

8 JUL. 1920

SIR ROBERT BORDEN RESIGNS AS LEADER OF UNION GOVERNMENT

"National Liberal and Conservative Party" is Name of New Party Defining Elements Comprising It.

A despatch from Ottawa says:—Sir Robert Borden will lay down at the earliest possible date the power and authority of his office as Prime Minister of Canada, and with them the duties and responsibilities which have lately weighed upon him. Before long another will reign at the head of the Government and of the party which he formed for the prosecution of the war and which is to endure in the piping times of peace under the title of the "National Liberal and Conservative Government."

The Prime Minister at the caucus of his Parliamentary followers held on the anniversary of the birth of the Canadian Confederation, stated his desire and his intention to resign the office which he has held for almost nine years. "He announced," to quote the official memorandum subsequently issued, "his inability to sustain longer the very heavy burdens and vast responsibilities imposed upon him as Prime Minister, and he asked the members of the caucus to give him the honorable discharge to which he felt he was entitled."

Sir Robert's declaration of his own plans also took the final step toward the perpetuation of the Union. To the statement of policy which the Prime Minister originally prepared nine months ago, and which has since been considered by his followers, the caucus gave its approval. To the party which will stand before the Canadian people upon the platform now enumerated the caucus gave the name of "National Liberal and Conservative Party." National as typifying its scope and aspirations and "Liberal and Conservative" as defining the elements composing it.

Prior to the general caucus the Liberal-Unionists had a gathering in camera and decided to stand by any man chosen by the larger gathering, also to agree to the fusion of the Liberal and Conservative identities.

By those present at the historic caucus, insistence is laid on the spirit of harmony which dominated the proceedings. "The two groups have become one," it was authoritatively stated.

It is proposed, in the formation of the new Government, to make a reduction in the number of portfolios.

GREEKS CHECKED BY NATIONALISTS

Report in Constantinople of Turk Success at Pergama.

A despatch from Constantinople says:—The Sultan received word from Broussa on Thursday of a big victory by the Turkish Nationalists over the Greeks. Pergama was captured from the Hellenes, and several thousand Greek casualties are reported.

There has been no official Greek battle communique for two days. There is great exultation among the Turks in Constantinople because of the victory of the Nationalists over the Greeks in the vicinity of Pergama, where Mustafa Kemal Pasha's forces are reported to have outflanked the Greeks and to be moving northwards towards Panderma (60 miles southwest of Constantinople on the Sea of Marmora), taking several thousand prisoners.

There have been no official Greek communiqués for two days, and the Turkish newspapers are not permitted to print news unfavorable to the Greeks, but the Turks generally credit the reports of Mustafa Kemal's success.

July 12 in Ireland May Be Fateful Day

It is learned that further heavy reinforcements are going to Ireland this week, many of them to the north of Ireland, in order to prepare for July 12, the great Orange day, upon which even the most hopeful fear a repetition of the Londonderry riots on a huge scale. It is reported that the Government has requested the Ulster men not to hold their usual parades and processions on that day, but it is impossible to confirm this, and according to reports from Belfast, Ulster will make a great demonstration of her loyalty to the British Empire on that occasion.

Mrs. W. E. Sandford of Hamilton, who was re-elected President of the National Council of Women of Canada at the annual convention at St. John, N.B.

Prelates Gather for Lambeth Conference

A despatch from London says:—Twenty Canadian Bishops and 70 American Episcopal Bishops are already here to attend the Lambeth World Church Conference on July 20.

The points to be discussed at the first session are: First, Spiritualism; second, Christian Science; third, Theosophy and its relation to the Christian faith.

Bishop Brent of Western New York and Bishop Roper of Ottawa will introduce the Christian Science issue.

The discussions of the Conference will result in a report on several issues for presentation to Canada and America, it is learned.

The Canadian Air Board will develop and regulate aerial navigation in Canada.

THE EVERLASTING STAIRS. I keep climbing up, but I never seem any fatter! With higher wages things get all the "horrid"!

KING ENTERTAINS 350 V.C. HEROES

People From All Britain Were Thrilled by Parade of Heroes.

A despatch from London says:—London has had a little aftermath of the war—an aftermath which thrilled and deeply moved thousands who came not only from all parts of the city but from every corner of the British Isles to witness the spectacle. Great Britain's Victoria Cross heroes, whose deeds will make this nation's history, possessors of the little brown cross which only acts of highest valor and self-sacrifice can win, marched from Wellington Barracks to Buckingham Palace, 350 strong.

They were the guests of King George at a garden party, they and seven hundred others, for each recipient of this highest award which Great Britain can bestow, had been permitted to invite two friends. Usually it was a father and a mother who accompanied each V. C. through the hero-worshipping crowd that had gathered about the palace.

It was perhaps the most wonderful part of London's war story, certainly second only to last year's great victory parade—this garden party of golden deeds. Ordinarily one possessor of a V. C. is sufficient attraction to keep any community in a state of idolatry, but here one rubbed elbows with hundreds of heroes whose deeds, many of them unbelievably brilliant, had been the inspiration for millions of others during the war. There were officers and privates, men maimed and blinded and some wheeled in chairs. There was the oldest V. C., Sir Dighton Probyn, more than eighty years of age, and the youngest, Sergeant Smith, nineteen. On the coats of all dangled that coveted Maltese cross from a bit of mauve ribbon.

Sir Adam Beck Had Narrow Escape

A despatch from London, Ont., says:—Sir Adam Beck, while using a private telephone instrument in one hand and a Bell telephone in the other hand, suffered a shock of 550 volts through the private line being short-circuited against a heavily charged transmission line. Sir Adam was almost lifted out of his chair, but though he narrowly escaped electrocution he suffered no after-effects of his experience.

Dr. T. W. Glover, the Toronto physician whose announcement that he has discovered a cure for cancer has caused much excitement throughout the country.

Britain's Recovery.

The British Government's plans for reducing the British war debt are maturing satisfactorily. The Chancellor of the Exchequer told in the House of Commons on Thursday night that the joint Anglo-French loan in the United States, due October 15 next, will be redeemed in full. Since April \$15,000,000 in Treasury bills held in New York have been taken up. Great Britain is deflating her currency, to lift exchange with the United States to par and to get back once more on a real gold basis. The British people are making great present sacrifices to recover their old standing in the world's commerce and finance.

Heavy taxes—far exceeding those levied in Canada—are being borne without much complaint. They are accepted as inevitable and salutary. Mr. Chamberlain estimated in his budget speech last April that, through additional taxes and decreased expenditure, the present fiscal year would end with a surplus revenue of \$234,000,000—about \$360,000,000. Of this excess about \$360,000,000 will be applied to reduce the floating debt.

Prospects for the following year are even brighter. The Chancellor expects to have a surplus in 1921-'22 of £300,000,000—nearly \$1,500,000,000—half of which will be applied to the floating debt. It is the Chancellor's hope that the entire floating debt can be cancelled in seven years and that the total British debt can be extinguished in forty-three years.

Such financial recuperation on Great Britain's part is the best assurance of economic recovery in Europe. What Great Britain does France can also eventually do. And France and Great Britain together should be able to stabilize the Continent and even drag central Europe up out of the economic abyss. The record of the Motherland during the war was glorious. Since, in the trying times of readjustment, her people are showing an indomitable spirit.

Veterans Will Care for Imperials in Canada

A despatch from Ottawa says:—A complete ocean-to-ocean organization to care for the discharged soldiers of the British army who have taken up residence in Canada is being planned by the Imperial Veterans' Association of Canada. In order to complete the chain of organizations the branch to be formed in Halifax, where hundreds of Imperials are living, will be conducted along the lines of a clearing house, at which the ex-British soldiers may register on arrival. They will then be sent wherever they want to go under the protection of the association.

Autos Killed 62 New Yorkers in June

A despatch from New York says:—All records for highway fatalities in New York State were broken last month, when 187 persons were killed by automobiles, wagons, trains and trolley cars, according to the report of the National Highway Protective Society issued here. This figure exceeds by 66 deaths the casualty list of June, 1918, which was the nearest to date. In New York city automobiles caused the death of 62 persons.

Canada is world's second largest pulp and paper producing country, and is rapidly overtaking the United States.

The Man Himself.

A man of strong character is not afraid to find a responsibility devolving on himself. It may seem for a time most pleasant to dwell in a vale of no decision, where the mind need never be made up and nothing matters and to-day is only the sluggish current of time between to-morrow and yesterday. But none whose manhood in the least is precious to him cares to live that way. Mere inaction becomes to him as monotonous and demoralizing as a steady diet of bread and tea is to the physique. He must have some counter-irritant, some keen and bracing opposition, that stiffens his morale, brings into play the muscularity of character, trains powers that might be atrophied in long disuse.

