MIRAMICHI

VOL 23. CHATHAM, NEW BRUNSWICK, MARCH 25, 1897. D. G. SMITH, EDITOR & PROPRIETOR

WE DO JOB PRINTING

Letter Heads, Note Heads, Bill Heads, Envelopes, Tags, Hand Bills.

PRINTING FOR SAW MILLS A SPECIALTY.

We print on wood, linen, cotton, or paper with equal facility.

JUST OPENING

Christmas & New Year 1896-7 JUST OPENING. BOOT AND SHOES IN GREAT VARIETY.

SCOTCH AND CANADIAN TWEEDS. NEWEST MAKES IN DRESS GOODS.

OILCLOTHS, HEARTH RUGS & DOORMATS. WOOL, BRUSSELS & TAPESTRY CARPETS.

BLACK & COLORED CASHMERE & MERINOS. ART MUSLINS, CRETONNES & REPPES.

LACE CURTAINS & COUNTERPANES. LACES, RIBBONS & HAMBURG.

SILKS IN BLACK, COLORED, SURAH, & Worsted Coatings, Black and Blue Serge Suitings.

White and Regatta Shirts, Ties, Collars, Hosiery.

Silk and Linen Handk's, Hats, & Caps, Etc.

ALSO A FULL & COMPLETE LINE OF GROCERIES & PROVISIONS.

J. B. SNOWBALL. Miramichi Foundry, STEAM ENGINE AND BOILER WORKS, CHATHAM, N. B.

JOSEPH M. RUDDOOK, PROPRIETOR. Steam Engines and Boilers, Mill Machinery of all kinds...

GANG EDGES, SHINGLE AND LATH MACHINES, CASTINGS OF ALL DESCRIPTIONS. CAN DIES. IRON PIPE VALVES AND FITTINGS OF ALL KINDS.

DESIGNERS, PLANS AND ESTIMATES FURNISHED ON APPLICATION. THE CANADA EASTERN RAILWAY AUTUMN 1896.

THE LONDON GUARANTEE AND ACCIDENT CO. Guarantees Bonds and Accident Policies.

BICYCLES FREE!

Save your Welcome Soap Wrappers. WE WILL GIVE FOUR BICYCLES.

Two for Nova Scotia and two for New Brunswick and Prince Edward Island... THE WELCOME SOAP COMPANY, ST. JOHN, N. B.

FOR THE MARINER. A New Arc Lamp of Marvellous Power. It is now possible to throw a beam from a searchlight which will be visible in a fog...

SHERIFF'S SALE. To be sold at Public Auction on Friday, the 20th day of November, A.D. 1896...

THE SEARCHLIGHT. Another eye of light has a small motor enclosed in the base with wires leading to a special hand switch...

Miramichi Advance.

Mr. Mitchell's Claim. The Toronto Globe's Ottawa despatch of 16th inst. says:—

Mr. Mitchell's claim. The Toronto Globe's Ottawa despatch of 16th inst. says:—

Mr. Mitchell's claim. The Toronto Globe's Ottawa despatch of 16th inst. says:—

A Valuable Property in Dispute. Mr. Wm. Richards, it is evident, not one of those who believe that the C. P. R. will purchase the Canada Eastern.

Our Opportunity. To the Editor of the Advance. Sir, I am sorry to hear that there has not been a public meeting called to show that the majority of the people of Chatham disapprove of the action of our Board of Trade.

A General Under the Gallows. The Swedish ingenuity of the St. John Globe in pursuing premier Mitchell and his colleagues in the government, is well worthy of that paper and its methods.

Notice. The subscriber offers for sale or to rent his business.

from Fredericton to Chatham by rail through the picturesque valleys of the Nashwaak and Miramichi and from Chatham to Summerside? What more pleasant to the eyes of inland western tourists than to behold the grandeur and beauty of our noble river and bay, with the ships of all nations safely anchored or proudly sailing through the blue waters of the bay?

