	Tan bark.
Dolby .....	Victoria .....	C	Hemlock bark for tanning.

## Class 603.—Gums, resins, &amp;c.

Hayward & Jenkinson .....	Victoria .....	C	Resin, abies, douglasi.
Hayward & Jenkinson.....	Victoria .....	C	Canada balsam.

Class 610.—Fruits of temperate and semi-tropical regions.

W. Fisher.....	Victoria.....	C	Cranberries.
Advisory Board, B. C.....	Victoria.....	C	Models of apples and pears.
Fruit Growers Association.....	London.....	O	Pomological Collection.
Dr. Shroud.....	Thorold.....	O	Sulphurised Fruits, &c.

Class 620.—Cereals, grasses, and forage plants.

Ontario Advisory Board...	Toronto.....	O	Samples of cereals.

Mark Chilcrot.....	".....	O	Cheese.
Thomas Ballantyne.....	Stratford.....	O	Factory cheese.
Wm. Anderson.....	Woodstock.....	O	" "
George Currie.....	Beachfield.....	O	" "
John Chisholm.....	Ingersoll.....	O	" "
H. S. Losse.....	Norwich.....	O	" "
O. P. Mabec.....	Courtland.....	O	" "
James Elliott.....	Brownsville.....	O	" "
H. Matheson.....	Embro.....	O	" "
Adam Bell.....	East Zorra.....	O	" "
David Chalmers.....	Stratford.....	O	" "
James A. James.....	Nilestown.....	O	" "
E. N. Hopkins.....	Ingersoll.....	O	" "
William Wilkinson.....	".....	O	Cheese.
J. F. Williams.....	Galloway.....	O	Uncolored cheese.

## Class 652.—Leather, oil, and lard, glue.

J. Wagner & Co.....	Galt.....	O	Colored sheepskins.
W. Craig & Son.....	Port Hope.....	O	10 doz. sheep skins.
A. Gunn & Co.....	Kingston.....	O	Spanish sole leather.
Robert Kelly.....	Dundas.....	O	Leather.
Fischer & Son.....	Berlin.....	O	Glue.
S. R. Wickett.....	Toronto.....	O	Leather pebbled, grained.
Léandre Mathieu.....	St. Catharines..	O	Leathers.
W. H. McCormick.....	St. Catharines..	O	Saco leather, cut laces.
Moseley & Ricker.....	Montreal.....	Q	Leathers.
D. R. Northey.....	Montreal.....	Q	Sole leather.
C. Galibert & Son.....	Montreal.....	Q	Leathers, "wax calf."
Dominion Leat'r Bo'd Co..	Chambly.....	Q	Leather board.
A. Ramsay & Son.....	Montreal.....	Q	Glues.
J. H. Mooney.....	Montreal.....	Q	Fancy colored sheep skins.
McCausland, Upham & Co.	Fredericton.....	B	Patent and enamelled leather.
Boscovitz.....	Victoria.....	C	1 Bear skin.
Boscovitz.....	Victoria.....	C	1 Elk skin, dressed.
Boscovitz.....	Victoria.....	C	Specimens of leather.
Duclos & Payan.....	St. Hyacinthe..	Q	Leather.
Belmont Boot and Shoe Manufacturing Co.....	Victoria.....	C	Leather tanned with homlock.

## Class 656—Preserved meats, vegetables, and fruits.

Gray & Co.....	Toronto.....	O	Canned fruits, vegetables, fish.
Canadian Meat & Prod. Co.	Sherbrooke.....	Q	Canned meats, jellies, jams, &c.
W. Burgess.....	Mimico.....	O	Horse Radish Sauce.
E. Casswell.....	Ingersoll.....	O	Preserved meats.
John Graham.....	Sussex.....	B	Cured and spiced bacon.
Guthrie & Hevener.....	St. John.....	B	Jams, &c.
J. W. Belcher.....	Halifax.....	S	Preserved fruits in sugar.
Christian & Netz.....	Halifax.....	S	Pork and sausages.
B. Walsh.....	Halifax.....	S	Barrelled Pork.
N. Woodall.....	Halifax.....	S	Barrelled Beef.
G. H. Croskill.....	Halifax.....	S	Cordials.
J. Knight.....	Halifax.....	S	Liquors.
P. Costin.....	Halifax.....	S	Champagne Cider.
Advisory Board.....	Victoria.....	C	Samples dried Indian Berries.
A. Loggie & Co.....	N. Westminster	C	1 barrel of Cranberries.
J. D. Bain.....	Restigouche ..	B	Lobster, mackerel, beef and soups.
R. Blackwood & Co.....	Montreal.....	Q	Champagne Cider.

