AUSTRIANS YIELD TO ATTACKS OF ITALIANS

Allies Have Already Partly Captured Monte San Gabriele--Gain Important Ground on Heights East of Gorizia.

London, Aug. 29.—Hard fighting is in progress between the Italians and Austrians on the heights of Monte San Gabriele...

FRENCH FRONT IS CALM. Artillery Displayed Activity on Both Sides of the Meuse.

Paris, Aug. 29.—The official statement issued by the war office tonight revealed that the front was quiet...

STORMY WEATHER CONTINUES Result is a Quiet Day on the British Front.

London, Aug. 29.—The official report from British headquarters in France tonight reads: "Stormy weather continues. Early this morning enemy parties made a bombing attack on two of our posts east of Ostiaverra, but were driven off with loss."

VISITS LENS FRONT. Henry Morgenthau Sees Operations Along Fighting Line.

While the British Army in France and Flanders, Aug. 29.—(By the Associated Press)—Henry Morgenthau, the former ambassador of the United States to Turkey, has just completed a short trip to the British front...

ENTIRE PROVISION TRADE WILL SOON BE TAKEN OVER

Food Controller is Determined to Secure Reduction in Price of Commodities.

London, Aug. 29.—Lord Rhondda, the food controller, has decided to take over gradually control of the entire provision trade in the British Isles.

SOCIALIST CONFERENCE AGREES ON NOTHING

Inter-Allied Gathering at London Fails to Reach Unanimity of Opinion Either on Stockholm Conference or Peace.

London, Aug. 29.—The so-called inter-allied Socialist conference concluded a two-day session this evening. It failed to reach unanimity of opinion on the Stockholm conference or peace.

KERENSKY REITERATES STAND BY REVOLUTION

London, Aug. 29.—The disaffection in the Russian army which resulted in the forced evacuation of the greater part of Galicia and Bukovina by still loyal troops appeared to be spreading to the Russian defence in Galicia, Bukovina and Rumania recently had indicated that the Russians were to make no more voluntary retrograde movements.

U. S. REPLY TO POPE PLEASES ALLIES

President Desires to Head Off the Pacifist Propaganda.

TO IMPRESS RUSSIA Washington Expects Note to Evoke Response From German People.

Washington, Aug. 29.—Discussion of President Wilson's rejection of the Pope's peace proposals in diplomatic circles today revealed that even some of the entente governments were unprepared for the prompt fashion in which the president disposed of a matter of such tremendous importance.

TO HELP ENFORCE CONSCRIPTION LAW Laurier Promises to Assist in Carrying Law into Effect.

Ottawa, Aug. 29.—In the house of commons this afternoon Sir Wilfrid Laurier plainly intimated that he would not countenance any resistance to the conscription law, but on the contrary would co-operate with the government in bringing the law into effect.

By a Staff Reporter. Ottawa, Aug. 29.—The political skies which have been cloudy and overcast for several weeks, suddenly cleared today with the holding of the Conservative caucus.

While the Germans may wage war with added desperation because of the sweeping indictment of their methods, it is believed here that the spirit of revolt will develop steadily and rapidly among the people in Germany.

The struggle for parliamentary reform in Germany is being watched with the keenest interest and while it was said at the state department today that no official advice is as yet at hand regarding the developments it would not be a matter of surprise if there was some sudden and important manifestation of the movement in Germany.

MAIN FOE FORCES REMAIN IN WEST Nearly Hundred and Fifty German Divisions Are in France.

New York, Aug. 29.—While the fighting force massed in the center of power on the Russo-Rumanian front is larger than was generally believed, the greater part of the German army is on the western front, according to a statement issued by the official bureau of French information.

Co-operative Railway Management Of All Lines Is Borden's Objective

Prime Minister Announces Government's Goal Which it Soon Hopes to Accomplish, First Step Being Acquisition of Canadian Northern.

Ottawa, Aug. 29.—Co-operative management of all the railways of Canada, not only during the war but for all time to come, is the goal which the government has in view and soon hopes to accomplish.

FLIGHT LIEUT. TODD NOW LISTED KILLED Former Toronto Aviator Was Previously Reported Missing—Others Among Casualties.

Canadian Associated Press Cable. London, Aug. 29.—Capt. Robert Inkerman Harris, Royal Medical Corps, wounded, formerly Canadian Medical Officer, Knight, Royal Medicals, wounded, belongs to Guelph, Military Cross, June, 1916; Flight-Lieut. Allan S. Todd, Naval Air Service, belongs to Toronto, previously missing, now killed.

When the third reading was moved, Hon. Wm. Pugsley proposed an amendment practically hanging the bill up in the air until the award of the arbitrators was approved by parliament.

MEANS VAST SAVING. The question then before the house was whether the Canadian Northern should be taken over by the Canadian Pacific or acquired by the government.

BOB DEN'S RESIGNATION IS REFUSED; CAUCUS PLEDGES ITS FULL SUPPORT AND STANDS FOR UNIONIST CABINET

THE PARTY'S PLEDGE TO SIR ROBERT BORDEN

Following is the resolution passed by the Conservative caucus: "We, the supporters of Sir Robert Borden's government in the parliament of Canada, record our emphatic approval of that government's policy and achievements during these three years of war."

Premier is Given Free Hand For Cabinet Reconstruction

Caucus Also Discusses Dominion Franchise Legislation, by Which Only British Born Women Will Get the Vote.

Ottawa, Aug. 29.—The political skies which have been cloudy and overcast for several weeks, suddenly cleared today with the holding of the Conservative caucus.

In view of the unusually full and frank statement given out, senators and members who were present, declined to discuss what occurred in greater detail. It may be said, however, that the "ginger group" of which so much has been heard, was not greatly in evidence.

It is also learned that there was some discussion of Dominion franchise legislation. Western members want a drastic bill, but some eastern members advise moderation.

MEANS VAST SAVING. The question then before the house was whether the Canadian Northern should be taken over by the Canadian Pacific or acquired by the government.

Prime Minister Offers to Serve Under Sir George Foster, Who Refuses to Accept Leadership, After Paying Remarkable Tribute to Sir Robert.

Ottawa, Aug. 29.—Following is the official report issued on the proceedings in the Conservative caucus this morning:

"At the Conservative caucus this morning the prime minister reviewed his negotiations for the formation of a union government and emphasized his earnest purpose in that endeavor. He had proposed to Sir Wilfrid Laurier a coalition government with equal representation of both parties outside of the prime minister. That offer having been refused, he made it known that the same offer was open to that section of the Liberal party which supported compulsory military service and was prepared to sustain every effort for the ending of the war.

"The whole situation was discussed frankly and fully with these gentlemen, and no divergence in questions of policy or administration arose. They returned to Winnipeg, which they reached on Thursday last, and consulted with their friends, after which three of them and another prominent Liberal despatched to the prime minister a message by telegram.

No Personal Antagonism. The prime minister expressed his strong conviction that this message was not inspired by any personal antagonism to himself and that the gentlemen who sent the message were personally friendly to him and perfectly sincere.

"The prime minister expressed his strong conviction that this message was not inspired by any personal antagonism to himself and that the gentlemen who sent the message were personally friendly to him and perfectly sincere.

"The prime minister expressed his strong conviction that this message was not inspired by any personal antagonism to himself and that the gentlemen who sent the message were personally friendly to him and perfectly sincere.

must be available and exercised. He was willing to serve in any way which would promote the end they sought, and Sir Robert Borden had just said, as dear to the heart of many Liberals as to their own. But he firmly believed that it could not be attained unless the full strength of the country could be exercised, that strength could not be available unless Sir Robert remained at the head of the government. Those present were deeply impressed by the address of Sir Robert and Sir George and amidst a scene of great enthusiasm pledged to the prime minister a continuance of zealous support.

Sir Robert in accepting the expression of confidence of his colleagues and followers spoke with deep emotion and great feeling, urging on all an appreciation of the necessity for service and sacrifice and the discharge of duty to the utmost. He urged that those desirous of maintaining Canada's position should unite for the purpose of advancing the cause of the allies in Canada and at the front and close to the front, himself as determined to prosecute the war in whatever capacity he could be of most service to the country until victory shall be attained.

IMPERIAL CASUALTIES

Canadian Associated Press Correspondence.

London, Aug. 29.—The following casualties to troops and men serving in the imperial forces are reported:

Killed—S. Banks, Sherwood Foresters (Ontario); A. Slater, R. Fus. (British Columbia).

Missing—E. Jeffrey, Manchester (Toronto); D. E. Blockley, R.F.A. (Minnesota, United States); G. J. Davidson, R.F.A. (Alberta); G. H. C. Oliver, R.G.A. (Victoria, B.C.); P. W. B. Jardine, R.E. (Alberta); H. W. Jones, West Surreys (Quebec); G. W. Townsend, East Kents (Ontario); P. Flynn, Northumberlands (Montreal); J. Bailey, Liverpools (Hamilton); E. Barnett, Liverpool (New Brunswick); L. C. Corp. W. Latham, Worcesters (Victoria, B.C.); W. Guerin, Hampshire (Montreal); Corporal A. J. Willey, Hampshire (Toronto); P. G. Wyatt, Sherwoods (Ontario); N. Inch, Lancashire (Montreal); W. Sandford, Middlesex (Ottawa); F. W. Moore, K.R.R.C. (Montreal); A. G. Witham, Whitehires (Saskatchewan); B. C. Yallop, Whitehires (Kilve, Canada); Corp. J. Kelie, Highland L.I. (Hamilton); P. Duff, Irish Rifles (Nova Scotia); T. Allen, Dublin Fus. (Montreal); T. Bickmore, M.G.C. (Montreal); E. R. Labranche, A.S.C. (Quebec); C. Lewis, A.S.C. (Wawona, Sask.); J. C. Tait, R.A.M.C. (Humber Bay, Ont.).

NORWEGIAN SHIP SUNK OFF SPANISH COAST

Steamer Kongslj was Bound for U.S.—Belgian Relief Vessel.

London, Aug. 29.—The Norwegian steamer Kongslj, from St. Nazaire, France, for the United States, has been sunk off the Spanish coast, according to a telegram received in Christiania from Santander and forwarded by The Morning Post's correspondent.

The Maritime Register reports the Norwegian steamer Kongslj as a Belgian relief ship. She measured 3663 tons net and is last reported as arriving at Amsterdam on June 6.

DYNAMITE IS DUMPED INTO ST. LAWRENCE

Government Inspectors Take Precautions Against Unlawful Use.

St. Clothilde de Chateaugay, Que., Aug. 29.—Fifteen cases of dynamite, which had been left on a farm in connection with the deepening of the channel here, the work having been temporarily suspended, have been dumped into the river by government inspectors in order to make certain that the dynamite shall not be used for any overt purpose anywhere.

