Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x
12x	16x	20x	24x	✓	28x

The copy filmed here has been reproduced thanks to the generosity of:

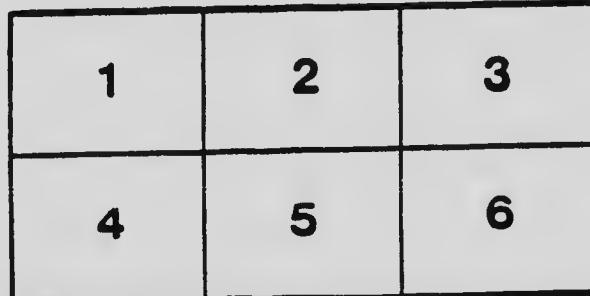

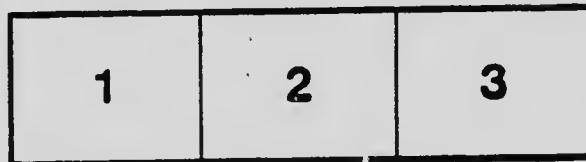

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfilm shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

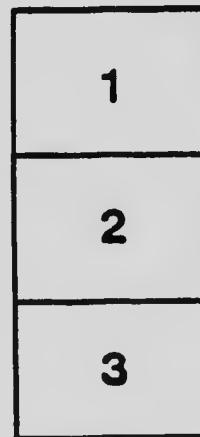

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de télécopie.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

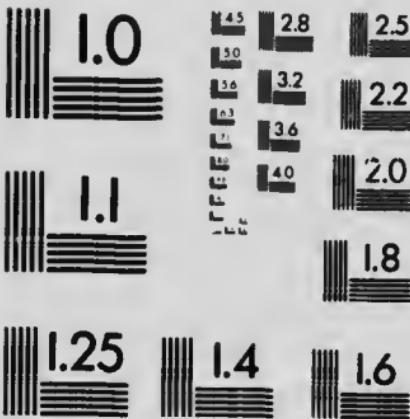

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "À SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., pouvant être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaires. Les diagrammes suivants illustrent la méthode.

ADVANCE CHAPTER OF THE ANNUAL REPORT ON THE MINERAL PRODUCTION OF CANADA DURING THE CALENDAR YEAR, 1909.

(*Tons used throughout this report are short tons of 2,000 pounds, except where otherwise stated.*)

IRON AND STEEL.

INTRODUCTORY.

The iron and steel industry in Canada in 1909 shows a very satisfactory and steady growth as compared with previous years.

There was a larger production of iron ore than in 1908; an increased output of pig iron from Canadian blast furnaces and a larger production of steel ingots and castings; while the imports of pig iron and of iron and steel goods more or less highly manufactured were greatly diminished.

Although iron ores are of wide occurrence throughout Canada, being found practically in every province, the development of these resources has not kept pace with the growth of our iron metallurgical industries.

About 17 per cent only of the iron ore used in Canadian furnaces during 1909 was of domestic origin. Much of the coke and lime-stone was also imported, so that our iron industries are now, and have been for a number of years, largely dependent on imported raw materials.

The total production of iron ore in Canada to the end of 1909 has probably only slightly exceeded 5,000,000 tons, while our present rate of production varies from 300,000 to 400,000 tons per annum.

There were shipped from Newfoundland in 1909 about 1,110,049 tons of ore, of which about 697,068 tons were sent to Canada for use at Sydney. Since 1896, or during the past fourteen years, we have imported 7,521,086 tons of iron ore, chiefly from Newfoundland and the south shore of Lake Superior. As against this we have exported during the same period about 1,556,996 tons, chiefly to the United States.

Developments are in progress, however, which may in the near future furnish a much larger supply of domestic ore. Active operations are in progress at Torbrook, N.S., and extensive preparations being made to ship from the large magnetite deposits near Bathurst, N.B. The Moose Mountain mine, north of Sudbury, of which much has been expected, shipped an important tonnage during 1909, and development work is being continued. Operations have been started on a deposit twenty-four miles east of Port Arthur, the first in this district, and some initial shipments made. A magnetic survey was made of the old Bristol mine, Pontiac county, Quebec, by an officer of the Mines Branch, resulting in the discovery of the probable existence of a considerable ore body apparently not previously known.

The production of pig iron and steel is still confined to the eastern half of Canada, chiefly in the Provinces of Ontario and Nova Scotia. There are sixteen

completed blast furnaces, with a total daily capacity of about 2,735 tons. Of the sixteen, twelve have a daily capacity of 100 tons or over. The production of pig iron and steel in 1909 was the highest year's production yet turned out by Canadian furnaces. The bounty which has been paid on iron and steel production ceases at the end of 1910, although provision is still made for the payment of bounty on pig iron produced by electric process to the end of 1912.

The difficulties which had arisen between the Dominion Coal Company and the Dominion Iron and Steel Company, respecting the supply of coal to the latter, and which had to a considerable extent interfered with the Steel Company's output, were satisfactorily settled in the early part of the year, enabling the Steel Company to bring its production again up to normal and provide extensions of its plant, which will include an additional furnace, new coke ovens, and a finishing mill. Towards the close of the year, negotiations were in progress looking to the amalgamation of the two companies, which have since been successfully concluded. A new steel plant was being built at Londonderry, while various additions and extensions to plants were being made in Ontario.

The Algoma Steel Company has made arrangements for the construction of an additional blast furnace of 400 tons capacity, and the erection of a merchant mill for the manufacture of structural steel. Arrangements were also being made for the construction of by-product coke ovens sufficient to supply the steel plant with all the coke it will need.

A summary of the chief statistics of the production of iron ore, pig iron and steel is given hereunder, while many details will be found in subsequent pages.

Statistical Summary of Iron Ore, and Iron and Steel Production, 1907-8-9.