## Class 657.—Ground cereals.

John McDougall.....	Bowmanville ..	O	Spring extra and strong bakers.
Thos. McKay & Co.....	Ottawa.....	O	Three barrels oat meal.
Corn Exchange Ass.....	Toronto.....	O	O Grain and flours, meal.
James Wilson.....	Fergus.....	O	Oatmeal $\frac{1}{2}$ barrel.
Martin & Sons.....	Mount Forest..	O	Oatmeal.
Scott & Co.....	Highgate.....	O	Oatmeal.
Muirhead & Gray.....	London.....	O	Oatmeal, pearl barley, split peas.
Aspden & Pritchard.....	London.....	O	Oatmeal, split peas.
M. C. Charlesworth & Son..	Edmondville ..	O	Flour.
J. P. Wadsworth.....	Meaford.....	O	Flour.
J. G. King.....	Porthope.....	O	Flour.
James Parkyn.....	Montreal.....	Q	Flours.
Brodie & Harvie.....	Montreal.....	Q	Flours.
N. Weatherstone.....	Toronto.....	O	Flour and meal.
W. P. Howland & Son.....	Toronto.....	O	Flour and grains.
J. U. Allan.....	Pictou.....	O	Garden Peas, 16 varieties.
Jas. Mewhort.....	Montreal.....	Q	Self-raising flour.
Catelli Bros.....	Montreal.....	Q	Potatoe starch.
H. Murton.....	Guelph.....	O	Oatmeal.

## Class 658.—Starch.

Catelli Bros .....	Montreal .....	Q	Macaroni, vermicelli, &c.
R. Spinelli .....	Montreal .....	Q	Macaroni, vermicelli, &c.
Edwardsburgh Starch Co. Edwardsburgh ..	Q	Laundry and corn starch.	

## Class 659.—Sugar and syrups.

Chs. Wilson .....	Toronto .....	O	Lemonade, ginger ale, &c.
J. R. Woodburn & Co.....	St. John.....	NB	Confectionery.
Wm. Hessin .....	Toronto .....	O	"
Hossack, Wood & Co.....	Quebec .....	Q	"

## Class 660.—Wines, alcohol, and malt liquors.

Geo. Morton & Son.....	Kingslon .....	O	Malt.
O'Keefe & Co.....	Toronto .....	O	Ale in barrels and bottles.
Carling & Co .....	London .....	O	Ale, porter, malt.
R. Arkell .....	London .....	O	Ale, porter.
John Labatt.....	London .....	O	Ale, porter.
Wm. Osborne .....	Hamilton .....	O	Malt.
R. P. Slater & Co.....	Galt .....	O	Malt.
Howard & Northwood.....	Chatham .....	O	Malt.
A. Bunster.....	Victoria .....	C	Malt from Metchosin Barley.
R. Smith & Co.....	Fairfield Plain.	O	Native wines.
Thos. Davies & Bro .....	Toronto .....	O	Ale and porter.
Canada Wine growers Ass. Toronto .....	O	Canadian wines, 6 spec's.	
Jos. Waterhouse.....	Chatham .....	O	Ale, porter.
McLeod, McNaughton & C. Montreal .....	Q	Ale, porter.	
M. Lefebvre.....	Montreal .....	Q	Vinegar.
O. V. Troop & Co .....	St. John .....	N.B.	Barrels vinegar.
Birely & Co .....	Hamilton.....	O	Vinegar.
V. Casci.....	Toronto.....	a	Wine.
A. T. Farrell .....	Cayuga .....	O	"
Jas. Hastings.....	Toronto.....	O	"

## Class 661.—Bread, biscuits, crackers, and cakes.

Christie, Brown & Co.....	Toronto .....	O	Collection of biscuits.
Wm. Hessin .....	Toronto .....	O	160 boxes Conf. & 20 boxes biscuits.
Hossack, Woods & Co.....	Quebec .....	Q	Pilot and cabin biscuits.
Th. Rankin & Sons.....	St. John .....	B	Biscuits, crackers, &c.
Advisory Board.....	Victoria.....	C	Samples of Bread made by Indians.

