MONTREAL.

LINTON & COOPER,

MANUFACTURERS AND WHOLE-SALE DEALERS IN BOOTS AND SHOES 806, 808 & 810 St. Paul st., Montreal.

308, 308 & 310 St. Paul st., Montreal.

We invite the attention of Merchants, East and West, to our large and varied stock of Boots and Shoes now on hand, and in process of manufacture for the Spring trade. Goods in every conceivable style will be found in our establishment, from the finest Kid or Satin Gaiter, to the strongest Stoga or Hungarian Boot. Men's, Boys', Youths', Ladies', Misses' and Children's wear, in over 200 different patterns. Special notice is requested to the fact that all our goods are hand-made, and of the very best material. The introduction of Pegging Machines having thrown a large number of workmen out of employment, and consequently reduced the cost of labor, we are thereby enabled to manufacture neater and more substantial Boots and Shoes, at no greater cost than if made by machinery; and are prepared to offer the choicest goods at the very lowest possible figures.

Orders personally or by Post, will have our immediate and most careful attention.

J. TIFFIN & SONS,

GENERAL MERCHANTS, IMPORT-U ERS of TEAS, SUGARS, and GENERAL GROCERIES, WINES, BRANDY, &c., Nos. 184 and 186 St. Paul st., and 49 and 50 Commissioners st.

May, 1868.

KURSHAW & EDWARDS,

IMPROVED FIRE PROOF SAFE

YEAR 1888.

ATROVED FIRE PROOF SAFE BAYENG WAS SEVEN BY SAFE BY A The favor these Safes have won by their many and severe trials during the last quarter of a century, from the fact that not one has ever infled in pre-serving its contents, thoroughly establishes their reliability, and with recent improvements made during the past two years, we offer them as the most perfect Fire Proof security extant, and free from dampness.

Security extant, and nee from damphess.

Our Burglar Proof Specie Boxes made of combined from and steel in a manner peculiarly our own, the steel so highly tempered and placed as to be beyond the reach of, and dely the tools of the most ingenious burglars, and when placed inside of one of our Fire Proofs produce a most perioct Fire and Burglar Proof security. Merchants having large amounts of silver on hand should not be without one.

We also manufacture Patent Combination Bank Locks, and the most modern Bank and other securi-

Lists of sizes and prices mailed on application.

THE TRADE REVIEW.

MONTREAL, FRIDAY, JUNE 22, 1866.

WAR.

THIS country has just had a slight experience of the disturbance to business, the interruption of ordinary pursuits, and the expense which war brings in its train. Had it not been for the filibustering schemes of hair-brained Irishmen, working on the excitable Celtic population of the neighbouring Republic, resulting in the direct invasion of one portion of the Province and the threatening of other portions by masses of armed men, necessitating those measures of defence which have been so promptly and energetically carried out, our Finance Minister would probably have closed the year with a large surplus. It has been estimated that the receipts would have exceeded the expenditure by some \$1,500,000, a most happy and extraordinary state of things for Canada, but we trust not to be as exceptional in future. The calling out of the large force of Volunteers, however, will disappoint our hope of a considerable surplus. The actual cost of the preparations we have made cannot be known until the whole affair is settled-until we fall back into our ordinary peaceful condition,-but it will probably amount to \$200,000 or \$400,000 per month. There are serious sums, and if the expense were continued, not only would our surplus disappear, but a heavy deficit would supervene.

The bravery of our Volunteer force in the first place, the utter disappointment of any hope of a rising in this Province to co-operate with the invader in the second, and, lastly, the measures taken (tardily, but with reasonable efficiency at last; by the U.S. Government, have effectually stamped out that phase of Fenianism which looked to the establishment of a base of operations in Canada. Our Volunteera are now returning to their homes in large numbers, and though a sufficient force will be maintained to guard the frontier, we may consider that the greater part of the expense will be henceforth stopped; and if no further outbreak takes place, we may still have the satisfaction of having a budget presented by Mr. Galt in which the revenue considerably exceeds the expen-

It is evident, however, that we cannot live hitherto as we have done. Our measures of defence must henceforth figure in the Estimates more largely than formerly It will be an abnual outlay We cannot and must not rely solely on the Home Government, though in a matter like the Fenian invasion, which has come upon us solely because the British flag waves over us, it is reasonable that the forces of the Empire should be available for our defence. Still, we must not forget that the sentiment of self-reliance is increasing and developing in the country, and that as we have the privileges appertaining to independence, and are assuming the position of a responsible power

Montreal, June 1, 1866.

United States, the West Indian Colonies, &c), we must bear the burdens of such a position. This the people of Canada and the Lower Provinces are urdoubtedly willing to do. Our course in military matters will undoubtedly be that of the Mother Country and the United States. A comparatively small permanent force is the nucleus of a much larger organization, which can be called out in case of need. We have proved what our Volunteers can do in time of trial, and in dismissing them to their homes, our Government know well that they will be ready at a moment's notice if wanted. We should think that \$500,000 a year would cover the ordinary expenses of such a permanent force as we would require to keep, and if some small increase of taxation is required in order to meet the expense, it would be cheerfully

There is every reason to fear that the nations of Central Europe are actually engaged in conflict at the present moment. Financially considered, it is simple madness for nations like Austria and Italy to rush into Their credit was low, and becoming lower. They could neither of them raiso leans except at ruinous rates of discount. Austria is like an old commercial house which subsists on the credit of its name and is always embarrassed, living from "hand to mouth," and paying high rates for temporary loans Italy is the young and ambitious firm, full of dash and enterprise, but with very little ready money to carry out its schemes; and, therefore, the prey of usurers and Jews. Her expenses very far exceed her income; but for the sake of rounding off her territory, she will incur-a-debt which will enormously outweigh any possible advantage that territory can be to her. But passion and feeling govern the world more than reason, and Italy, Prussia, and Austria are about to plunge into a tremendous conflict on the most trifling of pretexts, the result of which will be incalculable commercial embarrassment and financial disorder both to individuals and to the nations as a whole.

