Governor-General Discusses Grave Situation Arising From Disunion in Canada---Last Effort Made to Avoid General Election Unlikely to Succeed.

TTAWA, Aug. 9.—An important conference took place at Rideau Hall today, which may have a direct bearing on the political events of the immediate future. Sir Robert Borden, Sir Wilfrid Laurier, Sir George Foster, Baron Shaughnessy, Sir Lomer Gouin, Sir Clifford Sifton, Archbishop Mathieu of Saskatchewan, formerly head of Laval, and Hon. George P. Graham had luncheon with the Duke of Devonshire, and the purpose of the gathering was to discuss the serious situation that faces the country as the result of the attitude of the Province of Quebec, not only to wards conscription, but also towards the general question of participation in the war. There is a new danger in the situation. The new menace which is becoming apparent is the attitude of other parts of Canada towards Quebec. The attitude of Quebec towards the war is engendering a hostility towards that province elsewhere which may be difficult to curb, particularly after such an incident as the attempt to take the life of Lord Athelstan in

Pellowing this, of course, there arose the question of the formation of a union war government, with pr'tical affiliations eliminated.

The suggestion was also made that the conscription measure might not be put into effect until Quebec had had

Terrain conditions in Flanders, made more difficult by the rains of the past ten days, are such that without the destruction of enemy defences by artillery fire, it is nearly useless to throw forward infantry attacks. There are indications that the Anglo-French guns of all calibres are engaged in leveling the German defence positions. The German general staff reports the artillery fire in Flanders as very great, and says it has been especially heavy on the Belgian front from Bixschoote to Holle-

beke. The latter sector takes in most of the important Ypres salient. Except for local raids by the French, there has been no infantry activity on the long line from St. Quentin to the Swiss border. The French and German guns, however, are hammering the opposing lines along the Aisne front, in Champagne, and on both banks of the Meuse in the Verdun

Improper Packing of Charge Prevents Loss of

Montreal. Aug. 9.—An attempt was made at dawn today to blow up the country residence of Lord Athelstan, at Cartierville, ten miles from Montreal. A charge of dynamite was placed under the lower balcony. The explosion shook the whole construction, wrecked the corner and snashed sixty panes of glass. The household at first thought a cement plant on the opposite side of the Back River had blown up. Ford Athelsian's room was on the second floor close to where the dynamite charge had been placed, while his daughter's room was directly above.

The explication occurred at 3.50 o'clock, a few minutes before servants were aroused by the barking of a coilie dog, always loose on the lawn at night. The dog has not been seen since.

Those who placed the charge entered the grounds by the main gate. The gate was fastened with a chain and lock, but they cut the chain. The only clue left behind was a peak cap, picked up outside the gate. It is not known yet how many were in the party, but a few minutes after the explosion was heard the fireman on floor duty at the fire station in Cartierville saw an automobile speeding towards Montreal without any lights. He though: there were four or five young men in the car. Reward of \$1000.

The place was guarded today by police while detectives from head police while detectives from head-quarters, a private agency and men from the provincial force worked on the case. The affair is also being in-vestigated by the Dominion police. A reward of \$1000 has been offered for evidence that will lead to the con-viction of perpetrators. It is believ-ed that the dynamite used was some of that taken from Martineau's quarry a week ago, when the watchman was held up.

Winnipeg, August 9.—The Liberal convention of British Columbia, Albera. Saskatchewan and Manitoba, which as been in session here since Monday, was brought to a conclusion at 6 o'clock this afternoon, when a resolution was carried consolidating as the platform of the Liberal party of western Canada the resolutions on policy which had been adopted.

proceedings in the convention on Wednesday:

"Resolutions, as reported in morning papers, are quite satisfactory. Result is very cheering."

The delegates thereupon cheered Sir Wilfrid very heartily and followed with three cheers for the chairman and Mr. Oliver, sang the national anthem, and dispersed. Most of them are leaving for their homes tonight.

The convention approved of the principle of public ownership being applied to railways, telegraphs and express systems, and expressed its belief "that this principle should be applied to all such Canadian systems as soon as the financial and economic conditions of the country permit."

For National Government.

The resolution on national government stated that the convention expressed the hope and declared the desire of its members, that, "in the impending election the discussion of issues should be kept on a plane from all appeals to passion and prejudice in matters of race and creed, and further, that whichev party is returned to power, the business of the government, should be party is returned to power the business of the government should be carried on by a truly national govern-

Hon. T. C. Norris supported the resolution, and defined a national government as one composed of men selected from all shades of politics, without regard to religion, place, or avocation in life.

H. Beveridge of Pincher Creek, thought the Liberals should treat with the government of the day as to coalition.

"The hand has been held out to you," he said. "Is the convention," he asked. "to adopt the wiew that all Conservative governments are bad, and all Liberal governments good?"

The delegates were becoming impatient and it was moved that the question be put. It was objected that this was closure and the debate proceeded.

* WAR SUMMARY *

THE DAY'S EVENTS REVIEWED

HE allies, while holding their infantry embogged in the Flanders mud, are engaging intensively and extensively in the task of destroying the German defences. These defences consist mainly of new creations on the front to which the enemy was driven by the last great attack. The French enlarged their gains in the regions of Bixschoote and Langemarck yesterday. They took about 20 prisoners. The Canadians, in pursuance of their siege tactics before Lens, raided the German organizations of defence west of the town.

The events which will befall the allies in a brief period of time will probably decide whether the Germans are going to proceed with the invasion of Bessarabia and Rumania, or whether the Russians will check their advance and even drive them back in a counter-offensive. The Russians and Rumanians have arrived in force to confront Von Mackensen in the region of Pokshani, and they speedily made their coming up known by the launching of counter-attacks, checking the enemy's advance. The Germans admit the assaults of the allies, but aver that they repulsed them all.