Every situation has the human factor at the centre of it as the hub is in the midst of the wheel. For the real driving power you will have to look behind man's machinery and find a brain no larger than a sponge or a cauliflower ruling the whole mighty edifice.

Volcanic Islands.

The Ladrone islands are a chain of volcanic islands extending north and south 450 miles. On one of them are three active volcanoes; a fourth burning mountain is located on another of the group. All that part of the world is highly volcanic. Almost due east of Yokohama 150 miles is a submarine volcano which at times kicks up a tremendous fuss in the ocean overhead.

The Ladrone, by the way, are otherwise known as the Mariana Islands, a later name. They owe their original habits to the thieving habits of the natives. A giant lizard found there makes a business of stealing and eating chickens.

The Carolines are an archipelago of huge extent, comprising no fewer than forty-eight groups. All but five of these, however, are low coral formations. The remaining five (of which Yap is one) are of volcanic origin, with peaks 800 to 2,800 feet high. It is perhaps worth mentioning that the natives of the Carolines are among the handsomest people in the world, of a light copper complexion and well formed. The elaborate tattooing of the men, however, does not enhance their beauty.

Loses His Second Arm in Cause of Science

A despatch from Paris says:—Prof. Charles Inffroit, famous X-ray specialist, lost his remaining arm to-day in the 24th operation he has undergone since 1898.

The noted savant, who thus has sacrificed both arms in the cause of science, announced immediately after the operation that he will continue his experiments with artificial hands.

J. W. Hickson, the English faith healer, on whom 2,500 afflicted people waited during two days in Toronto.

Markets of the World

Wholesale Grain.

Toronto, July 6.—No. 1 Northern, \$3.15; No. 2 Northern, \$3.12; No. 3 Northern, \$3.08, in store Fort William. Manitoba oats—No. 2 CW, \$1.39; No. 3 CW, \$1.29; extra No. 1 feed, \$1.29; No. 1 feed, \$1.27; No. 2 feed, \$1.26, in store Fort William. Manitoba barley—No. 3 CW, \$1.55; No. 4 CW, \$1.55, in store Fort William.

American corn—No. 2 yellow, \$2.40; nominal, track, Toronto, prompt shipment.

Ontario oats—No. 3 white, nominal. Ontario wheat—No. 1 Winter, per car lot, \$2 to \$2.01; No. 2 do, \$1.98 to \$2.01; No. 3 do, \$1.92 to \$1.93, 1.0 bushing points, according to freight.

Ontario wheat—No. 1 Spring, per car lot, \$2.02 to \$2.03; No. 2 do, \$1.98 to \$2.01; No. 3 do, \$1.98 to \$2.01, 1.0 bushing points, according to freight.

Barley—No. 2, \$3.00. Barley—Malting, \$1.84 to \$1.85, according to freight outside.

Buckwheat—No. 2, nominal. Rye—No. 3, \$2.20 to \$2.25, according to freight outside.

Manitoba flour—Government standard, \$14.85, Toronto.

Ontario flour—Government standard, \$12.90, nominal.

Millfeed—Car lots, delivered, Montreal freights, bags included: Bran, per ton, \$62; shorts, per ton, \$61; good feed flour, \$3.75 to \$4.00.

J. G. Anderson is converting the woolen mill at Lucknow into a flax mill. This now gives Lucknow two flax

"hat," said the man in the smoking car, "it looks like new, yet it is six years old."
"How do you keep it looking so fresh and new?"
"Well, I got it reblocked twice, and last week I exchanged it for another hat in a restaurant."

Two more rural newspapers went to their valhalla last week in Ontario from heart failure over the high prices of everything and the tardiness of subscribers to cash up. The prospect of news print at \$110 a ton and the Government very kindly adding the last straw in additional postage is not likely to add to the hilarity of the members of the fourth estate. A prompt paying subscriber is the joy of an editor's life. Are you a joy bringer?

One of the so called "bribery charges" in connection with the affairs of the Ontario legislature has been exploded. There is nothing in it. Andrew Hicks, U.F.O. member for South Huron, and Whip of his party, in an official statement to Hon. W. E. Raney, Attorney-General, backs down and quits. His first statement, which he denied later, and again affirmed, until the province was all mixed up as to what he really did say, was based on the misunderstanding of certain remarks made by M. C. Fox, U. F. O. member for South Essex. Mr. Fox gave his version of those remarks, and Mr. Hicks, having no basis for the charges, withdraws them in his statement to the Attorney-General. Moreover, Mr. Hicks says he will never make any more statements.

Distressing Accident

A distressing accident occurred on Tuesday last about 4 o'clock at the new mill of Wm. Knechtel & Son when Frank Fritz had both hands and arms up to the elbow, and also his face and neck, badly burnt with boiled tar. It appears that a load of tar was being hoisted on the elevator, and Fritz was watching it ascend. When it reached the second floor, the bucket evidently was misplaced and came in contact with the floor, upsetting it upon Fritz, who was looking upward. Luckily, his eyes were not affected by the boiling tar, but his face, neck and arms, which were bare, were badly burnt. Dr. Taylor dressed the wounds. The young man is suffering great pain, being under morphine a goodly part of the time.—Haver Post.

FORMOSA.

(Intended for last week)
Mr. and Mrs. George Quickbuhm of Buffalo are here on a visit to friends and relatives. Mrs. Quickbuhm has been away for sixteen years and finds quite a change here. She is a sister of Mrs. Edward Herman and Michael Weiss.

Mr. and Mrs. Joseph Balk of Buffalo, are spending their honeymoon with the bride's parents, Mr. and Mrs. Michael Weiss.

The farmers are all wearing smiles after the recent rain.

The Formosa Parish is erecting new sheds.

Mr. Chris. Weiler motored to St Agatha.

Road work is the order of the day, everybody is at it now.

Mrs. Arthur Williams of Sarnia is visiting Mr. Alex Bauman.

Two youths mixed up in a lively scrap last week and both suffered from sore eyes and other bruises.

FORMOSA SCHOOL REPORT

List of pupils who are promoted to a higher class:

To Sen. IV—(Honours)—L. Oberle, H. Zettel, E. Montag, M. Bildstein, W. Massel. Passed—V. Oberle, M. Kraemer, L. Kuntz, J. Opperman, C. Rich, N. Strauss.

To Jr. IV—(Honours)—C. Heisz, M. Albrecht, E. Weiss, O. Ditner. Passed—B. Bruder, J. Weiler, A. Schill, M. Schnurr, Francis Tiede, C. Meyer, D. Weiss, V. Noll, J. Schnitzler.

To Sen. III—Honours—M. Tiede, L. Opperman, B. Noll. Passed—I. Schnurr, E. Oberle, R. Schill, G. Weishar, I. Vogt, B. Dentinger, B. Meyer, A. Gutscher.

To Junior III—Honours—Edward Schnurr. Passed—R. Shcemaker, R. Durrer, C. Weber, Leo Weber, Arthur Hihn, R. Weiler, J. Gutscher, F. Benninger, R. Ditner, E. Tide, Ermina Dentinger, M. Schnurr, B. Schill, Ed Oberle, W. Kuntz, O. Heisz, L. Benninger, G. Vogt.

To Sen. II—Passed—E. Weishar, B. Montag, L. Zettel, S. Albrecht, M. Rettinger, H. Kuntz, J. Batte, L. Strauss, L. Weiss, S. Benninger.

To Junior II—(Honours)—O. Noll, T. Batte, J. Schill, L. Meyer, A. Weber, B. Weiler, C. Kraemer. Passed—C. Beingsner, C. Kuntz, A. Ditner, H. Zettel, C. Weber, G. Benninger, I. Gutscher, A. Rettinger, A. Meyer, O. Benninger, A. Vogt, F. Benninger.

To Part II—Passed—A. Schnurr, I. Oberle, M. Weiler, O. Noll, M. Meyer, J. Kuntz, H. Albrecht, F. Beninger, L. Dentinger, W. Heisz, Ed Waechter, A. Kuntz, L. Meyer, E. Meyer, C. Tiede.

When The Day Is Over

When the house holds the cares and the worries of everyday life have dragged you down, made you unhappy, and there is nothing in life but headache, backache and worry, turn to the right prescription, fifty years ago.

Everything growing out of the ground seems intended for some use in establishing natural conditions. Dr. Pierce, of Buffalo, N. Y., long since found out what is naturally best for women's diseases. He learned it all through treating thousands of cases. The result of his studies was a medicine called Dr. Pierce's Favorite Prescription. This medicine is made of vegetable growths that nature surely intended for backache, headache, weakening pains, irregularities, and for the many disorders common to women in all ages of life.

