

THINK OF IT NOW!

Although much is said about the importance of a blood-purifying medicine, it may be possible that the subject has never occurred to your attention. Think of it now!

Ayer's Sarsaparilla will thoroughly eradicate this evil from the system. It will expect life without air as health without pure blood. Cleanse the blood with AYER'S SARSAPARILLA.

PREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. \$1.00 bottles for \$5.

FARM AND HOUSEHOLD.

The Hessian fly is doing a world of damage to wheat in Western New York.

An insect called the dumb-bell is committing ravages on the apple trees in Southern Virginia.

The late frosts of May and June have shortened the cranberry crop this year to 388,000 barrels, against 400,000 in 1883.

Scotch shepherd dogs are now employed at the Cape of Good Hope in herding ostriches, a work which they perform with great sagacity.

The sale of horse flesh in Paris is a recognized industry, 8,000 animals being the number credited as annually slaughtered for sale in that city.

Barnwell County, South Carolina, alone is said to have 2,348 acres of melons, from which it is estimated that \$1,000,000 worth of the fruit will this year be shipped North.

With regard to the treatment of a bite of a rabid animal, the experience of the French doctors show that the only remedy which can be depended upon to destroy the virus is the prompt application of cauterizing red hot iron.

In California they have a remedy for lice on stock composed of an ointment of equal parts of lard and suet. It is not applied to the entire body, but a ring of it, two or three inches wide, completely around the neck has the desired effect.

At last science has gone to the root of primitive agriculture. Forest trees are now felled with dynamite. This saves a larger proportion of the trunk and also brings up the roots at one operation, thus saving time and expense in clearing land.

Professor H. Mank, a worker of some eminence in agricultural chemistry, says that moderate muscular exercise increases the yield of milk, but that violent motion hinders the process of milk secretion. Dairy farmers may turn his remarks to profit.

A Frenchman has patented a process of making butter by passing a current of electricity through milk, thus rendering the operation of churning unnecessary. A similar method is to be used for cheese-making, and to restore ancient butter to its original sweetness of flavor.

Pigs are a cheaper food for dogs than any other article of food they rapidly, although they do not make as solid pork as corn. They have this advantage over corn. They mature early, and can be fed as soon as large enough for green peas, the pigs consuming vines and all.

Eastern Kansas and Western Missouri are suffering severely from most continuous cold rains of late. Work in the harvest field has been brought to a complete standstill, and much of the wheat in stocks has been ruined. The loss is placed at 1,000,000 bushels in Kansas alone. It is feared that the minor crops will suffer in the same proportion, and that potatoes will rot in the ground.

The Boston Journal prints these estimates of the hay crop in Maine, New Hampshire and Vermont based upon returns received from nearly 300 points in those States: Maine, 963,000 tons, a loss of about 15 per cent. as compared with the largest crop; New Hampshire, 401,000 tons, against 447,000 tons in 1884 and 631,000 in 1883; Vermont, 800,000 tons, the smallest in 10 years, during which the average has been 1,000,000.

Fashion Notes.

Godley's Lady's Book.

Beaded bonnets are obsolete.

Mitis are ugly, except on a beautiful hand.

A rule, hats for the seaside are eccentric and fantastical in the extreme.

Gant de suede gloves, in various shades of buff, are still worn with all toilettes.

The new cambrics and batiste very much resemble foulards, both in colors and patterns.

Woolen lace is in greater vogue than ever. It is used to trim everything, even bonnets.

Parasols are prettier and more elegant than ever. Lace is extensively used to ornament them.

Green is a very fashionable color; the favorite shades are lizard, abnathie, chauxreue, and malachite.

Plaited skirts are still worn; but loose skirts, slightly gathered, are more novel and fashionable.

The jersey is now only worn of a morning, and is quite discarded for dressy and elegant toilettes.

Embroidered gloves are the latest. The white ones are particularly pretty and very much worn.

The rage for beads continues; the most novel ones are the leaden ones which combine with well-bright-colored materials.

Feathers are but little worn this summer; a few birds are to be seen, however, nestling in a bow of ribbon.

It is found that for young girls to unlike the capote in shape and style, the border wider, protruding over the face.

Apple-red is the name of a new shade in net veiling. It is soft and pretty and throws a becoming shade on the complexion.