News despatches from Petrograd bear marks of rigid censorship, but war. The military commanders must intimidate the soldiers' and workmen's council in order to secure a workable government and to end the
circulation of political propaganda among the soldiers. The hard the circulation of political propaganda among the soldiers. The best sign for Russia is that the men at the head of affairs take an extremely serious view of the situation and do not treat matters with levity. The war and not elections or political agitations is to receive countenance from the new gov-

The enemy has reached the terminus of his own railway lines in eastern Galicia and he has now to halt in order to link them up with the Russian railways. As General Maurice observes, this delay gives the Russians a breathing time to prepare a better defence. It does not assure either that the Russians will have to retreat further to the rear or that the enemy will fail to make further progress. The news that the Austrians are massing a great force of artillery on the Isonzo front most probably shows that the enemy is planning to make his defensive against Italy as strong as possible while he is engaged in an offensive against Russia. The Russian situation looks promising to him and, besides, the chance may shortly pass so that he plans to make the most of his present opportunities. It is not the fashion of the enemy to give up an advance unless severely checked, so he is sure to try the invasion of Russia.

The fears expressed in Italy about the Austrian preparations west of Trieste do greater credit to the ability of Von Hoetzendorff than his record merits. A mere massing of a great force of guns under present conditions of warfare does not give security to the army which is massing them. In order to employ his numerically strong artillery with telling effect, the enemy must obtain the command of the air, so that no allied machine can pass over his lines. Otherwise the allies can secure photographs of the enemy's trench system and his gun emplacements and can destroy them. The Italian gunfire has already wrought great havoc to the Austrian communications. The Austrians apparently drew their reinforcements of artillery from the Trentino front. The weakening of those Trentino lines may prove a bad blunder by the enemy. Events later on may show it.

Paul Painleve, French minister of war, told an English newspaper that a large army of the United States would share in the decisive victory. This a large army of the United States would share in the decisive victory. This minister evidently believes that the war will run over until next year and, probably, the year after, for at the rate the United States is moving with its new army, it will be 1919 before it is fully ready to take the field. Earl Kitchener with the voluntary system was able to get a much greater move on. Six months after the war began, Britain had at least two and perhaps three million soldiers actually at the front or in training. The preparation for applying conscription is seen from the progress made in the United States to be a cumbersome and slow process. It can now be perceived, it is said, why Kitchener did not adopt it in the beginning. If he had, it is said, the Germans would have won the war before Britain could have had an army in the field.

Ottawa, Aug. 9.—The clause in the military service act which says that any man married after the 6th July, 1917, shall be deemed to be unmarried, appears to have been inisconstrued in some quarters. Letters received from clergymen indicate that marriages have fallen off as a result. Apparently the would-be contracting larties have come to the conclusion that marriages after the 6th July are invalid. This is, of course, absurd. The object of the clause is to provide that unmarried men may not avoid being called out in that class for military service by reason of marriage after the 6th day of July.

The editorial concludes by saying that all true Liberals and loyal Canadians must unite to defeat the unpatriotic scheme, deliberately entered into by some of the men who dominate

"Dishonesty and Deceit."

The Telegram (Conservaive), commenting editorially on the main resolution passed by the Liberal convention, today says:

"Dishonesty and deceit are the fundamental characteristics of the resolution passed by the Liberal convention last night, with reference to the continued prosecution of the war. The object aimed at is palpably to rally every anticonscriptionist to the Liberal cause, while at the same time those Liberals who have been proclaiming themselves conscriptionists are offered a colorable excuse for remaining with the party."

After stating that it took the inside managers three days to draft "this specious piece of verbal chicanery," the editorial says:

London Chronicle Gives This "Their desire was not to express any straightforward conviction on the most important issue with which Canada has been faced for half a century, but rather to devise a formula which could be represented as meeting the wishes at once of the patriot and the slacker."

In dealing with the amendment of J. G. Turriff, that the words, "by compulsion, if necessary," be added to the clause, The Telegram says that the convention, "which professed itself anxious to win the war, neard him (Turriff) with impatience, and voted him down."

War business had brought us down from London. War business for three years had caused us to make many strenuous journies in England, Northern France and Belgium. We were just wondering if the running of lorries over Liverpool granite was more harassing to the nerves than the throbbing of London motor-buses, and whether the streets of either city were not after all quite as grimy and as clattery in their own way as the highways within the zone of the armies.

Island Half Deserted.

It was some years since I had last visited the Isle of Man, but I had heard of the desolation of Dougias at the present day. We had a fair complement for such a little boat, mostly middle-aged folk. When we stepped ashore, tho, it was indeed hard to realize that this was a landing of passengers in mid-July, and not a boatload of early May, when Dougias in normal times is only beginning to rouse herself from her out-of-season slumber. Our little crowd made scarcely a shadow on the broad spaces of the Victoria pier. Of those tinkling "toast-rack" cars which amble along the promenade, and which all the visitors used to laugh at in the days when the Isle of Man and the round world was less heavy-hearted, only three were in commission. We took a ride to Derby Castle. My companion was "tickled to death" at the rate of locomotion. But his compassion was roused in the course of the ride. The "To Let" notices in so many of the boarding houses caught his attention. There was one caught his attention. There was one house, in particular, where I once remember a phototgraph of 200 visitors being taken on the steps. The windows Island Half, Deserted.

PACIFISTS DEMAND DRAFT LAW REPEAL

Meeting in Senate Committee Room Causes Indignation at Washington.