Legislative. Amongst the legislative matter held over last week of the following report of the proceedings of Saturday 13th—the day of prostration—

Government Salmon and Trout-Fishing Sale. Lessees for a term of five years, from 1st March 1897 to 1st March 1902, of many of the principal rivers of the Province of New Brunswick, were sold by public competition at the Crown Land Office, Fredericton, yesterday, 24th.

Committee Room. House of Assembly, March 19. The committee which are referred to the public accounts, together with the auditor general's report thereon for the fiscal year ending 31st October, 1896, beg to report to your committee, pursuant to the resolution of the 23rd inst., that they have carefully investigated the various items set forth in the auditor general's report. That your committee proceeded from page to page of the said report to the end thereof, and after a searching inquiry into the details of each item, have carefully investigated the various items set forth in the auditor general's report.

Government Notices. The last Royal Gazette contains the following:— Resignations are accepted as follows:— Of C. O. Chisness, as Labor Act Commissioner for Regroveline, in the County of Gloucester; and of James G. Blackhall, as Commissioner of the Parish of Carouquet Civil Court, in the County of Gloucester.

of said evidence is hereto annexed, marked 'A.' With reference to the investigation of the expenditure on said Coosage bridge, your committee, after receiving amply for all persons to be heard, and on consideration of the evidence, find that no consideration of the evidence, find that no wrongdoer on the part of any person connected therewith has been shown, and the accounts of the said expenditure as produced from the department of public works are correct.

Fast Losing Ground. Dealers and druggists who handle and sell common packages of dye for home dyeing are finding out that they are fast losing ground in business.

Jonah and the Whale. Jonah, who has always been considered the patron of anglers, 'whose stories are sometimes doubted, has been the cause of getting so eminent a theologian and preacher of Dr. Lyman Abbott—into trouble. A devoted devotee of the Boston Herald from Philadelphia says:— 'The Rev. Dr. Lyman Abbott, of Brooklyn, will not be allowed to lecture in the Young Men's Christian Association hall here, because of his recent utterances regarding Jonah and the whale. The hall was engaged by Dr. Abbott before he delivered his sermon, but when he advanced his theories about Jonah, the managers of the Young Men's Christian Association took steps to keep him away from their building on the ground that his teachings were not altogether desirable for such a place. They made a proposition to the committee which had Dr. Abbott in charge for his withdrawal, and the committee consented to cancel the engagement of the hall. Dr. Abbott will lecture in Horticultural Hall. An officer of the association explained that the character of the lectures and entertainments was always considered in renting the hall. The association in a measure put itself responsible for what takes place in the building, and as the management is strictly orthodox it was not thought proper to take any chance on Dr. Abbott.'

Acts Passed. The following are amongst the Acts passed at the recent session of the Local Legislature. To consolidate and amend the several Acts relating to the North West Boom Company, and all amendments thereto. To authorize the Municipality of Gloucester to effect a temporary loan to meet School debts.

CRISP RUST. The making of a pie. The making of a crisp crust depends largely upon the shortening used. Use COTLENE, the new vegetable shortening, instead of lard, and softness will be an unknown element in your pastry. COTLENE should always be economically used—two-thirds as much as lard or butter, being ample to produce the most desirable results. The saving in a year represents a considerable item. There are many imitations of COTLENE; you should therefore be careful to get the genuine.

A NEW DISPOSITION CAN NOW BE PURCHASED—SO SAYS A FRENCH DOCTOR.

