### SIR HUGH'S LOVES

"I cannot tell you; you should not tease me so, Fay. I think you might have a little faith in your husband." "Very well, dear, I will not ask," she

replied, gently; but the tears sprang to her eyes in the darkness. She would not think him hard if she could help it; of course she was young—ah, terribly young—and Hugh was so much older and wiser. The "Polite Match-Maker" had told her that husbands and wives were to have no secrets from each other; but she supposed that when the wife was so much younger it made differenceperhaps when she got older, and knew more about things, Hugh would tell her more. She longed to grow older—it would be years before she would be twenty; why? she was

only seventeen last month.

Hugh thought his Wee Wifie was tired, Hugh thought his Wee Wife was tired, and tried to coax her to go to sleep; he brought her another cushion, and attended to the fire, and then went away to leave her to her nap. Fay would rather have had him stay and talk to her, but she was too unselfish to say so; she lay in her pretty are the stabiling the fire light nlav on the unselfish to say so; she lay in her pretty room watching the fire-light play on the walls, and thinking first of her husband and then of Margaret. She longed with a vague wistfulness that she were more like that lovely Miss Ferrers, and then, perhaps, Hugh would care to talk to her. Were the creeping shadows bringing her strange thoughts? Fay could not have told any one why there were tears on her cheeks; was the consciousness beginning to dawn upon her that she was not close enough to her husband's heart?—that she was his pet, but not his friend—that other wives whom she knew were not kent consider.

I am not too young to understand, if Hugh would only think so," she said to herself plaintively. "How could I be, when I love him so?"

When Sir Hugh returned to the room When Sir Hugh returned to the room an hour later, he was sorry to see Fay look so flushed and weary. "We shall have you ill after all this," he said, reproachfully; "why have you not been a good child and gone to sleep as I told you?"

"Because I was troubling too much. Oh, Hugh!" clasping him round the neck, and her little hands felt hot and dry, "are you sure that you are not angry with me, and that you really love me?"

"Of course I am not angry with you."

"Of course I am not angry with you," in a jesting tone. "What an absurd idea, Wee Wife."

answered, thoughtfully, drawing down one of his hands and laying her check on it; and Hugh thought as Margaret had, what a baby face it was. "I mean to grow older, Hugh, and wiser too if I can; but you must be patient with me, dear. I know I cannot be all you want just at present—

I am only Wee Wifie now."
"Well, I do not wish to change her,"
replied Sir Hugh, with a touch of real iderness in his voice, and then very gently he unloosed the clinging arms. Somehow Fay's voice and look haunted him as he went downstairs. 'She is a dear little thing,' he said to himself as he sat in his little. library sorting his papers; "I wish I were a better husband to her;" and then he wondered what Margaret had thought of

CHAPTER XVIII. ERLE'S VISIT TO THE GRANGE. He gazed he saw he knew the face Of beauty and the form of grace,

Fay was not very well the next day, and Hugh insisted on sending for Dr. Martin : Fay was much surprise kind old doctor lectured her quite seriously on her imprudence; and put a veto on any more skating and riding for the present. The sprained ankle was a trifle, but all the same he told her, grimly she must consider herself a prisoner for a few days —a very hard sentence to Fay, whose nimble little feet had never been still for long, and who had certainly never known a day illness in her healthy young life; but, with her usual docility, she promised obedience. Sir Hugh was unusually busy just then. Some vexatious law-suit in which the Redmonds had been involved for a year or two, and in which both Sir Wilfred and his son had taken great interest, was just drawing to a conclusion, and he was obliged to go up to town for a few hours almost daily, and but for Erle's society Fay would have been sadly moped; but with his usual good humor, Erle gave up his out-of-door pursuits to devote himself to her amuse-

He was always contriving odd surprises for her; the mystified servants often heard Fay's merry laugh ringing like a peal of silvery bells, and thought that there could be very little the matter with their young mistress; sometimes these sounds young mistress; sometimes these sounds were supplemented by others that were still

more extraordinary.

One day Erle brought up the stable puppies—three black-faced, snubnosed, roundabout creatures, in whom I'ay had taken a kindly interest since the hour of their birth-and to her intense delight deposited them on her lap, where they tumbled and rolled over each other with their paws in the air, protesting in puppy fashion against this invasion of their liberties.

