Christian Resignation. BY FINLEY JOHNSON.

Thy pure and fragile form I give Unto the parent dust ; Yet, still, I murmur not, for God Is holy, wise, and just. And as I kneel upon thy grave, My heart breaks forth in prayer That He who sends to me this grief May save me from despair.

O, He will not condemn my tears As bitterly they flow, Nor will be chide as I pour out The fulness of my woe : For, though divine, his inmost heart Its humanness hath kept ; He'll not forbid my tears to start, Since he, our Saviour, wept.

Though hard and bitter 'tis to give The love of years away ; Though life, at best, is but a waste Yet, not for death I pray : ray for patience, strength to bear The burden God hath given, For faith to cheer my drooping soul With thoughts of God and heaven

Yet if a rebel thought oppose The spirit's pare control, O, blame it on my mighty woes, Not on my feeble soul. And should the weakness of my heart Break forth in bitter tears. O, charge it on my grief and pain, Not on my doubts and fears.

But faith lifts up my drooping love-Tells of the promised land, Where I shall meet thee in the midel Of an angelic band. And with that thought I am content, My peace is surely won, As from my bleeding heart I say, "Thy will, O Lord, be done."

When this is the style in which the higher clergy make their attacks, what can be expected from the lower? A friend of mind, once travelling in a steamer on the Rhone, fell into conversation with a priest who, in defending the claims of the Romish Church. asserted that " all the leading scientific men of the world had been Catholics, as Newtcn, Kepler, Liebnitz ;" and nothing would

convince him of his error. A priest of the Cathedral of Carcassone, once attempted the conversion of a Protestant lady of my acunintance. She was somewhat conversant with the Greek language, and, in the argument, appealed to the original of the New Cestament. The astonished priest inquired whether she understood Hebrew, and was surprised, beyond measure, to learn that the New Testament was written in Greek, not

Her successor, apparently, did not care to proceed wish it, as we are assured that the artists finished their stupendous work out of love, looking upon its completion as necessary for their own fame and the honor of their art.

Nearly four bundred years afterwards, Pliny saw it in all its glory. According to him, the circumference of the building was about 411 tee: ; its breadth from north to south, 63 feet; its height, 25 cubits. It was ornamented with six and thirty columns. About the pteron (colonnade) stood a pyramid equal in height to the lower building, and formed of twenty-four steps, gradually tapering towards the summit, which was crowned by a chariot and four horses, excuted by Pythius, making the total height of the work no less than 140 feet. This gigantic monumental tomb was so solidly contructed as to defy for centuries the destroying hand of time. Vitruvius speaks of it as one of the marvels of the world ; Martial alludes to its peculiar construction ; Lucian extols the beauty of the marble, and the life with which the sculptors had endued it. In the second century. Pausanius declares how greatly the Romans admired it; in the fourth, it is mentioned by Gregory, Bishop of Nazianzus ; in the tenth, Constantinus Porphyrogenneius speaks of it as exching wonder and laudation; and in the twelith century, Eustathius declares emphatically, 'It was and is a marvel " The precise period at which the Mausoleum fell into ruin is uncertain. The White Stone.

To him that overcometh will I give a white stone. Rev. ii. 17.

It is generally thought by commentators that this refers to an ancient judicial custom, of dropping a black stone into an arn when it is intended to condemn, and a white stone when the prisoner is to be acquitted; but disposed to agree with those who think it efers, rather, to a custom of a very differnt kind, and not unknown to the classical reader-according with beautiful propriety to the case before us. Railway debate resumed. Hon. Mr Young addressed the bouse It was ot his intention, he said, to speak at any length -but as the field was so large, be could hardly rust himself in wandering over it. The reso u ion before the house, he said, was intended to cast censure and condemnation on the govern nent. He referred to the different points in enuation of his offence, and we may admit the e resolution,-to the sneers and instruction nade by Dr. Tupper against Mr. McCully, and ben spoke of that gentlemen's high attainments is a barrister, and as a man,-and the feelings of rivalry which prompted the assaults upon him The tirade livelled at Mr. McCulty should have been against the government, who put him in his situation .- and the fact that a majority of his bouse had placed him there, is the best answer to balt the sarcasms uttered against h.m. He (Mr. McC.) was called a railway despot, &c, and was charged with the assumption of power belongng to others. But what power, he would ask had that gentleman that the government did no recent convert from the Protestant Church. NEW BRUNSWICK LEGISLATURE .- In the

House of Assembly on Thursday, the 28th ult, we learn from the New Brunswick Reporter. on the Educational Extra Grants being read, Hou. Mr. Robertson rose and enquired when would those partial and extraordinary expenditures of the public money come to an end. It had always appeared to bim to be the very worst policy to take the funds which we collected from the people, and ostensibly designed for their education, and apply them to the support of what were called superior schools; schools which if designed for the purpose of affording a superior education, should be paid for by those, and those only, who require them. The present appropriations for schools were exceedingly liberal, and should in his opinion be superseded by direct taxation ; but under all circumstances, the wealthy portion of the community who require superior educa-tion for their children, should themselves pay

free and untrammelled in the exercise of their own judgment. He was glad, however, to know Hon. Mr. Hamilton said there should be only one general system adopted in the disbursement of the public money for schools He was opposed to all denominational grante; but he could well understand their origin. Liver Complaint, Dyspepsia, Jaundice, Debility of the Nervous System,

vanced stages of the disease. So wide is the field of its usefulness and so numerous are the cases of its curce, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate dis-eases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote

by which this fluid becomes vitiated, weak, and poer. Being in the circulation, it pervades the whole body, and may burst out in disease on any whole body, and may burst out it discuss on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofuis there one which it may not desirely. The scrott-lous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. What-ever be its origin, it is hereditary in the constitu-tion descendence in the second second second second second tion descendence in the second se tion, descending " from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the

blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tuber-cles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that serefulous constitutions not only suffer from scriptilous complaints, but they have far less power to withstand the attacks of other diseases ; sequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contan tion; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise

from or are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill

of our times can devise for this every where pre-vailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, OF ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SC LD HEAD, RINGWORM, RHEUMATISM, BYPHILITC and MERCURIAL DISEASES, DROPST, DYSPEPSIA, DEBILITY, and, indeed, AIL COMPLAINTS PARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsapa-rilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.
