THE ARCTIC CANNIBALS

FURTHER DETAILS OF THE RE-VOLTING STORY.

An Officer of the Bellef Expedition Tells What He Knows-Greely Makes a Denial Regarding One of the Dead

PHILADELPHIA, Aug. 15.-Major Gar diner, rather of Sergeant Gardiner, who was the last but one of the Greely expedition to die, has received a letter from Greely expressing the hope that he will not believe the horrible story of cannibalism which has been set afloat, declaring that there is not a particle of truth in it.

the bowels and water on the heart, and was buried on the ice because the survivors were too weak to dig graves. New York, Aug., 15 .- A seaman of the relief expedition said yesterday that one of the survivors of the Greely party had told him that three others besides Henry had stolen rations, but Henry was the

sharpest and they were all afraid of him. The remains of Private Charles B. Henry. who was shot at the Greely camp on Smith's sound on June 6 at the time the survivors were reduced to the direct extremity for food, were found by the rescuing party from an eighth to a quarter of a mile beyond the tent of the starving men. There was scarcely anything left but a pile of glistening bones stripped of nearly every trace of missing flesh except some of the lower parts of the trunk. The head was missing and could not be found, so that it was at first supposed that the remains were those of Dr. Pavy. The bones were placed in a bag for removal to the Bear with the remains of six others of the ill-fated expedition. On board they were deposited in a little box about two feet long, which was placed aft and covered with the stars and

the homeward trip the box was remove from the deck, and the officers, determine on Cape Sabine, prepared the bones for burial. Sticks of wood were procured and to these, fitted to the proper length, the bones were tied, until all were as nearly in place as it was possible to get them. The head was missing, and a block of wood was made to do duty in its place. Then this framework in the shape of a been. It was then surreptitiously placed in one of the alcohol filled tanks with some of the others. It was this skilfully made package, resembling a numan body, that was lifted into a coffic at St. John's and marked "Private Charles at Cypress Hills cemetery. So well had the work been done that it is doubtful if

hares and ptarmigads There were no car-niverous animals, as the record of the relief exhibition shows, to disturb the remains of the dead, neither did they decay. Cross, the first of the party who died, passed away on Jan. 18. He was a large man and when taken from the was a large man and when taken from the shallow grave his body was found heavier than any of the others. The flesh was quite firm and showed no signs of decay excepting a portion of one hand, which was slightly discolored. Yet of Private Henry, who died only sixteen days before the relief party arrived, there was nothing

the relief party arrived, there was nothing left but a few fleshless bones.

The head had probably been thrown into the sea to prevent identification when the truth should be known—as it was sure to be some time, whether rescue came or not. In this work of the officers of the Bear it was not possible to remove all traces of the bullet by which Henry met his fate, for more was left of the trunk than any other

Third officer Kelly of the steamer Bear this morning said the reports of cannibal-ism among the members of the Greely party were true. The survivors told everything when they boarded the Bear.

YOUNG CANADIANS RETAIN WESTERN CHAMPIONSHIP.

tealper Second at Saratoga—A Jockey Killed—Baysides Beat the Maple Leafs —General Notes. The match for the western champion

ship between these two clubs was played at Richmond Hill yesterday. Following are the names and positions of the teams : Young Canadians-Goal, J. McKoni Young Canadians—Goal, J. McKonlichie; point, Wilez; cover-point Major; defence, Young, Piper, Skeld: centre, Powell; home, F. Derry, B. Brown, A. Tugsley, S. S. Searle, C. Savage.

Excelsiors—Goal, Menning; point, Lowes; cover-point, Roberts; defence, Blaine, Main, Tallis; centre, Joyce; home, Nicholls, Teaker, Ballantyne, Charters, Lowis.

Dan A. Rose was referee. The ball was Dan A. Rose was referee. The ball was faced at 2 40, and at once went spinning away to the visitors' flags. After some brisk play Savage put the rubber through in fine style twenty minutes after starting. The second game was decided almost from the start, the ball being kept up at the Excelsiors' flags all the time. Savage again slipped the ball through; time 17 mins. The third game was better contested and some very fine playing was done, but in 12 mins. the ball again went spinning through the strangers' flags, giving the Young Canadians a victory of three straight games. The Brampton boys left a big pile behind them; so confident were they of winning that they were offering 10 they of winning that they were offering 10 to 2. There is some talk of the two clubs meeting on the Rosedale grounds in a week

The town was delighted with the result and regards the Young Canadians as per-fect heroes. They played all round the