Orilla, Ont.—"I suffered from a bad case of woman's trouble with backache, nervousness, disordered digestion, irregularity and I had great pain all the time, sometimes I would faint at my work. I had one physician after another but they did me no good. I then took Dr. Pierce's Favorite Prescription and it fixed me up all right. I look much better and feel fine. I will recommend the 'Prescription' to all suffering as I did."
MRS. MAYBELLE B. GRATZ, 116 Albert St.

Write Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for confidential advice and you will receive the medical attention of a specialist, wholly without fee—no charge whatever.

Why Men Quit The City

Last summer a farmer living east of town had much difficulty in getting a hired man to stay on the job. Man after man would start, but after working just a few days would quit. Finally he got up a notice and tacked it up at his front gate, with the result that he got a man who stayed with him until freeze-up. The notice read as follows:—Hired Man Wanted—Hired girl is a good looker; piano music every evening, pie three times a day, three spoons of sugar with every cup of coffee, hammock, feather beds or leather couches at your option for sleeping, free use of the automobile. Rising hour at 9 a. m., three hours rest at noon, quit work at 5. The boss tends to the horses, milks the cows and feeds the hogs.—Exchange.

Too Much Wedding

Last year I did not want to embarrass my best girl by letting her propose to me, so I asked her to be my wife, but she said she would rather be excused, so I foolishly excused her, but I got even with her because I married the girl's mother and then the girl became my daughter, and when my father married my daughter, he became my son. When my father married my daughter she became my mother. If my father is my son and my daughter is my mother, then who am I? My mother's mother who is my wife, must be my grandmother, I being my grandmother's husband, I must be my own grandfather

A Smooth Pair

M. J. Gearty of Rockford, Ill., and a side partner, named Ed. Norton, struck town the other day and put up at the Queen's Hotel, where they represented themselves as buyers for a Chicago firm dealing in vinegar barrels. They passed out a smooth line of talk, which the proprietor, Mr. John Vogt, took for chapter and verse. As a consequence when Gearty, the head of the expedition, intimated that he was running short of cash and asked Mr. Vogt to identify him at the Merchants Bank for a cheque of \$75, which he drew on himself against the Rockford National Bank, the genial host at the Queens walked right into the trap and innocently identified the stranger at the cage. The cashier passed him over the currency and he left. Falling in with Mr. Jos. McCurdy, a local teamster, the pair proceeded to take that gentleman in tow. Gearty, who

made out another cheque against himself for \$50, gave it to his friend, Norton, to cash at the Bank of Commerce, and McCurdy was persuaded to go along and identify Norton to the bankers. Norton got the \$50, and after carefully counting over the bills, walked out. The pair then left town without anybody suspecting their game. It was only after the cheques were returned on Saturday last from the Rockford National Bank with the notation "No Funds" that the locals began to guess that they had been stung. According to the Rockford Bank, Gearty opened up an account there several weeks ago with a deposit of \$250, and a few days after drew a cheque for like amount, closing his account. Later on, the Bank claims cheques began coming in from different sources in the States, and later on from Canada, all of which the Bank, of course, treated as worthless paper. In order to round up the alleged crook, Chief Ferguson has notified the police throughout the Province, and the various banks have also been advised to be on the lookout for him. In the meantime the local parties will probably have to come across with the coin for being too credulous with these strangers.—Herald & Times.

A negro charged with assaulting a 17-year-old girl was taken from the jail in Savannah, Ga., last week and lynched. He was first chained to a tree and oil poured over his clothing, but when an attempt was made to apply the torch he broke the chain. He was then shot with a fusillade of bullets.

MOTORIZING THE FARM

THE horse has been declared by Thomas Edison to be the most inefficient machine in the world. In return for the amount of food and care needed, the horse returns less in work than any other machine.

The average team of farm horses costs \$400, a good set of double harness \$100, a wagon without box \$115, making a total of \$615.

A Ford Truck costs \$750 at Ford, Ont. A Fordson Tractor costs \$850 at Dearborn Mich.

The initial cost of motorizing a farm is slightly greater than the cost of a horse outfit, but the lower cost of operation and upkeep of the tractor and truck and the greater amount of work done easily put the horse out of the running.

Government experiments have proved that the cost of feeding a horse is 8.7 cents per working hour.

A team of horses cannot plow more than two acres in a ten-hour day. At 8.7 cents per hour or 17.4 cents per hour for a team, the cost would be \$1.74, or 87 cents an acre. A Fordson Tractor plows an average of seven acres a day. The cost per acre averages not more than 75 cents per acre for gas and oil. The Fordson does three and a half times as much plowing in a day at a smaller cost per acre.

Suppose you are hauling produce to market or bringing out supplies. If the town is twenty miles away it will take you a whole day to make the return trip

with horses. If you have a heavy load and the weather is hot it will take you two days. If it took you twelve hours, the cost at 17.4 cents an hour for your team would be \$2.09. The average cost of running a Ford Truck, for gas and oil, is 4½ cents a mile or \$1.80 for the forty miles. But with the Ford Truck you can make the return trip in four hours. The truck enables you to make three times as many trips and at a lower cost per trip.

But this is not all. If you motorize your farm you can get up an hour later in the morning. You have no horses to feed, groom or harness. You start work after breakfast.

When dinner is ready you stop at the end of the field, drive your tractor direct to the house, eat your dinner, and rest till it is time to go to work again.

In the afternoon your motor works just as well though the sun is hot and the flies are bad.

And at night when work is over you are through for the day,—no horses to rub down, feed or water.

You are always free to leave your farm for picnic or vacation—no worry about horses left behind to be cared for.

Every way you look at it the motor has the advantage over the horse. It means shorter hours on the farm, more work done in less time and at less cost.

Liesemer & Kalbfleisch - Dealers - Mildmay

How to get rid of Cough, Bronchitis, Hoarseness and Bronchial Asthma.

The quickest way is to use Buckley's Bronchitis Mixture. Don't put off until to-night what you can do today. Step into Geo. Lambert's store and buy a bottle of Buckley's Mixture. Use it for five days, and if it don't prove to be the wonder Medicine of the world, take it back and get your money. Can one do more than this to prove to the public what a marvelous mixture it is? and I can back my claims too by the 100,000 Canadians that I have restored health and happiness, that are only too willing to tell these fellow citizens the great curative power it contains. It has conquered coughs of 35 years standing, the question is what will it do for me? Well you have everything to gain and nothing to lose as it is sold under a cast iron money back guarantee to banish any of the above ailments. Not a syrup, but a scientific mixture; twenty times stronger than any cough cure, acts like magic. One dose gives instant relief and a night's rest without a bark.

Price 60c; Mailed for 75c; 3 bottles for \$1.75.

HANOVER BRANCH, J. H. ADAMS, Manager.
WALKERTON BRANCH, W. A. BURROWS, Manager.

The Ontario Railway Board have granted permission to The Minto Rural Telephone Company to increase their rates to \$13 per year. Subscribers on this system have to buy their telephones, and pay for installing them, but the Company will furnish batteries and make repairs. Permission was also granted to Robert Wightman to increase his rates to \$15 per year. Mr. Wightman furnishes telephones and keeps them in repair and supplies batteries, new rates to take effect July 1st. Mr. Wightman has taken off his other line charge of ten cents on all long distance calls to subscribers on his system. This gives an interchange of service between subscribers at Fordwich and subscribers at Clifford for ten cents. Owing to the increased cost of all telephone supplies there are very few local telephone companies in Ontario who can give service for less than \$15 per year.

A double drowning accident occurred in the Grand River about a mile and a half west of Breslau on Friday last, when Miss Gladys Kaufman aged 18 years, only daughter of Mr. and Mrs. B. Kaufman, Watrloo, and Miss Gladys Hohmeier, daughter of Mr. and Mrs. Wm. Hohmeier, while wading across the river got beyond their depth and sank before help could reach them. They were clerks at the Mutual Life of Canada's head offices, the staff of which held their annual picnic at the old Moses Pratt farm on the Breslau road.

Constipation Cured By Christian Science

Seventy five people out of one hundred can be cured by Christian Science methods, which proves the great power of the Mind over the Digestive Apparatus and the frequency of Nervousness as a cause of Constipation.

When these methods fail Hacking's Kidney and Liver Pills are recommended. They are purely vegetable and do not Grip or Irritate; many people have found them excellent for Headache, Dizziness, Bad Breath, Coated Tongue, Loss of Appetite, Indigestion, Gas on the Stomach, and many other evils that are due to Constipation.

