## Knock Down Motor Engines!

4 H.P., \$110.00; 8 H.P., 2 Cylinder, \$175.00.

A new idea in Motors. We have secured the agency for the celebrated "Knock Down" Motor Engines. Each part of these engines is made so perfect that it is not necessary to assemble and test the engine before shipment. You save the cost of all that work by doing the work yourself.

All parts of the engine are carefully packed and shipped just as they come from the automatic machines at the factory—not even painted—full directions for assembling, including a picture with number and name of each part, are sent you. The Company guarantees that every part will fit perfectly, and that any man who can read English and use a wrench can set them up.

Those engines are guaranteed exactly the same as common engines that have been fitted and tested at the factory and sold at double the price. Why not save a month's wages by setting up your own engine? These engines are 2 cycle. Terms: half cash with order, balance on arrival.

On rush orders, can wire order and have engine sent by express.

## WATERPROOF ENGINES, Four Cycle.

Here is what you have been looking for, a special Four Cycle Engine, specially fitted with a waterproof ignition system, at a price to meet all competitions.

- 1 CYLINDER 2 HORSE POWER . . . . . \$ 70.00
- 2 CYLINDER 4 HORSE POWER . . . . . 130.00
- 2 CYLINDER 8 HORSE POWER . . . . . 190.00
- 3 CYLINDER 6 HORSE POWER . . . . . 175.00
- 3 CYLINDER 12 HORSE POWER . . . . . 240.00
- 4 CYLINDER 16 HORSE POWER . . . . . 295.00

These Engines come set up ready for use. Everyone knows that a Four Cycle Engine will produce the same power on much less fuel than any two Cycle Engine made; it will also be much cleaner. The only objection to Four Cycle Engines has been the difficulty of keeping the ignition dry in wet weather; this objection is overcome in our "WATERPROOF" Engines. A big advantage in having two or more Cylinders is to reduce vibration and give steady power; a smooth running Engine will last much longer than any other.

Write or wire if interested. Two shipments of Engines now on road, expected here by June 25th. Wire your order.

## ST. Louis Cash Registers!

We have secured the Agency for the St. Louis Cash Register line. These are not second-hand or rebuilt machines, but are new Registers, built in a new factory, and are sold at about half the price of the common registers. Now is your chance to get a New Register right from the Factory at a reasonable price.

Fishermen, now is the time to secure O. Muntz's Jiggers or Pilk Hooks. They are bright, small and act as a minnow, attach small swivels to make it spin. Just try this famous Norwegian fish killer, any ordinary lead sinker will suit, but place one swivel above the sinker and the other below to keep your line from twisting. apr26,tf

## My Second Year of War.

By FREDERICK PALMER. In this book he makes clear, even to the least technical, the grim process of fighting which characterized the Battle of the Somme, and presents graphic pictures of conditions during a vast modern offensive. Price \$1.50. Postage 4c.

### A Terrible Disclosure;

### What Fools Men Are!

CHAPTER XIII.

"About me!" exclaimed Lela, turning pale as the vision of that awful meeting in the garden rose before her.

"Yes! I can't understand it. Shall I read it? I wish to mention a subject that I had hoped would never be referred to by either of us. I refer to my late librarian and his granddaughter, Miss Lela Temple."

Lela drew a long breath, and came gliding round to him.

"Why should he speak of me? Ah, Edgar! he has found out that we are married," and she trembled.

"No, no! Don't be frightened, my darling. Listen. Though I have made enquiries, I have failed to discover the whereabouts of these two persons. You, who, no doubt, have made enquiries on your own behalf, though I am convinced that you would not be so unwise as to ruin yourself by disobeying me, may have found them. If so, I shall be glad if you will let me know in what position they may be. I do not wish that any servant of mine should be in a condition of poverty, and shall be glad to be assured that such is not the case. That is all!" said Edgar, staring at the mate.

"What does it mean?" faltered Lela. "I don't know. I can't conjecture. If he were any one else, I should say that he was anxious that you should not be suffering from his cruel injustice and oppression, but—well, I never knew him pitiful or merciful before."

There was a silence for a moment, then she said, in a low voice: "What will you say?"

"What shall I say? Why—why, I shall say that I know where you are, and that you are certainly not in want."

And he smiled.

"I wish—I wish he could know, Edgar," she whispered.

He frowned and bit his lip. It was a perpetual remorse to him, this life of deception—the one thorn in the bed of roses.

"So he shall," he said, firmly. "Nothing but dire necessity has kept me silent. He shall know, and very soon. If"—he stopped suddenly, for he was going to say—"If Assasin wins the race, I shall be able to send this check back, and have money enough to enable me to tell my father that I have lost the right to take money from his hands." But he stopped in time. He had just said that he would have no secrets from her, but he did mean to ride this race without telling her. He knew that the dread with which she would regard the idea of his riding a steppe-chase would be almost more than she could bear to see her suffering from.

"If a little event that I am hoping for comes off satisfactorily, Lela, I will tell him, and end this deception. There, don't say any more about it." And he soothed her with a kiss, and took up his Times.

### WOMAN WORKS 15 HOURS A DAY

### Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging down pains so badly that times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist told me of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to factory and work all day, come home and get supper and feel good. I don't know how many of my friends I have told what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. ANNA METERIANO, 36 West 10th St., Peru, Ind.

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

Luckily for him, Lela never thought of glancing at a newspaper, or she would not have failed to have caught sight of his name in the sporting columns, which was full of a coming race, and had a great deal to say about the wonderful horse Assasin—its bad temper, and the pluck and racing capabilities of its noble owner.

It was full of it this morning, and Lord Edgar saw that the horse was a greater favorite than it had been—why, he knew not. With a little impatient sigh, he folded the paper and thrust it out of sight, and got his cigarette case.

"And what's it to be to-day, butterfly?" he asked. "London's delights are not nearly exhausted yet."

She smiled up at him, half ashamed of her delight in the sights and amusements. They had been up in town now nearly a week, and Lord Edgar had made those days a round of pleasure for her. After breakfast he would take her for a drive in the park in his tall dogcart, with the much-beloved chestnut. Then they would lunch at home, or sometimes at Blanchard's or Verey's. In the afternoon they would go to some concert, or perhaps wander round a picture gallery; then home to dinner—that delightful little dinner, so beautifully cooked and served, with Lovel to wait, not like a machine, but like a wizard guessing what they wanted before they asked for it. Ah, those little dinners! with Lord Edgar all to herself, sitting opposite her in his evening dress, so near that by stretching across the table they could touch hands, which they did often when Lovel had left the room for a moment!—with the sweet little room softly glowing in the light of the wax candles reflected in the Venetian mirrors and ancient brass repouse work; with the old china and antique bronzes; with the beautiful cabinet pictures, and the odor of crushed roses in the Etruscan vases.

She was my Lady Fane; in the future time—Lord Edgar talked of it sometimes, and she thought of it now

and again as something vague and indistinct—in the coming future she might have, would have, to preside at grand dinners, banquets, social and political; but would any of them be so perfect and delicious as those which were eaten in the dainty Albany Chambers, with her darling, her lover, her husband, for sole companion?

Then, the dinner over, they would go into the little drawing-room—her boudoir, he called it—and she would insist upon his smoking a cigar, and as sure and certain that day followed day, she would find herself seated at his feet, with her head upon his knee.

Then, Lovel would, after knocking discreetly, come in noiselessly with the tea; and it would be: "Lela, I've got a box for the theatre in my pocket! What do you say?" And she, after artfully ascertaining whether he wanted to go, and would say "yes."

He would always place her behind the curtains of the box, and more often than not would watch her face rather than the stage, reveling in the delight depicted in her eyes and on her lips. The face was always fairer to him than that of any one behind the footlights.

Sometimes, but not often, he would see some friend or acquaintance; but he never spoke; and would give them a bow and pass on.

The time had not come when he could introduce her as his wife. Heaven knows what they thought; he cared not.

Then, the theatre over, the miniature brougham would roll off to one of the best of the restaurants, and he would choose some dainty little dish for her; he had a fixed idea that, being so slim and fairy-like, she needed a great deal of keeping up and nourishment; an idea which caused Lela no inconsiderable amount of amusement; and then they would go home to the pretty rooms again and talk over the evening.

Happy! How could they, loving each other as they did, be otherwise? "What shall it be? Any shopping to do?"

Lela shook her head laughing. "No! Why, there is nothing left for me to buy!" she said. "Besides, do you think I have no pity, you poor, dear boy? The hours you have waited about in the brougham for me! Oh, by the way, Edgar, I forgot to tell you. Whom do you think I saw yesterday?"

"Can't guess. Who was it?"

"Why," and she blushed a deep crimson, "the Reverend Mr. Browne."

"The Reverend Mr. Browne? Oh, ah, yes! Did you? Where?"

"Fancy your forgetting his name!" she said, with a pout. "In Pall Mall. I was sitting in the brougham outside your club, waiting for you, when I saw him walking along with a man—such a peculiar-looking man! It was the man with whom I attracted my attention, or else I should not have noticed Mr. Browne. He was a man with a face like those children, dear, do you know what I mean? without any expression. Just as if he were blind or deaf. But he was neither, for when I leaned forward and called to Mr. Browne—Did I do wrong, dear?"

"Wrong! Bless my soul, no!" responded Lord Edgar, frankly, and with a look of pleasure. "I wish I'd been there. What did he say? Did you ask him to come and see us?"

"No; I should have done so, but though he looked round—and so did the other man—he merely raised his hat, and they hurried on."

"George; that's strange. I wish he had stopped. I'll ask Clifford where I can find him. It struck me at the wedding that he was rather eccentric, but I took a great fancy to him."

"So did I," said Lela, softly. "He looked so pale and unhappy, as if he had some great trouble on his mind."

"Poor fellow. Perhaps he is poor. I wish I'd asked Clifford how much he gave him."

"It is not too late now," said Lela, gently. "But I haven't finished, Edgar. I told you I noticed the man who was with him; well, in the afternoon, while I was standing at the window here, I saw the same man waiting on the other side of the road, and when he came opposite he stopped and looked up at the window; but directly he saw me he pretended that he"—she stopped and laughed—"wanted to get something out of his eyes, and then went on."