Washington, Aug. 9.— Some pacifists held a meeting under the dome of the capitol today, demanded that congress stay in session until it had repealed the draft law and voiced threats of an attempt to impeach President Wilson unless that was done. Senators and congressmen, invited to attend the meeting, under the auspices of the people's council of America for democracy and peace, dropped into the room and then dropped out again as the speeches proceeded. The meeting was held in the senate military committee room, where, a few weeks ago, the draft law was drawn and perfected. How the meeting came to be held there developed considerable feeling among senators. Chairman Chamberlain of the military committee said he had permitted the use of the room when Isaac Mc-Bride, formerly secretary to the late Senotor Lane of Oregon, asked him for it, "to have some friends meet some congressmen."

Senator Chamberlain said he had no idea the place was to be used for an attack on the President.

Louis P. Lochner of New York, a member of the Ford peace party, presided. The burden of the speeches was that a majority of the people were opposed to the draft law and that it should be repealed.

Propose Higher Rate on City Sales and Favorable Legislation.

Real estate brokers of the east end of the city who met in Playter's Hall, Danforth avenue, last night, advocated the formation of a Toronto real estate association, to be composed of all legi-timate members of the profession. They favored also an increase in rates of commission on sales of real estate in the city from two and one-half per cent. to take effect Sept. 1. Resolutions embodying these suggestions were certiful unanimously

carried unanimously.

The meeting was called primarily for the discussion of the proposed increase in rates and for the formation of an association composed of brokers residing in the east end only. Referring to the increase suggested, Benjamin Panter, who presided, said that he did not think that real estate brokers were asking a great increase when the wages of mechanics and other worknien were taken into consideration There was hardly a commodity which had not increased in price 100 per cent. in the past three years. H. L. Redgers explained that even if the cost of living were the same as before the war the increase would be justified as it now that ed, as it now took three times as long to sell a house as before, and the ex-tra work, cost of advertising and other expenses were not represented by the extra one per cent. suggested. Last year it was 31 mills, but owing to the war and the high cost of living it was decided that there was no way out of it but a higher rate. The war tax is responsible for about seven mills, while the school tax is very high, being about 13 mills. There are two up-to-date schools in Richmond Hill and eight teachers, and it is thought that 13 mills is not exorbitant for this. ON CHARGE OF THEFT Four Foreigners Accused of Building Garage With Lumber Stolen in New Toronto.

In the county court yesterday Mag-istrate Brunton committed for trial four New Toronto foreigners—Charlie and Joseph Ray and John and Joseph Jasiak—on three charges of stealing lumber belonging to Stanley White, Goodyear Tire and Rubber Company, and William Savage, all of New Toronto. The four pleaded not guilty, but as the value of the lumber was over \$10 and evidence proved that they broke into Stanley White's shed, they were committed for trial.

Constable Daniels, who made the arrest on Saturday, said that he found the foreigners building a garage on Sixth street out of the lumber alleged Sixth street out of the lumber alleged to have been stolen. Upon investigating the constable found that they took some old planks from Stanley White, a quantity of 16-inch scantling from the Goodyear Tire and Rubber Co., and some one-inch lumber from a car belonging to William Savage, a local fumber dealer.

The Greater Toronto Labor Party, which is affiliated with the Provincial Independent Labor Party, will have candidates in each of the ridings of Toronto at the coming federal election. At a largely-attended meeting last night in the Labor Temple, the following were nominated: James Ballentine, James Watt, D. A. Carey, James Pichards, W. Brown, J. P. Gunn and John Vick. Another meeting will be held shortly; when the ridings which each will contest will be named. James Richards presided, and a progressive policy was outlined by the several speakers as the platform of the party. A policy of more adequate pensions for soldiers and dependents, and a more general application of public ownership, are among the mort important planks. The gathering heartily endorsed the conscription of men and wealth.

Lifeboat Captain Complains Of Too Many False Alarms

Captain Chapman of the lifesaving crew complains that false alarms are becoming too frequent. Yesterday afternoon a call was sent in from Sunnyside to the effect that a boy had been drowned. A launch went out to the scene and found the alarm to be unfounded. About a week ago the crew was called to Kew Beach to rescue what was believed to be a man clinging to an overturned boat. On arriving there the supposed man was discovered to be a gull sailing on a log. Captain Chapman points out the grave danger incurred by calling out the crew and launch on a fictitious errand, when it might be urgently needed elsewhere.

VACATION SCHOOL CLOSING EXERCISES

Exhibition of Work Done by the Pupils During Past Six Weeks.

The closing exercises of the Fred Victor Daily Vacation Bible School were held last evening in the mission hall, when about 125 children and their parents were present. Rev. F. N. Stapleford, M.A., pastor of the Fred Stapleford, M.A., pastor of the Fred Victor Mission, gave a short address in which he outlined the aims and objects of the summer vacation schools, which have been held in various centres during the past six weeks. He stated that the average daily attendance during the six weeks at the Fred Victor Mission has been 125. During that period two picnics have been held every week, and the attendance at these has been 1300, the last one from the Victor Mission taking place today the Victor Mission taking place to Centre Island.

A fine exhibit of the many things that have been made by the children was shown, including fancy lanterns made by the tiny 'tots of ages from three to seven. A very fine showing of candies and cookies made by the household science, pupils was also shown, which will be packed in boxes and sent to the 192 boys of the mission who are now overseas.

Several hammocks were on view which have been made by the boys, and a fine display of needlework by the girls. During the time the school has been open a new playground has been opened in connection with the mission on Queen street, which has been run in conjunction with the summer vacation school. Clay modelling by the boys of various ages will be on view at the exhibition this year, as a stand has been allotted to them.