CHICAGO POST

Reserve Success and you shall Command it.

VOL. 16.-NO. 10.

SACKVILLE, N. B., THURSDAY, JULY 23, 1885.

WHOLE NO. 791.

Canada at the Antwerp International Exhibition.

The following notice of the Canadian Court was published in a London Journal "Public Opinion" in its issue of the 19th June. Public Opinion is an old established newspaper, and has gained a very wide and deserved reputation for being what, in its title, it professes to be, the mouthpiece of public opinion in England.

It is evident at a glance that the great majority of these exhibitors have not come here "pour la gloire." They have come on business; they want to sell; to them the Exhibition is nothing more or less than a fair. Smiling sires behind a counter and unctuous shopmen offering their wares are to be seen everywhere.

It is not a fair, but a business transaction, as if they were to enter an ordinary store, and it is not a pleasure to be pressed to do so. Honourable exceptions are Canada and Manitoba. Everything in the Department of the Dominion is a simple model of good taste. Of course, there is also a business-like object in view; they want men, laborious men, to stock the still very thinly populated districts along their great Northern Pacific Railway, and they will not doubt, succeed in making many a one forget the seven months of severe frost, ice, and snow by their grand display of the wares of the Lawrence and Saskatchewan River can produce in the remaining five months of the year. Without wishing in the least to depreciate the many of the highly-finished productions of industrial art—the English terra-cotta statuary, the exquisite Meissen porcelain, the pompous bronze statues, some of them of gigantic dimensions, in the exceedingly fine French cut, not to speak of all the dazzling and brilliant articles of pottery, majolica, "painted on earl-glass and high fire gilded," and the beautiful Carrara marble statues of Italy, Venetian and Bohemian glass vases, Gobelins and Sevres productions, which no doubt are the charm of an exhibition, the inquiring mind will, nevertheless, turn with paramount interest to the manifold produce of cis-and-trans-oceanic countries, from Manitoba to the Congo, and the thousands of foreign-born beings to the life of human industry and the stimulants of universal competition.

Personal and Political.

Bret Harte is to be removed from the Consulate at Glasgow.

Lord Randolph Churchill became Cabinet Minister at exactly the same age—36 years.

Lieutenant Commander Gorringe, who brought over the Egyptian obelisk, died at New York last Monday of a fleshy cancer involving the vertebrae.

The Queen has offered a dukedom to Earl Spencer, late Lord-Lieutenant of Ireland. Sir Peter Lushington has been made a Knight-Commander of the Bath.

At a recent fire in Somerville, Mass., a lady fought her way back into the burning house to save her spring bonnet and forgot her pocket-book, containing \$150, which was in the room.

The contest of the Duke of Cumberland for the throne of the Duchy of Brunswick has led Prince Bismarck to prepare a bill which will provide for the exclusion of foreign-born heirs to the right of succession to German thrones.

Dr. Chibret, a French oculist, reports to the Academie de Medicine that, having been obliged to remove a diseased eye from a young girl, he replaced it with one taken from a rabbit. At the time of his statement 14 days had elapsed, and the eye had retained its vitality, and was doing well.

Victor Hugo taught Goethe became a victim of the severely criticised "Notre Dame de Paris" when it first appeared. "Goethe," said he to a literary visitor, "only produced one really good work. 'The Robbers.'" The vision was astonished at the apparent blunder until Hugo added with a sneer, "And that was written by Schiller!"

Stock Notes.

Mr. W. Shaw, of St. John has bought from Mr. V. E. Fuller, of St. Lambert, P. Q., a heifer named Rose of St. Lambert, of the same family as the cow Mary Ann of St. Lambert for which Mr. Fuller refused \$25,000. Rose of St. Lambert is in calf to a bull owned by Mr. Fuller and valued at \$15,000, and if the calf should prove a bull, Mr. Fuller can give for the heifer.

The annual sale at the Provincial Stock Farm will be held on the 7th October next, when there will be offered by public auction pure bred Polled Angus, Red Norfolk, Short-horn and Ayrshire oxen, together with Shropshire, Border Leicester and Cotswold lambs, and Yorkshires pigs.

A Frequent Annoyance.