The bearing of all this on ourselves will depend very much on the extent of the conflict. If other nations are drawn into it, (and, no doubt, France will watch an opportunity of accomplishing long-cherished aspirations if the changing phases of war seem to invite her intervention.) then a general European embroilment may be the result. In that case, provisions are sure to be high, and it may come to pass again that the markets of Europe may afford the best outlet for our produce. So far, this will be a gain to us. But a European embroilment may bring about the longthreatened revulsion in the United States. If large quantities of American securities are returned, as they may be, of necessity, from Germany and Englan's and the present drain of gold goes on for some time longer, it is impossible to tell what complications may not arise. If England is drawn into the conflict, the effect on ourselves will be direct. Money will continue tight, no capital will arrive here for investment, credits will be restricted, balances will be called for. and houses that lean on a home support will be embarrassed:

In view of all the circumstances, prudence points to a policy of carefulness and close trimming of our sails, (sending our own Commissioners to treat with the that a storm, if it burst, may not find us unprepared,

THE TARIFF.

THERE is no question that can come before a government which involves so great a variety of contrary opinions as that which relates to the means of raising the public revenue. It is always one which embarrasses a weak government. The absolute necessity of important changes in the present tariff admits of no doubt. It is defective in many respects; it is a burden to commerco-unequal in its distribution, and unsuitable to the present condition of the country. Happily the Government of Canada never was stronger, and, consequently, no Government was ever in a better position to deal with this measure. It may, hewever, be a matter which might as well be loft until after the Confederation of the Provinces, which, from all appearances, will very soon take place. But that need not remove the discussion of the question to a future period; on the contrary, there is no better time than the present for its consideration.

There are two purposes in the policy of a country with regard to its tariff measures, which may justify the principle of adopting a duty on imports as a chief means of revenue to provide for the expenditure of the Government. The first applies to the policy of protecting home manufactures; the second arises out of the inability or impolicy of raising a revenue by direct taxation. The absolute necessity of providing the requirements for the national treasury renders it imperative that some kind of tax must be levied for the purpose. The question then arises, what policy is the best to adopt, taking into consideration the interets of the whole country, and looking to its future as well as its present condition.

The Hon. D. L. McPherson has already introduced the subject of free trade in a speech in the Legislathe Council on the 11th instant. He believed that "the true commercial policy of this country was to reduce the tariff of Customs duties to the lowest pracucal point." The word "practical" here shows that Hr. McPorson entertains reasonable views upon the subject of free trade, and has probably estimated its results upon new countries, as well as the difficulties of adopting a system of direct taxation in Lower Canada.

It is necessary for the political economist who attempts to estimate the results of Free Trade laws to begin his investigation far back in the commercial condition; and in taking into account all the natural benefits which have been derived by a country from their adoption, he must carefully notice the period at which Free Trade has been introduced. It is claimed by its advocates in England, that its triumph is closely connected with the growth of enlightened opinions in reference to the origin and distribution of national wealth; that, as a science, in political economy, it will citimately be the means of raising the social condition of all nations, and uniting them permanently in the arts of peace. That opinions favorable to Free Trade are maturing with the great minds of every nation, and that the remarkable fitness of England to become a seat of manufactures, and the emporium of a worldwide commerce, consecrated her, in the purposes of Providence, to the beneficent task of expounding the principles of Free Trade.

It is all very well for Political Economists of the closet to talk in this way, but there is a practical experience of a higher order to be examined with reference to the commercial history of England. England commanded the markets of the world What had sho to fear from the markets at home? Protection had doze its perfect work; and when it become no longer recessary, she abandoned the principle. It would have been the greatest possible mistake in England to have continued unreasonable prohibitions to her trade after her manufacturing interests had arrived at a high commercial position. The result of her free trade legislation has brought great prosperity and wealth to the nation, and individual relief to the people Bot England was ripe for the change | Early in her commercial history it might not have worked so charmingly. She had the great advantage of first having her manufacturing interests already matured and their tradeconnections secure. A new country is differently situated. It has to deal with the infancy of manufac. tunng industry. It is not one interest alone that is to be considered, but soveral. One of the greatest warces of a country's wealth lies in her manufactaring interests, if the country be naturally adapted to the business. Canada has nearly all the natural advantages which can be required to make her a great manufacturing country. One branch of trade fourishing encourages another, and industry becomes permanent and divorsified, attracting capital

from other countries. The many burdens laid upon American industry by the late war, are securing extraordinary advantages to Canadian manufactures and many articles formerly imported from the States are now exported from Canada, and can be supplied more advantageously by her own manufactures chief thing required is capital, and no legislation ought to shut it out. The manufacturing interests should be, as much as possible, extended. progress has been made the past two years in cotton, woollen, wood, iron, nail, and other manufactures in Canada. The advantages which those engaged in the business have at present over manufacturers in the States are great. Canada is comparatively free from the fearful tax burdens which rest on American manufactures. There will probably noveragain be so favorable an opportunity for Canadian manufactures to compete with American in the markes of the West Indies, and any encouragement which can be offered consistent with the true interests of commerce, will bear good fruit.

Absolute free trade (and by this term we mean the abolition of Customs Duties, and a resort to direct taxation) will not produce more demand for the products of the country than will exist without Foreign nations will buy what they require, whether their goods are entered free or not, and the money which would be sent abroad is kept at home to support manufactures which, also, by and by, lend their important support to agriculture. If absolute free trade should take place in Canada, and leave her without manufacturing interests-wholly an agricultural country-we might look for periodical revulsions and disasters whenever there was a low market for her products in foreign countries. Her sources of industry not being diversified, the agricultural interest would have no home support, and would be subject to a competition with the whole of Europe and the United States in the supply of breadstuffs to England. At the present moment, absolute free trade would be temporarily advantageous to Canada. The illicit business with the United States would be profitable; but the great future is to be looked at. The wealth of nations depends not so much upon the products of her labor as upon the diversity of the products of her laboring classes. There is a reciprocity of industrial interests within every country, the nice balance of which makes her permanently prosperous; and without which her prosperity is only occasional. The closet political economist who argues on great acknowledged principles, forgets that those principles are not applicable alike to all countries. If, in Canada, the manufacturing interest be stricken down, the only inducement to foreign capital for investment is removal.