Material.	1907.	1908.	1909.
	Short Tons.	Short Tons.	Short Tons.
Iron ore shipped	312,856	238,082	268,043
Canadian iron ore charged to furnaces	244,104	209,266	257,502
Imported " " "	1,117,250	1,051,445	1,235,000
Pig iron made	631,962	630,835	757,162
Steel ingots and castings made	705,982	588,763	754,719
Finished rolled iron and steel products made (a)	672,200	566,099
Canadian coke charged to iron furnaces	521,068	492,076	412,016
Imported " " "	327,082	325,670	507,256
Pig iron imported	(b) 150,157	(c) 212,290	(e) 58,591
Iron and steel goods imported	(b) 622,868	(c) 866,710	(c) 487,003

(a) Statistics collected and published by American Iron and Steel Association.
 (b) Nine months ending March, 1907.
 (c) Twelve months ending March. { The figures given do not show the total quantities of iron and steel goods imported, as in many cases the quantities are not given in the trade returns.

IRON ORE.

The total shipments of iron ore from mines in Canada in 1909 were 268,043 tons, valued at \$659,316 at the shipping point; as compared with 238,082 tons, valued at \$568,189, in 1908, and 312,856 tons, valued at \$666,941, in 1907. By provinces, the production during the past three years was as follows:—

IRON.—TABLE 1.
Production of Iron Ore by Provinces, 1907-8-9.

Provinces.	1907.		1908.		1909.	
	Tons.	Value.	Tons.	Value.	Tons.	Value.
		\$		\$		\$
Nova Scotia.....	89,839	135,161	11,802	17,620		
Quebec	122,748	34,956	10,103	22,094	4,150	5,508

1879	29,889	1884	54,885
1880	51,193	1885	48,129

Nova Scotia.—No iron ore is reported as shipped from mines in this Province during 1909. The furnaces at Sydney and North Sydney received their supplies of ore from Newfoundland chiefly, while the Londonderry furnace, which is usually run on local ores, was out of commission throughout the year.

The Canada Iron Corporation, Limited, continued to develop their properties at Torbrook, and a quantity of ore was taken out, although none was shipped.

A railway spur is being built from the mines to connect with the Halifax and Southwestern Railway track at Nictaux, and ore shipments are to be made from Port Wade, at which place large ore pockets are to be constructed. The same Company has acquired the iron deposits at Austin brook, near Bathurst, New Brunswick. A railway has been constructed connecting the ore deposits with the Intercolonial railway and shipping piers built at Newcastle.

Quebec.—The production of bog ores in this Province is growing less year by year. During 1909, only 3,330 tons were shipped to furnaces, in addition to which a small tonnage of iron sands was shipped for experimental purposes.

A magnetometric survey was made of the Bristol mine, Pontiac county, by Mr. E. Lindeman of the Mines Branch, and a special bulletin has been published giving the results thereof. No shipments have been made from this mine since 1897, but between 1889 and 1897, inclusive, according to returns made to this Department, the mine shipped 29,815 tons. Mr. Lindeman sums up the results of his investigations as follows:—

The magnetite occurs in parallel beds and lenticular-shaped bodies along the stratification of hornblende and micaeous schists. The association of the magnetite and these gangue minerals seems to be very intimate; and in places, complete gradations exist between masses of magnetite and these rocks. Numerous intrusions of granite in the iron-bearing strata seem also to have had an important bearing on the horizontal extent of the deposits as well as on their depth, cutting them into irregular masses, and rendering their extent in depth uncertain. To judge from the irregular magnetic curves, and the numerous exposures of granite, this state of affairs seems to exist round Shaft No. 4.

It is manifest that the unprofitable mining operations carried on some years ago were largely due to the irregularities of these ore bodies; to primitive methods of working; and to the long railway haul from the mine to Pennsylvania, U.S.A., where the ore is reported to have been shipped.

On the other hand, the present investigation indicates that lot 22, and the east part of lot 21, contain some promising deposits. The most important of these is that on lot 22; the approximate area of which has been estimated at 90,000 square feet. As this deposit is practically all covered by a heavy loam, and taking into consideration the intimate association of the magnetite with the schistose rocks in other parts of the field, it is evident that no definite statement can be made with regard to the tonnage of iron ore in this deposit; but as far as it is now possible to judge from the strong, even, magnetic attraction, there is every reason to conclude that the deposit is of considerable magnitude. In order to ascertain the precise character and quantity of these ore reserves, systematic development in the form of diamond drilling will be necessary.

Ontario.—This Province shows a considerably increased tonnage in iron ore shipments in 1909, due chiefly to a larger output from the Helen mine. There were five shipping mines, as compared with four during 1908.

No shipments were made by the Wilbur, in Lanark county, but the Atikokan mines, west of Port Arthur, were reopened; while the Dominion Bessemer

Ore Company, of Philadelphia, opened up an iron property about twenty-three miles east of Port Arthur, on Thunder bay, and shipped a quantity of ore in two grades, No. 1 running 52 per cent iron, and No. 2, 40 per cent. It is intended to equip the property with crushers and jigs, in order to prepare the ore for market and raise the percentage of metallic iron content.

From the Helen mine at Michipicoten, shipments were made to Hamilton and Sault Ste. Marie, exclusively, no ore being sent to the United States during 1909. The plant at the mine is now entirely electrically driven, taking about 400 horse-power. The Moose Mountain mine, in Hutton township, shipped chiefly to the United States, although one shipment each was made respectively to Sydney, N.S., and Hamilton, Ont. Shipments were also made from the Mayo mine in Hastings county, operated by the Canada Iron Corporation, Limited, under lease, the ore being shipped to Midland and Radnor.

Following is a list of the principal producers of iron ore:—

Canada Iron Corporation, Limited, Mark Fisher Bldg., Montreal.

E. H. Duval, Lévis, Que. (Guay P.O.).

H. C. Bosse, 92 St. Peter street, Quebec, Que.

Dominion Bessemer Ore Company, Limited, 472 Bullitt Bldg., Philadelphia, Pa.

The Lake Superior Power Company, Sault Ste. Marie, Ont.

Atikokan Iron Company, Limited, Port Arthur, Ont.

Moose Mountain Limited, Sellwood, Ont.

IMPORTS AND EXPORTS.