The proceedings opened with the states of the ham.

The proceedings opened with the sining of the hymn "Holy, Holy," and Bible studies and songs followed, ending with the saluting of the flag and the singing of the national an-

FOR TORONTO BOYS

Recently-Formed Organization Will Train Lads in Seamanship.

The Toronto Naval League is a new organization that will appeal to every boy that has (and what boy has not? boy that has (and what boy has not?) the love of the sea in his veins. The aims of the league are to teach boys to swim, row, sail, save life and serve their country on the water: to teach them to be clean, manly, self-reliant and skifful with their heads and hands, to provide instructors and to replenish the supply of Canadian sailors.

These aims are accomplished by the co-operation between the league and the churches, irrespective of denomination. The church is encouraged and expected to keep in touch with its own boys, and each church is required

From 50 to 75 cars that have to be held for placing orders fill two sidings and necessitate about 200 extra switchings per day, thereby adding to the work and congestion of the yard.

The report given by the Grand Trunk showed only the date of receipt of the car and the release date and in consequence the consignee was blamed for delays between the date the placing order was given and the date of ship on the question of the conscription of wealth. I am convinced from what I have heard myself and from what has been reported to me, that the farmers of this riding—and I believe they are typical of the form for delays between the date the placing order was given and the date of placement, a delay for which the railway is solely responsible. An instance of this occurred in the case of the Dunlop Coal Company, where a car was listed as being held from the 19th to the 27th. In this case the car arrived on the 17th, was ordered placed on the 18th, was not placed until the 25th, when it was then unloaded and released on the 27th.

FARM SCHOOL PRINCIPAL WELL EQUIPPED FOR JOB

W. J. Bell Comes From Dufferin and Taught School Before Studying Agriculture.

W. J. Bell, B.S.A., has been appointed principal of the agricultural school which the Ontario Government is establishing in Kemptville for east-ern Ontario. Mr. Bell has had a considerable experience which fits him for this position. He comes from Dufferin County and taught school a number of years before taking the course at the Ontario Agricultural College. Since graduating at Guelph he has been in the institutes branch of the Ontario department of agriculture and has undertaken a good deal of the instruction work in different sections of the province, particularly with refer ence to live stock. He is recognized as an excellent live stock man. His appointment takes effect on September

Altho the school will not be open for students in the regular courses this year, there is a great deal of preliminary work to be done which will require the attention of a principal. Contracts have been let for a live stock judging pavilion which will be doubt short courses will be held during the winter months. The two hundredracre farm is also being operated by the government, and a splendid herd of dairy cattle is being assembled. The work is therefore being advanced as rapidly as possible under war con-ditions, and everything should be in shape for starting the institution on a full running basis as soon as the war is over.

London, Aug. 9 .- Thru the courtesy of the war and foreign offices, a staff correspondent of the Associated Press has been permitted to visit the American troops at their billets in England. They were found encamped in a valley in which white tents extended as far as the eye could see, with British officers and a squad of nonofficers

commissioned officers intensively training them.

These British instructors were busy making soldiers from men who, until a few weeks ago, never saw an automatic pistol or a gas mask, and they were quite pleased at the success of their efforts, for the Americans, they say, learn quickly, understand thoroly and do not forget what has been told them. Moreover, they consider remarkable the way in which the Americans of the engineer corps bend themselves to discipline when they realize it is all-important in the conduct of the war.

Today the Americans are working with gas masks. The instructors break up companies into squads and the members stand in a circle and get lessons in quick adjustment, a feature which often means life or death.

The Political Whirlwind!

Each day confirms what The World has been telling its readers for some time now, that Canada is passing thru a political revolution that may even prove a whirlwind.

The parties and the politicians are in the vortex already. The Liberal convention and its resolutions at Winnipeg and the excited condition of its delegates, all these showed that the people of the west are moved as never before. The program adopted is the most radical ever put out in Canada, The returned soldiers are in a ferment and the women of the country

Our democracy has not yet learned entirely the lesson that to live well is to work well. U. S. CONGRESS WILL GO ON EDUCATIONAL TOUR

Members Will Strive to Educate Americans for Vigorous War.

Washington, Aug. 9.—Congress may go on a lecture tour when it finishes work here to enlighten every section of the country on the need for prosecuting the war vigorously, not only as a war for world democracy, but as a fight for American rights and preservation.

President Wilson himself may "do his bit", in the same direction, possibly by a speech on some occasion or by a letter to congressional leaders.

Plans were in a nebulous state today, but all the undercurrent in official quarters was toward such a move. Congress leaders were talking of virtually putting congress on the stump by asking every representative and senator to go thru his district during the recess, speaking on the part of the United States in the war. Those who layor the plan point out that the country is hearing many agitators who oppose the draft and participation in the war. They think that fathers and mothers who are giving sons to the colors should hear something on the other.

OVERCAME TROUBLES Says Cunningham.

Montreal, Aug. 9.—An attempt was made in the early hours of this morning to assassinate Lord Athelstan and his family.

Dynamite was exploded under the sleeping quarters of his country house at Cartierville and did considerable damage. His lordship and family, with the other inmates of the house, escaped injury.

His lordship has lately received letters containing threats that he would be assassinated with other leading

Canadians after the passing of the Canadians after the passing of the conscription bill in Ottawa.

The dynamite attempt was only partly successful. Five or six sticks of dynamite were exploded under the sleeping quarters of the house, which ripped off the balcony and filled the lower rooms with debris. A hole four feet deep and three feet wide was made in the lawn by the explosion.