## Class 666.—Hemp, flax.

R. Nichol & Bros.....	Belmont .....	O	Scotch flax manufactured, &c.
S. S. Fuller .....	Stratford .....	O	Dressed flax.
D. H. Harrison .....	St. Marys .....	O	Dressed flax.

## Class 667.—Wool.

Th. H. Taylor .....	Chatham .....	O	Fleece of combing wool.
John Harvey & Co.....	Hamilton .....	O	Canadian wools.
Stahlschmidt & Co.....	Victoria .....	C	Wool, spec's. Island and Mainland.
Advisory Board.....	Victoria.....	C	1 Sample of Indian Wool.
Stahlschmidt & Co .....	Victoria.....	C	Samples of Wool.

## Class 669.—Hair, bristles.

Jos. Pecover .....	Hamilton.....	O	Hair, upholstery, &c.
--------------------	---------------	---	-----------------------

## Class 670.—Tillage.—Plows, cultivators, harrows, &amp;c.

Ch. Duperow.....	Stratford .....	O	Harrow.
Geo. Ross.....	Chatham .....	O	Plows.
A. S. Whiting.....	Oshawa .....	O	Scythes, forks, hoes, rakes, &c. 25 dz.
B. W. Walton.....	Fergus, Well... ..	O	Gand plow and double furrow, &c.

D. K. Strachan.....	Goderich .....	O	Combined cultivator, double m. b'rd.
A. S. Strachan.....	Goderich .....	O	Iron harrows.
A. S. McDonald .....	Osgood .....	O	Cultivator.
Geo. Gillies.....	Gananoque .....	O	Harrow, cultivator, horse hoe.
Munro & Hagens .....	Seaforth .....	O	Plows, iron.
S. Mathieson.....	Tavistock.....	O	Plows, iron.
W. Wilson.....	Strathroy.....	O	Combined harrow and hay rake.
G. Wilkinson .....	Aurora .....	O	1 double furrow, 2 iron, 3 gang plow.
John Watson.....	Ayr .....	O	1 plow gang, 2 swing P., 3 subsoil P.
D. F. Jones & Co.....	Gananoque .....	O	Shovels, hoes, forks (13½ doz.)
Acton Plow Co.....	Acton .....	O	Single frame iron plow.
Th. Richardson.....	Fergus .....	O	Gang plow.
W. Sparling .....	Parkhill .....	O	Champion sod plow.
Edmund McLaurin .....	Toronto .....	O	Plough.
Wm. A. Perolaing .....	Owen Sounds..	O	Fanning mill.
Luke Jolton & Bros .....	Guelph .....	O	Large Cadre with combined attachment.
Thos. Yandle.....	Stratford .....	O	Yandle iron plough.
Peter Bradford .....	Barrie.....	O	Snow plough sleigh.
Jno. Dow.....	Gananoque.....	O	1 Iron harrow, 2 cultivators.
C. R. Bell.....	Parkhill .....	O	Steel garden plow.
James Jeffrey .....	Montreal .....	Q	Plow, double mould board, cultiv. &c.
Th. Smith.....	Aylmer.....	Q	Cultivator.
J. Harris & Co.....	St. John .....	B	Plow, patent.
D. Willet.....	St. John .....	B	Cultivator, seed harrow.
C. B. Rummel.....	Monctou .....	B	Plows (14).
Connell Bros .....	Woodstock.....	B	No. 3½ B. plough.

## Class 671.—Planting.—Grain and manure drills.

Jas. W. Mann.....	Simcoe .....	O	Imported Turnip drill.
John Watson.....	Ayr .....	O	Grain drill.
John Watson.....	Ayr .....	O	Seed sewer.
J. & S. Vessot .....	Joliette .....	Q	Sower, harrow & roller combined.

