

The Protestant AND EVANGELICAL WITNESS.

"PROVE ALL THINGS: HOLD FAST THAT WHICH IS GOOD."—1 Thess. v. 21.

Vol. 3.

The Protestant,
AND EVANGELICAL WITNESS,
is issued every Saturday from Howard's Printing Office,
South Side Queen Square.

BY DAVID LAIRD, Editor and Proprietor.

Twelve Shillings if paid within the First quarter after being taken, or from the date of the last payment; Thirteen Shillings, if paid within the Second quarter; Fourteen Shillings, if paid within the Third quarter; after which, Fifteen Shillings will be charged.

Advancements interest at the usual rates. (To prevent disputes, all advances should be sent to the Office before 3 o'clock on Friday.)

The Eternal God.

The original of the following poem is in the production of Daphne, a Boston poet of some note. It is said to have been translated into English by order of the Emperor, and hung up, embroidered in gold, in the Temple of Jeddah. It has been translated also into the Chinese and Tatar languages, written on a piece of silk silk, and suspended in the Imperial Palace at Pekin.

Then stern Ose! whose presence bright
All open death energy; all sin's guile;
Unsheathed through That's all-devastating flight.
Then only God! there is no God beside.
Being above all beings! There is one!
When none can comprehend, and none explore;
Who still existence with Thyself abides;
Embracing all—supporting—ruling o'er—
Being whom we call God—and know no more!

In its sublime resources, Philosophy
May measure out the ocean deep—may count
The stars or the sun's rays—but, God! for Thee,
There is no weight nor measure; none can mount
Up to thy mysteries: Reason's brightest spark,
Though kindled by thy light, in vain would try
To trace thy countless infinities and dark;
And though I see God, yet know no more!

Then from primordial nothingness did call
First chose, then existence: Lord! on Thee
Eternity had its foundation; all
Spring forth from Thee—of light, joy, harmony,
God origin all life, all beauty. Thus,
They wondrous all, and doth create;
Thy finger stirs all space with rays divine!
Then art, and art, and shall be glorious! Great!
Light-giving, Life-sustaining Potentate!

Thy shadow the unmeasured universe surround;
Upheld by Thee, by Thee inspired with breath!
Thus the beginning with the end had bound,
And beautifully mingled life and death!
As spirits mount upward from the fiery bane,
So souls are born, so worlds spring forth from Thee;
And thus the suns in the many rays
Shine round the silver star, the paganism
Of heaven's bright array glitters in Thy praise.

A million torches, lighted by thy hand,
Wander unsworn through the blue abyss;
They own Thy power, accomplish thy command;
All gay with life, all eloquent with love.
What shall we call them? Flies of crystal light—
A glorious company of golden streams—
Lamps of celestial other-burning brightness—
Gems lighting systems with their joyous beams!
But then to these art as the moon to night!

Feel as a drop of water in the sea;
All this magnificence is Thee is lost;
What are ten thousand worlds compared to Thee?
But what art thou? How art thou number'd best,
Though multiplied by myriads, and array'd
To fill the glory of infinite thought,
To bear an atom in the balance's weight?
Against thy greatness? in a cigar brought
Against infinity! What art thou, then?—Nought!

Highest! But the influence of thy divine,
Perceiving worlds, hath reach'd my bosom too;
As shines the sun-beam in a drop of dew,
Nought! But I live, and on hope's pinions fly
Cage towards Thy presence; for in Thee
I live, and breathe, and dwell; aspiring high
Even to the throne of Thy divinity.
I am, O God! and surely Thee must be!

Then art! Drowsing, gazing art, Thee art!
Direct my understanding to thee; Thee!
Confound my spirit, guide my wondering heart;
Though as atom's "other immensity,"
Still I am something fashion'd by Thy hand.
I hold a middle rank 'twixt heaven and earth,
On the verge of mortal being stand,
Close to the realms where angels have their birth,
Jew on the horizon of the spiritual world!

The state of being is complete in me;
In me is matter's last gradation lost;
And the next step is spirit; Duly;
I am conscious of the lightning, and am dust!
A moment, and a dove—a worm, a god!
Whom should I have? and am so unwillingly
Conscious and unware?—unwearied this old
Life wants through some higher energy;
From hence alone it could not be!

Greater, yet! Thy wisdom and thy Word
Created me! Then comes of all Thee,
That light of thy spirit, and thy Love!
Thy light, thy love, in their bright plenitude
Are with an immortal soul, and life it wears
Over the signs of death, and leads it wear
In heavenly light beyond its little sphere,
Even to its residence there—in Author, there.

