in the Travelers.

J. F. ALLISON, Agent

### Around Town.

DISORDERLY CONDUCT.—Information

was laid before Stipendiary Magistrate

against several young men and women

of both Amherst and Sackville for dis-

orderly conduct in the Sackville station

on more than one occasion. They were

brought up for examination yesterday

morning and each fined \$1 and costs of

20 days in jail. They paid up.

GOT THERE JUST THE SAME.—The

other day Judge Johnston, of Halifax

sent one Davison to Dorchester for ten

years for larceny. Davison is the col-

ored man who was arrested a few weeks

ago with Northrup on charge of being

implicated in the recent burglaries in

Sackville.

LIFE OF SIR JOHN.—The life of Sir

J. A. Macdonald by Col. Macpherson

will soon be issued by the publishers.

Advance copies of the work show that it

is to be a first class book in every partic-

ular and the sales have been very exten-

sive in all parts of the Dominion. Par-

ties destined to get the copy of the work

should do so at once as the price will

probably advance after the first edition.

A MISAPPROPRIATION.—Some of

the boys about town are laboring appar-

ently under the erroneous idea that the

Post office is a place erected for their sole

amusement. Every evening large num-

bers of them congregate about the of-

fice and inside during the assortment of

the mails that sedate and antiquated

structure strongly resembles a bear gar-

den.

THE ELECTRIC LIGHT.—The Electric

Light company have their new light

station finished and on Saturday the

lights were turned on for the first time

of the new plant. The temporary engine

is not built expressly for lighting and

the best effect of the new order of things

will not be felt until the new engine is

placed in position, which may be some

time yet.

CHIGNECTO HALL.—Notice is directed

to posters about town referring to the

entertainment to be given in Chignecto

Hall to-morrow evening by the pupils of

Central School. Music, reading and

recitations occupy a prominent place in

the program. Refreshments will be on

sale. The price of admission for the pur-

pose of providing apparatus for the chemical

laboratory.

MR. ALLISON.—The attendance at the

Ladies' College is steadily increasing

and is up to that of this term last year.

—The semi-terminal examination at

the Ladies' College were held at the

latter part of October and show a sat-

isfactory rate of progress among the stu-

dents.

—The musical faculty contemplate

giving a Mozart evening on the anniver-

sary of his death, December 5th. A

bust of the great composer will probably

be unveiled at the time.

—A private letter received here con-

veys the information that Miss Damon

of last years musical staff at Mr. Allison

was married at Livonia, N. Y. on the

21st ult. to Rev. John M. Dobson.

Their home is E. Bloomfield, N. Y.

—A number of the students are

leaving for home to spend the Thanksgiving

holidays.

—Lingfield Hall is being reshingled and

a new fence is being built on York street

between the western end of the Conservatory

of Music.

—Mrs. Archibald and Mr. Raymond

Archibald have gone to Boston to attend

the World's Convention of the W. C. T. U.

Mrs. Harmon Humphrey and Miss

Trueman have gone also.

—The football team go to St. John to-

night. They expect to play the N. B.

University team at Fredericton on

Friday and the St. John team on Sat-

urday, returning home Saturday night.

—Mr. Daniel Lund, steward of the

Ladies' College is seriously ill.

—In the Eucharistic on Saturday

evening the students enjoyed a political

discussion, the subject being Unrestricted

Reciprocity. Unfortunately for the

Liberalists it was the minority at Mr.

Allison by five to one and the Conserva-

tives easily vanquished their opponents.

This was not as if the Liberal was

"the young man's party."

—The residence of

Mr. and Mrs. Hiram Oulton, Baie Verte

Road, was on Tuesday afternoon 10th

inst., the scene of a very interesting

and happy event. The occasion being

the marriage of their niece Miss Alice

Maud, eldest daughter of Rufus Oulton,

Esq., to Mr. J. F. Powell, a successful

young farmer of Port Lawrence, N. S.

The bride looked charming and was very

becomingly dressed in cream muslin

trimmed with satin and lace with veil

and wreath of orange blossoms and bo-

quet of natural flowers. She was at-

tended by her sister Leona D. who was

dressed in pale blue cashmere trimmed

with lace and natural flowers. The

groom was ably supported by Mr. Gil-

mour D. Allen, of Cape Spear. The

ceremony was performed by Rev. L. S.

Johnson of Baie Verte. The bride was

sent away by her uncle and as they en-

tered the room the wedding march was

played by Miss Vera Weeks, of Amherst,

assisted by Mr. Goodwin, on the violin.