## Class 672.—Harvesting, reapers, mowers, rakes, potato diggers.

Stephen Martin.....	Osgoode .....	O	Potatoe digger.
Wm. McKenzie.....	Charlottetown..	O	Patatoe digger.
L. D. Sawyer & Co.....	Hamilton.....	O	Iron clad mower.
Leslie Johnston .....	London.....	O	Pea harvester attachment.
P. M. Bawtinheimer ..	Clifton.....	O	Potatoe digger.
Th. Eliot.....	Peterboro .....	O	Combined hay raker and loader.
Ed. Bartlet.....	Renfrew .....	O	Potatoe digger.
A. Harris Son & Co.....	Brantford.....	O	Combined mower and reaper, mower.
Green Bros. & Co.....	Waterford .....	O	Reaper.
Massey Manufact. Co.....	Newcastle .....	O	2 mowers, 1 reaper, self raker.
Massey Manufact. Co.....	Newcastle .....	O	Horse rake.
Rowland Dennis .....	London.....	O	Potatoe digger and mould beads C.
Peter Grant.....	Clinton.....	O	Hay fork and tackle.
Thomas Head.....	Copetown.....	O	Potatoe digger.
Wilson & Piper.....	Strathroy .....	O	Sulky arrow and hay rake.
Sharman & Foster ..	Stratford .....	O	Combined mower and reaper.
Forsyth & Co.....	Dundas.....	O	1 combined reaper and mower. 2 m.
J. Harris & Co.....	St. John .....	B	Mower, horse rake, potatoe digger.
A. G. Gray.....	St. John .....	B	Mowing machine.
C. W. Dutcher .....	Sussex .....	B	Potatoe digger, model.
P. McFarlane & Sons.....	Douglas .....	B	Horse hay rake.
McFarlane, Thom & Ander.	Fredericton....	B	Buckeye and Woodmowers.
James Bennett .....	St. John .....	B	Potatoe digger, model.

## Class 673.—Thrashers, corn-shellers, winnowers &amp; Co.

H. Sells .....	Vienna .....	O	Cider mill and press.
P. Brazil .....	Barrie .....	O	Cider mill and press.
Luke Tolton Bros .....	Guelph .....	O	Pea thrasher.
John Watson .....	Ayr .....	O	4 Horse power.
L. Barthell & Co.....	Stratford .....	O	Fanning mill.
G. F. Armstrong Bros.....	Goderich .....	O	Fanning mill.
J. G. Bricker.....	Waterloo .....	O	2 thrashers and separators.
A. Champion.....	Aurora .....	O	Steam thrasher and boiler.
Sharman & Foster. ....	Stratford .....	O	Little giant thrasher.
Sharman & Foster.....	Stratford .....	O	Junior Pitts horse power.
Thomas Wilson .....	Richmond Hill.	O	Fanning mill and separator.
Haggart & Bros.....	Brampton .....	O	10 horse power thrasher, truck, &c.
Haggart & Bros.....	Brampton .....	O	Patent duster, separator, thrasher, &c.
John Abell.....	Woodbridge .....	O	Thrasher and separator.
J. Harris & Co.....	St. John .....	B	Thrasher and horse-power.
Ed. Armstrong.....	Portland .....	B	Fanning mill.

## Class 674.—Portable and stationary engines, hay cutters.

Haggart Bros.....	Brampton .....	O	Chaff cutter with carrier.
John Abell.....	Woodbridge .....	O	Portable steam engine (10 horse.)
Luke Tolton Bros.....	Guelph.....	O	Steam cutter and chaff carrier.
David Maxwell.....	Paris.....	O	2 straw and 2 root cutters.
John Watson.....	Ayr .....	O	3 straw and 2 root cutters.
Massey Manufact. Co.....	Newcastle .....	O	1 straw cutter.
Abn. Anderson .....	London.....	O	Straw cutter bread and hay knives.
Massey Manufact. Co.....	Newcastle .....	O	1 grain crusher
John Watson.....	Ayr.....	O	2 grain choppers.
John Watson.....	Ayr.....	O	2 corn-shellers.
J. Harris & Co.....	St. John.....	B	Hay cutter.

## Class 675.—Dairy fittings and appliances.

Ashley & Smith.....	Belleville .....	O	Patent cheese hoops and gaug press.
James McKelrey.....	St. Catharines..	O	2 cream-gatherers, refrigerator.
D. H. Pitts.....	Halifax.....	S	Improved churn.
Advisory Board, B. C .....	Victoria.....	C	Butter.