Many people suffer from distressing tick headaches and bilious attacks of frequent occurrence which a bottle or two of Burdock Blood Bitters would entirely remove. It regulates the Stomach, Liver, Bowels and Blood to a healthy action.

By-Roads, County of Westmorland, 1885.

Wilson Thompson, Edward O'Brien, Geraham Maxwell, By Road Commissioners. Mrs. Cole's to Fairfield, 15.00 David Crossman's old place to Fairfield, 10.00 Abt. Ed. railway, 4.00 Robinson's mill do do 75.00 Beech Hill road from Eliphath Read's towards Dorchester Corner, middle part, 20.00 To pay Geo. W. Towse expended in 1883, 13.00 Road to Towse's mill, 8.00 To cut down hill on north-west side of Brea's brook on Walker road, 25.00 On cross road from Beech Hill road to Ogden mill road, 8.00 To cut down hill back of Ayer's Tannery, 20.00 For repairs to Wilbur Creek Aboudeau, 25.00 \$855.00

From Parrsboro.

Farmers are looking forward for good crops this season.

Hartnett and Sullivan have built an addition to their carriage factory and are doing a large business.

Thos. Mahony, of the Cumberland Hotel, is building a dwelling house about a quarter of a mile from the village, said to be for his own residence.

James Sproul, of Westbrook, has brought in some splendid looking strawberries this season. He has picked about 300 lbs. so far this season.

A McGilvray, Esq., has commenced repairing the front of his store and dwelling house combined which, when completed, will very much improve the appearance of Main Street.

From Oxford.

Haying has commenced, but owing to the weather the work will be lighter than was expected a few weeks ago.

The Woolen Mills are doing a large trade especially in the wool business. Their capacity for cloth is at the rate of nine thousand yards per month, the good quality of which is beyond dispute.

The Baptists of this place intend holding a tea meeting at their church on the 28th inst., extensive preparations are being made for it, and all who favor us with their presence may expect and will not doubt have a very pleasant time.

The Furniture Co., which now has the reputation of producing superior goods at shipping large quantities to different parts of the country, and no doubt receive large amounts of the needful in return. E. A. King their foreman has severed his connection with the company.

The enterprising firm of J. M. Pherson & Co. are doing their already extensive works. They are building a shop 30x50 in which to make steam boilers, also a brass furnace and core oven. They have just fitted up a lathe on which they can turn a pulley's feet in diameter, and have orders in for five saw mills and will soon be in a position to furnish for their own works all that is required for rotary or other saw mills.

Literary Notes.

The August Harper's will have full-page pictures both of A. Abbey and Alfred Parsons; the former a frontispiece illustrating "A Love Song," by Austin Dobson, and the latter a full-page illustration of Wordsworth's sonnets, "Bees that Soar."

In "A Trip to the Ottawa," Harper's for August will give an interesting account of a summer pleasure-trip through the heart of Canada, from the Ottawa to Sandham, and illustrated by Mr. Henry Sandham, who has found his artistic field in the illustration of travel and journey was from Ottawa, the parliamentary capital of the Dominion, down the river to the Gulf of St. Lawrence, and from there to the most curious sites of the journey was a visit to the Trappist monastery, where a colony of monks exiled from France but a few years since has found refuge. This is said to be the strictest of all the religious orders, and the brethren are noted for the indulgence of conversation with one another. There is no corresponding order among the nuns.

The American nation has a double birthright—liberty and land. Its liberty is its birthright, and its land is its inheritance. The other articles of the Constitution seem to have been indifferent to the loss of its land and its inheritance. The methods by which it had been obtained, and the methods by which it was to be maintained, are the subject of the Hon. George W. Julian, who has given special attention to the subject of disposing of the public lands, tells the story in his "Can Choler be Averted?" Felix LeOzvald contributes a suggestive article on "The Animal World," and the Rev. Charles H. Botsford, one on "Temperance Reform in the Daily Life." The other articles are the chapter of "Comments," by various writers on articles in previous numbers.