Mr. Graham was sleeping on the verandah on the opposite side of the house to that on which the explosion took place. Nobody was injured.

Experts say that the escape of the inmates in the house was almost miraculous. The dynamite obviously was handled by men not familiar with shutting our eyes to the approaching explosives, as it blew outward in-stead of inward, weakening the force "If we do not fight—fight desperately the building would have been thoroly win. pecial to The Toronto World, Providence, R.I., Aug. 9.—Larruping arry Lajoic led his gladiators out of town

Larry Lajoie led his gladiators out of town tonight with three victories tucked away in his grip and within a very small margin of first place. The clean-up here was as profitable as it was unexpected. Today's game was Toronto's farewell for the season and the battle will go down into history as one of the finest contests ever played on the home field.

Toronto won 1 to 0 after the greatist and gameet struggle here this year. Reubach and Warhop were in championship form and both deserved to win. The Providence heaver entered the box with everybody in the park booing him, but before the game was three innings old the sentiment had changed and his every appearance drew forth cheers. The big fellow that has been such a disappointment since joining the Grays, pitched one of the best games of his career and but for a wild pitch of Allen that accounted for the winning run might have prolonged the contest indefinitely. The same holds true of Warhop. The underground artist never pitched better and the victory was won as much by his brilliant work as by the sharp playing behind him. He remembered the day in Baltimore last June when the Grays batted him off of the mound and out of the Baltimore least June when the Grays batted him off of the mound and out of the Baltimore least June when the Grays batted him off of the mound and out of the Baltimore least June when the first, fourth and sixth innings, but only one got beyond first base and aside from Massey he was the only man to reach second, and both died there. The other hit was made by Allem after one man was out in the third, and he stayed on the first sack.

CLEVELAND INDIANS CAUSING AGITATION

Altho Plank has lost much of his speed, and the sharp break on his curve ball, he has developed a "floater" that probably will stop many batsmen before the Gettysburg wonder closes his career. Plank's brains, plus his control, a fair curve and his slow ball, enable him to pitch effectively with a minimum of physical exertion. In the Detroit series the ball came up to the plate as big as a zeppelin. The Detroit sluggers lunged and swung, but soldom hit the sphere safely. In one innings Plank pitched slow balls to Cobb. Ty hit one and popped out. "Tought to have my throat cut for hitting at that stuff, Ed," shouted Cobb, as he trotted back from first base.

But Cobb knew that he had to hit, for Plank was putting his slow ball, waist New York, Aug. 9.—The brilliant victory of the Cleveland Indians over the Red Sox, following equally brilliant performance last week and this, is causing agitation in the Johnson circuit.

Lee Fohl's sterling pitching staff, combined with a winning punch, are going to horn into the argument over first place in the American League, unless someone shortly takes a knockout punch at the Indians average.

The Indians and Tigers are locked in the throes of a struggle for third place, seven games behind the Red Sox, but following a crack at the Highlanders in New York they return to Cleveland to take on the White Sox. Considerable fur should fly in this series. Fohl's young pitchers, particularly Bagby and Coveleski, have been carrying the burden. Klepfer's victory over the world's champions placed him in a class with other stars and speaks none too well for the chances of the White Sox in the impending clash. The added whacking punch of Tris Speaker, Ray Chapman, Wambsganss, Roth and others makes the Cleveland line-up an awe-inspiring array.

first base. Instinctively when a rumner going to first sees the play will be close he makes up his mind to silde, the same as at any other base.

It has cost many a runner a life which he might have gained by sprinting across the base at top speed. Many decisions at first are by the wink of an eyelash, consequently the loss of a small part of a second is enough to turn the scale. Also the umpire sometimes is confused by the silde and makes the wrong decision because he expects the runner to flash past the bag instead of sliding.

BATTLE KING CAPTURES DEXTER PARK FEATURE

Destrex Park Feature

Detroit, Mich., Aug. 9.—The feature seem for the fourth day of the Dexter Park Driving Club races was the 2.18 pace with six carded to start. At the last mornet King Canuck was drawn, leaving a field of five. Peterkin, a son of Peter the Great, was totaled as the real good thing in this, he having shown is ability in pace miles in 2,06, so it was waid. Vice Flaming had Battle King, bh. by King Bellin, in this event, and he sold favorite over the field in the safty selling. Later on Peterkin sold for the safty selling. Later on Peterkin sold for the soring they were given the world with the split choices in the front. The first quarter was in 35, Malf in 2,05.

Battle King 20, field 16. After considerable scoring they were given the world with the split choices in the front. The first quarter was in front all the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices in the front and the world with the split choices are fined to the check the flow of the dirt. Peterkin finished second. Time 2.114. The second and third miles were easy for Battle King, with Geo. E. Hutton second in each heat.

The next event was the 2.20 trotters. Czar Peter had so much over his field that it was a tame affair for first money. In opening heat he was away last, and indulged his field with the head till after the first half was passed, when Lee opened him out and sat there, winning comfortably. The second and third heats were a repetition, Cricket getting the place.

Future of Racing In England Sound

The resumption of racing in England was attended by immediate proof of the soundness of the future of the sport in "the stud-farm of the world." At the ture of the sale of the second contingent from Mr. J. Musker's studs was the buying of an unbroken flily by Swyford—Sceptre for the amazing price of 6,100 guineas, the purchaser being Mr. A. Black. The bidding was started at 1,000 guineas by a lady, who stayed on till well over 3,000 guineas had been reached. That the filly will win races is highly probable, none the less she is not beyond criticism, especially in regard to her feet. In appearance she does not favor citiesher sire or her dam, being of a light-roulld than either of them—recalling rather memories of La Fleche and having about her a general St. Simon character.