At the Oval on Aug. 2 the Australian dministered a crushing defeat to the "Players of England" by nine wickets. "Players of England" by nine wickets. The match was noted for the mighty hitting of the "Giant" Bonnor, the grand bowling of Spofforth and the display of rowdyism never before seen on an English cricket ground in a first-class match. The team representing England, although not the strongest that could have been got together, was nevertheless a very good representative one. The Englishmen went first to the bat; the wicket was slow from recent rains, and 107 was the extent of their efforts, of which Alyett's 22 was best their efforts, of which Alyett's 22 was best Spofforth obtained 8 wickets—6 cleaned bowled—for 62 runs, a fine performance. The Australians made 151, to which the 'Giant' Bonnor contributes 68 (run out), in such a vigorous and brilliant manner as to astonish all. While he was at the wicket 76 runs were added to the score, and for a between to make 68 runs while and for a batsman to make 68 runs while his various partners contributed only 8 runs is remarkable. Nearly all his hits were fours and one straight drive right over the pavilion was a mighty stroke. The second innings of the Players only amounted to 71, Spofforth being un-

playable to everyone save Wyatt, whose 33 was a very good bit of batting. Spofruns and 6 wickets—4 cleaned bowled.
For the Players Plate got 5 wickets for 55
runs. Now, a word for the rowdyism.
After the clase of the second innings of
the Players the Australians required to go to make 28 runs to win the match. time was a quarter to two o'clock and seventeen ruus had been made, Bonner eing bowled by Peate for 12, when the uncheon bell rang. Eleven runs were till wanted Emmett wished to finish the match, Murdock would not, and the eleven repaired to the luncheon. Of course, the Australians were right in refusing to proceed. After the retirement of the Players the people crowded round the pavilion groaning and hooting and then on the wicket remov

ing the ropes, bending the iron supports, and pitching the stumps in all di rections. After some time order was restered and the gome proceeded with. The out-burst of popular feeling was in no sense antagonistic to any member of either team, but simply against being kept waiting for the finish of a match which could be completed in a few minutes. Finally after order had been restored Macdonnell and Murdock knocked off the rope and the wickets. Scores, Gloucestershire 49 and 63. Notts 105 and 9, without the loss of a wicket. Flower's 50, in the first innings of Notts, was the best batting of the match; and the veteran Alfred Shaw was in rare form with the ball sending down altogether 79 overs, 47 maidens for 65 runs 14 wickets. Attewell for Notts also bowled well, as he and Shaw were unchanged in both innings, and his bowling consisting of 78 overs, 54 maidens for 46 runs and 6 wickets speaks for itself.
Sussex defeated Derbyshire by 50 runs.

Small scores marked the contest. W. Blackman for Sussex being the most effective bowler with 8 wickets for 44 runs. SPORTING EDITOR WORLD: Now that our city, through its representation at the Watkins Glen regatta by the Argonaut and Toronto rowing clubs, has once more proven herself to be the home of aquatic championships, cannot something be done to re-establish the concord and hearty good feeling between our two leading clubs which existed before the late regatta on this hay? which existed before the late regatta on this bay? As your paper has often stated, the "pool box" is responsible for the arbi-trary action which caused the rupture, and the action of one of the Toronto crew in refusing the medal which accompanied the championship cup, together with the remarks of Mr. Boswell, their president, at the Watkins Glen regatts, relative to the generous action of competing double scurle, whereby they agreed to a postponement of their race until the Toronto pair had mended their boat, as also the remarks since made by a great many of the gentlemen belonging to the Toronto club, allows of the inference that they deeply a cognet the combination of circumstances. the Watkins Glen regatta, relative to the regret the combination of circumstances under which the bud feeling was excited and suggests that now would be the time

By all means let us have something while the crews are in training that will not only re-establish a hail-fellow-well met feeling in our Canadian association but open the eyes of the world still wider, for there is no doubt but that on this course with smooth water even the present fast record can be lowered.

A BALCONY OARSMAN. The Bicycle Tournament. The Toronto bicycle club have completed their program of events for their an-

race, half mile, club; 10, five mile, handicap, open; 11, fancy riding. The prizes
are valuable, consisting of gold and silver
medals, cups, silverware, etc. It is pleasing to see the club handicapping some of
their principal events. This will save the
races from being contests merely among
three or four crack professionals who carry
off all the prizes, and will tend to bring
out the best amateur skill. On that account the tournament is sure to be all the
more interesting to spectators.

