FRIDAY, JANUARY 29, 1888

THE MALOTT CASE.

The unanimous decision of the full bench yesterday, declaring void the trial of the prisoner who was convicted of murder at the last Assizes, before Mr. Justice Walker, and sentenced to death, is of great importance. It appears that the murder was committed in the district of the trial, and that the prisoner claimed that he could not be tried outside of Kootenay. A plea as to the jurisdiction was overruled by Mr. Justice Walker, who held in accordance with what has followed as the invariable practice for many years that there were no districts or counties for judicial purposes, but that the entire province was but one district, and that the Crown had the right to try a prisoner in any place. In the decision of the full bench yesterday (in which Mr. Justice Walker concurred) it was held that the Crown had the right to try a prisoner in any place. In the decision of the full bench yesterday (in which Mr. Justice Walker concurred) it was held that the Crown had the right to try a prisoner in any place.

THE HYSTERICAL NEWSPAPER.

It was Frederick the Great, we think, who had the unpleasant habit of enforcing his arguments with the use of his boot, and who, on one occasion, when his ministers acquiesced without demur to some important question of state policy which the monarch had advanced, asked them why they did not argue the point. "Oh, sire," replied one of his ministers, "we would be glad to argue with you, but we think that the boots which you wear such thick boots." For such the same reason we decline to argue with the young friend of the Times over the English lands sale. The government have forced us to argue with them, and we are not at all disposed to argue with them. The government have forced us to argue with them, and we are not at all disposed to argue with them.

THE UNIVERSITY QUESTION.

The letter of "W." in yesterday's issue of the Colonist gives a very interesting account of the reasons why, according to his experience, the proposal to establish a provincial university is at all with our present state of affairs. It is a matter of great importance, and one which demands that public attention be given as speedily as possible. In this view he is correct, and the statement which he offers in his opinion may be valuable as a warning against hastily attempting too much, his whole letter is abundant evidence of the comparative uselessness of old country experience, even when directed by high intelligence, in matters affecting the public education. He is quite right in saying that the number of students must at least be sufficient to justify the expenditure of the money which is to be expended in the establishment of the university. He is also correct in saying that the number of students must at least be sufficient to justify the expenditure of the money which is to be expended in the establishment of the university.

THE UNIVERSITY QUESTION.

The letter of "W." in yesterday's issue of the Colonist gives a very interesting account of the reasons why, according to his experience, the proposal to establish a provincial university is at all with our present state of affairs. It is a matter of great importance, and one which demands that public attention be given as speedily as possible. In this view he is correct, and the statement which he offers in his opinion may be valuable as a warning against hastily attempting too much, his whole letter is abundant evidence of the comparative uselessness of old country experience, even when directed by high intelligence, in matters affecting the public education. He is quite right in saying that the number of students must at least be sufficient to justify the expenditure of the money which is to be expended in the establishment of the university.

THE WONDERS OF MODERN SCIENCE.

The experiments which have been and are being made in Germany and in this country on the free use show that there is an especial apparatus for each in the human system. It has been proved that, for example, it is not a function of the skin solely, as heretofore believed, but is an organization which works out

Sanitation and Drainage.

To the Editor:—I have condensed a few facts from the "Sanitation and Drainage" which I take the liberty of presenting through your medium to a thinking people. The evils arising from sanitary neglect are as old as civilization. Long, malignant fevers are directly traceable to the want of sanitary arrangements. As we are so constituted, they must be removed. To correct these evils it requires a thorough system of drainage. The drainage of each day's excrement of each street should be removed from the city on the day it is produced, and of each dwelling shall be removed from the city on the day it is produced, and of each dwelling shall be removed from the city on the day it is produced.

Sanitation and Drainage.

To the Editor:—My attention has been called to "Immigrants' Criticism on the Project to Establish a Provincial University" and I have just perused your editorial in reply. Your correspondent's objections, as stated by him, certainly do not seem to me to be of a nature which still I consider their forebodings not unreasonable. It is not to be expected, however, that any unfavorable conditions will have the effect of preventing the execution of the scheme, when as many influential persons are in favor of it, as suppose the people have made up their minds on the main point at least, that a university must be founded, because they are already beginning to be sensible about details. Some desire that the building should be erected near the "geographical centre" of the province, and others that the college should be located at some remote uninhabited place up the Fraser. Others more plausibly claim that the site should be near the coast, and that the "immigrant" thinks that the university would be a success, and that the province would be benefited by the presence of a sufficient number of students, in this opinion I concur, but on grounds somewhat different from those advanced by your correspondent.

Sanitation and Drainage.

To the Editor:—There are about 180 inhabitants in this place and within a few miles of it, yet we have had no regular main from either east or west of us, for months; in fact the main for the past year has been laid out by the city of Kamour, which is about 100 miles from Golden City. We have a Dominion postmaster, who is in a very small house, and there is no one to receive mail matter even if it were brought in—and instructions have been given not to forward it. Experience has demonstrated that in order to secure the permanency and durability of sewer work, great care is required in the selection of proper materials. No material should be used which is liable to decay, or which is liable to be broken down by the action of acids and alkalis already found in sewers. Wood is not short lived, and is not a good material for sewer work. It is generally supposed that iron is the best material for sewer work, and is the material which is used in the construction of sewers. It is the material which is used in the construction of sewers. It is the material which is used in the construction of sewers.

Sanitation and Drainage.

HON. EDWARD BLAKE

On Briel and the Alliance of the Grits and Blues.

At the London, Ont., banquet, Mr. Blake said: I think we should have the evidence on which the government has charged the whites of Prince Albert with being guilty, more exposed. Indians and whites should not bear the blame while whites go free—But may have a serious bearing on his case. We should have further information as to Briel's demands for money. As gone are the people have made up their minds on the main point at least, that a university must be founded, because they are already beginning to be sensible about details.

A WONDERFUL REMEDY.

Ayer's Cherry Pectoral

The value of Ayer's Cherry Pectoral, in the protection it affords from the danger of pulmonary disease, cannot be over-estimated. Mr. C. K. Phillips, Pittsburgh, Pa., writes: "About three years ago I had severe Laryngitis, which resulted in chronic hoarseness. I was cured by Ayer's Cherry Pectoral. I have since tried no other remedy. I can say that I have never since had a relapse of my disease. Several members of my family suffered severely with it, and all of whom Ayer's Cherry Pectoral cured. It is a wonderful medicine for Influenza. Too much cannot be said in its favor."

Ayer's Cherry Pectoral

has cured a Cough in a few doses. It always relieves irritation of the lungs and throat, and arrests the tendency to inflammation. It strikes at the foundation of all Pulmonary diseases, is without a rival as an expectorant, and is a sure cure for the most obstinate Coughs and Colds. L. Garrett, Texas, writes: "I have used Ayer's Cherry Pectoral in my family for twenty years. For throat and lung diseases, I consider it a wonderful remedy."

Ayer's Cherry Pectoral

has cured a Cough in a few doses. It always relieves irritation of the lungs and throat, and arrests the tendency to inflammation. It strikes at the foundation of all Pulmonary diseases, is without a rival as an expectorant, and is a sure cure for the most obstinate Coughs and Colds. L. Garrett, Texas, writes: "I have used Ayer's Cherry Pectoral in my family for twenty years. For throat and lung diseases, I consider it a wonderful remedy."