"Oh, come!" laughed Lord Edgar. "Why should he do that? Why shouldn't he look up?"

"I don't know," she answered, laughing, too; "but I am sure he did not want me to see him. It was just the sort of thing a woman would do."

"Oh, indeed! What artful creatures women must be!"

"Well, it was. I am sure"—laughing again—"that there was nothing in his eyes."

"There was a picture of a remarkably pretty young miss, if he saw you."

"Now, Edgar, don't be foolish!"—kissing him. "I wonder who he is?"

"Oh, the parson's church warden, or—anybody; what does it matter? The question is, what are you going to do? Will you go for a drive?"

She was silent for a moment, then, as if her thoughts had strayed, she said:

"Edgar, does Edith Drayton know we are in London?"

"Yes, I suppose so," he replied. "I suppose Clifford told her."

"Why does she not call?" she asked.

He had asked himself the same question, and shook his head.

"I don't know. I'll ask Clifford. Perhaps she is out of town; everybody, excepting our bright selves, are out of town."

As he spoke, Lovel knocked and entered, first giving Lela time to glide from Lord Edgar's side and assume an absorbed interest in the flowers on the table.

"Mr. Revel, my lady."

"Speak of an angel and you hear the rustle of its wings!" exclaimed Lord Edgar, cheerily. "How are you, Cliff?"

Carefully dressed as usual, with an orchid in his buttonhole, and his pleasant smile on his face, Clifford Revel approached, Lela with extended hand.

"The tiptop of the morning to you, Lady Fane! Excuse the form of greeting, but it is such a lovely morning, and you look so bright and fresh that one is tempted to be rustic!" and he bent over her hand impressively.

Lela had confessed her distrust of him, but Lord Edgar and she had agreed that the subject should not be mentioned between them and though the same cold chill that had struck her when she first saw him revisited her now, she smiled and bade him welcome.

"On my way to my office, to the slavers of the mill, my dear Lady Fane! I've just dropped in to say 'good-morning,' and have a few minutes' chat; this pretty room, and your happiness—the sight of it—gives a flavor and a pleasant aroma to my daily toll. How are you, Edgar, luckiest and happiest of mortals?"

"All right!" exclaimed Lord Edgar, wringing his hand and gazing up into his false face with a genial smile. "We were just talking of you!"

"Unworthy subject for your thoughts or tongue!"

"What a fellow you are! Never want a word! Lela was just saying that she had met Mr. Browne."

### Eczema Cured Five Years Ago.

A Treatment Which Has Proven a Wonderful Healer of the Skin—Certified Evidence of Lasting Cure.

The old notion that eczema is a disease of the blood is refuted time and time again by the cures that are daily being effected by Dr. Chase's Ointment. It matters not what the cause may have been if you apply Dr. Chase's Ointment regularly you will obtain relief and cure of eczema. Here is the proof.

Mrs. Stephen G. Thwaites, Box 205, Jordan, Ont., writes: "My brother had a bad case of eczema on his legs. He was troubled nearly all one fall and winter with it, and could not work for days at a time. He tried different salves and ointments, but none cured him. One day he tried Dr. Chase's Ointment, and it gave almost instant relief. He continued its use, and in six weeks he was completely cured. We certainly can recommend Dr. Chase's Ointment, and are very grateful for my brother's cure."

Mr. J. E. Jones, 228 University Avenue, Kingston, Ont., writes: "I had eczema in my hand for about five years. I tried a great many remedies, but found that while some of them checked it, none cured it permanently. Finally I tried Dr. Chase's Ointment, and in six weeks my hand was completely better. I would not do without a box of Dr. Chase's Ointment in the house if it cost \$9 a box. I am giving my name to this firm so that it will get to those who suffer as I did."

Dr. Chase's Ointment, 50 cents a box, at all dealers or Edmanston, Bates & Co., Limited, Toronto. Substitutes will only disappoint you. Insist on getting what you ask for.

### Fashion Plates

The Home Dressmaker should keep a Catalogue Scrap Book of our Fashion Plates. These will be found very useful to refer to from time to time.

A SMART SPRING SUIT.

5422—This excellent model has a blouse finished with surplice fronts. The skirt is a two-piece model. As here illustrated, white serge was used with trimming of black and white checked satin. Gingham, chambray, linen and chantung would also be nice for this style. Skirt and blouse may be used separately.

The Pattern is cut in 7 sizes: 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 38 requires 5 1/2 yards of 44-inch material. The skirt measure about 1 7/8 yard at the feet.

A pattern of this illustration mailed to any address on receipt of 10 cents in silver or stamps.

Waist—3443. Skirt—2444. Here is a Combination that will make a pretty afternoon or calling frock. The blouse fronts are closed over a tucked vest. The square neck is trimmed with a collar cut in points over the front. The skirt is made with gathered tunic portions, and will prove a splendid style for remodeling. One could combine serge and satin or foulard in this design, or use two other contrasting materials.

The Blouse Pattern 2443 is cut in 7 sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. The Skirt 2444 in 7 sizes: 22, 24, 26, 28, 30, 32 and 34 inches waist measure. For a medium size the entire dress will require 8 3/4 yards of 36-inch material, without the tunic 2 yards less.

This illustration calls for TWO separate patterns, which will be mailed to any address on receipt of 10 cents FOR EACH pattern, in silver or stamps.

### The London Times.

The following extract from an article by A. G. Gardiner, editor of the London Daily News and which appeared in the Atlantic Monthly sketches the influence of the London Times before the "Thunderer" was added to the list of Northcliffe organs.

The history of the Times has been a vital part of the history of the nation for more than a century. The dynasty of the Walters had become in a very real sense a sort of fourth estate of the realm. No family could claim to have had no more powerful or more dignified influence on the life of the nation than theirs had been. They had exercised the power in an anti-social and narrow way, but they had preserved from generation to generation a tradition of dignity and responsibility that was of inestimable value.

"Walter of the Times." Their personal honour and distinguishedness were above challenge. Their incorruptibility was never questioned and they maintained a superiority and air of detachment and superiority which set them apart. They never came into the public eye, or disguised themselves under titles. It was enough to be "Walter of the Times." What peerage could gild such a name? They were not suitors of kings or statesmen. They were the trustees of the nation; kings and statesmen must wait upon their word.

The earlier, more liberal, more generous spirit of the paper grew cold with time. Property and privilege usurped the sovereignty once exercised by nobler impulses, and John Bright's saying that he was "never quite sure he was right until the Times said he was wrong" truly registered the change. But its motives were above suspicion, its authority unequalled. It commanded a respect even of those most hostile to its policy and throughout Europe it was accepted as the authentic vehicle of the national purpose.

As the forum of controversy it was inferior only to Parliament itself, for just as the main stream of advertisement had canalized itself into the Daily Telegraph, so the great argument of affairs had been canalized through the columns of the Times. Its correspondence was unique in all the world. It was not possible to keep pace with the movement of modern thought without a careful study of the letters in the Times.

We may measure its strength by the catastrophe it survived 30 years ago. There had been no parallel in English journalism to the magnitude of the catastrophe. British politics were engulfed by one tyranny theme, the subject of home rule for Ireland. The Times had throughout been the stirring and most powerful foe of nationalism. It stood for unionism, with its corollaries of supremacy for Ulster and coercion for the rest of the land, with a passion and sincerity all the more formidable because of the intellectual capacity with which they were fortified.

**The London Times.**

The following extract from an article by A. G. Gardiner, editor of the London Daily News and which appeared in the Atlantic Monthly, sketches before the "Thunderer" was added to the list of Northcliffe organs. The history of the Times has been a vital part of the history of the nation for more than a century. The mastery of the Walters had become in a very real sense a sort of fourth estate of the realm. No family could claim to have had a more powerful or a more dignified influence on the life of the nation than theirs had been. They had often exercised their power in an anti-social and narrow way, but they had preserved from generation to generation a tradition of dignity and responsibility that was

of inestimable value to the nation. Their personal honour and disinterestedness were above challenge. Their incorruptibility was never questioned, and they maintained a certain austere aloofness and superiority as of a caste set apart. They never came into the public eye, or disguised themselves under titles. It was enough to be "Walter of the Times." What right could any man have to edit such a name? They were not the sort of editors of kings or statesmen; kings and statesmen must wait upon their word.

Their earlier, more liberal, more generous spirit of the paper grew cold with time. Property and privilege usurped the sovereignty once exercised by nobler impulses, and John Bright's saying that he was "never sure he was right until the Times said he was wrong" truly registered the change. But its motives were above suspicion, its authority unassailable. It commanded the respect even of those most hostile to its policy, and throughout Europe it was accepted as the authentic vehicle of the national purpose.

As the forum of controversy it was inferior only to Parliament itself, for just as the main stream of advertising had canalized itself into the Daily Telegraph, so the great argument of states had been canalized through the columns of the Times. Its correspondence was unique in all the world. It was not possible to keep pace with the movement of modern thought without a careful study of the letters in the Times.

We may measure its strength by the catastrophe it survived 30 ago. There had been no parallel in English journalism to the magnitude of the catastrophe. British politics were engulfed by one tyranny theme, the subject of home rule for Ireland. The Times had throughout been the unflinching and most powerful foe of nationalism, it stood for unionism, with its corollaries of supremacy for Ulster and concession for the rest of Ireland, with a passion and sincerity all the more formidable because of the intellectual capacity with which they were fortified.

The launching of a Thunderbolt. When, with the enormous prestige of its name and reputation, it launched the thunderbolt of "Parnellism and

Crime," it seemed as if the cause of home rule had vanished visibly into the abyss. Nothing could rehabilitate it after this exposure of the complicity of Mr. Parnell in the murder of Lord Frederick Cavendish and Mr. Burke, and the policy of agrarian crime generally. Deals were useless. Here were the very letters, written by Parnell's own hand and bearing the guarantee of the Times for their genuineness. And after all they were forgeries; and not merely forgeries, but clumsy forgeries. Brought to the test of the Parnell commission, the whole accusation collapsed like a house of cards. The flight of Pigott in the midst of the trial, and his suicide in Spain, left the Times humiliated and exposed as the tool of a vulgar forger whose criminality was so apparent under examination that it ought not to have deceived a school boy.