Godley's Lady's Book for August is a delightful number, handsome in appearance, and more generally satisfactory than any of its predecessors. Every month seems to mark a stride in the progress of this popular magazine. The present issue opens with a beautiful chapter on "My Pet," a fine study of animal life as contrasted with graceful girlhood, and grouped against a strong background of nature. The illustrations this month are capital. A series of letters describing the trials of one present into service to write another's love-letters, under the title of "A Postscript," are particularly good. A powerful serial story, translated from French by Emily Lennox, continues in this number, under the title of "The Value of Honor." An entertaining conversation on chicken-culture, incubating, etc., forms a feature of the book, and introduces a series of projected articles on the useful and ornamental occupations of women. "Phillips' Pocket-Money" will furnish some valuable suggestions to women who are long for some way to turn a profitable penny. A short parlor drama, called "He is an Englishman," is given this month for the use of amateur actors who do not care to go too deeply into the histrionic. "Bella Donna" is a very clever story of limited length, and very cleverly told. It is a story of a better than it looks now. In this day, when so many old publications are being reprinted and sold for a few cents, it is a pleasure to find one that defies the march of time, and still preserves its pristine vigor and freshness of interest. That all may be convinced of its merits, the Publisher offers to send the book for the remainder of the year for 75 cents.

Baird's French Ointment is an excellent article for a kind of Humour, such as salt rheum, pimples, pustules, Itch, very clever cure for the Itch. It quickly heals obstinate Sores and Ulcers, &c. Sold by dealers.

Business Cards.

CHIGNECTO POST AND BORDERER.

SACKVILLE, N.B., JULY 23, 1885.

—Dominion Parliament prorogued on Monday.

—The Governor General is at Dalhousie on a fishing excursion.

—It is expected that the Imperial Parliament will be prorogued on the 7th August.

—Baron Brox announces the issue of the Canadian Pacific railway mortgage loan.

—Sir Leonard Tilley arrived at Ottawa on Monday. His health is greatly improved.

—It is rumored that Hon. Alexander Mackenzie is about to retire from Parliament and accept a government appointment.

—The 18th convention of the Y. M. C. A. of the Maritime Provinces will be held in St. John on Thursday, Aug. 13th, and two following days.

—The Marquis of Salisbury, in sympathy with the depression in the farming industry, has reduced his tenants' rents ten per cent. for three years.

—The formal inauguration of the International park at Niagara Falls, New York, took place on Friday in the presence of an immense assemblage.

—Mr. Cyrus W. Field intends giving a banquet in London on August 5th to celebrate the anniversary of the completion of the first Atlantic cable.

—The Irish Times approves the Lord Purchase Bill introduced by Lord Ashbourne in the House of Lords. The Dublin Express says the Bill cannot succeed.

—The Right Hon. Wm. Edward Foster, Liberal member of Parliament for Bradford, formerly Chief Secretary for Ireland, it is said, will soon make a visit to Canada.

—Ferdinand Rothschild has been elected by a majority of 973 to parliament from Aylesford, Bucks County, to fill the vacancy caused by the elevation to the peerage of Sir Nathaniel Rothschild.

—The genial Joe Knowles, of St. John, has removed to Montreal, where he represents Canada's great comic paper, Grip. The last issue contains Joseph's views as to matters and things in Montreal.

—The Halifax boys are receiving quite an ovation on their return trip. They have been lauded at Winnipeg, Sarina, London and other places along the line, and have met everywhere an enthusiastic reception.

—President Cleveland went fishing the other day. While the other members of his party were equipped with all sorts of fancy tackle, he used a red rod and caught the most fish. And now the Brooklyn Eagle claims that even Patagonia does not appreciate Jeffersonian simplicity.

—The London Free Press has been examining the record of the late straggler in *Hesperus*. On the franchise bill 42 of them spoke no less than 820 times. Mr. Mills made one hundred and thirty speeches. Mr. Casey 56, Mr. Cameron (Huron) 47, Mr. Davies 48, Mr. Cameron (Patsburg) 47, Mr. Brantley 44. Think of it! Three hundred and twenty-five speeches by five men on one bill.

—The Englishman is far ahead of the Colonist in his political methods. Mr. Gladstone, in announcing he will not at present retire from the political arena as he at one time contemplated, states he considers it his duty to support and assist the Government in doing right, and not to anticipate it will do wrong. Here is a lesson for Opposition leaders nearer home: Opposition exercised for the public and not party advantage.

