Three Are no Walls Yet In Sight-Five Samples Taken From the 110-Foot

When THE MINER last had an account of the mine, the west crosscut from the 110 foot level had been extended 22 feet, all in solid ore. Tince that time the crosscut has been driven 15 feet, making the total length 37 feet, and no wall in sight yet. The shaft itself is five or six feet wide and this should be added to the length of the crosscut which would make a total width of 40 feet.

This is the exact situation so far as extent of ore opened up is concerned. The next thing is as to the value of this tremendous ore body. There has been some difference of opinion on this subject. In order to get at the truth of the matter THE MINER has obtained from a gentleman largely interested in the company, and whom we believe to be perfectly trustworthy, a statement of some mass of ore in the crosscut. The evi- mine.

The Reason Work Was Suspended on the Property.

of work at the West Le Roi and Josie at formity of course.' a time when the showing on the property was of a most encouraging character. Certain information has come to hand pears that General Charles S. Warren, much less iron and is heavier in cop-B. Jones and C. E. Strikes Clean Ore.

40 Feet Above, the Vein Was 30 Inches Wide.

The Mayflower seems to be all right. the vein was found with 30 inches of excellent ore. It was then determined to worked out, so that eight or ten tons of caused a delay of several weeks, but worked out, so that eight or ten tons of crude ore could be put into one ton of concentrates.

when the plant was in working order sinking the shaft was resumed, and when the 100-foot level was reached a crosscut was started north to cut the ore 40 feet below the upper level.

It is not yet known how wide the ore is in the lower crosscut, since the men have just got into it through the footwall. The vein stands up pretty straight and the indications are favorable. Some of the ore brought over to THE MINER office looked very rich, though appearances do not always tell a true story as to Trail Creek ores. However, there is not much question about Mayflower ore since it has always run high. The smelter returns on the first shipment from the mine were \$56 in gold and

W. S. Weeks, Secretary.

DIRECTORS.

In addition to the Officers, W. D. Barclay, Esq., of Lethbridge, N. W. T.; T. P. Conybeare, Barrister, Lethbridge and Ernest Kennedy, Esq., Rossland.

Superintendent, J. L. PARKER, M. E.

Description of Property.

The property consists of three claims situated between Wild Horse and Porcupine Creeks: The Parker, Old Bill and Light Heart, Cabins and a blacksmith shop have been built and development is being actively pushed. A crosscut has been driven from the footwall on the Parker and has cut through four feet of gouge and two feet of the vein. A prospect shaft has also been commenced which can afterwards be used for air and is at present being sunk in the gouge on the footwall.

Assays Obtained.

Sample No. 1, surface, \$2.20 gold; Sample No. 2, depth 9 feet, \$5.60 gold and 2 oz. silver; Sample No. 3, depth 15 feet, \$13.00 gold.

Extract from Report.

J. L. Parker, mining engineer, reports as follows: "As requested by you I have examined The Dundee Gold Mining Company's property near Wild Horse creek and beg to submit the following report: These properties are situated in a rich gold bearing area between Wild Horse and Porcupine Creeks, West Kootenay District. The vein which is of quartz runs through the three claims of your property and is fifteen feet thick carrying gold and silver values and is also a fissure vein. I consider the property a very valuable one.

Description of Property.

The company owns the Trail Hunter and Cromwell mineral claims. The Trail Hunter is situated in the South Belt about 13/4 miles from Rossland and about 3/4 of a mile from the railroad on the Red Eagle. A strong iron-capped vein crosses the property and in the bottom of an 18-foot shaft there is a fine showing of ore. A wagon road has already been built to the property and development work will be pushed as rapidly as possible. Assays \$20 per ton.

The Oromwell is a full claim located on the North Fork of the Salmon River and joins the Lizzie B. and Porto Rico, two claims which were recently sold for \$63,000 and \$45,000 repectively. Assays have been obtained from the surface of the Cromwell running as high as \$140 in gold per ton.

It is the intention of the company to push development as rapidly as possible and has placed the unusually large sum of 500,000 shares in the treasury for that purpose.

The company is now offering the first block of stock at the low price of

Three and a Half Cents.

Shipments of Ore. From January 1 to January 9 inclusive the ship

lumbia & Western railway to the Trail smelter.

PEOPLE TO BE REMEMBERED.

The Nelson Tribune makes the report of the collector of this district on the exports of ore and matte for the month of December still more interesting and instructive by comparing it with the report of exports of ore and bullion for December, 1895. The exports of ore and matte from West Kootenay for December, 1896, amounted in dollars to \$481, 200, excluding the ore and concentrates shipped out by the way of Nakusp and Revelstoke, these being entered at New

The value of the ore shipped from West Kootenay in December, 1895, was \$96,947. The value of the bullion was \$19,774, making a total of \$116,173, or less than one-fourth in value of the shipments for the same month in 1896 In other words, the shipments have more than quadrupled.

The Nelson Tribune is authority for the statement that the present month will make a still better showing than December, because the value of the exports of ore and matte for the first five days of the month amount to more than \$100,000. This is at the rate of about \$600,000 for the whole month, or at the rate of over \$7,000,000 for the year.

We ask in all candor if this is not a good showing for West Kootenay? We made a rate of \$5.50 per ton on ore to No. 314. commend these figures to such people the Nelson smelter from all points on as the editor of the Canadian Mining the Nakusp & Slocan road. This is a Review, his brother-in-law Hardman, very important announcement. The and the Hon. as its centre. This division into counties would, we mine

believe, be satisfactory to the vast majority if not the entire population of

provincial government it has unusual a ratio corresponding to the measure of trict. significance. With such a program Premier Turner would come perilously near to stealing the opposition thunder. It would do much to disarm or at least mitigate the present hostile attitude of the people of Kootenay to the Turner regime. If accompanied by a redistribution of seats which took due cognizance of population and not of ministerial ant return of Premier Turner to power at the next election. Just such a stroke out of the jaws of defeat before now.

THE C. P. R. AND MR. HEINZE.

The report circulated in Trail a few days ago that F. Aug. Heinze had sold had some foundation of truth in it; at least there are circumstances which point to some sort of a deal between Mr. Heinze and the Canadian Pacific railroad people. It is known that Mr. ing Acts Heinze left Trail suddenly last Sunday at the City of Tacoma, State of Washington, U.S.A. afternoon on horseback for Waneta, that lished are: a locomotive met him there and took he left on the first train next morning to develop gold, silver, copper, lead and other

THE MINER has already informed its readers of the elaborate plans of the Canadian Pacific Railroad company touching the establishment of a through line to Trail and Rossland by way Slocan lake, and a new road to be built from the foot of Slocan lake to Slocan ments of ore from mines at Rossland to smelters | Crossing on the Columbia and Kootenay road. The Canadian Pacific is putting itself in position to get its share of the 540 Kootenay business, whether it be in the shape of an incoming haul on freight 1,640 from eastern Canadian points, the transportation to smelters of ore from the mines of Slocan and Trail Oreek. In order to do this it is important that the road make a close alliance

with some smelting plant. There are two possibilities to be considered: one is that the railroad company will make a close traffic and business alliance with Mr. Heinze by which the C. P. R. cars can run over the Columbia & Western tracks from Robson to Trail and Rossland including a contract for the treatment of all ore the larger part of it, which the C. P. R. shall bring out of the Slocan Lake district; the other is that the C. P. R. people will buy out the Heinze smelter. more probable. The C. P. R. has just bought out all the steamers of the Col-

umbia & Kootenay Navigation company in the Province of British Columbia, Canada, and and will take possession February 1. It will take a good deal more money to buy out the Heinze railroads and the Heinze smelter, but the prize to be secured is far larger and as far as credit is concerned the C. P. R. probably has all it needs for an emergency of this kind. THE MINER is of the opinion that something important in the direction may be announced at any time.

A SIGNIFICANT ACT.

The Canadian Pacific railroad has

iberal Association Has Elected Officers for 1897-Secretary Will Correspond With Other Organization in the Province for Harmonious Action.

There was a good attendance at the and absolu neeting of the Rossland Liberal associaion, held Tuesday in Paterson, Johnson & Co.'s office. J. M. Martin was elected should be chairman, and in a brief address he south. W stated the object of the meeting. Sec- approve the retary A. N. Paterson read the proposed of these vie constitution and bylaws of the associa- whether he tion, clause by clause, and some amend- sitionist, to ments were made.