No other paper could have survived such a disaster. The Times did survive, but it reeled under the blow and as years went on gave visible signs of distress. It seemed like an old wooden hulk, laboring under canvas and battling with newly invented ironclads, but so made and powerfully timbered that it could not sink. It tried to modernize itself with enterprises like the publication of the encyclopedia Britannica and the establishment of the Times' circulating library, but these devices were unavailing.

The process of dissolution was slow, but it seems inevitable, and the vogue of the Daily Mail hastened it. Its prestige was still immense. The great still made it the vehicle of their utterances and outwardly it seemed as imposing and enduring as ever; but in journalistic circles its fate was known to be in the balance. Would it simply founder or would it become a trophy of the young Alexander of journalism.

One day it was announced in a Sunday paper that it had been acquired by C. Arthur Pearson, who had been Alfred Harmsworth's (Northcliffe) industrious challenger for the field of popular journalism. The mystery of that announcement is still obscure, but whoever made it played Mr. Harmsworth's hand very skillfully.

It broke up Mr. Pearson's negotiations at the critical moment, and led the prize to fall a little later into the hands of Mr. Harmsworth—or as he had now become, after a brief interval as Sir Alfred Harmsworth, Lord Northcliffe. The fact was not announced with any flourish of trumpets. Lord Northcliffe was far too acute for that. He knew that the dramatic announcement of his association with the paper would be a shock to its prestige, and he needed to preserve that prestige intact for his future ambitions.

**Eskimo Hero From Labrador Dies in War.**

Daily Mail: It came to me only yesterday—the hardest blow of the war. A "returned postal packet," and inside a letter of my own sent him several weeks ago. Or its face was the soulless stamp "Deceased."

Six years ago we met John Shiwak and I, in the most detached part of the Empire—the hyperborean places where icebergs are born, where seal grunt along the shore, where cod run blindly into the nets of adventurous fishermen gone north in a midsummer eight weeks of perilous, comfortless, uncertain industry. Far "down" the desolate coast of Labrador, a thousand miles north of my Newfoundland starting point, I came on him in a trifling settlement that hugged, shivering and unsteady, about a long white building, a trading post of the Hudson's Bay Company—the merest collection of "windproof" boards that housed human beings only in the less harrowing summer time.

For John Shiwak was an Eskimo. Just one week I knew him and then we separated never to meet again. But in that week I came to know him better than from a year's acquaintance with less simple souls, and his record in his glorious end proves how well I did know him.

There, where the bitterness of ten months of the year drives the ten straggling thousand human beings of half as many miles of coast-line to the less grim, less bleak interior, John Shiwak has awakened to the bigness of life. He had taught himself to read and write. Every winter he trailed the hunter's lonely round back within sound of the Grand Falls, which only a score have seen—often alone for months in weather that never emerged from zero.

And every summer, when the ice broke in June, there came out to me in Canada his winter diary, written wearily by the light of candle, hunched in by a hundred miles of fatless, manless snow. And no fiction of fact of skilled writer spoke so from the heart. He was a natural poet, a natural artist, a natural narrator. In a thumb-nail dash of words he carried one straight into the clutch of the soundless Arctic.

And then came war. And even to that newsless, comfortless coast it carried its message of Empire. John wrote that he would be a "soldier." I dismissed it as one of his many vain ambitions against which his race would raise an impossible barrier. And months later came his note from Scotland, where he was in training.

I followed him to England, but before we could meet he was in France. When, last summer, he obtained sudden leave, I was in Devon. His simple note of regret rests now like a tear on my heart. But I have heard from him every week. He was never at home in his new career; something about it he did not quite understand. Latterly the loneliness of the life breathed from his lines. For he made no friends, in his silent, waiting way. His hunting companion was killed, and the great be-

lievement of it was like a strong man's sob. He was cold out there, even he, the Labrador hunter. But the heavy cardigan and gloves I sent did not reach him in time.

In his last letter was a great longing for home—his Eskimo father whom he had left at ten years to carve his own fortune, his two dusky sisters who were to him like creatures from an angel world, the doctor for whom he worked in Labrador in the summer time, his old hunter friends. "There will be no more letters from them until the ice breaks again," he moaned. But the ice of a new world has broken for John.

He had earned his long rest. Out there in loneliness, Solitary, day after day, and the cunning that made him a hunter of fox, and marten, and otter and bear, and wolf brought to him better game. And all he ever asked was, "When will the war be over?" Only then would he return to his huskies and traps where few men dare a life of ice for a living almost as cold.

John Shiwak—Eskimo—patria.

**The "Trustee" German Spy.**

(From the Philadelphia Ledger.) No more alarming case of German espionage has been brought to light than that of Paul Henig, the "trusted" master mechanic of a company making torpedoes for the United States Navy. Since another Henig, who passed as his son, is now interned at Ellis Island, it is not easy to understand the blind confidence which continued him in a position where he could do so much damage. Lieut. Shea, U.S.N., was the first to suspect him. This capable officer began an examination of the torpedoes on his own account and found that they were designed to circle back and sink the very ships firing them. There is no need to expatiate on the formidable nature of such a plot. Nor is it surprising that there should be considerable apprehension lest other unknown dangers of the kind threaten our military and naval forces. That Henig should pay the death penalty as a spy goes without saying; the example cannot be too severe. But there should also be an immediate and searching investigation of other "trusted" Germans who are employed in war work. The consequences of untrustworthiness are too perilous to be ignored.

**After the Food Control Board.**

Editor Evening Telegram. Sir—All the winter potatoes could be had here or elsewhere, and enquiries brought but one answer: "That the potatoes were scarce, and were held for high prices in the spring. None were to be had at any price, and people had perforce to go without them with the consequent result that the flour was more used and at a loss to the user and to the Colony. The more flour used, the higher went the price. Now, it transpires that potatoes can be had in every direction, and scores of barrels have come in from a nearby place and sold at \$5.00 a barrel—a price at which they could not be had any time since last October. From the reports had there are more potatoes in sight than can be used this season—to the loss of the owners and the whole community. All this surplus could have been profitably used during the winter—profitably to all concerned. The writer is not prepared to say that the potatoes now to be had are the best for seed purposes, but it is apparent to every householder in the town, that they could have used them since last fall. This is nothing but bad management on the part of some one, and that some one is the so-called Food Control Committee of St. John's. That Committee could have regulated the price of the potatoes and so saved the present situation. It seems that this Committee has only eyes for the conditions existing in the Capital, and their scope of usefulness does not concern and does not go beyond the needs of its citizens. It does not properly regulate matters even there, because the report was published in one city daily that the price of a barrel of potatoes there early this spring was \$5, a price that was not justified had enquiry been made, and the actual quantity of potatoes held in nearby places been ascertained. What are the duties of the Food Control Committee? Does anyone know what it has done except sending its Chairman to Canada and the States to find out that which could have been known by correspondence, while facts and figures of our local supply were entirely lost sight of. The Committee are Government officials, and can anyone expect their work to be as general or as searching as it should be. It may be said that if the Committee cannot deal with the regulation of the prices of imported foodstuffs, how can it be expected to deal with the regulation of the prices of the home food supply. What are its uses, or its scope of utility? Yours truly, PATRIOT. May 11, 1918.

**Public Notice**

I am directed by His Excellency the Governor in Council to issue the following notice under Authority of Minute in Council passed 28th February, 1918.

**Augmentation of the Pay of Royal Naval Reservists Newfoundland.**

The Government of Newfoundland have decided to augment the pay of Newfoundland Royal Naval Reservists so as to place them on the same footing as men of the Newfoundland Regiment.

Under the provision of the War Measure Act, authority is given to the Minister of Militia to deal with the matter of augmentation of pay of the Royal Naval Reservists, Nfld., in consultation with the Senior Naval Officer, St. John's.

It is ordered that a sum of 33c. per day be placed to the credit of each Naval Reservist from the time of commencement of the war, in cases where men were then serving, or otherwise, from the time when their services began up to the time of discharge, or of death, or to the 30th of September, 1917, inclusive.

As the rate of pay of Naval Reservists was increased from October 1st, 1917, and as the difference between the amount they receive and that allowed the members of The Royal Newfoundland Regiment is 17c. per day, this difference will also be credited them from that date.

The foregoing amounts will not in any case be made a payment from Admiralty sources. The Minister of Militia, St. John's, Nfld., is solely responsible for the issue of any sums due.

Newfoundland Royal Naval Reserve men serving in any of H. M. Ships, including all members of the Trawler Reserve and those in Defensively Armed Merchant Ships etc., are eligible for the pay as set forth, and should be informed of the following alternatives as regards the method of payment:—

- (a) Payment will be made on personal application to the Minister of Militia, St. John's.
- (b) Payment will be made to the nominee of any Reserve man, on written application duly witnessed, to the Minister of Militia, St. John's.
- (c) Sums due will be placed to the credit of Reserve men who do not desire to avail themselves of the foregoing and can be drawn by them at the expiration of their service.

The following form is to be compiled and forwarded direct to the Minister of Militia, St. John's, Newfoundland, at the earliest possible date:—

NAME AND OFFICIAL NO.	WHAT IS DESIRED DISPOSAL OF AMOUNT DUE UNDER ORDER 1, 2, or 3. (IN CASE OF 2, FULL NAME AND ADDRESS MUST BE GIVEN.)	SIGNATURE AUTHORIZING DISPOSAL.

All communications of any description with regard to these payments are to be made to the Minister of Militia, St. John's, direct. Payment will commence on 1st May, 1918.

