CURRENT TRADE CONDITIONS.

ONTARIO.

As the year draws to a close and active business is cast aside for the purpose of taking the annual inventory, it is not possible to point to a weak spot in the lumber market. Prices have maintained a surprising degree of strength throughout the fall months, and as the winter goes by there seems little prospect of lower prices. Reports from the Ottawa Valley tell of active buying of the 1903 cuts for the British market. It is predicted that within three weeks the entire production of the Ottawa Valley for that market will have been contracted for. Notwithstanding recent statements to the effect that prices were on a parity with those of last year, some of the largest manufacturers state that they have placed their stock at prices fully ten per cent. higher than ruled one year ago. In the Georgian Bay district buying has not yet become active, as dealers are reluctant to pay the high prices asked by manufacturers. This applies particularly to mill run; when a manufacturer is willing to dispose of the upper grades at reasonable figures he has no difficulty in finding a buyer. Of the past season's production good lumber has been scarce for some time, and recent buying of mill culls has greatly reduced the quantity of that grade in the hands of manufacturers. Red pine deals have strengthened and promise to command a better price next season. The car shortage is still of a serious nature. One manufacturer reports that he has 3,000,000 feet of lumber waiting shipment.

The hardwood situation is favorable to the holder of stock. The comparatively small advance that has taken place in the price of hardwood lumber and the high

cost of labor and supplies has discouraged logging operators this winter, and consequently a very light stock will be taken out in some districts and not a large stock in any district. It is hoped that by restricting the log production it will be possible to advance the price of hardwood lumber to a higher basis.

MANITOWA AND BRITISH COLUMBIA.

The advances that have been made in the prices of British Columbia lumber and shingles for local consumption and for shipment eastward is likely to be followed by higher quotations on export lumber. It is proposed to issue a new classification and schedule which will mean an average advance of about \$3 per thousand. This step has been rendered imperative by the high price of logs and the prospect that still higher prices will prevail. At the present time the ruling price on the coast for logs is from \$7.50 to \$8 per thousand, and it is expected that this will be increased by at least one dollar at the beginning of the new year. The fact that many manufacturers have their storage room filled up as the result of inability to secure cars to make shipments is given as a further reason in favor of curtailing the production of lumber and shingles. In point of demand the trade is in a very satisfactory position, and inquiries for spring delivery have been numerous of late.

UNITED STATES.

In some sections of the United States there have been heavy snow-storms within the past week, causing a temporary check to the demand for lumber. The incidents of the week, however, have been favorable to the market and have produced a feeling of hopefulness in a continuance of the prevailing prosperous conditions. Throughout Minnesota there is a decided scarcity of white pine dimension and a strong move has been taken by wholesalers to further advance the price. This has met with some opposition owing to the fear of hemlock competition. Individual firms are ignoring the association price list and are making an advance of fifty cents. No. 4 boards and strips are also scarce and in a position to be advanced in price. Norway is another lumber that meets with quick sale and for which an enlarged demand is anticipated in the spring. At Ashland, Wis., one of the largest holders of Norway has advanced the price fifty cents per thousand. Hemlock is firm, contracts being placed at \$10 for delivery next season, on a stumpage basis of \$2. Dealer in the Buffalo and Tonawanda markets report a fair local demand and considerable ship-

ments to the east. There has been an excessive demand for 12-inch box lumber, especially for export. This grade is quoted at \$20 in Tonawanda, the highest price ever paid for it in that market. Hardwoods are firm, with a small supply. Lath is seasonably active, although orders are usually for small lots. The shingle market is somewhat stronger, the recent weakness having passed away. Lath is more plentiful. No. 1 pine sells in the Buffalo market at \$3.75 to \$4, and No. 2 at 50 cents less. There is considerable demand for cheap lath, but it is hard to find.

GREAT BRITAIN.