Twenty-five cases were removed by the contractor when the work ceased.

WAR SUMMARY THE DAY'S EVENTS REVIEWED

REPORTS from German sources suffice to disclose that the Italians have proceeded far with the capture of Monte San Gabriele on the Isonzo front, and that the Austrians are deserting this strong position. This is an important news shows that the Austrians are deserting this strong position. This is an important news shows that the Austrians are deserting this strong position.

The French information bureau in the United States, announces that the German army now consists of 236 divisions, 148 being on the western front and 88 on the eastern front. The enemy has also on the eastern front 41 Austrian, four Turkish, and four Bulgarian divisions, making a total of 193 divisions. This makes the total infantry force of the German army around 1,652,000 bayonets. On the western front the enemy has on this basis a little more than 1,000,000 bayonets. Of the 23 divisions, 76 are Landwehr and Landsturm divisions, of indifferent fighting value.

Since they have once suffered from the misbehavior of disaffected troops, it is hardly to be expected that the Russians are not prepared to remedy the retirement of a division without fighting in the Fokshani region of Rumania. The withdrawal of this force has given the enemy a considerable advantage in his approaching of the line of the Sereth. It is most probable that German spies got in amongst the troops and unsettled their minds by the usual socialist chatter. The Rumanians were making a brilliant defence and it is not their fault that their allies' troops show treachery. It is as yet unknown what damage has followed the retirement of the retreating soldiers.

Stormy weather is still preventing major operations on the western front. The British have only the driving off of foe bombers from Oostervest report. In the previous night they captured an important German position near Langemarck. The French are engaging in artillery duels at Verdun.

FINGER PRINTS TO HELP SOLVE CASE

Microscopic Examination of Marks on Molding Found Near MacRobbie's Body.

MYSTERY DEEPENS

Theory Now That Comparisons May Have Been Given Knockout Drops.

Hamilton, Thursday, Aug. 30.—Finger prints may possibly solve what the police and members of the press have been trying to accomplish during the past week and a half in connection with the MacRobbie case, namely, how Dr. Douglas G. MacRobbie met his death, and if it was the result of a blow, by whose hands it was dealt.

Since in the case of the examination of the molding, which was found near the body, is now in the hands of the Dominion police, who will photograph the finger prints on the molding and compare them with finger prints of some of the principal figures in the case, the examination will show how the molding was held, whether the spots are blood or paint and if the finger prints correspond with any of the impressions already taken by the local police department.

There is a possibility that the examination of the molding will bring the crime nearer to home and pave the way for a quick and easy solution of the tragedy.

Knock-Outs Suggested.

That Smith, McLaughlin and Scott might have been given or have taken knock-out drops on the Sunday night on which the body was found was the latest rumor in circulation here yesterday. A prominent criminal lawyer stated that the condition of the three men on that night suggested that chloral or some similar drug had been used. For two or three days after the tragedy the three men were in a bad physical condition, but whether it was due to what they had taken Sunday night or to general nervousness it is hard to say.

Case Becomes Complicated.

The further the case progresses the more complicated it becomes. The fact that two men were heard to drive away from the premises of the Crescent Oil Company on Sunday night has been a puzzle to the police since the theory of the police is that the men were never in the building or else one of the three men who are being held as material witnesses would have seen or heard them. Even if they are unable to locate the men the evidence of Scott Smith and McLaughlin will likely clear up the connection of the unknown men with the case.

Studied With Stanford White.

Walter Scott, one of the men held as material witnesses, is said to have studied architecture in the office of the firm of which Stanford White, who was killed by Harry Thaw, was the chief architect. Mr. Scott lived in New York for a number of years, and is regarded as a clever architect.

Another fact that has not yet been cleared up is what time Mrs. Smith left the office of the oil company on Sunday night. Bell in his evidence stated that she was there Sunday. The police have ascertained that she was there around 10 o'clock, but beyond that or whether she met the three witnesses or MacRobbie they are unable to say. Mrs. Smith absolutely refused to discuss any phase of the tragedy with the reporters.

M. J. O'Reilly, K.C., counsel for McLaughlin, who held as a material witness, was believed to be in Toronto to this afternoon with the object of securing bail for his client.

LIEUT. MCGIBBON KILLED

Regina, Sask., Aug. 29.—Assistant M.P. today received word that his son, Lieut. Hugh Maxwell McGibbon, had been killed in action. Lieut. McGibbon was killed in September last, and a third boy, Trooper William F., is still on active service.

COMPULSION NEAR NO RECRUIT RUSH

New Infantry Battalion May Absorb C. D. F. Officers.

FIFTY-NINE VOLUNTEER WELCOMED BY MAYOR

York and Simcoe Foresters Lead in Recruit Honors.

Toronto mobilization centre had 59 volunteers for enlistment yesterday. Most of them coming from British United States. A total of 80 recruits were attested for the Canadian Expeditionary Force and seven for the Royal Flying Corps. Only four infantry recruits were enrolled, and these came with the United States contingent. The day's recruiting honors went to the York and Simcoe Foresters, who signed on 15 men. The Canadian Mounted Rifles and Army Medical Corps each secured three recruits, the forestry and the Dominion Police, each two, and the U. of T. overseas company one.

Forty of yesterday's recruits were local men. This figure, also an increase of 15 over the preceding day, showed the signing of the conscription bill has failed to cause any rush of Toronto men to the colors.

The announcement that a No. 2 Battalion of the Central Ontario Regiment, Camp Borden, had been authorized to look on in military units as one of the preparations for an early enrollment of infantry under conscription. It is also expected that the new unit will afford appointments to officers recently retired from the old Canada defence force.

To Inspect Hospitals.

Tomorrow the Duke of Devonshire, accompanied by Sir James Loughhead, chairman of the Dominion Military Hospitals Commission, will inspect the hospital for returned soldiers at Whitby, and also formally open the new reception hall and recreation building.

The returned soldiers' experimental farm at Kapuskasing, North Ontario, has now about 90 men as settlers. Several more are expected to arrive, settlers left for the northland last night.

Canadian soldiers can now cross to the United States in uniform, but not without first obtaining a special permit. This has to be issued by the assistant adjutant-general in charge of the point in the United States the soldier is bound for.

Capt. O. C. J. Withrow has been appointed medical officer of the new military hospital at Newmarket. He commenced his duties there yesterday.

Nearly 4,000 returned soldiers have been given employment in the federal civil service. Up to the end of July the official figure given is 5,686.

THE "BALACLAVA" SLIP-ON—A SCORE SPECIALTY.

The "BalACLAVA" slip-on top coat is just the most useful garment a man could count on in the winter. It is made of the finest material, and is light, warm, and comfortable. It is a specialty of the King Street west.

MILK CHECKER ARRESTED.

Brought Back From Winnipeg to Face Serious Charge.

Detective Taylor arrived back in Toronto last night from Winnipeg with Stephen Madden, who was arrested there last week on request of the Toronto police. Madden was employed by the People's Dairy as a milk checker, and it is charged by the company that he credited a farmer with having brought seven cans of milk into the dairy when the farmer only had delivered four. It is further charged that the money for the three cans was divided between the two men. The prisoner will appear in police court this morning.

LITTLE BOY INJURED.

Running in front of a passing motor car in front of his home at 38 Ossington avenue at 8 o'clock last evening, a young boy, Ward Marshall, was knocked down and injured about the head. His injuries are not serious, but it was thought advisable to have him removed to the Hospital for Sick Children.

The King Edward Hotel Cafeteria

A high-class Cafeteria at popular prices, for ladies and gentlemen.

Now Open

THE DANCE TEA ROOM, where afternoon tea and refreshments will be served, will be opened shortly.

APPROVES HIGHWAY PROTECTION BILL

Ontario Municipal Association Sends Resolution to the Senate.

Peterboro Wants Court for Reduction of Fire Insurance Rates.

Further evidence that Ontario municipalities heartily support the legislators at Ottawa in their fight for municipal rights was forthcoming at the city hall yesterday when delegates at the nineteenth annual conference of the Ontario Municipal Association passed unanimously a resolution approving the amendment to the Railway Act passed by the House of Commons recently, preventing private companies from erecting poles and stringing wires on highways unless the consent of the municipality had first been obtained. The resolution was adopted without discussion after K. W. McKay of St. Thomas, the mover, had stated that the amendments to the act were considered immediately by the senate.

The motion read as follows: "That the association approves of Section 373 of bill No. 13, passed by the house of commons on the 24th July, 1917, in reference to 'putting lines or wires across or along highways without the consent expressed by law of the municipality having jurisdiction over such highway and warding to the senate of Canada, which now has the bill under consideration.'"

The proceedings in the morning were opened by Mayor Church, who gave an address of welcome. He was followed by W. C. Coughlin of St. Thomas, who made the presidential address. In the afternoon a large number of resolutions were submitted, and after they had been referred to the committee on resolutions.

Mayor Bourgeois of St. Catharines spoke of the work of the Ontario Canadians at the front, especially those of the first contingent, and made a resolution to the effect that these men should be given three months' leave of absence if military contingencies permit. The motion was carried by a large majority.

A proposal that business and income taxes should be collected in the years in which the assessment was levied was made by H. F. Lenard of Brantford.

Mayor Bowby, Brantford, moved that application be made for a declaratory act that the municipalities be empowered to assess the Bell Telephone Company for the use of streets.

A resolution was submitted on behalf of Peterboro city council calling on the Ontario Government to establish a fund for the relief of the unemployed in the municipalities. The resolution was carried by a large majority.

HAMILTON NEWS

Hamilton, Aug. 29.—Over four hundred happy boys and girls from the three city playgrounds participated in the eighth annual playfest of the Hamilton Grounds Association, held at the H. A. A. grounds last evening.

That Hamilton has 4,000 alien enemies was the astonishing information given out today by James Hawkins, registrar of alien enemies. There are 1,500 Austrians, 1,000 Germans, Bulgarians and Turks next in order.

No business was accomplished by the hospital board this afternoon, as no quorum was present. Chairman T. H. Pratt and Dr. Lester were the only members on the job.

Control of the city council at the next meeting of the city council will be the establishing of cold storage houses in Hamilton and the city council.

After serving sixteen months in France, during which he escaped injury, but was severely wounded, Lieut. A. G. Lees, son of William Lees, returned home today to two months' furlough.

The War organization is making splendid progress, and during the past few days over 100 applications for membership have been received from fathers who have sons in the front.

Magistrate Jelfs put his foot down today in regard to motor car thefts, which he said, every citizen should be made to feel that the law is being enforced. He sentenced a man to two years in jail on three separate charges of stealing "joy wagons."