Where there is Extreme Nervousness and you are "all run down" and "tire easily" it would be just as well to take Hacking's Heart and Nerve Remedy along with these Pills. This combination goes well together and restores the good health of your younger days. The Heart action becomes normal, the Nerves take on new Life, Power and Vigor and the "human machine" becomes full of "pop" and vitality.

If you are tired of sickness and have lost the Power, Ability and Nerve Force to do your daily work and your Nerves are all Shattered just give these two Remedies a trial and we will positively guarantee beneficial results. Go to your dealer to-day and ask for Hacking's, and do not take any other kind for if you do you will be fooled right at the start and you will not get the results that we guarantee. Hacking's Limited, Listowel.

Protected Manufacturers VS. Unprotected Farmers

Farmers who have to bid in the open market for the available labor supply cannot compete with a protected or bonused manufacturer. The farmer is handicapped because he buys in a protected market and sells in an open one. With manufacturers the situation is entirely reversed. He is protected and consequently can afford to pay higher wages and offer more attractive induc-

If You Have High Blood Pressure You Must Be Careful

When the Blood Pressure is much above normal there is always the danger of rupture of a blood vessel, most frequently in the Brain and producing a stroke, or in the Kidneys, producing Bright's Disease. One should guard against over-exertion or excitement and take

HACKING'S HEART AND NERVE REMEDY

to dissolve the Uric Acid deposits that form in the Veins and Arteries, making them hard and brittle. This remedy is a wonder; it builds up the entire system by Purifying the Blood, Strengthening the Heart and by producing a normal and healthy condition of the Nerves.

Mrs. Wm. Morley, of Palmerston, used quite a number of boxes of Hacking's Heart and Nerve Remedy and they benefited her so much and she was so pleased with them that she recommends them to all her friends who have this trouble or who are all run down and Nervous. She says "you must be sure to get Hacking's."

Constipation is one of the aggravating causes of High Blood Pressure and it is advisable to use Hacking's Kidney and Liver Pills to drive out the Poisons that generate in the system. These two preparations go well together and you should buy a few boxes from your dealer to-day. Hacking's Limited, Listowel, Ont.

ments to the workmen than the farmer can.

Let us for the sake of argument reverse the situation, and then see how matters would stand. Let the farmer be protected or bonused for every bushel of grain grown, every pound of cheese or gallon of milk produced, every head of live stock sold, and for everything else he produces on the farm. This bonus would come out of the public at large, including the city workman. Immediately there would be a great cry raised that the farmers were being protected and that the cost of foodstuffs was being artificially increased. If that were done, however, (the farmers being protected or bonused to the extent of 25 or 35 per cent) they could afford to pay higher wages and attract laborers. The farmers, however, do not ask that they be bonused or protected. At the same time he demands that the other man should not be bonused or protected. There is nothing that any reasonable man can complain in the Farmer's Platform—"Equal rights to All, Special Privileges to None." We have not equal rights, as certain people (the manufacturers) have special privileges which so upset our whole economic system as to make it topsy-turvy. This causes a truck from the farm to the factory, and from the side lines and concessions to the city streets. It will never be right until our economic system is properly adjusted.

Petticoat rule obtains in Jackson, Wyoming, where the administration consists of a woman mayor and four women councillors. The women were elected by two to one over the male ticket. One man was bold enough to run against his wife. He will now stay at home and keep house while she runs the town.

A western judge charged a jury as follows: "Gentlemen of the jury, if you believe what the attorney for the defence has said, you will bring in a verdict for the defendant, or if you believe what the attorney for the plaintiff has said, you will bring in a verdict for the plaintiff, but if, like me, you do not believe what either of them has said, I do not know what the devil you do."

Solvency.

Take this advice: Don't go in debt. Your solvency's your one best bet. Far better drive a henry car, that breaks a slat at every jar, that backs when you would have it pull, and know it's yours, paid for in full, than journey in a fine Sedan that's bought on the instalment plan. Far better wear a suit of duck on which you've paid the final buck, than go around in brave array while tailors clamor for their pay. Far better in a cabin dwell, in some remote secluded dell, than occupy a gilded hall where bailiffs with their warrants call. There's naught contributes, you will find, more strongly to your peace of mind, than being in a place to say: "No man can sue me for his pay; I owe no kopecks, far or near, my bills are paid, my record clear." I've tried both plans and so I know; all kinds of bills I used to owe, and lawyers chased me through the town, and stern collectors ran me down. And life was then a sad affair, of walking floors and tearing hair. But now I pay for bed and board, and buy no junk I can't afford, and life is like a pleasant dream, or like a shortcake soaked in cream.—Walt Mason.

They All Know.

The business man assumed a frown, And wildly threw his paper down; We asked the reason for the fuss, And this is what he said to us: "The Editors, it seems to me, Are like the acorns—up a tree. By thunder, they are stupid folk, Look at this paper. It's a joke,"

He was a business man, you see, And knew our business perfectly.

The Lawyer heaved a heavy sigh And fixed the paper with his eye. "Dear me!" he said, "It's a very sad That Journalism is so bad; This paper has attacked a Court, Sensation of that vulgar sort Should never be allowed in print." And then he ate a peppermint.

He was a lawyer, don't you see, And knew our business perfectly.

The Farmer said, with angry eye, "These editors are all too fly, They'd out to send the paper free, It isn't worth a cent to me. Why don't they print some decent yarn, Describe, for instance, my new barn? The modern paper, as I see, Ain't nearly what it used to be."

The Preacher said: "I cannot say The press is of much use to-day; The editors have no back bone, Their papers lack a moral tone. My sermons never get a place, Now isn't that a black disgrace? In spite of everything I do, I only get a 'stick' or two."

He was a Preacher, don't you see, And knew our business perfectly.

The great Professor wagged his head And combed his whiskers, as he said, In language polished and sublime: "Our Journalism is a crime. The foul miasma of the Styx, Arises from its vulgar tricks. The Editors are boys at play And grow more foolish every day."

He decked a University, And knew our business perfectly.

SOILS and CROPS

Address communications to Agronomist, 77 Adelaide St. West, Toronto

The Modern Silo and Farm Management

The silo fits in well to our average farm management. This is assuming that the owner of a silo keeps sufficient stock on the farm to warrant such an equipment, let us say ten head or more. The silo is in keeping with economic farm practice as it stands ever ready to insure a crop of forage or fodder. In times of drought, early frost or hail, what has been grown can be saved. The best farm-grown forage and the most of a good and cheap ration are the principal values of the silo.

To best arrange the work of the farm so that each department can be made to turn a profit is one of the important questions of the average farm. Where silos are added to the farm buildings a change of farm management must follow. Less hay is needed, less land is required for pasture, more land must be used for corn or at least sufficient corn must be planted to fill the silo. This corn can be planted thicker than where ears alone are desired. An early maturing variety is generally to be preferred.

The filling season requires planning and this should be done ahead of time in order to secure sufficient labor. If exchange of work is desired plan to exchange with farmers who also fill silos. If this cannot be arranged for, plan to exchange work with farmers who have other rush seasons coming at earlier or later periods. In grain growing sections the threshing is a similar kind of work and is generally done after silo filling. Special work like bean threshing, clover-hulling, alfalfa threshing, grass seed threshing, fruit picking, etc., as a rule re-

quires extra help and the man with the silo can arrange to exchange so that he can have his silo filled.

"The silo is the cheapest known source of digestible carbohydrates." This is a truth well proven by many of the experiment stations and practical feeders, therefore to keep live stock and to keep it economically means the use of a silo, is such is possible, and it means that the work of the farm must be planned to accommodate this arrangement. Sufficient stock should be kept on the farm to consume the rough forages and to give a steadiness to the income and furnish work throughout the year. Where silos are filled a rotation of crops can easily be arranged as the corn designed for the silo is entirely removed and the land can be plowed in the fall and put into winter wheat, rye, or alfalfa. Where alfalfa is desired an early variety of corn should be planted and should be cut before the first of September so that the land can be quickly put in condition and planted by the first. This will give sufficient growth of the plant to warrant its living through the winter.

Where land is high it is desirable to use both a winter and summer silo. It is difficult indeed to obtain a revenue or profit from high-priced land in pasture. It does not grow sufficient forage to warrant a profit and the silo can be much more economically used, providing at least six times more feed than pasture. Arrange to have fodder designed for the silo planted close to the farm buildings, thus preventing a long haul at filling time. It is always wise to grow the bulky forage ration on the farm. If extra feed must be purchased it is cheaper to buy concentrates than rough forage.

Paint Puts Profits Into Your Pockets

There is probably no one point more neglected in the average farm home than the judicious use of paint, not only on the house and outbuildings, but also on machinery and various agricultural implements.