## Class 680.—Fences, gates, &amp;c.

J. E. Stong .....	Newton Brook..	O	1 Entrance gate, 2 models.
B. Greening & Co.....	Hamilton.....	O	Wire fencing and working.

## Class 781.—Commercial fertilizers.

W. H. Marcou .....	Guelph.....	O	Superphosphate, bone bust, &c.
--------------------	-------------	---	--------------------------------

## Class 683.—Farm buildings.

W. H. Doel.....	Donoaster .....	C	Improved hen's nest.
A. C. Atwood .....	London.....	O	Bee hive and honey extract.

## DEPARTMENT VII.—HORTICULTURE.

Class 721.—Receptacles for Plants, Flower Pots, &c.

G. H. & L. E. Farrar ..... St. John ..... Q Fancy flower pots.

### EXTRA.

Jos. Sands .....	Eorest .....	O	Bag filling machine.
Robert Bell .....	Montreal .....	Q	Indian Curiosities.
A. St. Amant .....	Lorette .....	Q	Indian curiosities.
Advisory Board, B. C. ....	Victoria .....	C	Indian manufactures.
G. M. Skinner .....	Gananoque ....	O	Fishing tackle.
Brisley .....	Halifax .....	S	Fastener for heavy timber.
C. F. Baillargé .....	Quebec .....	Q	Indian ornaments.
J. P. Wilson .....	Montreal .....	Q	Vacuum pan.
V. Casci .....	Toronto .....	O	Plaster Casts of fruits, &c.

## APPENDIX No. 3.

# INTERNATIONAL EXHIBITION OF 1876.

### AWARDS TO CANADIAN EXHIBITORS.

#### I.—MINERALS, MINING, METALLURGY AND MACHINERY.

- P. T. Somerville, Arnprior, Ont.; Monuments of Dark-clouded Marble of Arnprior.  
New Rockland Slate Co., Montreal, Roofing Slate and Slate Slabs from [Melbourne,  
Canada.
- Ontario Lithographic Stone Co., Marmora, Ont., Lithographic Stone Co.  
B. Robertson, Halifax, N. S., Gold Specimen.  
A. Seaman & Co., Lower Cove, N. S., Grindstones.  
Daniel & Boyd, St. John, N. B., Block of Freestone.  
Dorchester Union Freestone Co., Dorchester, N. B., Building Stone.  
Robert Forsyth, Montreal, Red Granite Monuments, &c., from Gananoque.  
Geo. J. McDonald & Co., Cornwallis, N. S., Building Stone.  
John Kelly, Belleville, Ont., Lithographic Stones.  
Bay of Fundy Red Granite Co., St. George, N. B., Wrought Red Granite.  
Gray, Young & Sparling, Eclipse Well, Seaforth, Ont., Refined Salt.  
Waterman Bros., London, Ont., Petroleum.  
Lake George Antimony Co., Prince William, N. B., Regulus of Antimony.  
Joseph Goodfellow, North Esk, N. B., One large Grindstone.  
Dominion of Canada Plumbago Co., Graphite and Products manufactured therefrom.  
Danville Slate Co., Danville, Que., Slate.  
Alex. Cowan, Brockville, Ont., Phosphate of Lime Pyrites, &c.  
Hopewell Quarry Co., Hopewell, N.B., Sandstone.  
W. W. Stewart, Montreal, Native Copper.  
John Rankin, Actonvale, Collection of Colored Slates.  
Gatling Gold and Silver Mining Co., Marmora, Ont., Gold Ores.  
Dr. Honeyman, Halifax, N. S., Geological Collection.  
Steel Co. of Canada, Londonderry, N. S., Ores, Iron and Steel.  
Nova Scotia Section of Canada Commission, Nova Scotia, Collection of Building  
Stones.  
Nova Scotia Advisory Board, Coals.

Geological Survey of Canada, Geological Collection.

Silver Islet Mining Co., Silver Islet, Ont., Silver and Silver Glance.

### II.—POTTERY, GLASS, ARTIFICIAL STONE, ETC.

St. John's Stone Chinaware Co., St. John's, Que., White "Granite" Wares.

Lee Bros., St. John, N. B., Common Hard Bricks.