During the past fourteen years the iron smelting industry in Canada has had to draw more and more upon imported supplies of iron ore, a large portion of these supplies being, however, derived from Newfoundland, which should hardly be looked upon as a foreign source, though for purposes of commerce it has to be so considered.

The total consumption of iron ore in Canadian furnaces in 1909 was 1,492,502 short tons, made up of 257,502 tons of Canadian ore and 1,235,000 tons of imported ore. The Canadian production was, therefore, only about 17 per cent of our requirements. Previous to 1896 the furnaces were supplied altogether by Canadian ores. The quantities of Canadian and imported ores annually charged to blast furnaces since 1887 are shown in Table 16. The Department of Customs does not separately publish statistics of iron ore imports.

Since the opening of the Helen mine at Michipicoten, and more recently the Moose Mountain mine in Hutton township, considerable quantities of iron ore have been exported to the United States. The statistics of exports for both calendar and fiscal years are shown in the two tables following, the statistics for the fiscal year having been added, to compare with the record of imports of iron ore into the United States from Canada, as published in the 'Foreign Commerce and Navigation of the United States,' Washington, D.C., and shown in Table 6a. It so happened that from 1901 to 1906 the figures in the Canadian reports were inaccurate, owing to reasons explained in foot-notes to the tables.

IRON.—TABLE 5.
Exports of Iron Ore, Calendar Years, 1893-1909.

PIG IRON AND STEEL.

The total production of pig iron in Canadian furnaces in 1909 was 757,162 short tons (676,038 long tons), valued at the furnace at \$9,581,864; as compared with 630,835 short tons (563,246 long tons), valued at \$8,111,194, in 1908. An increased production is, therefore, shown of 126,327 tons, or about 20 per cent, and this despite the fact that the Londonderry furnace was out of commission during the whole year. These figures do not include the output from electric furnaces, making ferro-products, which are situated at Welland and Sault Ste. Marie, Ont., and Buckingham, Que.

Of the total output of pig iron during 1909, 17,003 tons, valued at \$371,368, or \$21.84 per ton, were made with charcoal as fuel, and 740,159 tons, valued at \$9,210,496, or \$12.44 per ton, with coke. The amount of charcoal iron made in 1908 was 6,709 tons, and iron made with coke, 624,126 tons.

The classification of the production in 1909, according to the purpose for which it was intended, was as follows: Bessemer, 222,931 tons; basic, 400,921 tons; foundry, including miscellaneous, 116,307 tons.

The American Iron and Steel Association reported the production of Bessemer pig iron in 1908 as 126,348 short tons, as against 173,499 tons in 1907; and the production of basic pig iron in 1908 as 375,659 short tons, as against 382,208 tons in 1907.

The total production of pig iron in 1908 and 1909 is shown by provinces in the following table, the average value per ton being also indicated. In the case of Nova Scotia, a large proportion of the pig iron is directly converted to steel. A nominal value is placed upon this, and does not necessarily represent a market value. The Quebec production is entirely charcoal iron, which has for many years commanded a high price.

IRON.—TABLE 7.
Production of Pig Iron by Provinces, 1908-9.

Provinces.	1908.			1909.			Percentage increase or decrease in quantity.
	Tons.	Value.	Value per ton.	Tons.	Value.	Value per ton.	
	\$	\$	\$		\$	\$	%

Total	630,835	8,111,194	12.86	757,162	9,581,864	12.65	20.0

The increased production in 1909 has been due to the greater activity of the Ontario furnaces, there having been a decreased production in both Nova Scotia and Quebec. For the first time since 1891 the Ontario production has exceeded that of Nova Scotia. The proportions of the whole contributed by the several provinces were, in 1909: Nova Scotia, 45.6 per cent; Ontario, 53.8 per cent, and Quebec about 0.6 per cent. In 1908 the proportions were: Nova Scotia, 56 per cent; Ontario, 43 per cent, and Quebec about 1 per cent. During the past five years the production has exceeded 500,000 tons annually; while from 1898 to 1904 the production ranged from 100,000 tons to 300,000 tons per annum.

Statistics of the total production of pig iron since 1887 by provinces are given in Table 8:—

IRON.—TABLE 8.

Pig Iron Prices.—The selling prices of pig iron in Toronto and Montreal, according to quotations published in trade journals, showed comparatively little variation during the year. In Toronto, the quotation was practically constant at from \$19.50 to \$20 throughout the year. In Montreal, prices ranged from \$18.50 to \$20.50 for Midland or Hamilton pig iron.

In Pittsburgh, Pa., Bessemer iron was quoted at \$16.50 in January, falling to \$14.50 in May, and gradually increasing to \$19 in December. Basic iron in the same market was quoted at \$15.50 in January, falling to \$14 in May, and increasing to \$17 in December.

The quantities of iron ore, coke, charcoal, limestone, etc., consumed in blast furnaces in 1908 and 1909, are shown us follows:—

IRON.—TABLE 9.

Ore, Fuel, and Flux charged to Blast Furnaces, in years 1908-9.

	1908.			1909.

Imported " "	64,404	53,436	13)	97,936	83,091	19)

* Including coke made from imported coal.

Previous to 1896 the pig iron made was entirely from Canadian ore. Since that date, however, increasing quantities of imported ore have been used, as well as imported fuels and fluxes, until in 1909 about 83 per cent of the ore charged, 55 per cent of the coke, and 19 per cent of the limestone were imported. This condition, of course, is due to questions of cost and transportation affecting each furnace. Just as the Newfoundland ore can be more cheaply and certainly laid down in Sydney, so also American coke can be delivered at Ontario furnaces more cheaply than Nova Scotia coke. In Ontario the coke fuel is all imported, and in the case of the furnaces at Sault Ste. Marie and Port Arthur the flux is imported. Of the ore used in this Province in 1909, about 44 per cent was imported, as compared with 65 per cent in 1908. The development of new ore bodies in this Province may possibly, in the near future, provide a domestic supply of ore, but for fuel Ontario will probably be dependent for some time upon United States sources.

