Ottawa, July 17.—The story appearing in a certain section of the Montreal Star, in which the Premier is represented as opposing the imperial council, is based on any authoritative information, and is, therefore, entirely untrue.

The Premier's Position. Practically the only thing stated definitely in what has been stated by your correspondent is that the Premier is not in favor of the imperial council.

IN NOBLE COMPANY. Let this serve, then, to introduce Mr. Marshall as a genuine poet and to signalize the fact that Nova Scotia now possesses a rising poet who, with that just appreciation which means adequate encouragement to persist in expressing his vision of nature and existence as it appears to him, is in the vanguard of the spiritual renaissance.

ARTISTIC TEMPERAMENT. This achievement, accomplished twenty-four years ago (1888), in the intervals of leisure in a life busy with routine of the legal profession and accomplished without the slightest training in drawing and modelling or in the sculptor's technique, is specially to be remarked as a proof of Mr. Marshall's native aesthetic and artistic genius.

HORTICULTURE COVER CROPS

Important Need of Many Orchards—Kinds and When to Sow.

Next to spraying, the crying need of the Canadian apple orchard is cultivation and cover crops. During spring and summer months, the orchard needs an enormous amount of plant food to grow wood, leaves and fruit, leaving a balance to cover the production of fruit buds for next season's crop.

Not only do the trees need plant food, but to convey that plant food to their leaves and back to the parts to be used there must be moisture and nourishment. Cultivation conserves moisture, besides conducting indirectly to the liberation of plant food.

MUCH IMPROVEMENT WORK NOW GOING ON IN THE CITY

No Cars to Be Allowed on King Street for a Week—I. C. R. Property Looked After—Inspection at Mispic With Idea of Developing Power.

Thursday, July 18. The city commissioners are doing a lot of work today. They are to make a trip to Mispic to inspect the city property this afternoon. It is understood that there is a possibility of developing electric power at the falls there and it is probable that expert advice will be obtained. The city is getting to be a very large consumer of electric energy and it is thought that with the power at Mispic property has been secured the city would be able to make a big saving. There is said to be other undeveloped water power in the vicinity and it is likely that in a short time the city will be supplied with energy generated at some of the waterfalls which are at present of practically no use to the city. Commissioner Wilson made an inspection tour of the water works at the west side yesterday afternoon but it was practically all over the same lines as his daily trip to the works on the east side. The work in connection with the King street paving is being rushed and a crew was at work last evening. Preparations are being made for the removal of the car tracks and the coating of the road is being removed. The public works department proposes to get the street ready for the work about the tracks and then close the car track and one side of the street to traffic. This will mean that all the cars will keep off of King street and only teams hauling to the stores and hotels will be permitted to use the roadway. The street will likely be closed for a week. The paving to be placed in King street will consist of granite blocks on a cement foundation between the tracks but the main part of the roadway will be of a combination tar and macadam construction. Broken stone will first be placed in the road and a coating of this tar preparation will be put on this. Then the macadam will be thoroughly rolled and afterward smaller sized stone will be used until the roadway is built up to its proper height. The paving which is being done in Pond street is on the L. C. R. property. The section in front of the freight sheds will be paved with granite blocks and will be practically a continuation of the city work which was done last summer. The section between Germain street and the tracks will be covered with the pavement has been in rather bad shape for several seasons and on wet days the mud was scattered all over the city pavement. The work on the paving in place Pond street should be much cleaner and remain in good condition for many years.

FORMER ST. JOHN MAN IS IDEAL IN ONTARIO

David Keltie and Others Forced Out of Oilfield by John D. Rockefeller -- Brother Lives Here.

Thursday, July 18. David Keltie, formerly of this city and brother of W. H. Keltie, of the customs department here, died at his home, in Collingwood, Ont., yesterday morning. Mr. Keltie will be remembered by older residents of this city and especially by shipping people as he was with Wm. Thomson the founder of the present firm of Wm. Thomson & Co. when Mr. Thomson was located on the North Wharf. Mr. Keltie left here in the early sixties going to Hamilton, Ont., where he accepted a responsible position as accountant for Buchanan, Harris Co., large general store keepers, and at the time one of the largest importers in Ontario. Later he returned to Niagara where he opened a general store of his own but sold out and invested in the oil wells of Pennsylvania. That was just previous to the entry of John D. Rockefeller with many other early investors was forced out and lost considerable money. Of recent years he has been associated with the Collingwood Shipbuilding Co., of Collingwood, but his health recently has not been of the best. His wife and one son, Percy W. Keltie, of Collingwood, and two brothers, W. H. Keltie, of this city, Robert Keltie, of St. John and John Keltie, of Roxbury (Mass.), survive him. He was a son of W. H. Keltie, a large brewer in the North End many years ago.

MAN ON THE PILGRIMAGE TO STE ANNE

Large Number Leave St. John to Join Gathering at Moncton -- Some Names.