Another time there was an extraordinary clucking to be heard outside the door, and the next moment Erle entered with a hen under each arm, and very red in the face from suppressed laughter

"Lthought you would be pining after your favorites Speckles and Tufty," he observed, with a chuckle ;" so, as you could not visit the poultry-yard, my Fairy Queen, I have brought dame Partlet and her sister to visit you," and he deposited the much injured fowls on the rug.

It was unfortunate that Sir Hugh should have come in that moment; his disgusted look as he opened the door nearly sent Fay into hysteries: Speckles was clucking wildly under the sofa—Tufty taking excited flights

across the room.
"How can you be so ridiculous," observed , with a frown; "Fay, do you. Martin would approve of all but even he was obliged to check a smile at Erle's agonizing attempts

gan to wonder what he would do next: Erle gravely assured her that if he could have induced Bonnie Bess to walk upstairs, which she would not do under any pretence, preferring to waltz on her hind legs in the half; he would have regaled her with a sight of her favorite; but after the baby from the lodge, a half-frozen some white rats kept by the stable boy, and old Tom the veteran cat with half a tail, had all been decoyed into

with a very long face, and the result was with a very long lace, and the result was that every afternoon there were fresh girlish faces gathering round Fay's couch. Dora Spooner would come with one of her sisters or a Romney girl to help Erle amuse the invalid.

sisters or a Romney girl to help Erle amuse the invalid.

There were delightful little tea-parties every afternoon. Janet, who waited on them, thought her mistress never seemed happier. Fay was treated as though she were a little queen; Dora, and Agnes Romney vied with each other in attentions; perhaps Erle's pleasant face and bright voice were powerful inducements in their way; the girls never seemed to think it a trouble to plough their way through the snowy lanes—they came in with glowing faces to narrate their little experiences.

"Yes, it is very uncomfortable walking; but we could not leave you alone, Lady Redmond. Mr. Huntingdon begged us so

Redmond. Mr. Huntingdon begged us so hard to come," Dora would say, and the hazel eyes looked at Erle rather mis-

chievously.

Erle was up to his old tricks again. Fay used to take him to task when

"You see I take an interest in you, m poor boy," continued Fay, with quite a matronly air. "I cannot allow you to make yourself so captivating to our country girls. What will Dora think if you go down to the Vicarage every morning with that plausible little story that no one believes? I am not dull one bit. I am laughing from morning to night, and Mrs Heron comes up and scolds me. No : Dora will believe that you admire hazel eyes and long lashes Poor girl, she knows nothing about young person with the go in her."

"Oh, do shut up, Fay," interrupted Erle uite crossly at this. "Why do you ways speak of Miss Selby in this absurd fashion? she is worth a dozen Dora Spooners. Why, the girls who were here this afternoon could not hold a candle to

Oh, indeed !" was Fay's response of this, as she lay and looked at Erle wiht

gravating calmness.
"Why do you want to make out that ris are such duffers?" he went on in a rls are such duffers?" he went on in a ill more ruffled tone, as though her shrewdness had hit very near the truth : " they ness had hit very near the truth; "" they have too much sense to think a fellow is in love with them because he has a little fun with them; you married women are so censorious," he finished, walking off in a huff; but the next moment he came back with a droll look on his face.

"Mrs. Spooner wants me to dine there to morrow there is to be a little dance; some of the Govern are coming."

some of the Gowers are coming. Do you think you can spare me, Fay?"

"Oh, go away; you are all alike!" returned Fay, impatiently; "you have only to blame yourself if Mr. Spooner asks your intentions. I do not think Mr. Huntingdon would approve of Dora one bit; the is not your banks. she is not very handsome, she will not hold a candle to you know whom, and she has no money—a vicar with a large family cannot afford dowries to his daughter." But, as Erle had very rudely marched out

of the room, she finished this little bit of worldly wisdom to empty walls. Erle had been over to the Grange. He had mooted the question one evening when he and Sir Hugh were keeping Fay comhe and Sir Hugh were keeping Fay company; and, to Fay's great surprise, her husband had made no objection. "I suppose it would be right for you to call and thank them, Erle," he had said, as though he were prepared for the suggestion; "and perhaps, Fay,"—hesitating slightly,—"it might be as well for you to write a little note and say something civil after all their attention." And Fay thanked him for the permission with a radiant

"You will be sure to keep—the girls until I get back," had been his parting request when he came to fetch the dogs. It was not exactly the sort of afterno