Whilst holding these opinion, we believe the nearer a country can approach to free trade the sooner she will arrive at the greatest source of her wealth. But it must be remembered that she has first to be in a sufficiently independent condition for its adoption. There is a wide difference between reasonable revenue customs duties, and prohibitory, or high protective tariffs. The former are not inconsistent with sound political economy; the latter are ruinous to the commercial interests of a country. Whilst every tacility should be offered to the introduction of the new commercial relations expected through the negotiations of our Commissioners, and, as Mr. Mc-Pherson remarks, "it should be our endeavor to make Canada as cheap a place to live in as possible. it must yet be considered in how far absolute free trade would be justifiable with regard to the manufacturing interest of the country; and how far direct taxation is practicable with a people to whom, hereto fore, the tax gatherer has been invisible.

Mr. Mcl'herson did not advocate the rushing into sudden and violent changes, but he desired to recommend reduction of duties to the Government as the policy to be hereafter kept in view, and in this he is perfectly correct, but when he speaks of a "speedy approach to perfectly free trade," the soundness of the nolicy is not quite so clear The attempt at present would embarms the Government very seriously. Direct taxation, though really the only just and equitable means of raising a revenue, must be a gradual work. The ideas of the French habitant are not prepared for it, and the best interests of the country, with rogard to the means of raising the revenue appear to lie in a well-balanced apportionment of tax on imports through the tariff; and a direct tax on real and personal property, assisted by the revenue derived from forests, the public domain, and the other sources usually drawn upon.

Our view, then, is that, for many reasons, we can-

not for the present, perhaps not for many years, in Canada, abolis's the Customs Tariff, and get a revenue from direct taxation, but we do think it would be a great advantage for all interests, commercial, agricultural, and manufacturing, to taske a considerable reduction of the present tariff-so as to make Canada a cheaper place to live in.

BRITISH IMPORTS.

I the following summary of the declared value of imports, each country is placed in the order in which it ranks according to the magnitude of the suppiles it has sent. The total shows a slight diminution from that of 1864, owing entirely to the reduction in value of the cotton consignments from India, which has caused a heavy falling off in the aggregate amount of imports from the British possessions, while in the quantities of goods taken from foreign countries there has been a considerable increase. The United States. which formerly stood at the head of the foreign list. but which in the previous year declined to the seventh place, have now partially recovered their position, although they are still below France and Egypt .-

IMPORTS FROM POREIGN COUNTRIES AND BRITISH possessions during the years 1864 and 1865. 1865.

SPARE OUR FAMILY HOMESTEADS!

THE legislation of Canada regarding debtors has not always been either of a liberal or enlightened character. There has been, and is still, too much of a disposition to regard business failure as the crime of the individual who fails. We are free to admit that this is too frequently the case; and whenever such an instance occurs, it deserves all the punishment which the law enacts. But many an honest man fails where a rogue succeeds, and in such cases failure should be regarded as his misfortune, not his crime. When a man fails in Canada, there has always been too strong a feeling on the part of the community to "keep him This was very manifest in the great difficulty down." there was met with in getting the Bankrupt Act passed through Parliament, and it drove many enterprising Canadians to the United States, who, overtaken by the commercial crisis of 1857, had been reduced to poverty. This is not the path of wisdom, The true policy is: to punish the dishonest insolvent, but to assist the unfortunate and honest, so that they may have a chance to regain the position from which unfortunate circumstances have deposed them.

We have now got our Bankruptcy Law, which, in spite of some needed amendments, is doing much good for Canada-but there is another Act, the adoption of which, we think, will tend to add to the attractions of Canada, and build up and consolidate our population-we refer to a Homestead law. What could be a more painful sight than to see-as we not unfrequently do in Canada-families turned out of the homes they have owned for years, or perhaps built and beautified, expecting to spend the remainder of their days therein? In some cases, where they have to deal with a hard-fisted creditor, the family of the the unfortunate debtor is driven forth into the world without a roof to shelter them! Did this painful trial always come upon families by their own misconduct, commiseration would not be so strongly appealed to. But how frequently does it arise from circumstances over which they have little or no control. It may arise from an unsuccessful business speculation-from the dishonesty of a partner or endorsing for a friend -from the drunkenness or folly of a husband-or from a hundred other causes. But from whatever cause how painful thus to see the happy homes of a country broken up, and their inmates driven forth into the streets to begin life anew?

This is the aspect of the case as it affects families but it has also its effect upon the public welfare. We are yearly spending large sums to attract immigrants to our shores. How many are there of Canadians who, thus deprived of their home, are lost to us as inhabitants and producers? Every year witnesses the departure of some Canadian families to the United States, and, in many cases, had they been secure of a home under the Homestead Law, they would still have been in Canada, by their labour assisting to add to the wealth and prosperity of the country. A loss of one such family is not made up by the accession of many new and inexperienced settlers. It is sometime before a foreigner is of much service in America, and a native, who is acquainted with the ways and work of the country, is far more valuable as a citizen.

There are some arguments both of self-interest and of humanity, in favor of enacting a good Homestead Law, under which families may always be certain of retaining a comfortable house to shelter them. The question next arises, what would be a good Act of this kind? And here, we admit, some difficulty may be experienced; but none, we are certain, that our legislators could not readily overcome. Such a law requires to be very carefully drawn, so that justice may be done to the creditor, and any attempts at fraud frustrated. But the Bankruptcy Act was more difficult by far to draw up than this one would be, and it would be a sorry compliment to our lawyers to suppose that there are none of them equal to the task.