This Arctic agony is being piled on rather too thickly. Many noble spirits have been vainly sacrificed in competing for polar prizes. In the earlier days of Arctic exploration hope told a flattering tale, and the chance of achieving something tangible seemed so good as to justify any risks that might be taken in pursuit of thereof. But such justification is now out of the question. Each fresh expedition has made it only more and more manifest that the game is not worth the candle. The culminating catastrophe comes with the circumstantial allegation that the members of the Greely party were reduced to cannibalistic practices. The poor fellows should not be too harshly held to account, even if guilty. It is difficult to say what any man might do under certain circumstances. It is by no means certain that the charge is true, but the mere fact that it has been made and that it is possible for christian men to be reduced to the possibility of cannibalism upon such expeditions is sufficient reason for calling a halt. The more the Greely expedition is discussed the more apparent does it become that such enterprises are too generally the offspring of a vanity that masquerades under the name of scientific research. We have had more than enough of the arctic agony. It is too positively painful for repetition.

From jest to earnest is often like from the sublime to the ridiculous, a step only. Our esteemed contemporaries, the Times and the Spectator of Hamilton, have taken that step, and from jibing about their respective circulations have come to a libel suit. Editors should try to be like little birds in their nests and agree, lest they fall out.

In that dispute the people of Maine believed themselves in the right, and were prepared to fight for their convictions, therefore Col. Denison should have for them the same respect and admiration which he has for their opponents, the bluenoses. If he has not then he is partisan and his judgement on these questions is good for nothing.

Col. Denison says that Canadians "Would make a most desperate struggle before losing the liberties they enjoy."

We believe it, but independence is not a question of less liberty but more, and the failure to see this is what puts Col. Denison in a false position. Would we be less free if we had the right to elect our own ehief magistrate, instead of being ruled by an imperial party hack sent out here large ly because his party usefulness at hone is gone? Would we be less free if we had the right to negotiate and conclude our own treaties with foreign powers instead of having to submit to such international of having to s

If Col. Denison knows anything about his vocation he must know that in stigmatizing us as conspirators against lawful authority he is charging us with a grave crime, and if he does not set the machinery of the law in motion for our conviction he is recreant to his obvious duty. As a matter of fact, however, he knows that his epithets are mere frothy libels.

Never Seen a Threshing Machine as Nearly Perfect as the "New Medel."

Cooksville, Dec. 30th, 1882.

To the Editor of the Express, Oukville:

Dear Sir. We, the undersigned farmers and old threshers, being desirous of advancing the interests of our farmer friends, take great pleasure in calling their attention to a new threshing machine which we have had the satisfaction of seeing work. It is called the "New Model" Vibrator and was made by the Joseph Hall Manufacturing Co., of Oshawa. We have had much experience in threshing, separating and cleaning grain, but we have never seen a threshing machine so nearly perfect as the "New Model." It runs very smoothly, without scarcely any vibration, every part being so carefully and evenly balanced. It threshes rapidly, in fact it can take all the straw men can give it. It feeds very easily. It separates the grain most thoroughly from the straw. In this respect it is remarkable, and, finally, it cleans the grain more perfectly than we have ever seen it done heretofore. The manufacturers claim that it will thresh two thousand bushels of wheat without wasting more than a bushel, and we believe that the machine will fulfil

Never Seen a Threshing Machine Nearly Perfect as the "New Model."

To the Editor of the Canadian Post:

SIR,—Please allow me space in your valuable paper to make the following statement which I know will be of interest to all my farmer friends who read your journal. I employed a threshing machine to thresh my grain on the 26th day of January. It was manufactured by J. Abell, of Woodbridge. On February 6th I employed Messrs. Wetherup & Curtis to finish my threshing with a "New Model" Vibrating threshing machine, manufactured by the Jos. Hall Manufacturing Co., of Oshawa.

of Oshawa.

Messrs. Wetherup & Curtis re-threshed part of the straw and chaff threshed by the Woodbridge machine, and took therefrom thirty bushels of clean barley.