It was not exactly the sort of afternoom that Erle would have selected for a country walk—a thaw had set in, and the lanes were perfect quagmires of half-melted snow and slush, in which the dogs paddled and splashed their way with a perfect indifference to the state of their glossy coats; any amount of slush being better than enforced mount of slush being better than enfe

"I shall have to leave you outside m "I shall have to leave you outside, my fine fellows," observed Erle, as Nero took a header into a heap of dirty-looking snow, in which he rolled delightedly. "I am afraid I shall hardly be presentable myself; but these are the joys of country life, I

ppose."
But he was not at all sorry when he und himself at the Grange, and a pleasant ooking, grey-haired woman had ushered him into a room where Mr. Ferrers and his sister were sitting. It was a far larger room than the one where Fay had had her oot doctored that day, and was evidently Mr. Ferrers' peculiar sanctum—two of the walls were lined from the floor to the ceiling with well-filled bookshelves, an eiling with well-filled bookshelves, an ordinary writing table occupied the centre of the room; instead of the bay-window. glass door afforded egress to the garden, and side windows on either side of the fireplace commanded a view of the yewtree walk; a Scotch deer-hound was stretched on the rug in front of the blazing fire, and two pet canaries were fluttering about a stand of ferns.

Miss Ferrers had evidently been writing from her brother's dictation, for several letters were lying ready for the post. As Erle had crossed the hall he had distinctly heard the sound of her clear, musical voice, as she read aloud; but the book was already laid aside, and she had risen to welcome

Erle fancied she looked paler than or the previous occasion, and he wondered what Mr. Ferrers would have said if he had seen those dark lines under her eyes; perhaps she never told him when she was red-women liked to be martyrs some-

He was received very cordially; and Miss errers seemed rather touched at the contents of her little note.

"It was good of Lady Redmond to write," she said to Erle with a smile; "but she makes far too much of my little

Oh, that is just her way," returned Erle, candidly. "She is such a grateful little soul. Most people take all one's attentions as a matter of course; but Fay

is not like that. "Oh, no, she is very sweet," observed Margaret, thoughtfully; somehow she had yearned to see that pretty, bright face

She is the finest ltttle creature that ever lived," returned Erle with boyish enthusiasm; "it is wonderful how little she thinks about herself. And she is about the prettiest girl one can see anywhere; and prettiest girl one can see anywhere; and she is clever, too, though you would not believe it to hear her; for she always wants to make out that she can do nothing."

Mr. Ferrers smiled at this. "Lady Redmond did seem bent on proving that

fact to us." Of course, did I not tell you so? but don't you believe her, Mr. Ferrers. Why, even Hugh, critical as he is, owns Fay is best horsewoman in these parts. I should like to see her and Bonnie hedgehog, some white rats kept by the stable boy, and old Tom the veteran cat with half a tail, had all been decoyed into the boudoir, Erle found himself at the end of his resources.

Miss Ferrers looked kindly at the young man; she liked to hear him vaunting his cousin's excellencies after this unsophisticated fashion. She had taken rather a fancy to this boyish, outspoken young fellow; and her brother shared this liking. She wasabout to nut a question to him. fellow; and her brother shared this liking. She was about to put a question to him, when he suddenly started up with an exclamation, and the next moment he had crossed the room and was standing before a picture, with a very puzzled expression on his face. It was the portrait of a girl, and evidently painted by a good artist. Of course it was she, Erle told himself after another quick look; in spite of the smiling mouth, he could not mistake her. There was the small, finely-shaped head, set so beautifully on the long neck; the coils of heautifully on the long neck : the coils of beautifully on the long neck; the coils of black hair; the dark, dreamy eyes, which always seemed to hold a shadow in them. "I beg your pardon; but I had no idea you knew Miss Davenport," he said at last, looking at Margaret as he spoke. But

"Davenport? We know no one of the name, do we, Margaret? What does Mr.

Fay used to take him to task when their visitors had gone.

"You are too fond of young ladies," she would say to him severely. "You will make poor Dora think you are in love with her if you pay her so much attention. Those are your London manners, I suppose, when you are with that young person who has the go in her, or with the other one with the pretty smile, of whom you say so little and think so much."

"Come, now; I do call that hard on a fellow," returned Erle, in an injured voice.