In cases where members of the Royal Naval Reserve (Newfoundland) have been killed in action or died of wounds or sickness, or through any other cause, the amount due as Augmentation Pay will go to the Estate of the deceased. The authority to obtain the Estate of the deceased is, in case of a Will, Letters of Probate; and in case there is not a Will, Letters of Administration. Such letters are issued by the Supreme Court of Newfoundland on the Petition and Proofs of Executor of the Will, or the next of kin. If the Estate does not exceed \$500.00, after the proof of the facts has been obtained the petition can be applied for by the Minister of Justice.

With reference to the foregoing, it is suggested that the next of kin of Reservists who are now serving should communicate with them and request them to send their instructions to the Militia Department. No action can be taken until such instructions are received.

Next of kin of deceased Reservists will be communicated with in due course when their claims have been proved.

J. R. BENNETT, Minister of Militia.

Frenzied Finance.

The proposition put forward by the President of the Fishermen's Protective Union, in his now celebrated and much discussed Special Circular, to secure financial help toward carrying over the current year's business of the Union Trading and other Companies, is perhaps the most remarkable in the history of this, or any other, commercial community. The appeal is made to members of the Union, who have money in the Banks or at home and coming at such a time is an almost infallible testimony to the fact that "something is rotten somewhere." The opening sentences of the request for cash are blackly pessimistic, but as the writer warms up to the subject, a more visible style of optimism tinged the wording. The music of the "Song of Sixpence," however, will fall to charm the ears of hearers; the unmistakable signs of the times being unfavorable. There is also a coldness pervading the financial atmosphere which the thermometer of the President fails to register. Signs are not wanting to show that the people who originally made up the strength of Union Councils are not being charmed by the voice of the charmer any longer. Like the Missourians "they now have to be shown."

No person would or could object to the Presiding Officer of the Fishermen's Protective Union, making a call for funds wherewith to continue the regular business of the many companies with which he is identified. The response to that call is entirely with the shareholders or prospective shareholders who wish to purchase new stock. As has been demonstrated the objection to the Union Trading Company becoming a competitor of the Government of Newfoundland, which competition is not only suggested by one who is a Minister of His Majesty's Government in Newfoundland, but is supported by the same Minister. This will be considered presently. Plainly, in his frenzy, the President is desirous of creating a division in favor of his own plan when he states flatly that "the Banks won't advance money to anyone." Such an assertion, unsupported by a tittle of evidence would make it apparent that the financial business of this country was in such a condition that the Banks were refusing to make loans on the usual security. "The Banks will not advance money to anyone." What does the President's colleagues in the Government think of this ex parte assertion? If by anyone, this Minister of the Crown, meant the Union Trading Company, why did he not say it straight? He has no right, even in his private circulars to allege such a palpable untruth, for every respectable business man knows that the Banks are granting the usual accommodations on the usual conditions. So much for that. The Government of Newfoundland is about to place on the local market an issue of Bonds to raise a Victory Loan, for the purpose of meeting the War expenses of this Dominion. Whether that Loan will be fully subscribed depends on its attractiveness and profit bearing possibilities. It will be a Bond issue running into millions, yet simultaneously with its announcement, the President of the Fishermen's Protective Union and Minister of the Crown heads it off by asking all who have money to invest to put it into the stock of the Trading Company or on deposit with the same concern and an interest at the rate of six per centum will be paid, "the same rate as the Government Bonds." In other words, the needs of the Trading Company should be placed before those of this Dominion, and whatever money fishermen members of the Union have to spare, they are being solemnly advised to give the preference to the Trading Company, in order that the President of that Corporation can, to use his own words, "drive the merchants to pay a high as possible price for fish." If this is not "frenzied finance" with a vengeance, what is it? In effect, the fishermen are asked to give their money to pay their own fish, the price of which, with the purchasing power of their money, will be hoisted to the limit, in order, (note the exact words) "that if I pay ten dollars for fish others will follow."

Not one word about that "tommy rot" cause of supply and demand; not one word to market conditions abroad; not one word about the difficulty of obtaining tonnage to carry the fish to the markets; but a clear cut accusation that the merchants want to down the Union, and that if the money does not come in it will make it impossible for the President to buy the fishermen's fish with the fishermen's cash, and therefore the merchants will pay what they like. Was ever such doctrine preached? There is so much to be considered, in this wonderful and to be historical circular, that space does not permit to-day. With such men being Ministers of the Crown, there is much more need at present for the Churches to offer prayers "for the safety and welfare of this Colony" than ever there was before.

Pertinent Enquiries.

**SUGGESTED AND OTHERWISE.**  
Whether any investigation or enquiry is going to be held by the Customs Department into the alleged presentation of invoices, under value, for duty, by a certain firm?  
Whether it is permissible under the Customs Act, for goods, in Bond, to be stored in a building, the owner of which has not given Bonds for the due security of the duty on such goods, when stored in such buildings?  
Whether or not the Minister of Customs is aware that at a certain port of Entry in the Dominion, local goods and foreign (dutiable) goods are mixed promiscuously, when there should be, under the Customs Act, a separate warehouse for each?

Whether in view of these circumstances it would not be quite compatible with the law, to prohibit the landing of any cargo from any foreign steamer, under such conditions, at this particular port of Entry?  
Whether Customs Inspectors (so-called) inspect, and whether some of them know how to inspect?  
Whether there is anything doing in the Confederation line, and whether the recent arrival from Halifax of the non-resident member for Burgeo and LaPelle has any connection with the previous arrival of the non-resident member for Bonaville, who apparently resigned his seat in 1916, but who resumed it again last week without any formality?

Whether it would not be better for the Government to commandeer some of the surplus war profits made by its supporters during 1917, than to make the present Income Tax retrospective thereby causing much suffering and financial embarrassment to salaried members of the community?  
Is there a relationship between Baron Morris and Baron Results, or is it just a connection?  
Would not this talk about titles give anybody a bad pain?

Is this a time for Men in the Govt. to be thinking about, and scheming for such baubles?  
Will some titles not be more of a disgrace than anything else?  
Have some people now got enough Daylight with Joan Anderson's Bill in force, to see where they are heading for?  
Can they figure out later where they may get off?  
What might happen if Simple Simon should meet a really up-to-date politician?

What is Simon (here) for, and why? Will Germany win?  
Is there much German money about in Newfoundland?

House of Assembly

Yesterday the Petitions had their sittings, Mr. Woodford presenting two from Mr. Main, on the subject of the price of fish on Labrador. He had the support of Messrs. Kennedy and Young, both of whom pointed out the injustice of the present methods.  
Acting Colonial Secretary Halfyard had a sheet from Fogo, which he handed over to the Departments to which they related, hoping that the right thing would be done.  
Mr. Kennedy handed in one from sections of Harbour Main district in connection with the Military Service Act.

The "giant of the bunch" was undoubtedly that presented by Mr. Bennett, which was signed by some 8,000 people of St. John's, asking that some modifications be made in the Prohibition Act now in force. In support of this were Messrs. Bennett, Woodford, Stone, Walsh, Kennedy, Downey and Young. Against it were Messrs. Parsons, Targett, Winsor, Grimes, Moulton, Goodison, Currie and Morris.  
Bills respecting the operation of Saw Mills and for the encouragement of Cattle Raising went through all stages.

The Legislative Council's amendment to the Ministry of Shipping Bill was further amended and the Bill amending the Crown Lands and Timber Act, submitted by the Select Committee was passed.

Legislative Council

The House met at 3 o'clock yesterday, and a Select Committee was appointed to consider the amendment to the Ministry of Shipping Bill, proposed by Mr. Bishop, on Monday. This Bill was re-announced and provision made for a Board of not less than two members, to act in conjunction with the Minister.  
The Military Forces Bill was again sent to Committee, when the Hon. President moved an amendment to Section 7, to the effect that members of the Royal Newfoundland Regiment be not subjected to punishment such as is inflicted in the army, other than death or imprisonment. Hon. Mr. Squires seconded the motion and Hon. Mr. Gibbs spoke in support of the amendment. Hon. Mr. Harvey was of opinion that it was ridiculous (which it is) for a local Legislature to impose its laws to Army discipline on the Imperial Government, as when the Nfd. Regiment formed part of the Army King's Regulations applied and could not be changed by local enactment. Hon. Mr. Anderson hoped that when the Minister of Militia crossed to the other side he would see that the remaining few of the first "five hundred" be sent home on furlough. Hon. Mr. Ellis took the same stand as Hon. Mr. Harvey, but had no objection to accepting the amendment which was carried unanimously.

A general debate ensued on the second reading of the Income Tax Bill, and Hon. Mr. Harvey who was the first speaker, said that there were many points in it which did not appeal to him. The tax was somewhat excessive when compared with that of Canada and the U.S. and its collection from 1917 was unfair.  
Hon. Mr. Gibbs asked that further consideration be deferred, until members had been given an opportunity of studying the Bill.  
Hon. Mr. Anderson was also of opinion that a copy of Bill should be given members for perusal.  
Hon. Mr. Bishop believed it quite impossible to collect the tax for 1917.

Hon. Mr. Squires supported the principle of the tax and regretted that members had not been furnished with copies. The retraction of the Bill was unfair and he did not think it would be possible to collect the tax for 1917 especially from men who had been obliged to live up to their income. The distinction amounts for married and single were not equitable. He begged to make a motion that the Bill be deferred till to-morrow.  
Hon. Mr. Ellis announced that the Government wished to close the House Wednesday, and suggested a night session.

Hon. Mr. Templeman spoke to the question of length, and expressed disapproval at rushing matters. During the session he had heard nothing but "this is taken from the Canadian laws, and this is a Canadian Act" and something else is a Canadian Act. As everything was Canadian, and he was not sure that we were not into Confederation, he thought it would be just as well to get a few Canadians down here (we have some already) and let them run the whole show. He did not like the way things were going. He could not see through a stone wall, but he could see through a picket fence.  
Hon. Mr. Anderson objected to the rushing of the "House" by a baker's dozen and supported the motion that the debate be held over until to-day.  
Hon. Mr. Goodridge asked that the Bill stand over which was agreed to.  
To-day's sitting will take place at 3 o'clock p.m.

To-Day's Messages.

RECEIVES PASSPORTS.