On a charge of stealing a cheque for \$21.75, payable to J. Gray, James Richmond, 5 Kildare avenue, was placed under arrest tonight.

Co-Operative Management Of All Railway Lines

(Continued from Page 1).

the prime minister said, was the key to the whole difficult Canadian railway situation. It meant that the country was burdened with unnecessary duplication in railway construction and railway service. The roads all must come under some co-operative management and for that purpose the railway companies must without delay get into conference with the government. With proper co-operative management \$100,000 a year would be saved in operating expenses and hundreds of millions of dollars would be saved in unnecessary construction.

The debate was adjourned upon motion of E. M. Macdonald. When notice of closure was given Mr. Macdonald objected strongly to being put to a vote. He said that he had a speech that deserved the attention of parliament and the country, and he regretted that it was not to be discussed in parliament.

GAS CONVENTION MEETS

Visiting Delegates Are Welcomed by Mayor and Head Educational Address.

An inspection was made of the exhibit of gas appliances at the Canadian National Exhibition yesterday afternoon.

We never have to go back. Fully equipped to do the job at the first call. Phone a trial order and be convinced. We want your business.

JURY'S VERDICT IS ACCIDENTAL DEATH

Motorman Fully Exonerated Regarding Death of Wm. Richards.

In accordance with the evidence submitted, Coroner G. W. Graham's jury inquiring into the death of William Richards, 574 Bathurst street, found that the aged man died in the Western Hospital on August 18 as the result of injuries sustained when accidentally struck by a trolley car at the corner of Dundas street and Dovercourt road on the day previous.

Seven witnesses testified, and those who witnessed the accident stated that the man apparently did not hear the trolley which was approaching from some distance before the car reached the intersection. Evidence was conflicting regarding the rate the car was traveling, one witness stating it was going at 15 miles an hour. The motorman's estimate was eight to ten miles an hour. Each of the witnesses testified that the fender dropped the car as it came in contact with the man's body.

Motorman Horace Baldock, 183 Bayview street, returned a soldier, declared that he was driving alone at the time. Questioned by the coroner, he said that the brakes and the remainder of the equipment were in good order. He applied the former immediately he saw an accident could not be averted. According to his evidence the unfortunate man looked up as the car approached, leading him to believe he was going to stop.

The post-mortem showed that the man sustained a fractured skull and several broken ribs. Death was caused by shock and the injury to the head.

Another important motion called on the Ontario Government to allow the municipalities to have a power Act in addition to the revenue received from rates.

All the resolutions were referred to the committee on resolutions for consideration.

In welcoming the delegates at the Hamilton Municipal Association, Mayor Church referred to the events which have taken place at Ottawa in regard to the control of city streets. He briefly reviewed the "roving charter" rights by which it is possible for a municipality to take power to go into any town or city, take down or put up poles as they wished whether there was other power or not. He said he was sorry that the association is not represented at Ottawa, as it should show its appreciation of Sir Adam Beck and his management of the city.

Mayor Church referred feelingly to the death of the secretary of the association, W. S. Spence.

"Co-ordination of Municipal Departments" was the subject of an address given by S. H. Baker, city clerk of London. He said that the board of education was the only department which refused to act with them. He declared that business men were needed to assist the board of education. He said that the board of education in Ontario appreciates the practical, interested suggestions of every intelligent business man, he said.

K. W. McKay of St. Thomas gave an address on "City Government" for T. J. Moore, city clerk of Guelph, who was unable to be present thru illness.

The proceedings will be resumed this morning when B. H. Spence will address the delegates on the Ontario Temperance Act, with special reference to municipal responsibility and revenue.

JAILBREAKER CAUGHT AFTER LONG CHASE

Haze Jackson Arrested in Toronto After Escaping From North Bay Prison Farm.

Haze Jackson, who gave the police his home address as 367 Dovercourt road, was arrested by Acting Detective Dawn last night after a thrilling chase thru the streets of the west end of the city. Jackson was serving a two and one-half year term at the prison farm at North Bay, and the police say that two weeks ago he made good his escape. His arrest was made in somewhat of a peculiar way, as the Toronto police had not been notified of his escape from the farm. Every division of the police was alerted, and a woman who knew him while he was walking along the street. Knowing that the man had been sentenced to a term of imprisonment, she called his name, and he immediately recognized by the police and Dawn was assigned to locate the prisoner. He will be held until an officer arrives from North Bay.

Major Thomson Returns.

Hamilton, Thursday, Aug. 30.—Major George J. Thomson, 254 Herriemont street, returned home from England yesterday. Major Thomson went to England with a draft from the 25th Battalion, Lindsay, of which unit he was senior major. Previous to that he was a captain in the 13th Regiment and junior major with the 12th Cavalry of Hamilton Battalion.

Canadian National Exhibition AUG. 25th--SEPT. 10th

Exhibits of Fine Art--Glorious Music--Industry--Agriculture Inspiration, Education and Recreation on a Colossal Scale

Thursday--Western Provinces Day

Grand Stand Performance, 2 and 7 Thrilling Artillery Drive--Spectacular Capture of Hun Village By Bomb and Infantry Attack.

Three Stages Full of Star Vaudeville and Circus Acts

Read What the Critics Say

THE STAR. A magnificent production. Eclipses any former presentation at the Canadian National Exhibition.

THE GLOBE. Night pageant a glorious one. Brilliant epitome of history of Dominion of Canada. Makes the blood tingle. Inspiring close as country's place in world war is symbolized. A gay, glowing, even glorious pageant.

THE TELEGRAM. The grand stand show thrills. The spectacle is magnificent. Growth of the Dominion from Confederation to the present day marvelously portrayed. A magnificent Jubilee Spectacle, stirring, wonderful and gorgeously set.

THE MAIL AND EMPIRE. The Exhibition Spectacle is a masterpiece, magnificent in its presentation and setting. On a scale more elaborate than any of the previous displays.

THE WORLD. The grand stand show is singularly appropriate and should prove a happy augury for the future of Canada's National Exhibition. Greater than ever and produced on a scale never before attempted.

THE NEWS. Jubilee Spectacle charmed thousands. Pageant will stand out in the history of the Exhibition as a memorable success. Not since the Canadian National Exhibition was opened has anything more calculated to appeal to the Canadian imagination been presented than the Jubilee Spectacle.

EATON'S DAILY STORE NEWS

Of Interest in the Selection of School Misses' Wardrobes

Frocks, Suits, Coats and Skirts in Charming Diversity

Visitors to the City in Particular Will Be Delighted With All the Smart Things to be Had in the Misses' Wear Section, Third Floor

Women's Suits

Manufacturer's Samples Being High Priced Models. All Greatly Reduced. Friday, \$11.75.

A clearance of manufacturer's samples in beautiful serge, Burella cloth, and gabardine. Beautifully tailored suits with mannish collars, semi-tailored effects, belted and fancy suits with braided buttons, contrasting shades, and in fact, all beautifully lined with silk or satin. Skirts are tailored and finished with hems and pockets. Colors, navy, burgundy, brown, Russian green and black. Sizes 14, 16 and 18. Price, \$11.75.

Navy, black, green, brown and Oxford grey are among the colors, and many show collars of velvet or taffeta, and buttons in contrasting shades, as in a navy serge suit, which has burgundy velvet collar and inlay in the vest. An Oxford grey tailored suit is very swapper with its good lines and button trimmings. The box-pleated skirt featured in this model is made of a brown serge suit is distinctly good style, especially when one notes the narrow, waist-trimmed belt which passes over some of the pleats and under others. Several are in semi-tailored effects, with panel back and front and belted sides. The skirts have yokes or belts and frequently pockets. All are excellent values and greatly reduced from usual prices. Friday bargain, \$11.75.

—Third Floor, James Street.

Women's Coats

Manufacturer's Samples, Odd Coats Clearing at \$11.75.

Woolens Coats in navy, brown, grey, green and black, often lined throughout and of such seasonable fabrics as hare, hare, Whitney cloth, chin-solite, velours, and tweeds, are shown in swapper styles with trimmings of plush, fur and fur fabrics. A grey suit of excellent style has large curved pockets and a three-piece belt, while another features a Russian design and a "crushed" plush is a notable trimming on a brown corduroy suit. The new "choker" collar is noted on many models. These are sample coats and represent exceptional value. Friday, each, \$11.75.

—Third Floor, James Street.

Ribbons

Wide Satin Motte and Faltie Ribbons, suitable for sashes, millinery and hair bows. Colors, white, sky, pink, Belgian, navy, green, red, emerald, cerise. Reg. 40c and 50c per yard. Friday, each, \$1.00.

For this item we cannot take phone or mail orders. The quantity being limited.

—Main Floor, Yonge Street.

Art Needlework

Fancy Tea Aprons, in Royal Society packages, stamped for embroidery in gold stitch and French work, in pink, blue and green shades, the fun for working included in packages. Reg. \$10. Friday, 10c.

White Turkish Bath Towels, 12x44, stamped for embroidery in basket design. Reg. 45c. Friday, 25c.

WESTERN PROVINCES GIVEN POSITION OF HONOR TODAY

Grains, Dairy Products and Minerals From World-Famed Regions on Display—Cattle Judging and Butter-making Also.

Today is particularly devoted to giving prominence to the things of the great western provinces, the magnificent resources of which are the pride of Canada, filled as they are with products and possibilities beyond reach of even the most far-reaching imagination.

The various grains for which the western agricultural regions are world-famed will be on exhibition, together with specimens of dairy products, vegetables, fruit, minerals, game and coal, of which inexhaustible stores are still unworked. Of particular interest will be the judging of the prize cattle and sheep. This will be the last day of the cat show, which offers opportunity for acquaintance for many rare specimens of the feline tribe.

Among the demonstrations will be a buttermaking competition, and in the government buildings things pertaining to thrift and child-welfare will be in order.

The jubilee spectacle on the grand stand, which is the most elaborate pageant ever shown in Toronto, gives room for comparison between the time when the provinces of Canada were four, and the growth of the Dominion, which has taken in the wonderful western provinces, the development of which is only barred by the waters of the Pacific and Atlantic.

Western provinces day should be one of the best of the jubilee year.

WORK OF TINY HANDS.

Unusually Fine Display of Children's Work in Women's Section.

An unusually fine display of children's work is on view in the south-west corner of the women's building, consisting of samples of handicraft from the various city playgrounds, school playgrounds and the daily vacation Bible schools.

The city playgrounds show a large variety of baskets, crochet samples, bags, mats and other articles, in which both taste and good work are apparent. Carlton Park have a dainty showing of baby garments and doll clothes. Moss Park appears to excel in basketry, but every centre has some work which is well worth inspection by all who are interested in the work done by tiny hands.