Much speculation there had been as to what Sceptre herself would make, and the question was answered when Sir W. Tatem secured the famous mare—now is years old—with her filly foal by Glenesky for 2,500 guineas. For Sceptre and her daughter Curia, Mr. Musker paid 7,000 guineas, and he has now sold Curia for 2,400 guineas, Sceptre herself for 2,500 guineas, and "Sceptre's daughter" by Swynford for 6,100 guineas,

style. Dicky caught five would-be pilferers.

Hennessy, Hillcrest's first_sacker, has
the earmarks of a comer. He is big and
fast and always pulls off the unexpected.

Potts plays a nice third base. He has
a great throw across the diamond and
covers an acre of ground.

Babe Dye is playing a great game for
Hillcrest and 's improving in his hitting.
He is Hillcrest's best all-around man.

Art Irvine strengthens the Moose infield considerably, and is beginning to
get his eye on the ball.

Frank McFarlan got back in the game

in the outfield and is a pretty reliable man at the bat.

In the City Playgrounds Senior Baseball League at Perth Square on Saturday Elizabeth and Carlton Park play the 2 o'clock fixture and Osler-Beavens and Osler the 4 o'clock. Bob Findlay twisted his right knee three weeks ago, but hopes to be in the game, while Woods or McCutcheon will work for Carlton Park.

Manager Ryan will work for the Beavers against the Ozler team and hopes to stop them. These two teams have put up some of the best games at the square, but each time Osler seemed to get the break. Manager Glenny will work Bell. The latter is pitching good ball, as is shown in his 18 strike-outs against Bellwoods at Arthur on Wednesday.

Woods will compose the Saints' battery. Wellingtons oppose Park Nine in the op-ening encounter.

Nancy had a little more work on her collar. She had to buttonhole-stitch the scallops and sew on an edging of lace. It is a Cavalier collar of linen with a dainty embroidered design above the scallops. The latter are rounded, and Nancy finished them with baby Irish lace. The collar forms a deep V and extends well over the shoulders.

How to Make Breathing Unconsciously a Fine Art

By DR. LEONARD KEENE HIRSHBERG

A. B., M. A., M. D. (Johns Hopkins University) THE trunk of some persons is as rigid as a wine barrel. This fixedness is inimical to health and

breast-bone, ribs, spine, collar-bone and shoulder blades are supposed to be loose and almost double-jointed. Their hinges are made by means of double-jointed. Their finges are missing gristle, muscles and ligaments. Unless they are relaxed, respiration is as restricted as the foreign commerce of war-bound nations. Yet few persons appreciate the necessity for the use that keeps away rust and decay. The majority ignore the requirements of these respiratory structures for exercise.

Advice to Girls

DEAR ANNIE LAURIE: I am almost 20, and was engaged

for two years. Several months ago my flance suddenly quit coming to see me. One night he came to see what I had decided about going to a place of amusement the following day. As I had only expected him to stay a few minutes I had given another young man the engagement for other young man the engagement for the evening. I explained to him how it was, and it seemed to be perfectly all right with him. He stayed until the other boy came, but when he left I walked to the gate with him, and he became angry all at once and left with only a civil good-night. He had never asked me not to go with other boys, and as our engagement was secret I felt justified in going with others.

He never returned, and as I am very proud I didn't feel it my place to make any advance toward a

to make any advance toward a reconciliation.

He began going with other girls, and a few months later I heard he was leaving. I returned his letters and asked for mine. He refused to return them, saying they were his.

Some months after his departure he wrote asking me if it were true that I was to be married soon. In a nice letter I denied the statement. I also told him I was leaving for the summer, and gave him no address.

I still love him so much. I tried to forget him, and it doesn't seem as if I can. I know he at one time loved me with all his heart.

Do you think he will forget me? Is it best to marry another and try to forget him? I have two very good offers of marriage. Do you think I was untrue to him that night?

July 31, and the amazing superiority which the British airplanes had displayed on that day, owing to their determined onslaught on Germany's air fighters during the preceding fortnight.

"On the day of the attack," says General Maurice, "the weather conditions were as nearly impossible as could be imagined—low clouds of great density, haze and mist. The observation was almost nil, and as a result the artillery was under a severe handicap, having to work without adequate airplane observation.

Over Hundred Combats.

"But the airplanes were enormously big in other departments. More than 100 engagements were fought by airplanes with the forces of the enemy on terra firma, our planes in these cases descending often to within less than 50 feet of the ground and sweeping the hapless enemy with their machine guns or bombing them. The enemy airplanes were well-nigh helping less to interfere.

"Less than twenty fights in the air occurred because the enemy did not dare come up and in these fights we downed six enemy machines while we lost only three of our own. There were eleven cases of machine gun attacks on German airdromes by British machines. Our airmen swooped down to a nalititude lower than the tree tops and fired string after string into the German hangars, killing mechanics, damaging machines and blowing up workshops. Similar attacks were made repeatedly on parties of marching troops, on working parties, and on transports.

But Local Market Looks Wall St. for Guidance.

Toronto market yesterday was one of marking time. Crop de news are good, but against inde news are good, but against there are the war uncertainties, hish price and scarcity of free and the Dominion political out—
The impression that there might the relief from the profits tax is writed, and with the imposition new income tax some securiare made less attractive. Wall, was very undecided yesterday, edig market could show a better inty of undertone the Canadian lets would improve. In most of the imposition of the seculative issues the folion has been about cleaned out durthe long period of depression and wity. Offerings consequently can come from the larger holders and a would adjust sales so as not to as a pressure against steady addes. The only new feature in yesay's market was a new low level e by Winnipeg Railway which at 18. Prices of the speculative as as a whole were easier, but the sactions were too light to demonste any actual change in the stand-of the market. War loans were but with some falling off in vol-

STOCKS COME BACK AFTER DECLINES

Certain Periods of Unsettlement Derange New York Exchange.

