STOCKS FIRM BUT SLOW—CABLES FOR C. P. R. STRONG AND ADVANCING—MONEY STILL TIGHT.

—

From to-day's transactions the conclusion may fairly be drawn that, had it not been for the extreme stringency in the money market, the stock market would have shown much better prices, under the lead of Canadian Pacific, which should certainly have sold over par with the news to hand. The increased earnings for April were handsome and much larger than the most sanguine bull looked for. The fact of New York being closed also made things dull.

Pacific sold liberally at 99½ but buyers finding more stock on the market reduced their buying price by fractions, by far the greater part of the business was done at the highest figure yet attained by this security.

Street Railway was firm at the opening, but buying orders being filled it sagged off at the close to 314 bid and 315 asked.

Toronto Rais were sold at steady prices. It is gratifying to note how firmly the stock has been held through the late depression and augurs well for prices when the expected change comes over the money market.

The mines were lower and a slump occurred in Montreal-London which sold down to 55 and though it reacted and looked better at the close the selling of the shares by holders is persistent. It closed better and looked like rallying. Eagle was on the easy side also but considering the late advance did very well. Payne was strong and in good demand at 390 at which price a large

business was done. Republic opened at 135 but closed 2 cents lower.

The scattered selling of bank shares was made at prices which call for no comment. A sale of Ottawa Electric Co., at par was made. Business may be termed fairly steady but dull.

AFTERNOON BOARD.

The feature of this afternoon was the weakness displayed by Montreal-London. Although War Eagle closed a couple of points below this morning's, yet the remaining mining issues, outside of the two mentioned, showed no signs of weakness.

There was little doing outside of the transactions in Mining issues. 575 shares of Canadian Pacific sold for 99½ and 99½, with sellers asking ½. 25 shares of Hx. Railway sold for 110. One share of Bell Telephone for 180, and one share of Dom. Cotton for 107.

Montreal-London opened at 55, sold down to 51½ and closed at 52, 7000 shares were dealt in, buyers were offering 51½ at the close.

There was nothing of special interest to report re Colored Cotton meeting. They showed earnings of \$210,877 for the year.

STRAWS.

Pacific earnings larger than even the bulls expected.

Stock Exchange business not very brisk.

Mr. Percy Taylor was to-day elected a member of the Mining Exchange.

Mr. Thibaudeau made his first appearance on the floor of the Mining Exchange to-day.

Money scarcer than ever.

Answers To Correspondence.

A. F. M., Ottawa—The president has sold largely the past year; would feel inclined to follow his example. Think would wait for a reaction from late decline, as it will be advanced, to sell on, if opportunity offers.

MONTREAL MINING EXCHANGE.

Business was extremely quiet this a.m. in mining securities.

The only feature of strength was in Golden Star, which sold for 65. Some 4500 shares changed hands. Outside of this security there was nothing doing.

Until money circulates more freely, we can see little chance of having better markets. It is hoped that with the new month financial matters will become more satisfactory.

Decca showed signs of strength, but it was only dealt in to the amount of 1000 shares which, however, sold at 30, with sellers asking 35.

Competition between capitalists for the acquisition and working of some of the best mines and claims, continues as keen as ever. Montreal on the whole, seems to be gaining in the rivalry, although Toronto comes in with a good second. The latter place got a good start in the acquisition of the Gooderham and Blackstock Syndicate of the War Eagle and Centre Star of Rossland. But Montreal controls what is still the "banner" producer of the Slocan, the Payne mine. Montreal also has almost exclusive control of the Old Ironsides and Knob Hill, in Boundary Creek, these have proved themselves to be almost the two biggest copper mines in the whole of British Columbia, and Montreal capitalists have now acquired the Virginia, Monte Christo, and other promising claims in Rossland.

The sales on the Local Exchange this a.m. were as follows:

NEW YORK EXCHANGE.

New York, May 30.