All persons over 18 years of age, whether British subjects or not, are eligible to membership upon the payment of the annual fee of one dollar. This provision was inserted in the bylaws to secure the admission of such American citizens as have not been in people. Canada the three years required by law to become British subjects, but who deire to promote good government and to

study our political system. Judge Forin, having on his elevation to the bench resigned his office as president was decided to elect new officers for the year 1897. The voting was by ballot. election of officers was as follows: J. M. Martin, president; J. H. Good, vice-president; A. N. Paterson, secretarytreasurer and Messrs. Forin, C.O. Laonde. J. F. McCrae, H. P. McCraney, J. M. Clark and Smith Curtis, executive

Speeches were made by the various officers elected and a resolution passed declaring that it was the sense of the meeting that there was a great want of a party in provincial politics with a platform advocating honest, economical government and advocating many reforms urgently needed by the whole province and particularly the mining districts, and that the hope of speedily effecting such reforms lay in having a well organized party appealing to the people for support on well defined issues and that it was the duty of the liberal party to come to the front and true to its historic past undertake to accomplish these \$500

reforms. The secretary was instructed to correspond with other provincial liberal associations and assist in bringing into active existence a well organized liberal party in the province.

It is proposed to hold meetings of the association on the second Tuesday of each month. A SENSIBLE PLAN.

Proposition to Divide West Kootenay Into Four Counties. Vancouver World: THE ROSSLAND MINER, on general principles we believe, is finding fault with both the federal and

provincial governments for alleged laxity in attending to the wants of several sections of Kootenay. The wonderfully rapid development which has taken place in and about Trail, Rossland, Nelson, Kaslo, Sandon and other points within even the year now drawing to a close has been such as to occasion surprise in some quarters and admiration for the possibilities of the country in others. So far as the federal government in the past has been concerned no one will deny the charge that it did not fully rise to the situation as regards the sums to be voted towards much-needed mprovements in the upper well as the lower stretches of the Columbia river, and extending aid towards the construction of railways. We be- T McDonal

lieve the government now in power to be thoroughly imbued with the greatness of that country, and that it realizes to the utmost the responsibility which rests upon its shoulders in legislating and James I for a territory which has jumped into prominence by leaps and bounds to a degree, indeed, hitherto without a parallel has no inter in the history of the Dominion. Kootenay does not desire to be spoon-fed. Its wants are such as to demand prompt attention, and these, so far as the Ottawa administration is concerned, we are persuaded, will be duly considered and granted, in so far at least as they may be

regarded to be in the public interest. But it is from the government of the He Was province that substantial reforms must come. Our belief is that Western Kootenay is too unwieldy to be looked after The ballo by a couple of gentlemen, no matter how ator toda devoted they may be to the interests of populist. their constituents. It is through the republica people's representatives that govern- 14; T.F. ments legislate in behalf of the require- son, dem ments of any particular section. The sary for a interests of Southern Kootenay are not moved for identical with those of the northern part en. The of the district. In fact there is no sim- votes in ilarity between either South, Centre or Clagett. Northern Kootenay, hence the desira- will be bility of the readjustment of the whole. taken ton There will be sufficient territory, population and business for an independent district, with Rossland as the county seat, containing the public offices. Then Among t there is a large and important country in the he tributary to Nelson, for which t would be the centre. The Slocan, States se which possibly will yet be the most important part of the interior, should likewise be set apart as an independent ludicial, registration and municipal dis- dealer of trict, with either Kasle, Sandon or New years wit Denver as the principal town. The sec- suaded tion north of that and adjacent to Revelstoke would form another very import-

ant county, to which should be given all them and the civic machinery necessary for com- ment as a plete autonomy. We are aware that the cost of civil government would be increased. That, however, is a small matter when compared with the requirements of the people and the necessity for iffording all portions of the province greatest possible facilities for the p and expeditious transaction of public business. The exigencies demand such a change as we are suggesting, and if the government is wise in its day and generation it will see to it that the present unwieldy and very unsatisfactory conditions are abolished, and that as speedily as legislation will enable its

Prospectus of

Wentworth's The Canadian Gold Fields Great Clothing Store, The Canadian Gold Fields Syndicate, Ltd.

Incorporated December 9th, 1896, Under the Imperial Companies Act, (1862.)

An Exploration and Mining Company.

Head Office,

Rossland, British Columbia.

OFFICERS: HOWARD C. WALTERS, Rossland, B. C. President and Managing Director - JAMES CLARK, Supt. War Eagle Mining Co., Rossland, B. C. First Vice-President and Advisory Director J. C. McLAGAN, Vancouver, B. C. 5 Second Vice-President J. C. DREWRY, Rossland, B. C. Secretary-Treasurer CHAS, P. ROBBINS, Rossland, B. C. Consulting Engineer, JOS. H. ADAMS, Rossland, B. C. Mine Superintendent

DIRECTORS:

HOWARD C. WALTERS, JAMES CLARK, J. C. McLAGAN, J. C. DREWRY, JOSEPH H. ADAMS, DUNCAN McMILLAN and W. J. NELSON.

> CLUTE & NELSON, ROSSLAND, B. C. SOLICITORS:

THE BANK OF MONTREAL AND THE BANK OF BRITISH NORTH AMERICA. BANKERS:

CAPITAL \$1,000,000.

Divided into ten million shares of the par value of ten cents each. All the shares are Treasury Stock, there being no promoter's shares. Shares sold only at par.

Issued by authority of the board of directors.

INTRODUCTORY.

The prime object of investment is profit. The greatest and most speedy profits are gained from successful To be attractive, an investment must promise not only profit, but permanence and security.

The Canadian Gold Fields Syndicate, Limited, has been organized to make money for its shareholders by the successful conduct of a permanent, general mining business throughout the Dominion of Canada In the matter of organization, objects and working plan, every sound principle and wise precaution which extended experience could suggest has been duly considered.

SPECIAL FEATURES. Ample working capital has been provided for, thus obviating the \$2.10 unpleasant necessity frequently encountered of voting increased capital

Every share of the capital stock is "treasury," devoted to profitable accomplishment of the Syndicate's objects, there being no promoters' No personal liability can possibly attach to purchasers of shares of the Canadian Gold Fields Syndicate, Limited, beyond first cost, because the Syndicate shares are non-assessable and will not be sold below the

The dividend-sharing capital stock will be limited at all times to the number of shares actually outstanding, the unsold shares lying dormant in the Treasury until sold to meet the Syndicate's working The Canadian Gold Eields Syndicate, Limited, will not, at any time, risk all or any considerable portion of its shareholders' money upon the success or failure of a single mining operation. On the contrary, it will, through capable, trustworthy agents and correspondents, be at all times on the alert to secure control of the most attractive mining properties long enough to enable thorough investigation before any considerable amount of money is invested

By this method the Canadian Gold Fields Syndicate, Limited, will be enabled to secure the most valuable mines offered without becoming "top heavy" through the acquirement of a long list of undeveloped properties too interesting, perhaps, to be readily abandoned, and requiring the expenditure of much time and money before their real values can be proven.

GENERAL OBJECTS.

The Canadian Gold Fields Syndicate, Limited, is empowered by the great Imperial Companies Act (entitled "The Companies Acts, 1862, (Imperial)," and Part 1, of the Companies Act of the Province of British Columbia, to explore, acquire, develop, equip, operate, buy, sell and incorporate mines, mining and milling properties, and to deal in mine products, mining shares, machinery, etc., in fact to conduct a general mining business in every sense of the term wherever desirable opportunity is offered, each shareholder participating in the profit arising from every transaction of the Syndicate.

INITIAL BUSINESS.

The Canadian Gold Fields Syndicate, Limited, begins business with the control and active development of the Sunset Group of gold-copper mines, immediately adjacent to the Columbia & Western and Red Mountain Railways, the town of Rossland and the great dividend payers of Also the "Jennie," a high grade silver, lead and gold property, on the line of the Kaslo-Slocan Railway, in the great Slocan District.

The Syndicate is willing to have the intelligence and integrity of its purposes, as well as the grade of its business, determined by the character of its first operations. Red Mountain.

THE SUNSET GROUP.