It is the rule rather than the exception in some sections to see houses, farm buildings and farm implements sadly in need of paint. The idea seems to be prevalent that paint is used solely for ornamental purposes, and its use is often regarded as a luxury rather than a necessity. While paint does, of course, serve to improve the appearance of property, it is far more useful for protection than for ornament.

A small amount of money and work expended in keeping houses or other farm buildings, or machinery, properly painted will add greatly to the length of their life. Paint puts profit into your pockets. Another valuable thing accomplished by painting is the improved sanitary conditions of buildings and outhouses.

Much of the work of painting can be done by the owner of the place, provided he has the time. The following pointers will help:

Staining and Varnishing.

Staining and varnishing are easily done, but I do not advise an inexperienced man to try the graining part; only an expert can do that. Graining is simply rubbing some color very thinly on a suitably prepared ground color, a mere glaze of color, then combing and wiping out to imitate the natural grain of woods. Easily said but difficult to do, unless you will be satisfied with a poor imitation. Staining will do very well in place of graining, and the stain may be either a thin oil and turpentine stain, a water stain, or an oil stain. Better get the stain from the store, ready to apply. Paint the wood with lead paint, colored to suit the color of the stain; for oak the ground color should be a straw or buff color; for walnut or other dark wood, make the ground drab or dark buff. Cherry stain looks best over a light reddish ground. The store stain can be had prepared in varnish, and a coat of this, put on liberally, will make a fine finish. After being sandpapered lightly it may have another coat.

To stain bare wood use water stain or oil stain. Soft woods take oil and water stains best. Hard woods need some turpentine with the oil; or water stain will do for them. When you have coated the surface with the stain, at once begin wiping off the surplus, leaving almost no stain on the surface; this will bring out the grain of the wood nicely. It is wonderful what a fine effect can be had on hard pine with oil stain, colored with burnt umber for walnut or dark oak, or with raw sienna and a little burnt umber for light or medium oak.

After applying the stain, rub it off with a cloth, leaving the surface quite dry; when the stain has become dry, say next day, rub on some wax finish, which is simply wax melted in turpentine. Paint stores sell it. One coat well rubbed in will do. Rub the wax well to a polish.

If we had fireproofed the shingles on the large farmhouse we lived in some years ago we would have escaped a very bad fire which destroyed all the buildings except the huge walls. A neighbor burned a great bunch of dry hedge trimmings, and the wind carried a spark to our roof.

Any good mineral paint is more or less proof against such an accident. A very dry old shingle roof will blaze from a very tiny spark. A tiny spark, falling on a painted roof, will die out and do no harm.

Lime-water makes a good fire resistant; in fact, whitewash or water from slaked lime makes one of the most efficient fire resistants for a roof. Saturate the shingles with the lime-water or lime wash. The white color may be tempered by the addition of some dark mineral paint.

To make up a pot of white paint in oil, have ready two clean paint pots. Into one put seven pounds of white lead ground in oil, and about two tablespoonfuls of drying japan; mix these together, add a little raw linseed-oil and mix again; this should form a stiff paste. If outside paint is desired, add raw oil enough to form a point of the usual consistency; strain into the other pot through cheesecloth. The paint is then ready for use, but will be better for standing a day longer. If the paint is wanted for inside use, thin the stiff paste with turpentine. If color is desired it may be added and mixed in while the mass is in the paste form.

To Paint Old Boarding.

If you have any old weather-boarding to paint, say the barn or other farm building, the first coat will soak in as into a sponge. The dry wood should be filled with some cheap but good paint. Take twenty pounds whitening and mix to a paste with a half and half mixture of water and benzine; then mix up with a little linseed-oil fifty pounds of white lead ground in oil. This will form a paste; mix with the whitening mass; use a paddle to mix to a stiff paste. Then mix equal parts of raw linseed-oil and sweet milk; add the milk to the oil a little at a time and mix well. Turn the paste into this mixture, thin the entire mass to the usual paint consistency, then apply. This works nicely under the brush and gives a very good surface. When dry you may apply a coat of any good paint, white or dark. These two coats will give as solid a job as three coats of the ordinary paints.

Before painting metal, such as roofs, spouts and machinery, make the surface perfectly clean. Never apply paint over rust. In removing rust, scrape down to the bare metal. Oil and grease on roofing and spouts must be removed by scrubbing with soap and water, or rubbing with rags dampened with benzine; otherwise paint will not stick.

Publications For Farmers.

The new list of publications of the Department of Agriculture at Ottawa contains titles of nearly three hundred and fifty bulletins, circulars and other pamphlets that deal with agricultural pursuits, including dairying, field crops, live stock, orchard and garden crops, poultry, insects and plant diseases, farm building construction, farm machinery and many other topics. The subjects are arranged alphabetically under general titles. Not only are the lists themselves available from the Publications Branch of the Department but any of the publications therein contained.

Buy Thrift Stamps.

POULTRY

Limited feeding for young chicks during the first few days and weeks after hatching is advised by a poultry expert.

"Practice retarded or limited early feeding. Nature has provided the newly hatched chick with a 'bread basket' containing sufficient food to last from sixty to seventy-two hours. Before emerging from the shell the yolk is absorbed into the body of the chick for nourishment during the first three days of its existence. Do not feed too soon."

First day—Leave chicks in incubator and supply more pure air.

Second day—Provide sour milk in shallow pans; also feed some chick grit.

Third day—Give first solid food. This mash is suggested for one hundred chicks: One raw egg, three small handfuls of rolled oats and three small handfuls of bran. Thoroughly mix by rubbing and give four feeds three hours apart. A dash of fine charcoal and bone meal helps.

Fourth to fourteenth day—Keep chicks hungry and active. Give two feedings of commercial chick feed, two feedings of the egg, oat and bran mixture, and one feeding of green food, sprouted oats, lettuce, etc. Supply hourly skim-milk for at least two weeks.

After second week—Simplify and cheapen the ration. Substitute the following mash: Bran, middlings, cornmeal, ground oats, equal parts by weight, and ten per cent. meat scrap. Increase the size of grain feed as the chicks grow older.

These points also should be kept in mind:

A dry mash of bran, ground oats and meat scrap will prevent toe picking and other cannibalism.

Do not overfeed, prevent crowding, provide plenty of fresh water and keep them exercising.

Corn Smut.

The smut of corn is well known to farmers. The smut masses which usually appear as swollen outgrowths may be found on the ears, stem or leaves. These outgrowths are sometimes quite large and make the smut very conspicuous. They are at first covered by a thin membrane, which soon breaks away and exposes the black mass of spores. The mass soon becomes powdery and the myriads of

spores which each mass contains are readily blown about by the wind. It is these spores that spread the disease during the growing season and carry the smut over the winter to the next crop.

In many of the smuts, as the smuts of oats and the stinking smut or bunt of wheat, the spores get on the seed and when the seed is planted begin growing with it and attack the young seedling. Treatment with a solution of formaldehyde is effective in killing the spores on the seed and preventing infection of the young plants. In the case of the loose smut of wheat and the loose smut of barley the spores are blown about at blossoming time and grow into the very young seed. The hot water treatment of the seed is used to kill the smut inside the seed. In the case of corn smut seed treatment of any kind has been found to be of no use, as the smut spores live over in the soil or in manure rather than in or on the seed. So the only way to control the corn smut is to prevent the smut spores getting into the soil or the manure. Not only do the spores live in the manure pile for some time, but they actually increase rapidly in number if the conditions are favorable.

Corn smut is found in all parts of Canada where corn is grown, but is more common in Eastern Canada. Generally it is not very prevalent and the losses are not great. Where it is common, measures should be taken to prevent its spread. The smut masses should be cut out during the growing season. They should be removed before they have broken open and spread their spores. They should not be left lying where they may reach manure or refuse and be carried back to the soil but they should be gathered and burned. Rotation of crops is also valuable in preventing corn smut. The smut does not live long in the soil and will not attack any other crop, so time should be given for the smut to die out in the soil before another crop of corn is planted. Seed treatment has not been found to be of any use in corn smut.

A manufacturer of perfumes in one year used the following flowers: 2,400 tons of roses, 1,750 tons of orange blossoms, 134 tons of violets, 280 tons of jasmine, 70 tons of tuberoses; 15 tons of jonquils. These quantities seem enormous until you stop to realize that to make one pound of attar of roses it requires eleven tons of roses—about three million blossoms!

THE SUNDAY SCHOOL

THE SUNDAY SCHOOL LESSON JULY 11TH

Jonathan Befriended David, I Sam. 20. Golden Text, Prov. 17: 17.

