

WITH THE FARMERS

CHICAGO GRAIN MARKETS.

Chicago, May 27.—The situation in wheat showed signs of a general settling down to normal conditions at the close of today's session. Nervousness was again in evidence early and price declines were sharp, but there was a further halt in the break on buying by northwestern houses.

MILLIONS OF ACRES PLOUGHED BY ENGINES

St. Paul, Minn., May 25.—Within ten years approximately 8,000,000 acres of farm land in the United States and Western Canada have been taken away from the horse and turned over to the steam and fuel engine to be ploughed.

COMMISSION TO BE PERMANENT

Ottawa, May 25.—The appointment of a permanent commission to deal with disputes between Canada and the United States on all matters affecting international waterways is likely to be made before long, under the provisions of the new waterways treaty.

NEW QUEBEC LICENSE LAW

Quebec, May 25.—Important amendments to the Quebec License Act were announced this afternoon by Hon. Mr. MacKenzie, provincial minister.

BRADSTREET'S REVIEW

New York, May 27.—Wheat, including flour, exports from the United States and Canada for the week ending May 25, as reported by Bradstreet's, aggregated 3,244,400 bushels, against 2,918,565 bushels last week and 3,182,800 bushels this week last year.

CHICAGO LIVE STOCK

Chicago, Ill., May 27.—Hog supply was curtailed as a logical result of the Wednesday slump, and the market gained 5 to 10 cents over Thursday's prices.

AMBASSADOR TO U. S.

Washington, D. C., May 22.—Telegraphic information from London received here this afternoon states that Ambassador James Bryce, of Great Britain, has written to the foreign office asking that he be relieved from further duty as ambassador at Washington as soon as possible.

MOST DAMAGING EVIDENCE YET

Clark D. Not Know. The witness said however, he should point out that Clark knew nothing about this and if he did there would likely be a general cleaning out of the office.

ACREAGE 27 PER CENT. GREATER THAN IN 1909

Crop Bulletin Issued by Department of Agriculture Deals With Crop Conditions and Crop Acreage. Crop Bulletin No. 7 has been issued by the Provincial Department of Agriculture, giving estimates of the area sown to grains of various kinds and the crop conditions on May 1st.

PACKERS IN THE TOOLS

Chicago, May 25.—Initiating the labels used on cans containing imported olive oil Swift & Co. today found in the United States District Court, find the company \$200 for misbranding one of its products.

STRANGE COMET PHENOMENON

Halifax, N. S., May 25.—Captains of vessels arriving in north Sydney from the southern sections of Newfoundland report an atmospheric phenomenon on Wednesday, when the comet was supposed to pass between the earth and the sun.

DISCREPANCIES IN ESTATE

Mr. Johnston then took up this estimate on the file and had it compared with another which Mr. G. signed. A comparison showed that in a number of the estimates had been in error, they were submitted to the department. This was done with what Dr. Wadell in his evidence, his explanation that he had used his figures for the purpose of the report, and he was satisfied.

WITNESS SAID HE RECALLED

MASONS ENTERTAINED

Given Freedom of City by Mayor Jamieson. Calgary, May 25.—The balance of the delegates to the Grand Lodge of Alberta, A.F. & A.M., arrived in the city yesterday, and there are now in the neighborhood of three hundred visiting Masons and their wives in the city.

OFFICIALS ARE VERY DUBIOUS

About Admitting Indians to the United States. Philadelphia, Pa., May 25.—It took the immigration officers at the Philadelphia port several hours Saturday to decide whether John Gensh, a Penobscot Indian of pure blood, should be admitted to the United States.

POPES SEES AEROPLANE

Rome, May 25.—The pope saw an aeroplane flight for the first time today. The machine was invented by a priest of Sponto, who successfully boarded above the Vatican gardens. He received hearty congratulations from Pope Pius on alighting.