The Queer Effect of a Storage Magnet on the Brain—A Sure Cure for a Case of the Blues. "Dispositions for an anxious mind is the ordinary sign which may sometimes appear in the windows of the drug shop. A series of extraordinary experiments which have been made by one of the best known scientists in France during the last year, but which have not before been made public, seem to promise some such marvellous result. The strongest discovery of all the strange discoveries which have been recorded during the past decade by the progressive scientists of France, and one of which Dr. Luys has authorized the Journal to make the first announcement, is the fact that the human brain, and in the scientific who has examined patients concerning the effect on hypnotic states of patients of drugs in heretofore sealed tubes, was recently described in the Journal. He has made lately been at the head of the famous Charcot Hospital of Paris. He was Charcot's favorite pupil and assistant, and probably knows more about hypnosis than any other man who lives today. One of the things which he has learned is that it does not pay to leave any experiment untried. He has followed the blind alleys of scientific research, and gone full on many a false scent; but he has at the same time given to the world more new facts concerning the science which is his specialty than any other man now living. He has also been the first to perform serious surgical operations while patients were under the influence of hypnosis, and he was the first to introduce hypnosis into regular hospital practice. His discoveries have been recently the subject of an article in the Journal, some about the well-known fact that he has observed an accident of his. His present discovery is, to an extent, of a similar nature. More than a year and a half ago a young woman went to Dr. Luys to receive a special treatment for chronic melancholia. He receives many patients at his house, which is located not far from where Dr. Luys's old studio was. The girl was about twenty-seven years old, and her malady was a peculiar one. It followed a severe attack of nervous prostration and was at first mere mental depression. The depression, as time passed, and was accompanied by an insupportable lack of ability to sleep. After a month or two the complication ensued which was especially distressing. The girl was of an affectionate disposition, naturally, and she began to grow in her heart an unreasonable aversion for those people whom she had formerly loved. Her father especially had been dear to her. Her mother loved her as if she were a child. Her husband had been devoted to her, and she had been his greatest pleasure. Yet she suddenly dropped what had been her life upon her lips took on the stilted expression of a displaced child. Her younger sister, with whom she had probably spent more of her time than with any other member of her family, around her one day by bursting into tears, and by giving as the reason for her weeping the fact that she was evidently no longer welcome in her company. Her mother noted the change in her general attitude toward her and grieved over it. The girl herself did not for a second fail to realize the unreasonable nature of the change in her mental attitude. She did not for a second even try to find a sufficient cause for it in the actions of her family. She knew that it grew out of some sudden alteration in her own mental condition. And in spite of her efforts to overcome it, her aversion to those who were nearest to her heart should have been dearer to her, continually increased.

Finally reached such a pass at last that she could not enter the room in which any of her family were present without shouting and shrieking, so great was her dislike for them. At last she became convinced that she was no longer welcome, and went of her own accord to consult Dr. Luys. With him she talked frankly, and toward him she felt none of that strange aversion. Of course, his first move was to see her family and learn what he could of the circumstances which had led to her unfortunate condition. Then he began a conventional system of treatment, consisting of nervous-tonic, physical exercise and similar things, suggesting to her that she should try to get on with the tears rolling down her cheeks day after day, and that the unaccountable aversion for the members of her family was increasing rather than decreasing. The moment she permitted her mind to dwell upon any of those persons whom she ought to have loved best, it was filled with a dislike, such as one feels for certain dishes or odors. There was no amusement in her usual amusements, she merely disliked, she did not hate, but her dislike soon reached the point where it made her home life unbearable. All this, of course, had a serious effect upon her physical health. She pined and suffered in body as she pined, and suffered in mind. In three months she had lost weight, she became so weak that she was with great difficulty that she could do any daily work, and he was at his wits' end. He had accomplished much in many more or less similar cases by means of straight hypnosis, or treatment by suggestion, but he never followed this treatment without the consent of the patient; indeed, it would be impossible to do so. This girl was strongly opposed to the use of hypnosis, and he did not attempt it. He finally decided that there was only one possibility of securing improvement in her mental and physical health, and that lay in a complete change of surroundings. As his request her father began to make arrangements to send her to England for a long time. It was during one of the last of her visits to the doctor that the accident occurred which Dr. Luys thinks has resulted in a discovery of a new property of magnetism.

Of course, as progressive an experimenter as Dr. Luys had long before tried nearly every possible method of electrical treatment. His office, which is a wholly independent building in the big garden back of his house, is full of the most elaborate electrical appliances. Many of his instruments are the most valuable nature, and he protects them with the utmost care against the possibility of injury by outside electric currents. In order to do this he has at the back of his office a series of glass tubes completely insulated. Some months before the young woman's case had reached this point Dr. Luys, in a pure spirit of experimentation, had made a huge horseshoe magnet constructed in such a way that it would fit about the upper part of a person's head, with one of its ends or poles on either temple. It is his theory that the human body is a magnetic storehouse, and that it, like the magnet, has its north and south poles—its positive and negative sides. It was he who discovered that the magnetic subject in a certain state called forms would issue from any diseased portion of another person's body. It was the subject in a certain state called forms would issue from any diseased portion of another person's body. It was the subject in a certain state called forms would issue from any diseased portion of another person's body.