DUBLIN, To-day.  
The Lord Mayor has received passports for America, and arrangements for his immediate departure are in progress. This was announced in a report, at a meeting of the anti-Conscription Conference, held at the Mansion House to-day.

MAURICE'S EXPLANATION.

LONDON, To-day.

The Daily Chronicle for a long period was a strong supporter of Premier Lloyd George. Lately, however, it has shown signs of lessening allegiance. It has favored the Associated Press with Major General Maurice's first article, which will appear tomorrow, under the caption "A Personal Explanation." General Maurice deals with two points in the Premier's comments on his conduct, concerning the Versailles meeting, non-Flanders being taken over by the French lines. General Maurice says, I accompanied the British representatives to Versailles, and was present at the first meeting of this session of the Supreme War Council. During the meetings after the first, I was in the corridor outside the Council Chamber, and in the intervals between the meetings was engaged on work connected with the questions under examination. I hold, therefore, that my statement that I was at Versailles at the time was justified. Concerning the Premier's question why I didn't criticize ministerial statements before I left office, General Maurice says, it was not as stated in some reports in the House of Commons when the Premier made his speech on April 9th. That was the day the speaker's attack on Flanders began. Between then and April 20th, when I handed over my work to my successor, I was very much occupied with my duties and part of the time I was in France. I had no leisure to do more than glance at the Premier's speech. I did notice a statement about the forces in Egypt and Palestine, but that didn't seem to me to warrant my calling attention to it at a sitting when so many other matters were much occupied with other matters. I left the War Office on April 20th, on leave, and then for the first time read a full report of the speech. It was while I was on leave that I heard of Mr. Bonar Law's answers to questions in the House of Commons on April 23rd. I returned on April 23rd, and read the report of Parliamentary proceedings but it was not until after May 10th, and I didn't wish to make such charges on the eve of leaving the country. As the suggestion has been made that I worked in concert, or collusion, with other soldiers or with opponents of the Government in Parliament, or in the press, I wish to add that I acted entirely alone and that the responsibility for what I did is mine alone, and nothing was further from my mind than to serve any partisan or political purposes.

The House adjourned until 4 o'clock this afternoon.

Legislative Council

The House met at 3 o'clock yesterday, and a Select Committee was appointed to consider the amendment to the Ministry of Shipping Bill, proposed by Mr. Bishop, on Monday. This Bill was re-announced and provision made for a Board of not less than two members, to act in conjunction with the Minister.  
The Military Forces Bill was again sent to Committee, when the Hon. President moved an amendment to Section 7, to the effect that members of the Royal Newfoundland Regiment be not subjected to punishment such as is inflicted in the army, other than death or imprisonment. Hon. Mr. Squires seconded the motion and Hon. Mr. Gibbs spoke in support of the amendment. Hon. Mr. Harvey was of opinion that it was ridiculous (which it is) for a local Legislature to impose its laws to Army discipline on the Imperial Government, as when the Nfd. Regiment formed part of the Army King's Regulations applied and could not be changed by local enactment. Hon. Mr. Anderson hoped that when the Minister of Militia crossed to the other side he would see that the remaining few of the first "five hundred" be sent home on furlough. Hon. Mr. Ellis took the same stand as Hon. Mr. Harvey, but had no objection to accepting the amendment which was carried unanimously.

A general debate ensued on the second reading of the Income Tax Bill, and Hon. Mr. Harvey who was the first speaker, said that there were many points in it which did not appeal to him. The tax was somewhat excessive when compared with that of Canada and the U.S. and its collection from 1917 was unfair.  
Hon. Mr. Gibbs asked that further consideration be deferred, until members had been given an opportunity of studying the Bill.  
Hon. Mr. Anderson was also of opinion that a copy of Bill should be given members for perusal.  
Hon. Mr. Bishop believed it quite impossible to collect the tax for 1917.

Hon. Mr. Squires supported the principle of the tax and regretted that members had not been furnished with copies. The retraction of the Bill was unfair and he did not think it would be possible to collect the tax for 1917 especially from men who had been obliged to live up to their income. The distinction amounts for married and single were not equitable. He begged to make a motion that the Bill be deferred till to-morrow.  
Hon. Mr. Ellis announced that the Government wished to close the House Wednesday, and suggested a night session.

Hon. Mr. Templeman spoke to the question of length, and expressed disapproval at rushing matters. During the session he had heard nothing but "this is taken from the Canadian laws, and this is a Canadian Act" and something else is a Canadian Act. As everything was Canadian, and he was not sure that we were not into Confederation, he thought it would be just as well to get a few Canadians down here (we have some already) and let them run the whole show. He did not like the way things were going. He could not see through a stone wall, but he could see through a picket fence.  
Hon. Mr. Anderson objected to the rushing of the "House" by a baker's dozen and supported the motion that the debate be held over until to-day.  
Hon. Mr. Goodridge asked that the Bill stand over which was agreed to.  
To-day's sitting will take place at 3 o'clock p.m.

Editor Evening Telegram.  
Sir.—No one is more willing to give the returned soldiers prize for their work in the recent recruiting campaign than the writer. But when the returned soldiers or any person tries to take all the credit for the Selective Conscription measure, they are attempting a little too much. To the Evening Telegram belongs the credit (not all of it, of course), of selective conscription, and your decision, sir, in "galling your colours to the mast" on the day after the big meeting in the Casino Theatre, backed by your correspondents—Rev. Mr. Darby and others—pulled the wool out of the Government's eyes and let them see that their policy of proconscription would not be longer tolerated, and the result is that Selective Conscription is on the Statute Books—and to the Telegram belongs the credit for forcing the measure.

LEAGUE NOTES.

Last year's four teams will again compete for the "tin mug" this season. Two rounds will be played, each team consisting of six games each. Opening Day is set for June 15th. The Wanderers and Cubs will start the ball rolling Tuesday and Thursday evenings, after tea, has been decided on as the time when the other contests will be run off. The other contests will be held in Big League style. The "ump" will announce the batteries through a megaphone and the games will start promptly at the hour called. ANY team not having the full quota of men in the field sharp on time will forfeit the game.

The practice each before the appointed time; the challenging team to have first ten minutes. The Secretary will be provided with a bell to announce when practice begins and ends. The proceeds of the first game will be devoted to the most worthy object. The games will consist of seven innings and the players' benches will be moved back near the fence so as not to obstruct the spectators' view.

Mr. Morine's Return.

Editor Evening Telegram.  
Dear Sir.—"Democrat's" warning in your issue of yesterday on Mr. Morine's return to town is most timely, if warnings are of any avail just now!

Two years ago this gentleman made debut to the Assembly in a most touching foreword speech, when most people thought he had resigned his seat, and since that period we have had a continuous series of political juggling and acrobatic performances in our public life that have all pointed to one goal, Confederation. Baron Morris has fled to London, from whence he has also sent us his farewell address; Mr. Coaker has fallen into the arms of Messrs. Cashin and Crobbie, and we have a government of shreds and patches in power, the upheaval of the most corrupt and immoral compact that ever was entered into in any part of His Majesty's Dominions, the foundation of which was also Confederation. The ridiculous part of the whole situation is the position in which we find our Legislature to-day. We have in the first place about 10 vacancies in the Assembly as far as seats go; we have Mr. Morine living in Toronto all his time, paying us a visit to take his seat when he feels like it in the Assembly; we have Mr. Morison living in Halifax for the past four years doing the same, and we have Mr. Goodison, the late Speaker, leaving a permanent office under the Crown to which he was appointed over a year ago to resume his seat on the chance of his procuring a better job later on, and we have the electorate all over the country patiently sitting down waiting for the next move. Well may we exclaim: "Where are we and whither tending?"

Yours truly,  
PLEBS.

JUNIOR LEAGUE.

At the meeting of the League held last Saturday night the question of formation of a Junior League was given full consideration. The whole matter was thoroughly gone into and

after long discussion it was finally decided that the present time was inopportune owing to the limited financial position of the League.

A WANDERER'S FAN'S DREAM.

"Last night," he said, with shining eyes, "I dreamed McLean was back. I dreamed that Pritchard's wallop once more lead the old attack; I seemed to see 'Tim' Hartnett make an old-time one-hand spear. And hear McInnis' barking in the shaking umpire's ear. And like a dream of heaven, where the feathered angels soared, I heard the speedy shots of Kings Hit the mitt of Charlie Ford. I cheered for Britt and Hocken. As they cracked 'em on the nose, I saw McLeod again at short. Pick a wallop from his toes. And with the old-time flash of speed and zest. We mauled the Irish to a pulp and stamped upon the rest."

BASEBALL PROBLEMS SOLVED.

Ump calls a runner out. Runner screws and claims he was safe by a mile. That's the reason the Umpire called him out. A mile is beyond the legal playing distance. Batter wallops a high fly that bounces on centre fielder's skull. The ball is fouled. It landed on neutral territory. Baserunner spikes first baseman and claims it is an accident. He spikes second baseman and claims it is an accident. He spikes third baseman and claims it is an accident. Ump puts baserunner out of game. No accident ever stuttered.

Warns of Kaiser's Doom.

Unless the German Government is speedily demoralized, both the Kaiser and the Hohenzollern dynasty are doomed, declared Professor Max Weber of Heidelberg in a lecture delivered in Berlin the second week of January. Professor Weber said that thirty years ago he had been a Conservative, but for the last twenty years he had recognized that that form of government must lead to a shipwreck. He added that further failures would be inevitable, whatever the nature of the peace, if the methods of the present regime were continued. As quoted in Berlin papers reaching London, Professor Weber said:

"The Junkers of our eastern provinces are not an aristocracy like the English aristocracy, which, upon a foundation of calm self-confidence and trained knowledge of the world, is able to play an important part in the policy of the State. The noble Prussian Junkers are nothing but business men engaged in agriculture; like our industrial and commercial business men, they are tied to their work, and are not in a position to practice politics as an art. The forms of real aristocracy are worthy of imitation and capable of democratization and the German aristocratic type is the corps student who has passed an examination."

