"This volume is mainly derived from manuscript sources, and consists entirely of inedited and uncollected pieces in prose and verse. The Note Books and Commonplace Books of Thomas Moore, together with a large mass of correspondence, and the original draughts and manuscripts of his principal writings have been for some time in the possession of the present publishers and were found on examination to yield so much matter of permanent literary interest, that it was thought advisable to place them beyond reach or chance of loss in case of the future dispersion of these autographs. No piece either in prose or verse appears in these volumes which has

already appeared in any of the editions of his collected works."
