If you are building or going to com-
plete some unfinished rooms, let us
show you some colored samples, illus-
trating the beautiful color effects ob-
tainable by using this material and the
side board for walls and ceilings in
all classes of buildings.
We carry a large stock in assorted
sizes.

MAIL ORDERS.
We solicit out of town orders which
receive our personal attention. The
length of time taken to fill orders is
guaranteed very largely by how busy we
are in the department of our factory
in which the particular goods are
made. While we have considerable fac-
ilities for promptly turning out goods,
it is important to place orders as far
ahead as possible. Orders are filled
by us in the relation in which they are
received, and customers can always
depend on our doing everything in
reason to give prompt despatch.

CALL RESTIGOUCHE FARMERS TO MEET

Will Discuss Matter of Organi-
zation of United Farmers
Of N. B.

In keeping with progress in other
lines the Farmers of New Brunswick
are organizing under the name of the
United Farmers of New Brunswick.
For this purpose every farmer in
Restigouche is invited to attend meet-
ings to be held next Monday, June
24th. The first meeting will be held
at the Court House, Dalhousie at 2
o'clock, p.m. and at the Temperance
Hall, Charlottetown at 8 p.m. The matter
of organizing a Restigouche branch
will be discussed.
Mr. C. L. Smith of Woodstock,
President of the United Farmers of
N. B. central organizer and Mr. R.
McKenzie of Winnipeg, Secretary of
the Canadian Council of Agriculture
will speak at both meetings.
Every farmer should come to these
meetings.

BODY RECOVERED SATURDAY P. M.

Was Found Near Maple Green—
Funeral Sunday
Afternoon.

The body of Royce McLaughlin, the
nine year old son of Mr. and Mrs.
Harry McLaughlin who was drowned
off the government wharf on the eve-
ning of May 20th was found near
Maple Green by Mr. Percy Jellett, Sat-
urday afternoon. Dr. Martin, coroner
was notified and the body was brought
to town and removed to the under-
takers where it was prepared for
burial.
The funeral was held Sunday after-
noon at 3 o'clock, Rev. Fr. Wallace
officiating. The pupils of the Con-
vent school, with the two Sisters at-
tended in a body. The pall bearers
were: Robert Campbell, George
Whalen, Michael O'Connell and Vin-
cent Campbell.
The bereaved family have the sym-
pathy of all in their sad bereavement.

MANY CITIZENS HAVE ALREADY REGISTERED

Cards Being Filled and Handed
in to Registrars—Register
Early.

Throughout Restigouche the differ-
ent Registrars are hard at work and
many have already filled out the re-
gistration cards and have registered
according to law. Any person can
register to-day or Friday, but all of
sixteen years and over, must register
not later than Saturday, June 22nd.
There seems to be an impression that
those over sixty need not register.
This is not so. All over the age of
16 are compelled (unless sick or in-
firm) to register. The penalty is
\$100 fine and one month in jail, and
\$10.00 for each additional day after
June 22nd.
It costs nothing to register and re-
gistration booths have been opened in
every school house and at many of the
general stores throughout the country.
Citizens are advised to register at
once.

PATRIOTIC RECITAL VERY SUCCESSFUL

Opera House Crowded to Her
Mrs. F. H. McKeen a
Local Artists.

The Opera House was well filled
Tuesday evening to greet Mrs. F. H.
McKeen of Chatham, together with
local artists, who appeared under the
auspices of the Soldiers' Comforts As-
sociation of Campbellton.
Mrs. McKeen, dramatic soprano,
who is so well known on the North
Shore was in splendid form and was
enthusiastically cheered. Mrs. H. B.
McDonald of Chatham acted as ac-
companied.
Mrs. Alan A. McRae, who has be-
come a great favorite with Campbel-
ton audiences gave two readings, and
responded to encores.
Miss Forrester, violinist was en-
thusiastically cheered and her play-
ing was greatly appreciated.
The net proceeds for the Soldiers'
Comforts Association amounted to a
little over \$75.00.

REST. STEAMER SERVICE WANTED

Between Campbellton and
Carleton, Que., Would be
Extremely Popular.

Dalhousie, June 19.—Alderman H.
H. McNeil deserves credit for having
at a recent meeting of the Dalhousie
town council brought up the question
of a steam ferry service between Dal-
housie and Quebec points. With no
Board of Trade in the shire town, the
council is the proper body to consider
a matter of this kind. Now that
there is no service of any kind by
boat on the Restigouche river and Bay
Chaleur, why not consider the idea of
establishing a service by water be-
tween Campbellton, Dalhousie, Mau-
gusha, St. Omer and Carleton? These
places are all prepared with substan-
tial and commodious wharves for that
purpose. A steam boat that would
accommodate pleasure seekers as well
as farmers, who wish to sell produce,
etc., in the towns of Campbellton and
Dalhousie, would do good business. The
farmers would benefit greatly by the
convenience, the merchants would see
their trade improved and the work-
ing classes would appreciate the compe-
tition that would lessen considerable the
cost of living. The details of the
service could be easily worked out for
the general trip and for a regular ser-
vice between Dalhousie, Maguasha
and Fleury's Point. With the splen-
did wharf accommodation that exists on
the route mentioned, the generous
subsidy voted by the Legislature of
New Brunswick, there should be en-
ough interest taken by the towns of
Campbellton and Dalhousie, to make
the scheme a grand success. What
nicer sail could any person wish for
than a trip on the water from Camp-
bellton to Carleton. The latter place
is an ideal summer resort. It is well
provided with hotel accommodation. A
grand spot for bathing, boating, and
fishing. If we are not to have a
steamer on the Campbellton, Dalhousie
and Carleton route for sometime, why
not arrange for the Campbellton and
Carleton service. A committee of the
Board of Trade of Campbellton, could
meet a few of the business men of
Dalhousie to consider the project.

RIDE A BICYCLE

Ivanhoe Bicycles \$50.
75% of bicycles used in town, are
Ivanhoes, follow their examples, they
are guaranteed for the season. Buy
one at last year's price, \$50 while

CHAMPION COW GONE TO P. E. I.

R. L. Hicks Sells Best New
Brunswick Cow to
J. W. Jones.

R. L. Hicks in making a comment to
The Campbellton Graphic re the sale
of "Abbekirk Queen's Countess" a re-
gistered Holstein Friesian Cow to J.
Walter Jones of Charlottetown, P. E.
I. "I am proud to say that she was
bred and developed by us, and al-
though only five years old she made
last February in an official seven
day test 30.32 lbs. butter, which makes
her champion cow of New Brun-
swick and P. E. I. and second for Nova
Scotia, being beaten there only by a
full sister to her Dam also developed
by us, and sold some years ago to
Jogan Bros. Amherst, N. S. For in-
formation for the citizens of Camp-
bellton who have been using milk
from our herd for some years, I
might say this cow was sold subject
to the tuberculin test, and went through
without any sign of reaction and
pronounced in perfect health.
Mr. Jones decided upon the pur-
chase of Countess after making a
tour of inspection of the herds of the
foremost breeders of Ontario, selecting
eighteen heads there, representing an
investment of over \$5,000.

OBITUARY

The death occurred at the Syracuse
Memorial Hospital on Monday, June
10th of Marjorie M. F. Hastings,
daughter of Capt. and Mrs. Frank
R. Hastings after an illness of two
weeks. She had made her home
during the winter months with relatives
in Syracuse, N. Y., where she was at-
tending Central High School. Her
father is in England with a Medical
Unit, of the Canadian Army. The
interment was made in the family
lot at Barton, Vermont.

Miss Catherine Kerr Miller who had
been for a considerable time suffer-
ing from enlargement of the heart
and who came from St. John, N. B.,
a few months ago to be the subject of
the kind care of her sister, Mrs. T. B.
Adams at Tide Head, suddenly and
peacefully passed away to the eter-
nal rest on Sabbath afternoon last,
aged 58. In the evening Rev. James
R. McKay conducted an impressive
religious service attended by the near
relatives of the deceased and several
friends who motored out from Camp-
bellton to pay a last tribute of respect
and by their presence to express their
sympathy with the bereaved ones.
The remains were taken to Camp-
bellton station on Monday morning
and there transferred to the Ocean
Limited by which accompanied by
Mrs. Adams and Mr. Harry Miller of
the McLennan Foundry & Machine
Works, Campbellton, they were con-
veyed to St. John where interment
was made.
The late Miss Miller was an intel-
ligent, thoughtful and benevolent
lady and died as she lived with faith
in the Redeemer.
She was the daughter of the late
Neil Miller of St. John and leaves be-
hind her to mourn their loss two sis-
ters, Mrs. T. B. Adams of Tide Head,
and Mrs. Richard McNeil, of Vancou-
ver, B. C. and four brothers, Harry
of Campbellton, William, James and
John in St. John and Albert who is
at present with the 13th Reserve Bat-
talion in England.

HIGH PRAISE FOR THE Y. M. C. A.

Dalhousie Boy Says We Cannot
Give too Much to This
Organization.

Extract of a letter from a Resti-
gouche boy at the front since the be-
ginning of 1914.
In answer to mother's question in
reference to the Y. M. C. A. well all
I can say is this, that you cannot give
too much to them. In advance and
hard scraps they serve coffee, tea,
cocoa, biscuits and chocolate free.
Away up in the front areas I have
seen poor fellows badly shot up com-
ing down hardly able to crawl and
drop in a Y. M. C. A. dugout for
something to eat and they appreciate
it so much. They have canteens all
over the country, and as you would
expect to pay for fruit, etc., at cost
prices. There are some things they
make a profit on at times, but each
month any surplus is divided between
the various units and this goes to pay
extras for the men. They have to
pay ocean transport like anyone else
and that is where a lot of the money
goes, but when you see the sports
equipment, writing paper, etc. dealt
out to us free, you would quite real-
ize where the money goes. Two
nights this week we had peaches for
evening lunch and only paid 20c a
tin. These are only a few of hun-
dreds of good things they do for us.
Electrical apparatus for free movies
cost a lot, yet how good they are
when men get lonely and not feeling
good.
You ask if we are going to win the
war, that is too hard a question for
me to answer at the present, but if
all the infantry would fight like ours
there would be no giving ground. If
the people at home only knew the
stands made by our old N. B. Battal-
ions within the last few months, the
gaps would be filled without conscrip-
tion.

MEETING OF W. C. T. U.

The Women's Christian Temperance
Union will meet on June 25th at 3 p.m.
in St. Andrew's Hall. Members are
reminded that this is the annual meet-
ing, at which the election of officers
and superintendents takes place. The
delegates to the convention in Sack-
ville will also be elected. The pro-
gramme committee and social com-
mittee for the coming year will be
chosen. A full attendance of all the
members is urged by the Executive.
No meetings will be held during July
and August, but the Union will take
up its work once more on September
10th, the second Tuesday of that month.
Superintendents are reminded to
forward their reports of the year's
work to the provincial superintendents
of their departments, whose names
and addresses will be found in the
directory for N. B. and P. E. I. pub-
lished in the White Ribbon Bulletin.

CARD OF THANKS.