New York, Aug. 9.—Wall Street took a galmer view today of the price control struction, but professionals pressed their advantage tentatively, the rallies of one to three points ruled at the close.

There were signs of substantial support in war traues and steels during the occasional intervals of unsettlement, but certain equipments and the motors were again under a cloud. Depression in the latter group was emphasized by receiverable proceedings against a concern making automobile parts.

Shippings and rails, especially the former, were conspicuous for their comparative strength at all times, and tobaccos continued their rise under the auspices of cools. Other strong and active specialties meluded Industrial Alcohol, U. S. Rubber, sugars and a few utilities.

sugars and a few utilities.

The recovery, which became more general in the final hour, resulted mainly from the customary movement, public interest manifesting no change from its long sustained apathy. Sales amounted to \$50,000 shares.
Call money's advance to 4 per cent. with a stiffening of time loans, was the outcome in large part of enormous payments now under way. Foremost among there is the \$300,000,000 of treasury certificates of indebtedness.

Foreign exchange retained its irregular characteristics, remittances to Paris bardening slightly, while lires suffered another declins.

An irregular tone prevailed in the nar-row bond market. Liberty 3½'s were quoted at 99.54 to 99.60. Total sales, par value, 183,200,000. United States coupon and registered is rose % per cent. on call.

strong stocks. Carriage factories was also bid up a point. What little activity there was soon died down and the market seems to have relapsed for the time being into the same dullness in which it was before the spurt ness in which it was before the spurt started a few days ago. The market will probably start up again before very long and a rest will not do it any harm.

LONDON STOCK MARKET.

London. Aug. 9.—Git-edged securities were firm on the stock exchange today. The conversion prospects of the British 1½ per cent. war loan induced an active demand, and, as the available supply of the stock was scarce, the price advanced a point too 97%. Foreign bonds, especially Mexicans, were firm, but South American believes, were week on disappointing. raiways were weak on disappointing sarnings, and it was stated that under-writers are preparing an issue of £500,000 Central Argentine 6 per cent. diverger bonds.

The operating results from such enterprise for the year 1916 were brought into the accounts only at the end of the year as it was not feasible to include them during the year on the monthly cards. The above figures are approximated as cosely as possible, and will be subject to final adjustment in the annual accounts of the subsidiary companies.

NOTHING COUNTS

ive Accounts Cleaned New Daily High Prices for Silver Are Not of the Slightest Concern.

Nothing seems to have any present influence on the market for mining shares. Silver came at a new record of \$27%c an ounce yesterday, but to appearances the quotation ten cents lower would have had about the same effect. Traders discussed the metal arguing the advantages that must accrue to the working companies, looked at the stock quotations, saw little doing and did nothing themselves. The market is in one of those hum-drum conditions which exist almost without an explanation. That a change will come is inevitable and then the buying will come all in a lump. Any price changes yesterday were insignificant. Shorts about supplied all the buying demand and these will not cover until they see signs of a revival. Adamac was one of the strongest of the Cobalts, and closed at 15% bid. When the 180se stock in this issue has been collected many believe that there will be something doing in the price. Gifford was revived on the rumor of a strike and sold at 5%. Most traders were under the impression that the property had not been reopened and the trading came as a surprise. The Porcupines were mostly steady. Newray was the feature in this department, with sales at a new high of 70, and with the stock in demand at that price at the close. Developments are in effect with this company not yet made public, and traders point to the strength of the stock as evidence of really good buying. A wake up in the whole market is promised this month and as a third has already gone the move should be shortly in sight unless there is a miscarriage.

MANUAL ON MINING

AND CANADIAN MINERALS The Canadian Mining Manual for 1916-17 is just off the press. The work is edited by Reginald E. Hore, editor of The Canadian Mining Journal. The manual presents in a convenient form useful and recent information of the mineral resources of Canada. The growth of the Canadian mining industry and the ever-widening interest in the same has made a demand for the manual, and its usefulness will develop. The compilation of the book is excellent, and its value will be appreciated by those who dewill be appreciated by those who desire instruction on the minerals and mines of the Dominion. JEWS STARVE TO DEATH IN POLAND'S CAPITAL

New York Zionist Committee Receives Word of Terrible Suffering.

New York, Aug. 9 .- Jews in Warsaw are starving, according to a letter, the authenticity of which is vouched for by the Provisional Zionist Committee, made the Provisional Zionist Committee, made public here tonight.
"Death from starvation is a real fact," the letter said. "It is witnessed in every street, at every step, in every house. Jewish mothers feel happy to see their nursing babies die. At least they are thru with their suffering. Our wealth-lest people cut off their daughters' hair and sell it to be able to buy the indispensable things, like bread, for their dying children.

Brantford Independent Labor Party Has No Mandate From Men

Brantford, Aug. 2.—The action of the executive of the Branuford independent party in calling for a general election at this time has been repudiated by P. Noble, president of the Brantford Trades and Labor Council, as being without a mandate from the party. Some months ago the trades and labor council favored a national government, to press the war. The same men are now calling for a general election, and he scores them for their inconsistency. He adds that he believes firmly in the conscription of men, money and wealth.

THREE CENT FALL

Weakness Develops Owing to Less Demand From Distillers.