1-11. From Naath in Ramah. This is evidently the statement of the editor or compiler of the book, who put the various narratives together in their present form, and who seeks here to make a connection between chapter 19: 18-24 and chapter 20. The difficulty, however, remains that in v. 5 David speaks as though he were expected as a guest at the king's table at the new moon feast. A possible explanation is that, after the experience of Saul's messengers and of Saul himself with the prophets (19: 20-24), there may have been a partial reconciliation, and that may also account for the conversation with Jonathan here in vs. 1-2. If so we can understand how Jonathan believes that all is well and refuses to doubt his father's sincerity, while David is still afraid. At any rate David is convinced that his life is in danger. His friends decide that Jonathan shall observe what the king says at the new moon feast, and that, in the meantime, David shall remain in hiding.

12-23. Jonathan Made a Covenant. Jonathan's words are full of deep feeling, and display the qualities of a sensitive, noble, and unselfish mind. He foresees the fall of his father's house and the rise of the house of David, and pleads only that his own life and his household may be spared when the day of David's succession to the throne shall come.

24-31. When the New Moon Was Come. One or two days of the new moon were regarded by the Hebrews as holy days, like the Sabbath, days of rest and worship. The feast was part of the celebration, and it was expected that all the guests would be in their places. Saul noticed the absence of David, and on the second day of the

feast inquired of Jonathan why he was not there, and then charged his son angrily with having chosen David to his own shame and hurt. "For," he said, "as long as the son of Jesse liveth upon the ground, thou shalt not be established, nor thy kingdom."

32-42. Jonathan Answered Saul. His loyalty to his friend nearly cost him his life. He rose from the table in fierce anger, and went to warn David. Not for the possible loss of the kingdom, but for his friend, he was grieved, because his father had done him shame in charging him with conspiring against him to obtain the throne. That Jonathan knew David had not done and would not do.

At the Time Appointed. See vs. 18-22. It was somewhere outside the city that David was hiding. The stratagem which the friends had devised was effective. No onlooker would know that any communication had passed between them.

David Arose. This was no part of the original plan. If it had been, the shooting of the arrows would not have been necessary. At the risk of discovery the friends had a meeting. They know that their parting may be for a long time, perhaps forever, and so they feel they cannot part without seeing and speaking to each other again. The correct rendering of v. 41 is as follows: "David arose from beside the mound." The mound appears to have been David's hiding place.

Bowed Himself Three Times. Close friends as they were they observed the forms of greeting and of courtesy of which the Orientals are so fond. David recognizes also the great thing which his friend has done for him, and shows him both affection and reverence. David's self-control abandoned him in the parting scene, but Jonathan is the more calm and strong of the two. He reminds David of their covenant bond and oath (vs. 13-17), and pronounces in farewell, "The Lord shall be between me and thee, and between my seed and thy seed for ever."

Highest Priced Bull Ever Sold in England—Bought by Canadian. Clipper bull "Millhills Comet," sold at Millhills sale in Scotland for \$34,000. He was bought by J. J. Elliott, of Guelph, Ont.

The Welfare of the Home

Fatherhood, a Profession

We hear a great deal of the sanctity of motherhood and of the sacred responsibilities of the mother; but who talks about the nobility of fatherhood and the wonderful privilege of being a father? One would almost suppose that children had but one parent, or that, beyond the obligation of support, a father owed nothing to his children.

As a matter of fact, just what does he owe them?

In the first place, he owes them the best possible inheritance of health and natural strength. If the fathers of the present generation had been taught, as schoolboys, that they owed their children a heritage of physical health, the present generation of children would be a far healthier, happier lot of youngsters.

And having given his children a healthy heritage, the father should share with the mother the oversight of their children's well-being. I know—as everyone else does—hosts of fathers who not only fail to take any responsibility about the children's habits, but who actually, though unconsciously, work against the mother by giving surreptitious candy, by keeping the children up late to play with them and thus make her work with them more difficult. The result is that Father is very popular, while Mother is considered "awfully fussy."

On the mental side, a child, as he grows older, looks more and more to his father. Wise is the father who takes an active interest in current events or allies himself on the side of local civic improvement, for through his example his children naturally acquire a love of good citizenship.

And on the moral and religious side, how often is Father a mere figure-head in his own family? Usually it is Mother who represents the moral law, or, if Father does take a hand, it is merely as the executor of her decreed punishment. "Wait till your

Father comes home!" is a phrase filled with terror for the small rebel.

Too often church attendance is left entirely to the women. The children see Mother start off alone for church, while Father remains at home to read his paper. The notion that church is a woman's affair is formed so naturally that, later in life, it seems an instinct.

How much children miss, how much fathers miss, by this one-sided parenthood! Happy the boy who looks up to his father as an ideal of bodily vigor, wisdom and goodness. And this does not mean that Father must stand on a pedestal. Far from it! Anyone who has read the charming letters of Theodore Roosevelt to his children sees, as in a mirror, the picture of a father utterly devoted to his children, and utterly adored in turn. Whether he is leaping from haymow to haymow in a wild game of tag, or reading aloud with his children gathered around him, he is always their chosen companion, their best friend, their greatest hero. And there are many devoted fathers! Francis E. Leupp gives us a charming picture of one of his little boys, "A Day with Father."

Reversing a well-known quotation, we may say, "Happy is the father who knows his own child!" Happy because there is no more delightful study than that of the development of a child, as he progresses from infancy, through childhood to youth. Happy because of the inspiration that comes from the companionship of children. Happiest of all because, in the trying times of their youth and early maturity, he will be able to understand his children. He can guide and counsel them, instead of standing helplessly by—an outsider. If only Canadian fathers would know their children, they would find them more interesting than any business in the world, and as for the children, who can measure their gain?

The Farm Beautiful.

The beauty of the farm in large part depends on what is in the heart of the man and woman who make it their home. Beauty of thought, beauty of planning and beauty of doing cannot but make the farm home beautiful. For beauty comes from the heart where the issues of life are born. The character of the occupants may be learned from the premises quite as accurately as from association or from the printed page, and if that life be charming or sturdy these qualities will be everywhere evident.

When the thinking is right, there will be well-kept buildings, not so much because of the money invested in them, as on account of the little touches here and there that keep things looking well. A fresh coat of paint, which the farmer can put on himself in these days when we can buy fine paints all ready to spread, a weekly trimming of the yard about the house, a minute or two spent in training a few vines up the side of the porch, these are helps to the farm beautiful.

Then, too, the wife in the house may do many things that will tend in the same direction. The curtains and the shades at the windows tell their story of the thought back of them. A few pretty plants in the yard, with a flower or two in a jar on the porch; walks clean and neat, window glass free from dust, they all speak well for the beauty of heart of the one who is behind the pleasant service.

But, best of all, beauty of heart shines out and makes the home beautiful in the kindly living of those who love the farm best of all places in the world. Love counts for more than paint or any work of the hand; for love shows where the heart is, and love always makes the thing it touches radiant with beauty.

Now Is the Time To

Sell old fowls and give the youngsters room, and sell all surplus early chicks for broilers.

Kill every weed—in the garden and in the mind.

Run the grindstone by gas or electricity. Quit using elbow-grease.

Stay on the farm.

Put running water and a bathroom in every farm home.

Have pure-bred sires for every farm.

Plan for a week's vacation when the work slackens up.

Give that son or daughter a plot of ground, some hens, a calf, a pig or a sheep for his or her very own.

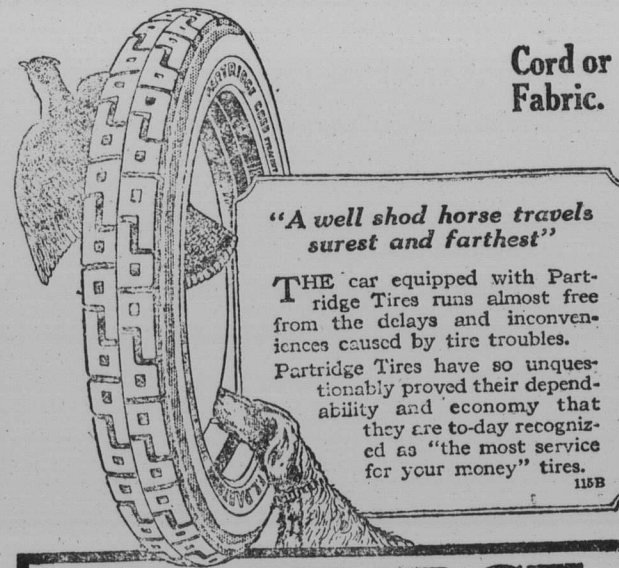

A cool drink of water is quite as refreshing to a horse as to his master during the hot weather. Make some provisions whereby the tank can be given a bucket of water in the middle of the forenoon and afternoon.