Mrs. Margaret Terrett and family
of Eel River, N. B., wish to thank
their many friends for kindness and
sympathy extended to them during
their recent sad bereavement.

Boy's Clothing

The largest stock and best values of Boy's Suits
in this country to-day.

RAILWAYS.

Department of Railways and Canals, Canada.

CANADIAN GOVERNMENT RAILWAYS.

Railway from Moffat Station, N. B. SEALED TENDERS, addressed to the undersigned, and marked on the outside "Tender for construction of Railway from Moffat Station, N. B." will be received up to and including twelve o'clock noon, Friday, June 21, 1918, for the construction of about 2.7 miles of railway from a point on the Main line of the Intercolonial Railway at Moffat Station to a junction with the International Railway, about seven (7) miles from Campbellton, N. B.

Plans, specifications and blank form of contract may be seen at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, Ont., at the office of the Chief Engineer, Canadian Government Railways, Moncton, N. B., and at the office of the President Engineer, Campbellton, N. B. All the conditions of the specifications and contract forms must be complied with.

Tenders must be put in on the blank form of tender, which may be obtained from any of the offices at which plans are on exhibition.

Each tender must be accompanied by an accepted bank cheque payable to the Honourable the Minister of Railways and Canals for an amount of \$5,000.

The lowest or any tender not necessarily accepted.

By order,
J. W. PUGSEY, Secretary.
Department of Railways and Canals,
Ottawa, June 17, 1918.
June 13-2 wks.

TENDERS FOR COAL.

SEALED TENDERS addressed to the undersigned, and marked "Tender for Coal for the Dominion Buildings," will be received at this office until 12 o'clock noon, on Thursday, June 27, 1918, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained at this office and from the caretaker of the different Dominion Buildings.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to 10 p.c. of the amount of the tender.

By order,
R. C. DESBOISCHERS, Secretary.
Department of Public Works,
Ottawa, June 6, 1918.
June 13-2 wks.

A Kidney Remedy

Kidney troubles are frequently caused by badly digested food which overtaxes the organs and eliminates the irritant acids formed. Help your stomach to properly digest the food by taking 15 to 30 drops of Extract of Roots, sold as Mother's Kidney Cure, and your kidney disorder will promptly disappear. Get the genuine.

PASPERAC WEST, QUE.

WOUNDED, LAY FIVE WEEKS BEHIND A GERMAN TRENCH

British Soldier With Shattered Thigh Finally Crawls Back To Friends—One of Most Astounding Stories Of the War Told By Private Taylor.

What is regarded as one of the most astounding stories of the war is told by Private J. Taylor, of the London Regiment, who has received a Distinguished Conduct Medal. Private Taylor's own story, as told in the London Express, is as follows:

"It was during one of the attacks on part of the Hindenburg line on June 16, last year. We had gone over the top two companies together, following up a successful attack made in the same direction on the previous day. This time we were met by a terrific fire, and our fellows were dropping like ninespins. I was a stretcher bearer and I was trying to patch up one of our men who was down when I was knocked out myself by the bullet which fractured my thigh.

"After that I remembered nothing for some hours. It may have been a day or it may have been two when I recovered consciousness, with a parching thirst and a great sense of weariness and pain.

"I discovered afterwards that we must have passed beyond our objective, and we were therefore behind the enemy's trench and support trench at this point the front trench had been taken on the previous day, and these he now occupied were not backed up by others, but had open country behind them. I did not know at the time however, that I was behind the enemy's line at all. I managed to crawl into a large shell hole near at hand, and lay there another day and night.

"Then a comrade, a man named Peters joined me. He also had been wounded but could move rather more freely. He had found shelter in another shell hole near by.

"We could tell the position of our own trenches fairly accurately by watching the fire of the trench mortars, which seemed about 1000 yards away. I was in too much pain and too weak to move. We lay together all day in the hole, expecting every minute almost to be hit, and at night Peters crept out and foraged among the dead for scraps of bully beef and iron ration and water from their bottles. After a few days, mercifully it began to rain and by spreading our capes and a sheet we collected drops of muddy water, which just kept us alive.

"This sort of existence lasted for about five weeks. Then one night Peters went out and did not return. I lay huddled under the sheet and was taken prisoner.

"It was the following night that the Germans evidently rendered suspicious by the capture of Peters, came three of them—to the hole where I was lying. I lay perfectly still. One of them lifted my leg, but not the one that was broken, or I should probably have cried out. They seemed satisfied and went away.

"I was now left without help in getting food or drink. During the next fortnight I ate the remains of bully beef; then for two days I had nothing. It was then, feeling that nothing worse could happen to me, that I resolved to try to crawl towards our own line.

"It was an ink black night when I started. I had gone some distance when unexpectedly I came on the German trench. I could have put out my hand and touched the men. The trench—a deep, narrow one—was lightly held, and it would have been impossible for me with my broken leg, to have climbed out of it again. I managed to crawl a little distance along to a quiet point, and then, summoning up all the strength I could, Iung myself across. The Germans never saw me.

"The next thing I knew I was in their wire, and how I scrambled through I do not know. I was a mass of cuts and blood and rags when it was over. I crawled on across No Man's Land, and presently was up against more wire. It did not occur

to me at the time that it was British wire, and I was desperate. Just then a light shot up beside me and in its flash I saw an unmistakable British face the other side of the wire. I shouted, "Don't shoot; I'm a Tommy!" A sergeant called out to know who I was; then three of them lifted me over the wire.

"I must have been a sight; no clothes, starved almost to the bone, bearded, filthy, but the men were amazed to see me at all. They were an advanced machine gun post, and had been watching me crawling towards them, ready to pick me off at the right moment."

Private Taylor is a single man, about 25, and before the war worked in a factory in London. He was seven times rejected for the army owing to the fact that he is blind in the right eye, but as he was otherwise fit he succeeded at last in evading the sight test by a feat of memory and has developed almost into a marksman, firing from the left shoulder. Although he is still obliged to use crutches he expects to recover use of both limbs.

HOME EFFICIENCY OF NEW BRUNSWICK FOOD PRESERVATION CAMPAIGN

During 1917, "The Home Efficiency Clubs of New Brunswick were organized, as a means of giving girls from ten to eighteen years of age, an opportunity to do their bit in food preservation. Last year, nearly 100 Clubs were formed, embracing 1700 girls. These reported 50,000 quarts of food canned, or otherwise preserved, and doubtless much was done that was not accounted for.

At the beginning of 1918, Miss Marjorie Fletwell was appointed Supervisor of the Girls' Clubs, and she has now over 200 local organizations of young people under her direction. During the winter months the Club members devoted their energies to Red Cross Sewing. During the summer, they will carry on an extensive Food Preservation Campaign. Last year the Domestic Science Teachers of the Province volunteered to help in the work and gave three weeks of their vacation to the service, free of charge.

This year, these teachers will be employed by the Educational Department to serve the Clubs, during the latter part of July and the first of August.

To prepare, for this, they will meet at the Normal School, Fredericton, from July 9th to 13th, and take a short course in methods of Food Preservation, Food Values and Club activities generally. While here the itinerary of each teacher will be planned, and after the Convention, each will go directly to work among the girls in the various parts of the Province.

Those in charge hope to accomplish twice as much this year as last.

HOW THEY LOOK.

The visitor was a special friend of the editor and was one of the few who were admitted to the private sanctum.

"Who is that neat, dapper little chap I noticed coming through the outer office?" asked the visitor.

"Oh, that's the sporting editor," said the editor.

"Is that so? Then who is that big, burly man smoking the large pipe and who wears that killing expression?"

"Ah, that is Flossy Flipflap, editor of the Women's Advice page."

OF COURSE.

Sergeant—Where are you going, Jones?

Private Jones—To fetch water?

Sergeant—In a glass case, you trousers?

Private Jones—No, sergeant, in this here pail.

Season Ticket Wanted.

At a college in England it is against the rules for male students to visit the "resident lady boarders." One day a student was caught in the act and brought before the headmaster, who said:

"Well, Mr. Blank, the penalty for the first offence is four shillings, for the second 10 shillings, for the third £1 and so on up to ten pounds."

"And what would a season ticket cost?" inquired the culprit.

Triumph of Art.

The old lady entered the taxidermist's shop in a blazing wrath, carrying a deformed bird in a glass case.

"It's an imposition," she said. "You stuffed my poor parrot only last summer, and here's his feathers falling out before your very eyes."

"Well, madam, that's a mistake of our art," was the reply. "We stuff them so natural that they moult in their proper season."

THE MAKING OF A FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on with the reliability, accuracy, skill and cleanliness which attend the making of this great medicine for woman's ills.

Over 50,000 pounds of various herbs are used annually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is sterilized and as a final precaution in cleanliness the medicine is pasteurized and sealed in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydia E. Pinkham's Vegetable Compound which we are continually publishing attest to its virtue.

A MESSAGE TO CHILDREN.

Miss Florence E. Ward is an official of the U. S. Department of Agriculture, whose duty is to find out better ways of doing things and then to tell the women and boys and girls of the country about these better ways. This is the message which Miss Ward sends to the children of America.

"I wonder if you realize, girls and boys, that the great war is really being fought for you? The soldiers are giving themselves, their time, thought, money and materials to make the world of the future a safe place in which to live. That future belongs to you, and so this war, with all the burden and grief in it, is really being fought for you. It is a war fought in order that you may live in a world of peace, in a world where the golden rule of Christian idealism, and not the iron rule of barbaric militarism, will be the rule of life.

"Therefore, anything that you can do to help your Uncle Sam to win the war for peace and for you will be not only of national service now, but of international service to the world of the future. You can help by doing your work faithfully at school, for Uncle Sam will need trained minds for the work after the war, you can help at home by eating cheerfully whatever foods we Americans are asked to eat, so that our Allies may not starve; you can play and work so as to keep well and help raise food, or sell Thrift Stamps, or collect money for war purposes, or save things that are going to waste; you can help foreign children in America to learn our language, and to understand the freedom for which America stands; and above all things, you can be a centre of loyal patriotism for your country and the cause of humanity for which Uncle Sam has gone to war.

"The children of Belgium and of France salute the Stars and Stripes wherever they see them, because they know how Uncle Sam sent food when they were hungry. Some of them are still hungry, and besides, have to go to school carrying gas masks, as well as books, and must study under the noise of guns and the fear of air raids or the destruction of their homes. Be ever ready to salute the flag, and to answer, 'I'm ready,' to any call that comes to you to help win this war for peace and for you."

Time the Cat.

The landlady bustled up to her new lodger as he came down to breakfast the first morning.

"Good morning sir," she wheezed.

"I hope you've had a good night's rest," said the landlady.

"No," said the mid-mannered little man. "Your cat kept me awake."

"Oh," said the landlady, tossing her head, "I suppose you're going to ask me to have the poor thing killed."

"No, not exactly," said the gentle lodger. "But would you very much mind having it tuned?"

Contentment consists in having a great deal to do and doing it.

THE PULMONARY TONIC

MORIN'S WINE

CRESSO PHATES

A rich tonic wine combined with essential oils and medicinal herbs, it is a powerful stimulant for all cases of debility and weakness. It is the most effective of all tonics.