ILLUMINATED SIGN INGENIOUS DEVICE

Advertises Exhibition and Repeats War Messages and Phrases.

USEFUL INNOVATION

General Illumination of Fair Grounds Surpasses That of Previous Years.

Ingenious indeed is the illuminated sign erected on the roof at the west end of the manufacturers' building. It is composed of 2000 15-watt lamps, which alternately illumine and form into 1140 letters. Advertising and historic phrases, each containing 36 letters, are flashed upon the sign every five seconds. At the two upper corners of the rectangle vari-colored revolving lamps make beautiful the effect of the whole.

"Toronto extends a hearty welcome to Exhibition visitors" is the message which greets incoming people when the sign is illumined. Allied determination to attain victory at all costs is emphasized in a flash of the King's speech, that "it is to secure the sacred principles of justice, freedom and humanity that we fight, and by God's help we mean to triumph."

Asquith's famous words, "The allied sword will not be sheathed until Prussian domination is crushed is also spelled out in letters of fire, while the depleted ranks of the Canadian expeditionary forces is exemplified in the fiery message by Sir John Hendrie. The concept and construction of this novel device serves to emphasize the lighting scheme generally, which surpasses the illumination of former years. The multi-colored fairy lamps which line the footpaths and the illuminated confederation shields at intervals along the roads serve the double purpose of lighting and beautifying the grounds.

RAILWAY MAP OF GOVERNMENT LINES

Government Railways Make Brilliant Display in Federal Government Building.

The display made by the Canadian Government railways in the Federal Government Building attracts the notice of the passing throng by reason of its fine setting and brilliant illumination. Over the huge map of Canada the lines of railway owned and operated by the government are traced in rows of red lamps, and over this all-Canadian route fit the moving trains that annihilate distance between east and west, the route over which a half-million of Canada's soldiers have travelled during the past three years without a mishap.

The illuminated map is a great educator, especially at this time, when the railway problems of Canada are second only in importance to the war. The lines of red stretch from Halifax and Sydney to Winnipeg, showing the intercolonial from Montreal to the chief centres of the maritime provinces, the Transcontinental from Moncton to Lewis, and from Quebec to Winnipeg, where it traverses the famous "clay belt" region, opening up thousands of acres for settlement. The various sections of government lines in Nova Scotia and New Brunswick are also illustrated graphically as the shadows that represent the thru trains make their proper connections at the designated points, furnishing a really fascinating study of railway geography to the onlooker.

A large statue of Jack Canuck points proudly to this demonstration of his own railway system, emphasizing the importance of the government lines to the country in the matter of troop transport and shipment of munitions.

The finely constructed architectural model of the Halifax ocean terminals

INNES' BAND CONCERTS

This Afternoon, 4 to 6 o'clock. Soloist: J. J. Farley, flutist.

6. The Stars and Stripes..... Sousa
- (b) Love is King..... Innes
7. Golden Showers, Solo for Cornet..... Clarke
8. Overture, The Merry Wives of Windsor..... Nicolai

LOSES HIS CHEQUE BOOK.

Last night the police at the Exhibition grounds were notified by W. Lindley of Victoria, B.C., that his travelling cheque book had either been lost or stolen. The book contained two \$20 cheques. Mr. Lindley did not discover his loss until last night. He is employed at the C. F. R. exhibit in the railway building.

ALLIED TRUCK COMPANY HAS UNIQUE MOTOR DEVICE

Owners of Disused Ford Cars Can Now Convert Them Into Trucks.

"Why throw your old Ford away when you can convert it into a useful motor truck by the simple application of an Allied Truck attachment?"

That is the pertinent question the Allied Truck Company, Limited, is asking of motor users in Canada. It answers the question comprehensively by exhibiting a motor attachment that is easily the first of its kind in Canada. The rear portion of a motor car, as everyone knows, is, thru bearing the bulk of the burden of haulage, the first to wear out. It falls rapidly into disrepair, and the owner decides that it is not worth while to pay the cost of repairs. The thought of converting his disused vehicle into a handy business adjunct has never occurred to him—if he has not seen the Allied Truck attachment demonstrated.

This interesting exhibit is located in the motor annex on Devonshire avenue, first street south of the Exhibition. The apparatus is an internal gear drive and applicable to adapting a used motor car into a one-ton truck. This internal gear drive is infinitely superior to the old obsolete chain drive, and the huge gears covering the machinery are designed to protect these vital portions of passengers, mails and baggage. The importance of the port of Halifax in its relation to the transatlantic commerce of Canada is thus realized. Some idea may be formed of its great strategic value to the empire, and the vast extent of this wonderful harbor where shipping may at all times and all seasons find safe and ample anchorage. Six hundred miles nearer Liverpool than is New York, and two hundred and fifty miles nearer than any other Canadian port, with approaches that are safe and easy to navigate, its advantages are manifest.

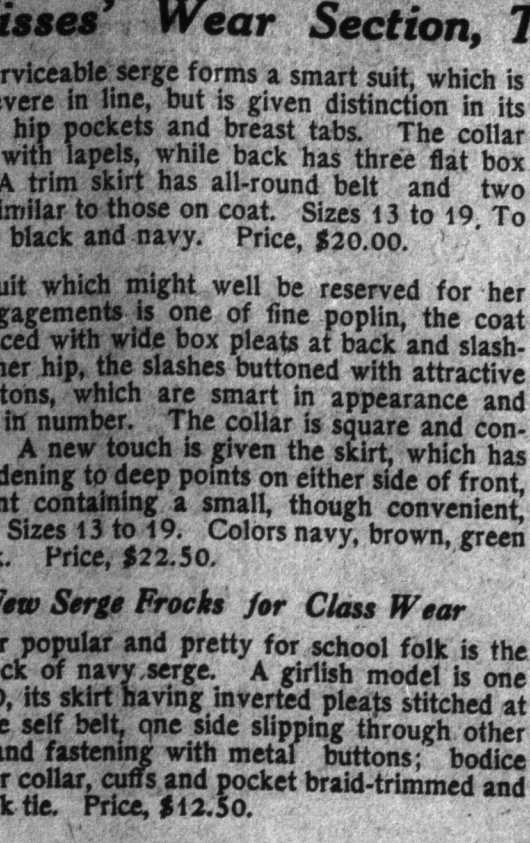

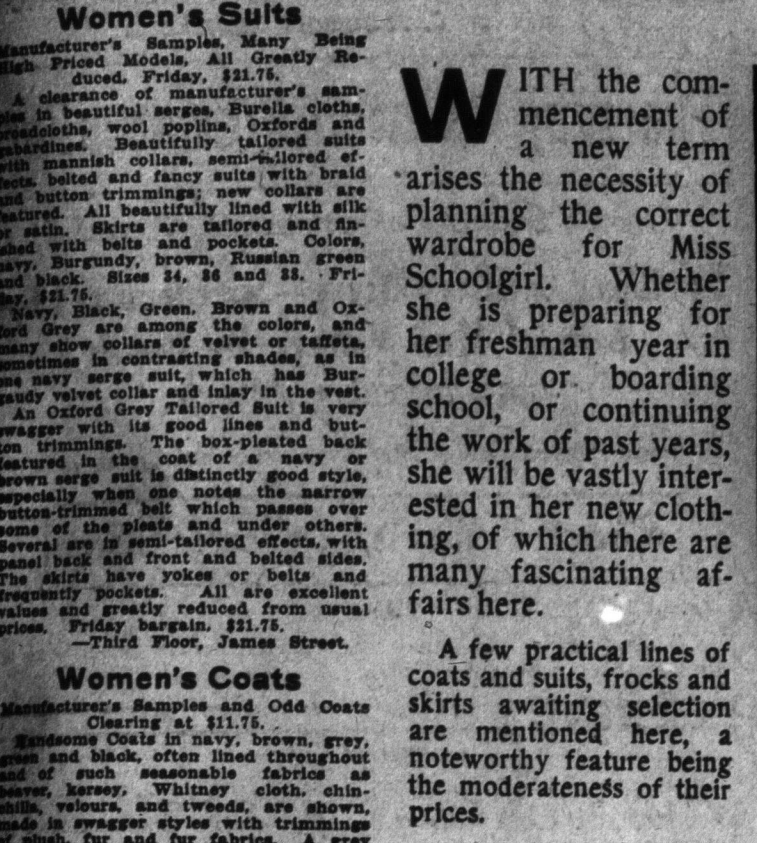

The "Allied" internal gear drive has the power without the faults of the chain drive, and motor users who have a used Ford going a-begging, should see the Allied Truck attachment and test the efficiency of the attachment they advertise.

FOLK DANCES ARE GREAT ATTRACTION

Display of City Playground Interesting to Child Lover.

Not the least interesting to the child lover is the display of city playground work which is being demonstrated every day thruout the Exhibition. Yesterday was Morse day, when children from this centre gave an exhibition of folk dances and singing games. Miss McBrien, the supervisor in charge of this work during the two weeks, has a great time playing mother to all the various children who use the playground after day.

The playground is situated directly behind the manufacturers' building, facing the lake front, and is a model of Toronto playgrounds thruout the city, fitted with swings, teeters, slides and other apparatus.

Autumn Modes in Misses' School Millinery

Pretty and Girlish Hats Which Are Likewise Practical for Daily Wear.

TO WEATHER the winds of Canadian Autumns and Winters are smart hats of small shape so favored by Dame Fashion. A popular feature for this season is the fondness for velvet which has been exhibited—velvet in many colors and in black—frequently shirred or pleated. Soft crowns of all varieties appear, puffs, tams and shirring, but in most cases is the crown soft. The pleated or shirred brim is to be seen in hats small or large, while straight sailor brims are ever in vogue, and tricorne again receive favor. Upturned brims somewhat resembling the famed Chin-chin are smart and pretty for your faces, and excellent for daily use, since they fit so snugly. In color do they follow the most wanted of shades this season—taupe, beetroot, Java, balsam, navy and black—with bright touches added. Prices range from \$5.00 to \$8.50. —Second Floor, Yonge St.

Do You Realize the Advantage of Having a "D.A." Account?

The advantage of having a Deposit Account is particularly apparent in keeping a record of all your purchases.

It does all your bookkeeping for you, and a statement of your purchases is mailed you every month.

It facilitates shopping, saves the handling of money. You have merely to say, "Charge D. A. Number" and you are done.

You avoid the trouble of paying drivers at the door for C.O.D. parcels.

We give 5 per cent. interest on your daily credit balance up to \$1,000.00 and 3 per cent. on any amount above \$1,000.00.