—The prize list of the Nova Scotia Agricultural and Industrial Provincial Exhibition, to be held at Kentville from Sept. 29th to Oct. 2nd, inclusive, has been received. The total sum offered in cash prizes is \$6,200. Articles from the other Provinces of the Dominion are solicited, but not for competition. Copies of the prize list and entry blanks will be obtained from the secretaries of agricultural societies in Nova Scotia, or from the Exhibition Secretary, William Eaton, Esq., Kentville.

—The experiment of sending live lobsters to England will be tried at this trip of the S. S. Clifton. Tanks have been built, which will be supplied with salt water, and in them will be placed five hundred lobsters. The steamer will stop at the Magnet lobster factory, Esquimaux, on her way out of the river, and take on the lobsters. The only danger apprehended is that the warm water of the Gulf stream will kill the crustaceans. Should the lobsters reach England alive a big business will be done in this line in future.—*Chatham World*.

—The services of our volunteers in the North-West are to meet a prompt reward. To each man is to be granted three hundred and twenty acres (a half section) of land, and the grant is to be made at once, so that no volunteer is to be left in doubt as to what he is to receive. The land is to be taken from the even-numbered sections, and it is to be made a condition that the grantee, or his substitute, shall make the acre before the 1st June, 1886. Residence and cultivation, either by the grantee or his substitute, will be required. Any person entitled to this benefit may elect to receive scrip for \$80, which may be applied on the purchase of any Dominion lands open for sale, or pre-emptions, or rents of Dominion lands leased for grazing purposes.

COLLEGE CENTRALIZATION.

The Board of Governors of Kings College, Windsor, has determined to resume work in October; to secure a President, a Theological Professorship and a chair of Modern Languages. The deficit is about \$1,500 per annum. An appeal for funds will be made to the public.

While there is something almost pathetic in the straits to which the old seat of learning in these Maritime Provinces, and one connected with many eminent names in our country's history, is reduced, and something in the zeal thus displayed to enlist our sympathies, it may be enquired how does the policy of maintaining half a dozen colleges for a population not much exceeding half a million of people forward the business of University education? At a recent meeting of the Massachusetts Teachers' Association, President Eliot referred to the State policy of encouraging the closing down of high schools in order that as large a percentage as possible of the population might have the means of advanced education within reach, and he stated the result was a thinning and impoverishing of the education just in proportion to its extension, and he calls for their centralization in order that the funds now frittered away in maintaining weak and inefficient schools may be employed in strengthening fewer establishments by maintaining competent corps of teachers.

The *Popular Science Monthly* for July endorses President Eliot and says the evil is wide spread. It is a result, no doubt, of our democratic ideas, and of the local jealousies which, it will hardly be questioned, democratic institutions bring in their train, that we try to bring to every man's door what we bring to one man's door. The thing can only be accomplished, however, at the expense of a marked deterioration in the article supplied. A good and well-equipped high school can not, as things now are, be maintained in every village and township. We must have the name of the thing, but the reality we cannot have.

What applies to the high-schools applies also, generally speaking, to the colleges themselves. They are not what they ought to be, simply because there are too many of them. The consequence is, that there is a great deal of false and shallow culture abroad in the land. A college ought to be a place where a youth would be certain to come into contact with men of an altogether superior order of thought and attainment. It ought to be the center of a true intellectual life. Of all our colleges how many answer this description? It is needless to say that the country does not possess a sufficient number of men of real intellectual mark to fill the chairs in our innumerable "colleges." If it did, we should indeed be exceptionally favored. Now, the effect of the country's policy is to multiply the number of colleges, and to multiply the number of those who are not what they ought to be, and to multiply the number of those who are not what they ought to be, and to multiply the number of those who are not what they ought to be.

The development of national sentiment in Canada has gone on since Confederation with amazing swiftness. Eighteen years ago—so little had we in common with Upper and Lower Canada, it was considered a good canvass and was employed to defeat the scheme of union, that our sons might be called upon to fight the battles of the people in the West. With such a feeling in view, compare the magnificent reception accorded to the Halifax volunteers at Toronto, on Tuesday, on their return from the North-West. The dispatch says:—

—The temperance demonstration at Sussex on Monday was large and successful. Over thirty divisions and lodges were represented.