Prepared by J. B. Morin & Co., Limited, 101, St. John Street, Montreal.

Ne Cease For: Alarms.

Old Maid (rushing down hotel corridor—sneezing)—Help! Help! There's a man in the room.

Heroic Guest—"Did you see him?"

Old Maid—"Yes."

Heroic Guest—"Did he see you?"

Old Maid—"Yes."

Heroic Guest—"You don't need any help."

Scaplanes Are Active

Aiding the Destroyers

In Fighting Submarines

THE report of a squadron commander of the Royal Naval Air Service, after a recent hostile air raid, shows the odds which British pilots cheerfully accept in battling off the raiders. The officer in question had been flying continuously under war conditions in France, bombing and fighting, for upward of eighteen months.

"When 11,000 feet," runs his report, "I saw ten Gothas coming inland. I climbed up to them, engaged one on the right of the formation about three miles out to sea at something over 12,000 feet. Fired 100 rounds from straight behind his tail at 20 yards' range. Bullets were seen to strike the Gotta's fuselage. Machine started into a slow spin. I followed and fired about 25 more to him to make sure. My gun then jammed, and in trying to clear, I got on. Got out of this just in time to see the enemy crash into the sea. I then landed, had my gun jam cleared and went up after the remaining eight Gothas—one had been shot down in flames—and caught up with them at 14,000 feet and engaged them in turn from both above and below. Then devoted all my attention to the formation about three miles out to sea at something over 12,000 feet. Fired 100 rounds from straight behind his tail at 20 yards' range. Bullets were seen to strike the Gotta's fuselage. Machine started into a slow spin. I followed and fired about 25 more to him to make sure. My gun then jammed, and in trying to clear, I got on. Got out of this just in time to see the enemy crash into the sea. I then landed, had my gun jam cleared and went up after the remaining eight Gothas—one had been shot down in flames—and caught up with them at 14,000 feet and engaged them in turn from both above and below. Then devoted all my attention to the formation about three miles out to sea at something over 12,000 feet. Fired 100 rounds from straight behind his tail at 20 yards' range. Bullets were seen to strike the Gotta's fuselage. Machine started into a slow spin. I followed and fired about 25 more to him to make sure. My gun then jammed, and in trying to clear, I got on. Got out of this just in time to see the enemy crash into the sea. I then landed, had my gun jam cleared and went up after the remaining eight Gothas—one had been shot down in flames—and caught up with them at 14,000 feet and engaged them in turn from both above and below. BANISH KITCHEN WORRIES WITH A NEW PERFECTION OIL COOKSTOVE

THIS summer should not find you cooking on the old-fashioned coal range. Prepare for hot weather. Buy your New Perfection Oil Cook Stove now and know real cooking comfort.

The Long Blue Chimney provides a clean, intense heat. Its long draft consumes all the fuel without heating you or the room in the process. No odor—no smoke. It bakes, roasts, broils, toasts—gives every cooking service at the low cost of coal oil.

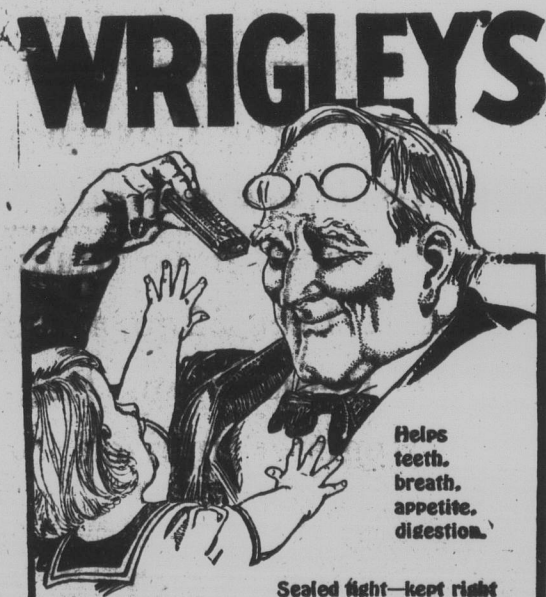

The New Perfection Oven is scientifically designed and ventilated to bake unusually well and does it.

The Cabinet adds to the appearance of the stove and is very convenient in many ways.

Royalite Coal Oil gives best results
IMPERIAL OIL LIMITED

THE RUN OF THE BIG YEAR.

Reverend Aspect of the Salmon Fishery Has Disappeared.

British Columbia salmon is a staple product of the world over. The superior quality of the sockeye salmon, especially, has created a market for them wherever there is a demand for canned fish. This world-wide reputation has naturally led to an extensive exploitation of the fishery, and, in spite of a measure of restrictive legislation and artificial propagation, there has been a steady decline in the catch during the past twenty years. This is especially true of the Fraser River fishery. The international character of the stream has made it impossible, up to the present, to secure adequate restrictions and regulations.

As is well known, the life history of the sockeye salmon extends over a period of four years, and each year the fish that were spawned in the upper waters of the Pacific Coast rivers four years before, come in from the sea to deposit their spawn in turn and then die. It is during these seasons of inward migration that the fishermen gather their harvest. One of the strange and romantic features of these migrations is that every fourth year the run of fish is many times larger than during any of the three years preceding or following it. This phenomenon has occurred so regularly that it is commonly spoken of as "the run of the big year." The explanation most generally accepted is that, at some period, before the advent of the white man, the fish were overtaken by some disease, or other calamity, which either prevented spawning or destroyed much of the spawn during a period of three years. As to confirm this theory, the enormous rock side in the Fraser in 1913—a big year—which prevented the salmon getting up the river to spawn, caused a tremendous falling off in the catch of 1917. Thus, in 1913, 2,401,488 cases were packed by Fraser river canners, while the estimate of the total pack of 1917 is only 528,800 cases, or only about 18 per cent. of the catch of 1913. Such a decline is a calamitous one and only the most carefully enforced restrictions over a period of years can restore, or even save, the fishery.

At the ninth annual meeting of the Commission of Canadian Fisheries, J. P. Babcock, Assistant Commissioner of Fisheries, British Columbia, said:

"The history of the fishing in the Fraser River district in the past four years is a record of depletion. It is a record of excessive fishing in the lean years; a record of failure on the part of the authorities of the State of Washington to realize the necessity of conserving a great fishery, notwithstanding the convincing evidence submitted to them by agents of their own creation that disaster was impending to one of their great industries."

"The Canadian authorities, on the other hand, have, by their representations and acts, evinced, in unmistakable manner, their willingness to deal squarely and adequately with the conditions that forestall depletion and to join with the State of Washington or the United States Government in legislation to prevent it."

If this can be done there should be no reason why in the course of time every year should be a big year. On the other hand, a continuance of the present wasteful methods of fishing, especially by American fishermen, can only result in the complete depletion of this valuable fishery.

Canada's Democratic Army. "Canada's Democratic Army," is the title of a column special article in The London Chronicle, intended to show that insistence on staff college standards of leadership in the field is a mistake. The writer points out that the commanding officer of the C. E. F. Army Corps, Gen. Currie, though always a keen military student and citizen soldier, is a real estate agent; Gen. Turner, commanding the Canadian Division, is a member of a large Quebec firm of wholesale grocers, but a born soldier; the Canadian Division is led by a former editor of The Ottawa Citizen, Morrison; Brigadier-General Ross is a miller in business; Brigadier-General MacLennan and Griesebach, and the late Gen. Mercer were all solicitors, and Brigadier-General Watson, commanding the 4th Canadian Division, who had no active service before the war, was formerly a reporter.

One might, says the writer, go through the whole list of Canadian generals and find not more than four or five professional soldiers, and bearing of all this is that the British armies are full of extremely able and slightly trained civilian men, not getting a chance. Staff college training has proved again and again a disadvantage. The Canadian civilian showed common sense and no colwells, and has frequently done better than his staff college men.

Our War Figures. Canada's war expenditure for the nine months of the fiscal year ending December 31 amounted to \$171,748,888. During the same period in the previous fiscal year the expenditure was \$170,225,748. For the months of December alone, the war cost \$19,778,568. In December, 1916, it cost \$23,762,317. The revenue of the Dominion for the nine months was \$190,658,376, as against \$166,866,249 for the similar period in 1916. For December alone the revenue was \$20,627,343. In December, 1916, it was \$21,943,775. Expenditure chargeable to revenue, \$86,932,587, as compared with \$81,686,505 in the previous year.

The total national debt of the Dominion on December 31 stood at \$976,428,504. On the same date in 1916 it was \$728,111,448. During December the debt increased by \$19,427,803, which was approximately a million less than the war expenditure for that month.

ORDER YOUR STAMPS. It is necessary for every grocer to have rubber stamp of his Food Control License number with which to stamp his stationery, etc. Send your license number to the Graphic and we will supply the necessary stamp at short notice. Ink pads also carried in stock.

How It Happened. "Jackie, your face is fairly clean, but how did you get such dirty hands?" said the boy's mother. "Washing my face," said the boy.

A CRIPPLE FOR THREE YEARS

Helpless in Bed With Rheumatism Until He Took "FRUIT-A-TIVES"

MR. ALEXANDER MUNRO

R.R. No. 1, Lorne, Ont. "For over three years, I was confined to bed with Rheumatism. During that time, I had treatment from a number of doctors, and tried nearly everything I saw advertised to cure Rheumatism, without receiving any benefit."

Finally, I decided to try "Fruit-a-tives". Before I had used half a box, I noticed an improvement; the pain was not so severe, and the swelling started to go down.

I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place."

ALEXANDER MUNRO.
50c. a box, 6 for \$2.50, trial size 25c.
At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Why Should He.

For three solid hours the captain had been lecturing his men on "the duties of a soldier," and he thought it was time to see how much they had understood of his discourse. Casting his eyes around the room, he fixed on Private Murphy as his first victim.

"Private Murphy," he said, "why should a soldier be ready to die for his country?"

Private Murphy scratched his head for a moment, and then a smile of enlightenment crossed his face.

"Sure, captain," he said, pleasantly, "you're quite right. Why should he?"

One From France...

Sammy had been charged too much for a meal in an "estaminet" in France and could not make the proprietor understand what was wrong. He at last went out and called his pal, Brown, who was always boasting of his prowess in the French tongue.

"I'll settle it!" said Brown, determinedly, and turning to the proprietor, he said:

"Parley-voe Francey?"

"Mais oui, m'sieu," said the proprietor, bowing.

"Well, what about this darned change, then?" said Brown.

Some Hike.

"Astronomers tell us," said the man of statistics, "that an express train moving a hundred miles a second would consume several million years in reaching a certain star."

The other man sat silent, wrapped in thought.

"Did you hear me," asked the man of statistics.

"Oh, yes, I heard you," responded the other quietly. "I was just thinking what a predicament a chap would be in if he should miss the last train and have to walk."

The Reason.

Barber—Have I shaved you before? Customer—Yes, you have.

Barber—I don't seem to recognize your face.

Customer—No; it's healed up now.

Rural England.

Tramp (watching draymen rolling beer barrels into village pub)—Beautiful scenery, ain't it, Bill?

