We are surrounded on all sides by the reservations belonging to the different tribes of the Blackfeet ustion, and there are five or six thousand of them within a radius of 100 miles. They are notes formidable as the Crees and halfbreeds in the north, because the Blackfeet have been on rations ever since the buffalo left. We are pretty afe here because we have the police fort and 100 policemen, and could soon get in about 550 men, all splendid riders and good shots and thoroughly at heme on the prairie. Yesterday the wives of the police officer and to other ladies and families were east east out of danger. From all I can heat we are not in much peril: but these 'Indians are such treachefrous brutes that the greatest precautions are necessary. FRIDAY MORNING, APRIL 24, 1885. The Sunday Paper Question.

The World is of opinion that a Sunday paper, well condusted, with clean columns, is an instrument for good. Whether it would be a financial success or not in Canada is another question on which we are not prepared at present to give an opinion. To settle that question we would like to have, an expression of opinion from our customers-we would like to know how many of them would take a Sunday paper if it was delivered at their house early Sunday morn. ing; we would also like to know how many of our customers would cease to be such if we saw fit to publish a Sunday edition. But all this aside, we certainly feel justified in publishing an edition of The World during these times of great excitement, when so many families of Toronto are so deeply interested in the welfare of the troops in the field. We are convinced from our experience of the last four Sundays, that the citizens of Toronto appreciate our efforts to give them important new on Sunday, and if the news or the coming Sunday is of a character to justify it, we shall certainly bring out our paper, notwithstanding the threats of Mr Fenton to surround the office and to come in and arrest those engaged in the publication of the paper.

We also wish to inform those good people who took it upon themselves to vindicate what they call Sabbath observance that they are waking up the wrong passenger when they attempt to enforce their ideas on this question by attacking th newspapers, for, as can easily be shown, the Sunday newpaper is the least of all the alleged violations of the Sunday law. In so far as newspapers are concerned, and as has been pointed out before, the Sunday newspaper entails far less Sunday labor than does the Monday paper. Furthermore, there are offences against the Sun day law which are much more glaring and to which Mr. Fenton and the society for the suppression of vice might much better their attention to preventing. In attacking the newspapers they will more ar less attack the question of liberty of thought and of freedom of expression, and that is a ground on which they can least afford to fight upon.

evade the present law, in so far as newspapers are concerned. All the work or them, or the great bulk of the work on them, is done before Saturday midnight and it will be an easy thing to bring fat s good Sunday paper by one o'clock Sunday morning, and deliver it all over the city before three; and if Mr. Fenton or his supporters think they can stop that they are welcome to try it and if they succeed in that then the paper can be brought out and delivered before midnight. We admit there is a certain amount of offence to religious order and decency in the boys selling the paper on the street during church hours, but this has been overcome in those cities that have Sunday papers by a tacit understanding between the police and the boys that street sales are not to be pushed after 9 o'clock. In many cities Sunday papers are published and no one is aware of the fact police. This would put a stop to the as the papers are quietly delivered early in the morning and without shouting or importuning the people to buy.

Another thing we wish to note is this that from the Detroit to the Niagara rivers along the two lines of the Great | Western and Canada Southern the Sunday papers of Detroit and Buffalo are sold regularly every Sunday in large quantities and so far no objection has been made thereto. If Canadian papers are to hold their own they will almost be compelled to enter into competition against these to the present moment no definite state-American papers. Furthermore, we bement has actually been made of what they lieve that certain papers have decided to require. Yesterday we received a petition go into the Sunday paper business, and if signed by 250 settlers which has been forthe daily papers are to hold their own they warded to the government by a specially will be compelled to go in and contest the field with those who propose to take it up. We have also to say that if a systematic persecution is to follow the issue of a Sunday paper in these times of excitement. then it will be in order for newspapers as other colonies of the empire; second, thus persecuted to resort to the law of that these rights and privileges have been retaliation; and insist on such an enforcement of the law as will make it obnoxious and bring it into disrepute. The only have made improvements thereon, for a ground which we can see against the Sun day paper is that it may somewhat assist to bring about a state of things most undeand have conformed to all the conditions sirable, namely, that as a man is now able to exist by working six days of the week. It ought not to be brought about that in order tokeep body and soul together he will have to labor seven. The publication of Sunday paper may or may not be in that direction; we still think it is not; but even if it were, it is a matter of such small moment, when so many other forces are at work, that it can be left out of view. When we say that we believe that a clean

Sunday paper would be an instrument for good, we say so after having given long and careful consideration to the whole question in regard to its ethical and religious bearing. We know there are any brethren of Manitoba; eighth, that the number of good men who have sound idea on what constitutes right action who hold the same opinion with us. Whether The World will ever see

fit to publish a regular Sunday edition will depend entirely on the wishes of its patrons and the dollar and cent aspect of the concern. That aside there is 20 law and there is no public prosecutor who can stop us.