According to returns made to the Department of Trade and Commerce in connexion with claims for bounty, 126,298 tons only of the total pig iron production in Canada in 1909 were credited to Canadian ore, and 607,718 tons to imported ore, and bounty paid upon it as such. No bounty is paid on the iron credited to the mill cinder, scale, etc., so that the above figures do not represent the total output of the furnaces.

Statistics of the quantities of ore, fuel, and flux charged to Canadian blast furnaces since 1887 are shown in the following table:—

IRON.—TABLE 10.

* Includes for the first ten years small quantity of coal.

Of sixteen completed furnaces, fifteen were in blast in 1909, for varying periods of time. The operating companies, with numbers and capacities of furnaces, were as follows:—

Dominion Iron and Steel Company, Sydney, C.B.: four completed furnaces of 280 tons capacity each per day; two operated throughout 1909, one for 168 days, and the fourth for 203 days.

Nova Scotia Steel and Coal Company, Limited, New Glasgow, N.S.: one furnace at Sydney Mines, C.B., of 200 tons capacity; operated throughout 1909.

Loudon derry Iron and Mining Company, Limited, Loudon derry, N.S.: one furnace of 100 tons capacity; idle throughout the year.

Canada Iron Corporation, Limited, Montreal, Que.: two small furnaces of seven and eight tons capacity, at Drummondville, Que., operated 3½ days; one furnace of 25 tons daily capacity, at Radnor Forge, Que., operated seven months during 1909; one furnace of 125 tons, at Midland, Ont., operated all year.

Standard Chemical Company of Toronto, Deseronto, Ont.: one furnace with a daily capacity of 50 tons; operated six months during 1909.

Hamilton Steel and Iron Company, Hamilton, Ont.: two furnaces; one of 200 tons capacity, operated throughout 1909; a second furnace of 300 tons capacity, operated 276 days in 1909.

Algoma Steel Company, Limited, Sault Ste. Marie, Ont.: two furnaces at Steelton, near Sault Ste. Marie, of 250 tons capacity each; operated throughout the year.

The Atikokan Iron Company, Limited, Port Arthur, Ont.: one furnace of 100 tons capacity; operated for 4½ months during 1909.

The total daily capacity of the sixteen furnaces is about 2,735 tons.

The number of men employed in 1909 was reported as 1,486, and the wages paid, \$879,129. Of the sixteen completed furnaces, eleven were in blast and five idle on December 31, 1909.

Very little pig iron has been exported from Canada. The quantities exported during the past two years were, as shown in Table 17: 5,063 tons, valued at \$186,778, in 1909; and 290 tons, valued at \$10,614, in 1908. The figures for 1909 include ferro-silicon and other similar iron alloys. Considerable quantities of pig iron are, however, imported. During the calendar year 1909 the imports of ordinary pig iron were 147,925 tons, valued at \$1,798,172, and of charcoal pig, 413 tons, valued at \$5,727, or a total of 148,338 tons, valued at \$1,803,919. During the calendar year 1908 the imports were 58,365 tons, valued at \$790,433; comprising ordinary pig, 57,343 tons, valued at \$771,615, and charcoal iron, 1,022 tons, valued at \$18,818.

The annual imports of these two classes of pig iron since 1880 are shown in the following table, the statistics being given for the fiscal year. The duty or general tariff on pig iron is \$2.50 per ton.

FERRO-PRODUCTS.

These are made in small quantities in electric furnaces at Welland, and Sault Ste. Marie, Ont., and at Buckingham, Que.

At Buckingham the Electric Reduction Company, Limited, has for a number of years been making ferro-chrome, ferro-silicon, ferro-phosphorus, and other products, though for the past year or more the Company's operations, it is understood, have been restricted to the manufacture of phosphorus. The Electro Metals Company at Welland, Ont., has four furnaces of from 1,000 to 1,500 horse-power each in which ferro-silicon is made, the daily production being from five to eight tons. The Algoma Steel Company, at Sault Ste. Marie, makes ferro-silicon for its own consumption. Although complete returns of production were not received, the output was probably somewhat under 5,000 tons, and valued at about \$55 per ton.

The imports of ferro-silicon, ferro-manganese, etc., during the calendar year 1909, were 17,699 tons, valued at \$411,536, an average of \$23.25 per ton. The imports since 1887 are shown in Table 13, the figures of the table being for the fiscal year.

IRON.—TABLE 13.
Imports of Ferro-Manganese, Etc., 1887-1909.

*1894	284	9,885	†1906	15,023	162,739
†1895	164	5,408	†1907 (9 months)	16,414	610,875
†1896	652	12,811	†1908	17,417	612,062
†1897	426	9,233	†1909	13,053	388,021
†1898	1,418	22,510			

* These amounts include: ferro-manganese, ferro-silicon, spiegel, steel bloom ends and crop ends of steel rails, for the manufacture of iron or steel.

† Ferro silicon, spiegeleisen, and ferro-manganese.

STEEL.

Returns of steel production received direct from the producers showed a total production of ingots and castings in 1909 of 754,719 tons, valued at \$14,359,800; as compared with 588,763 tons, valued at \$10,916,602, in 1908, and 706,082 tons, valued at \$15,612,590, in 1907. Of the production in 1909, 535,088 tons were open-hearth ingots; 203,715 tons, Bessemer ingots; 14,013 tons, direct steel castings, and 1,003 tons of other steels. Compared with 1908, there is an increase in total production of 165,956 tons, or 28.2 per cent. The production during the past three years is shown in Table 14 below.

IRON.—TABLE 14.

Production of Steel, 1907, 1908, and 1909.

Description.	1907.		1908.		1909.

Statistics of production of steel ingots and castings since 1894 are given in the following table, the figures from 1894 to 1906, inclusive, having been collected and published by the American Iron and Steel Association, those for 1907 to 1909 being as shown in Table 14.

IRON. TABLE 15.

Annual Production of Steel Ingots and Castings, 1894-1909.