"You must be mistaken," observed Mr. "You must be mistaken," observed Mr. Ferrers in a voice so agitated that Erle

regarded him with astonishment. He was strangely pale, and the hand that was grasping the chair back was visibly trembling. "That is the portrait of our trembling. "That is the portrait of our young cousin Crystal Ferrers."
"Yes, our adopted child," added Miss Ferrers, "who left our home nearly eighteen

months ago."

Erle looked more puzzled than ever. " l cannot understand it," he said, in a most perplexed voice. "If she be your cousin Crystal Ferrers, why does she call herself Crystal Davenport? There can be no question of identity; that is the face of the Miss Davenport I know—the young governess who lives with the Traffords; that is the text and the control of the control that is the very ring she wears, too"-with another quick glance at the hand that was holding a sheaf of white lilies. But here

Mr. Ferrers interrupted him.
"Will you describe that ring, Mr. Huutingdon?"
"Willingly—it is of Indian workmanship, I fancy, and has a curiously wrought gold setting, with an emerald very deeply sunk into the centre." Yes, yes; it must be she," murmured

Raby, and then for the moment he seemed able to say no more; only Margaret watched him, with tears in her eyes. Erle's interest and curiosity were strongly excited. There must be some strange mystery at the bottom of this, he thought. He had always been sure that Miss Davenport had some history. She was wonderfully handsome; but with all his predilection for pretty faces he had ne

He looked at Mr. Ferrers as he stood evidently absorded in thought. What a grand-looking man he was, he said to himself, if he would only hold his heal up, and push back the mass of dull brown hair that lay so heavily on his forehead.

"Certainly, if you wish it, Mr. Ferrers." And, with very few interruptions from either the brother or sister, Erle gave a full and graphic description of Crystal's present home and surroundings—all the more willingly that his listeners seemed to hang oreathlessly on his words.

oreathlessly on his words.

He described eloquently that shabby room over Mrs. Watkins', that was yet so pleasant and homelike; the mother with her worn, beautiful face, who moved like a duchess about her poor rooms, and was of the gentle, air-haired Fern in a few forcible words but he spoke of little Florence, and then of Percy, and of the curious way in which al their lives were involved.

"Yes, both she and Miss Trafford have morning engagements. I think Miss Martingale, where Mrs. Trafford is, has recommended both the young ladies. There are not many gentle people living there; the Elysian Fields and Beulah Place are the Elysian Fields and Dedian Flace and not exactly aristocratic neighborhoods. But Miss Trafford goes to the Vicarage; there are young children there; and by good luck the senior curate, Mr. Norton, wanted some help with his two little boys. There is always work about; sometimes they are making their gowns. They are never ashamed of anything they do, they are such thorough gentlewomen. "Yes," replied Raby, with a sigh; "I always said her face would do for Vasht's. She has Italian blood in her veins; her mother was a Florentine. Oh, here comes Margaret," as the door opened and she reappeared. "Maggie, what do you think? Mr. Huntingdon has invited me to Belgrave House."

"My uncle is very hospitable, Miss Ferrers," observed Erle, with a smile at her surprise; "Percy and I can always ask our friends. He is old, and has his own rooms; so we never interfere with him. Mr. Ferrers would find himself very com-fortable with us, and I would take great

"You are very good"—but rather doubtfully, "You will not go to London without me, Raby?"

Philip Stanhope Worsely. It was nearly dinner-time when Erle reached Redmond Hall; Sir Hugh had not returned from London, Ellerton told him; he had telegraphed that he might be detained all night—my lady was in the damask drawing-room, and the young ladies had left an hour ago. Erle listened to all this, and then rushed up to his room, to make himself presentable: and the does slunk off himself presentable; and the dogs slunk off evidently on the same errand.

He had to dine in solitary state by him self, while Fay ate her chicken in the big drawing-room, where the old-fashioned mirrors always reflected the tiny figure Fay was looking very pretty to night, but just a trifle sad at the thought that Hugh might not be home. She had put on his favorite gown too, to do honor to her first appearance in the drawing-room t was a lovely gown, and she looked a perfect fairy queen in it, as Erle told her when he came into the room; but somehow when he came into the room; but somehow Erle's praise was rather flat to night. "I don't believe I was," returned Erle frankly. "Don't be vexed, my Fairy Queen, I can't bother about the girls to-night. I want to tell you about my visit night. I want to tell you about my visit to the Grange—it is no secret, Mr. Ferrers says, and I thought you would be interested, it is such a strange affair altogether."