The professor took Count Luxburg as an example, and said that his mistake in Argentina were those not of a Count, but those of a former corps student or of a man entirely absorbed in corps students' views. He continued: "The career of our political officials is based upon the conception of social qualifications for fighting duels. Our bureaucracy regards the German Empire as an association for insuring advancement and domination—the security being provided by the Prussian three-class franchise. . . . The parliamentarization of Germany is the only way to avoid another war under conditions as difficult as those of the present war. Parliamentarization is also the only means of saving the dynasty and the monarch, for the present regime both within and without, drives to catastrophe. . . . The democratization of Germany does not mean surrender to socialism or pacifism; above all it does not mean surrender to demagogues. Such mad demagogues as is practiced at present is simply inimitable. At present subordinates create disputes because they are ambitious. They carry departmental quarrels into the press—and what a press—and then begins the cry about a crisis. People who are highly paid to 'take offence' accuse the other side of being in English pay. What is most regrettable is that estimable officers are innocently caught in the web of these Pan-German demagogues, and do not know what they are doing. The party spirit which is now being aroused in the German Army must inevitably lead to its moral and military corruption."

In the Good Old Times YOU LADIES Who Were Careful Shoppers, could wander down Water Street, or perhaps up the Middle Street AND GET A BARGAIN in a Remnant or in perhaps A BIT OF POUND COTTON. With housewifely vision and foresight you could see how these purchases would make up satisfactorily and economically. Even on the ordinary piece goods you could often see your way clear to save money in the making up, rather than buying readymade goods. "But Them Happy Days is Past." Now 'tis a strain on one's brain to know how to make ends meet, and on one's purse 'tis worse. For that reason we are going to let you in on a secret. Possibly some ladies know it already. However, the secret is,— YOU CAN BUY Ladies' Readymade Wear AT BLAIR'S far cheaper than it can be made up or purchased elsewhere.

There are various reasons for this. The most important is, that these goods were booked before the last great rise in prices, and the materials with which they are made, before the other big rise previously. The next important reason is our conscience. As you are aware, the White Shirting that we used to sell at about 12c. per yard has, on late purchases, to be retailed at about 35c. to 40c. yard, and we hate to mention the price. But the Prices of Our Ladies' White Wear we feel we can mention with pride to any customer. We have at the moment for the early purchaser a large stock of Ladies' White Embroidered Cambric Camisoles and Chemises. Ladies' White Embroidered Cambric Knickers and Combinations. Ladies' White Embroidered Cambric Nightdresses. Ladies' White Embroidered Cambric Underskirts and Princess Underskirts. ALL THESE GOODS WE ALSO HAVE IN QUANTITY IN FLANNELETTE MAKES. Some of the Flette Goods were last season's, and some we imported lately, so as to be able to give you decent prices next Fall. Still, there is nothing like buying ahead these times. Ladies' Blouses. We are getting a Name and a Fame for Ladies' Blouses; for we sell good goods at low prices in this department, most assuredly, and stylish goods. OTHER GOOD VALUES IN Ladies' Ready-to-Wear Goods are shown in our stock of LADIES' TWEED and SERGE COSTUME SKIRTS. LADIES' SHOWER and COVERT COATS. LADIES' BLACK RUBBER COATS.

## The Most Important Quality.

By RUTH CAMERON.

RUTH CAMERON

It is a well known fact that certain of the most progressive business concerns keep record cards on which all their salespeople are graded, somewhat the way we used to be graded on our report cards in school.

Only, instead of reading and algebra, the salespeople get their marks on such subjects as accuracy, honesty, knowledge of the goods, etc.

How Much Each Factor Counts In The Eyes of This Firm.

The other day one of these charts came into my hands. It was very interesting. I think it might be a good idea if such charts could be given out among high school and college students, so that they might realize how much each factor counts towards success.

There are thirty-five headings under which the marking is done, and these thirty-five are grouped under four main heads: Physical, Intellectual, Personality and Salesmanship.

One Quality More Than Twice As Valuable As The Rest.

The point which interested me most in the whole chart was this: there were fourteen qualities listed under Personality, and among them was one quality which counted more than twice as much as any one of the others; it counted twice and a half times as much as ambition, enthusiasm or honesty, and five times as much as that most valued of all business qualities — promptness.

And what do you think that quality was? Something that only the exceptional person could acquire?

No, something that anyone, no matter how lacking in brilliance or "pep" could have if he willed it: Just courtesy.

Just the habit of always saying "Good morning" and "Please" and "Thank you." Just a smile and a pleasant note in one's voice. Just a mixture of good manners and kindness.

The Hotel Manager Feels The Same.

The day after that chart came to my attention I picked up a magazine and read an article by one of the leading hotel managers in the country. Speaking of his waiters, he said:

"We try to impress upon a waiter that no matter how deft he is, we will not keep him if he is perpetually grouchy or sulky. We always point out to him that even if he is slow and not very able at first, if he is courteous and shows a willing spirit to serve to the best of his ability, the average man will condone his errors."

There you have it again.

Put courtesy in the balance against ability, and it is not the more showy quality that tips the scale.

Courtesy is heart sunshine. Its presence warms and cheers us and puts us in a better mood. While the absence of it affects us as disagreeably as the continued absence of the sun on a succession of cloudy days.

## Your Boys and Girls.

Every child's room should have a private desk or table where he may write. Here he should have a stock of pens, penholders, pencils, pads and writing paper, and he should be trained to use these materials frequently, such a bit of property helps him to cultivate neatness and order.

If he evidences slovenliness at first, the mother should urge him to orderliness and inspect his desk until he has attained neatness.

It should be impressed upon him that this is part of his training, that as a man he will always need to keep his papers in place and in order, and that if he is apt to be in the employ of others, it will be to his advantage to

## Milady's Boudoir.

If your skin is in need of whitening and softening, the best remedy is the homely cucumber in your kitchen garden as they have been known as splendid beautifiers for a long time.

Be sure, therefore, and plant them in your kitchen garden this spring.

There are several ways of using this friendly vegetable, the simplest of which is to pare it, cut it in thick slices and rub it upon the face without further preparation.

The juice is left on overnight and washed off with warm, not hot, water in the morning.

The best way to prepare a cucumber beauty lotion is to mash a cucumber into pulp, place the pulp in half a pint of milk and set the whole upon the stove to come to a slow boil.

When it has come to a three minute boil, the lotion is removed and strained through a clean cheesecloth or a very fine strainer.

The result is a cucumber cream which is delightful to use when perfumed with rose water, essence of violet or lavender. This, too, is applied before retiring and washed off in the morning.

It is an excellent whitener and is recommended for removing the yellow line around the neck which often appears.

You should also plant tomatoes for when your fingers are stained from the paring and cooking of vegetables, a piece of tomato rubbed upon them will whiten them nicely.

Tomato juice, allowed to stay on the hands for some time and then washed off with soap and water, will give a good effect.

To whiten the chin, use the common white potato. Pare the potato and rub it upon the chin or hind sides of it about the chin for a couple of hours daily.

The potato is then removed and the skin washed with a mild soap and warm water, after which a good cream is rubbed in.

There is really no excuse for a woman being unbecomingly, even if she has not the money with which to purchase expensive cosmetics.

Everyday Etiquette.

"Is it considered good form to use the letters R.S.V.P. on an invitation?" asked Ida.

"The abbreviation is practically obsolete, the favored form at present being 'Please respond.' As a matter of fact favored guest should have the courtesy to answer without a reminder," replied her sister.

Special Notice.

At the end of this year we will give 5 cts. for every 12 Outside Green Wrappers obtained from "STAFFORD'S LINIMENT."

We will also give \$10.00 to the person forwarding us the largest number and \$5.00 to the 2nd largest.

We will keep a record of every person forwarding us these wrappers from time to time and at the end of the year we will publish the names of the Winners.

"STAFFORD'S LINIMENT" is the strongest and most penetrating Liniment for sale in Newfoundland and is sold in over 600 stores.

It is the best Liniment you can use for RHEUMATISM, LUMBAGO, NEURALGIA and all ACRES and PAINS. Owing to the cost of Bottles and Ingredients used in the manufacturing of this Liniment, we have had to advance the price a little, but the bottle still remains the same size.

## WORKINGS OF FATE.

MY UNCLE JAMES

My Uncle James, with brooding eye, gazed on the auto whizzing by.

"Those damned machines," he grimly said, "just strew the highway with their dead. I wouldn't ride in one, I wot.

If you'd give me a house and lot. A wheel flies off, the springs collapse, and then where are you auto chaps?

Go ask the undertaker gent, who'll tell you where their pieces went. I do not wish to scorch and flee; a nag is good enough for me."

Then Uncle James rose from his chair and harnessed up the old gray mare.

"Me-thinks I'll go to town," he said, "and buy nine loaves of graham bread."

A piece of paper flew along, when Bess, the mare, was going strong.

She snorted, shied, kicked up her heels, and busted all the shafts and wheels; her big steel shoe hit uncle's dome; an auto brought his fragments home.

My Uncle John took jealous care in following his bill of fare.

For years he cut out pipes and cakes, and eggs and cheese and juicy steaks, and lived on greens, such things as cows throw in when they set forth to browse.

He said I'd fill an early tomb, because the good things I'd consume. If I would reach a green old age, I'd live on lentils, leeks and sage.

He ate some mushrooms on a day, and then in anguish passed away. The mushrooms were the toadstool brand, and so my Uncle John was canned, and I still use my easy chair, and eat all through the bill of fare.

Which shows that rules of life are vain; no human plans are safe and sane.

STRUCK TERROR INTO THE GERMAN TROOPS.

(By Philip Gibbs.)

War Correspondents' Headquarters, Monday, May 6.—The lull continues yesterday was the quietest day since March 21. I described yesterday how our intense harassing fire had caused the enemy, and without a preliminary bombardment, though as soon as they were away their guns were active, neutralizing the enemy's batteries and keeping his supports getting up.

The German garrison on this front belonged to the 19th Division and the 145th Division, and they were scattered about, not in any definite trench system, but in rifle pits and rifle trenches just big enough to give cover to small groups and outposts and machine gun crews.