Without much careful study and consideration, it would be impossible to point out all the provisions which such an Bill ought to contain. But as a rough outline, we may give the following: 1st. No person should be allowed to take advantage of the Homestead Law unless his property was unincumbered, and the person perfectly solvent when coming under its provisions; 2nd. No house should be protected to a greater value than \$1000 or \$1200; 3rd In cases of insolvency, when the Homestead is worth over the amount stated, it should be sold, and whatever more is realized should go to the creditors; and 4th. No property should come under the provisions of the Act unless registered in the public records, so that every

person could ascertain its position. These are but a few of many provisions which would be necessary, but they may give the reader a rough idea of what the writer thinks such a law should be.

The injustice of such a law to creditors is frequently urged against its enactment. We do not think this a fatal objection by any means, for the creditor could easily have ascertained the position of the debtor's property, and could have refused him credit. And it is on this very question of credit where, we apprehend, one of the main advantages of a Homestead Act would be felt. Nothing is more baneful to business at the present time than the indiscriminate system of giving credit which obtains. Wholesale and retail dealers alike suffer from it .We are assured that a Homestead Law would give the credit system a heavy blow. It would render business men more cautious in giving credits, and it would necessitate the adoption of the system of cash payments to a greater extent than ever introduced before. This would be a most desirable result. But whether this end were attained or not, we cannot see much, if any, injustice to the creditor, from the operation of such an Act, when he can readily ascertain the position of the party applying for credit, and can either decline or agree to enter into transactions with him.

We believe the Homestead Law is working well in the neighboring Republic, and it is a well-ascertained fact, that in the eyes of European immigrants it is regarded with much favor. To those born in America, who have never known what it is to be without a home, this matter may not seem of much importance, but to the down-trodden son of toil from a foreign land, who expatriates himself to better his circumstances in life, the possession of some place which he can call by the sweet name of "Home,"-which cannot be taken from him and his family except he voluntarily relinquish it—is a matter of vital importance. We owe it to Canada, that she should offer as great inducements in this respect as the United States: so that no attraction may be lacking which will serve to turn the human tides of population in this direction. We need accessions to our population more than anything else, to increase our country's prosperity, and a Homestead Law, such as that we have endeavored roughly to sketch, is one of the means by which we can best attain this result.

Some years ago a Homestead Act was submitted to Parliament by some enterprising member. Either from the deficiencies of the Bill submitted, or some other cause, it did not become law. We hope, however, that renewed efforts will be put forth to secure its enactment. Objections, and plausible ones too, may be urged in opposition to it. But we feel convinced that any temporary evils which might occur in placing it upon our Statute-book, would soon be forgotten amidst the good effects which it would produce.

THE COMMERCIAL CODE OF SIGNALS.

THE adoption by the French Government of the Commercial Code of Signals, and the publication of a Code List of vessels, with signal letters appropriated, has been followed by a most important step, which, there is little doubt, will result shortly in the general adoption of the Code by all Maritime States. Soon after the publication of the French Code and Official List. Her Majesty's Government opened negotiations with the Government of France, with the object of coming to some arrangement for bringing the advantages of the Code under the consideration of the Governments of the various Maritime States, in the expectation that its merits, as a means of international communication, being once fully understood, the general, if not the universal, adoption of the Code will follow. We are happy to be enabled to state that these negotiations have been entirely successful, and that the hearty co-operation of the French Government in this great work has been secured. The plan suggested by Her Majesty's Government was simply to submit to the French Government the draft of a note, addressed, through Her Majesty's representatives abroad, to the Governments to which they are accredited, setting forth the fact of the adoption of the Code by the French Government, its cosmopolitan character, and the benefits it is calculated to confer upon all Maritime States who may see fit to adopt it. In order that the Governments addressed on the subject might the more fully understand the manner in which the Code can be brought into general use, the note in question contained a brief sketch of the regu-

lations which the French and English Governments are agreed would most facilitate that object—that each Government, after having decided to adopt the Code, should agree to translate and publish it; that, in the case of countries in Europe having a common language with countries out of Europe—as in the case of Portugal and Brazil, and of Spain and the South American Republics—there should be a mutual understanding for the translation of the Code into that language: that the Governments adopting the Code shall each undertake to exercise a control over its publication, so as to ensure that the signals and their significations are exactly conformable to the French and English editions, and, lastly, that each Government shall prepare and publish an Official List of National ships of war and merchant vessels, assigning to each vessel her signal letters, on the principle of the Official Lists of vessels already published in England and in France. It is satisfactory to be able to state that this mode of placing the Commercial Code of Signals for the Use of All Nations, and its advantages, before the Governments of Maritime States has been cordially acquiesced in and freely adopted by the French Government, and that there is every prospect that the joint invitation issued by France and England will be promptly responded to, and issue at an early period in the general adoption of the Code. The identical note as agreed upon has, we believe, been addressed to no less than nineteen European States-namely, Austria, Russia, Prussia, Denmark, Spain, the Roman States, Greece, Hanover, Italy, Mecklenburg, Oldenburg, the Netherlands, Portugal, Sweden and Norway, Turkey, and the Hanse Towns. To the Spanish and Portuguese Governments will be confided the task of procuring the assent to the principle of the Code of the Governments of the South American Republics and of Brazil, as the opportunity may be afforded for doing so. It is proposed to address a special note to the Government of the United States. No doubt a communication on the subject with the Government of Washington is extremely desirable, but the subject of the Commercial Code will not be introduced as a novelty to any American Government. The Commercial Code of Signals has been for some years in use in the Mercantile Marine of the States. Large numbers of copies of the Code have been supplied from this country; and we have before us an order from the Navy Department of the States, dated as long ago as February, 1860, addressed to the Commandants of Navy-yards, directing that the Code should be put on board all ships in the American Navy; and, but for the outbreak of the Civil War in the States, there is no doubt the Code would now be in general use both in the Commercial and Military fleets of the Union. The facility with which the Code can be adopted in America is obvious. No translation is required, and it is only necessary that the American Government should prepare an Official List of ships, appropriating to each vessel her signal letters, in order to turn the Code to account so far as the shipping of the States is concerned.