For full particulars inquire at Customer Deposit Account Office, Fourth Floor, or telephone Main 3637.

Neckwear

A splendid collection of Organdie Collars in aqua, opal, navy and pink, and round shapes; some have homesteaded borders, while others have embroidered edges. A very smart style in the round lette shape has embroidered design in each corner. Friday, 50c.

—Main Floor, Yonge Street.

RED FOX MUFFS, made in barrel style, trimmed with head, tail and paws, lined with velvet and finished at wrist with silk frills and wrist cord. Price, \$25.00.

Stoles of red fox, made in whole animal effect, with fur on both sides, one end finished with head and paws; others with tail and paws. Price, \$20.00.

Fitch muffs, made in small melon style, lined with silk and finished with frills at wrist. Price, \$22.50.

Ties of fitch, made in pull-through effect; lined with silk and finished with head, tail and paws. Price, \$18.75.

ONTARIO'S DEVELOPMENT EXEMPLIFIED IN EXHIBITS

Its Position in Confederation Never More Marked Than at the Present Time—Ontario Day at the Fair Emphasizes Importance.

Yesterday's attendance at the fair totaled 54,000, as against 113,500 for the third day of last year, but that was Children's Day and the weather was perfect. The total for the three days on which the fair has been open is this year 171,000, as against 167,000 for the same three days last year. Thus, with two days of unpleasant weather, the attendance this year is only 15,000 below that of a year ago, and there is every chance that this decline will be more than made up if the weather keeps fine. Another Children's Day on Friday will considerably help in this respect.

Ontario's position in the confederation is never more marked than it is at the present time. From the year 1867 when a small and sincerely patriotic body of men laid the foundation of a nation it has led in the initiative and progress of the Dominion until today it stands pre-eminent among the provinces. Its vast resources, magnificent industries and patriotic service have established and concretized its claim to be the banner province in a land of opportunities. And while holding a leading position in the country's development, it has been supreme in the sacrifice which has bound Canada more closely to the empire.

It was with pride and wonder that thousands of citizens from all over the province viewed the splendid products of the farm and factory yesterday, "Ontario Day" at the Exhibition. The resources of the province, epitomized and presented in a remarkable manner, could not fail to make a deep impression on the visitor and bring him to a realization of the truly great part which Ontario is playing in fulfilling the purpose of confederation. Whether in the display of minerals from the north country, the fruit from the great orchards of the Niagara Peninsula, produce from the market gardens, grain and live stock from the broad Ontario farms, the ingenious machinery of the manufacturing plants or the finished product of the work-shop, the interest was the same. They all told a story of

TODAY'S PROGRAM

Western Provinces Day at the Exhibition.

 8.40 p.m.—Night attack on Hun village.
 9.00 p.m.—Jubilee spectacle.
 9.40 p.m.—Semi-centennial year fireworks.

Industrial achievement more eloquent than words.

Many Farmers Present.

Altho the farmers of the province are busily engaged in harvesting their crops, the farming community was well represented at the fair yesterday. While the sunshine was not all that could be desired, the heavy clouds which threatened the grounds in the early part of the day rolled away toward evening and the day proved favorable for an inspection of the grounds and buildings.

Premier Hearst was slated as the chief speaker at the directors' luncheon, but he has not returned from the west, and he was represented by Hon. W. D. McPherson, who spoke of Ontario's achievements and the part which the province had played in the European struggle. At the head table with President Noel Marshall and Honorary Manager Kent were: Naught, C.M.G., A. E. Donovan, J. Oliver, Col. Belcher and Col. G. A. Stimson.

the directors of Canadian National Exhibition—Marshall.
 After acknowledging the kindness of the directors in inviting a representative of the cabinet to the luncheon on "Ontario Day" Mr. McPherson declared that Ontario had firmly established itself as the pioneer province of the Dominion. Not only had it retained its premier position in confederation but it had contributed enormously in public-spirited men and warm-hearted women to the provinces of the far west. Up to the beginning of the war Ontario had made the most satisfactory progress of any of the provinces. It was thought that the war would retard that progress. The contrary had been the case. It had never been in a better condition and the people had responded magnificently to the call of the King and country.

A Noble Part.
 Out of the army of 420,000 which had gone overseas, Ontario had the satisfaction of enlisting 86,000 by voluntary methods. Nothing is equal that had transpired in the history of the world. The duty of those at home was to make provisions for the battle which would return from the battle line. The Dominion and Ontario Governments, he said, had given the chief speaker the most attentive and it was his conviction that ample provision would be made. He referred with pride to the convalescent homes which had been established throughout the Dominion and declared that they were unexcelled in any part of the world, while the Ontario government hospital at Orpington with its 2100 beds was the finest institution for the care of wounded among the military organizations of the allies.

Canada, he said, was determined to stand by the motherland and would go forward with the last man and the last dollar in defence of the most magnificent empire the world had ever seen.

A. E. Donovan congratulated the directors of the splendid Exhibition, Ontario, he said, had a right to feel proud of the Exhibition and of its progress. At no time in its history had it more crops, more money, more devotion, more sacrifice or a better spirit of patriotism than at present. Lloyd Harris of the military hospital commission also spoke.

LARGEST COLUMBIA STORE.

Visitors to the Exhibition should not forget to visit the largest exclusive Columbia store in Canada, "Always at Your Service," the Toronto Grafo-nola Co., 61 Queen street west and 1657 Dufferin street, where may be seen the finest in records and Columbia machines.

EXHIBITION NOTICES

GOOD HEALTH FOOD.

Hitherto much difficulty has been experienced by food experts and manufacturers in remedying the unpalatable foods in remedying their nutrient contents, but this problem has at last been solved by the Good Health Food Company of London, Ont., whose attractive exhibit, is to be seen in the manufacturers' building, T. H. Robinson, local representative of the company, is personally conducting the exhibit and is enthusiastic at the interest displayed by the public and the orders which are steadily rolling in.

Good Health Breakfast Food is a food with a mission—to educate the people to retain and acquire good health by means of proper food and its thorough digestion. Good Health Breakfast Food is rich in "vitamin," those essential elements which build up the weakened and burned-out tissues of the human body, and give vitality. Good Health Breakfast Food is a palatable combination of wheat, bran, barley and corn. It is partially a "back-saver" diet, a good sense diet, and has the wonderful advantage of being a mild food laxative. It is rich in vitamins, those essential to good digestion and general health, and it is the "food that keeps you well." It is for sale by all up-to-date grocers.

A BEAUTIFUL PIANO.

Perhaps the most beautiful and artistic piano exhibits in the manufacturers' building at the Exhibition this year is the new empire model in polished mahogany. This instrument can be seen at the exhibit of Ye Old Firm of Heintzman & Co., Ltd., whose city showrooms are at Heintzman Hall, 192-195-197 Yonge street. Open every evening.

NEW MOTOR ANNEX.

Every year demonstrates the necessity for increased space at the Canadian National Exhibition to accommodate the constantly expanding exhibition business. In no more particular sphere is this emphasized than in the transportation building, where motor cars, motor trucks, bicycles, motorcycles and motor accessories are on view. Proof of the need of more room is shown by the fact that many motor companies have this year been compelled to locate elsewhere. On Devonshire avenue, at the rear of the block of buildings to the north of the grand stand, the new motor truck annex has been established to accommodate the overflow from the transportation building. Here the Dominion, Hudson, Tonford, Smith Form-a-Truck, Knox Tractor Unit, Normandy

Tire & Rubber Co., Duplex Truck and accessories companies have located and placed on exhibition everything that is worth while in motordom. There are motor vehicles galore, motor trucks in entirety and various devices that may be adapted for that purpose. Everything shown there is constructed on durable and efficient transportation lines, and visitors to the Exhibition should not allow this year's show to go by without paying this interesting location a visit.

CHRISTIE'S BISCUITS BEST.

Delicacies that delight the palate are the biscuits manufactured by the Christie-Brown Company, Limited, of Toronto, who are exhibiting samples of their wares in the manufacturers' building. Biscuits of every variety, designed for every need, baked and graded to suit the individual taste are on display. Christie-Brown Company holds a premier position in Canadian pastry and biscuit manufacturing, and the samples shown in this year's array are unsurpassed by the finest products of any other maker. As there are fashions in clothes, so also are there fashions in biscuits—fashions of flavor, structure and general excellence. Christie's exhibit is the alpha and omega of biscuitdom.

MOVOL STAIN REMOVER.

One of the most interesting exhibits at the Exhibition is the display of "Movol" Stain Remover and the wonderful efficiency of its operation, prohibited by its name. It is a simple, sent in a both under the grand stand. It removes all stains from any fabric, gent's clothing, straw hats, desks, floors and marble or ivory.

DRUMMER FAST DYES.

Another exhibit in the same booth is that of Drummer Fast Dyes and goods which have been dyed with the same dyes. There is no danger of a dye famine in Canada, as was hinted at some time ago, because these are British made dyes. There is a full range of colors and they cannot be excelled for home use. An additional pleasing feature connected with the use of these dyes is the ease with which they can be used and prepared. These exhibits are made by Wm. Edges & Sons, Limited, 25 Front street east, Toronto, and Bolton, England.

OPEN EVERY EVENING.

All during Exhibition the beautiful piano showrooms of Ye Old Firm of Heintzman & Co., Ltd., Heintzman Hall, 192-195-197 Yonge street, will be open during the evenings. Toronto people and visitors are cordially welcome.

BEST WAY TO WASH.

A washer that requires no attention once the clothes are put in is the at-

tractive offering of the "Trojan" washing machine, to be seen in the industrial building No. 2. A smooth cypress wood cylinder, revolving rapidly with a reverse motion, thoroughly cleanses the clothes in the space of a few minutes. There are no wires in this machine, to guard the fingers of the operator, and all parts of mechanism are so constructed as to make it completely accident proof.

All women will be interested in this wonderful time and labor saving device, as shown at McDonald and Willson's stand under the big dome, industrial building.

FURTER & DALTON EXCEL IN FURS.

To combine elegance of style and good taste with economy is an art that many women covet in these days of thrift and economy, and when it comes to a question upon the winter necessity of furs the matter becomes one of unusual interest.

Messrs. Furter & Dalton, who are exhibiting an unusually fine display of models in the manufacturers' building, are experts in the make-up of designer, are able to offer all models at a cost which is far below that usually demanded for such excellent workmanship.

All ladies who visit this exhibit cannot fail but appreciate the excellence of their fur garments.

WELL WORTH SEEING.

If for no other reason it would be well worth anyone's time to make a point of calling at the piano exhibit of Ye Old Firm of Heintzman & Co., Ltd., in the manufacturers' building, to see the beautiful satin finish mahogany grand piano which this firm is showing. It is of the style of Louis XVI, and is a very true representation of that famous period in French history. Heintzman Hall, 192-195-197 Yonge street, the firm's city showrooms, will be open every evening, where the many different styles of this famous Canadian piano may be seen.