Some singular statements have been made in the Deutche Monatschrift concerning the effect produced by different trades and industrial occupations upon the general health. Among these facts are those contributed by Professor Hesse, of Leipsic, who points out the deplorable condition of the teeth of bakers, and who also asserts that he is frequently able to indicate the that he is frequently able to indicate the occupation of persons by the condition of their teeth. In the case of bakers the caries is soft and rapidly progressive; the principal parts attacked are the labial and buccal surface of the teeth, commencing at the cervix and rapidly extending to the grinding surface—the approximal surface not seeming to be attacked more than in other trades. Professor Hesse believes that the disease is owing to the inhalation of flour dust the earlier being approximately of flour dust, the caries being caused by the action of an acid which is formed in the presence of fermentable carbohydrates.

Two interesting physical experiment are amusing French scientific men. In the first a lighted candle is placed behind a bottle, and the latter is blown upon with the breath for a distance of about a foot. The meeting of the air currents set in motion around the bottle quickly extinguish the flame, though extinction would be imposible if a flat board or a sheet of card-board were substituted for the bottle. For the second experiment two bottles are placed on a table, with a space of half an inch between them. The candle is set between this space, and from the same distance as this space, and from the same distance as before, on the opposite side, the breath is blown smartly against the flame. Not only will the latter continue burning, but it will incline slightly towards the operator as if through the effect of suction. This phenomenon, analogous to the first, is due to the fact that a portion of the air cannot pass between the bottles and is forced around them and back toward the experimenter.

A SYNDICATE of Detroit capitalists has been formed for the purpose of supplying stored electricity for house-lighting, and a oractical demonstration has shown that the battery it is proposed to use will oper-ate twenty-six sixteen-candle power lamps for twenty-four hours, and show at the end of that time no visible diminution of power of that time no visible diminution of power upon the ampere. It is believed at the end of that time that sufficient energy to light twelve lamps for five hours will remain. The expectation is that one charging of the battery will light the average house for a week. After all the tests have been made, the machinery perfected, and the company is in good working order, a serious obstacle will be met with. Ladies complain that electric light makes them look "ghastly," changes the shade of their dresses, and in general works havoc with their appearance. changes the shade of their dresses, and in general works havoc with their appearance. Such being the case, it is insanity to suppose they will admit the light to their houses, unless the "dead-white glare" is tempered by the aid of rose-colored glass, or something that will at least keep their complexions up to par.

In an article on Carlyle, Dr. James Mc-Coch they worked their complexions up to par.

Cosh, the venerable head of Princeton College, suggests for an inscription on a monu-ment to that great author: "Here lies one gave force to the English tongue Carlyle's role as a philosopher or a prophet Dr. McCosh puts small value. "Whatever he was, better or worse, he was not a philo-sopher. The epithet is a considerable loose one, but can scarcely be applied in any sense to the man of Ecclefechan, of Craigenputtock and of Chelsea." And again: "I do not recollect in all his writings and reported conversations of a single sagacio forecast, such as some great men present to us, of the future as argued from cause now in operation." And, after indicatin his real service to English literature, Dr McCosh says: "I do not believe that t supposed prophet ever saw far into the future, but he did exhibit the past and the His 'Latter Day Pamphlets, now little read, is perhaps his most characteristic work. It is to be read simply as a caricature of his time, as we read the satires of Juvenal and of Pope."

A Pneumatic Tube to Europe.

Col. J. H. Pierce, of Southington, Conn who has been studying the use of pneuma tic tubes, has reached a point at which he hopes to show that a tube across the Atlan tic can be used. The tubes will always be in couples, with the currents of air in one tube always moving in an opposite direction from the other. The heaviest cannot will serve to illustrate the tube. A ca takes the place of the charge, the tube t be indefinitely continuous, and the speed of the car to be governed by the rapidity wit which air can be forced through. #### AN ENTRIC DRUG.