Comprises the Sunset (No. 2), 33 acres, and Alabama (practically the same area), mineral claims, so situated between the "Deer Park" and 'Homestake" as to be necessarily traversed by the ore veins of several able for some time past. Big Three and The Sunset has been under active exploration for the past three lumbia river, and extending aid towards the construction of railways. We believe the government now in power to lieve the government now in power to lieve the government now in power to level the construction of lieve the government now in power to lieve the government

LET THE RESULTS SPEAK. When the organizers of the Canadian Gold Fields Syndicate Limited, secured the Sunset group the discoverers had developed the panies.

Value.

Price.

Fact that at least one strong ore vein traversed the Sunset claim. The new operators occupied the month of October in surface exploration alone, principally, 500 feet of the course of this ore vein. Openings were made ranging from a few inches to 25 feet in depth at intervals throughout the distance manded the residual distance man throughout the distance named, the vein material

view to selection of the most favorable place for sinking a working shaft on the Sunset ore vein.

During this preliminary work numerous assays were made, usually of the richest looking minerals encountered, because "if the best would not assay, the poorest could scarcely be expected to do so." The assay results ranging, in the month of November, from \$3.20 to \$69.50 in gold, silver and copper per ton, the highest results being obtained near the west end of the 500-foot section included in the preliminary examination.

The shaft site was finally located at the extreme east end of the 500-foot section, near center of the claim, because, although no high or even satisfactory assays were gained at that point, the local conditions, including remarkably well-defined wein structure, appeared most favorable for early, profitable results.

This shaft was sunk about 25 feet in November; at the surface the the best assay result obtained was \$4 in gold per ton, the vein being 18 inches to 2 feet wide. During development the vein rapidly widened to 4 and 5 feet, with assay values ranging from \$2 to \$50.40 in gold, the average for November being \$15, in gold, per ton.

During the first half of December the shaft has been sunk an additional 20 feet; the vein has carried from 2 to 5 feet of ore, and the assay values have ranged from \$12.80 to \$56 in gold per ton, the copper and silver present not being tested, the average gold value yielded being \$32.14 per ton.

A SPLENDID AVERAGE.

And yet the well-defined vein, with two clean cut, almost vertical walls, the ore coming away freely from each side, and the character of the Sunset ore, a striking duplicate of the best product of the Le Roi-War Ragle group, is, if possible, more important and satisfactory than the rich values present, for the reason that a well-defined vein filled with mineral similar to that contrains in the Sunset cutting the dispite with mineral similar to that occurring in the Sunset, cutting the diorite as does the Sunset vein, has never failed in the great Rossland gold-copper belt to yield greater values and larger ore bodies with depth,

SHIPPING ORE.

From the ore extracted from the lower 12 feet of the Sunset shaft, shipping ore, that is ore carrying \$15 or more per ton in all values, can readily be selected in quantities. Indeed, assays of the month indicate that the Sunset product, roughly hand selected, as are all of the ores of the district before shipment, will grade up to \$40 to \$60 in gold per ton. WONDERFUL CAPABILITIES.

The wealth yielding capabilities of such a property as the Sunset can scarcely be estimated. The results gained from the first few months operations of the famous War Eagle will afford an idea. Indeed, all of the present conditions in the Sunset are strikingly similar to those of the War Eagle just two years ago. In December, 1804, the War Eagle, then to all intents, merely a first-class prospect, made its first ore shipment, and in less than one year yielding upward of \$350,000 profit. War Eagle shares, worth perhaps 15 cents in January, 1895, rapidly advanced to \$1.50, above which figure they have since remained.

FURTHER DEVELOPMENT.

The Canadian Gold Fields Syndicate, Limited, will vigorously conment of the Sunset. Plans and sp ing made for a steam hoist, air compressor, and four air drills to be used in the Sunset. Until this equipment has been completed, development will be continued by hand, and the shaft will be sunk to the greatest depth economically possible by that method, or perhaps 75 feet. A level or "drift" will then be driven on course of the vein west-

ward from bottom of the shaft.

This level extended to a point beneath the west end of the 500 feet of ground included in the preliminary surface exploration where the rich assays in October, ranging as high as \$69.50 per ton were obtained, will have, perhaps, 200 feet of ore ground overhead; it will also have opened up the vein between the two points so that the overhead ore can be economically extracted.

LEGITIMATE POSSIBILITIES.

Judged by values obtained in the Sunset shaft, the legitimate wealth-yielding possibilities of the 1,000 by 1,500 feet of ground contained in the Sunset may be fairly illustrated as follows:

A block of "ground" 100 feet long by 75 feet deep, average width of ore body four feet, will yield 30,000 cubic feet of ore. Deducting one-third for inequality of surface and irregularities in the vein and 20,000 cubic feet remain. Allowing eight cubic feet of ore "in place" to the ton, 2,500 tons of ore would be produced, or, at \$40 per ton, \$100,000. Allowing \$15 per ton for mining, freight and treatment charge, and \$62,500 profit would result from the trifling bit of surface ground included in this illustration.

ONLY A BEGINNING.

Assuming that the results named in the illustration have been gain ed, the whole would be a mere bagatelle in comparison with the profityielding capabilities of the lower levels, which will be opened up as soon as the Sunset steam plant can be put in place; then the shaft will be continued steadily downward, horizontal levels being driven east and west on the course of the vein from each 100-foot station in the shaft, each set of levels thus driven opening up an additional block of ore ground 100 feet deep for economical ore extraction.

OTHER WORKINGS. When the Sunset has been equipped and placed in proper working condition, exploration of the Alabama will be taken up and thoroughly

accomplished; also in due time development and equipment of the "Jennie" on the line of the Slocan-Kaslo railway, will be begun and istelligently progressed. THE JENNIE. This claim occupies 1,500 by 1,500 feet along the course of one of the best defined ore veins in the famous Slocan. It has already been devel oped to the depth of 40 feet by a shaft sunk in the well defined vein of silver, lead and gold ore. The clean ore from this shaft assays \$80 and upwards, in all values, per ton. Samples from an irregular seam of grey copper, occuring on the footwall of the Jessie, frequently assay upward of one thousand ounces (\$650) of silver per ton.

The dividend yielding record of the famous Slocan mines is too well established to require special mention, and the pronounced values of

established to require special mention, and the pronounced values obtained from the Jennie prove that, under development, that property may confidently be expected to prove a paying mine.

HOWEVER, One of the strongest claims of the Canadian Gold Fields Syndicate, Limited, to the favor of intelligent investors is based upon the fact that the Syndicate will not pay a considerable sum for any property until by thorough investigation substantial merit, warranting the price, has

CAPITAL STOCK. The Canadian Gold Fields Syndicate, Limited, was incorporated December 9, 1896, with ten million non-assessable shares, par value so cents each, every share being "treasury," there being no promotes shares, and every share to be sold at or above par.

Numerous decided advantages are thus gained by purchasers of the A. Two million shares sold at par will afford sufficient capital to develop, equip and pay for the properties now in hand.

B. The remaining eight million shares will lie dormant in the Sym dicate's treasury, an ever ready emergency reserve, available at all times either for purchase of additional valuable properties for the Syndicate or for protection and promotion of the interests of shareholders.

C. Except as this reserve is drawn upon, the actual dividend sharing and voting capital stock of the Canadian Gold Fields Syndicate. Limited, will consist of but two million shares, or at par, I w

Thousand Dollars. D. The advantage to shareholders of dividends paid upon two handred thousand dollars as against dividends paid on one or two millions of dollars will be seen at a glance.

E. Two hundred thousand dollars, proceeds of the first two million shares sold at par, expended in development, equipment and purchase of the Sunset group and the "Jennie," will greatly enhance the market value of all the Canadian Gold Fields Syndicate shares.

P. Therefore, each succeeding offering of Syndicate shares will bring an advanced price, thus increasing the actual working capital of the Canadian Gold Fields Syndicate, Limited, from the nominal sum—one million dollars—to an actual working capital of five or more millions of dollars.

G. This cannot be gainsaid, because the results necessary to increase the market value of a one dollar share, sold at 10 cents, up to 50 cents or \$1, will as readily advance the market value of Canadian Gold Fields Syndicate shares sold at par, 10 cents, to par and a premium of from 40 to 90 cents.