There is some fear that has no other source than the habit of fear. Men have found for so many years disaster treading on the heels of apprehension that they lack faith in good things present and to come. Every year there is worry about short crops, and yet the crops grow larger. The spectre of monetary trouble haunts men who know that the country is strong beyond any need. Promoting methods alarm men who are really quite aware that it is only needful to put promoted stocks in a class by themselves. But all the time the volume of business is rising and the week's payments through the chief clearing houses are 62.1 p.c. larger than last year, and 68.0 p.c. larger than in 1892. For the month thus far the daily average is 57.9 p.c. larger than last year, and 66.4 p.c. larger than in 1892. Moreover this week and every other brings larger wages to many and increased purchasing power, and the demand for products is consequently expanding in all branches of consumption.

Steamship companies are naturally first to reflect the country's growing foreign trade. They present this noticeable circumstances at this time that no matter how rapidly they transport more could be filled cargoes offered. This seems to be almost universally the case.

The Atchison statement showing an increase in the net income of \$362,000 for month of April apparently started covering. The reduction in operating expenses of over \$300,000 was about as expected by people who have closely followed the company's affairs, but was a disappointment to the shorts who have of late laid more stress on the Kansas wheat crop than on the ability of the company to reduce operating expenses. The indications now are that the company will show fully 3 per cent. earned on the preferred for the year and the annual report is quite likely to show as much as 2 or 3 per cent. more hurried away in operating expenses during the first half of the year.

The magnitude of the short interest in Atchison preferred is beginning to attract attention. It is estimated by close observers that somewhere between 100,000 and 200,000 shares of stock are being borrowed by shorts. One interest alone is said to be borrowing in the neighborhood of 40,000 shares. At the Atchison Transfer office a very large amount of stock is in course of transfer in the foreign names. Something like 100,000 shares are said to be in order for Europe. This, however, is not official.

There is beginning to be quite a movement in St. Paul stock into the names of

foreign holders. London seems to be willing to again enlarge its interest in the property which has been very small for the last twelve months. The feeling is growing that St. Paul stock is likely to have the same experience as that of Northwest stock and by degrees vanish from the street. The prospect of an extra dividend in September is admitted to be very good provided that the crops are all right. So far the only fault about the spring wheat is the fact that it was late going into the ground, owing to cold weather, and moisture. Spring wheat is not often hurt by frost and the late season is more or less of a guarantee against drouth. There is no reason so far why the company should not have a good spring wheat crop this year. If so the chances are that its earnings in the next fiscal year will break all records as they did this year.

Western receipts have fallen to about half last year's, and exports in four weeks from Atlantic and Pacific ports have been 10,590,168 bushels, flour included, against 13,691,882 last year, while from the northern Lake ports 7,926,037 bushels have gone out this year. But men forget that the foreign demand, if not as large as it was last year with famine impending, is much larger than in the same weeks of 1897 when wheat exports were only 5,704,335 bushels, and also forget that the Leiter speculation caused a wholly unnatural May movement last year, for the western receipts in the past four weeks, 9,280,665 bushels, compare with 19,206,255 last year, but 9,961,570 in the same weeks of 1897, and reserves in that year were not especially reduced, but closed quite large enough. Corn exports, though only 10,267,662 bushels, against 20,285,097 last year, were also but 9,360,091 in 1897..

Corn—The depression resulting from the Buffalo strike and the consequent pressure of cash corn has continued, and with warmer, more favorable weather and prospective larger receipts, there has been enough selling to cause declines. The shovelers' strike at Buffalo is settled, but the accumulation there is only just cleaned up. Vessels are scarce and Lake freights are still high—2c. per bush. so Buffalo. The visible supply decreased 2,182,000 bush. last week, and should show another large decrease this week, bringing the total probably under 15,000,000 bush. The country movement, as was to be expected, is larger, and next week will show quite an increase in receipts, but we feel confident that the increase will not equal the shipping demand, and that the stock here and the visible will continue decreasing. We mentioned previously there was an old theory among local operators that corn sees the low point early in June, at which time, usually, Chicago receipts as well as the visible increase, and while this year receipts will be larger, we think it may be an exception regarding the visible. It is conceded that the invisible supply of corn is much smaller than for the past two years, and we think this fact will show in a smaller movement than generally expected, and that later on it will cause an active market, with much higher prices. The advance in wheat rather depresses than strengthens it, as it attracts attention to the probable increase in corn acreage from winter wheat fields plowed up, but which we think should have no influence whatever upon prices now.