The Australians went over and cleared out the German pits and holes with bayonets and bombs. The Germans fought for their lives in some places, but at least 150 were killed, according to the estimate of Australian officers, and their prisoners numbered 200 of the 145th and 275th Infantry Reserve Regiments, and included two officers whom I saw this morning and who looked very hard and worn.

They were young men with gaunt cheeks under big shrapnel helmets which reached down to their shoulders.

Reminded for the Hun.

Among the trophies brought back by the Australians, whose own losses were extraordinarily light, were several machine guns and a big trench mortar. It was more than a raid, for the Australian line is now advanced on this side of Morlaucourt to a depth of 84 yards on that wide front, of 2,500 yards. It was an enterprise which will remind the enemy that the initiative and offensive spirit are not entirely on his side. It was, however, only a minor action compared with the battles of last month and those which will come this month when the enemy is again ready to try another big push.

Cleared Them Out.

The Australians went over in no great numbers for such a wide front of attack, which was about 2,500 yards, and without a preliminary bombardment, though as soon as they were away their guns were active, neutralizing the enemy's batteries and keeping his supports getting up.

BRING TERROR INTO THE GERMAN TROOPS.

(By Philip Gibbs.)

The Correspondents' Headquarters, London, May 6.—The lull continues yesterday was the quietest day since the front perhaps that we have known since March 21. I described yesterday our intense harassing fire which has done more damage to the enemy, and undoubtedly interfered with the lines, and organization behind the lines, and made it difficult for him to relieve his divisions, to bring up his ammunition and gather all the necessary needs for the next phase of the offensive. This destructive fire is causing the same effect across the Somme, where the Australians, especially during the recent days, have made life very difficult for the German troops.

Australians Daring Attack.

The Australian achievement about the Somme this morning was a very bold and successful enterprise, which must have been extraordinarily difficult for the German command in the face of the enemy's machine gun fire. Annoying is too mild a word to use for the German troops because for an hour or more it must have been a time of terror for them, and many poor wretches were killed before the light of day appeared.

Cleared Them Out.

The Australians went over in no great numbers for such a wide front of attack, which was a preliminary attack, and without a preliminary bombardment, though as soon as they were away their guns were active, surrounding the enemy's batteries and helping his roads and tracks under fire to prevent his supports getting up. The German garrison on the front between the 199th Division and the 145th Division, and who were scattered about, not in any regular trench system, but in rifle pits and life trenches just big enough to give cover to small groups and machine gun crews.

The Australians went over and cleared the German pits and holes with bayonets and bombs. The Germans fought for their lives in some places, but at least 150 were killed according to the estimate of Australian officers, and their prisoners now number 200 of the 114th and 275th Infantry Reserve Regiments, and include two officers whom I saw this morning and who looked very harassed and worn. They were young men with gaunt cheeks under big helmet helmets which reached down to their shoulders.

Reminder for the Hun.

Among the trophies brought back by the Australians, whose own losses were extraordinarily light, were several machine guns and a big trench mortar. It was more than a raid, for the Australian line is now advanced on this side of Morlaucourt to a depth of 84 yards on that wide front of 1,500 yards. It was an enterprise which will remind the enemy that the initiative and offensive spirit are not entirely on his side. It was, however, only a minor action compared with the battles of last month and those which will come this month when the enemy is again ready to make another big push.

The Imperial Crocodile.

Chicago Herald: The crocodile should henceforth be a sacred animal in Germany. That country's imperial master has patterned after it on several notable occasions. At the beginning of the war he sorrowed over the French, a "great people once but now sadly degenerated." He would be sorrowing still over them if they hadn't given him real cause to sorrow over the fact that they were brave, virile and indomitable. His sadness over the destruction of Louvain is still remembered as one of the finest examples of crocodile tears ever produced in any country. And now he grieves over the destruction occasioned by the present offensive. "What have I not done to preserve the world from such horrors!" he exclaimed with that ready instinct for imperial justification so often exhibited. It would take too much time to enumerate the things that he has not done to preserve the world from the horrors in question. The world records the latest example of crocodile sorrow merely a passing glance of contempt.

MRS. FRANK BERRY SAYS SHE FOUND A CURE IN DODD'S KIDNEY PILLS.

New Brunswick Woman Tells How She Got Quick Relief From Her Spring From Sick Kidneys.

New Jersey, Northumberland Co., N.B., May 14th. —(Special) — Mrs. Frank Berry, a well-known resident of this place, is just one more added to the host of New Brunswick women who are singing the praises of Dodd's Kidney Pills. "Dodd's Kidney Pills have cured me," Mrs. Berry says. "I was weak, emaciated and nervous. I would start in my sleep, and had bad dreams and nightmares. I was unable to do my work, my eyes were dull and heavy, and I was troubled with biliousness, headaches and constipation. My hands and feet were always cold, my skin was dry and harsh, and my face was marked with pimples. "I was always tired and weak, and I knew I had bad kidneys. I took just three boxes of Dodd's Kidney Pills, and they have done me a world of good. They have cured me." Mrs. Berry went right to the root of her troubles and treated her kidneys by using Dodd's Kidney Pills. She got results. If you have any of Mrs. Berry's symptoms, and have not tried Dodd's Kidney Pills, ask your neighbors about them.

Give the "Blue Puttees" a Furlough

Editor Evening Telegram.

Dear Sir,—I am more than pleased to have seen a note in your esteemed paper of April 11th on behalf of the "Blue Puttee Boys." I certainly agree to what has been said regarding getting the remainder, which is very small indeed, home on leave. Some of them are just again out of the firing line riddled by German bullets; some of them wounded once, twice and thrice. I trust, Sir, this note will catch the eye of some person that will take this matter up in the same spirit that Messrs. Mitchell, Blair & Co. did, to bring forward such a number of recruits as they have done in such a short time, to try and relieve those shell and machine gun shattered veterans of the first 500 volunteers. They never had a better opportunity to be granted furlough than at the present time.

Minister of Militia act please, and oblige

SYMPATHY.

May 14-18.

From "Lands End."

Editor Evening Telegram.

Dear Sir,—I am approaching my 75th year, and this is my first attempt at letter writing to a newspaper, but the way things are being transacted at the present time, makes me feel like saying what is in my mind. I took charge of a fishing boat for my father when I was thirteen years old, and since then have been at different kinds of work. I have built my own schooners, rigged them, canvassed them and sailed them, and naturally I take an interest in my country.

During the war we have all been asked to pray for the soldiers and sailors of our King, and to ask that Victory be given their arms. But Newfoundland needs our prayers too and not more so than in the present critical period.

I hear that in the House of Assembly the Government has secured an extension of Parliament for another year, and I make bold to say, Sir, that this is wrong, and that the Governor should not have assented to it. According to law candidates for the House of Assembly should present themselves to the electorates every four years, and those receiving the majority of votes cast were looked upon as the people's representatives.

The four years for the present Government expired last fall, but there was no sign of going to the country for re-election, and to-day the districts are not represented by many of them being without members. Can such doings be allowed under British law?

Sir E. P. Morris, who was our Premier for eight years, saw that he had no chance of being re-elected, and through trickery sold out the Government, getting afterwards a seat in the House of Lords in England. We respectfully ask the Governor now to look after the districts which have no members to represent them. The Coaker Circular has opened our eyes some.

Yours truly,

LANDS' END. Bay-de-Verde, May 13, 1918.

Public Feeling Smothered.

The German losses must be appalling, but the military authorities have a plan for lessening the moral effect of the casualties on those who are left behind in the Fatherland. An ex-prisoner from Rabele, who has been ten years in Germany, states that the Germans, in their preparedness for war, have amply provided against this contingency. When a German soldier is killed, he is killed, and that is enough for the authorities, and must be enough for the relatives. They are simply informed that their husband, son, brother, as the case may be, is dead, no word being sent as to how or where he fell. And what is more, the relatives are forbidden to discuss their losses with anyone outside the immediate family circle, on pain of severe penalties. In this way the public feeling against indiscriminate slaughter is smothered. —Halifax Chronicle.

Household Notes.

Omelets can be made with apricots as well as other things. Never buy spices in large quantities; they lose their flavors. Beeswax and salt will make rusty flatirons as smooth as glass. The use of whole wheat flour is not regarded as saving wheat. Coarse sandpaper is better than sandpaper to scour kettles with. Don't forget that most people eat too much meat in summertime. Fruit grows more important at breakfast as the spring advances. Dry cheese should be grated to use as a relish with various dishes. When making cornmeal mush try adding a cupful of chopped nut meats. Toothbrushes should be dipped in boiling water occasionally to disinfect them. All the time-savers have a double-edged sword in the kitchen these days.

Charged With Manslaughter.

WILLIAM DOOLEY. The case of the King vs. William Dooley, charged with manslaughter, was heard before His Lordship Justice in the Supreme Court this morning, and the following jury—

EVIDENCE. Justice Codner—Sworn and examined by Mr. C. E. Hunt, gave evidence as follows: I live on Pleasant Street. I was acquainted with Robert Penney, and I knew him for about one year. I was keeping company with him from Tuesday, the 19th of March. I met him that night at the corner of Springdale and Pleasant Streets. Dooley did not know him. He turned back and asked me what did I mean. Dooley said to Penney, you're no man, say how. After some words Dooley took off his coat and laid it on the snow at the opposite side of the street. I knew there was going to be trouble. He struck Penney and knocked him down. There was no mark on Penney's face as far as I could see. When Mr. King separated them there was no fighting after that. I am positive that at no time in the

struck him and Penney fell. Penney asked Dooley to let him get up. Two men came along after. Nobody saw what happened up to that time, but me. Mr. King came along after the first blow was struck. I did not see Mr. King till I heard Penney say to Dooley, "You are choking me." Penney was underneath; I took Dooley's hand off Penney's throat. I did not know Dooley before. Dooley had his coat off but Penney did not. He took his coat off before hitting Penney. I did not see Penney strike Dooley before he took his coat off. They were on a bank of snow on the sidewalk. The snow was deep. There was a light above and a light below. It happened near the lower light. Dooley took his hand clear of mine and put it on Penney's throat again. The struggle was about 20 minutes from the time they struck the first blow. After Mr. King separated them I went along with Penney. We stopped three times. Penney was coughing and spitting blood, he did not cough previous to the row. A cabman was coming home while we were standing at Mr. McGrath's gate. It was a sleigh. I saw Penney get into it. I did not see Penney after till he was dead. When I said "You're a mutt," I was speaking to Penney. Dooley was passing at the time right alongside. I never heard Dooley make any reference to taking me to court.