Calendar Year.	Short Tons.	Calendar Year.	Short Tons.	Calendar Year.	Short Tons.
1894	28,767	1900	26,406	1906	601,306
1895	46,040	1901	25,211	1907	704,082
1896	17,929	1902	263,881	1908	588,763

1898	24,125	1904	166,381		
1899	26,640	1905	451,863		

Following is a list of firms making steel in Canada:—

- Dominion Iron and Steel Company, Sydney, C.B.
- Nova Scotia Steel and Coal Company, New Glasgow, N.S.
- Montreal Steel Works, Limited, Montreal, Que.
- The Algoma Steel Company, Sault Ste. Marie, Ont.
- The Hamilton Steel and Iron Company, Hamilton, Ont.
- The Wm. Kennedy Sons, Limited, Owen Sound, Ont.
- The Ottawa Steel Castings Company, Limited, Ottawa, Ont.
- The Ontario Iron and Steel Company, Limited, Welland, Ont.

Rolled products, etc.—Complete statistics of the production of rolled products and manufactured steel have not been obtained. The production of steel rails, however, in 1909 was returned as 377,642 short tons; as compared with 300,935 short tons produced in 1908.

The production of finished rolled iron and steel in Canada from 1904 to 1908, as ascertained by the American Iron and Steel Association, was as follows, in long tons:—

Annual Production of Rolled Iron and Steel, 1904-8.

Products	Gross Tons.	1904.	1905.	1906.	1907.	1908.

BOUNTIES.

Bounties on iron and steel made in Canada were provided for by the Dominion government in 1897 (Chapter 6, Statutes of Canada, 1897). This

Act was amended in 1899 (Chapter 8, Statutes of Canada, 1899), and again in 1903 (Chapter 68, Statutes of Canada, 1903). The latter Act provided for the payment of bounty until June 30, 1907. On April 27, 1907, a new Act was passed (Chapter 24, Statutes of Canada, 1907), providing for the further payment of bounties from January 1, 1907, to December 31, 1910, and in the case of pig iron made by electric smelting, until December 31, 1912. The Act is as follows:—

An Act Respecting Bounties on Iron and Steel made in Canada.

(Assented to, 27th April, 1907.)

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. The Governor in Council may authorize the payment out of the Consolidated Revenue Fund of the following bounties on the undermentioned articles when manufactured in Canada for consumption therein, viz.:—

(a) In respect of pig iron manufactured from ore, on the proportion from Canadian ore produced during the calendar year:—

1907,	\$2 10 per ton.
1908,	2 10 "
1909,	1 70 "
1910,	0 90 "

(b) In respect of pig iron manufactured from ore, on the proportion from foreign ore produced during the calendar year:—

1907,	\$1 10 per ton.
1908,	1 10 "
1909,	0 70 "
1910,	0 40 "

(c) On puddled iron bars manufactured from pig iron made in Canada during the calendar year:—

1907,	\$1 65 per ton.
1908,	1 65 "
1909,	1 05 "
1910,	0 60 "

(d) In respect of rolled, round wire rods not over three-eighths of an inch diameter, manufactured in Canada from steel produced in Canada from ingredients of which not less than fifty per cent of the weight thereof consists of pig iron made in Canada, when sold to wire manufacturers for use, or when used in making wire in their own factories in Canada, on such wire rods made after the thirty-first day of December, one thousand nine hundred and six, six dollars per ton.

(e) In respect of steel manufactured from ingredients of which not less than fifty per cent of the weight thereof consists of pig iron made in Canada, on such steel made during the calendar year:—

1907.....	\$1 65 per ton.
1908.....	1 65 "
1909.....	1 05 "
1910.....	0 60 "

(2) No bounty shall be paid under the foregoing provisions in respect of iron or steel made in Canada by electric process after the thirty-first day of December, one thousand nine hundred and eight.

2. The Governor in Council may authorize the payment out of the Consolidated Revenue Fund of the following bounties on the undermentioned articles when manufactured in Canada for consumption therein, viz.:—

(a) On pig iron manufactured from Canadian ore by the process of electric smelting during the calendar year:—

1909.....	\$2 10 per ton.
1910.....	2 10 "
1911.....	1 70 "
1912.....	0 90 "

(b) On steel manufactured by electric process direct from Canadian ore, and on steel manufactured by electric process from pig iron smelted in Canada by electricity from Canadian ore during the calendar year:—

1909.....	\$1 65 per ton.
1910.....	1 65 "
1911.....	1 05 "
1912.....	0 60 "

(2) Bounty, as on pig iron under this section, may be paid upon the molten iron from the ore which in the electric furnace enters into the manufacture of steel by the direct process, the weight of such iron to be ascertained from the weight of the steel so manufactured.

3. No bounty shall be paid on steel ingots from which steel blooms and billets for exportation from Canada are manufactured.

4. The Governor in Council may make regulations to carry out the intention of this Act.

5. The Minister of Trade and Commerce shall be charged with the administration of this Act.

6. Chapter 8 of Statutes of 1899, Chapter 68 of the Statutes of 1903, and Chapter 39 of the Statutes of 1904, are repealed.

7. This Act shall be deemed to have come into force on the first day of January, one thousand nine hundred and seven.'

The amount of bounties paid on iron and steel during the calendar years 1908 and 1909, as kindly furnished by the Department of Trade and Commerce, are shown in Table 16, following:—

IRON.—TABLE 16.
Bounty Paid during the Calendar Years 1908 and 1909.

EXPORTS AND IMPORTS OF IRON AND STEEL GOODS.

The value of the exports of iron and steel products from Canada in 1909 was \$2,598,756, as compared with a value of \$2,098,138 in 1908. Details are shown in Table 17 following:—

IRON.—TABLE 17.

Exports of Iron and Steel goods, the product of Canada, during the Calendar Years 1908 and 1909.

Steel and manufactures of.	"	1,169,674	1,132,678
Totals.	2,098,138	2,598,756

Nearly 44 per cent of the total exports in 1909 are entered as steel and its manufaetures. The export of these products has grown very rapidly during the past few years, having increased from a value of \$477,766 in 1907 to a value of \$1,132,678 in 1909.

The total imports of iron and steel goods, as compiled from the annual reports of Trade and Navigation, are given in Table 19, showing the imports subject to duty, and Table 20. showing the imports free of duty.