How He'd Fix Her.

"Oh, Jack, what will I do?" "Why, what's up?" "Miss Tellen saw you kiss me."

"Never mind, dear. I'll fix Miss Tellen."

"I'll kiss her and let you see me."

HARE HAS SNOWSHOES.

Nature Has Provided White Rabbit With Protective Coloring.

The well-known hare of the east and north, the Northern hare (L. Americanus), the so-called "white rabbit," is good game in his proper season, and he possesses the great advantage over the "jack" of being also good eating. Child of the snow that he is, he makes his home in the wilds, fearing neither drifting nor biting blast. He loves the unbroken forest, the snarl of tangled thickets, the twisted wreck of the tornado, the dusk of swamps, soundless beneath lonely hills. This hare, like the ptarmigan, furnishes a beautiful example of nature's loving provision for the welfare and safety of her feeble children of the north. In summer the ptarmigan wears a mottled coat which admirably blends with the prevailing tints of the lichenous rocks of its haunt. Upon the approach of winter the bird's plumage gradually turns white, while a growth of hair-like feathers upon its legs and feet thickens until it forms the snowshoe foot—the best possible thing to support the bird upon snow and to protect its feet from frost. The hare, lacking gifts, requires better protection, and nature attends to it. The prevailing color during summer is a greyish brown, which is the most inconspicuous of tints among rocks, shrubs and the various surroundings of the breeding season. The hare's special gift, without which he would speedily succumb to various foes, including climate, are: shape, speed, coat, and foot. His long, narrow body is designed to easily pass between close-growing saplings, while his speed is quite sufficient to insure him a fair chance of escape from his deadliest foe. But his form and fleetness would be well-nigh useless in deep, loose snow, were it not for his peculiar foot. This in winter becomes a veritable snowshoe, a truly marvellous contrivance which enables him to patter at will over drift and level which would otherwise hold him fast. A helpless prey to rapacious birds or beast that chose to attack. Nothing better for their purpose than his furry pads can be found in nature's storehouse of marvels. His coat, too, plays an important part. Thin and cool during the heat of summer, it grows weather approaches it thickens apace until it forms one of the lightest and warmest of coverings.

Of the north were quick to appreciate its valuable features and wore strips of it in the form of wraps. But the warmth of the coat is not its sole peculiar feature. Brown fur upon a snow would be entirely too conspicuous, so nature meets the difficulty with another beautiful provision. As the coat thickens as a guard against cold it gradually turns white to match the increasing snow. The brown pales to a cream, and the cream changes to a pure white. Stripes down the spring back, and patches about the big eyes, remain to tell of the summer garb. So these too fade until the hare is either pure white, or so nearly so that he can squat amid the snow and so closely by match his surroundings as to escape even practiced eyes. If by chance he is caught, he can turn as white as the snow and in a few bounds vanish in the snowy woods, where every leaf and stump is a hiding cover. This is well, for in addition to man, he has natural foes, such as the lynx, fox, wolf, fisher, marten, the great horned and snowy owls and other birds of prey. On rare occasions, too, prey upon him more or less, for if once cornered he offers no defence whatever.

Sawing Ships in Half.

The Great Lakes have contributed liberally of their vast resources to replace the ravages of the German submarines through the entire autumn the coming of heavy ice and the closing of navigation upon our inland seas was forecast by a steady procession of their craft from the St. Lawrence. Nor was that all, as they sailed, for the passageways from the four upper lakes to the lower, the greatest traffic routes to the blue waters of the salt sea is barred by great natural impediments. But for years ago the Canadians passed them by means of canals. And the determining factor in their passage was Lake Erie to the sea has been the chambers of the canal locks, about 250 feet in length, 45 feet in width and 14 feet in depth. Long ago the lake craft that conformed to these dimensions were built at the abundant and cheap cost of the lumber shippings along the upper lakes. And between fifteen and twenty modern steel vessels, averaging from 385 feet in length—almost the extreme for a cargo-vessel of less than 45 feet beam—were taken through the Welland canal and the canals of the upper St. Lawrence this last autumn.

The process was simple, although not particularly easy. The vessels were sawed in half. Gunks of men in the dry docks of Cleveland and Buffalo, equipped with acetylene torches, did the job in a time to be measured in hours rather than in days. Temporary water-tight bulkheads were installed and the vessel towed in two sections to the deep water harbor of Montreal. It was another job of hours rather than days to join the hull together at the dry docks of that port and to fit the fresh water tramp with condensers and other equipment necessary for a craft who digs her heels into salt water for the first time.—Harper's Magazine.

Used Canadian Apples.

Canada figures in one of the most distasteful of the plots hatched by the pro-German influences in Russia to end the war while the Czar was on the throne. Aided by that arch-friend, the Czarina, the Kaiser sent 150 barrels of Canadian apples inoculated with cholera germs for distribution through charitable institutions with a view to starting a plague, and so discouraging Russia, but the fruit decayed on route and was thus unfit for consumption on arrival.

A Palpable Bit.

Asked to explain what he understood by a "sure-footed animal," a little fellow replied: "I think it's an animal that when it kicks it doesn't miss."

Gets a Full Night's Rest.

Pipeleg—House cleaning is not so bad after all.

Packs—How can you say that?

Pipeleg—Well, my wife has lent the baby to its grandmother for a whole week.

Save Food

In a time needing food economy, Compy people are not getting all the nourishment they might from their food.

It is not how much you eat, but how much you assimilate, that does you good.

The addition of a small spoonful of Bovril to the diet as a peptogenic before meals leads to more thorough digestion and thus saves food, for you need less.

DELAY IN CALL OF 19 YEAR OLD MEN

Ottawa, June 12.—Call to the colors of 19 year old men is delayed. It is now considered improbable that many, if any, of the men will be summoned before September or October. Up to the present 51,883 men of 19 years have registered for military service.

D. J. BUCKLEY ON FORESTRY COMMISSION.

Mr. D. J. Buckley of Newcastle has been elected by the limit holders of the province to represent them on the Forestry Commission, which was created by recent legislation. The choice of the private land owners has not yet been announced.

NEWS FOR THE BOYS.

So many of our soldier boys request that the Graphic be sent them each week that we have decided to offer the Graphic mailed to any address overseas for \$1.00 per year or 50 cents for six months.

GIRL'S STATEMENT WILL HELP CAMPBELLTON

Here is the girl's own story: "For years I had dyspepsia, sour stomach and constipation. I drank hot water and olive oil by the gallon. Nothing helped until I tried buckhorn bark, glycerine, etc., as mixed in Adler-Ka-ONE SPOONFUL helped me INSTANTLY." Because Adler-Ka-ONE relieved the Entire alimentary tract it relieves ANY CASE constipation, sour stomach or gas and prevents appendicitis. It has QUICKEST action of anything we ever sold. (A. Mc G. McDonald, druggist).

SUFFERING CATS! GIVE THIS MAN THE GOLD MEDAL

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

This drug is a sticky ether compound, but dries at once and simply shrivels up the corn without inflaming or even irritating the surrounding tissue.

It is claimed that a quarter of an ounce of freestone obtained at any drug store will cost very little but is sufficient to remove every hard or soft corn or callus from one's feet. Cut this out, especially if you are a woman reader who wears high heels.

Knew He Lied.

COMMANDER RIZZO TELLS HOW HE SANK AUSTRIAN WARSHIPS.

Dodged Through Escort of Ten Destroyers and Sent Two Destroyers Against Dreadnought, Sending it to Bottom.

Venice, June 13.—Commander Rizzo, whose remarkable exploit in sinking the Austrian battleship in the Adriatic has thrilled Italy, tells a graphic story of the encounter. In which he took part, and during which another Austrian battleship was either badly damaged or destroyed by another motor boat in charge of Commander Millazzo. It is possible that 2,000 sailors were lost during the encounter. "I am sorry for the sailors who lost their lives," he said in beginning his story, "but am glad that we got the dreadnoughts. Why they had ventured out of Pola harbor no one knows, but it was certainly foolish for them to do so."

"I was on patrol scout duty as usual off the Dalmatian coast, near Passa Selva, between the islands of Asinolo and Preuda. I had just finished my patrol, and, as it would soon be daylight, had turned for my base when, about ten miles away, I saw a great enveloping cloud of smoke. It appeared like a blot through the early light."

"I thought at first it was some boat which had discovered me and was giving chase. I determined that the safest course was to turn back and get it before it got me. Here is where my luck, as my friends call it, looked for misfortune, as it is no fun to be chased."

Got By Destroyers.

"Anyway, I determined to make the best of a bad fix. After turning back I said to my two crews of ten men to each boat: 'Follow me, the Italian scout boats have been waiting for two years and the whole Italian navy has been trying to destroy Austrian ships for three years. Are you willing to risk all on a chance of obtaining glory and the country's gratitude? I have signed the second battleship to the other motor boat, while I took the first.'

"We were speeding back with our motors muffled, when to my amazement I discovered two battleships surrounded by a number of destroyers, which later counted as ten. I signed the second battleship to the other motor boat, while I took the first."

"I slipped inside the line of destroyers between the third and fourth of the craft. I was not noticed in the light fog."

The water was smooth and my torpedoes got off nicely. My first, with a 500-pound charge, struck the first dreadnought between the two funnels, while the second struck her just at the second funnel. As the torpedoes exploded I saw the mighty ship trouble, two great fountains of water rose high in the air, and black smoke billowed up from the rents in her side."

"Then I ran for it, as there was between the second and third destroyers in the line. I was discovered by the fourth destroyer, which gave chase at a distance of 150 yards and firing on me. I was too close, however, to hit. Then I dropped a depth charge, such as is generally used against submarines. Fortunately for us, it exploded under the destroyer. I saw her leap into the air, turn sharply and then, giving up the chase and permitting us to escape. The other destroyers were busy trying to save the lives of the sailors on board the Dreadnought."

Knew He Lied.

"Met an old friend of years ago the other day. Had a long talk about you."

"Well, he's a damned liar!"

DALHOUSIE.
Sheehan Music Store.
The Clifford Pharmacy.

Thursday, June 20th, 1918.

WHO MUST REGISTER.

There seems to be some misunderstanding as to who shall register, and we quote the following from the regulations:

"On June 22nd, Saturday, every man and woman, resident in Canada, who is 16 years and over must attend at one of the places provided for registration between the hours of 7 a.m. and 10 p.m., and there truthfully answer all the questions set forth upon the registration."

"While all are compelled to register on Registration Day, it is not contemplated by the Government to force the sick, feeble and aged to turn out. If such persons will notify the Registrar prior to June 22nd of their inability to attend at a place of registration, an effort will be made to register them at home, provided the request is reasonable and justified."

By this it will be seen that every person over 16 years of age must register.

Hon. F. B. Carvell's announcement that Canada must raise a war loan of five hundred million dollars, this year, to meet war obligations, is a warning to every individual to save and prepare to subscribe to the limit.

Canada has had its last Patriotic Fund campaign. After the funds now in hand or promised are exhausted, which will not be till well into 1919, the government will have to supply the money for the allowances to soldiers' families. The great sum of \$38,000,000 has been raised by voluntary effort.