EARL GREY GOES TO HUDSON BAY

Governor-General Proposes to Undertake Arduous Trip Through Northern Wilds

Ottawa, Ont., May 25.—The northern wilds of Canada will probably have a distinguished visitor this summer. Earl Grey, who last year visited the Yukon, is contemplating a journey overland to Hudson Bay. His present plans are carried out, the governor-general will leave Ottawa in July for Winnipeg and will there be taken by a party of the Royal North West Mounted police over the route of the Hudson Bay Railway to Hudson Bay. This will involve very stiff piece of wilderness travelling, much of it by canoe.

At Port Nelson or Fort Churchill on the Hudson Bay, which ever is chosen as the land terminus of the journey, the governor-general will meet on the government steamer Earl Grey and in this vessel will journey through Hudson Bay and Straits, where commercial craft in a few years will be making regular voyages with cargoes of wheat and cattle from the Canadian west. The steamer will then come south and land His Excellency at Quebec. This will be the most ambitious piece of pioneer travelling ever attempted by a governor-general of Canada.

Brodeur May be Honored. The rumor is revived that if there are any King's birthday honors next month, Hon. L. P. Brodeur, Minister of Marine, may be in the list of knights in connection with his work on the Canadian naval program and the Franco-Canadian treaty.

The government will consider before long the report of militia council in the sending of a contingent to the coronation of King George. Though it is a long way off there are already enquiries about the matter and from what can be learned in government circles, it may be stated that a complete regiment of probably six hundred men and made up of cavalry, infantry artillery and Northwest Mounted police will go. If the coronation is fixed for next summer the preliminary will in all likelihood go and at the same time attend the imperial conference, which will reassemble then. The matter of a coronation contingent and the form of its composition will be taken up by the militia council.

Board of Conciliation. A board of conciliation, under the industrial disputes act, has been appointed to deal with the dispute which has arisen between the meter and steam fitters of the Canadian Northern system at Winnipeg and the company. The board consists of W. E. Macfarlane, chairman, D. H. Cooper, representing the company and S. Lee for the meter fitters. In the course of the correspondence in relation to the names of a board these were selected.

Must Give the Same Rates. The Board of Railway Commissioners has ordered that the Grand Trunk and C.P.R. give the same rates via the lakes on Western grain from Montreal to points in Ontario and Quebec on the same mileage basis as that in force on the same commodities from Georgian Bay elevator points. Montreal shippers have been complaining about westbound rates for a couple of years, but the rail was declined to equalize the charges between Montreal and lake ports. Finally the matter was brought to the attention of the board of railway commissioners, which has decided that there must be no discrimination in favor of lake ports and against Montreal shippers.

CANADIAN CADETS DO WELL. Their Shooting in England is Favorably Commented on. London, May 25.—The shooting at the imperial cadet meeting here today was of the most brilliant character. The Canadian cadets did very well, Liddy especially distinguished himself, winning the Rockcliffe gold medal, presented by Lord Strathcona for snap shooting from behind cover, one of the most difficult competitions, and was second in the grand aggregate, the winner, Crawford Bates, scoring but eight points more.

Although they failed to hit any of the pots, the Canadians were amongst the small prize winners in many events. Lord Roberts attended the range and expressed pleasure at seeing the Canadian lads, praising their shooting and emphasizing especially the value of snap shooting at short distances, such as he had seen there saying it would have a decisive influence in the next war. The Canadian cadets have an excellent round of entertainment before them, including visits to Portsmouth and Eton.

MAN SHOT AT WETASKIWIN. Shot in Quarril With His Father-in-Law Whom He Tried to Horsewhip. Wetaskiwin, May 25.—Louis Goldman, formerly a butcher here, was yesterday shot by Sereus Amund, dying shortly after. Goldman married Amund's daughter about six months ago and some one clipped an account of the wedding from a newspaper and sent it to Goldman's wife in the old country. Mr. Amund heard of the existence of the free wife, and he and Goldman had some difficulty also in a cattle deal. The two quarrelled, and Goldman undertook to give the old man a horse-whipping but was drawn away by a man named Bush. Goldman went back at Amund again and was shot twice in the head with the fatal result. Amund is under arrest.