The total value of the imports during the fiscal year ending March, 1909, was \$40,393,431; as compared with \$61,819,698 during the previous fiscal year.

The weights or quantities are in many cases not given, so that it is not possible to state the total tonnage of iron and steel imported. A minimum estimate of the tonnage can, however, be arrived at by selecting those items for which the weights are given. This has been done, and the results are given in Table 18.

The imports of these selected items showed a tota' tonnage in 1909 of 545,594; as compared with 1,079,000 tons in 1908, and 783,025 tons during the nine months ending March, 1907. The statistics for 1909 show a falling off in imports in all classes of iron and st ' goods.

Windmills and complete parts thereof	"	708	36,171	754	38,284
Ore crushers and rock crushers, stamp mills, cornish and belted rolls, rock drills, air compressors, cranes, derricks, and percussion coal cutters	"	8	178,451	176,014
Portable machines	"	8	203	2,302	187
Hodder or feed cutters	"	25	2,321	20	368
Horse powers for farm purposes	"	740	1,035,868	(602)	794,854
Portable engines with boilers in combination and traction engines for farm purposes	"	21	23,352	20	18,750
Portable sawmills and planing mills	"	14	71,052	29	152,027
Steam shovels	"	649	386,583	624	362,083
Threshing machine separators	"	8	parts of, including wind stackers, baggers, weighers, and self-feeders for same, and finished parts thereof for repairs, when imported separately	296,427	289,118
All other portable machines, N.O.P., and parts	No.	16,015	396,254	19,891	17,823
Sewing machines	"	8	298,198
" parts of	No.	784	96,745	207,216	52,044
Slot machines	"	784	22,560	248	4,832
Machines, type-writing	No.	7,058	346,008	6,040	446,801
" type-casting and type-setting, and parts thereof, adapted for use in printing offices	"	109	211,445	20	123,446
Machines specially designed for ruling, folding, binding, embossing, creasing or cutting paper or card-board, when for use exclusively by printers, bookbinders, and by manufacturers of articles made from paper or card-board, including parts thereof, composed wholly or in part of iron, steel, brass, or wood	"	765	135,869	296	88,493
Machines for carding, spinning, weaving, or knitting, imported by manufacturers for such purposes	"	8	707,949	823,688
Lithographic presses and type-making accessories for same	"	8	38,331	27,131
Printing presses	"	8	257,522	160,600
All machinery composed wholly or in part of iron or steel, N.O.P., and iron or steel castings, and iron or steel integral parts of all machinery specified in tariff item 433	Cwt.	8,006,310	5,516,840	5,346,001
Malleable iron castings and iron or steel casting, N.O.P.	Lbs.	12,788	53,461	74,796	4,591
Nails and spikes, composition and sheathing nails	Lbs.	1,560	2,842	74,480

IRON.—TABLE 19—Continued.
Imports of Iron and Steel Goods subject to Duty

Material.	Twelve months ending March, 1908		Twelve months ending March, 1907	
	Quantity.	Value.	Quantity.	Value.
Nails and spikes, cut (ordinary builders).	4,124	10,339	2,885	6,785
Railway spikes.	29,850	59,065	18,902	34,291
Nails, wire of all kinds, N.O.P.	"	"	5,145	25,160
Pins, hand, N.O.P.	14,566	14,566	11,361	54,216
Iron and steel railway bars or rails of any form punched or not, N.O.P., for railways, street railways and tramways, even although they are used for private purposes only, and even although they are not used or intended to be used in connexion with the business of common carrying of goods or passengers.	49,187	1,278,084	29,547	797,479
Railway fish-plates.	"	"	1,225	1,784
Railway tie-plates.	"	"	859	49,046
Rolled iron or steel angles, tees, beams, channels, girders, and other rolled shapes or sections, not punched or drilled, or further manufactured than rolled, N.O.P.	640,863	1,064,890	383,529	563,762
Rolled iron or steel beams, channels, angles, and other rolled shapes of iron and steel, not punched, drilled or further manufactured than rolled, weighing not less than 35 pounds per linear yard, not being square, flat, oval or round shapes, and not being railway bars or rails.	1,474,074	2,292,516	1,055,541	1,444,741
Rolled iron or steel hoop, band, scroll or strip, 12" or less in width, No. 13 gauge and thicker, N.O.P.	52,735	99,917	34,969	59,291
Rolled iron or steel hoop, band, scroll or strip, No. 14 gauge and thinner, galvanized or coated with other metal or not, N.O.P.	165,568	285,670	86,283	294,169
Rolled iron or steel sheets or plates, sheared or unsheared, and skip iron or steel, sheared or rolled, grooved, N.O.P.	315,512	539,220	156,910	242,600
Rolled iron or steel plates not less than 30 in width and not less than 4" in thickness, N.O.P.	419,733	666,288	325,447	453,265
Balls of chilled iron or steel.	250,839	581,624	294,322	498,716
Screws, duors for safes and vaults.	"	"	6,930	5,456
Screws, plated or not, and machine or other screws, N.O.P.	1,998	7,706	1,447	5,896
Scales, balances, weighing beams, and strength-testing machines of all kinds.	3	145,004	92,491
Screws, iron and steel, commonly called "wood screws", N.O.P., including lag or coach screws, plated or not, and machine or other screws, N.O.P.	290,387	41,141	100,391	19,219
Scales, balances, weighing beams,	8	195,464	174,738