Thus we seem to be on the eve of securing the general assent of Maritime States to the adoption of the Commercial Code of Signals. The readiness with which the French Government have entered upon, and so far carried out, the suggestions of the British Government to secure this object, affords the best proof of the confidence felt by the Emperor and his advisers in the system, if that confidence had not been already displayed in the unreserved adoption of the Code for both branches of the French Marine, and for all the Semaphore Stations. We shall look with much interest, but with no misgivings, for the replies of those Governments to whom the above-mentioned note has been addressed. We are quite sure that the Commercial Code of Signals affords the only existing means of communication at sea between the ships of all nations, for the simple reason that it is the only system the letters or signs of which are convertible into equivalents in all the languages of civilisation. It is, indeed, designed for what we have no doubt it is destined to become-a "universal language of signals." The course adopted by France and England acting together will assuredly hasten that desirable consummation. Each State will recognize, in the means which the Code affords of communicating with other flags at sea, or with the telegraphic stations at foreign ports, a present substantial advantage, and one which will lead to still more desirable results, in extending the area of commerce, and increasing the intimacy of international relations .- Mitchell's Maritime Register.

THE ELECTIONS IN NEW BRUNSWICK.

THE question of a Confederate Union of the British North American Provinces appears to be decided by the elections in New Brunswick. This result has been long and anxiously expected by many of the statesmen of these Provinces and of England; and it is to be hoped that the plan of Confederation, which affects so many general interests, will receive judicious consideration without regard to local projudices in all cases where they militate against the general good. It was to be expected that important changes, such as contemplated under a constitutional union, which might hazard the influence and emolument of some leading men of the Provinces, would meet opposition. It is quite possible, too, that that opposition may have arisen from other considerations. Those who have opposed Confederation may have been actuated by upright intentions, arising out of preconceived jealousies and fears. The influences which tend to bias the judgment are numerous and powerful, and men are often found honestly upon the wrong side of every great question, as well as upon the right. It is, therefore, wise and prudent, as well as just, to consider this point in the future discussion of the question, and not to suppose that ambition and avarice were alone the motives which influenced the opposition.

We should say that an esteemed correspondent in New Brunswick thinks there is yet a great deal to do, before a real union takes place-something which will require the best energies of the best men in the Provinces. Our correspondent adds:-

Provinces. Our correspondent adds:—

"The Confederation will exist actually only on paper, until we have the Intercolonial Railroad Nothing could satisfy the people here, who are anxious for union, so much as the speedy commencement of that road. Make a start on the line in two or three of the richest parts of the country. This would open up our good lands for settlers; would give us plenty of ship timber, which we want badly; and, above all, would bring a large accession to our population. Trade would be brisk (at any rate for a time) through the expenditure; and the Confederation on paper would give promise of a real union. As long as the people in the respective Provinces have to communicate with each other over American territory, and to receive their freight, almost compulsorily, in the same manner, it cannot be expected that they will feel as if their interests were identical. But let that road be open, communication would be frequent and free from restrictions, and the realization will soon come that we are one people from Halifax to Sarnia."

AFFAIRS ON THE CONTINENT.

HE step taken by Austria in convoking the Estates of Holstein will doubtless have the effect of precipitating the war. Nay, more, it is not improbable that it is with this express object that this measure has been adopted. Austria is naturally anxious to hasten a struggle which she rightly regards as inevitable, whilst at the same time she desires to throw upon Prussia the odium of striking the first blow. However inconsistent with the spirit or the letter of the Gastein Convention, the convocation of the Holstein Estates may be, it is not such an act as should excite the hostility of Prussia, if that power were desirous of loyally carrying into effect the declarations so frequently made by her during the Dano-German war. It was to give political liberty to the inhabitants of the Duchies that Prussia and Austria secured Schleswig and Holstein from Denmark, and the enjoyment of political liberty necessarily implies parliamentary government. It was on the appeal of an oppressed nationality that the great German powers took up arms, and it would therefore seem the most natural thing in the world that the liberated population should be permitted to have a voice in determining their own future. When Austria, therefore, convokes the Parliament of Holstein, she adopts a course which ought not properly to give umbrage to her co-partner. That it would do so, no one, however, could doubt, and least of all the Austrian Government. Prussia, as all the world now knows, never meant to give the Duchies the independence for which they longed, but by the step which she has now taken Austria throws on Prussia the onus of beginning a terrible struggle with the ostensible object of preventing a consummation which Europe was assured would prove the result of the Danish war. Austria desires to place her opponent as much as possible in the wrong.

It is scarcely necessary to remind the public of the relative positions occupied by the two Great German Powers in respect to the Duchies. By the treaty concluded at Vienna in the autumn of 1864, the King of Denmark ceded absolutely to the two Powers, the Duchies of Schleswig and Holstein, and the latter thereupon became jointly vested with the same rights

as those previously possessed by the Danish King. A species of joint Provisional Government was thereupon established, and Austrian and Prussian officials co-operated in managing the affairs of the united Duchies. Subsequently, however, a different arrangement was made, by which the two Powers shared the spoil, the Duchy of Schleswig being assigned to Prussia, whilst Holstein became the property of Austria. This was the basis of the convention concluded at Gastein, to which reference has recently been so frequently made, and which it is now alleged has been violated by the act of Austria in convoking the Estates of Holstein. By this convention the two Powers formally recognised the fact that they had become the possessors of the Duchies by right of conquest, and as such had an undoubted right to dispose of them at their pleasure. But by the terms of the same convention, as also by those of a previous one entered into before the commencement of the Dano-German war. it was stipulated that neither of the Powers should act independently of the other in any matter affecting the future disposition of the Duchies, and that the question of succession should be settled by common accord. Austria, it is now said, has violated these stipulations, and the result, according to the Prussian view, is that the Gastein Convention has been rendered void, and the contracting parties replaced in the status quo occupied by them under the Treaty of Vienna. Under this treaty the two Powers were, as we have seen, the joint possessors of an undivided territory, entitled to exercise everywhere co-ordinate jurisdiction. In conformity with this view, it is understood that the Prussian Government have instructed the general in command of their forces in Schleswig to re-enter Holstein with a portion of his troops, and, at the same time, to afford to the Austrian Commander-in-Chief the opportunity, if he should so desire it, of occupying cantonments in the Duchy of Schleswig. It is impossible to doubt that the Austrians will refuse to permit the Prussians to re-occupy Holstein, and it is therefore not improbable that the first blow in the impending conflict will be struck in that Duchy.