Wednesday, July 17. The annual pilgrimage to the shrine of St. Anne de Beausse, Quebec, was begun yesterday and the first contingent leaving the Union depot at 11.30 was very large, there being many people from St. John and large numbers from other points in the province as well as from Nova Scotia. The pilgrims really start from Moncton, where they board a train and make up, containing about forty-four cars, and that city is the centre at which all from maritime points gather before journeying through the famous shire. It is estimated that between 1,300 and 2,000 people will attend from the maritime provinces. The pilgrimage is under the direction of Rev. Father Savage, pastor of St. Bernard's church, Moncton, and he will go along with the people from this city. His Lordship Bishop Casey left at 11.30 yesterday on the pilgrimage, and Rev. E. J. Holland, C. S. S. R. of St. Peter's, North End; Rev. D. Cormier, of Meteghan; Brother Benedict of St. Peter's, and three members of the Sisters of Charity, St. Peter's Convent—Sisters Miriam, Perpetua and Gertrude. Among the local people visiting the shrine were Mrs. John T. Cullinan, Rockland, and her sister, Miss Theresa M. Travis; Mr. and Mrs. R. O'Brien and daughter, Mrs. F. H. Tritts; Mrs. D. McCarthy and daughter, Miss Margaret, of Harrison street; Mr. and Mrs. John McCourt, Mrs. Peters, of Pennington street; Misses Florence Casey and Florence Phillips, of North End; Mrs. John MacLevy, Mrs. J. W. Simons, and Miss Edith, Manie and Alice Martin, of Chapel Grove. There were some with physical defects going to Ste. Anne to invoke intercession of the saint and mothers or fathers had with them a sickly child in the hope of the blessing of better health. The trains are all expected to arrive at Ste. Anne this morning and the pilgrims are expected to make a close connection by the ferry and proceed to Ste. Anne de Beausse, arriving there about noon. Ample time will be given for devotees at Ste. Anne, also visits to the Montmorency Falls, the Plains of Abraham, the monuments of Wolfe and Montcalm, and the various other places of historical interest in and about Quebec. The return train will reach Moncton on Friday morning.

MONCTON CONSTABLE IS ARRESTED

Moncton, N. B., July 17.—John W. Colpitt, a Moncton constable, was arrested by Sheriff Willett yesterday afternoon and handed over to Constable Hazen Dobson, who took him to jail in Hillsboro. It is alleged that Colpitt, in the recent provincial election, voted in both Albert and Westmorland counties. The case will be up today before Magistrate Peck in Hillsboro.

PROMISE COAL DEVELOPMENT NEAR SUSSEX

Outside Capitalists Said to Have an Eye on Kings County Coal.

The Sussex Record says: Representatives of large financial interests were here this week investigating the coal deposits of the country. A number of property holders in the vicinity of Mount Middleton were approached and asked to lease of their real estate holdings, with options to purchase at the end of three years. For many years it has been known that coal deposits were to be found in Kings county. Disinterested opinions have been carried on spontaneously for some years. The activity in the Mount Middletons has attracted attention to the New Brunswick coal fields and it looks now as if new sources of supply would be opened up. The Record was shown some samples of coal found in the vicinity of Mount Middleton and they leave no doubt as to the existence of coal there. How large the quantities are will have to be determined by practical demonstration. If satisfactory arrangements can be made with the property holders in the neighborhood of the mines, it is proposed to dig the capital and to acquire diamond drills in order to ascertain more definitely the amount of fuel available. If the investigation justifies further action the land will be acquired by those interested and permanent development will be commenced. While the coal is at present isolated, a discovery of large deposits would doubtless mean the construction of a railway through the district. Several of those interested have agreed to lease their lands and permit the work of investigation to proceed. The late N. S. Sharpe, who was one of the men who helped to develop the coal mines of Springfield (N. S.), was a firm believer in Kings county coal deposits, and at one time was about to give the matter serious consideration, when he was called to Nova Scotia. The work there occupied his attention up to the time of his death. There is no doubt as to the Mount Middleton outcrop being part of the Minto range, which runs across the counties of Queens and Kings. While it is too early to say anything definite as to the probable outcome of the movement, it is encouraging to find that outsiders are interested themselves financially in the venture.

SCHOONER RAVOLA PILED UP ON ROCKS

St. John Schooner Will Probably Be a Total Loss—Tug May Be Sent to Her—Struck in Fog.

Thursday, July 18. The St. John schooner Ravola, Captain Charles Morrell, is piled up on the rocks at Little Duck Island, and is probably a total loss. Word to this effect was received by J. Willard Smith, the owner of the vessel, yesterday morning. The schooner seems to have had a run of misfortune. It was only a few weeks ago that the Ravola was ashore at Shalshals and she had just completed repairs at Port Greville. It had been intended to send her to the schooner last night but pending further information as to the prospects of saving her, this has been deferred until today. The vessel had taken a cargo of lumber from Boston to Shalshals and was returning light for another cargo. A dispatch from Swan's Island (Me.), last night, says: "The two-masted schooner Ravola, of St. John, bound from Boston to Shalshals, was wrecked on Little Duck Island ledge in a dense fog last night, and probably will be a total loss. The schooner struck at flood tide, and was hung up on the ledge at the bow and stern, so that a person could walk beneath the hull at low water. The members of the crew were standing by awaiting orders from the owners. The schooner registers 12 tons net."

HOPEWELL HILL NEWS

Hopewell Hill, July 17.—A young lad named Robertson was before the police court at Albert today charged with entering and stealing goods from the store of one of the merchants there. The boy, it is understood, got in possession of the key of the store, and took place on the premises, entering the place on two occasions. He is only eleven years old, and it is probable he will be sent to a reformatory. Miss Josephine McLean, who has also been living in Toronto for some time, is expected to arrive here for her holiday with relatives at River-side. Miss Annie G. Milton, of Coverdale, who has been teaching for two years in western Canada, is visiting at the home of Mr. and Mrs. C. L. Peck at the Maple.

The seriousness of the invasion

The seriousness of the invasion of New Brunswick by the brown leaf moth is shown by the fact that specimens were captured by A. Gordon Leavitt in St. John street this week. He caught twenty-three at the corner of Colborne and Garden streets and in Union street from Germain to Dook and Tuesday evening, on the same ground, captured forty-eight. In addition, Mr. Leavitt was seen to be occupying places high up on electric light poles. Something was done early in the invasion to check this source but not enough and it is felt the government should take a grip with this insect pest at once.