Shafting, round, steel, in bars not exceeding 2½" diameter.....	Cwt.	43.387	80.328	28.322	33.747
Sheets, flat, of galvanized iron or steel.....	"	153.068	484.585	128.007	388.880
Sheets, iron or steel, corrugated, galvanized.....	"	2.812	9.456	1.325	3.894
Skates, iron or steel, roller or other, and parts therof.....	"	5.522	2.084	214	233
Skelp, iron or steel, sheared or rolled in grooves, inspected by manufacturers of wrought iron or steel pipe, for use exclusively in the manufacture of wire "W. t. iron or steel pipe in their own factories.....	Pairs.	114.340	94.616	92.046	49.164
Steel bolts, N.O.P.....	Cwt.	704.709	1,291.942	687.341	925.417
Stoves of all kinds, for coal, wood, oil, spirits, or gas, stove ears of metal, and dovetails, claspets, and hinge-tubes of tin for use in the manufacture of stoves.....	"	32.084	48.072	24.438	31.829
Switches, frogs, crossings, and intersections for railways.....	Cwt.	"	469.884	380.786
Tubing:—					
Wrought or seamless tubing, iron or steel, plain or galvanized, threaded and coupled, or hot over 4" diameter, N.O.P.....	"	371.736	245.298	
Wrought or seamless tubing, iron or steel, plain or galvanized, threaded and coupled, or not, 4" and less in diameter, N.O.P.....	"	321.382	212.263	
Seamless steel tubing, valued at not less than 34 cents per lb.....	"	29.042	4.102	24.257	
Rolled or drawn square tubing of iron or steel, adapted for use in the manufacture of agricultural implements.....	Cwt.	5.331	7.884	4.656
Iron or steel tube or tubing, plain or galvanized, riveted, corrugated, or otherwise specially manufactured, including lock-joint pipe, N.O.P.....	"	221.140	167.843	
Iron or steel pipe, not butt, or lap welded, and wire bound wooden pipe, not less than 30" in iron diameter, when for use exclusively in alluvial gold mining.....	"	130.285	10.824	
Ware—Agate, granite, or enamelled iron or steel ware.....	"	113.407	122.418	
Ware—Iron or steel hollow ware, plain black or coated, N.O.P., and nickel and aluminum kitchen or household hollow ware.....	"	34.217	20.908	
Wire-hale ties.....	Bundles of 250 ties	629	685	4.541	5.625
Wire-bound wooden pipe, N.O.P.....	Lbs.	1,350.650	56.720	1.376.974	74.422
Wire cloth or woven wire and netting of iron or steel.....	"	146.664	25.089	77.410	14.364
Wire, crimpable cast steel, valued at not less than 6 cents per lb.....	"	11.006	7.374	5.864
Wire screens, doors and windows.....	"
Wire, bucklinion strip fencing, woven wire fencing, and wire fencing of iron and steel, N.O.P., not to include woven wire or netting made from wire smaller than No. 14 gauge, not to include fencing or wire larger than No. 9 gauge.....	Lbs.	1,909.522	57.424	1,983.478	45.513
Wire, such, or several, covered with cotton, linen, silk, rubber, or other material, including cable so covered.....	"	2.927.772	442.416	1,674.448	277.642
Wire of iron and steel all kinds, N.O.P.....	Cwt.	11.006.983	319.090	4.723.315	150.028
Wire ropes, stranded or twisted wire, twisted wire, and wire cables, N.O.P.....	"	2,563.524	408.945	3.147.82	25.673
Iron or steel nuts, rivets, or bolts with or without threads, nut bolt, and hinge-blanks and T and trap hinges of all kinds, N.O.P.....	"	48.580	199.218	253.942	88.248
Iron or steel scrap, wrought, being waste or refuse, including punchings, cuttings, and chipings of iron or steel plates or sheets having been in actual use; crop ends of tin plate bars, bloom, and rails, the same not having been in actual use.....	"	626.501	506.938	220.414	146.875
Penknives, jack-knives, and pocket knives of all kinds.....	"	131.387	102.573

IRON.—TABLE 20.
Imports of Iron and Steel Goods free of Duty.

Material.	Twelve months ending March, 1908.		Twelve months ending March, 1907.	
	Quantity. (wt. g.)	Value. \$	Quantity. (wt. g.)	Value. \$
Anchors for vessels	7,406	21,484	5,914	22,328
Chain, malleable sprocket or link belting	185,416	173,803
Cream separators, and steel bowls for	418,569	545,290
Cream separators—materials which enter into the construction and form part of when imported by manufacturers of cream separators to be used in the manufacture thereof	212,172
Gas buoys—The following articles and materials, when imported by manufacturers of automatic gas buoys and automatic gas beacons, for use in the manufacture of such buoys and beacons for the Government of Canada or for export, viz., iron or steel tubes over 16" diameter, flanged and dished; steel heads made from boiler plate, over 5 feet in diameter; hardened steel balls, not less than 3" diameter; acetylene gas lanterns and parts thereof, and tubing bronze in bars or rods	280,651	253,229
Iron or steel rods not less than $\frac{9}{16}$ " diameter for manufacturing of chain	16,740	14,510
Iron or steel, rolled round wire, rods, in the coil, not over 2" diameter, when imported by wire manufacturers for use in making wire in the coil in their own factories	197,247	295,122	406,241	338,578
Boiler plate of iron or steel not less than 30" width, and not less than $\frac{1}{2}$ " thickness, for use exclusively in the manuf. "tire" of boilers	292,819	460,423	160,273	244,476
Flat galvanized iron or steel sheets	281,850	942,889	221,224	625,466
Rolled iron and steel, and cast steel, in bars, band, beams, scroll or strips, sheet or plate of any size, thickness or width, galvanized or coated with any material or not, and steel blanks for the manufacture of milling cutters, when of greater value than 3½ cts. per lb.	61,243	441,416	31,000	254,729
Rolled iron or steel sheets in strips, polished or not, 14 gauge and thinner, N.O.P.	378,944	920,765	222,219	617,252
Rolled iron or steel, bands, scroll, band, small or strip, No. 14 gauge and thinner, galvanized or coated with other metal or not, N.O.P.	22,250	47,878	11,773	20,659
Iron tubing for manufacture of extension rods for windows	3,441
Iron or steel, beams, sheets or plates, ankles, knees, masts, or parts thereof, and cable chains for wooden, iron, steel or composite ships or vessels	173,520	302,331	162,532	257,783
Locomotive and car wheel tires of steel in the rough	148,525	341,727	165,882	274,722
Serap iron and scrap steel, old, and fit only to be remanufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Canada	200,340	176,518

IRON.—TAXES, 20.—Continued.