AN ANGLO-AMERICAN ALLIANCE

How College Editor Views Vital Problem of the Future.

The necessity for close co-operation between all the English-speaking peoples and also the moral and national justification of such a combination are recognized by all who have devoted serious thought to the problems of the future and are willing to free the world as it really is. In Germany, and also in Japan, such an association is widely considered to be inevitable. But the question still remains what, if any, outward form shall this essential co-operation take. As the Germans deny the reality of the world community and base their policy upon the assumption of an inherent antagonism between juxtaposed states, they cannot conceive of this future relation as other than an offensive and defensive alliance of the older type with its aggressive and selfish purposes. To them the project is merely the expression of the self-regarding, but entirely justifiable, nationalism of a world-wide group of closely related states. But an association of this character, as alliance of Governments, would mark no real advance to a better international future. Unless it were an alliance of peoples based upon their common ideals as well as upon the common needs, it would be an ephemeral arrangement. Fortunately the spiritual foundations exist. As Viscount Grey has expressed it: "The more closely the two peoples come into contact, the better they get to know each other, the more I believe it will be apparent to each not only that they speak the same language, but that they use it to mean the same thing, that they both have the same idea of freedom and liberty, and desire the same sort of world in which to live. A popular democratic alliance based upon such like-mindedness points the road to new types of political association which will permanently unite under a common law different nations and states. Such an organization based upon the will to co-operate would give some assurance of the possibility of an ultimate world state. Otherwise the outlook would indeed be black. If mankind is to be forever split up into the water-tight political compartments of the modern state system, if each state is to cling forever to its sovereign independence, there will be no ultimate prospect of an effectively organized world community and we will continue to demand its human holocaust."—Yale Review.

Haig Doesn't Care.
A London correspondent notes that in matters of dress etiquette, Sir Douglas Haig, commander of the British forces in France, is the most unconventional of field marshals and the despiser of strict disciplinarians. Besides discarding the shoulder strap of his Sam Browne belt, Sir Douglas refuses to wear the heavy hilted sword awarded for officers' valor. He also defies custom by using a smoking hat for his horse instead of the heavy service pattern.

Rich in Petroleum.
Buenos Aires, a city petroleum found abundantly in the Argentine Provinces of Mendoza and Patagonia, will, in all probability, be utilized considerably in the future. The petroleum is rich in petroleum, from which is made oil.

Birdmen of the Empire

Have Notable Record

For Daring Escapes

STORIES of daring escapades of British aviators, exhibiting aerial combats from which the air-fighters escaped alive seemingly only by miracle and of brilliantly executed raids upon German aerodromes and troops behind the German lines are narrated in the reports of the Royal Flying Corps covering the activities of about one week. Hair-raising incidents of fierce combats above the clouds, or low over the German communication lines are described in these succinct reports without bombast, as though these narrow escapes from death were commonplace and all in the day's work of the air-fighter.

For example, there was the case of a British aviator, who, when nearly a mile above the earth, was attacked by two enemy aircraft. He shot down one of them out of control, but was himself wounded and fainted while still high in the air. Recovering consciousness, he found his machine upside down at an elevation of 4,000 feet, with one enemy aircraft still flying at him. The Britisher, however, managed after a struggle to right his machine and land safely.

In a somewhat similar instance, a German scout attacked a British airplane carrying a pilot and observer. One of the German's bullets passed through the gasoline tank of the British airplane and seriously wounded the pilot. The British observer, however, pumped a full double drum of bullets at the enemy scout at very close quarters and the German went to the ground with a crash.

Meanwhile the British pilot had fainted and fallen against the steering "stick" in such a fashion as to throw the airplane into a spin. The British observer climbed over the side and ran along the plane to the pilot's cockpit, lifted the pilot to his seat and, still standing on the wing of the plane released the steering gear, brought the machine out of the spin and safely to the ground.

Two British officers were returning from an expedition over the enemy's lines to locate hostile batteries when their machine was hit by anti-aircraft fire and the engine damaged. Volplaning, the machine landed 300 yards from the British lines, the airplane turned over and the aviators were hurled out on the German side of a canal. Running along the beach under heavy fire from rifles and machine-guns, the aviators dived into the canal only to find it full of barbed wire, but managed to reach the British lines in safety.

Many instances illustrating the reckless daring of the British aviators sent over the German lines to obtain information, destroy aerodromes and harry the German forces are contained in the official narratives. One pilot who crossed the lines at night, threw off two attacking machines, bombed the Heule aerodrome near Lille and was fired upon by two machine-guns. He dived at one of them, firing with both guns of the British airplane, drove the German from their guns, fired upon the aerodrome again, attacked and scattered a column of 200 German infantry on the road. A German two-seater airplane was circling 500 feet above him for an attack. "I zoomed up under its tail and fired into it," writes the British aviator. "It crashed down onto the railway."

Another British pilot had fired a hundred rounds on German troops on the march when he was interrupted by two enemy airplanes. He attacked them and drove both down and then finished the job of driving the German infantry into trenches and shell holes.

Flying at the height of 200 feet a British aviator engaged in a revolver duel with two German officers in a motor and while doing so ran into some lines of telegraph wires, but fortunately his machine cut them. A few minutes later he attacked German infantry, which escaped his gun only by diving into a pond.

Famine to Follow War.

"After the war the world will be weary, cold and hungry, and if we are to avoid famine and revolution something will have to be done at once," said Sidney Webb, a political economist, in a speech at the London School of Economics. He asserted that peace would come suddenly and unexpectedly and then the world would be forced to face a great shortage, signs of which were already visible.

The wheat stocks of the world, he said, had been reduced to the smallest amount ever known and there would be a shortage of one pound of meat a day to each person. Flocks and herds all the world over would be much diminished. Even the pig was rapidly disappearing. Metals, coal, timber, hides and leather and all building materials would be at famine scarcity.

One-eighth of the world's population, he declared, was engaged in non-productive work. The economy that could be set up against that was very small.

"There would be a long interval between demobilization and the repairing of the devastation and waste. During that interval there would be unemployment. In all the countries, causing an unproductiveness that would mean rather a money famine than a food famine."

"We should now be making preparations to revivify the world if we are to avoid a shortage developing into a famine," said Mr. Webb.

Free use of alkaline mineral waters is recommended for the removal of uric acid deposits in any part of the body.

The child who cries for cake may live to cry for bread.

WE SELL THEM

DALHOUSIE.

Dalhousie, June 19.—On Friday evening, at the home of Mr. and Mrs. W. A. Gallop, the friends of Mr. Fred Gallop assembled and presented to him a handsome chair together with an address voicing the good wishes of his friends on his approaching departure from the state of single blessedness.

To this address Mr. Gallop made suitable reply. Light refreshments were then served. Those present were Messrs. A. McG. MacKenzie, M. McKay, A. R. Fraser, A. B. McKinnon, H. C. Sharpe, J. Edmed, J. Midgley, E. R. Richard and R. G. Mowat.

A very enjoyable shower was held at the residence of Mrs. Clarence Coof on Friday evening in honor of Miss Florence Montgomery, who is to be one of the principals in an interesting event, during this week. Among those present were Mrs. A. R. Fraser, Mrs. D. G. Stewart, Mrs. H. J. Trudelle, Mrs. Ed. Shipley, Mrs. Thos. G. Scott, Mrs. L. D. Jones, Mrs. Duncan McLean, Mrs. Morrell, Mrs. W. G. Gallop, Mrs. F. J. Clifford, Mrs. Art. McMillan, Mrs. J. E. McLean, Misses Eva Barberie, Nan Dalley, Annie MacNeil, Minnie MacNeil, Margaret Wright, Miss Smith, Miss Harquail. Much merriment was caused by the reading of original verses which accompanied each gift. Ice cream and cake were served and a happy spirit pervaded the entire party. Miss Montgomery has only been a resident of Dalhousie during the past few months, but has already made many friends, who wish her many years of happiness.

Mr. Tabor, Bathurst, Miss Lou Nelson, Campbellton; Miss Elsie Montgomery, Moncton; and Mrs. Downs and her daughter Miss Downs of Campbellton, are in town the guests of Mrs. Ed. Shipley.

Mrs. Benj. Windsor, New Mills, was a visitor to Dalhousie on Tuesday.

Mr. and Mrs. A. R. Fraser spent Sunday with their friends in Campbellton.

Mr. W. H. Little of New Hampshire, U. S., is visiting his son Charles Little on Tuesday, he, with Mrs. Charles Little and Miss Margaret Blundell, went to Campbellton by boat and returned by train.

Abraham Landry, Carleton, P. Q., is visiting his daughter Mrs. Ed. Italian. Wm. F. Humphrey, Esq., M. P. P. of Moncton, N. B. was in Dalhousie on Monday, a guest at the Queen. He had just arrived from a trip on the Gaspe coast and reported that the fishing so far had been below the average.

Mrs. Enright, Port Daniel, P. Q. is visiting her daughter Mrs. Herbert Sorer.

P. M. Shannon, Campbellton was a recent visitor to the shiretown.

Ex. Councillor Ed. Bernard and James Drappeau, who have been appointed for the registration to be taken on the 22nd of June will hold court at the Upper and Lower schools, Balmoral, on that day. They were in town on Monday receiving instructions.

Joseph E. Hamel has returned home Three Rivers, where he attended the funeral of a relative.

Messrs. O. Smith, A. D. McKenrick, F. G. Kerr and Harry Smith of Campbellton, motored to Dalhousie on Sunday.

W. F. Napier, Campbellton, was among the many Campbellton folks who visited Dalhousie on Sunday.

Notices are posted here announcing a meeting to be held in Dalhousie on Monday June 24th, to be addressed by C. L. Smith of Woodstock, N. B. and R. McKenzie of Winnipeg, Sec. of Can. Council of Agriculture. The object of the meeting is to organize a branch of the U. F. of N. B. (United Farmers of New Brunswick). All the farmers in the vicinity of the shiretown are invited to attend. Meeting at 2 p.m. River Charles at 8 p.m.

Mr. and Mrs. James Stewart have arrived here from Ontario to visit their friends. Much sympathy will be extended to Mrs. Stewart who hurried home when she was notified by wire of her mother's death.

Mr. and Mrs. J. B. H. Storer, Bathurst, were in town to-day, having motored up and were on their way to Campbellton.

Walter H. Gray, Campbellton, was among the visitors who motored to the shiretown to-day.

Miss Rita M. O'Connell, daughter of Rev. R. J. Coleman, Dalhousie who spent her holidays recently at the rectory here, graduated from the Springfield Hospital, Mass on Thursday last.

The Montreal papers announce that Sir George E. Foster and Mrs. Geo. F. King will leave Ottawa tomorrow for Dalhousie, N. B. The Minister of Trade and Commerce has been invited

by the members of the Great War Veteran's Association of Restigouche Co., to deliver a lecture on the war at the Inch Arran House on the evening of July 1st.

Mrs. Degraze, Boston, is visiting her sister Mrs. John Letourneau. News received today from Point La Nim and Maguash go to show an improvement in the salmon fishing.