FORD SELF-DRIVER GOOD.

There is perhaps not a Ford motor car driver in Canada but who, at some time or another, has narrowly avoided an accident when the wheels of his machine have struck a rut or stone in the road and jerked the steering wheel from his hands. In fact, it is a common event, and productive of many mishaps.

But such mishaps may be avoided. The Ford Self-Driver is the remedy. It is a device that almost steers the car itself. It removes all jerks and jolts from the steering wheel and prevents the car from jumping into the ditch when it strikes a rut or stone, and eliminates the attention of a doctor or an unwelcome adjournment to a hospital. The "kick" of the steering wheel is eradicated and the consequent strain on the hands and wrists is improved. It is cheaply constructed, and saves its cost in time by obviating the skids and

other mischances that abrade and destroy the tires.

It is made by the Ontario Supply Co., of Windsor, Ont., whose Exhibition exhibit is on view opposite the centre of the grand stand.

EAT AT MUMBY'S.

No other caterer on the Exhibition grounds is providing better for the gastronomic needs of Exhibition visitors than Mumby's five restaurants, known in various parts of the grounds, two opposite the western entrance of the grand stand, one opposite the dairy building, one opposite the fish restaurant and the remaining one across from manufacturers' building, where meals of excellent variety are served at popular prices. Mumby's has an abundance of good, clean, well-cooked eatables, served amid sanitary surroundings and the courtesy of the attendants. Everything in the way of food delicacies is provided, and all visitors are assured of the best at reasonable cost.

TORO TABLET THE FRIEND OF THRIFT.

Thrift is the slogan of the day in every department of commerce and the servant of thrift and should be Tableted in every home. The Toro Tablet is the friend of the thrifty. It is guaranteed not to injure the clothes, it entails neither rubbing nor scrubbing and it saves time as it requires but one or two hours to turn out a large washing. Boiling is not needed, so coal and gas are saved. When Toro disinfects your clothes, Toro restores what powders made firm is showing. It is of the style of Louis XVI, and is a very true representation of that famous period in French history. Heintzman Hall, 192-195-197 Yonge street, the firm's city showrooms, will be open every evening, where the many different styles of this famous Canadian piano may be seen.

FIRST CASE OF THEFT.

The first case of juvenile delinquency was reported to the Exhibition police headquarters yesterday afternoon by Beatrice Marty, 190 Mar-sueretta street, who alleged that her chafetaine, containing \$2 in money and one dollar's worth of car tickets, had been stolen from a restaurant near the grand stand, while she was dining. Acting Detectives Young and Winter last night arrested a 15-year-old boy on a charge of theft. When arrested, the police state, the woman's Exhibition pass was found in his possession.

REST TENT FOR WOMEN.

A rest tent for the convenience of the Women Institute members visiting the Exhibition is situated near the government building and convenient to the demonstration. Committee meetings of the various branches will be held here and literature distributed. Miss S. Campbell is in charge.

THURSDAY MORNING, AUGUST 30

Is Mr. Hanna Supplying the Demand?

Hon. Mr. Hanna, it is rumored, is going to get the department of political economy of the university to prove that a food controller can't really control...

We were all howling and yelling for war three years ago. The demand for war in the early part of 1914 was utterly beyond the supply...

We would recommend Mr. Hanna not to bother about the laws of supply and demand, but keep busy at his controlling...

Our contemporary, The Mail and Empire, has been equally as thoughtless as ourselves in dealing with the laws of supply and demand...

Of course it is just possible that the professors take the view that the war is greatly exaggerated and that a famine is an unusual phenomenon...

The Dayman of Democracy. What will occur to many people on reading President Wilson's letter to the Pope in reply to his holiness' proposals for peace...

The War Needs of Canada

THE NEED THAT THE DRAFT BE UNIFORMLY ENFORCED THROUGHOUT CANADA

By Benjamin Apthorp Gould

The most serious mistake, as it seems to me, made by Canada at the beginning of the war was not the adoption of the voluntary system...

At the beginning the volunteers came forward almost entirely upon their own initiative, and later recruiting leagues were established upon the initiative of the citizens of patriotic localities...

Earl Grey is Dead

OF LONG ILLNESS

Former Governor-General of Canada Was Aged Sixty-Six

London, Aug. 29.—Earl Grey, former governor-general of Canada, died at 10 o'clock this morning at Howick House, Northamptonshire, after a long illness. The funeral will be held at Howick on Saturday, when a memorial service will be held in London.

Lord Strathcona described Earl Grey as a statesman, a philosopher and a man of the highest calibre. His active career comprised not only the administration of the government of Rhodesia, but also the development of the industrial and financial operations in the development of South Africa.

By profession Earl Grey was a lawyer. He was a member of parliament for Northumberland for six years, beginning in 1880. On the death of his uncle, Sir Charles Grey, in 1894, he succeeded to the peerage and took his seat in the house of lords.

For two generations previously the name of Grey had been prominent in the political affairs of the British Empire. His grandfather had been prime minister of England.

Stating that he had formed a poor opinion of the accused's veracity, Judge Morson, in the criminal court yesterday, sentenced Roy to six months in jail for trying to defraud the bank.

Without pleading or electing to be tried, Morris Rolstein, charged with the theft of a letter containing sums of money from the postoffice, was remanded for one week when he appeared in court yesterday morning.

Through tourist sleeping cars are operated each Tuesday for Winnipeg, leaving Toronto 10.45 p.m. via Transcontinental route without change.

Before deciding on your trip ask Grand Trunk agents to furnish full particulars. Office: C. E. Morningstar, Passenger Agent, Toronto.

HOSPITAL WING

OPENED BY DUKE

Expressed Hope That Day of Sanitariums Would Soon Be Past

The new wing of the main building of the Weston Sanitarium and the William Davies cottage for babies was formally opened yesterday by the Duke of Devonshire, governor-general. He expressed the hope that the day of sanitariums would soon be past, explaining that he favored the intelligent supervision in the home of cases of consumption.

It is therefore clear that the selfish interests of the people of the Province of Quebec require that at this great time they shall act unselfishly. It is only by giving greatly now that they can gain greatly in the future. I believe that the wisest men in Quebec recognize the truth of what I have said, and that when the time comes Quebec will loyally accept the burden imposed by conscription.

It is also of vital importance for the Roman Catholic Church, if it is not to lose its position in Canada, that the impression widely existing that it is opposed to the participation in the war of the people of the Province of Quebec be destroyed.

Let the now conscript armies of Canada be justly representative of Canada from the Atlantic to the Pacific, and Canada and every province will profit in unification, in reintegration, in being cemented into an entity which shall be truly that of a nation.

OUTBREAK OF WAR SET BACK KIRKLAND

English Capital Attracted to Camp By Rich Showings.

PICTURESQUE LOCATION

Has Unique Record of No Failures So Far—Rapid Progress.

World Special Correspondent.

Kirkland Lake, Aug. 29.—Kirkland Lake is the only picturesque mining camp in Northern Ontario. It is situated on the T. & N. O. Railway, about 50 miles north of Cobalt, on the south side of the height of land and at an elevation of 1050 feet above the sea. The country is rolling the hills are usually only 100 feet above the base level.

Fire visited the region about 50 years ago, but the ground is now well covered with evergreens and various kinds of deciduous trees.

Kirkland Lake itself is a rather pretty body of water and it still retains its original beauty. The mines begin about one mile northeast of the town and continue in an unbroken string for a mile or more further to the southwest. Most of the buildings are painted white, and the brilliant electric lights stretching away for two miles show up beautifully against the darkness of the night.

When one sees so many mines all active and all close together, the first question arising is the why of this. In fact geology is one ever-present why. It notes all the natural phenomena on the earth's surface and then endeavors to determine the causes. The why in this particular case is the presence of a "break" in the rock formation and within the confines of this break there is a very considerable quantity of rich gold ore, or became deposited along the break. And when you find the latter you are practically certain of obtaining the precious yellow metal in paying quantities.

This condition is now very well understood by mining men and progress at the camp is very rapid. Prior to the great war it had attracted the earnest attention of capitalists in London, England, and a large amount of money had been set apart for its development. But all these plans went a-glimmering when Britain unsheathed her sword in the great cause of civilization and human liberty. But notwithstanding this setback, Kirkland Lake is firmly on its feet again. It is now in second place among the gold camps of Northern Ontario. So far it has not had a single failure, and it now shares with Porcupine the confidence of investors.

Recent Operator.

The United Kirkland is the most recent property to begin operations. It is situated fairly astride of the con-

tract zone at the west end of the string of working mines, including the Tough-Oakes, Wright-Bargraves, Lake Shore, Teck-Hughes, Kirkland Lake and Elliot-Kirkland. All these have succeeded, and there is no geological or other reason which can be put forward with the success of the United Kirkland.

The element of risk is largely eliminated by the work already performed in the camp. The conditions under which the gold is found are now well known, and all these conditions occur on the United Kirkland, and besides it has the best surface indications in the whole camp.

Kirkland Lake is a telluride region, in many respects similar to Kalgoolie in Western Australia, and for that reason it appealed strongly to the English capitalists who were familiar with conditions on the opposite side of the globe.

Telluride ores are usually very rich, and at Kirkland Lake they also occur in large quantities. The camp is now doing more than its share in upholding the record of Ontario, as by far the greatest metal mining province in the whole Dominion. S. R. Clarke.

PETE LAKE WORKING SUSQUEHANNA LEASE

Management Hopeful of Discovering Pay Ore Body.

The quarterly statement of the Peterson Lake Mine for the period ending July 31st has been published. It shows cash on hand of \$18,122.51. Office expenses are shown as \$1244.96. Ore on hand aside from mill residue in Peterson Lake, litigation over which is still in progress, is shown as 8 lbs. of leaf silver, 100 lbs. of high grade, 1553 lbs. second grade and 800 lbs. of low grade.

The report states:

"We have been working on the Susquehanna section of your property on a strong, heavily mineralized vein showing calcite, cobalt, ruby silver and native silver in many places which has led us to believe that we are working adjacent to a large body of ore, and have diligently been trying to locate same. We want you to understand that the ore we are taking out is not, as yet, in paying quantities. If the present workings do not come up to our expectations in the near future, we will commence sinking the Island shaft to the contact and try and locate these values from there, or we will remove our workings to the Mercer section, which adjoins the Seneca Superior section, (both of which are a part of your 230 acres) and from this point will look for silver as we have about 40 acres of unexplored conglomerate, which is considered to be the best formation in the camp for finding good silver values.