Everything tends to show that up to the present the administration has been regretfully lax, but there is good reason to believe that having had the evils brought only too prominently before them the authorities at Ottawa will enter upon a new career. The "War Cry" and Sunday Papers. Editor World: Sir,-I do not like your present been the outcome of Riel's bravado proposed Sunday paper business. Much as I enjoy your spicy columns I can get along very well without them on Sunday; they perhaps from a national point of view the lesson is a cheap one. The police must in future be controlled in the Northwest and are neither a necessity nor a mercy except not in Ottawa, and Mr. Vankoughnet must under very exceptional circumstances, and wake up of make place for a live man of greater capacity. The two departments, to get them out would, I fear, be merely introducing the thin edge of the all-week-round grind of the workingmen. The Sunday should be protected as much as possible in the interests of the toiling masses. At the same time I think there is a great deal of narrowness in some of those who condemn you. The minister who proposed to stop the salvation army selling their War Cry on the same grounds as he would suppress Sunday papers must have a narrow and illogical mind. That is a voluntary work of charity not pursued for personal gain and involves no Sunday work by printers. Collections in churches might just as well be suppressed, and preaching too for that matter. Scott act tyranny finds a congenial place in the minds of such ministers.

Liberal Temperance. to get them out would, I fear, be merely instead of acting with a puerile jealousy of each other, must cordially co-operate and be under one chief. Col. Irvine and Col. Macleod are the two men of experience in whom the Indians have confidence. Let them organize such a force as will forever prevent a recurrence of this spring's disturbance. There is nothing in the world to prevent the insurgent halfbreeds from dodging the general's present force if they see fit, and by moving to the east or south they can have the whole line at their mercy. Well mounted police could stop this; but they are not forthcoming. Far be it

Cedar Blocks.

Editor World: It is laughable to hear some of the suggestions made at our council in reference to the cedar blocks between sedentary occupations, they would be more the rails. If the blocks were cut than human if they could, under three months, become inured to the trials of as Mr. Wagner suggested it might stop the warfare. They did not enlist to fight Indians on the prairie, or halfbreeds in the forest; and if the mounted police had been in a state of efficiency they would not have been required for the service. The police Loam will not allow water to pass, therefore the water freezes and lifts up the blocks. Look at Spadina avenue from one end to the other, no such trouble there, because the sand is good and sharp for the water to drain through. If these inspectors of block paving were to look after our interests and not the contractors', we would have better work in our block paved streets.

A BURGLAR'S STORY. My profession isn's a popular one There's considerable prejudice against it. don't, myself, think its much worse than a good many others. However, that's nothing to do with my story. Some years ago, me and the gentleman who was a that time connected with me in businesshe's met with reverses since then, and a present is able to get out—was looking around for a job, being at that time rather hard up, as you might say. We struck small country town-I ain't a goin' to giv it away by telling where it was, or wha the name of it was. There was one bank there; the president was a rich old duffer ewned the mills, owned the bank, owne most of the town. There wasn't no other officer but the cashier, and they had a boy who used to sweep out and run of errands. The bank was on the main street, prett well up one end of it—nice, snug place, o the corner of a cross street, with nothi

We took our observation and there was no trouble at all about There was an old Stoughton bottle of watchman that walked up and down th street nights, when he didn't fall asles and forget it. The vault had two doors the outside one was chilled iron and had three-wheel combination lock; the inne door wasn't no door at all; you could kee it open. It didn't pretend to be nothing but fireproof, and wasn't even that. T first thing we done, of course, was to fit the outside door was an old fashion Baron lock, any gentleman in my profesion who chances to read this article w know just how easy that job was, and ho we done it. Catarrh—A New Treatment.

Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh. Out of 2000 patients treated during the pass ix months fully ninety per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered than of five per cent. of the patients presenting themselves to the regular practitioner are benefitted, while the patient medicines and other advertised cures never record a cure all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tisenes, Mr. Dixon at once adapted his cure to their extermination; this second plished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four vents are are cures still plished, the catarrh is practically cured, as cut offected by him four years ago are cures at No one else has ever attempted to cure tarrh in this manner, and no other treatment as ever cured catarrh. The application the remedy is simple and can be done at hon and the present season of the year is the m favorable for a speedy and permanent cut hem jority of cases being cured at one trement. Opinions of the Press. Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of this stubborn malady. This is nese the less startling when it is renembered that not five per cent, of the patients presenting themselves to the regular practitioner are benefitted, while the patest medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the itsues, Mr. Dixon at once adapted his cure to their extermination; this accomplished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him six years age, are cures still. No one size has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 King street west, Toronto, Canada and enclose stamp for their treaties on catarrh.—Montreed Star.

OBSERVE—Our remedy is easily applied—it is used only once in twelve days, and its application does not interfere with business or ordinary duties. We give every case our special attention.

The Sons of St. George in Toronto cale brated the anniversary of their well-beloved patron saint in right royal style last night the celebration taking the form of a banquet the Albion hotel. Mine host room was barely large enough to accommodate the enthusiastic Britishers who assembled to honor the day. The gathering numbered about 130. It was thoring ing numbered about 130. It was thoroughly representative and probably the largest that has been brought together on such an occasion in years. British to a degree, it is almost superfluous to add that the company was animated and merry. The emblematic rose was worn on every lapel, and medals glistened here and there on the breasts of officers, past presidents and society guests. All united in pronouncing the affair a grand success.

At 9 o'clock the guests sat down. The tables were elegantly laid. As for the menu, it was of a tempting nature and elaborate, roset beef and plum pudding having a prominent place on the card. The dinner was well served. Harry Symons, the young and active president, sat at the head of the board, and the banner of St. George floated at his back. Lt. Gov. Robinson, who, by the way, is the oldest living past president of the society, sat to

Sunday Newspapers and Public Morality Editor World: A good Sunday newspaper is at this particular period a patri otic necessity, and is at a l times a great moral benefit to the community. The well meaning people who oppose Sunday papers are unaware of the fact that they are fighting against the true interests of public morality. It is accepted as an axiom that ignorance is the parent of vice and that higher intelligence and civilization go hand in hand. The Sunday press as well as the in hand. The Sunday press as well as the pulpit has a great moral mission to perform, and neither of these teachers can usurp the place or successfully do the work of the other. Many of the people do not go to church twice on Sunday, and a very considerable portion de not go to church at all. This may be highly deplorable but it is unavoidable and leaves us to deal with he incontestible fact that they don't go. How is unavoidable and leaves us to deal with he incontestible fact that they don't go. How shall this class be dealt with? Is it better to leave them in blank idleness free to the temptation of some demoralizing indulgence, or to supply them mental employment and instruction in the highly moral and literary columns of an independent paper like The Toronto World, which excludes from its pages the abusive language usually found in party organs. The moral Sunday paper neither supplants nor rivals the church by infringement on its special field, but is a co-worker in the broad domain of public morality, and influences for good a large

morality, and influences for good a large class which the church either does not or cannot reach.

To allege that The Sunday World attracts people from attending church is virtually saying that its articles are more virtually saying that its articles are more interesting to church goers than are the sermons coming warm from the living lips of their authors—an honor to which I presume, Mr. Editor, you do not lay claim. It is generally admitted that the coarse, rancorous abuse which constitutes the chief stock in trade of some party journals,

chief stock-in-trade of some party journals, totally disqualifies them for the office of Sunday instructors, and their opposition to independent papers performing that duty springs from jealousy and self-conscious disability. There is no ungodliness in the needy newsboy being permitted to make a few extra pennies on Sunday by doing a work which ministers to the general good. He can take the coppers with as good a grace as the steward takes up the collection at church, and with the approval of conscience that it is a double benevolence blessing him The civil assize court resumed business through and with the approval of conscience that it is a double benevolence blessing him who gives and him that receives.

The case of Cameron v. Martin, an action for ejectment, was disposed of; verdict for defendant. Wright v. Bailey, an action of defendant. Wright v. Bailey, an action at ford the expense and time to read the daily papers. Without the aid of good Sunday papers they must remain ignorant as compared with their more fortunate neighbors. Laboring under the disadvantage of meagre information and being deprived of the privileges of getting more on the only day of the week on which their lot in life affords them time, they cannot discharge their duties to the state, to the church and to themselves and families to the best advantage. In view of this fact I shall offer an argument which I recommend to the opponents of Sunday papers.

A man's mind is at least of equal import.