Force of Habit.
Jack—Why did you break your engagement with that school teacher?
Tom—If I failed to show up of an evening she expected me to bring a written excuse signed by my mother.

OWLS! LEMON JUICE IS A SKIN WHITENER

How to make a creamy beauty lotion for a few cents.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quart of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold cream. Care should be taken to strain the lemon pulp through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quart pint of this creamy fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

Mrs. Wm. Carle and family wish to thank their friends for the kindness and sympathy shown them in their sad bereavement.

G. W. V. A.
A full attendance of members of the G. W. V. A. is requested at the meeting to be held next Wednesday evening. Very important matters are to be taken up.

MEETING OF MUSICAL CLUB.
The regular meeting of the Campbellton Musical Club will be held on Tuesday evening, the 25th, at Mrs. W. H. Miller's. This is the last meeting of the season.

APPOINTED DELEGATE.
Lieut. O. J. Lawson has been appointed to represent the Restigouche branch of the G. W. V. A. at the convention to be held at Toronto, July 29th.

PUBLIC AUCTION.
The household effects of the late Judge Botkin will be sold by auction, at his residence, Friday evening, June 21st, at 8 o'clock. Terms strictly cash.

DR. KIERSTADT HERE.
Dr. Kiersteadt addressed a meeting in the interests of food control in the Town Hall last evening. A committee of retail merchants was formed to see that the general public were made aware of the various regulations pertaining to food control.

NORMAL SCHOOL EXAMS.
At the Provincial Normal School, Fredericton, last week, the number of candidates taking the examinations were 241. These included seven grammar school, one superior, ninety-four class, and one hundred and thirty-nine second class.

CARRY YOUR PAPERS.
Unless one carries with him the necessary papers to insure an uninterrupted passage, he can never tell just where he may have to spend the night. This was proven on Friday when a commercial traveller while enroute to St. John was held up by the Military Police at McAdam and was sent to St. John under escort. On Saturday morning after he had stated his case to the authorities he was permitted to leave the "clink."

RECEIVED DIPLOMAS.
Among those receiving diplomas at St. Joseph's College, Memramcook, N. B., are the following:
Commercial Diplomas:—
Jean A. Olscamp, Ste. Anne de Restigouche, Que.
Lionel G. Madaue, Chandler, Que.

Short's Writing Diplomas:
Chas. A. Champoux, Campbellton, N. B.
Jean A. Olscamp, Ste. Anne de Restigouche, Que.
Alphonse A. Leger, Barachois, N. B.
Yvonne Beaulieu, Ste. Anne de Restigouche, Que.
Shorthand Diplomas, 100 words a minute:—
Jean A. Olscamp, Ste. Anne de Restigouche, Que.

PTE. ANGUS HAMILTON VISITS CAMPBELLTON

Went Overseas With 132nd Battalion, Was Wounded and Taken Prisoner.

Pte. Angus Hamilton of Eel River who went overseas with the 132nd Battalion and after being in France nine months went over the top at Lens when he was badly wounded in the leg with shrapnel. He was not able to move and was shortly after picked up by stretcher bearers of the German army, his wounds dressed and then sent to Hamburg hospital.

Pte. Hamilton says that while in Germany he was well treated, and every care was given him, but his leg had to be amputated above the knee. When an exchange was arranged, Pte. Hamilton was one of the party. Before the embarkment for Holland they were visited by the Crown Prince, who spoke pleasantly to them. He asked Pte. Hamilton what he expected to do when he returned to Canada, as he has lost a leg and received the reply that he was not worrying about that, it was the getting back to Canada he was worrying about.

Pte. Hamilton is visiting his aunt Mrs. Angus McKennie. He says that food is very scarce in Germany and of poor quality. He was very thin when he reached England, but is picking up now that he is back home.

ADVERTISING RATES.

On account of the greatly increased expenses in connection with the publishing of The Graphic we find it necessary to re-adjust our advertising rates.

The rates will be as follows:
Transient advertisements such as notices of entertainments, sales, legal notices etc.—
Per inch, first insertion 70c.
" " subsequent insertion 40c.

CLASSIFIED.

NOTICE!
Notice is hereby given that pursuant to Chapter 115 Revised Statutes of Canada, 1906, McLennan Foundry & Machine Works, Limited, one month from the date of the first publication of this notice will apply to the Governor-in-Council for the approval of the site and of the plans of a certain wharf to be constructed on the Restigouche River in the Town of Campbellton in the County of Restigouche and province of New Brunswick.

The plan and description of the site and of the wharf to be constructed have been deposited with the Minister of Public Works at Ottawa and a duplicate of such plan and description has been deposited in the Office of the Registrar of Deeds for the County of Restigouche at Dalhousie in the said County of Restigouche.

Dated at the Town of Campbellton in the County of Restigouche this sixth day of June, A. D. 1918.
McLENNAN FOUNDRY & MACHINE WORKS, LIMITED, per ALEXANDER McLENNAN, President.

Public Notice
NOTICE IS HEREBY GIVEN that all persons to whom any indebtedness is due and owing by the late Theodosius Botkin will present their claims duly attested thereto, to either of the Executors, David F. Graham or Charles A. Alexander, or to the Proctor, M. A. Kelly.

And all persons owing the said estate of Theodosius Botkin will make payment to the said executors or Proctor at once.
M. A. KELLY, Campbellton, June 12-4-wks. Proctor.

Province of New Brunswick.
Departments of Agriculture and Education.
Rural Science Schools for Teachers at Woodstock and Sussex
JULY 10 TO AUGUST 8, 1918.

The full course of study in the Rural Science Schools occupies two summer sessions with an interim Winter Reading and Experimental Course. It includes, 1. Chemistry of Soil, Plants and Animals, 2. Physical Nature and Environment, 3. Nature Study of Animals, 4. Plant Life and School Gardening, 5. Methods of correlation and study in the public schools with the regulations dealing with the work. No options. (See regulation 50 in the Nature Study and Agriculture Course.)

Satisfactory completion of the Course entitles teachers to receive certificates of competency.
In naming the school an applicant wishes to attend the principle of readiest accessibility from home should govern.
Teachers actually engaging in the public schools of New Brunswick are eligible for admission free of charge.

Both schools open at 2 o'clock in the afternoon of July 10th. Teachers who propose to attend for Second year classes are requested to present themselves at 10 o'clock in the forenoon for examination of the Winter Reading and Experimental Course.

As no standard certificates are issued by the Railways this year students will purchase return tickets with receipts for amounts paid for same. Cost of transportation from home to school (the one way) will be paid on conditions stated above.
For further information and for admission apply to,
R. P. STEEVES, Director Elementary Agricultural Education, Sussex, N. B.

ton last week.

Mr. and Mrs. Arthur Frenette and

children of Bathurst are the guests of

Mrs. John Culligan, Sr.

Mr. and Mrs. Leonard Winton and

child and Miss Marion Winton of

Campbellton motored down on Sunday

and were the guests of Mr. and Mrs.

William Winton.

The monthly as well as annual meet-

ing of the New Brunswick Women's

Institute met on Friday evening at

the home of Miss Annie Ullman. The

society is just one year old and in a

most flourishing condition. After the

meeting was called to order by the

President, Roll Call was proceeded with

and answered by a Flower quita-

tion. The minutes of the previous

meeting were read and approved. The

financial statement of the year was

rendered by the Secretary and the

society is to be congratulated on the

splendid showing it has made for its

year of existence. The correspon-

dence was then read and discussed.

The School Prize Mite Box was open-

ed and a most gratifying amount dis-

covered within. The selection of the

prizes was given to a Committee of all

the teachers in the society, with Mr.

SAYS LEMON JUICE

WILL REMOVE FRECKLES

Girl! Make this cheap beauty lotion

to clear and whiten your skin.

Squeeze the juice of two lemons into

a bottle containing three ounces of

cedar white, shake well, and you have

a quart of the best freckle and

tan lotion, and complexion beautifier,

at very small cost.

Your grocer has the lemons and any

drug store or toilet counter will supply

three ounces of cedar white for a few

cents. Massage this sweetly fragrant

lotion into the face, neck, arms and

hands each day and see how freckles and

tan disappear and how clear, soft

and white the skin becomes. You'll

be amazed.

which were also very much appre-

ciated as usual. Then followed a solo

by Mr. John E. Hicks, "Joan of Arc,"

which received a hearty encore. Mr.

Bremner of Chatham then gave a

short address. He has been with us

before and his address was up to its

usual high standard. Mr. Bremner

spoke of soil cultivation, as his prin-

cipal topic and received great atten-

tion. Miss Trites then rendered one

of her usual much enjoyed declama-

tions, "A Farmer and His Wife," to

which she received two encores. A

very successful meeting was brought

to a close with a few remarks from

Rev. E. de la Garde, and the Presi-

dent, Mr. Davis, after which was ren-

dered the National Anthem. Rev. E.

de la Garde entertained those who

took part in the programme after the

meeting. Dainty refreshments were

served and a most enjoyable time

spent. The Agricultural Society has

obtained a large amount of Paris

Green, which the members can obtain

for 60c. per pound, which is below

the present wholesale price. Also a

car of feed and flour is expected

which by being bought through the co-

operative plan saves the members a

considerable amount on each article.

The Society has received ten new

members since the last meeting, and

is in a most flourishing condition. If

it continues to prosper at the present

rate of speed, it will very soon be the

best branch in the province, and I

think it is all due to its energetic

President.

A party of engineers are busy at

Armstrong bridge where it is expected

the upper works will soon be complet-

ed. It is greatly needed as the old

one is getting very shaky and gives

old shivers to cross it.

Death carried away one of our old

citizens on Tuesday last, when Mr.

John Noel passed away at the advan-

ced age of 82 years. Mr. Noel

has been in failing health for some

months so that death was not unex-

pected. His widow, formerly Miss

Mary Frieze, five sons, Charles, A.

Francis and John of this place, Alex-

ander of Belvedere, and William of the

United States Army, and five daugh-

ters, Mrs. Mary Meader, Mrs. Mar-

garet Hogan,

HERE IS THE DAY YOU REGISTER

ON June 22nd, Saturday, every man and woman, resident in Canada, who is 16 years and over, must attend at one of the places provided for registration, between the hours of 7 a.m. and 10 p.m., and there truthfully answer all the questions set forth upon the registration card. Upon signing the card, vouching for the accuracy of the answers, the man or woman will receive a Registration Certificate, as shown below, which must be carried upon the person thereafter.

Why the Certificate is so Important

For failure to register a maximum fine of \$100 and one month's imprisonment is provided, also an added penalty of \$10 for each day the person remains unregistered after June 22nd. Persons remaining unregistered cannot lawfully be employed, and cannot draw wages for work done after June 22nd. Employers who keep unregistered persons in their employ will be liable for fines equal in amount to those recoverable from the unregistered employees. Unregistered persons cannot lawfully purchase transportation tickets, and may find themselves barred from travelling on railroads, steamboats, etc. Similarly they may be denied board and lodging at any hotel, restaurant, public house or boarding house. In a word—All persons remaining unregistered, and all persons having dealings with unregistered persons, knowing them to be such, incur heavy penalties under the law.