O thoughts immortal! O voices blest!
Though worthless our conceptions all of Thee,
Yet shall our shadowed lungs all our breast
And wait its balm to the Dely.
God! then since my lovely thoughts can ever
Then seek the presence—Being wise and good!
With the vast works of nature, stay, where
And when the things are deepest; no more
The soul speaks in terms of gratitude!

[From the Edinburgh Witness of the Church, for June.]

Trials of the Makololo Missionaries.

The London Missionary Society some years ago established a Mission in Makololo, Central Africa. The Report of the Society read at the last Annual Meeting, held on the 9th of May last, gave a most touching narrative of the recent calamities of the missionaries. The following is Mr. Price's account of the illness and death of his fellow-labourers and their children:

"Now, says Mr. Price, writing to the sister of Mr. Holmore, 'begins a dark, very dark chapter in the history of the mission. Those who are here with us, there are not many days in the history of Christendom, when we were especially Mr. and Mrs. Holmore, the four children, and all our servants; but through the great mercy of God, Mrs. Price and myself were still able to move about a little, although with great difficulty. We were able to attend the public services in the church, neither of which we could hardly move a limb. As I was passing round one evening to see if they were all comfortable, I found the four children lying on a bed on the outside of the tent, and Mrs. Holmore by the side of the bed on a cushion. They were all asleep. I felt their foreheads, and they were all hot. I told their father, Mr. Holmore, who took no notice whatever, although it was her dear, precious little Henry. This was on March 7th: he had just seen the signs of death. I told him cold; and informed his father, who was lying in the tent; but he told me I had better not tell Mrs. Holmore till the morning. I took the child into the tent and wrapped up the baby in a piece of carpeting, and engaged men to prepare a grave, that we might bury him the next morning. He was buried in the ground, and we returned home. Mr. Holmore died a few days previously. When it was told Mrs. Holmore she took no notice whatever, although it was her dear, precious little Henry. This was on March 7th: on the 9th our dear little baby died. On the 11th, Seline Holmore died, and on the same day Thakil of Lokatanga. On the 13th Mankwala died. Mr. Holmore had now completely given up his efforts before any expatriate, and said she had no desire to live, her work was done, and she wished to go home to Jesus. After that, Mr. Holmore, and Lissie, and Willie improved considerably, until about the middle of April, when Mr. Holmore paid a visit to his children in the tent, and came back very tired, and feeling very ill. From Friday afternoon, April 26th, he fell into a kind of sleep, and remained in that state of unconsciousness for about thirty-four hours, and then, on the night of Saturday, breathed his last."

All these I wrapped up and consigned collapses to the silent tomb with my own hands, with the exception of my own child, which died in the arms of its mother while I was holding it. Mrs. Holmore died on the 11th, Seline Holmore died, and on the same day Thakil of Lokatanga. On the 13th Mankwala died. Mr. Holmore had now completely given up his efforts before any expatriate, and said she had no desire to live, her work was done, and she wished to go home to Jesus. After that, Mr. Holmore, and Lissie, and Willie improved considerably, until about the middle of April, when Mr. Holmore paid a visit to his children in the tent, and came back very tired, and feeling very ill. From Friday afternoon, April 26th, he fell into a kind of sleep, and remained in that state of unconsciousness for about thirty-four hours, and then, on the night of Saturday, breathed his last.

Mails—Summer Arrangements.

The Mails for the neighboring Provinces, &c., will until further notice, be forwarded direct to Montreal.

For Nova Scotia, via Pictou, every Monday and Thursday, at 12 o'clock, noon.

For New Brunswick, Canada, and the United States, via St. John, every Tuesday and Friday morning, at a quarter past 8 o'clock, noon.

For Newfoundland, every Monday, at 12 o'clock, noon.

For England, Bermuda, and the West Indies, every Saturday, at 12 o'clock, noon, via:

Monday, April 27; May 15, 27; June, 10, 24; July 8, 22; August 1, 15; September 1, 15, 29; October 14, 28; November 11, 25.

HOUSE OF ASSEMBLY.

Saturday, April 6.

Mr DAVIES obtained leave to absent himself from the House until Wednesday next.

Hon. Mr COLES rose to compliment the contractor for printing the Journals of the present Session, Mr HANCOCK, for the manner in which his work was forward. They were now printed up to the 2d of April. He had never before seen the work put up in an creditable a manner.

(See page 11.)

The petitions on the table praying for the construction and maintenance of Lighthouses on the North Cape and East Point were severally taken up and read.

Mr CONROY wished to know what information the Government had received in answer to their communications with the Governments of the neighboring Colonies on this subject.