The Remains of Egyptians Buried Thou-sands of Years Ago Turned Into Medicine. Among the standard medicines quoted

Among the standard medicines quoted in the medical books of Nuremburg of two hundred years ago are "portions of the embalmed bodies of man's flesh, brought from the neighborhood of Memphis, where embalmed bodies of man's flesh, brought from the neighborhood of Memphis, where there are many bodies that have been buried for more than one thousand years, called mumia, which have been embalmed with costly salves and balsams, and smell strongly of myrrh, aloes and other fragrant things." The learned doctors of France, Germany and Italy all made great use of this eccentric drug, and in the seventeenth century grievous complaints arose of its adulteration. Mr. Poinet, chief apothecary to the French king, records that the king's physician went to Alexandria to judge for nimself in this matter, and, having made friends with a Jewish dealer in mummies, was admitted to his storehouse, where he saw piles of bodies. He asked what kind of bodies were used and how they were prepared. The Jew informed him that he took such bodies as he could get, whether they died of some disease or of some contagion. He embalmed them with the sweepings of various old drugs, myrrh, aloes, pitch and gums; wound them about with a cere cloth and then dried them in an oven, after which he sent them to Europe, and marvelled to see the Christians ware oven, after which he sent them to Europe, and marvelled to see the Christians were lovers of such filthniess. But even this revelation did not suffice to put mummy hysic out of fashion, and rancis I. of France always carried with him a well-filled medicine chest, of which this was the principal ingredient. A traveller also records how one of his friends found in the tombs at Ghizeh a jar carefully sealed, which he opened and found to contain such excellent honey that he could not resist eating a good deal of it, and was only checked in his feast by drawing out a hair, whereupon he investigated further and found the body of an ancient further and found the body of an ancient Egyptian baby in good condition and adorned with jewels. The superintendent, after looking over his available material for teachers, decided to request one of the young gentlemen of the congregation to take the class. It so happened that the young man upon whom fell the superintendent's choice was exceedingly bashful—so much so, in fact, that he insisted upon the superintendent going and bashful—so much so, in fact, that he insisted upon the superintendent going and presenting him to the class. Accordingly the two gentlemen appeared on the little platform, and the superintendent began: "Young ladies, I wish to introduce to you Mr. C., who will in future be your teacher. I would like to have you tell him what your former teacher did, so that he can go your former teacher did, so that he can go right on in the same way. A London cable says: The Cecil-Wil-aham wedding at St. Andrew's, in Wells street, was in every way worthy so auspicious an event as the marriage of a son of he Prime Minister with the daughter of a Lord Chamberlain. The church crowded with guests and sightseers, and every available point was profusely decorated with white flowers. Lord Salisbury, in unwonted good spirits, talked of every-thing but the proclamation of the League to his many friends. It is a pity that, the praiseworthy punctuality of the bride was not more generally imitated. Lady Florence Wilbraham looked very beautiful in a dress of white poult du soie and Brus-sels lace, but it must be confessed that primrose satin did not suit the complexions of some of the bridesmaids. without proclaiming the League.

On motion of Sir George Trevelyan, the debate was adjourned.

Sir George O. Trevelyan, one of the late Gladstonite recruits, resumed the debate to-night on Mr. Gladstone's motion for an address to the Queen, praying for a nullification of the Government's proclamation of the Irish National League. He said the late Government did not ask the House of Commons to pass the Irish Crimes Bill on hearsay, but that they based their demands on Parliamentary returns of grave outrages There had been committed 7.788 outrage during the previous year and 26 agrarian and political murders during the first half of the year. He contended that the House should have tabulated statistics of crime in Ireland, and that to mention one crime here and another crime there was not suffi-cient to justify such action as the Govern-ment were now taking against the whole Irish people. He denied that the general operations of the Irish National League increased crime in Ireland or led to the general non-payment of rent. Let the louse understand, he continued, that if the proclamation of the League sanctioned every Irishman belonging to it who will not leave it at the command of the Government will be liable to be punished as a common criminal, and that liability will not depend on any judicial proceedings worthy of the name. In conclusion he complained that the statements made by Mr. Balfour and only given out last night left no time for examination of their character. Mr. Balfour had presented a series of alleged facts in justification of the Government's action. These allega-tions the House should have a chance to

Sir Richard E. Webster, Attorney-Gen eral, held the reason why there were not more convictions of crime in Ireland was simply because of the terror of the League simply because of the terror of the League.
He reminded the House that Earl Spencer's
Government had repeatedly proclaimed
the Land League meetings, and that Sir
George O. Trevelyan had supported these
proclamations on the ground that the
objects of the Land League were to put
down landlordism and to effect a separation
between Ireland and England. The objects
of the avising League said the speaker of the existing League, said the speaker, were the same. Its aim had not been changed. Abundant evidence had already been adduced as to the evil workings of the League. The Government would now try the experiment whether the suppression of League meetings would not lessen intimidation. (Irish cheers.) They were told this would be the death struggle. Well, either the League or the Government would go down. (Irish cheers.) He did not fear for the result. The Government would be supported by the consciousness that they had done their during the consciousness.