REGISTRATION IS LAW—Don't Fail to Register.

This Certificate is YOUR Protection. Get it and Carry it

AMERICANS INVENT "CANNON BALL" TO SALVAGE SUNKEN BILLIONS

What boundless wealth in precious metals and jewels lies in the sea? For countless ages, adventurous mariners, lured by the prospect of snatching fabulous riches with one fell swoop from the fathomless ocean, have squandered the fortunes of galleons and land-lubbers and others, only to be thwarted in their desperate efforts by the unobtainable depth that intervenes. From the days of the sinking of the Spanish galleons laden with gold and silver ingots, pearls and diamonds and other rare gems of exceeding value, which moth and rust doth not corrupt, to prevent their capture by enemy pirates, down to these days of the sinking of the leviathan liners by the ruthless German submarines, every secker of sunken treasure has devised unique and original methods to overcome the difficulties, but modern inventions have thus far failed to provide the equipment to insure the success of these audacious schemes.

Invent New Salvage Devices.

Now comes Simon Lake, the submarine inventor, and W. D. Sisson, an American engineer, with implements perfected, they claim, for recovering the billions of dollars' worth of ocean tonnage and non-perishable cargoes strewn about the bottom of the boundless waterways in the wake of centuries and beneath all the courses of the world's merchant marine in times of peace.

The oddest contrivance for the raising of sunken vessels is the "cannon ball" submarine invented by Sisson. It looks like a huge steel ball, 3 feet in diameter. The shell is made of tough Yandium steel, 1.4 inches in thickness and weighs, with the machinery inside, six tons. The largest pontoons are 40 feet long and 15 feet in diameter. They have a lifting power of 300 tons each.

The operators form the crew of the diving bell. They work in normal atmospheric condition. A large oxygen tank on top of the sphere provides them with ozone and this tank has a capacity of 72 hours' supply of air. The supporting cable and all electrical and telephone wires are carried in an insulated cable which is stout enough to support 56 tons weight.

Two propellers and a rudder give the undersea balloon lateral movement, and two other propellers send it up and down. These propellers drive the driving bell at the rate of two miles an hour. On the front two large magnets draw the ball towards the side of the sunken ship.

Lake's Scheme Simple.

The ball is equipped on the front side with four 3000 candle power nitrogen lamps, covered with a steel net and a two-inch glass, to light up the hulls of the sunken vessels, and near each light is a lookout lens four inches in thickness through which the beauties and activities of subsea life can be clearly seen.

Simon Lake, the famous submarine inventor, has a simpler method for the resurrection of vessels from their last resting place at the bottom of the ocean. When a ship has gone down to such depth that the water above holds it in a death grip by its very weight, then that ship's doom is sealed, it is said. The scheme presented by Mr. Lake, however, contemplates the sealing of the doomed ships with cork and paraffine. He would pump a mixture of paraffine and bits of cork down into the sunken vessel along with a stream of water. The water, he claims, would carry this buoyant mixture to all parts of the vessel, then the water could be pumped out, serving to seal up the crevices and by forcing in air or enough of the buoyant paraffine mixture to lift the ship to the surface of the sea.

Simon Lake has long been preparing for the work of salvaging the valuable ocean liners and such parts of their cargoes as are worth saving as soon as peace is declared. Some time ago he invented a combination submarine and surface craft designed to traverse the submarine trails and definitely locate the most valuable of these treasures that have gone down to their watery graves. This invention was an ordinary surface boat connected with a submarine by a long telescope tube through which to go down into the undersea observation compartments, equipped with exits for divers to emerge.

Treasure Ship Lure of Centuries.

The fabulous treasure that has nestled in the sandy bed of Vigo Bay, off the coast of Spain, for more than two centuries, has served to dazzle the imagination of adventurous mariners and what the creative instincts of the inventive genius through all these intervening years. Many a marvellous contraption has been contrived by these covetous schemers to recover the \$125,000,000 worth of gold and silver ingots, diamonds, and other precious gems that went down with the fleet of 15 Spanish galleons in 1702.

Those were the days of Spanish opulence, when Spain reached out for world domination and then languished in the luxury that riches brought her, riches gathered by her adventurers and exploiters from the uttermost parts of the earth. The fleet of galleons were homeward bound from the West Indies laden with treasure to the value of \$140,000,000. They had entered Vigo Bay, on the home stretch of their long voyage from the western hemisphere, when a fleet of Dutch and English war craft, bent on seizing the prize of war, swooped down upon them. French and Spanish battlecraft went out to meet the intruders, but were defeated in the fight. When the skipper in command of the treasure fleet saw that he could not make port and escape capture, he ordered every galleon sunk to the bottom of Vigo Bay.

Many attempts have since been made to secure this mass of wealth from its sunken vaults, and at one time about \$15,000,000 worth of it was raised. In 1910 an avaricious Italian perfected an ingenious submarine that resembled somewhat in appearance a huge potato bug. Its legs were powerful grapples capable of lifting enormous weights. This odd-looking outfit was fitted with observation compartments and could crawl around on the bottom of the sea.

There is an old, old saying of the British treasure ship La Lutine, sunk in the Zuyder Zee in 1799 while bearing a cargo of gold and silver bullion valued at several millions to be used by Austria in the war against France.

Shifting Wind Aids Salvagers.

Much of the precious metal has been recovered in large and small quantities from time to time by the simple means of dredging operations, but it never was made known the exact amount of bullion La Lutine carried on her last disastrous voyage. The amount, however, has been estimated at something over \$6,000,000.

La Lutine was a British frigate. She was armed to ward off attacks from the French, but went down in a furious storm that swept the Zuyder Zee. Many times the wreck was located and large quantities of the metal recovered, but the strong tides often shifted the sunken vessel and thus interrupted the salvage work. In 1912 by the mere chance of a shifting wind, which blew the salvage steamer around to the opposite side of the submerged wreck, a quantity of the gold was located and pieces brought up by the suction dredge. The bulk of it, however, was found to be imbedded beneath a heap of rusty cannon balls which formed part of the frigate's ammunition supply. These cannon balls become so firmly rusted together that the salvage apparatus was unable to separate or remove them, and the work had to be abandoned for the season, as the fall storms had set in.

Great was the difficulty in the early days of reaching and salvaging the sunken vessels at great depths, but now, with modern invention advanced to a stage where equipment for the work can be had, such ambitious schemes as the raising of the mammoth White Star liner Titanic, which went down in collision with an iceberg in the North Atlantic in 1912, have been contemplated, as well as the recovery of the Lusitania and other large transatlantic liners sunk during the present war by the German submarines.

Maine Man Succeeds.

One successful treasure expedition of the early days was conducted by William Phipps of Woolwich, Me., in 1684. He went to England and succeeded in interesting the Duke of Albemarle and others in his scheme to recover the wealth reposing in an old Spanish wreck off the Bahama Islands. The wreck lay deep, but by perfecting his diving apparatus Mr. Phipps reached his goal and secured \$1,750,000 worth of the lure. In addition to the money he received as his share of the business he was knighted and appointed high sheriff of Massachusetts, and later became Governor of the colony.

One of the richest deposits of the sunken treasure type which still lies at the bottom of the sea to lure hunters of hidden wealth is a \$50,000,000 heap of gold, intended to pay the sailors of the famous Spanish Armada and to be used in connection with the proposed invasion of England, which went down with the warship Admiral of Florence of the fleet in deep water in Tormery Bay, off the island of Mull in the country of the Duke of Argyll.

\$400,000,000 in Lake.

According to an old Spanish tradition treasure valued at \$400,000,000 in gold and silver and precious jewels lies at the bottom of Lake Guatairita in Colombia. It is supposed to have been thrown into this lake by the natives to prevent it from falling into the hands of the Spanish invaders.

Then there lies the British man-of-war Black Prince, sunk off Sebastopol by Russian gunfire in the Crimean war, with \$3,000,000 in coin on board, intended for the payment of the troops and purchase of supplies. There is said to be no question about the existence of this money and, by the use of modern submarine apparatus, the prospects are said to be favorable for its recovery.

The East Indian, Grosvenor, whose loss with all her passengers off the coast of St. John's, Cape Cod, South Africa, was one of the marine tragedies of the 18th century, still lies submerged with \$5,000,000 of specie in her hold, awaiting the ambitious treasure seeker.

It seems that the sea is susceptible to the lure of gold, too, for it often imposes violent reluctance to let go of its hoarded treasure deposited in its depths in ships that have succumbed to its turbulence. A large proportion of the efforts made to recover such riches have been thwarted by furious storms that have sprung up whenever and wherever such salvage work has been attempted. Perhaps the most notable coincidence of this kind was in the case of the ocean ship Golden Gate, which met its fate off the coast of Manila, Mex.

Leaps Overboard With Gold.

The Golden Gate was bound from San Francisco to some southern port on the Pacific coast. She had many passengers on board and was bearing \$2,000,000 in gold in her store room. She caught fire and was beached. Many of the passengers leaped overboard and were drowned. A colored cook, escaped by the flames, grabbed a quantity of the precious metal, tied it around his waist, and then the farewell exclamation, "Here goes, I die rich," flung himself into the sea and went down.

Although the wreck lies but a few hundred feet off the shore, every attempt to recover the gold known to be lying in the bulk has thus far been thwarted by the element. Captain C. W. Johnston, one of the most experienced salvage experts in the United States, made a determined attempt to reach the remains of the ship. He constructed a pier which extended out to within working distance of the wreck and had just completed his pumping equipment and was ready to start the actual work the next day when a terrific storm came up, wrecked the pier and carried all his apparatus away.

The Mexican natives in the vicinity attribute the trouble which comes to all who seek to operate on the wreck to the ghost of the crazed colored cook who leaped into the sea from the ship and was borne down by the weight of gold. They claim that his ghost has been seen hovering over the bulk of the Golden Gate at night and that it is this apparition that guards the sunken treasure beneath the sea.

A Mean Remark.

"It says here that a wealthy western man has left \$500,000 to the woman who refused to marry him twenty years ago," said Mrs. Gabb, as she looked up from the newspaper she was reading.

"That's what I call gratitude!" commented Mr. Gabb.

Not Queer to Him.

Friend—Queer saying, that about truth lying at the bottom of a well. Lawyer—You wouldn't think so, if you knew the amount of pumping lawyers sometimes have to do to get it.

Wanted on the Telephone.

Mrs. Fussanfeather—Who was that at the telephone, Clara?

Miss Fussanfeather—It's that Mr. Bond, the broker.

"Really?"

"Really?"

"Yes; he didn't want me, mamma, he wants you."

"Wants me? Mercy, Clara! How do you suppose he knew I was a widow?"

Proving the Contrary.

"He makes \$5,000 a year as an aviator."

"And yet people say you can't live in air."

EXTRACTS From Some Letters About

GinPills

FOR THE KIDNEYS

PAINT IN THE BACK

"I suffered with a continual pain in the back. Having sold Gin Pills I found it gave me a fair trial and the results I found to be good."

RHEUMATISM

"I have been for the last two years a cripple from muscular and rheumatic Rheumatism. Am now cured."