Hon. Mr HAVILAND said the master was not yet definitely settled: replies from the other Governments had not been received, and we could not be expected to construct and maintain Lighthouses ourselves.

Hon. Col. GRAY said it would be unsafe to expect that this island should build a Lighthouse on the North Cape without the concurrence of the Canadian Government, who hoped the Canadian Government would come forward with a proper offer. Lighthouses on the North Cape and East Point would be a great advantage to the commerce of Canada. He had seen 400 mil. of British merchants anchored near Quebec. The other Provinces ought to construct the Lighthouses, and this Island should contribute a very small part, such as keeping up the supply of oil.

Hon. Mr COLES would object to any such course as that this Island should be saddled with the expense of keeping up light. It was seldom heard that the results belonging to this Colony were cast away on these Capes: it was the case of ships of other countries. He did not see why we should be expected to contribute very largely towards either constructing or maintaining Lighthouses that were to be a much greater benefit to our neighbors than ourselves.

Hon. Mr Mc AULAY thought that all this House should do at present was to desire the Government to urge forward the Governments of the neighboring provinces in this matter.

Hon. Mr PERRY was of opinion that the Home Government should do the most towards building the Light-houses, as the shipping of the old country would receive the greatest benefit from them; still, if they were erected they would be of great service to the fishermen on the coast. Even a small light, such as this Island could keep up, would be of great service to the fishermen. The Govt. would not assist in creating large Lighthouses, he thought this House should take steps to build small ones for the benefit of the fishing trade.

Hon. Mr COLES said this was a matter of great importance, he would move that the House do now resolve itself into a Committee of the whole on the petitions which had been taken up for consideration. He then proceeded to read a correspondence with the Colonial Office in reference to Lighthouses, and maintained that there was no intention of His Majesty's Government to erect such on Cape Race in Newfoundland, and on the West Cape and East Point of this island, and that the duty to support them were to be collected in the old country; but he did not find there were to be paid in the Colonies. He then moved that the House should go into Committee on the petitions, and see what further proceedings should be taken on the subject.

Hon. Mr LONGWORTH said that correspondence was going on between the government of this Island and the Governments of the neighboring Colonies with respect to the subject of Lighthouses on the West Cape and East Point, and to make arrangements to the people of Canada and New Brunswick that no expense would be incurred by the Government if the Colonies themselves should assist in their erection. Part of the expense should be borne by each of the Colonies, and perhaps a part by the Imperial Government. It would also be of importance to the Government of the United States. Our Government had no right to take action until the correspondence had arrived at that stage as will warrant us to proceed with the work. If this House were to pass a resolution to take active steps in the matter, the other Provinces would probably hold back, thinking that the work would then be proceeded with. He hoped that the other Colonies should take the entire responsibility of erecting the Lighthouses, and this Island might take care of itself.

Hon. Mr WIGHTMAN said the other Colonies appeared to be very tardy in coming to a firm conclusion, and we did not see much cause for Lighthouses on those Colonies. He thought that if the British Government would urge upon the neighboring Colonies the necessity of imposing Light dues for the purpose, it would be attended to.

Hon. Mr HAVILAND admitted that Lighthouses on the North Cape and East Point of this Island would be of some advantage to us, but much more to the neighboring Colonies. He thought it could be shown that the number of vessels on these Islands were not more than one of this Island, out of the Colonies and Great Britain. He for one would not consent to have a Lighthouse on either of these places should be laid, until we had learned that decided action to exist in the work, had been taken by the neighboring Provinces. Hitherto our communications had received only the general reply that the master would be attended to. He would move the following resolution in amendment to the one submitted by the Hon. Mr Mc AULAY.

Resolved, that this House support taking further action relative to erecting Lighthouses on the West Cape and East Point, until the next Session of the Legislature.

The question having been put on this motion, it was carried in the affirmative.

Some of the private petitions having been disposed of, the House adjourned for one hour.

AFTERNOON SITTING.

The Clerk read a petition of Robert McDonald and others, praying for a grant of £100 towards erecting a wharf on the south side of the West Point.

Mr J. MC AULAY moved the petition. He stated that the inhabitants of that locality were desirous of a harbor, and that there was none on that side. On the one hand, and Brudenell on the other, there was no means of getting to the shore, where they proposed to build the wharf, there were over 10 feet of water. The population he said was increasing and the people were prospering, and to an extent equal to that of the town and out to the Government a great deal. But in the House agreed not to the Government a great deal, all their efforts were directed to the ground and to represent next Session. As the people were anxious of presents, all their shipping had to be done by boat.