As the girl sat in his office that day in August, while he was filled with the feeling of other helplessness, which comes to the physician who has exhausted his resources unsuccessfully in his attempt to treat a patient, he set upon this magnet. He carefully lifted it from its place and placed it on the girl's head, with no idea that any important result would come from the slight movement. A moment after that some important callers arrived, and seeing to it that she was comfortably seated, he went back to his work with them. Probably three-quarters of an hour elapsed before he returned to the patient. He found the story at this point as nearly as it can be in the doctor's own words: "I should not have been at all surprised, had I had found that during my really unwarrantably long absence she had taken off the magnet and gone home. When I re-entered the office, however, she was sitting in very much the same attitude which she had assumed before I left her. A remarkable change, however, had occurred in her appearance. She was even paler than usual, her eyes were more deeply sunken than they had been, and it was evident that she was weaker than before. Indeed, it was very much alarmed by her appearance, and the fact that she seemed to the effect of the weight of the heavy magnet on her head, but this I know not. What she had done was to have the magnet removed from her head, and she had replaced it on the shelf, and then, instead of a robust man, seemed to be a weakling. He told me that she had been feeling somewhat fearful lest my experiment had done her harm. "After she had gone I set down to think of the reason for the girl's experience. It seemed highly improbable that her weakness had been caused by any effect of the magnet, when I considered the matter, yet that magnet was an unknown quantity. I went to the shelf, got it again and put it on my own head, deciding to wear it for as long a time as I could stand it, so that I might note its effect upon myself. For forty-five minutes I sat perfectly quiet in the same chair which she had occupied. I noted with considerable surprise that even my own strength—and I am a robust man—seemed to be wanting as the moments flew. At the end of the three-quarters of an hour I was quite unnaturally weak, but was as far from a solution of my difficulty—the real reason why she and I had both been weakened by the magnet—as I had been in the first place. My dinner hour had arrived, however, and I placed the magnet on the shelf again and went across the garden into my house. I have several children and a wife, and my very fond as I was gathered in the dining-room as I entered and greeted me with the usual chorus of welcome. I cannot describe to you my amazement when I found that their happiness at my coming had no echo in my own brain. My habitual pleasure at seeing them did not exist. Instead of that I felt toward them in a minor degree exactly the aversion which my patient had told me that she felt toward the members of her own family.

"Instantly the idea occurred to me that I might have discovered a new and most important property of the electric magnet. My experience seemed to indicate that the magnet while resting on the girl's head had absorbed some subtle influence from her brain and stored it up to transfer it later to my own mind when I in turn placed the instrument upon my head. "The Dr. Luys tells the story of his first experiments with his new instrument and the result. He has made many experiments since then. In the carefully written book in which he keeps a record of his work at his office the stories of these experiments are carefully told in scientific terms. It would not interest the public as large as to go into the details of piles, temperature and other medical technicalities which these records contain, but their general evidence is fascinating. If this evidence is born out by subsequent experiments the sentences "Dispositions for sale," with which this article opens, may not in the future seem as absurd as it does now. What was the first discovery? First—An ordinary electro-magnet so fashioned as it will rest upon a person's head with its poles touching his temples will to some unknown extent absorb any strongly morbid influence which may at the time be working in his mind. Second—After the magnet has been left for a sufficiently long time on the head of a person suffering from a morbid mental complaint, and is then placed upon the head of a person in a normally healthy state of mind, the morbid tendency of the sick man's mind will be to a considerable extent transferred to the healthy mind of the other person. Third—No appreciable effect is produced by transferring the magnet from the head of one perfectly healthy person to another. Fourth—The transfer of the magnet from the head of a healthy person to that of one suffering from melancholia, or other morbid mental disease is nearly always perceptibly beneficial. These comprise about all the facts which have up to the present time been ascertained by these extraordinary experiments. Dr. Luys is so far ever from understanding the reason of this strange effect of the electro-magnet, but he feels certain that further and careful study along these lines will result in important additions to the world's sum of electro-medical knowledge. When I asked him if, in his opinion, it would ever be possible so to develop this new plan that an artificial transfer of dispositions would be made between two people of different temperaments, as, for instance, the insertion of a good temper into the brain of a grumpy individual, the provision of a philanthropic disposition to a miser, and so on—he laughed. "No," he said; "these things will not be possible, but the things which seem fairly possible are so rarely wonderful. For instance, if my studies along this new line carry me far enough, so that by means of an electro-magnet I shall be able to inject healthy mental force into the mind of a morbid melancholic, or that I shall be able to transfer good brain influence from head to head as we now sometimes transfer healthy blood from vein to vein, I shall feel that my time has been valuably expended. That I shall within a year have the satisfaction of definitely accomplishing these things, and of accomplishing them every time I try, I have now little doubt."

