**WHAT DO WE KNOW ABOUT TAXES.**

In view of the fact that excessive taxation is proving such a handicap to British industry, and also taking into account that heavy taxes have much to do with our by no means idealistic conditions, one may be pardoned for making further observations on this subject.

Take for instance a married man with two dependent children residing in Great Britain, having an income of \$2500 per annum. In that country he would pay a tax of \$80. In the United States and Canada under the same conditions he would pay nothing at all.

With an income of \$5,000 the British citizen with a wife and two dependents would pay \$560 per annum. In the United States he would pay \$37.50, and in Canada \$80. With an income of \$10,000 per annum the British citizen would pay \$1575; in the United States \$165 and in Canada \$550.

Back in 1914 the income tax in Great Britain was one shilling ten pence for each pound of taxable income. Today it is almost four times as much, that is four shillings six pence to the pound.

During the life of the British Labor Government, the Chancellor of the Exchequer, Philip Snowden, having a small surplus, and thinking to reduce the cost of living out down the duties on tea, sugar and other foods. Momentarily this had some effect but later prices went back to their old levels. It is said that Winston Churchill the present Chancellor, will devote any surplus he may have to the relief of the income tax payers.

Labor would probably halt this as a rich man's budget, but something must be done to relieve the burden, which is reacting on industry, and is every day making the poor man poorer through lack of work and taking from the country much needed capital without which British trade and commerce cannot prosper. (Toronto Saturday Night.)

**CANADIAN NATIONAL WELL EQUIPPED.**

An Examination of Financial Structure and Property Is Being Made.

Ottawa—An examination of the financial structure and property of more than one hundred companies constituting the Canadian National Railways system is being made and will be completed this year. Sir Henry Thornton told the House of Commons committee on National Railways and Shipping Tuesday.

"Within this year we will have sufficient data to make a definite recommendation," he said.

The matter came up in discussion of the re-organization of Canadian National Companies.

The examination of the whole financial system was the most difficult and important problem which the company faced after getting the system working in harmony. A pension system was being determined for Canadian National employees and legislation to put it into effect would be sought next year, said Sir Henry.

There would probably be considerable additions to the item of pension charges in the years to come, he said.

Speaking on equipment, the C. N. R. President said that he believed the Company had about all the equipment—both for freight and passenger traffic—which it would require for some time to come.

**A RIVER THAT LOSES ITSELF.**

Poets and others have taught us to accept rivers as more or less prosaic features in Nature's general scheme of things. Tennyson, for instance, has held up the brook as a model of virtue and longevity. It is both refreshing and interesting to discover, therefore, that there are streams which do not conform to this estimable standard, but which, very much like human beings, do things they are not supposed to do according to the accepted theories of convention.

There is a river in Canada which loses itself completely and thereby has earned a rather outstanding reputation. This is the Maligne River, which rises in Maligne Lake, in Jasper National Park, Alberta, and after playing its pranks, tumbles—as if it were applauding itself for its cleverness—with a great rush and roar into the staid waters of the Athabaska.

After it leaves Maligne Lake it flows for a goodly number of miles with nothing in its appearance to indicate that soon, so to speak, it is going to sow some wild oats. It is when it reaches the Maligne Canyon, situated about five miles from Jasper Park Lodge, that it begins its pranks. Here it dips suddenly and, without warning, nose dives into a narrow gorge. Within a distance of fifty yards, this chasm reaches a depth of several hundred feet and it is hard to see the water which has lessened in volume. This diminution continues until only a trickle is left. Yet, before the Athabaska is reached, the river is again a roaring torrent. Only one explanation seems possible, that somewhere the river loses itself in an underground passage. The canyon is one of the many interesting spots for those who visit this magnificent playground in the Canadian Rockies every year.

This is but one of the many scenic spectacles that the tourist meets in this land of never-to-be-forgotten beauty and many are now planning to take advantage of the very low tourist fares to this territory, which go into effect on the Canadian Railways on May 15th.

Illustrated literature and information as to fares, etc., may be had on application to the General Passenger Department of the Canadian National Railways at Moncton, N. B. 7-it.