It is needless to say that Austria has Germany, that is to say, the German nation considered in its collective capacity, on her side. She is willing to give the Duchies that independence which they desire, and which they hoped to secure when they protested against Danish rule. Placards have been posted throughout Holstein inviting the people to assemble and declare their wishes, and it is not necessary to add that this invitation has originated with the Government. Whatever it may be the Holsteiners desire. it most assuredly is not annexation to Prussia, and Austria, therefore, hopes to secure a certain moral support from her new subjects, which, in the event of a war between different sections of the German nation, will not be without considerable weight. Austria, of course, cares just as little about the feelings of her new subjects as Prussia, but, under existing circumstances, she loses nothing by taking them into consideration, whilst she gains a great deal. The convocation of the Estates, and the invitation addressed to the masses, whilst she gains a great deal. The convocation of the Estates, and the invitation addressed to the masses, are consequently trump cards, which have been very judiciously played. In the Diet, Austria has become practically supreme. But, on the other hand, one cannot avoid feeling that the Prime Minister of Prussia fully anticipated and made adequate preparation for the measures which Austria has taken. He has the satisfaction of feeling that the Conference has not met, solely owing to the refusal of Austria to entertain questions whose solution was hopeless, and he knows that some pretext, if not justification, has been offered to Prussia for commencing hostilities by the course taken by her great rival in Holstein. When a Power has fully made up its mind to go to war, it is always a point gained when the adversary is driven to do something which is provocative of hostilities. Count Bismarck knew that the Conference, even if it had met, would be barren of results, but he is, on that account, the better satisfied that its deathblow has been struck by Austria. War is now inevitable, and its commencement cannot be far distant. The combatants are fully prepared, and nothing remains but for the most impetuous of the three to strike the first blow. Before that conflict terminates, who shall say what additions may not be made to the present number of belligerents!—London Morning Post.

Smuggling Operations.

Notwithstanding all the precautions taken by Brother Jonathan to prevent smuggling, there can be no doubt that illicit trade is constantly being carried on. Under the extremely high tariff of the United States, the temptations to smuggle are so great, that the wonder is, not that their revenue laws are defrauded, but that attempts to defraud them are not more numerous than they are. One of the largest and most ingenious attempts of this kind, recently came to light | higher figures ruling for some time to come.

at Cleveland. the principal in the operation being Dr. Stephen Griggs, a Detroit citizen. It would appear that the latter bought in Canada \$3000 worth of whiskey and alcohol. He then engaged an unscrupulous American skipper to take a cargo from Detroit to Cleveland. A certain amount of cargo was then taken on board, a manifest made out, and a clearance regularly obtained. At our Canadian town Malden, however, the schooner stops and takes on the whiskey and alcohol, proceeding to Cleveland, as if direct from Detroit. This was certainly a very cunning trick to deceive the Customs officials. However, it did not succeed. Some one "peached," and the Doctor and his confederates have been arrested, and will, doubtless be heavily fined, if not imprisoned. The American officials are very zealous in endeavoring to prevent smuggling, but the captures which almost weekly take place, indicate that many "contraband" articles must pass across the lines duty free. We are gratified to believe that these frauds are almost, if not entirely, committed by American citizens, and that our people give them no countenance whatever. We trust our good name in this respect may long be preserved.

London Trade Sales.

JUNE 6th. 1866.

London Trade Sales.

June 6th, 1866.

Sugar—At to-day's auctions there was a very steady demand, and the following sugars chiefly found buyers at firm prices, viz:—400 hhds 50 tierces Barbadoes, 29s to 34s; 106 casks 100 bbls St Lucia, 28 to 29s 6d; 26 hhds 500 bags crystallized Demerara, 31s 6d to 34s 6d; and 200 bags Natal, 24s to 31s; 116 boxes Havanna, low to middling soft yellow, were bought in at 31s to 32s 6d. Of West India the sales, including those at auction, are 1,400 hhds. Since the close of last week two floating cargoes Havanna are reported—viz, 3,600 boxes at 23s, for the United Kingdom, and 2,200 boxes at 23s 3d, for a near port. Also one of 370 cases 459 bags Bahia, for the United Kingdom, at 19s. Privately, 120 hhds Porto Rico have been taken at 31s per cwt.

Tra—First Day Sales—The above comprised 16,394 packages, assorted as at foot, of which 12,939 packages were printed "without reserve." About 7,000 packages were brought forward to-day, of which 5,560 found buyers, all being offered "without reserve." The sales generally have proceeded heavily, the better grades of common black leaf Congou being realized at easier rates. Several parcels of common to fair black leaf Congou sold from 1s to 1s 3d per 1h. A mark of uncoloured Japan, with all faults brought 1s 34d to 1s 44d per 1b, being a full price. Packages offered:—Congou, 7,827; scented Caper, 1,576; Oolong, 1,502; Souchong, 296; flowery Pekoe, 1; scented orange Pekoe, 2,024; Hyson, 291; Imperial, 101; gunpowder, 1,287; sorts, 103; dust, 946; Assam, 85; Japan, 355—total, 16,394 packages.

Coffee The market to-day was quiet, and prices in the control of the sales of the sales general to the

sorts, 108; dust, 946; Assam, .oo; Japan, .co., 16,394 packages.

Coffee—The market to-day was quiet, and prices irregular. The sales comprised 315 casks, 86 barrels and bags plantation Ceylon, the whole of which found buyers. Low middling to good middling, 78s to 80s 6d; and 16 casks 100 bags, low to good ordinary native at 54s to 58s per cwt.