Dullness prevails in timber circles in Great Britain, and there is not likely to be much life to the market until after the holiday season. Prices have been well maintained. Canadian deals are decidedly firm, spruce being about ten shillings per standard higher than it was one month ago. Pine is also held at a slight advance owing to the fact that the quotations of shippers for spring delivery are above the autumn closing figures. Importers, however, are by no means unanimous in their opinions that shippers will be successful in obtaining asking prices. In another column will be found the results of an auction sale held in London, at which second quality spruce brought £10 10s per standard, against £10 5s one week earlier. A cargo of British Columbia pine from Chemainus brought splendid prices. It is a difficult proposition to analyze the British market at the present time. Shippers are holding prices very firmly, while importers are refusing to contract until a lower basis is reached. Which factor will be successful will depend to some extent upon the consumption during the next few weeks and upon the demand experienced from the Continent and South Africa. Germany has placed orders for some stock, but has not taken as much as usual.

STOCKS AND PRICES.

The Upper Woodstock Wood Manufacturing Company, of Woodstock, N. B., recently received an order for about 300,000 broom handles.

J. & W. Duncan, of Montreal, have purchased the cut of L. Villeneuve & Company's mill at St. Jerome, Que. It will be sawn for the New York market.

A timber berth of two square miles, situated on the north-west branch of Swan Creek, in New Brunswick, will be offered or sale by public auction at Fredericton on December 31st.

The East Kootenay Lumber Company, of Cranbrook, B. C., have secured the contract to supply the C. P. R. with 725,000 railway ties. This is one of the largest contracts for ties ever let in Canada.

The W. & A. McArthur Company, of Little Current, Ont., will put in about 30,000,000 feet of logs this winter. It is reported that they have sold fully one-half of the cut of the mill for next season.

The Edward Hinds Lumber Company are endeavoring to make arrangements to have 20,000,000 feet of logs sawn at Duluth, Minn., this winter. There is more winter sawing in the Duluth district this season than usual.

George Gordon & Company, of Cache Bay, Ont., had 3,000,000 feet of logs sawn at Little Current, Ont., the past season, in addition to that manufactured by their own mills. Their red pine was sold for export to England.

At the Crown Lands office, Fredericton, N. B., there were sold on December 17th a timber berth of 2 1/2 square miles, situated between Little and Middle rivers, Gloucester county. The purchaser was J. H. Barry, of Fredericton, at \$277 per mile, and the applicant was Frank J. Morrison. A two-mile berth at Lower Bay Du Vin was sold to M. Salter at the upset price.

Under date of December 6th Messrs. S. P. Musson, Son & Company say of the Barbadoes market: "There have been no arrivals of either white pine or spruce since we last wrote, and both are wanted. First receipts should command full rates. There is little or no inquiry for shingles, and no arrivals have taken place."

An advance of fifty cents on 16-foot hemlock boards was recently made at Buffalo. In New York City 50 cents was added to the price of 10 and 16-foot lengths No. 1 boards, 8, 10 and 12 inches, either rough, single surfaced, or tongued and grooved, which makes a difference now of \$1 between the stock in question and 12 and 14-foot lengths.

The lumber cut on the St. Croix river, in New Brunswick, this winter will amount to about 27,000,000 feet. H. F. Eaton & Sons and James Murchie & sons will cut 6,000,000 feet each; Granville Case will cut 2,000,000 feet, and the Eastern Pulp Wood Company 3,000,000 feet. On the west branch Mercier & Sons are operating for Todd & Sons, and McLellan & Hill for Eaton & Sons.

J. Fred Ritchie is reported to have taken up a timber limit along the Arrow Lakes, in British Columbia, containing 150,000,000 feet of cedar, fir, spruce, and pine, with cedar largely predominating. The timber is easily accessible for logging purposes and can be floated down the Columbia river to Arrow Head, where a shingle mill will likely be built.

