The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

CHANGES OF THE MOON.

Many persons understanding that the mean time between one new Moon and another is 29 days, 12 hours, 44 minutes and a fraction, imagine that to find the full or quarters of the Moon, they have only to add a half or fourth part of that time ; and when they do not find the changes marked in the Calendar to correspond with this method, they impute it to mistake in the calculation of these changes. It is, therefore, necessary to put them in mind, that the great inequality of the Moon's motions renders the above rule extremely inaccurate, so that nineteen times in twenty, it must fail in giving the true conjunction or change.

LIGHT-HOUSE on POINTE DES MONTS.

Keeper, - - - James Wallace,

Will shew a light every evening from sunset to sunrise, between the first of April and the thirty-first of December inclusive.

The following notice was published by the Trinity House, relating to this Light-House :—

NOTICE TO MARINERS.

That a Light-House has been erected on **POINTE DES MONTS**, (or Cape Monts Pelés) on the north side of the River St. Lawrence, nearly opposite to Cap Chat, the lantern standing one hundred feet above the water.

The Light-House lays with the outermost part of **CARIBOU POINT N. 52°. East and South 52°. West**, by the Compass, and it can be seen over that point and to the Eastward of it.

Ships approaching the light from the Eastward, as they draw towards Caribou Point must bring it to bear **W. by S** ; they will then be in a good fair way, and if necessary, they can near the land by the lead.

After passing Caribou Point, and as they draw towards the Light-House, they must come no nearer than 12 fathoms water to avoid two ledges of rocks, one of which lays **E. S. E.** from the Light, with only 12 feet of water on it ; the other lays **S. W.** from the Light, and **E. S. E.** from the Western extremity of Pointe des Monts, with 16 feet water on it ; but these rocks do not lay farther from the shore than half a mile at low water.

LIGHT-HOUSES.

The Light-House lays with the western extremity of Pointe des Monts N. 64°. East and South 64°, West, and distant about one mile ; and when ships are to the Westward of the Point, the Light-House is in one with the outermost rocks off the Point ; and in day time it forms a bold distinct Land Mark, and on this line of bearing ships are in the best possible fair way for the general purposes of Navigation, whether bound up or down.

For any particular purposes of Navigation, ships may safely stand to the Northward, until the Light bears E. by N. ; they will then be drawing near the North land : and when it bears E. $\frac{1}{2}$ N. it is time to tack ; for when it bears East it will shut in with the High Land, and cannot be seen to the *Southward of East*, and then they will be only one mile from the land, and if they are off *Godbut River*, Pointe des Monts will bear from them E. by S. two leagues distant.

When ships are off Saint Nicolas Harbour, and the light bearing E. by N. they are in a good fair way from the North Land. The S. E. spit of *Manicouagan* great Shoal, the ship and the Light-House are then all in one line of bearing.

LIGHT-HOUSE ON S. W. POINT OF ANTICOSTI.

Keeper—Mr. William Hall.

A Light-House having been erected on the South West Point of the Island of Anticosti, notice is hereby given that a grand Revolving Light, on the Argand principle, was shewn thereon for the first time, on the 25th of August, 1831, and that the said light will continue to be shewn every night from sunset to sunrise. from the 1st April to the 15th December, in each year inclusive.

LIGHT-HOUSES.

When ships are to the Eastward of the Light-House, they may safely stand towards the Island until it bears N. N. W. by Compass—they will then be in a good fair way—and if they wish to make more free with the land, they can do so by their lead. The land trends from the Light-House S. E. by S. or nearly so.

When ships are to the Westward of the Light-House, they may safely stand towards the Island until the light bears S. S. E. $\frac{1}{2}$ E. they will then be in a good fair way from the land, and as before-mentioned, they can make more free by their lead.

Nearly East and West with the Light-House, and about three-fourths of a mile from it, is the outermost part of a *Reef of Rocks* which joins the S. W. Point. These are dry at low water and are the only dangers near the Light-House; therefore a berth of a mile from the Point, is a good fair way.

Sixteen leagues to the Eastward of the Light-House, at Shallop Creek, and sixteen leagues to the Westward of the Light-House, at Grand Bay, and at the Light-House itself, are Depôts of provisions for the use of Mariners in distress, or other shipwrecked persons.

A Light-House has been built on Heath Point at the East end of the Island of Anticosti, but has not been put in operation for want of sufficient funds vested in the Corporation of the Trinity House.

Any vessel taking the boat at any intermediate distance between Quebec and the Church at Batiscan, will pay the full towage, as if towed from Quebec.— If taken in tow between Batiscan Church and the wharf at Three Rivers, to pay three-fourths of the full towage.— If taken in tow between the wharf at Three Rivers and Sorel, to pay two-thirds of the full towage. If taken in tow between Sorel and the Church at Pointe-aux-Trembles, to pay one-half of the full towage; and from the Church at Pointe-aux-Trembles, or any intermediate place above the said Pointe, to Montreal, to pay one-third the full towage. It being understood that when towage is engaged for vessels at Quebec, as they have a preference over others, the full towage to be paid for, whether the whole, or part, or none of the towing is performed,—the deduction made, referring only to vessels for which towage has not been previously engaged at Quebec.

Passengers on board vessels taken in tow, to pay one-half the steamboat Steerage rates.

Masters of vessels to furnish tow-lines and hawsers. Not less than nine feet to be charged as draft water.

The greatest draft of water to be taken as measurement.

Should the masters of the boats, from any just reason, deem it necessary to cast off a vessel, no deduction to be made on the towage, provided they are retaken by the first opportunity.

Vessels towed from Montreal, or any place above Sorel, to Three Rivers, to be charged three-fourths of the towage to Quebec, and from Three Rivers, and above Portneuf, to be charged half towage.

All pilotage to be paid by the masters or consignees.

In the event of any vessel grounding, when in tow, in consequence of being too deeply laden, or from the fault of the ship's Pilot, the detention to be paid for, also the tariff rate for freight taken out.

The proprietors will not hold themselves liable for any damage that may be done to vessels or their warps, either in taking in tow, towing, or casting them off.
Towage payable on demand.