**THE USEFUL LEMON.**

A few drops of lemon juice squeezed into food chopper before grinding raisins or other sticky fruit will prevent the fruit adhering to chopper.

When making prune or blueberry pie, adding a teaspoonful of lemon juice kills the flatness and gives fine flavor.

After preparing celery for table, rinse it in a little water into which has been put some lemon juice. This discolors and keeps for hours and prevents discoloration.

Put a little lemon juice over apple and bananas cut for salad; it brings out flavor and prevents darkening.

If you need sour milk in a hurry, you can have it by adding a teaspoonful of lemon juice to pint of sweet milk.

Put a little lemon juice occasionally in water used to wash teeth. It is good for both gums and teeth.

Use it with salt to remove iron rust and ink stains.

After grinding onions, wash chopper and rinse with boiling water which has a little lemon juice in it and there will be no clinging onion odor.

The juice of half a lemon in cup of water in morning is a healthful drink.

A piping hot lemonade taken at night is fine for a cold.

Lemon juice with honey will help hoarseness.

Lemon juice with rosewater whitens and softens hands.

**FACTS ABOUT TEA SERIES—No. 3**

**The Consumption of Tea**

Tea as a beverage is used in nearly every country in the world. It is estimated over 200 billion cups are consumed annually.

Australia leads in tea drinking with an annual per capita consumption of about nine pounds, which means that every Australian consumes from six to eight cups of tea every day. The consumption per capita in England is 8 lbs., and in Canada nearly 5 lbs. In the United States, it is less than 1 lb., but this is largely because Americans have not been able to get fine teas until comparatively recently. "SALADA" is considered one of the choicest blends on the market, and is the largest selling tea in either United States or Canada.

**FATTED CALVES FOR BRITISH BUTCHERS**

(1) A particularly fine collection of sheep awaiting a train. (2) Western steers on route for England, awaiting their train at the Canadian Pacific East End Cattle Market. (3) These splendid heifers wouldn't feel so contented if they knew how close they are to an abattoir.

These four-footed emigrants are on their way to Europe. They belong to the Livestock Producers of Canada and have taken lodgings for the night at the Canadian Pacific East End Market, Montreal, before continuing their long journey from Winnipeg to Glasgow.

The extent and the variety of the activities of this market, its value to the community and indeed the fact that it exists at all is not nearly as widely known as it should be, except among those farmers, drovers, butchers, buyers and exporters who make use of its manifold conveniences.

The market has been in operation on its present site for 12 years. It has accommodation for 3,000 head of cattle, 5,100 head of sheep, lambs and calves, 1,500 hogs and can provide sleeping quarters, board and valet service for a total of 14,000 animals at a time. Its export sheds (said to be the finest in Canada) have 30 modern, light, airy pens in which 1,000 transient guests may be housed without crowding or difficulty.

The establishment has facilities for handling, branding, exporting, killing and chilling cattle, sheep, lambs, calves, hogs, milk cows, bulls and horses. There is, in the market grounds, a modern and well equipped abattoir where local purchasers may have their stock killed quickly and efficiently. Incidentally the stock coming from the western farms and ships-

ped to England or sold locally is, almost invariably of superb quality, being equal to the finest stock in the world.

Cattle is sold on the market four days a week, auction sales of horses are held once a week, roping and branding takes place weekly and slaughtering is a daily occurrence.

The market, in all its branches is owned and operated by the Canadian Pacific Railway and is government inspected.

J. H. Pierpont, the manager, says that the present consignment, of which only a few are shown above, is one of the finest that has ever passed through his hands. Some of them are show cattle, bound for Wembley, and the others, less fortunate, will probably be converted into the roast beef of Old England and grace the tables of London, Leeds and Manchester, etc.

The consignment consists of 293 western steers, all fine, fat fellows, of which J. P. Kennedy, president of the Livestock Producers of Canada, is justly proud. Owing to some slight damage being done by fire to the vessels on which they were to travel, their departure has been delayed a few days. In the meantime they are living on the fat of the land, philosophically enjoying the comforts of the present, without concerning themselves too much with the uncertainties of the future.