Messrs. Wright, Graham & Company, Glasgow, quote the following as ruling prices for pine deals and sidings:—White pine deals, 1st quality, broad, £33 to £35 15s per standard; 11 in., £26 10s to £28 10s; 7 in. to 10 in., £22 to £23 7s 6d; 7 in. and up by 6-9 ft., £18 11s 3d to £19 18s 9d. 2nd quality, broad, £21 6s 3d to £22 13s 9d; 11 in., £19 18s 9d to £20 12s 6d; 7 in. to 10 in., £15 2s 6d to £15 16s 3d; 7 in. and up by 6-9 ft., £12 7s 6d to £13 15s; 3rd quality, broad, £13 15s to £14 8s 9d; 11 in., £11 13 9d to £12 7s 6d; 7 in. to 10 in., £10 to £11; 7 in. and up by 6-9 ft., £8 5s to £9 12s 6d. 4th quality, broad, £10 6s 3d to £11; 11 in., £9 12s 6d to £10 6s 3d; Narrows, £8 5s to £8 18s 9d. Sidings—1 1/2, 1 3/4 and 2 inch, £23 7s 6d to £26 2s 6d per standard. Red pine deals are quoted at: 9 and 11 in. by 3 and 4 in., £9 12s 6d to £11 13s 9d per standard; 7 to 10 in. by 3 in., £8 16s 9d to £9 5s.

PIECE STUFF AND BOARDS.

While there has not been much change in white pine prices in the last few weeks, there are some price features that are of interest. Good lumber, says the American Lumberman, seems to be steady with no particular advance, present or immediate prospect, and with no decline for that matter, but the scarcity of piece stuff, which has been a feature of the market during the year, is more accentuated and is leading to some serious discussion as to the advisability of a slight advance. In the Wisconsin valley there is noted decided strength in No. 4 boards and strips

and an advance of \$1 a thousand is being strongly recommended, but such action would only accentuate the anomalous condition of the piece stuff market and make an advance in the latter the more necessary.

It is said that in the Minneapolis district wholesalers who are short of this class of stock are actually paying a premium of from 25 to 75 cents and yet selling to the retail trade at the list prices, thus incurring a positive loss. Such a situation is intolerable and unless the official list is advanced it seems likely that individual lists will be gotten out recognizing the actual advance in the wholesale market on piece stuff of 14-foot and up in length—for there seems to be a plenty of the short.

The cause for the piece stuff shortage this year seems to be found in the disposition of the mill men to cut their coarse stock into boards rather than 2-inch, and the situation in low grade boards and strips in the Wisconsin valley would indicate a continuance of the practice.

Nevertheless there promises to be a larger output of piece stuff in proportion to the total cut next year than this. Almost certainly the yellow pine people will be influenced by the firm price of that part of their list this year as contrasted with the weakness in upper grades and dressed lumber. Again, the white pine people, especially in Minnesota, are cutting more closely than ever before. That might hardly seem possible, but everything that will make a 2x4 is likely to be brought in and that process will not be confined to pine but will extend to tamarack, spruce or anything else that is found upon the land.

There should be an easier situation in piece stuff in 1904 than there has been this year, and yet we have seen so many expectations fail of realization and the lumber market has so belied experience and attempt at control that it is hardly safe to predict with assurance the outcome of next year's operations.

OWEN SOUND, ON

HENDRIE LIMITS WITHDRAWN.
 Timber limits on the Upper Ottawa river, owned by William Hendrie, of Hamilton, and containing about 272 square miles, were offered for sale by auction at the Russell House, Ottawa, on December 17th. Mr. Peter Ryan wielded the hammer. The bidding started at \$100,000 and advanced to \$130,000, at which price the limits were withdrawn, the reserved bid not having been reached. The limits are located beyond Lake Temiskaming, and

the time which would be required to float the logs to the Ottawa mills is believed to be responsible for the indisposition of lumbermen to acquire them.

Canadian Northern Railway

The building of this line has attracted thousands of settlers to the West, and for the purpose of enabling West-terners to come home for Christmas, the Canadian Northern Railway has put in effect a round trip rate of \$400, good for three months, from Winnipeg and other points to points in Ontario and Quebec West of Montreal via St. Paul and Chicago. The popular route between the East and the West. With the closing of Lake season all shipments for Canadian Northern Railway stations west of Winnipeg must be routed all rail via Chicago. Through rates will be given on application to any agent of Grand Trunk or Michigan Central Railways or to the undersigned. Folder or Pocket Map of the Canadian Northern Railway will be sent upon application to