Mr. Harrington (Nationalist) said that, as one largely responsible for the League, he desired to reply to the calumnies that had been hurled at its character. He read etters from branches of the League con ning the practices wh ment declared the League promoted. The League repudiated every form of outrage. The League would go on doing what it had

done in spite of proclamations, which had no terrors for the Irish people. (Cheers.) Mr. Wm. Redmond accused the Orange society of worse intimidation than was ever charged to the League, which was a genuine national association. Under certain cirnational association. Cluder certain circumstances, he said, boycotting was justifiable and necessary. (Cheers from the Ministerial benches.)

Lord Hartington said he did not think

he speech of Mr. Redmond would influence he House in favor of the constitutional and legitimate character of the League. He doubted whether if Sir George O. Tre velyan's views upon the Crimes Act had been known in Bridgeton he would have got the support of the Irish electors. (Laughter.) Sir George Trevelyan did not well on the object or the tyranny of the dwell on the object or the tyranny of the League, or the ruin and loss it caused, nor did he enter upon the question whether Lord Salisbury and Earl Spencer were justified in the policies they adopted. The question for the present decision was whether the previous policy, which had been so successful, should be followed by the present Government, if the tyranny of the League hearm more rannant and the Learge became more rampant and more organized. Now, as far as the act of an association was wholly political it could not be condemned, but if the action of an association destroyed the liberty of the people and subverted order and good gov people and suverted order and good government, it did not matter what the supposed motives of the association were. It was enough that its action was hostile to social order. (Cheers.) The House had already—decided that intimidation prevailed. Preventing persons from pursuing their lawful occupations. He contradicted the reports that he had disagreed with the Government upon the step proposed. He believed that the League's aim was spoliation and injustice, and that its methods were in defiance of the law. (Cheers.) Continuing, Lord Hartington said that he had some doubt as to the course adopted. He should have preferred if it had been possible that the Government should resort in the first instance to the provisions of the Crimes Act; but with their aim and object he entirely and earnestly sympathized. They were justified by the facts before them in the course they had taken. He would oppose Mr. Gladstone's resolution, because it asked the House to interfere needlessly and prematurely with the Government's exertion prevailed, preventing persons from pursuing their lawful occupations. H

Sir William Verlien Harcourt said he thought the preceding speech was an extraordinary one from such a responsible statesman, knowing that the step he was taking was fatful both for Ireland and for England. Instead of advising the country under these grave circumstances, Lord Hartington only endgavored to show that he had not been educated to show that he had not been consulted, and therefore was not responsible for what had been done. (Lunghter) The Government allowed a verdict of not guilty to be entered on several clauses of the indictment against

Saved His Car Fare. As the Arounder came down Main street esterday morning, says the Buffalo ourier, a car overtook him and bowled on. At the same time he noticed a boy over the way, apparently racing with a horse car. When the car stopped to take on a passen-ger the boy would slow up and walk to recover his breath. But as soon as the car came up with him he would start on again, "Indian trot," as the boys term it. The Arounder boarded the car to watch the out ome of the race. The boy kept it up, and when he reached Eagle street was a length when he reached Eagle street was a length or two ahead. Here he stopped, and the Arounder, alighting, accosted him. "What were you rabing with the car for?" "'Cause, so's to get 5 cents. Mother wanted me to come down to the sewing machine place for a needle and a bottle of oil. She gave me money to ride both ways. LONDON HOSPITAL SCENES.

Operations Performed by the Greate Surgeon in the World. (London Letter in the Baltimore Sun.) I spent all of this afternoon in one of the great public hospitals of this city, that of King's College. In the role of a student of surgery, and in the company of men of that profession from Europe and America, some of them of middle age, who have come here to get the benefit of London hospital practice. I was an observer of the stress living and the stress is the surgery of t to get the benefit of London hospital prac-tice, I was an observer of two surgical operations performed by Sir Joseph Lister, said to be one of the greatest, if not the greatest, surgeon in the world. The Lon-don hospitals have a wider field than those in any part of the globe to draw practice and experience from. London is a city both richer and poorer than any other in the world. Gaunt noverty stalks in the the world. Gaunt poverty stalks in the highways and byways, where hundreds of chousands of wretched creatures who are said to bear the imprint of God dwell. I said to bear the imprint or God dwell. I venture to say that more abject penury and more degradation exists to day in London alone than in all Ireland. The public hos-pitals, extensive and numerous as they are, have seldom an empty cot. The poor and he lowly, who are to a very large exten the recipients of their benefits, seem in some unaccountable way to be afflicted with an infinite variety of diseases, and to be subject to horrible tumors and abscesses, more terrible and complicated fractures of the bones, and more abnormal condition of the organic functions than those who ar better off so far as this world is concerned At least, this is the case in London, and it is for this reason that those who are ambi ious to excel in surgery come here for a mowledge very difficult or impossible to obtain elsewhere. It is for this reason that