Rice—3,700 bags Necranzie have been taken at 10s

Winks, George, & THE expectations entertained of an improvement in this line of business, so far, have not been fulfilled. and we have to report another week of very great inactivity. The sales made up to this date for the month of June will fall below those of corresponding time last year to a considerable extent; but this, it is unnecessary to say, is attributable mainly, if not entirely, to the very unusual events which have occurred in the three weeks which have just closed. All through the country, in the interior as well as on the frontier, storekeepers and their clerks have been more or less personally engaged in military duties at home or at a distance, their customers were similarly employed. and buying and selling and getting gain were matters of quite secondary importance. Now that the danger of invasion appears to be over, we hope to see a differ ent state of things obtain, and commerce settle back into its normal state. As might be expected, remittances have come in less freely than heretofore, and it may not be easy to make collections through the country for a few weeks to come.

In Liverpool the price of Cotton has advanced, and the tone of the market is firmer, notwithstanding the continued accumulation of stock there. The advance in manufactured goods in Manchester has been still greater, and there appears to be every probability of

THE LEATHER TRADE,

Brown & Childs. K. Dougall J. & Co. Se. Hus & Richardson. Shaw F. & Bros.

Kirkwood, Livingston & Co Seymour, C. E. Seymour, M. H.

THERE has been a marked improvement in business since our last report, and sales to a considerable extent have been effected of curried leather, with a much more active demand for seasonable stock. Receipts, especially of desirable descriptions, have been to a comparatively limited extent.

SPANISH SOLE .- The local demand is not equal to the supply, and we hear of shipments to Liverpool of low grades. Prices are unchanged, though less firm.

SLAUGHTER SOLE .- Light weights are overlooked, but there is some enquiry for medium and heavy.

HARNESS .- The demand continues good, and with a light supply in market, prices are well maintained.

WAXED UPPER is in light demand, consumers having already supplied themselves to a considerable extent; but small receipts prevent any reduction in prices.

GRAINED UPPER is more inquired for, and with improved receipts, sales have been made to a fair ex. tent.

BUFF AND PEBBLED.—There is no particular demand for any but choice stock, of which larger sales have been effected.

PATENT AND ENAMELLED are quiet and without demand, but without any surplus stock in market.

CALF SKINS .- The receipts have been of small par cels of medium stock, which have been disposed of at about our quotations. There is very little prime to be had.

SPLITS.—The supply is considerably reduced at present, large sales at fair prices having been effected.

SHEEP SHINS.—There is a good demand for all kinds, which has caused a marked reduction in stocks. HIDES are scarce, and held only in small quantities. City Slaughter have advanced half a cent.

Wood.-We can hardly give quotations, as the market is quite unsettled, and no rates as yet established for the new clip. Farmers are reported as holding for higher prices than are at present offered.

THE HARDWARE TRADE.

Hall, Kay & Co. Ireland, W. H. Kershaw & Edwards. Morland, Watson & Co. Mulholland, & Bakor. Robertson, Jas. Round, John & Sons. Simms, F. H. Winn & Holland.

WE have to report a good deal of activity in Shelf and Heavy Hardware during the past week. The demand for arms and ammunition especially, for a few weeks past, has been stimulated to an unprecedented extent, and large numbers of rifles and pistols of all the improved makes have been sold both to the Government and to individuals. Consequent on the failure of all the Fenian plans of invasion, and the return of the ordinary feeling of security, this demand has fallen off considerably, and in some instances prices of firearms have been considerably reduced.

BLOCK TIN is unchanged. The stock now in market is limited, but further supplies are on the way, and to arrive, sales would be made slightly below our quota-

COPPER quiet and unchanged.

CUT NAILS .- The supply still continues unequal to the demand, but prices have not advanced.

IRON.—The market for P/g is in a very unsettled condition, and quotations are to some extent nominal. Round lots for cash, ex ship, have been sold below our figures, and there is still some being pressed on the market. Bar is in good demand, and the assortment being pretty full, sales are made to a considerable amount.

TIN PLATES are lower, and the market is now well supplied. Sales have been made at inside quotations.

BUSINESS in this line during the past week has consisted mainly of Trade Sales of Teas, Sugars, and General Groceries. The attendance at these sales

has been fair, and in one or two instances quite good. The bidding has not been very eager, but, all things considered, prices, though materially below the views of sellers, have been about as good as could reasonably be expected. Below will be found particulars of the different sales :-

Groceries, &c., for account of H. Routh & Co. J. G. Shipway, Auctioneer:

Shipway, Auctioneer:

50 tons blue paint, 4s 9d; 30 do 5s; 50 do, 5s 3d; 40 do green paint, 4s 9d; 50 do black do, 4s 9d; 30 do, 5s; 3 cs borax, 13e; 10 do bi-carb soda, 6;e; 10 do Bordenıx olive oil (qts), 13s 9d; 30 do do (pints), 18s 3d; 11 bles maccaroni, 11e; 4 do vermicelli, 11 to 11;e; 40 bgs filberts, 7;e; 30 cs sardines (qr tins), 13e; 15 do curnacoa, \$8\frac{1}{2}; 5 cs fruits in syrup, \$5\frac{1}{2}; 15 do capers, \$2; 3 hlds Bordeaux vinegar, 35e; 10 qr-casks do, 36e; 24 do do, 35;e; 25 bbls new currants, 5;e; 10 lif-chts; young hyson tea, 69e; 15 do twankay, 33e; balance withdrawn; \$6,10; 20 cs do, \$7 to \$7\frac{1}{2}; 3 hlds vine grower's brand, 6s 9d; 4 cs pale sherry, 4s; 25 cs Holland gin, 11s 9d; 15 do red cs, \$4\frac{1}{2}\$ to \$\frac{1}{2}\$ to \$\frac{1}{2}\$ qr-cks gin, 4s 6d; 20 h'-chts damaged twankay tea, 18 to 22e; 10 do do young hyson, 30 to 37e.

MONEY MARKET.