Chicago, Ang. 2.—Notwithstanding that at first today the final passage of the food control bill did not affect grain values, weakness developed later, owing largely to a folling off in the demand from distillera, upon whom the new measure had placed restrictions forbidding the manufacture of alcoholic beverages.

Corn, altho steady at the close, was %c to 1c net lower, at \$1.16% December and \$1.13½ May. Wheat finished unsettled, 3c down, with September \$2.22. The outcome in oats ranged from ½c decline to %c advance. Provisions wound up unchanged to 25c higher.

Instead of the food control bill, the government crop report formed the dominating influence at the outset in the corn market. Altho the official estimate of yield was the largest on record, the total fell a good deal short of what a majority of the traders had looked for. As a consequence, values advanced to a material extent before offerings were sufficiently free to bring about any reaction. When the fact developed, however, that purchasing for distillers had begun to shrink to a notable extent, the bear side of the market became popular, and prices thereafter showed a decided downward slant.

A further handicap to the bulls was a report that loading of Dutch vessels in American waters had been stopped, and that as a result there might be reselling of considerable grain.

Wheat, like corn, showed an early advance, but a subsequent material setback. The initial strength was ascribed to disappointment over the cutting of the government estimate of the probable domestic yield of wheat this season.

Relative firmness of oats appeared to be due mainly to wet weather, which delayed threshing and threatened to hold down receipts. There also were complaints of car scarcity.

Provisions soared to new high price records for the season, but receded later on account of realizing sales by holders. Topmost quorations ever reached on hogs furnished the impetus for the advance in provisions.

Senator Casgrain Revives Controversy Over Montreal Land Deal.

CLAIMS BIG PROFIT

Mention of Pre-War Transaction Evokes Rejoinder From Lougheed.

Ottawa, Ont., Aug. 9. - In the senate today, Senator Casgrain moved for papers respecting the purchase of a tract of land near Montreal, known British Organization Has Already as Bonnie Bel Air, by the militia department from W. T. Reddin, He years before the war to be used as a cavalry school, the there was such a school, with ample accommodation, at St. John's, not far from Montreal. Two miles from the centre of Montreal, across the river, the government owned a site as good as the one they acquired, which was near Dorval, and 14 miles from the city. The rifle range was on the other side of the city and was 24 miles distant, so Bonnie Bel Air was not bought for convenience in the matter of rifle shooting.

There had to be a transaction; the minister of militia appointed a commission of three colonels. W. T. Roddin did not own the land when the movement was started He bought it, however, and 16 days later, sold it for \$180,000 to the government and got stated that the land was bought two

movement was started He bought it, however, and 16 days later, sold it for \$180,000 to the government and got the government cheque for the amount This was one of the most expeditious real estate transfers that ever had been made The part of the property to the south of the Grand Trunk and C.P.R. tracks was not cleared Officials of the militia department would not agree to report favorably on the property, so the commission of colonels was named. It was bought, paid for, and never used.

Dissentient Punished.

One of the commissioner colonels had declined to agree to the transaction Tho he had since served in France, he was still a colonel The other two colonels, who had reported favoring the purchase, had not gone to France. They had remained to Canada and had been made generals. Roddin had paid \$36.000 for a portion of the property a few days before he

Readin had paid \$36.000 for a portion of the property a few days before he got the government to accept that rare for \$90,000. Computing simple interest to the present time, Senator Casgrain ostimated that the land now had cost the government \$244.500.

Sir James Lougheed said that Senator Casgrain appeared to be censurable for failing to bring this important matter to the attention of the senate for five years, the it had been mentioned in the press and the louse of commons, and Senator Casgrain had expressed warm admiration for General Hughes, therefore he would be interested to know that the commission of colonels had been named and the purchase put thru under the authority of that distinguished gentleman. He would be interested to know that the commons' Hansard der the author'ty of that distinguished gentleman. He would be interested to know that the commons' Hansard of February 23. 1914, contained an claborate justification of the transaction by General Hughes. Senator Casgrain said that the site was not suitable for military purposes, while General Hughes said that it was ideal. Surely the senator from Montreal would not controvert the opinion of so great a military authority as Gen-eral Hughos. The motion for the papers was

Brantford City Council Has Balance From Civic Potatoes

Brantford, Ang. 9.—The long-lookedfor report on the civic sale of potatoes
was presented to the city council tonight
by Ald. M. M. MacBride. It showed a
balance of \$3.55. The western potatoes
cost \$1875, the castern \$1878.80. The sales
brought in: Western, \$1905.75; eastern,
\$1878.80. The charge for delivery brought
in \$27.40 and \$21.60, respectively. The
expenses total \$104 and there is on hand
\$109.75. The report was adopted, the
aldermen being given credit for having
broken the back of the high price of potatoes by bringing a supply of seed.
which could not have been gotten any
other way. The city bylaw to authorize
a civic fuel and food depot, was amended
to limit the expenditure by borrowing to
\$50,000. This must now receive the approval of the Oniario Railway Board and
the lieutenant-governor-in-council.

A hearty we come was given to Capt.
W. T. Henderson, city solicitor, who appeared in his old capacity for the first
time since taking part in the battle of
Vimy Ridge.

Perfectly Fitting Pyjamas of Soft Cool Summer Weight Soisette---the Kind Featured in the First Sale

America's largest shirt and collar company decided to discontinue the

manufacture of pyjamas in its Canadian factory near Montreal, so we bought the materials that remained, only paying a portion of the mill cost.

We had the garments made under our own supervision, and they are made right—big enough and long enough where they should be—every one double-stitched and neatly faced, having French neck and white silk frogs. Soisette washes and wears better than silk and looks much like it, and

being exceptionally soft, pyjamas of it are just as desirable as silk.