MANITOBA LAND

Tell me what you need and I will gladly give you full particulars of choice improved and unimproved farms in all parts of Manitoba. You can still buy within 15 miles of the centre of the City of Winnipeg (population 300,000) at from \$50 to \$100 an acre.

Sample:—\$43 an acre, highly improved section, 400 acres cultivated. Good buildings and water, 1½ miles from market and school. This price includes 10 horses and a full line of implements.

R. A. McLOUGHRAN, C03 McIntyre Bldg., Winnipeg, Man.

LE AND WEAK VES AND MOTHERS

gain Health and Strength
around Dr. Williams'
Pink Pills.

Many women who had a good color in their girlhood grow pale and colorless when they become wives and mothers. When the fading color in the cheeks and lips is accompanied by a loss of brightness in the eyes and an increasing heaviness in the step, the cause will be found in the state of the blood.

Many causes contribute to the condition of the blood known as anaemia. Overwork in the home, a lack of outdoor exercise, insufficient rest and sleep, improper diet—these are a few of them. The important thing is to restore the blood to normal, to build it up so that the color will return to cheeks and lips, brightness to the eyes and lightness to the step. Dr. Williams' Pink Pills are the great blood builder and nerve strengthener. They begin with the very first dose, and through a fair use make new blood that carries strength and health to every part of the body. The appetite increases, digestion becomes more perfect and energy and ambition return. The case of Mrs. Wm. McNish, 4400 St. George Street, Brockville, Ontario, proves the value of Dr. Williams' Pink Pills in cases of this kind. Mrs. McNish says: "I was quite young when I married, and in raising my family I became all run down and a nervous wreck. I became so weak that I could hardly walk across the floor without sitting down to get my breath. I slept poorly and at times my nerves would twitch so that I could not keep still, and I was in constant misery. I tried many medicines but they did not help me; indeed my condition was growing worse, until one day a friend told me that she had been in a somewhat similar condition and had been helped by Dr. Williams' Pink Pills, so I decided to try this medicine. After the use of a couple of boxes I felt they were helping me. My appetite was better and I slept better. By the time I had used half a dozen boxes I felt like a new woman, my health had fully returned and I could do my housework with ease. In view of what Dr. Williams' Pink Pills have done for me I cannot recommend them too highly."

The best time to begin taking Dr. Williams' Pink Pills is the moment the least bit out of sorts. The sooner you will get your old time energy. You can get bottles through any medicine dealer or mail at 50 cents a box or \$2.50 from The Dr. Williams' Co., Brockville, Ont.

See Themselves.

our druggist sells a tiny bottle of "zone" for a few cents, sufficient to remove every hard corn, soft corn, corn between the toes, and the cal-

luses, without soreness or irritation.

Members One of Another.

Family loyalty is not the least of the virtues. The household divided against itself, we are assured, cannot stand. A young man or woman facing life and entering the world without the faith and the love of a home in the background is destitute of one of the most valuable assets.

It is not news that most households live at peace and in equity behind closed doors, and so it is quarrels and murders that find their way into the newspapers preferentially.

Could we but see at close range how most families lead their lives we should be reassured, and we should not become cynical because of the minority of dismal failures in marriage and parenthood.

The foundation-stone of society is the happy family. It is a family in which a firm hand of discipline controls the growing child; in which children's rights are recognized and still a respect for the elders is inculcated and insisted upon.

It is a family which knows how its own members spend their days and where they are. Children and parents do not meet as strangers at the table now and then. Pleasures and sorrows are shared like food or labor or any other blessing.

There is no family life where the heads of the household are not deferential to each other. No contagion spreads so fast as that of disrespect. If husband and wife are querulous or caustic, so runs the tune of all the household. The children will follow the deplorable pattern. Much of the pleasure of life is in the reminiscence; and there is nothing we remember more gladly than the affection evident between our parents, who were lovers to the last. In a time of upheavals and varying standards, when civilization seems to stand on the debatable ground and the pillars of the social order threaten to collapse, we need to consider the part that the home plays and the duty of each individual in the home. The country at large will have no higher character than that which the ethics and ideals of its homes establish. Sweeten and purify domestic existence and a cleansing wind blows through the nation. The life of those who one by one compose a family is linked with the upward struggle of the race, and in the family one learns the meaning and the utility of consent and common action, for the good of all.

The Self-Reliant Raven.

The literary history of the raven begins with Noah and Elijah. Naturalists call him "the most wary, the most amusing, the cleverest of birds." He has also been described as grave, dignified, and sedate, and many instances have been given of the peculiarities of this historical bird.

The bill of the raven is a formidable weapon, strong, stout, sharp at the edges, curved toward the tip. It is his one weapon of offence, but it answers the purpose of two or three. Like the dirk of the old time plainsman it is equally available as a dagger or as a carving knife. It can also be used as a pair of pliers. It can kill a rat at one blow. The raven can drive its beak right through the spines of a hedgehog. It is said that the raven will never attack a man. If this be true, it is, it is thought, not so much from any defect of courage as from the bird's keen intellectual perception of what will pay and what will not.

Like most of his tribe, the raven is, in the strictest sense of the word, omnivorous. His dietary ranges from "a worm to a whale."

When his nest is built, as it generally is, beneath some overhanging rock which quite conceals it from view from above, its position may sometimes be discovered by the remains of rabbit neatly laid in the short grass at the top of the cliff in what might be called his "larder." But a larder implies an amount of economy and self-restraint that it is not in the raven to practise.

In districts where food is scarce the ravens will attack without scruple a newly born lamb or even a sheep that has been cast.

The raven has a passion for solitude. He will tolerate no rival, not even his own offspring, in the neighborhood of his throne. He drives them ruthlessly away as soon as they are able to shift for themselves.

Are Handkerchiefs Dangerous?

When you have been suffering from a bad cold have you noticed what a long time it hangs about?

The handkerchief is responsible, for each time you use it you reinfect yourself. No one would think of cleansing a wound and then replacing the dirty bandage on it, yet that is what we do when we continue to use the same handkerchief for a cold.

The power of eucalyptus to kill the germ is well known, and a handkerchief liberally supplied with it is rendered as nearly disinfected as possible, considering that the handkerchief is repeatedly used. Unfortunately, so many people dislike it.

I have discovered that by using eucalyptus on a supply of paper handkerchiefs, when used once only and destroyed, a bad cold can be cured within a very few days, for by this treatment every application of the handkerchief to the nose carries with it fresh disinfectant, and being used once only no reinfection can possibly take place. A clean, properly disinfected handkerchief is of the greatest value to use for breathing through where there is dust, bad smells, or infection of any kind.

The "Weaker" Sex.

If it is charged against women that their brain weighs less than the male brain, the quality of the female brain is much higher than the male.

It has been noted, too, that few great causes succeed unless there is a woman behind them. It was a woman who really roused the conscience of the world against slavery. It was a woman—Florence Nightingale—who roused the world to make warfare humane.

It was Queen Elizabeth and Queen Victoria—who lifted the prestige and standing of the Empire to higher points than any male ruler.

In paying our thanks for "services rendered" to such great statesmen as Gladstone, Salisbury, and Chamberlain, to mention but three of many, we are really honoring their wives, from whom they drew their inspiration.

A woman—Joan of Arc—saved France from becoming part of Britain, and another woman, Catherine the Great, set Russia high among the nations.

There are more women inventors than men, and more female teachers than male.

It is admitted that women have far greater moral courage than men, and it is a very moot point as to whether they have not greater physical courage.

On the stage, and in the world of song, women reign supreme. And let it be remembered that women stood nearest to the cross on Calvary, and were first at the open tomb on Easter morn.

HEALTHY CHILDREN ARE HAPPY CHILDREN

The well child is always a happy child—it is a baby's nature to be happy and contented. Mothers, if your little ones are cross and peevish and cry a great deal they are not well—they are in need of medicine—something that will set their bowels and stomach in order, for nine-tenths of all childhood ailments arise from a disordered state of the bowels and stomach. Such a medicine is Baby's Own Tablets. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach, and thus drive out constipation, colic, indigestion; break up colds and simple fevers and make the baby healthy and happy. Concerning them, Mrs. Albert Hamel, Pierrefleur, Que., writes:—"Baby's Own Tablets are the best medicine I know of for little ones. They relieved my little girl from constipation when nothing else would and I can strongly recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Water We Carry.

The body of an average man, weighing 154 pounds, contains forty-six quarts of water, the fat a little less, the nerves more than one-half water, and the skin nearly three-quarters water. The brain, muscles, lungs and heart are three-fourths water, while the blood is more than four-fifths water.

Ask for Minard's and take no other.

Copperas is an iron compound, and contains no copper.