"From information obtained from several competent mining engineers, the writer is of the opinion that but a very small portion of your property has been properly prospected, and is one of the best undeveloped sections in the Cobalt camp, and that the possibilities for same again becoming a heavy shipper are very promising."

DELAY IN SHIPMENT ADVANTAGE TO MINE

Cobalt, Aug. 29.—No new developments are reported from the Adamant mine. Stopping is still going forward as fast as conditions will permit, but it is estimated that it will be three weeks or a month yet before a full shipment of ore will be made up. Delay in the initial shipment would seem to be advantageous to the company owing to the continuous and steady rise in the price of the white metal.

NEWRAY ORE BODIES HIGHLY CENTRALIZED

Properly Located Shaft Should Obviate Long Crosscuts.

ERRONEOUS IMPRESSION

Veins Not Narrow as Reported—Rock Formations Badly Shattered.

World Special Correspondent.

Porcupine, Aug. 29.—Some days ago a paragraph appeared in one of the Toronto papers purporting to describe a portion of the ore bodies on the Newray. It was stated that the veins ran from a few inches to a few feet in width. This statement is entirely misleading. There are no veins on the Newray less than three feet in width and the great majority are much wider. In fact the locus of a narrow vein is almost universally in a massive rock and on the Newray there is a pronounced schistosity down to the zone of flowage.

In the vicinity of what is known as the recent discoveries the "country" is intensely sheared and schistose and the vein filling is itself affected. Much of the quartz is strongly laminated with a definite parting between the different laminae. A casual inspection might suggest small veins, but the outcrop shows entirely negative results such a conclusion. The phenomenon is due to the great dynamic forces which not only shattered the rock but also opened ore channels and even split the quartz itself. In this section there have been many movements since the original shattering took place and now we find the surface littered with broken fragments of the various veins to a depth of several feet. The very color of this material speaks plainly of intense mineralization, while the broken character of the ground is entirely incompatible with the presence of small veins.

Parallel Veins.

Many of the outcrops on this property show what appear to be three parallel veins very close together and each generally about two feet wide. But in depth there is only one vein and the apparent separation has been accentuated by greater weathering along the cleavage planes. The same thing could at one time be seen on the main vein in the Hollinger Consolidated.

There seems still to be considerable misapprehension as to the total area of promising ground on the Newray. It is practically all on the eastern half of the property and the southeast corner of the west half. Both halves are in the form of a square 240 feet from east to west and the same distance from north to south. The shear zones strike in a northeasterly direction from the southeast boundary of the property. The favorable ground is mostly south of the shaft. The various belts of shearing and schistosity in this part of the property would not aggregate more than 400 feet in width and the major portion of this is on the east side, where the great Hanson vein is situated. Northeastward from the south boundary about 800 feet, the area of shearing becomes stronger and wider, attaining a total width of 1500 feet and carrying the most of this width

northeastward to within 300 feet or so of the north boundary.

The exceptionally rich ore found in the Rich Ore Found.

Contract Let for the Sinking of United Kirkland Shaft.

Development Plans Well Under Way

World Special Correspondent.

President R. T. Shillington of the United Kirkland Gold Mines, Limited, of Kirkland Lake, was in Toronto yesterday, and states that a contract has been placed with the well-known mine contractor and operator, Mr. J. G. Harkness, to sink the No. 1 shaft of United Kirkland. Mr. Harkness is a very efficient and aggressive man in mining work, and the United Kirkland interests are known to be in good hands with him.

The cost, results secured by the Kirkland Lake Mines, formerly the property of the United Kirkland people, of 20 claims each of United Kirkland on the ore contact, satisfies the United Kirkland management that before the snow flies they will have proven the persistence of the big surface vein showing to a depth which will make United Kirkland one of the headliners of the Kirkland Lake district.

Building material has been delivered on the ground and ground is being broken for the mine camp. United Kirkland is located about three miles distant from the main railroad line, being in that respect the most fortunate of the Kirkland Lake properties. The Tough-Oakes mine of Kirkland Lake, which has paid dividends, is almost twice as far from the railroad as United Kirkland. Power has been delivered available for the mines, and connections will at once be made at tripping cost, which will give United Kirkland practically as cheap power as any mine operating in the north.

DEVELOPMENT PLANS WELL UNDER WAY

Contract Let for the Sinking of United Kirkland Shaft.

PROMISING VEINS ON NORTH DAVIDSON

Rich Samples Brought Down By Managing Director.

World Special Correspondent.

Encouraging reports have been received from the North Davidson Gold Mines. Some spectacular ore has been secured on the property by Mr. L. G. Harris, managing director of the mine. It shows gold in profusion. The surface showings are extensive, covering almost the entire property, revealing veins among the richest ever disclosed in the Porcupine camp. Samples from the drill holes were also brought down by Mr. Harris. These were assayed by the Canadian Laboratories here. One of these from a depth of 281 feet on No. 2 hole assayed \$108.75 to the ton. Moreover, the pay streak at this point is nine to ten feet wide, averaging this value throughout. Assays from hole No. 3 have not been reported as yet, but, according to details it will show even better results than No. 2 hole. At the present time No. 4 drill hole is being driven down to the 1,000-foot level.

Mr. Harris left for New York last night, where he will confer with some New York capitalists regarding the sinking of a large block of North Davidson stock at an early date. The issue will be listed on the New York curb market almost immediately.

ISBELL-PLANT MINING TALKS

Canadian Mining News

Have you noticed the growth of interest the past month or so in north country mining affairs?

If you have not, take it from us that it is time you were stirred up and taking notice.

We have tried to get our little book on north country mining by heart, and hope that we have fairly well succeeded, but the public at large of Canada and the United States is still too lamentably unadvised on the possibilities of the mining camps of the north, those that are established and those that are still in the developmental stage.

We believe, however, that the events of the past three months have served to bring the mineral resources and the future of Cobalt, Porcupine, Kirkland Lake, Boston Creek, South Lorrain, Gowgashan, Elk Lake, West Shiningtree and other camps to the serious attention of thousands of people who before passed them up in the news columns as matters which too remotely concerned them to stop and read about.

In one of Toronto's morning papers this week first-page prominence was given to a monster ore discovery at Sudbury in the Mesabi Mine of the British-American Company. Perhaps the most valuable ore bodies in the world outside of the Mesabi iron ore range are the anthracite coal measures owned by the International and British-American Companies at Sudbury. No metal deposits in the world, in our opinion, can compare with the nickel-copper holdings of these two companies.

The news which the precious metals camps are steadily developing is focusing attention more every day upon the north country. People who were indifferent or ignorant before realize that a real gigantic and urgently necessary industry is forging ahead in the north notwithstanding the painful lack of skilled labor, in the gold and silver districts.

The north country could probably put to work at very high daily wages 5,000 men, who are now badly needed in the development and production ranks of Porcupine, Boston Creek, Kirkland Lake, Cobalt and elsewhere in the north.

However, the mining operators of the north are not discouraged by labor shortage and the strife which has been fomented there by outside agitators who were trying to bring about a strike early in the summer, but who were frustrated in their designs. They are economizing, husbanding their treasures, systematizing their efforts, putting every dollar where it will count in development work, paying their dividends for the time being because the money is badly needed in developments and preparedness for large-scale operations later on when the labor market is no longer under stringency and ample supply of labor will be available.

We expect to see not less than \$2,000,000 go into Kirkland Lake alone during the next two years. This \$2,000,000 may double itself if the war ends this winter. The uniform success which has attended the opening up of Kirkland Lake Mines for two miles, reaching from Tough-Oakes to United Kirkland, is attracting capital for actual development purposes. Probably the best part of \$1,000,000 has been expended or provided for in the past year at Kirkland Lake due to the brilliant results obtained in underground work there.

Boston Creek is experiencing much more activity than a year ago. The Boston Creek Mines are inactive at the moment, but we understand that the situation there is absolutely satisfactory in every respect, except in lack of activity, and that plans are maturing for a comprehensive drilling and testing of the properties by the very substantial capitalist interests which have already expended in the neighborhood of a quarter of a million dollars in developing and demonstrating these properties.