German Prince Ill. Berlin, May 25.—The Crown Prince's second son, Prince Louis Ferdinand, is ill. The little invulnerable attack of bronchial catarrh with the hereditary contamination of the ear. He is feverish, but the official report is that his condition is not dangerous.

EDISON'S DAY OBSERVED IN ST. LOUIS THIS WEEK

Electricians of Canada and United States are Holding Big Convention There—Edison's Genius Responsible for Two-thirds of Electrical Progress.

St. Louis, May 25.—Several thousand delegates, representing electric light companies in all parts of the United States, Canada and Mexico, are attending the twenty-fifth annual convention of the National Electric Light Association, which opened its sessions formally yesterday. The convention will continue through the week and one of the principal features will be the celebration of Edison Day, in honor of Thomas A. Edison, whose genius alone is responsible for more than two-thirds of the wonderful progress of electric lighting during the last thirty years. In connection with the convention there is a great and costly exposition at the Coliseum Hall, which shows in chronological form the progress made in electric lighting and in the utilization of electric power since the first electric light plant was established in Appleton, Wis., in 1882.

During the seventies Edison began his experiments with the problem of lighting by incandescent lamps and his work was first discussed in the newspapers in 1878. The enthusiastic reports of the newspapers, which predicted a great future for Edison's system, caused an extraordinary decline in the price of gas shares. Edison made the first demonstration of his paper carbon lamp a year later at Menlo Park, but not until the summer of 1880 did these experimental lamps come into practical use outside of his laboratory.

Now according to the statement of Frank W. Froust, of New York, president of the National Electric Light Association, there are about 3,000 central electric lighting stations in the United States alone. More than one-half of these companies are also engaged in the electrical supply business. The central station companies of the country have an investment of \$1,250,000,000. They have a gross income of more than \$250,000,000 a year and develop nearly 2,500,000 horse-power.

In 1879 the first miniature electric railway, carrying passengers, was put in operation by Siemens and Halske at the Berlin Exposition. It was merely an exhibition plant and not until two years later was a commercial road put in operation in Europe, a mile and a half affair, just outside of Berlin.

At present there is a track mileage of electric city and interurban railways of 40,247 miles in the United States, using 82,216 cars, and representing capital liabilities of \$4,557,000,000.

Equally marvelous was the development of the telephone industry. It was at the Centennial Exposition of 1876 when Alexander Graham Bell exhibited his first telephone. Today there are more than 5,500,000 telephones in use in the United States and the amount invested in exchanges and lines amounts to more than \$300,000,000. The investment is steadily growing at a rapid rate.

The first storage battery, a French invention, was built in 1881, and was exhibited at the Paris Exposition. It was many years after that time when the invention was put to practical use. In 1888 Tesla contributed materially to the development of the electric power industry by his valuable inventions and discoveries in relation to alternating currents. Not until then was it made possible to make practical use of the transmission of electric power.

The first electrical power transmission plant was established in 1890 in a small town in the Colorado mountains, where the electric light furnished power for a mine.

The discovery of the X-rays by Roentgen in 1895, was at first only of scientific interest, but has developed in a great measure and has made the X-ray a valuable assistant in modern surgery. The invention of wireless telegraphy was the last step in the development of electrical science and in the few years since its discovery the most wonderful progress has been made and the most remarkable results have been achieved.

Many inventors of note have contributed to the development of electrical science and to its practical application, first of all Thomas A. Edison, whose achievement cannot be overestimated. Tesla, Elihu Thompson, Brush, Houton, Alexander Graham Bell, Lord Kelvin, Siemens, Halske, Frank Sprague, Marconi, De Forest and others also deserve honorable mention.

C.N.R. MANAGER RETIRED. Could Not Tell Calgary Mayor Where His Line Would Enter Calgary. Calgary, May 25.—H. M. McLeod, general manager for the Canadian Northern Railway, who arrived in the city Friday, spent Saturday in the city engineer's office, getting levels of the different streets and avenues in the city. Mr. Stovel, right of way agent for the company, is also in the city. Mr. McLeod is not getting the levels of any thoroughfares in particular, but is devoting his attention to the entire city.