H. Great and increasing market value will also be given to Canadian H. Great and increasing market value will also be given to Canadian Gold Fields Syndicate shares by reason of the sense of security and stability arising from knowledge of the magnificent treasury reserve.

I. This sense of security and stability is intensified by the positive knowledge that every share of the Canadian Gold Fields Syndicate, Limited, paid for at 10 cents is actually fully paid and non-assessable—absolutely no possible further liability attaching to the holder.

J. The entire list of Provisional Directors and officers of the Canadian Gold Fields Syndicate, Limited, is composed of men experienced in every line of business entering into the successful management of the Syndicate's affairs; so that whether sharpening steel or using a miner's tools, or conducting the details of a large financial transaction be an emergency to be promptly met, more than one member of the official Board of the Canadian Gold Fields Syndicate, Limited, is fully competent to step into the breach and do expert work.

SHARE ALLOTMENT.

Subscriptions are now invited for the fully paid, absolutely non-assessable shares of the Canadian Gold Fields Syndicate, Limited, at 10

No order filled for less than 500 shares. The right is reserved to advance the price or withdraw these shares

Upon application persons desiring to purchase large blocks of these shares may arrange to pay in installments.

Orders and remittances may be sent direct to THE WALTERS COMPANY, (Ltd, Ly.). Official Brokers of the Canadian Gold Fields Syndicate, Limited, at Rossland, B. C., or through any bank or responsible broker. When preferred shares will be sent through bank with draft attached for collection. A pamphlet, setting forth the powers given to the Canadian Gold Fields Syndicate, Limited, by the Imperial Act, as set forth in the arti-cles of Association and By-Laws, will be furnished shareholders on ap-

more more many Description of Property.

The Bluebird mineral claim covers about fifty acres and is situated on Green Mountain, four miles northwest of Rossland and about a mile from the Gold Star mine. Considerable prospecting and surface work has been done on the property disclosing a wide and strong vein running through it from east to west. At one point a pit has been opened for a depth of four feet and a length of about eight feet. This cut is all in vein matter, showing no walls at either end. Assays from the ore taken out of this cut ran from \$3 to \$7 per ton in gold.

manne manne

Plan of Development.

The management proposes to start a tunnel on the vein beginning at the crosscut above described. The ground slopes sharply at this point and a depth of 100 feet will be gained in driving the same distance. When the hundred foot station is reached crosscuts will be driven both ways to determine the width of the ore body.

CHARES. A small block of stock will be put on the market at

Francis Lynde Stetson, president of the Cataract Power and Conduit com-

\$16,000, and about half of that amount has been paid. The company is steadily pursuing its original plan for developing the property, the first of which is to crosscut the vein at a depth of about 100 feet, by means of a tunnel in the hill side. This tunnel is now in about 140 feet. The first 42 feet were in limestone, but the last 98 feet have been continuously in ore, so that an idea may be gained of the enormous extent of this ledge. The

the Maintenance and Enforcement

London, Jan. 13.—The Chronicle's G Washington correspondent says: Secretary Olney, replying to a question of the Russian minister, M. de Kotzbue, as to whether the arbitration treaty with England was offensive and defensive or anything in the nature of an alliance, said that the question might be answered yes and no. That in the ordinary diplomatic acceptance it was not an alliance, but that it is an alliance in support of the Monroe doctrine, which England recognized by the terms of the

Venezuelan treaty. "If the arbitration treaty is ratified," Mr. Olney said, "it practically makes Great Britain our ally for the mainten-ance and enforcement of the Monroe

doctrine." The correspondent of the Chronicle, commenting on the above, says: "Mr. Olney recognizes that England is the more natural ally of America than Russia, whose hitherto professed friendship for the United States is merely hatred of England. It is probable that Russia will do her best to persuade the senate not to ratify the treaty."

The Chronicle in an editorial regards

the foregoing matter as of the deepest importance, and says that it desires nothing better than a that Russia should take the course indicted, saying: "The scales will then fall from America's

ALL SORTS OF OPINIONS.

Views From Many Quarters Regarding the Arbitration Treaty. London, Jan. 12.—The Norddeutscher Algemaine Zeitung, according to a Berlin dispatch to the Standard, thinks the European powers are not likely to follow the example set by Great Britain and the United States in the arbitration treaty. "Ordinary diplomacy," it says, "will suffice to settle money disputes, while territorial questions are of very different importance to Europe than to England and America, who are separated by the ocean."

The Courier thinks that the treaty imposes great obligations upon America and that it should in future not tolerate filibustering expeditions to Cuba. The Daily News' Paris correspondent says: "Next to England with no great

ROSSLAND MINING MARKET.

A week ago THE MINER drew attention Novelty..... Donald, B. C., Jan. 11.

Editor Miner—Sir: Will you kindly inform me through your valuable paper inform me through your valuable paper have a most beneficial effect. A survey Red Mountain-View. statement as to the price at White Bear..... for the development of such property. statement as to the price at which the mine was sold, is correct, should this be the case I think the matthough rumors have been in circulation which put the price away below the figures named by us, \$850,000. A survey of the listed stocks for the past week shows many notable changes.

The only difference between promoters stock and treasury stock lies in this. When a company is organized, say for \$1,000,000 in \$1 shares, the property which may be one or more mineral claims is usually deeded to the company for the entire stock. The property may be worth anywhere from \$100 to \$1,000,-000. The stock is taken is full payment of the claim as a rule. If the stock is taken is full payment of the claim as a rule. If the stock is taken is full payment about the price away below the figures named by us, \$850,000. A survey of the listed stocks for the past week shows many notable changes. Beaver, after dropping two or three cents, has recovered its old price, 7½ cents. Big Three has been largely bought in the local market and is becoming quite a favorite with most investors and speculators. Crown Point is still quoted at 40 cents, though this is believed to be a few points above the price at which the new Consolidated War Eagle company proposes to accept the stock. Deer Park is very strong at 24 cents. Eric is off a cent sunshine. though rumors have been in circulation

THE GOLDEN DRIP MINE.

The Golden Drip is situated in the free milling belt of the Trail Creek camp, adjoining the O. K. and I. X. L. It is an old location, has the right to follow the dip of its veins through its side lines and is crown granted.

SHAREHOLDERS PROTECTED.

Not only is the stock of the company fully paid and non-assessable, but by a special provision of the by-laws no debt can be incurred beyoud the amount of money actually in the treasury to meet it.

CHARACTER OF THE PROPERTY.

About \$7,000 has already been expended on the mine. It is therefore more than a mere prospect. It was determined not to ask the public to subscribe to the treasury shares until the value of the property was established. This has been done by running a main working tunnel 180 feet, by the making of an upraise from the tunnel to the surface and by the driving of about 50 feet of drifts. In doing this work three distinct veius were encountered varying in width from 12 inches to four feet. The ore found in these veins is a free milling quartz, free gold being seen from tine to tine. The value runs from \$7 to \$40 in gold—the average being about \$18. Drifts are now being run on these ore bodies and ore taken out for milling.

FORMATION.—The general formation consists of granite, diorite and syenite, with dykes of porphyry running parallel with the granite, the trend being almost due north and south. phyry running parallel with the granite, the trend being almost due north and south.

Vein or Ledge.—The vein or ledge is of the same character as those found near Rossland, known in a general way as "iron capping," the gangue consisting of diorite mixed with quartz, carrying arsenical iron and iron pyrites and copper chalcopyrites, more or less on the surface. At the discovery there is a small outcrop near the hanging wall which is well meralized, but in bunches. This however, is a good indication of what may be expected upon development, as samples of this have however, is a good indication of what may be expected upon development, as samples of this have however, is a good indication of what may be expected upon development, as samples of this have given assay values of \$3.50 to \$5.60 gold and from 14 per cent. to 17 per cent. copper and also some given assay values of \$3.50 to \$5.60 gold and from 14 per cent. to 17 per cent. copper and is very strong, silver. The principal outcrop is about eighty (80) feet north of the discovery, and is very strong, showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being showing it to be fully fifteen (15) feet in width, and it shows for fully thirty (30) feet in length, being show

Small particles of native copper have been found near the hanging wall at this point. The ledge which is a good showing for surface.

nay district, will visit the various places of most importance in southwest Kootenay before returning to Ottawa to re-Workings.—The only work done on this property at the present time is a small open cut at place of discovery, and a cut made at the principal outcrop as assessment work. This cut was made through the foot wall and into the ledge for a short distance.