Cross-examined by Mr. Higgins—I am 20 years of age. I belong to Torbay; have lived in St. John's three years. I have two nights a week off and Sundays. I know Middle Street; I am not a street walker. Penney was a long spell knocked off smoking cigarettes. The walking was very heavy on account of soft snow. I knew Penney had heart trouble and he told me he had it had that night. There was a lot of people at the Nickel. We sat underneath the gallery. Penney had a heavy overcoat on. Most of our walking had to be done in the middle of the road on account of the sidewalks being blocked with snow. It was at the corner of Springdale St. and Pleasant Street. Dooley did not curse or swear. He turned back and asked me what did I mean. Dooley said to Penney, you're no man, say how. After some words Dooley took off his coat and laid it on the snow at the opposite side of the street. I knew there was going to be trouble. He struck Penney and knocked him down. There was no mark on Penney's face as far as I could see. When Mr. King separated them there was no fighting after that. I am positive that at no time in the

row was Dooley underneath. Dooley was on top of Penney for the whole ten minutes with his hands on his throat. I did not see Penney strike Dooley. I only saw Dooley strike Penney once. After the struggle they did not show any inclination to continue the fight. Dooley did not say that he intended to call the police and have Penney arrested. I am prepared to swear that Dooley did not come up to me after the row and say those words to me. I did not see how they got up when separated by Mr. King. I know Penney for about a year. Miss George introduced me to Penney. I never met Miss George before she introduced me to Penney. Dooley did not use any bad or vulgar language to me on the occasion. To Mr. Hunt—Penney did not smoke the cigarette right out that night. He threw it away. It was the first he smoked for some time. They were fighting on the bank of snow. I could see everything that happened. After being separated, Dooley put on his coat and asked Penney his name. He walked down the road a short distance and sang out his name to Penney. That's all I heard Dooley sing out. Mr. King went up the hill before Penney and I. He passed us on the way up.

Albert King, examined by Mr. Hunt, said: I am a teamster. I live on Pearce's Avenue. I was passing up Pleasant Street, when Mr. Penney and Mr. Dooley were standing up and had hold to each other's arms. I noticed snow on Penney's clothes. They both had their caps on. It was dark where they were. It was about 20 yards from the nearest light. I first saw them in the middle of the road. I saw the young lady. She was standing quite close to Penney. She got in alongside them. I could not see if she interfered. Dooley struck Penney under the ear, it was the first blow Dooley had his coat off. I mean his overcoat. Penney had his overcoat on. When Dooley struck him Penney fell to his knees. He said to Dooley don't hit me down. Dooley hit him the second time; he was on his knees at the time. It was a light blow. Both were clasped into each other. Dooley was underneath. Dooley put his leg in the middle of Penney's back. Penney said, "Hell! he is choking me." Dooley said, "If you want to have it out with me I will see you on Water Street any time to-morrow." I helped Dooley on with his coat. Dooley said to the girl, "I have a mind to call on you." The girl brushed the snow off Penney's coat. The quarrel was then over. Dooley put on his

coat and passed down the street. I went up the street for a short distance with Penney and the girl. Penney caught hold to the girl's arm and said, "Come on, Dearly, we will dodge home." Penney had a cigarette in his mouth. There was only two blows struck by Dooley. I did not see Penney strike Dooley. I have known Penney for 20 years.

S.S. Ethie Ashore

AT MISTAKEN POINT—CREW SAFE SHIP MAY BE RE-FLOATED. The Reid Nfld. Company received a message from Capt. Goober, from Cape Race, last night "stating that the S. S. Ethie was ashore at Mistaken Point about 5 miles south of Cape Race and was in danger of becoming a total wreck. The message also stated that the crew had succeeded in launching the ship's boats and landing at a place called Watering Cove. A later message received this morning stated that the Ethie was filled with water but was holding fast, and that a number of men with boats from Port-au-Coye, South, had reached the scene and were now engaged in removing the cargo. It was hoped to lighten the ship sufficiently to pump her out, and providing her bottom was not torn up too much an attempt would be made to stop the holes and re-float the ship."

Capt. Spracklin, taking command of the Clyde, early this morning, left for the scene of the wreck and was expected to arrive noon to-day when salvage work would immediately be started. Fortunately the weather is favourable to re-float the ship and with the proper appliances it is hoped that Capt. Spracklin and crew will be successful in their efforts. The loss of the Ethie at such a critical time will come as a severe blow to the trade of St. John's. The Ethie, the property of St. Barbe district and along the Straits of Bell Isle stand to lose considerably, as at the time of the accident the Ethie was heavily laden with valuable freight for points north of Bay of Islands. The wrecked ship only left St. John's yesterday and it is presumed went ashore while feeling her way along in a dense fog.

The Eternal City.

At the Kilbride Hall last evening to a capacity audience a most interesting and enjoyable lecture on "The Eternal City" was delivered by the Rev. Father Pippy. The rev. lecturer after being introduced by the Rev. Pastor, Father Coady, for nearly an hour described the various scenes illustrative of Rome, its customs and historical points as they were flashed on the screen from the lantern manipulated by Mr. P. Murphy.

The second part of the program, a concert arranged by Miss T. Power, consisting of vocal and instrumental selections were rendered, those taking part being Misses Power, Howlett, Jackman, Wadden, and Messrs. J. Walsh, J. McDonald and J. Doyle. A hearty vote of thanks to the rev. lecturer was then moved by Mr. J. J. Doyle, seconded by Mr. E. Connelly and supported by Mr. J. McDonald. A prize donated by a friend in the city towards the church fund was drawn for under the management of Mr. R. Walsh and won by Mr. J. Perks, and the singing of the National Anthem then brought a most enjoyable evening to a close.—Com.

Magistrate's Court.

An assault case in which the defendant is a member of the Forestry Companies and the complainant an old man of 80 years of age, was heard in the Magistrate's Court this morning. It appears that both defendant and complainant had a few hot words at the boarding house a few days ago resulting in the man in khaki hitting the old man on the head with a chair. Much choice language and various gymnastic exercises were in evidence, and after summing up the case. His Honour fined the Forester \$2. For having a vicious dog in his possession, a resident of the Battery was fined \$5 and costs. The vicious brute, which has since been destroyed, attacked a neighbour of the defendant on Monday last, destroyed his clothing and bit his leg in several places.

MUCH IMPROVED—Pte. A. W. Fitzgerald, son of Magistrate Fitzgerald, Grand Falls, who has been for some time suffering from pneumonia, is now we are glad to say, much improved, and is undergoing special treatment at the hands of Dr. Anderson. Pte. Fitzgerald was with "Ours" in the Far East and in France and as a result of severe wounds he has been unfit for further service.

LATEST NOON.

HOPE DEFERRED. COPENHAGEN, May 14. The Germans still are of the belief that they will be able to reach the English Channel Coast, bar navigation of the waters and bombard southern England, and that then it will be easy to begin peace negotiations; according to an interview the Politken has had with a prominent German politician, who is a member of the Reichstag, and who requested that his name be not used. He added that the German offensive thus far had proved a failure owing to heavy losses, and the German command was waiting to obtain more artillery. Germany has lost in killed, wounded and prisoners, three million men, he added.

FOR THE DURATION OF THE WAR. WASHINGTON, To-Day. Complete prohibition of the manufacture and sale of alcoholic beverages during the war, was asked of President Wilson and Congress yesterday in a memorial signed by the National Service and War Time Commissions of 20 Protestant denominations and six inter-denominational agencies.

GERMAN ASCENDANCY IN RUSSIA. MOSCOW, May 10, (Delayed). Through the capture of Rostov on the River Don the Germans have gained control of the Caucasus, the grain districts in the Donetz Basin, and the coal, iron and oil fields. Northern Russia is now cut off from the Caucasus, excepting for a single railroad running through Tzaritsin, in the southern part of the Government of Saratov, which the Germans are now threatening. Coupled with the fall of Sebastopol and the overthrow of Ukraine Rada, and the establishment in the Ukraine of a Bourgeois Government, wholly under German domination, the capture of Rostov has created great uneasiness in Moscow and Piatigorsk.

NOT BY DIVINE RIGHT. LONDON, To-Day. The Austrian and German Emperors, at their meeting at German general headquarters, German newspapers say, according to an Exchange Telegraph despatch from Copenhagen, selected monarchs for Lithuania, Courland, Esthonia and Poland.

SOUNDS WARNING NOTE. NEW YORK, To-day. A warning to the people of the United States against false optimism in this war, especially as regards the great battle in Flanders, was sounded by Earl Reading, British High Commissioner to United States in an address to the New York City Bar Association, here last night. "The crisis is not passed, and it never will be passed until victory is won."

Interesting Paper. At the Board of Trade Rooms this morning, before a representative audience of the members, Mr. Fred Angel read a very interesting paper on "Concrete and Steel Shipbuilding" and the possibilities of inaugurating such an industry in this country. The paper, which took up about 45 mins. of time, was carefully listened to. At the conclusion a vote of thanks to Mr. Angel was moved by Mr. R. B. Job (who suggested that the paper be published) which was seconded by Mr. H. S. Brooks and carried unanimously.

**GOODRICH GARDEN HOSE**

It's worth just the difference between a dry, colorless garden and a fresh, green one—a water-spotted suit and a dry comfortable one—the annual purchase of hose and a perennial one that does not need watching with every bend and twist.

You don't have to buy garden hose annually—if you use "Goodrich." It costs less to pay a little more and get hose that lasts for many seasons.

Try "GOODRICH!"

Even the feel of it is different