He was in conversation with Mayor Jamieson this morning, but in answer to his worship's question as to when the railroad was likely to come when he reached Calgary, said that he knew absolutely nothing, except that it would enter somewhere in the east end.

Why Is Optimistic. Montreal, Que., May 25.—Mr. William Whyte who arrived here from Winnipeg this morning, is in conference with Sir Thos. Shaughnessy regarding equipment and other matters relating to the movement of the year's crop. He said the outlook in the West continues splendid. Every spring points to another bountiful year.

RELIABLE MEN'S WEAR IS BEING SOLD DIRTY CHEAP

Wm. Sugarman's Annual 30 Day Sale

Some of the Genuine Suit Bargains. These Suits are in Our Regular Stock—Every One. WORSTEDS SERGES TWEEDS. When you find a suit marked \$25.00 here, you may gamble your last cent it's worth at least 25% of the best! and very likely 30. These are no exception. We Stand on our good Reputation for a Square Deal. You may bank on this every time. We sell the goods as advertised. We know that this is best business to keep faith with the public.

Wm. Sugarman JASPER AVE. E. One Door West of Canadian Bank of Commerce

WILLIAM SEYLER ON TRIAL FOR HIS LIFE

He Has Made Contradictory Statements Regarding Death of Jane Adams—Girl Met With Fatal Falsehoods. Mays Landing, N. J., May 26.—Rapid progress was made yesterday in the trial of William Seyler, the young married man, accused of murdering Jane Adams, on the million dollar pier in Atlantic City last February. A jury was chosen within an hour and twenty minutes after the prisoner was arraigned at the opening of court. Prosecutor Goldenberg, in his opening address, said that "Jane Adams met her death defending her honor." The first witnesses called were the noterman and policeman who found the girl's bruised body, with the torn clothing frozen to it, lying on the beach where it had been cast by the waves several days after the girl had disappeared.

AMERICAN PASTOR'S TRIBUTE.

St. Thomas, May 26.—Two special trains bearing delegates from the Brotherhood of Locomotive Engineers' convention at Detroit to Niagara Falls, and running half an hour apart, on Saturday morning made runs which for the size of the trains and the stretch of road covered are said to be world's records. No stops were made on the 224-mile trip, but there were three slow-downs, one to pass through St. Thomas and the others for drawbridges. The first train covered the distance in 224 minutes, a mile a minute, while the second one did it in 217 minutes. Each train had twelve coaches. The engineers in charge were John Savigny and George Blanchard, of St. Thomas, and were selected for the run because they were the oldest men in point of service with the road, having been running since the construction of the line in 1877.

MADE WORLD'S RECORD.

Ottawa, Ont., May 25.—Thursday will be the first birthday of the Queen Consort since King George's accession to the throne, and will be marked by flying flags on all government buildings throughout Canada.

MASONIC OFFICERS.

Calgary, May 25.—At the session this p.m. of the Alberta Grand Lodge A. F. and A. M., the following officers were elected: G.M., A. J. Dunlop, Edmonton; D.G.M., Thomas McNabb, Lethbridge; S.W., R. Parker, Macleod; J.W., S. J. Blair, Calgary; treasurer, Dr. N. J. Lindsay, Calgary; secretary, George MacDonaid, Calgary; registrar, W. M. Conacher, Calgary; chaplain, E. V. Canon Stocken, Gleichen; grand Tyler, R. H. Finch; district deputies, J. J. W. Rankin; S. T. M. Barnard; S. R. H. Christie; A. R. W. Wilson; S. E. D. H. Wilkins; G. George Simpson. At 8:30 tonight the ladies of Chiswick chapter entertained the officers and delegates to the Grand Lodge and their ladies in the club rooms of Perfecton Lodge, when the floral work of the chapter was given. Refreshments were served afterwards.

Lloydminster Choir Won.

Lloydminster, May 27.—The Lloydminster Anglican choir won the first prize and silver shield at the Saskatchewan Provincial Musical Association contest, held at Saskatoon on the 26th inst.