When beginning to give a foal cow's milk do so most gradually. If it is suddenly given a full meal, indigestion and troublesome results will be sure to occur, but if given in small quantities, and often, there should be no complaints. When once accustomed to a cow's milk there will be few or no dangers in feeding more liberally.

FALLING? HERE'S

WHERE IT SHOWS

Don't worry! Let "Danderine" save your hair and double its beauty

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of delightful "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Your hair will grow strong, thick and long and appear soft, glossy and twice as beautiful and abundant. Try it!

His Grave.

His grave is far away
Across the sea,
Away from home and love—
Away from me.
I'd go and lay on it,
If it were near,
The spring-time flowers he loved
When he was here.
I'd plant the summer roses,
White and red,
Beside the wooden cross
Above his head.
Lord, I believe his soul
Is in Thy care,
Yet from my heart doth rise
This human prayer:
"Oh Lord, beside his grave
May flowers spring,
And in the air above
May sweet birds sing!
"Oh, may the spot be blessed
And brightness shine!
May Nature take the charge
That should be mine!"

MONEY ORDERS.

Buy your out-of-town supplies with Dominion Express Money Orders. Five Dollars costs three cents.

Quebec's Maple Sugar.

The Province of Quebec has three schools in which maple sugar making is taught. The Province's output of maple sugar for 1919 was 12,353,667 pounds, and 1,470,275 gallons of syrup.

Minard's Liniment for sale everywhere

Many farmers have been handicapped because they have been taught that clover and the other legumes were the only means of increasing the nitrogen content of their soils. Of course, these are the best, and in many instances the most satisfactory means of adding nitrogen to the soil, but there are millions of bacteria, waiting to feed upon roots, stems and organic matter that may be plowed under and make it into available nitrogen for another plant.

FACE COVERED WITH PIMPLES

Hard and Awfully Sore. Itched. Cuticura Heals.

"I had never had a pimple and then my face became covered. Later on the pimples became hard and awfully sore, and they itched so that I could not rest one moment. I had to scratch my face was poisoned. I was advised to try Cuticura Soap and Ointment, and after using them three weeks I was healed." (Signed) Miss Edith Grover, West Oldtown, Me., Dec. 16, 1918.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: Lyman, Limited, St. Paul St., Montreal. Cuticura Soap shaves without lather.

It Holds its Flavor

BITS OF HUMOR FROM HERE & THERE

In Sunday School.
Teacher—"Why did Noah build the ark?"
Young Canada—"I think it was the first attempt to solve the housing problem."

Deaf to Duty's Call.
An American was boasting about his country, and stacking wonders tier on tier, when a listening Britisher intervened with:—"Pretty good, all those things! But we have a bugle which was sounded in England in 1914, and it wasn't heard in the United States till nearly three years afterwards."

One On the Parson.
"It is not always safe even for a clergyman to quote Scripture," remarked Bishop Weldon the other day. "For instance (he continued) one very cold day a certain vicar and one of his elderly parishioners were walking home from church when the latter slipped and fell flat on his back. The clergyman looked at him for a moment, and being assured that he was not hurt, said: "Ah, sinners stand on slippery places."
"The old man looked up and smiled slyly.
"Yes, I see they do," he said, "but I can't."

Minard's Liniment Co., Limited.
Dear Sirs,—This fall I got thrown on a fence and hurt my chest very bad, so I could not work, and it hurt me to breathe. I tried all kinds of Liniments and they did me no good. One bottle of MINARD'S LINIMENT, warmed on flannels and applied on my breast, relieved me completely.
C. H. COSSABOOM,
Rossway, Digby Co., N.S.

"The essential charm of the farm remains and always will remain: the care of crops, and of cattle, and of orchards, bees and fowls; the clearing and improving of the ground, the building of barns and houses; the direct contact with the soil and with the elements; the watching of the clouds and of the weather; the privacy with nature, with bird, beast and plant; and the close acquaintance with the heart and virtue of the world."
—John Burroughs.

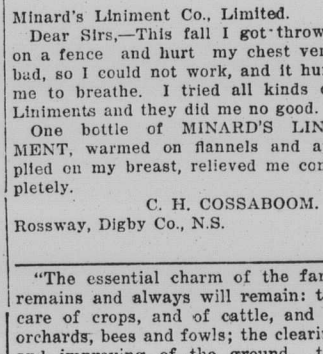

Electricity Closes Windows.

Electrical apparatus has been invented to close all the windows in a house when rain begins to fall, the first few drops moistening blotting paper, putting the mechanism in operation.

THE TONE That Is Where The Victrola Is Pre-Eminent

The Victrola brings to you the pure and varied tones of any musical instrument, and the beauty and individuality of human voice—all absolutely true to life.

Such fidelity of tone was unknown before the advent of the Victrola—the first cabinet style talking machine; and this pure and life-like tone is exclusively a Victrola feature.

Why exclusive with the Victrola?

Because of the patented Victrola features, which have been perfected after years of study and experiment; "Goose-Neck" Sound Box Tube, Concealed Sounding Boards and Amplifying Compartment of Wood, Modifying Doors.

It is the perfection of every part, and its perfect combination with every other part, that gives the Victrola its superior tone—that makes the Victrola the greatest of all musical instruments.

There are Victrolas in great variety of style at from \$40 to \$1,000.

We are sole agents for Victrolas and Victor Records for Mildmay.

Farm For Sale

One of the best farms in the Township of Carrick, being lot 19, con. 14, and lot 19, con. 13, consisting of 220 acres more or less. On the one farm is a good brick house, 2 barns, driving shed etc., farms well fenced and well supplied with water. Over 170 acres under crop. Convenient to Church and school, five miles from Walkerton. Will be sold on easy terms. Apply to owner, Paul Heitforth, on the premises, or R. R. 1, Carleton Place.

CARLSRUHE.

Mr. Fred Hahn of Santiago, Cal., is visiting his brother, John Hahn. Mr. Hahn spends highly of the southern country. He has lived in California about twenty years.

Mr. H. Schmitt of Ebbwille, Mr. and Mrs. Sara Schmitt of Waterloo and Miss Mary and Tina Wandt of Waterloo visited John Wandt on Sunday.

Mr. and Mrs. Peter Saugel of Kitchener visited Mr. and Mrs. August Preiburger.

Mr. and Mrs. Joseph Brenner of Linwood, Mr. and Mrs. Nathan Tschirhart of Detroit visited Mrs. Catherine Lohsinger on Sunday.

Messrs. Charles Schwan and Paul Humpfer visited relatives in Kitchener on Sunday.

Rev. Father Lenhart is attending the retreat in Kitchener this week.

Mr. J. J. Schwan of St. Anne's Convent, Kitchener, is spending a few weeks here.

Jack Whitter and Clarence Russell were at the Bay fishing. They reported a very good catch, although none was larger than two feet.

ADDITIONAL LOCALS.

Miss Ruby Spencer is spending this week in Guelph.

Messrs. George and Val Wisler are taking over Mail Route No. 2 this week.

In a motor car accident which took place on the Elora Road, north of Mildmay, on Sunday evening, a Listowel man had his hip badly bruised. He was able to go home by train on Tuesday afternoon.

On Tuesday of last week Mr. James McDonald, of Grey Township, was accidentally shot and killed in a simple manner. He was standing near his neighbor, Mr. John Loyttit, waiting to assist in taking off the hide of a horse which he was about to kill. The bullet of a 44 calibre revolver glanced off the horse's head striking him in the abdomen, cutting an artery. He died within about twenty minutes.

Liesemer & Kalbfleisch

LIVE STOCK MARKETS
TORONTO.

With around 8000 head of new stuff the cattle market generally was dull and prices generally \$1 lower. The quality of the cattle was mostly medium and common. There is a fair demand for good and choice butcher cattle, heavy finished steers and good fat cows, at the lower prices.

The biggest decline was shown on the light weight butchers and green steers. Good butcher bulls sold at fair prices, but heavy, coarse bulls were very slow of sale.

For stockers and feeders the market was limited to a few choice breeder steers. For milk cows and springers sales were slow and confined to the better classes of cows.

The outlook for the immediate is none

too favorable, excepting for the good quality stuff.

The market in the small stuff is away off, the best prices for choice calves running around from 15 to 16c and common 12 to 14c. Sheep are weak and slow of sale; in fact are not wanted at all during the hot weather, and farmers would be well advised to keep them home for a while.

The hog market is holding steady, but the buyers are taking 18c f.o.b. and 19c fed and watered. The hog market, in fact, is about the only thing that looks anyway strong just now.

Rev. R. M. Haller of Decemerton and Rev. A. C. Montag motored to Kitchener on Sunday, where they will attend the retreat this week.