—The sum of \$20,000 was voted to General Middleton last week in consideration of his services in the North-West.

—Steps are being taken to secure the extradition of Robinson, the St. John forger. No extradition treaty exists between Canada and Mexico, but it is said the Mexican Government have agreed to give Robinson up.

—Mr. Herbert Pickard, M. A., died at Fredericton on Tuesday, of hemorrhage of the lungs, aged 25 years. He was a Gildersleepe scholarship man, and won many prizes at Edinburgh, from which place he returned three weeks ago.

—The temperance demonstration at Sussex on Monday was large and successful. Over thirty divisions and lodges were represented.

—The sum of \$20,000 was voted to General Middleton last week in consideration of his services in the North-West.

Riel's Trial.

The trial of Louis Riel commenced at Regina on Monday morning. Stipendiary Richardson presided, and associated with him was Henry Deane, J. P. The counsel for the prosecution are Robinson, Q. C., Osler, Q. C., Burbridge, Deputy Minister of Justice, Casgrain and Scott. The counsel for the defence are Lemieux, Fitzpatrick, Greenhills and Johnston. Gen. Middleton and staff and Lieut-Governor Dewdney were present at the opening of the trial. After the prisoner had been brought into court and the indictment read, Fitzpatrick read an appeal in a demurrer to the court had no jurisdiction in the case, but that the prisoner should be committed for safe custody and sent for trial to Upper Canada or British Columbia. The counsel for the prosecution put in a demurrer to the plea and counsel for Riel joined issue in the demurrer. Fitzpatrick and Johnston supported the plea, occupying all the time till the court adjourned. On returning the trial on Tuesday, Judge Richardson directed that Riel should be committed for safe custody and sent for trial to Upper Canada or British Columbia. The counsel for the prosecution put in a demurrer to the plea and counsel for Riel joined issue in the demurrer. Fitzpatrick and Johnston supported the plea, occupying all the time till the court adjourned. On returning the trial on Tuesday, Judge Richardson directed that Riel should be committed for safe custody and sent for trial to Upper Canada or British Columbia.

The Outlook.

The *Monetary Times* in its last issue takes a decidedly hopeful view of the situation, and publishes, from various sections, reports which seem to indicate a gradual if not a speedy return of commercial prosperity. As among the signs of the times, and the example of the encouraging tone of the *Times* we quote from its columns the following report of the Montreal merchants:—

MONTREAL, July 15th, 1885.—Judging from the information gleaned from houses in the various lines of trade, we think we are safe in saying that there is an improvement in business generally, though the West report very fair orders; boot and shoe men are doing well, and wholesale grocers say that there is more demand. This better state of affairs is no doubt attributable to the generally favorable appearance of the crops. We are also pleased to note some improvement in remittances, fewer complaints being heard than for a good while past, though there is still room for improvement. Failures are gratifyingly few, and accountants and assistants the expression of a lack of employment. What trading there is in stocks is altogether between brokers; and there is nothing of a special character in this connection. Money remains at usual rates.

—The session of Parliament which closed on Monday has been in point of length at least the most remarkable since Confederation. The average session lasts about three months, but the one just ended has been drawn out to nearly twice that length of time. This extension of parliamentary business has been attended with great inconvenience to many persons, and has cost the country somewhere in the neighborhood of a quarter of a million dollars; and for all this vexatious delay and the unnecessary expenditure of a large sum of money the Opposition must be held strictly accountable. The suppression of the rebellion naturally taxed the energies of the Ministers and largely increased their duties and responsibilities, but it would not have extended the length of the session if it were not for the bitter and protracted opposition to a measure designed to extend the franchise to a quarter of a million of Canadians who have been nearly double the ordinary length of the session, and to make the people pay a round sum for the privilege of having some of the Griv orators speak over a hundred times on one question.

—The development of national sentiment in Canada has gone on since Confederation with amazing swiftness. Eighteen years ago—so little had we in common with Upper and Lower Canada, it was considered a good canvass and was employed to defeat the scheme of union, that our sons might be called upon to fight the battles of the people in the West. With such a feeling in view, compare the magnificent reception accorded to the Halifax volunteers at Toronto, on Tuesday, on their return from the North-West. The dispatch says:—