GENERAL REMARKS.—This is in my opinion a most promising prospect, and upon develop-GENERAL REMARKS.—This is in my opinion a most promising prospect, and upon development it will prove a very valuable property.

The surface showings of many of the principal mines in the district and in the vicinity of Rossland were not as good as this, and like them it will require development to demonstrate its value. A wagon road can be made almost to the property at a small cost, and by that the ore could be transported to the smelter at Trail, or Northport, Washington, by steamboat, or ferried across the Columbia river and loaded on cars at Waneta, B. C., and from there taken to the smelter at Nelson, Columbia river and loaded on cars at Waneta, B. C., and from there taken to the smelter at Nelson, Respectfully submitted, (Signed)

HARRY GAGER, Mining Engineer.

Description of the Property.

The company owns the Annie Fraction and the Comet No. 2 mineral claims. The Annie Fraction is situated between the California, San Francisco and Black Bear, the latter of which is the property of the great Le Roi Mining & Smelting company and is the first western extension of the Le Roi mine. The vein of the Le Roi can be traced through the Annie Fraction and men at work on this property have tapped an ore chute at a depth of 40 feet from which assays gave returns of from \$14 to \$20. The Comet No. 2 is a full claim, 1500 feet square, and lies about three miles

north of Rossland. It has two strong well-defined ledges running through it. A prospecting shaft now down 10 feet shows nothing but vein matter the whole mass being well diffused with copper and iron pyrites. Assays averaging \$6 to \$8 have been obtained from this showing.

Shares.

The entire capital stock of the company excepting treasury shares has been pooled. The company now offers 50,000 shares of treasury stock at the low price of

Twelve and One-Half Cents a Share.

The proceeds will be used in purchasing machinery for the Annie Fraction.

For shares, prospectus or other information apply to

M. O. TIBBITTS, Secretary-Treasurer. TRAIL, B. C. Or J. W. COVER, Managing Director.

THE C. P. R. IN THE SADDLE.

contains two very important pieces of news. One is that the construction of a railroad by the Canadian Pacific company is to be begun at onc from the foot of Slocan lake down the Slocan river to the Slocan crossing on the Columbia & Kootenay railroad extending from Nelson to Robson.

The other is that a party of Canadian has gone to opposite Balfour on Kootenay lake to begin the preliminary survey for a railroad around the head of Kootenay lake which it is declared is to be a portion of the great Crow's Nest

All this looks very much like the C. P. R. had determined upon an aggressive policy so far as the Kootenays are con- and good judgment. cerned. The line from the south end of Slocan lake is of great importance in the establishment of a chain of quick communication between Rossland and the new mining camps that are starting up all along the east side of the lake. Connection will no doubt be made at Robson with the road now being built from Trail up to that point by F. Aug. Heinze, so that within a few months passengers can leave Rossland early in the morning and be at New Denver and other Slocan Lake points by noon.

But of course the great object of this line will be to facilitate the shipment of ore from the Slocan lake mines. Many of these mines are now becoming notable producers of very rich ore. With the better shipping facilities which seem now about to be afforded the output of the mines will be greatly increased.

The inauguration of the survey for the Crow's Nest Pass road round the south The grade of this ore is unusually high through which the proposed railway is end of Kootenay lake is of even greater for free milling quartz, and THE MINER to be built he is, above all other memsignificance. It means the C. P. R. is confidently expects some substantial re- bers of the house of commons, entitled determined to build and operate the Crow's Nest line. It is now in the field armed and equipped for the great undertaking. On what conditions it will be permitted to do it, if allowed to do it at all, depends on the Dominion government. The issue is now about to be made and we expect to see some very interesting developments in this direction within the next three or four months.

A NEEDLESS MISSION.

THE MINER has already made reference to the self-constituted committee of gentlemen who went to Ottawa to interview Premier Laurier and members of to the figures supplied to THE MINER the cabinet on the necessity of the gov- for the month of December by George ernment doing something to encourage Johnstone, collector of customs for this immigration to Rossland and Kootenay. district. still booming they had better come home and leave immigration to Kootenay to take care of itself. It will not suffer for lack of their attention, as we are in great danger of having more people come than we can find employment

THE MOVEMENT THIS WAY.

The indications all point to a very large immigration into southern British Columbia this year. Many will come from eastern Canada and many will come from the states of Washington, Oregon, California, Nevada and Colorado. Some will be disappointed, but the chances for those who can go out into the mountains and do prospecting work will be excellent. The mineral bearing area of British Columbia is very extensive—five or six hundred miles long and two or three hundred miles wide. This vast region has not been carefully prospected; indeed it has hard-

ly been penetrated and there are many thousands of locations yet to be made and many rich discoveries yet to be brought to light. We know of no similar area of country anywhere else in the world today

which offers such inducements to the prospector and miner. Fortunately, too, the prospector will not have to wait long to find a purchaser if he has something good to offer. There will be capital here in abundance. We shall not only have capital here from the states and from extra.

and that it will go far towards placing Canada in the front rank of nations. We therefore welcome the movement now gathering for British Columbia. It is Pacific surveyors, under Engineer Perry, not a wild and senseless stampede like started. It is not without reason or with 1,750,000 unsold shares. The company will sell a few thousand of these cause. On the contrary it is well ment of a large porportion of the people who come here if they exercise industry

THE FREE MILLING BELT.

The rich strike reported in both the O. K. and Golden Drip will excite renewed interest in the Rossland free milling gold belt. It has been but a short time since the announcement of a rich discovery on the I. X. L. These three properties adjoin one another, but there is reason to believe the free milling gold belt extends much beyond their slope of O. K. mountain for a mile or more. A number of quartz leads have been found on the surface and whenever

turns from this property at an early day. to be heard on this question. The advantage that free milling ores have over the refractory sulphides, which prevail most largely here, is that they coming to the province and thoroughly can be easily, quickly and inexpensively investigating the question for himself treated. If, therefore, the free milling has come to the same conclusion, should belt on O. K. mountain develops into greatly strengthen Mr. Bostock's posithe proportions now indicated there will tion, and we think that government be established an unexpected and surprising element of wealth in the camp. Nest Pass railway can now be secured The present showing is certainly very encouraging.

Exploration, Development, and Investment Co., Ld.

Do not make investments rashly or foolishly. Compare your chances in Our special telegram from Nelson vast increase in the general prosperity of a large number of mines over one mine and in five districts in place of one district. All our properties are reported upon by efficient experts before we We believe the opening of the mines handle or acquire them and if half of them develop as indications lead us to in British Columbia will be the most expect we will pay dividends sooner than any mining company that was potent stimulus which has ever been ever incorporated in Canada. We have our own assay plant, and all ores given to the industrial growth of Canada taken from mines inspected by our experts or from our mines by our developments are treated on our own premises.

Shipping ore on the surface of some of our properties and on these a large number of men will be placed to thoroughly develop them.

A certain amount of capital is required to push this development work and to take advantage of any opportunity of acquiring new properties taken three or four years to get it that presents itself. A large amount of cash is now in the treasury together at 40 cents. Remember we only require a certain amount of cash and when this is subscribed there are no more shares for sale at any such price.

In South Africa shares in such companies that were originally sold at \$2.50 were advanced to \$137.50 in five months and we believe there is no limit to the price to which ours may advance when a few months work has been done on our properties.

A testimony of the stability of our system is the incorporation of many companies on the same lines but this company is the parent and the pattern of them all.

Send your subscriptions with checque to the Reddin - Jackson Co., Ltd., Rossland or any respectable mining broker in Canada or the States or direct to any of our offices at Toronto, Ont., Spokane Wash., or Victoria, B. C. and the stock will be forwarded.

Kind West of Montana.

RUNNING IN THIRTY DAYS dump for the present. Later a mill may be erected for the treatment of it.

Each Day, But Will Only Be Required to Hoist Five Hundred Tons

The Miner has already had a reference to the new hoisting plant now being installed at the Le Roi mine. A more destalled account of it will no doubt be installed account of the camp. The substantial progress of the camp. The contract for this new hoisting plant was let last June to James D. Sword, agent of the lagersoll Sergeant Drill company, of the Ingersoll Sergeant Drill company, and the Dominion Wire Rope company.