Could be Reached Still. "Did you catch a glimpse of the foot-pat?" asked the policeman, who was stooping over the insensible victim, and examining his injuries. "Yes," answered the man, whose timely arrival had scared the murderers villain away. "He was a tough looking fellow, a little taller than I am, and wore chin whiskers." The prostrate man shuddered, gasped, and moved his lips. Conscience was returning. "Clearly speaking," the policeman heard him mutter, feebly, "there is no such thing as chin whiskers. Whiskers grow on the cheeks. He wore a chin beard."

Looking a difficult square in the face will often let it down. "Looking a difficult square in the face will often let it down. "Looking a difficult square in the face will often let it down."

DOES MUNYON CURE?

That Seems Like a Very Untimely and Absurd Question After All the Testimony

All the Tests, and the Thousands of Absolute and Unquestioned Cures That Have Been Made by Munyon in Canada.

Mrs. Walter C. Hamilton, corner Meeklenberg and Pitt Sts., St. John, N. B., says: "For years I was afflicted with rheumatism in both ankles. The joints were badly swollen and I could scarcely drag my feet along the floor. I tried numerous remedies, but received no benefit. After using one bottle of Munyon's Rheumatic Cure the swelling in my ankles went down. I received immediate relief from pain, and I can now walk about and do my house work without suffering. I can certainly recommend this great remedy."

Munyon's Rheumatic Cure seldom fails to relieve in one to three hours, and cures in a few days. Price 25c.

Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Price, 25 cents.

Munyon's Lung Cure prevents pneumonia and is a sure cure for a cold in a few hours. Price 25 cents.

Munyon's Cough Cure stops coughs, night sweats, always restores, and speedily heals the lungs. Price, 25 cents.

Munyon's Kidney Cure restores all forms of kidney disease, and cures all pains in the back, loins or groins and all forms of kidney disease. Price, 25 cents.

Munyon's Headache Cure stops headaches in three minutes. Price, 25c.

Munyon's Female Remedy positively cures all forms of piles. Price, 25c.

AT ST JOHN IN 1883

Orders by Mail promptly filled & Satisfaction Guaranteed.

The undemonstrated advantages are claimed for MacKenzie's spectacles.

- 1st.—That from the peculiar construction of the glasses they ASSIST and PRESERVE the sight, rendering frequent changes unnecessary.
- 2nd.—That they confer a brilliancy and distinctness of vision, with an amount of EASE and COMFORT not hitherto enjoyed by spectacle wearers.
- 3rd.—That the material from which the Lenses are ground is manufactured especially for optic purposes, by Dr. CHARLES BARDON, improved patent method, and is PURE, HARD and BRILLIANT and not liable to become scratched.
- 4th.—That the frames in which they are set, whether in Gold, Silver or Steel, are of the finest quality and finish, and guaranteed perfect in every respect.

The long evenings are here and you will want a pair of good glass so come to the Medical Hall and be properly fitted up or no charge.