such eminent men as Sir Joseph Lister perform operations in the charity hospitals without charge. I make no doubt that had the two patients upon whom Sir Joseph operated this afternoon been rich or distinguished he would have pocketed at least ive or six hundred guineas for his two five or six hundred guineas for his two hours' work. One of the operations, although somewhat novel, was not very dangerous or difficult. The patient, a boy of 18, had fractured the bone at the elbow which we lay people know very well as the crazy bone, but the technical name of which I really forget. The bone had begun to decay in consequence. It was laid bare. barrels, nice and sound-I can easily do it by lantern-light to night and to me decay in consequence. It was laid bare, the decayed portions chiseled off, wires run through to make it reunite, and the flesh then sewed up again. The other operation, the removal of calcareous deposits from the kidney, was of a much more important nature. A deep incision was made in the abdomen extending around the side, and after probing, the hand of the operator was inserted so deep that it was not visible. It lecay in consequence. It was laid bare

Kitty and I had just come in from milking the cows, and were eating our suppers in the great farm kitchen. We were tired from our day's work, for ever since father had the last stroke of paralysis we had been compelled to do much of the farm-

"Do you know," said Kitty, laying down her bowl of milk suddenly, "that the interest on the mortgage is due to morrow?
That is \$35, and we have only \$15 toward. t. Can't you get Willis Avery to wait?

Now it happened that Willis Avery, who held the mortgage on our homestead, was the son of a neighbor and an old playfellow and boy-beau of my own, who had gone to the prosperous young city a few miles north of us and commenced business on his own account, and I had a particular aversion to asking aid or help of him in aversion to asking aid or help of him is any way. I might be poor, but I wa always proud, and Kitty was quite sympa hetic enough to understand me.

Your branches droop, as if to mourn For other days now past and gone,

Ne'er to return— Days when the woodman felled thy friends And gathering up the scattered ends He did them burn. Though Time, the gentle deer, perchance

Has nipped the green from off thy branch,
Or paused to rest;
The dusky mother, rude and wild,
Beneath thee hushed to sleep her child, Close to her breast.

I've watched thee, swaying to and fro, Robbed of thy cloak, in winter's snow, And heard thee sigh.
I've watched thee bud and bloom spring, And from thee heard the oreole sing

Nor wrongfully usurp the land
With thy great space—
A shelter in a village street From wintry winds or summer's heat, You grace the place.

Mr. Rogers, and was a guest at the parsonage during his stay in Farmersville. Notwith-standing his advanced age, 75 years. Mr. Greener retains his mental faculties to a remarkable degree. For the last sixteen years he has been the financier for the Lindsay District, a post requiring first-class business tact and ability, and which he fills to the entire satisfaction of all concerned.

Classes organized for Matriculation (pass and honors), and for 1st Class, 2nd Class, entire satisfaction of all concerned.

The regular monthly meeting of the Farmersville auxiliary of the Women's ronto University, Honors in Classics and Foreign Missionary Society in connection with the Presbyterian Church, was held on Thursday afternoon (1st of Sept.) at the residence of the pastor. Since its formation some time agor through the instrumentality of Mrs. Blair, of Prescott, the auxiliary

has increased in interest and usefulness and at the meeting on Thursday last, three new members were received. Duck shooting began on the 1st inst. The occasion was taken advantage of its external and internal arrangements are by the society to entertain their presidence way calculated to promote the dent (Mrs. Pullar) and family to tea, in what may be called the manse pro buying hogs by the carload, and tem., and with this object in view the shipping them from Brockville. visitors brought with them the materials for a recherche repast, which having found their way to the dining room table, presented a very rich and attractive appearance. The business of The Methodist Harvest Home last the auxiliary being concluded, the night was a great success.