On the North Fork of Carpenter creek. Ore shipped two years ago from this property netted \$125 a ton.

Sandon may be the "Sinless City" but no shadow clouds her prosperity. Three doctors have located here in a month. For fear the public may think it an unhealthful place I may say that people seldom die here, they merely grow weary of the hustle and bustle of the busy burg and go to New Denver to die, or recover from the nervous strain. of the Ingersoll Sergeant Drill company, and the Dominion Wire Rope company, and the Dominion Wire Rope company, of Montreal, after competitive bids from the nervous strain.

A lawyer from Vancouver came here to die, of recover ounces. Mr. watson brought down some very pretty specimens of ruby silver. He thinks the clean ore will average to locate, but could not get an office so age 18 inches in width. It is not a big several big concerns in the United went to New Denver.

stroke. The full capacity is to lift six tons on a single rope, but the working capacity will not be much over two tons

will be to raise 500 tons of ore per day a distance of 1,000 feet, although double this work could be done if necessary. The hoisting engines of the great Anaconda copper mine at Butte have cylinders two inches smaller than those of the engine now going into the Le Roi

The gallows frame of the hoist will be erected over the new incline shaft now being put down to the 500-foot level of the mine and will be very massive. It will be 50 feet high and is being constructed of fir sticks 18x20 inches in size, brought here from the coast. These timbers are now on the ground and are the largest ever seen in the camp.

The ore will be brought up in a steel skip, which will run on guides laid on the incline. The skip will carry a little

The building which is to house this magnificent plant is now being erected and will be 40x137 feet in size. Capt. Hall, superintendent of the Le Roi, says the plant will be the largest and most complete west of Montana. If he has good weather he will have it in running order in a little over 30 days, when the cutput of the Le Roi mine will be very greatly increased.

Belt and Boult Did Not Prosecute Charge Against Chief Hewtherne, SPOKANE, Wash., Jan. 9 .- [Special.]-The meeting of the finance committee of the city council called together last evening to investigate the charge of imimmorality against Chief Hawthorne ended in smoke. It was discovered that the committee had never been authorized by the council to proceed with the investigation, and secondly it was found that no charges had been formally pre-

Mayor Belt, who said he had been apprised of the story against the chief, and who repeated it to the committee, and the man Boult, who started the nasty tale, both failed to show up at the meeting, although they had been subpænaed Chief Hawthorne was present, however, and he vigorously insisted that now that his personal character had been attacked the committee in all justice should go on with the investigation in order that he might have an opportunity to clear away the odium cast upon his name by the chief executive of the city.

After considerable discussion had taken place as to the legality of proceeding with the investigation, in which Councilmen Schiller and Thompson favored going ahead, and Councilmen Acquaff, Dunning and Oliver took the negative, upon a vote being taken it was decided by a vote of three to two to adjourn without action.

From remarks passed it was made evident that Thompson will bring the matter no befor the next council meeting

THE FAMOUS RUTH MINE

It Has Been Opened by Over 1,900 Feet of Tunnels.

Shipments Now Average 15 Tons Per Day-Fifty Miners Employed-Sandon Pokes Fun at New Denver.

Sandon, Jan. 9.—[Special.]—English capital is taking an unexpected interest in silver mines, as instanced by the bonding of the Victoria a few days ago for \$25,000, one-third interest in which claim was bough last October for \$1,500. This fact is still further impressed upon us by the purchase by Mr. Foster, an English capitalist, of two-thirds of the

product to the railroad. It can also claim credit for rapid development.
Located in 1892, it has been worked less than two years, but to such good pur-pose that the sale to Mr. Foster was made on a basis of \$250,000 for the property, which consists of four claims, the Ruth, Ruth Fraction, Hope and Despair. No. 1 tunnel is in about 125 feet, and the vein is two feet wide. No. 2 tunnel is 500 feet long and the vein is from six to eight feet wide. No. 3 tunnel is 900 feet long. ROSSLAND AND TRAIL CREEK MINING COMPANY, Ltd. Ly. CAPITAL STOCK \$1,000,000

In 1,000,000 Shares of the Par Value of \$1 each. Shares Fully paid and Non-Assessable. 250,000 in Treasury to be sold for Development Purposes.

Location and Description.

The above claims are situate on the northeast slope of Lake Mountain, in the south mineral belt, three miles southeast from Rossland, midway between that town and the town of Trail, where the smelter is situate, and a short distance east from the Crown Point group, which was lately sold to an eastern syndicate for \$450,000 the largest price ever paid for any claim or group of claims in this district.

The Golden Crown lies southwest of and adjoins the Boulder, upon which considerable work has been done with splendid results, an assay of \$28 in gold per ton having been btained at a depth of 20 feet. The ledge upon which this work has been done on the Boulder extends southwesterly

through the Golden Crown. The Island Bell adjoins the South Bend on the southwest The South Bend is considered one of the most promising mines in the south belt. At 30 feet an assay was had running as high as \$91.46. Three clearly defined leads run northeast to southwest through the South Bend, and can be plainly traced

clear across the Island Bell.

The Golden Crown, Island Beli and Robert Bruce ase adjoining claims, and are separated from the other three by the South Bend, Gold Dollar and Albany.

The ledge from the Deadwood which adjoins the Golden Crown on the west, and which is owned by C. W. Callaghan, Esq., the well known mining expert, runs clear across the Robert Bruce; one of the ledges from the South Bend through the Free Silver; The Emma C. has the Albany ledge, which can be traced to the Imperial and G. R. Sovereign mines; and there is good surface showing on the Southampton.

Facilities for Mining and Transportation.

Fer convenience of location for mining and shipping purposes these properties cannot be surpassed. There is an abundance of timber; and Lake creek, which runs from the summit of the mountain to Trail creek and passes through these claims, provides a bountiful supply of water. There are splendid opportunities for tunneling, and it is the intention of the company to, shortly, run a tunnel to catch the lead upon which the work is now being done thus cheapening the cost of

The property lies within about 3 miles of the Trail smelter.
The Columbia & Western railroad runs within one and a half claims (about 2,000 feet) from the present works, all down grade, thus affording almost unequalled facilities for conveying ore to the cars and thence to the smelter. There is also a movement on foot to erect a smelter on the R. E. Lee or Maid of Erin grounds which are in close proximity to the property. Should this be effected the ore can be treated at the very lowest possible cost. This will admit of the treat-ment of low grade ores which heretofore has been impossible in other sections of the district.

OFFICERS AND MANAGEMENT.

PRESIDENT, ANGUS W. YOUNG, Esq., General Agent for Washington and Oregon of the Mutual Life Insurance VICE-PRESIDENT, C. Q. TUCKER, Esq., Secretary and general Manager of the Duwamish Dairy Companies.

SECRETARY, WM. F. TEMPLE, Esq., Merchant, Seattle, Wash. TREASURER, ANDREW CHILBERG, Esq., President of the Scandinavian-American Bank, President of the City School Board of Seattle and General Agent of Trans-Atlantic Steamship Lines.

GOOD, CLARK & CO., Agents, H. C. McGregor, Local Secretary.

Rossland, B. C., Jan. 1, 1897.

Development.

About November 1st last a cabin was built on the Golden Crown and work commenced by Mr. M. A. Green, an experienced mining man, who had taken a contract to do 100 feet of work on the property. The work thus far performed consisted of a shaft 25 feet deep on the ledge which extends from the Boulder through the Golden Crown. This ledge is about ten feet wide, with strong, well mineralized capping. The work done upon it has disclosed a true lead with clearly defined walls-the hanging wall of porphyry and the foot wall of granite. There are also several open cuts on the Island Bell and Golden Crown. Four men are employed and work is progressing favorably under the supervision of Supt. Henager.

To Investors.

We would say that in determining whether or not they should place their capital in the purchase of this company's stock they should consider:

1. The number of claims owned by the company, and extent of ground to be worked. Purchasing stock in this company with its SIX FULL CLAIMS is like buying in most other companies, which have only one claim, at a little better than 1½ cents. 2. The convenience of situation, the nature of the sur-

rounding claims, and the excellent facilities for mining and 3. The fact that the promoters have not been dependent

upon the sale of Treasury stock to begin development work, but have before offering stock for sale, performed sufficient work to assure themselves and the public that they have every prospect of a mine.