Imports of Iron and Steel Goods free of Duty.

Material.	Twelve months ending March, 1908.		Twelve months ending March, 1909.	
	Quantity.	Value.	Quantity.	Value.
Machinery:	8	8
Articles of metal as follows, when for use exclusively in mining and metallurgical operations viz., coal cutting machines, except bellows and enteries; coal-handing machines; coal augers; rotary coal drills; core-drills; miners' safety lamps and bats; thermal, also accessories for cleaning, filling, and testing such lamps; electric or magnetic machines for separating or concentrating iron ores; furnaces for the smelting of copper, zinc, and nickel ores; converters; apparatus for metallurgical processes in metals; copper plates, plated or not; machinery for extraction of precious metals by the chlorination or cyanide process; anodeam safes; automatic ore samplers; automatic feeders, reforts; ore-jerky pumps; pyrometers; blast-furnace blowing engines; wrought iron tubing, bent or lap welded, threaded or coupled, or not, over 4" diameter; and integral parts of all machinery mentioned in this item.	1,060,945	7	
Blowers of iron or steel of a class or kind not made in Canada, for use in the smelting of ores, or in the reduction, separation or refining of metals; rotary kilns, revolving roasters and furnaces of metal of a class or kind not made in Canada, designed for roasting ore, mineral rock or clay; furnace-slag trucks and slag pots of a class or kind not made in Canada.	45,687	415,930
Appliances of iron or steel, of a class or kind not made in Canada, and elevators and machinery of floating dredges, when for use exclusively in alluvial gold mining.	61,380	10,130
Well-drilling, and apparatus of a class or kind not made in Canada for drilling for water, natural gas or oil, and for prospecting for minerals, not to include motive power.	702
Briquette making machines, newspaper printing presses, of not less value by retail than \$1,500 each, of a class or kind not made in Canada.	361,278	60	361,278	60
Machinery and tools not manufactured in Canada up to the required standard necessary for any factory to be established in Canada for the manufacture of rifles for the Government of Canada.	5,678	5,678
All materials, or parts in the rough, unfinished, and screws, nuts, bolts, and springs to be used in rifles, to be manufactured at any such factory for the Government of Canada.	15,148	15,148
Machinery of every kind, and structural iron and steel for use in the construction and equipment of factories for the manufacture of sugar from beet root.	25,804	25,804
	12,317	12,317

Mould boards or shares, or plough plates, land soles, and other plates for agricultural implements, when cut to shape from rolls. Plates of steel, but not moulded, punched, polished or otherwise manufactured	Cwt.	19,571	267,966	60,183	144,288
Steel, adapted for use on bearings on machinery, and vehicles	Cwt.	8	4,499	2,326
Steel, rolled for saws and scraw cutters not tempered, or ground, nor further manufactured than cut to shape without indented edges	Cwt.	18,115	158,379	12,097	96,305
Steel strips, and flat steel wire when imported into Canada by manufacturers of buckshot and plain strip fencing, for use exclusively in their own factories in the manufacture thereof	Cwt.	188	871	28	109
Steel wire, Bessemer soft drawn spring of Nos. 10, 12, and 13 gauge, respectively, and irono-steel spring wire of Nos. 11 and 12 gauge, respectively, when imported by manufacturers of wire mattresses, to be used exclusively in their own factories in the manufacture of such articles	Cwt.	9,294	24,292	6,421	15,505
Steel, crucible sheet, 11 to 16 gauge, 2 $\frac{1}{2}$ to 18 wide, for the manufacture of mowes and reaper knives when imported by manufacturers thereof for use exclusively in the manufacture of such articles in their own factories	Cwt.	11,433	61,779	12,033	50,726
Steel No. 20 gauge and thinner, but not thinner than No. 30 gauge, for the manufacture of corset steels, clock springs, and shoe shanks, imported by manufacturers of such articles for exclusive use in the manufacture of such articles in their own factories	Cwt.	208	1,228	5
Steel wire, flat, of 16 gauge or thinner, imported by the manufacturers of crinoline, and corset wires, and dress stays, for use exclusively in the manufacture of such articles in their own factories	Cwt.	3,765	24,631	4,064	20,495
Steel, No. 12 gauge and thinner, but not thinner than No. 30 gauge, for the manufacture of buckle clasps, bed facts, furniture casters, and ice-scoopers, imported by the manufacturers of such articles, for use exclusively in the manufacture of such articles in their own factories	Cwt.	1,520	4,215	1,631	4,385
Steel No. 24 and 17 gauge, in sheets 63 long and from 1 $\frac{1}{2}$ to 32 wide, when imported by the manufacturers of tubular bow sockets for use exclusively in the manufacture of such articles in their own factories	Cwt.	2,327
Steel springs for the manufacture of surgical trusses, when imported by manufacturers of surgical trusses for use exclusively in the manufacture thereof in their own factories	Lbs.	960	7,64	1006	774
Swedish rolled iron, and Swedish rolled steel nail rods, under half an inch in diameter, for the manufacture of horse-hoe nails	Cwt.	22,360	1,168	1,520	30,002
Steel seamless tubing valued at not less than 35 cents per pound	Cwt.	1,000	10,463	330	2,933
Steel or iron tubes, rolled, not joined or welded, not more than 1 $\frac{1}{4}$ diameter, N.O.P., 8 gauge	Cwt.	10,123	7,181
Saw blades, steel, or wrought iron boiler tubes, including flues and corrugated tubes for marine boilers	Cwt.	1,652	1,652	115,068
Barbed fencing wire of iron or steel	Cwt.	241,520	77,24,66	231,027	367,236
Wire, crucible cast steel, value 1 at not less than 6 cents per lb.	Cwt.	14,310	10,788	1,380
Wire, curved or not, galvanized iron or steel, Nos. 9, 12, and 13 gauge	Cwt.	608,039	1,311,116	891,566	878,129
Wire, steel, valued at not less than 2 cents per pound when imported by manufacturers of rope for use exclusively in the manufacture of rope	Cwt.	35,460	142,467	22,120	85,714