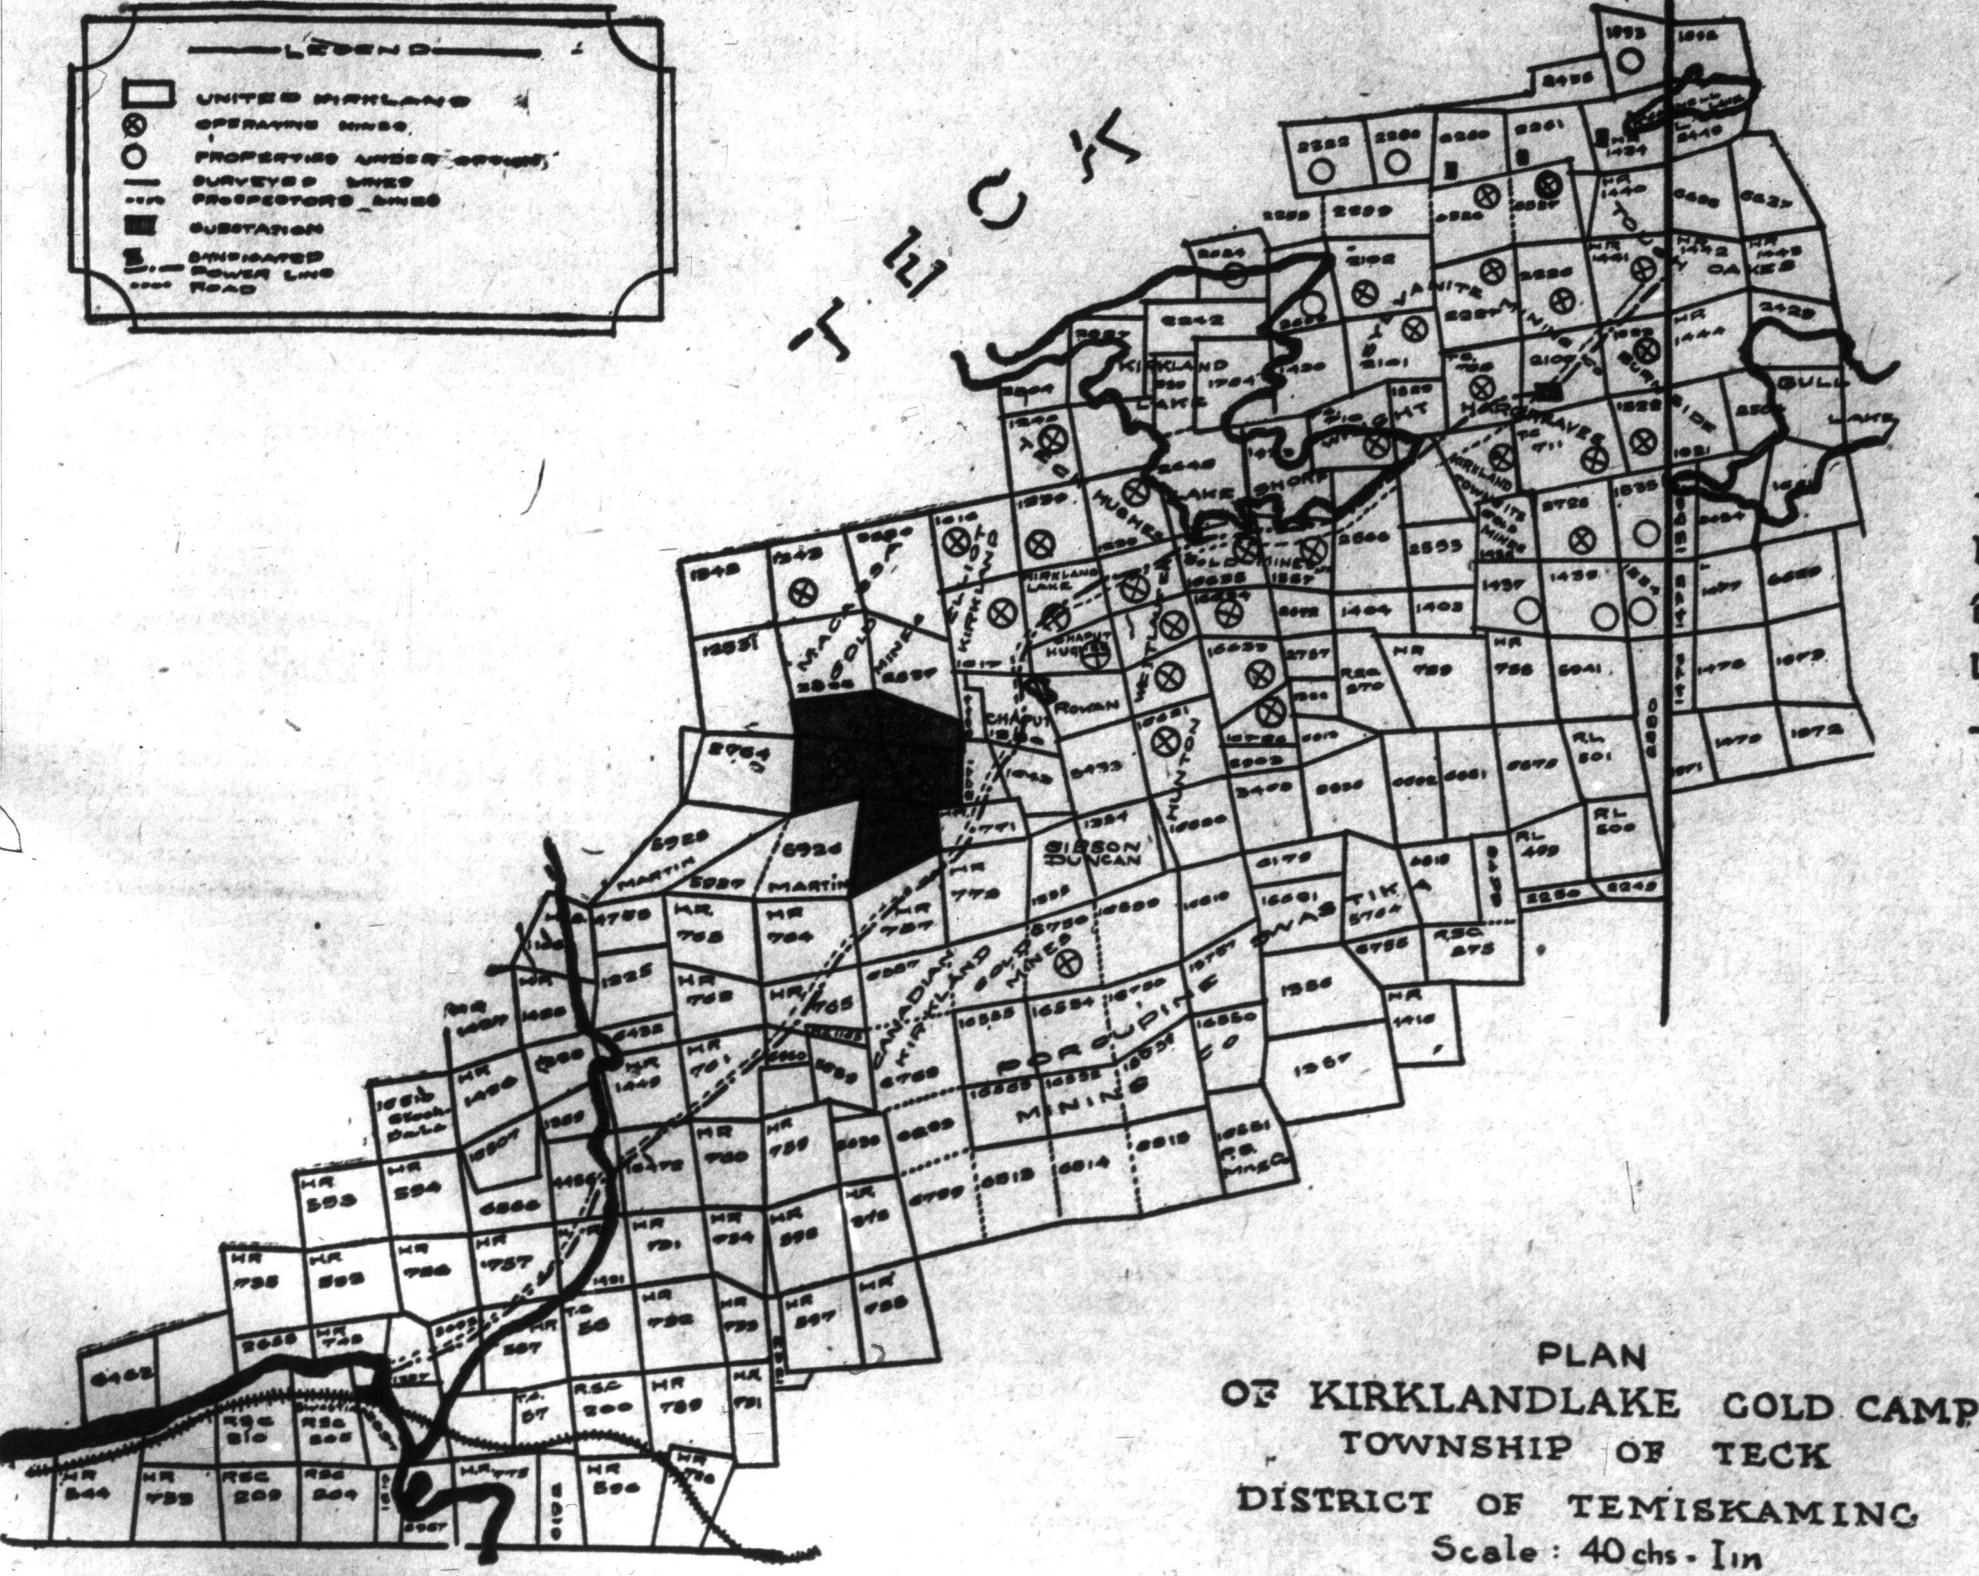

At Newray the news is of such a headline character that we refrain from printing it all. During the week the management telegraphed that the crosscut entered the Hanson vein at 1,000 feet from the working shaft on the 400 level and that from the 940 to the 1,000-foot point—60 feet—the crosscut has been traveling in mineralized ore of good milling grade, making vast indications.

We believe Newray is already well on the way to prove a mine worth \$10,000,000 or more—either that or we have been sadly misled in our construction of the testimony of experts with whom we have talked recently.

The high price of silver and the indications of a runaway market in that metal and the renewed and intensified development work among the gold mine operators of the north are making things hum in all the camps of that section, while prospectors are busy seeking new silver and gold mines, capitalists are quietly slipping in and looking over the field, and scarcely a day passes that some new deal is not announced or rumored as having been accomplished or begun.

We hold a brief always on Canadian Mining affairs and have arrangements made to send THE CANADIAN MINING NEWS, published weekly, to all who write us stating that they wish to receive it. No charge is made, and requests for the paper are invited.

The September Blanket Sale at Simpson's Begins Today and Offers Many Savings

\$18,000 Worth of Best Blankets Made in Canada Very Much Underpriced

A last January purchase of the season's overmakes and odd lots, from two of Canada's largest and best blanket mills are responsible for many of the low prices that will obtain during this sale. Hundreds of pairs of blankets will be offered below today's mill price, and hundreds of other pairs will be priced at a closes margin of profit than is usual, so that this big sale may afford attractive saving opportunities to our customers.

The Sale Begins Today With These Five Tremendous Special Offerings

- White Union Wool Blankets**, closely woven and evenly napped. Size 64 x 82 in. Regularly \$5.75 a pair 4.45
- All-wool Blankets**, white, with pink or blue borders; warm and cosy; large size, 72 x 92 inches. Regularly \$16.00 a pair. Sale price today, a pair, 11.95
- Flannellette Blankets**, of best Canadian quality and largest size, 70 in. x 84 in.; white or grey. Rush price today, per pair 1.69
- White Saxony Blankets**, light weight and easily washed; size 70 x 84 inches. Sale price today, a pair 2.95

Men's and Young Men's Light Weight Overcoats at \$13.95

These coats are well-made and well-fashioned, and light enough for present wear. They will also prove valuable for fall wear, and they have been reduced for today to this exceedingly interesting price. Designed with smart pinch-back and patch pockets, in three-button single-breasted style. Your choice of grey and brown herringbone and heather mixed tweed coats. Sizes 34 to 42. Today 13.95

Youths' First Long Trousers Suits

At \$15.00
We call these "College Days" Suits because they are quite similar to the higher-priced suits sold under another name. They have plenty of "swing and go," and are finely tailored from blue worsted finish cloth.
The two-button coat is single-breasted and shows needle-pointed lapels and form-fitting back.
Youthful cuff trousers and single-breasted vest. Sizes 33 to 35.
At \$18.00
Suits of a type that are distinctly youthful. Designed with a view to giving the very young man a smart, mannish appearance.
The dark, plain grey worsted finish materials from which they are developed may be seen in the more expensive suits.
Two and three-button coats have pinch-backs and are single-breasted.
Vests and trousers cut youthful. Good value and moderately priced. Sizes 33 to 36.