4. The excellence of the company's management and the high standing of its officers.

The agents of the company have leased commodious offices in the block now being built east of and adjoining the Grand Union Hotel on the south side of Columbia avenue in

. As a field for safe and profitable investment the Trail Creek camp is so widely known that it is needless to add any partic-

The completion of the Spokane and Red Mountain rail-way provides greatly increased conveniences for the travelling public, and with the ever increasing number of produc-ing mines that surround Rossland, among which we hope ere long to see the Rossland and Trail Creek Mining Company's mines, the future greatness of this camp is assured, but cannot be estimated.

Full of Gold.

THE B. C. SOUTHERN

How Its Promoters Expect to Acquire Crow's Nest Coal Fields.

Brief History of the Various Acts Extending Its Powers-Its Sweeping Land Grant-Several Alternate Routes and Branches Provided For.

The British Columbia Southern railway was incorporated under the name of the Crow's Nest & Kootenay Lake Railway company on the 28th of April 1888. The charter was granted to Ed ward Humphries of Wolf Creek, Hon. F W. Aylmer, William Fernie, Peter Fer nie, Valentine H. Baker and Edward Bray, all of the same place.

The act of 1890 was amended by sub stituting the name of Joseph Despare Pemberton of Victoria for that of the Hon. F. W. Aylmer and by striking ou the name of Edward Bray. By the orig inal act the company was to commend construction work on or before two year and to complete and equip the same o or before five years from the passing the act. The line was to be from som point at or near the junction of Summ creek with Michel creek in the Kootena district, and from thence by way of El creek to the Upper Kootenay rive thence by way of Cranbrook and th Moyie pass to Goat river to a point o the Lower Kootenay river at or near i

junction with Goat river. By chapter 63 of 1890 the time for the completion of the work was extended which the company was required commence construction on or before three years and complete and equip the same on or before five years from the passing of that act. This act was passed

on the 26th of April, 1890.
On the 26th of April, 1891, the was further amended by changing the name to the British Columbia Southe railway company and power by this la ter act was given to build the railwa from a point on the Lower Kootens river, thence to the Columbia river the neighborhood of Fort Sheppar with a branch line to Nelson via Salmo river; also from Columbia river in the neighborhood of Fort Sheppard to Hop on the Fraser, thence following sour side of Fraser river to a favorable plan for crossing to the city of New Wes minster, thence to a suitable termin on Burrard inlet; also a branch l from Elk river to Tobacco plain Nothing in this latter act is to be con strued to increase the rights, powers an privileges of the Crow's Nest & Koot nay Lake Railway company under the Railway Aid Act, 1896, or to extend the aid granted by said act to the lin authorized to be constructed by this la

By the act of 1893, being chapter passed on the 12th of April, 1893, add tional power was given to the compar to construct as an alternative line a thorized to be constructed from Cri brook to lower Kootenay river, a line railway near Cranbrook by way of t. St. Mary's river, to Pilot Bay, or to Ladeau river; also the undertaking w divided into three sections, known eastern, central and western. The eastern section was to be constructed on before the 31st December, 1896; the c tral section on or before the 31st Dece ber, 1897; and the western section on before the 31st December, 1898; seve other amendments were also made this act and additional powers were c ferred upon the company, namely, operate sawmills, to work mines, m erals, coal and petroleum and to acqu mines; to erect electric works, pov

On the 17th April, 1894, an act passed consolidating the different a On the 17th April, 1896, by char 53, time was again extended for co pleting the road, as follows: East section to be completed on or before December, 1898; central section on before 31st December, 1899, and west section on or before 31st December, 1 By the Railway Aid act, 1890, a s sidy was granted of 20,000 acres per n for a four foot eight and one-half guage and 10,000 acres per mile if guage is less than four feet eight one-half inches, the land to be take alternative blocks on each side of line of railway, each block to have frontage of twenty miles. If the quantity of 20,000 acres per mile i ternative blocks cannot be had the ficiency shall be made up out of a be land five miles in width along the side of Elk river, extending betwee point five miles below Morisey and a point twenty-eight miles a Michel creek and from a belt two one-half miles in width on each sic Coal creek, extending to the sum and from a belt three miles in widt each side of Michel creek and on side of the east and west branch

President Cleveland Submits Anglo-American Treaty.

HE URGES ITS ADOPTION

While Not an Ideal Treaty He Considers it a Good Compromise and a Step in the Right Direction-Text which a difference could arise between of His Message.

WASHINGTON, D. C., Jan. 11.—The following is the text of the president's message transmitting the general arbi- that arbitration, not war, would result. tration treaty to the senate:

"I transmit herewith a treaty for arbitration of all matters in difference between the United States and Great Britain. The provisions of the treaty are the result of long and patient deliberation and represent concessions made by each party for the sake of agreement upon the general scheme.

"Though the result reached may not meet the views of the advocates of immediate, unlimited and irrevocable arbitration of all international controversies, it is nevertheless confidently believed that the treaty cannot fail to be everywhere recognized as making a long step in the right direction and embodying a practical working plan by which disputes between the two countries will reach a peaceful adjustment as a matter of course and in ordinary routine.

tive character, looking to a further ad-vance, and yet it is apparent that the earth and that there ought to be close vance, and yet it is apparent that the treaty which has been formulated not only makes war between the parties to it not only a remote possibility, but precludes those fears and rumors of war which of themselves too often assume the proportions of a national disaster.

Saxon race is destined to conquer the carth and that there ought to be close earth and that there ought to be close alliance between the two great nations. I do not, of course, want to be understood as saying that they should conquer by force of arms, but by their beneficent institutions and superior beneficent institutions and superior the proportions of a national disaster. It is eminently fitting as well as fortunate that the attempt to accomplish re-sults so beneficial should be initiated by treaty. He did not, however, approve kindred peoples, speaking the same tongue and joined together by all the ties of common traditions, common in-stitutions and common aspirations. The stitutions and common aspirations. The trust to the fairness of Queen Victoria. stitutions and common aspirations. The experiment of substituting civilized settling international questions of right will thus be tried under the happiest auspices. Its success ought not to be Final Negotiations Between England doubted, and the fact that its ultimate ensuing benefits are not likely to be limited to the two countries immediately moted all the more eagerly. The example set and the lesson furnished by the for the submission of the Venezuelan concerned should cause it to be prosuccessful operation of this treaty are boundary dispute to arbitration will be sure to be felt and taken to heart sooner made some time this month and mailed RESERVE ST., or later by other nations, and will thus promptly to Caracas. AN HISTORIC EVENT.

British Minister Signed the Treaty First-Its Wide Scope.

WASHINGTON, D. C., Jan. 11.—Secretary Olney in behalf of the United States ing laid before the Venezuelan congress and Sir Julian Pauncefote, on the part as soon as it convenes. Under ordinary of Great Britain, affixed their signatures conditions this date would be Feb. 20, to a new treaty by which, for a term of five years, the two English speaking nations agree to abide in peace and without a resort to arms, all possible questions of controversy being referred to a ber of days and the congress will therecourt of arbitration with the single exception that neither nation surrenders its honor or dignity to the judgement of arbitration. submitted at the opening of the session it must be dispatched from Washington

approving it to the senate.

column. One of the last points not touch questions of vital principle. to be decided was that King Oscar of Sweden and Norway is to act as final arbitrator in case the others fail to agree on a final member of the court.

Sir Julian Pauncefote, accompanied by Lord Gough, proceeded to the state department and were met in the secretary's private office by Mr. Olney and his private secretary, Mr. Blandford, and Carew, a prominent society lady, on the Mr. Crigler, who, as chief of the bureau charge of poisoning her husband with of diplomatic correspondence, has charge arsenic, in a manner similar to that of the drafting of treaties. There were but the culminating of a negotiation covering many weeks, during which a few formalities as the signatures were reached on every phase of the subject.

honor of signing first. Secretary Olney copy of the document in the first space, Secretary Olney immediately placing his signature after that of the ambassador. purchases of arsenic, the use of which This will be known as the British copy she said was an old time habit of her and it will never leave the possession of husband's. Throughout the proceedthat government. Taking up another copy Secretary Olney signed first and selection with the proceeding the proceeding the proceed ings there were references to a mysterious veiled woman, and there was considerable to the proceeding Sir Julian signed after him. This is the able excitement here when it became United States copy and likewise will known that Mary Jacob, the governess remain in the possession of our governit a copy will be made of our original and this will be used in the final exchange of ratifications later on.