Albert Manufacturing Co., Hillsborough, N. B., Raw and Calcined Gypsum.

Bulmer & Sheppard, Montreal, Common Bricks.

Geological Survey of Canada, Red and White Building Bricks.

Wm. McKay, Ottawa, Hydraulic Cément.

George Sylvester Tiffany, London, Ont., Brick and Tile-Making Machine.

P. Gauvreau & Co., Quebec, Hydraulic Cement and Artificial Stones.

Dominion of Canada Plumbago Co., Buckingham, Plumbago Crucibles.

### III.—CHEMISTRY AND PHARMACY, WITH THE APPARATUS.

Waterman Bros., London, Ont., Paraffine, etc.

O. V. Troop & Co., St. John, N. B., Vinegar.

T. Ramsay, Montreal, Pigment.

A. Ramsay & Son, Montreal, Paints.

Lyman Bros., Toronto, Chemicals.

Lyman, Clare & Co., Montreal, Pigments, Oils, etc.

M. Lefevre, Montreal, Vinegar.

International Salt Co., Goodrich, Ont., Salt.

Wm. Hessin, Toronto, Ont., Bonbons, etc., of Sugar.

Harrison & Evans, Goodrich, Ont., Salt.

Gray, Young & Sparling, Seaforth, Ont., Salt.

Robert Freeland, Montreal, Machine for Boiling Soap under Pressure.

Buchanan Mineral Co., Hamilton, Ont., Mineral Paint.

George W. Morse & Co., Toronto, Soaps and Tallow Candles.

A. W. Hood & Son, Montreal, Soaps.

Alexander Cowan, Brockville, Super-phosphate and its Materials.

Albert Toilet Soap Co., Montreal, Soaps and Oils.

### IV.—ANIMAL AND VEGETABLE PRODUCTS.

J. A. Robins, Avon, Cheese.

E. Hunter, Mt. Elgin, Cheese.

Anna Paddon, Beachville, Cheese.

James F. Williams, Galloway, Ingersoll, Cheese

Hugh Mathison, Embro, Cheese.

E. Hunter, Mt. Elgin, Cheese.

D. Chambers, Stratford, Cheese.

David Morton, Cassels, Cheese.

Thomas Ballantyne, Stratford, Ont., Cheese.

William Huxley, Fullerton, Cheese.

John Butler, Mt. Elgin, Cheese.

- J. W. Cahoe, Durham, Cheese.  
 D. B. Cahoe, Holbrook, Cheese.  
 Peter Dunn, Ingersoll, Cheese.  
 Brodie & Harvie, Montreal, Flour.  
 George Smith, Verschoyle, Cheese.  
 W. P. Howland, Toronto, Wheat.  
 Christie, Brown & Co., Toronto, Biscuits and Crackers.  
 T. Rankine & Sons, St. John, N. B., Fancy Biscuits.  
 James Collins, Erin, Ont., Wheat.  
 R. Sugg, Minto, Ont., Wheat.  
 John Campbell, Hullet, Ont., Wheat.  
 R. Tuck, Nelson, Ont., Wheat.  
 Wm. Beattie, Nichol, Ont., Wheat.  
 Catelli Bros., Montreal, Macaroni Soup Pastes, &c.  
 M. B. Spinelli, Montreal, Macaroni Soup Pastes, &c.  
 Wm. Wilkinson, Ingersoll, Cheese.  
 H. S. Losee, Norwich, Cheese.  
 William Anderson, Woodstock, Cheese.  
 Shirk & Snider, Bridgeport, Ont., Flour from Winter Wheat.  
 Matthew Mearns, Durham, Ont., Wheat.  
 Wm. P. O'Neil, Watertown, Ont., Wheat.  
 James S. Morton, Salisbury, N. B., Wheat.  
 Thomas J. Skinner, Courteher, B. Col., Wheat.  
 Robert Shearer, Niagara, Ont., Wheat.  
 Wm. McGill, York Co., Ont., Wheat.  
 James Bell, Tuckersmith, Ont., Wheat.  
 Wm. Bell, Tuckersmith, Ont., Wheat.  
 Jacob Seip, Petersburg, Ont., Wheat.  
 George Stonehouse, Scarborough, York Co., Barley.