This "New Model" Vibrator is the most perfect thresher, separator and cleaner I ever saw. Yoars, very respectfully,

To the Editor of the Pickering News:

DEAR SIR,—Last harvest we purchased of the Jos. Hall Manufacturing Company one of their "New Model" Vibrator Threshing Machines, and worked it all the season. As a thresher, separator and cleaner it has no equal. It threshed and cleaned barley quite fit for market, and the waste of grain is insignificant. We believe there is no machine that will so completely separate the grain from the straw as the "New Model." We had all the work we could do from the beginning to the close of "New Model." We had all the work we could do from the beginning to the close of the season, and gave our customers the very best satisfaction. The machine is light in draught, runs very steadily, is well made, highly finished, and, in all respects, a most desirable machine for the thresherman as well as for the farmer. A far as a perfect desirable machine for the thresherman as well as for the farmer. As far as a perfect Thresher, Sparator and Cleaner is concerned, it is as near perfection as we believe a machine can be made. The farmers that I have threshed for say that it is the best threshing machine that ever came into their barn. It has no equal in the County of Elgin. I have threshed for thirty-seven years and have used most all other kinds of machines, but this lays them all out for good threshing, separating and cleaning. Years and the 'ew Model is the set One I Have Ever Seen or Used."

Ope, January 9th, 1883.

To the Editor of the Canadian Post:

SIR,—A short time ago I purchased a new threshing machine called the New Model Vibrator, made at the Jos. Hall Works, in Oshawa, of their agent, James Fleury. It is the only machine of the kind in this vicinity. I bought it upon a guarantee given me by the Company that it would give me entire satisfaction. I have now thoroughly tested the machine and an entirely satisfied with it as a thresher, a separator and a cleaner. It is easy on the team, threshes rapidly, not liable to choke in any kind of grain, separates the grain thoroughly from the straw, and cleans it better than any other machine I have ever seen. I have seen all kinds of machines, and have threshed myself for the past eighteen years, and the "New Model" is the best one I have ever seen or used.

Yours truly, Thomas Wetherup.

bresh all the grain out of the heads and eparate it from the straw and clean it better than any machine I ever saw. It does not scatter the grain all around the hind part of the machine, so when you get to the straw threshed you are done. It does not take half an hour to clean up the floor after you have finished the mow. It does not wind in threshing peas or any other grain; it stands still on the floor and not belts fly off to bother you. I would advise any man who wants to buy a threshing machine not to buy any other kind, and I am sure when he tries one he will be satisfied that he has got the best of them all. draft—and it makes no difference now you feed, nor in what condition your grain is in, you cannot choke it—the shoe is grand for cleaning and separating. ECONOMY WITH COMFORT. The Royal Mail Steamship Adriatic of the White Star Line, has a dining room and staterooms for a strictly limited number of intermediate passengers. This accommodation which is on the SALOON DECK is furnished with the electric light and every modern luxury. Besides the advantage of being in a magnificent ship, passengers will find it superior in ventilation and many other respects to the saloon on some ocean steamers. The Adriatic sails from New York for Liverpool via Quaenstown on the 28th August.

TESTIMONIALS SELECTED. TORONTO, April 12th, 1880.

I hereby certify that I have examined samples of JOHN LABATT'S INDIA PALE ALE, submitted to me for analysis by James Good & Co., agents for this city, and find it to be perfectly sound, containing no ascetic acids, impurities or adulterations, and can strongly recommend it as perfectly pure and a very superior malt siquor.

HENRY H. CROFT.

BEAVER HALL HILL, Montreal, Dec. 20, 1880.

I hereby certify that I have analysed several samples of INDIA PALE ALE and XXX STOUT from terevery of JOHN LABATT, London, Ont. I find them to be remerkably sound Ales, brewed from pure mait and hops. I have examined both the March and October brewings, and find them of uniform quality. They may be recommended to invalids or convalescents where mait beverages are required as a tonic. Signed JOHN BAKER EDWARDS, Phy., Professor of Chemistry and Public Analyst. Electricity as a curative agent is daily growing more and more interesting, important and popular, especially when administered by professional and experienced individuals who have made it a special study and practice, becoming expert in its scientific application. It is wonderful what has been done for the cure of disease with electricity in the old country and in the states by specialists. But we need not go out of our own city to find the same progress in science. Those who read the Electric Age can hardly fail being convinced by the testimonials given, that read the Electric Age can hardly fail being convinced by the testimonials given, that this potent agent in skilful hands does what all other known remedies have failed to accomplish, in view of these facts we are pleased to call attention to Prof. Vernoy's advertisement in our paper, and we advise those interested to call and see him

The Zoo.

The zoo to the The coject to remove the zoo to the exhibition grounds was discussed at a meeting of the zoological society last night. It was reported that the zoological gardens at St. Louis were run in connection with the fair, and that the system worked well. The proposition is to have something of the same kind here, under the joint management of the society and the exhibition association. The matter will be further considered. In the meantime it would be well for citizens to think the project over and pass an opinion thereoon.