Then both of the copies were sealed with red wax. Secretary Olney im pressed his private seal, a simple monogram "R. O." and Sir Julian used his family crest, a lion, and the ceremories were completed. The pen used was a simple broad point steel stub, in a red and black hard rubber holder, but it will be treasured by the owner, Mr. Blanford. The meeting was brief, and upon the retirement of Sir Julian and Lord were completed. The pen used was a Gough, Mr. Olney at once took the signed treaty to the White House for the preparation of President Cleveland's He adds: message transmitting it to the senate. "I am confident, however, that the It was understood during the meeting that his transmission would be made at once, in order that every executive function connected with the treaty should be completed at the earliest possible motor of the possible motor ment. Under these circumstances the among the sick and suffering, and to do treaty and the president's message went anything which will tend to brighten The 12 articles constituting the treaty her majesty's poor subjects."

deal wich subjects which are to be sub-mitted to arbitration and the manner in which the court of arbitrotion is to be constituted. The language used in embracing the subjects before the court has been chosen with the greatest care, the purpose being to make the terms so comprehensive that no question can arise in the ordinary dealings between the two governments which will cause a resort to war. The article which makes national honor also was so carefully framed that ordinary questions which to some extent involve a nation's honor could not be brought within it. In short, the terms of the 12 articles are believed by Mr. Olney and Sir Julian to cover every usual contingency by

the United States and Great Britain. Throughout the negotiations the desire of both the secretary and the ambassador was to make the language so broad that when a controversy arose in would be accompanied by the inevitable knowledge on both sides of the water

A NOVEL SUGGESTION.

Senator Vilas Would Prefer the Queen as Anglo-American Arbitrator.

WASHINGTON, D. C., Jan, 11.—Senators generally expressed themselves a loath to discuss the arbitration treaty between this country and Great Britain on the ground that they had not seen it. Senator Cullom, of Illinois, said he was a believer in arbitration on general principles and hoped the reported treaty would prove satisfactory.

Senator Vilas, of Wisconsin, spoke in similar strain, saying that while he knew nothing of the present convention he was a supporter of any properly directed effort to secure international arbi-zealous in his support of any proper ant movement it must be expected that some of its failures will assume a tentative character looking to a fault and a failures will assume a tentative character looking to a fault and a

The Red Eagle Gold Mining Co.'s Properties

Red Eagle and Red Pole Mineral Claims,

Composed of about 75 acres.

The Red Eagle.

The Red Eagle mineral claim is situated on the east slope of Deer Park mountain, between the Mayflower and Curlew claims. There are three known ledges crossing this property. These veins are known a the South vein, the Curlew vein and the Mayflower vein. The South vein, which has produced some of the richest surface ore ever discovered in the district, is six to eight feet wide with a 24 inch pay streak, assays from which gave returns of \$18 to \$285. This vein was but recently discovered by workmen grading for a tramway across the claim for the sawmill company, and is generally regarded as the most important o recent discoveries in the south belt. This vein is traceable across the entire width of the claim a distance o over 1400 feet. On the Curlew ledge an open cut has been made exposing a vein of ore four feet wide, from which assays of from \$14 to \$161 per ton have been secured. This vein has been exposed by a number of shallow pits and crosscuts for several hundred feet. The Mayflower ledge, from which this well known mine is now shipping such high grade ore, crosses the Red Eagle claim for a distance of 300 feet.

The Red Pole.

The Red Pole is situated one-half mile south of the Red Eagle and east of the Silver Bell mine. The Silver Bell ledge crosses the Red Pole mineral claim. Assays from this vein have shown over \$100 per ton of gold and silver.

Treasury Shares.

The company have secured the survey and are applying for the Crown grant, and will continue developing the property all winter, and fully expect to be able to find pay ore to cover the development almost rom the surface. But to prepare for all mining emergencies and to fully equip the property with machinery we have placed 500,000 shares in the treasury, a limited amount of which we offer to the public at the rate of 10 cents, and when the paid limit is reached the company will close their books and reopen in the course of ten days at an advanced rate for further stock.

WAR EAGLE IS SOLD

Stockholders' Meeting at Spokan Accepted the Gooderham Offer.

NO FURTHER OPPOSITION

Three Bonafide Offers Were Made Fo the Mine and Though the Goode hams' Was Lowest the Managemen Secured Its Acceptance.

SPOKANE, Wash., Jan. 20 .- [Special.] Lively times have been going on in the office of the War Eagle Mining compan today, in connection with the sale of the War Eagle mine to the Gooderha Blackstock syndicate of Toronto. Short before 10 o'clock, the hour set for t meeting, the shareholders began arrive, and soon the spacious offices the company were crowded with big a little stockholders, men holding proxi attorneys for different interests. mining men drawn there by natural terest and curiosity as to the outcome such an important deal.

Before the meeting was called to ord little knots of stockholders gathered the corners and out in the halls to d cuss the matter. That a tremend opposition to the sale of the War Ea to the Gooderham syndicate would velop at the meeting was very evide The minority stockholders, who were the majority so far as numbers w concerned, were emphatic in their nunciation of the proposed deal. If mine was sold they were determin that the most advantageous offer sho be accepted, and they could see I sense in accepting \$750,000 when the could get \$850,000, the latter price he ing been offered by a London syndical which had posted a forfeit of \$100, and offered to put up \$100,000 more

At 10 o'clock the president of the copany, Patrick Clark, called the meet to order and stated that he would pr that some other stockholder should as chairman of the meeting. On mot of George M. Foster, H. L. Frank, Butte, was unanimously chosen. this time it was decided to exclude persons not stockholders, including porters. A few minutes later an journment of half an hour was to to allow Secretary Lucas to arrange stock. When the peng reconverge doors were closed and the outs crowd rapidly dwindled away, although ing to hear the first news from the

There were between 425,000 and 500,000. It was the opinion of t present that the stockholders who f elling to the Gooderham syndicate l a majority and that the sale will made although in the face of a vio opposition from the minority stockho ers. It is hinted that the latter l made arrangements to enjoin the co pany from transferring the property case they are outvoted, while on other hand it is stated that the Good hams' representative has the cash hand and the papers all ready to s and that three minutes after the sa made a telegram will be in Rossland tifying the War Eagle people there turn over the property to Gooderha agent at that place. It will be a c race in any event, and the side wins will have little leeway.

At 12 o'clock the meeting adjour until half-past one o'clock without ling accomplished anything definite. is admitted by many of the opposi that the minority only hope to win i the Clark-Finch party by the much ter offer they can make through London syndicate. Both parties avo any test vote this morning that we have disclosed the strength of the posing forces.

As nearly as can be ascertained propositions that will be submitted afternoon are: First, that made by Gooderham-Blackstock syndicate, offers \$750,000 cash for the mine, all the accumulated money in the ury; second, an offer from a synd of London capitalists, who offer \$85 for the mine without accumu money. The terms of the second are \$200,000 down and the balance

and 60 days.
At 3 o'clock this afternoon the ing adjourned until half-past 7 o' this evening. A committee, consist of Messrs. Clark, Finch, Austin Co. Post and Wakefield, was appointed consider the offers and report which to accept. A third offer for mine was made by Fred Burbridge the Bunker Hill and Sullivan mi Wardner. The amount of his offer not be ascertained at this time.

The Evening Session. The stockholders of the War or rather a majority of them ratifi sale of the mine to the Goode Blackstock syndicate at the meetir night. It was about 8 o'clock the meeting was called to order the committee appointed this aite submitted its report to the effect three bonafide offers were made f

mine. These offers were as follow The Gooderham-Blackstock syn made an offer of \$700,000 cash for mine as it stands today without or credits of any kind. F. E. Henage for a London sy offered \$900,000 to include all and cash; \$200,000 to be paid

and the balance in 40 days. F. E. Burbridge's offer was on the same conditions as to credi cash with a \$25,000 cash paymen in sixty days and the balance in 90