STONE—GRAVEL

"I had been suffering terribly with Stone in the Bladder. I continued to take Gin Pills and they cured me in two days."

KIDNEY TROUBLE

"Your remedy I find at 60 years of age, to give perfect relief from the Kidney and Bladder Trouble incident to one my age."

URINARY TROUBLE

"I have been suffering for some time with my kidneys and urine the pain was awful. I took Gin Pills and they cured me in two days."

Gin Pills will for \$50 a box or 6 boxes for \$2.50 at all good dealers. Sample free if you write to National Drug & Chemical Co. of Canada, Limited, Toronto or to U. S. address, N. D. Co., Inc., 202 Main St., Buffalo, N. Y.

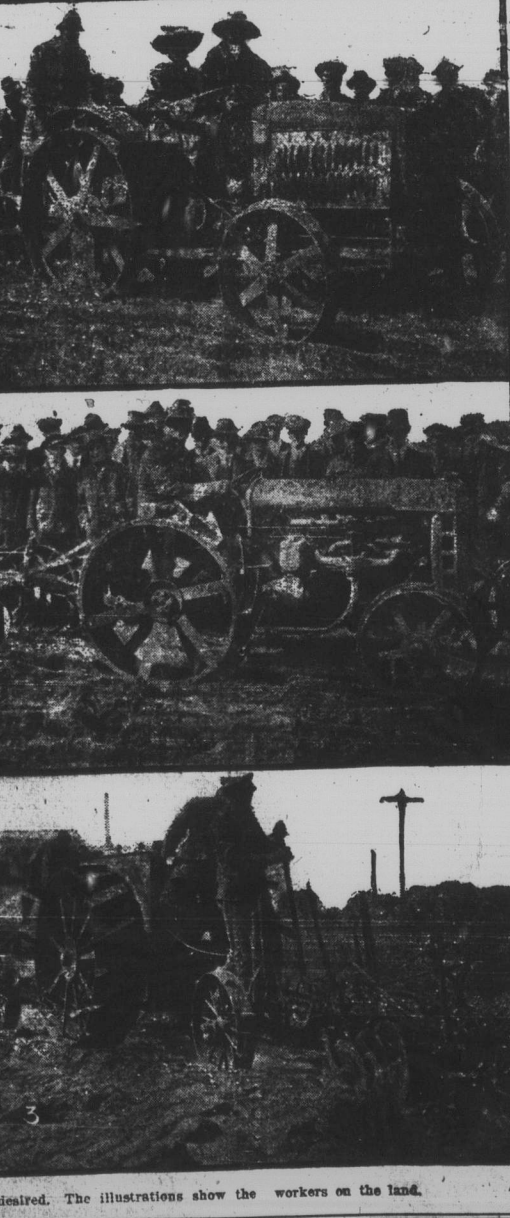

City Renders Practical Help in Greater Production

It is not often that the residents of a city have an opportunity of seeing farming operations on a large scale carried on right at their own doors. Even in Western Canada, where hundreds of thousands of acres of virgin land are being turned over and cultivated in order to raise increased crops of wheat and other food grains to supply the needs of the Allies, the spectacle witnessed by the citizens of Calgary, Alberta, recently was an unusual one. Not far from the centre of the city—about a mile from the city hall—there is a more than 200-acre tract of land which was recently granted to the city of Calgary through the courtesy of the Canadian Pacific Railway Company, the owners.

But how was such a tract of land to be plowed when all available machinery was being used to the utmost capacity in the country, when the demand for all kinds of machinery is so great that it cannot be delivered to the farmers that soon? That was the question asked by the city fathers. The implement companies came to the rescue. A day was set when the work should be begun. Telephone and telegraph wires were put into operation. And by the late afternoon tractors and the requisite plows and other implements were got together. One large tractor rolled sixty miles over its country in order to participate in the event.

Calgary has such an array of farm machinery been concentrated on an area of two hundred acres. Never, perhaps, has such an area been broken on and cultivated in shorter time. Although there was no competition all engaged were animated by the good they were doing in the cause of greater production. Furthermore, the machinery was wanted in the country, and it must not carry in the city. Unfortunately rain prevented the work being completed in one day, an achievement which, if it had been accomplished, would no doubt have constituted a record not easily surpassed.

A crop of oats, potatoes and flax is now grown on the land and it is hoped that this will add considerably to the production now so earnestly desired. The illustrations show the workers on the land.

LISTEN TO THIS! SAYS CORNS LIFT RIGHT OUT NOW

You reckless men and women who are pestered with corns and who have at least once a week laid out an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called frezone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all, lifts out with the fingers.

"It is a sticky ether compound which drives the moment it is applied and simply shrivels the corn without inflaming or even irritating the surrounding tissue or skin. It is claimed that a quarter of an ounce of frezone will cost very little at any of the drug stores, but is sufficient to rid one's foot of every hard or soft corn or callus. You are further warned that cutting at a corn is a suicidal habit."

Social and Personal

Miss Enid Haines of Moncton is the guest of Mrs. O. J. Lawson.

Mr. and Mrs. A. H. Ingram and son Bob are visiting in Stellarton.

Miss Memory Christie spent Sunday at her home in Ferguson Manor.

Mrs. O. J. Lawson and children have returned from visiting friends in Moncton.

Mr. Tom Gagne, of the Bank of Nova Scotia staff, Quebec is spending a few days in town.

Mr. and Mrs. Andrew Smith of Shigawake, P. Q. are visiting relatives and friends in town.

Miss Doris Campbell of New Richmond was the guest of Miss Isabel McNeil for the week end.

Miss Myrtle MacDaniel and Miss Julia Enright of Port Daniel are the guests of Mrs. S. S. Harrison.

Mr. and Mrs. S. H. Lingley and little daughter Lois are visiting friends in Prince Edward Island.

Mrs. W. F. Napier and two little daughters, Misses Kathleen and Helen are visiting relatives in St. John.

Rev. Mr. Matthews of Bathurst very acceptably filled the pulpit of St. Andrew's Church on Sunday last.

Mrs. F. M. Anderson and Mrs. John Collier have gone to St. John, Quebec where they will spend the summer months.

Miss Freda Davison has returned from St. John where she was the guest of her sister, Mrs. Ed. Sargent for a few weeks.

Mr. and Mrs. Edward E. Traverser and children of Hopetown, Que. are visiting Mr. Traverser's parents, Mr. and Mrs. Wm. Traverser.

Mrs. F. H. McKeen and Mrs. H. B. McDonald of Chatham while in town for the Patriotic Recital on Tuesday evening, were the guests of Mrs. F. F. Matheson.

Miss Winnie Hayes, graduate nurse of the Royal Victoria Hospital, Montreal and sister Miss Lillian of Shigawake, Quebec, were the week end guests of Mrs. S. S. Harrison.

A pleasant gathering of friends took place on last Saturday evening at the home of Mr. and Mrs. Wm. Traverser to bid farewell to Sergt. LaPointe who is returning to France after a few months furlough at his home here. Among those present were Sergt. and Mrs. LaPointe and little son, his father, Mr. LaPointe and Arthur LaPointe of New Mills, Mrs. Gagne of New Mills, Mr. and Mrs. Edward Traverser of Hopetown, Mr. and Mrs. John A. Traverser and Mr. Leslie Ross of Montreal. Sergt. LaPointe has served three years in France, being wounded once and was then granted leave home. He left on Monday's limited, a number of friends gathered at the station to wish him bon voyage and a safe return to Canada.

Canadian Food Control License No. 8-8901

FOREST COMMISSION IS NOW COMPLETE

Archibald Fraser the Last Appointee—Will Look After Crown Lands.

It was announced Monday that Archibald Fraser of Fredericton, has been appointed by the Minister of Lands and Mines, representative of the private timber land owners upon the Forest Commission which is to have charge of the crown lands of New Brunswick, under the legislation passed at the last session of the Legislature. The other members are: Hon. E. A. Smith, Lt. Col. T. G. Loggie, Deputy Minister of Lands and Mines; G. H. Prince, Chief Forester; D. J. Buckley, representative of the holders of timber licenses.

WILL LECTURE HERE.

Word has been received from Pte. Frank C. McDonald that he expects to be in Campbellton early in July and he will lecture here under the auspices of the Women's Institute. Pte. McDonald was a prisoner of war in Germany for a year, and after making several attempts managed to escape. His lecture on his experiences in Germany should be very interesting.

INCREASED POWERS.

By supplemental letters patent issued in New Brunswick the powers of the McLennan Foundry and Machine Company, Limited, Campbellton, have been extended so as to permit the company to engage in the business of ship-building and navigation.

ORDER YOUR STAMPS.

It is necessary for every grocer to have rubber stamp of his Food Control License number with which to stamp his stationery, etc. Send your license number to the Graphic and we will supply the necessary stamp at short notice. Ink pads also carried in stock.

Miss Gwendolyn Richards, who has been a patient at the Miramichi Hospital, Newcastle for the past few weeks, has returned home. Many friends are glad to know that she is much improved in health.

Mr. Jas. MacPherson and little son Alex, of Charlottetown spent Saturday in town.

Mr. Gordon LeMarquand of New Port Island, Que., is a visitor to town this week.

HEAVY FROST.

There was a very heavy frost Wednesday morning which did much damage to gardens. Beans were destroyed in some localities and other tender plants damaged. The frost was general throughout the province.

NEWS FOR THE BOYS.

So many of our soldier boys request that the Graphic be sent them each week that we have decided to offer the Graphic mailed to any address overseas for \$1.00 per year or 50 cents for six months.

Tramp Chaser.

Mrs. Suburbs—I am bothered to death by tramps asking for food at the kitchen door.

Mr. Suburbs—Why not keep them away by placing samples of your cooking at the gate?

IT WON'T WORK.

Too many young people depend on their father's money taking them through this world, and their mother's prayers making everything all right for the next.

POINTED PARAGRAPHS.

Stolen sweets are often hard to digest.

Thrift and stinginess are similar, but how different!

Most men who are willing to do good are not in a position to make good.

Do a man a favor and he will consider you under everlasting obligation to him.

Many a woman who makes a man a mighty poor wife makes him a rich husband.

NO PERMITS.

No permit will be given for fishing at Lily Lake this season. (Signed) MRS. W. A. MOTT, June 6-2-wks.

JEWELER'S NOTICE.

M. A. Roy, jeweler wishes to announce that he has moved his jewelry store to Anderson Sidling, (I. N. R.) and wishes those who had repair work with him at Campbellton to write him, and he will send their articles by mail to them.

Your Clothes

Should be the best that money can buy.

Clothes do not make the man, but they make him presentable, and he is often judged by his appearance.

You need never be ashamed of your clothes if we make them.

Call and see our line of Blue and Black Serges, absolutely guaranteed.

Bernier, The Tailor

DO NOT NEGLECT YOUR EYES

We hear much of people who sacrifice everything to sartorial splendor. They would go without dinner every day for a new pair of shoes.

Sacrificing health for appearance is not good policy—it does not make for health a real happiness.

Not only do you squint and frown when you neglect your eyes, but you seriously injure your health.

Better have a careful examination made.