MONEY is in good demand, and is less easily obtained than heretofore. Sterling Exchange has declined, and may now be quoted at 1081 to 1091 for bankers' 60 day drafts.

GOLD in New York closed at 1491, after some extreme fluctuations caused by the tenor of the foreign news, the highest point touched having been 170.

SILVER here is abundant, selling at 41 to 41, and buying at 41 to 41 per cent discount.

ITTLE movement or speculation during the week firm and buoyant, with a fair amount of business at somewhat advanced prices. Grain of most kinds is dull, and for Pease considerably lower rates have been accepted. Provisions since the close of the Commissariat demand, has been very quiet, and sales of Pork at a considerable decline have latterly taken place. Butter for the time being is quite neglected, though offered at a decline of fully a cent on late rates. Ashes-Pots, though arriving sparingly, continue to decline, owing to unfavorable advices from Britain. Pearls are scarce and command full rates for the American markets.

FLOUR .-- The arrivals of the week have been small, giving indications it is thought of failing supplies of Grain in the milling sections of Western Canada, this, added to the combined high rates in the Western States, has caused more firmness and buoyancy here Little has been done in the higher grades, the extreme prices limiting purchases to the merest retail. A fair amount of business has been done in Supers, some round lots from Western Wheat changing hands at gradually improving prices. We quote \$6.60 to \$6.75 for fair to best samples, outside rate being still the extreme for strong parcels. No. 2 and lower grades have also met a fair demand, but much of what is offered is of very inferior quality, and buyers show much care in what they select. Many samples are found mixed with Pease, Corn, or other foreign substance, and as such will in no case pass inspection; they are most difficult of sale, and when got into use even at comparatively low prices, the complaints from consumers are endless, and some transactions have been cancelled altogether.

BAG FLOUR-Though the demand has been on a restricted scale, the small receipts have caused prices to rule firm, and for the few parcels of strictly good offered, satisfactory rates have been secured. Much, however, of what has been offered is deficient both in strength and colour, and but for scarcity would be entirely neglected: ruling rates at the close are \$8.55 to \$8 65, and for the choice parcels \$8.70 has in exceptional cases been secured.

OATMEAL. -The better samples meet a fair though more restricted enquiry for export, but inferior qualities are most difficult to quit.

GRAIN.-Wheat continues nominal in the absence of transactions Pease, owing to adverse British advices, are very dull and lower, latest sales affoat being at 84 to 85c. per 66 lbs. Oats are also dull, but without material decline.

PORK is very dull; transactions being of the merest retail. There are no wholesale parcels offering. Stocks are unusually light, and holders are mostly centent to await enquiry, as any attempt to press sales would only result in depressing prices, and rendering sales, at present nominal rates, more difficult when the demand again arises.

LARD is dull and drooping; receipts are small, but the local consumption is trifling, and there is at pre sent no shipping demand.

TALLOW is steady at about former rates. Receipts are light, and what comes forward finds ready sale at 9g to 10c.

BUTTER has again been extremely dull; the Lower Port orders being now about filled for the present, and the city demand amply supplied by the neighboring farmers on the market, stocks are accumulating and prices declining. Shippers to Britain are holding off; as Provisions of all descriptions are declining in the Liverpool and other principal English markets, they hope to see prices fall to a point at which shipments may be made with a margin for profit.

The quality of the Butter, thus far, shews an improvement on last year; and although it is an oft repeated tale, we cannot refrain from urging upon all concerned in the Butter manufacturing and packing of Upper Canada, the absolute necessity of care in handling, so as to produce the best article possible. Such an article, in fact, that will, whatever the state of the market, command a sale at the best price of the day, be it high or low.

ASKES.-Pots have continued to droop throughout the week, owing to unfavorable advices from Britain,

caused, mainly, by the financial panic; even the near prospect of war on the Continent has failed to give any life to the market. Stocks and receipts are both smaller than last year; but it is evident that the demand for our alkalis has materially fallen off, and been supplanted by the muriates and other substitutes which come in at a much cheaper rate. This is especially the case with Inferiors, which are almost unsaleable. Pearls are steady at quotations. Stocks and receipts very light.

JOHN McCALL & CO.'S CIRCULAR.

GLASGOW, Friday, 1st June, 1866.

'HE arrivals from abroad in the last three weeks have been liberal, consisting of 3556 qrs. Rye, 2768 qrs. Pease, 8338 qrs. Oats, and 2597 qrs. Indian Corn from Montreal and New York, 1312 qrs. Wheat, and 9750 sacks Flour from France, 4811 qrs. Wheat, 5538 qrs. Barley, 8666 qrs. Oats, and 1477 qrs. Indian Corn from the Adriatic and Mediterranean; and 8071 qrs. Wheat, 1991 qrs. Barley, 2200 qrs. Oats, 1205 qrs. Pease, and 1796 qrs. Beans from the Baltic and Danish Ports; coastwise and by railway, 3935 qrs. Wheat, and 14,651 sacks Flour have come to hand.

The weather has been changeable, alternating in genial temperature and cold harsh winds, the latter prevailing. The season is backward, and rain is much wanted for grass and Spring-sown Corn.

The activity in the trade noticed in our last has been checked by the stringency in money matters, and the hopes entertained that peace may yet be maintained on the Continent. The price of Wheat has varied little, but buyers latterly have acted very much on the reserve, having previously purchased pretty freely. Indian Corn has met a fair sale of 17s 8d to 17s 6d per 230 lbs., and Fesse have declined in price upon diminalshed demand. have been liberal, consisting of 8556 qrs. Rye,

AT THIS DAY'S MARKET the trade was quiet, and the business done in Wheat and Flour was of an inerest retail character, at about previous rates. Red American Spring Wheat may be quoted 23s 6d to 24s per 240 lbs. Dats 6d per boll lower for feeding qualities, Canadian 19s 6d to 19s 9d per 264 lbs. Peus a slow sale at 22s 6d per 280 lbs. Indian Corn in fair demand at 17s 6d per 280 lbs for mixed.