The high estimation in which the fair

and popular young bride was held by

her many relatives and friends was

shown by the valuable and handsome

present which she received, notable a-

mong which was an elegant six octave

piano case organ, a gift from the Oul-

ton family. The happy couple took the

evening train

at Baie Verte, accompanied by many

friends and good wishes which was

shown by the very generous supply of

rice which followed them. They left for

Boston and intend taking an extended

trip throughout the New England States.

Use Baird's Balsam of Horehound for

all affections of the Throat and Lungs.

### Around Town.

THANKSGIVING DAY.—To day being

Thanksgiving Day the stores will be

closed.

—THANKS TO C. C. Campbell for Boston

papers containing reports of the late

elections.

ROYAL FORESTERS.—Deputy Grand

Organizer Henry S. Hart of Toronto

paid a visit to Sackville on Tuesday.

SCOTT ACT.—Calus Sonier's two cases

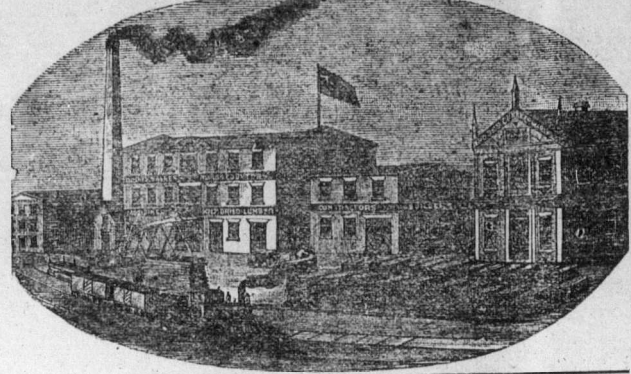

one for second offence, were proved and

on motion of the defendant

## ALBERT COUNTY.

Albert county has a history of its own that will come day after day to the attention of the enquirer into the early days of the province. It is a history altogether distinct from that of the Acadians on the one hand and the English speaking loyalists on the other. After the Acadian exodus, came—not the loyalists but Pennsylvania Dutch. Eighteen years before the landing of the loyalists a little band of six families took up their abode on the banks of the Petitcodiac where for six years they lived totally shut off from the rest of the world. It appears that after the explosion of the Acadians, a large tract of land comprising many of the abandoned farms was granted to Lord Monckton, who sold out a portion thereof to a colonization company which had its headquarters in Pennsylvania, and which induced a number of German immigrants who were dissatisfied with their lot in that state, to come to New Brunswick and settle down on the cultivated farms and fruitful orchards and broad meadows vacated by the Acadians. They were each offered 200 acres together with provisions for two years, a supply of seed of all kinds, a cow, two sheep and a free passage in an armed sloop. That was in the reign now known as Hillsboro and Surrey. The tale is thus told in the early chronicles:

EARLY IN MAY, 1765, Hendrich Steves, Harris Lutes, Jacob Trites, Jacob Ricker, Karl Jones and one Somers, their women and their children set sail as pioneers to spy out the land and if their report was favorable others would follow them in the spring. They took with them their lightest household goods, their stores of linen, so dear to the German housewife, their tools, some books and one year's provisions. The sloop was to return the following spring bringing more settlers, the goods left behind and seeds and provisions for the second year.

They reached Albert county July 5th, 1765, and immediately set about constructing log dwellings, the houses of the fugitive Acadians having been all razed to the ground. Their goods and effects were landed, and the sloop then set sail on her return. As she out of their sight around the headland now known as Hopewell cape, a feeling of despondency fell upon them. They were cut off from the rest of the world, but little did they think that six years would elapse before they would hear from the outside world. But they set to work with stout hearts to build up their new homes and make ready for the winter that was before them. Although they found the dykes broken and the land barren, the luxuriance of the fruit and the broad, cleared fields awaiting the plow, gave sufficient promise of a hopeful future to enable them to assure their compatriots in Pennsylvania that it was a goodly land—full of life and valleys.

One morning after the sloop had left them an old Frenchman came timidly into the settlement. He gave him the name of Bellevue, and stated that all the Acadians who had occupied farms on the south of the Petitcodiac, he alone remained. He said that on the approach of the English his people had abandoned their homes and made an encampment in the woods. The English landed and searched for them, but they were unable to find them. But one calm morning the crew of a cock betrayed their retreat to the enemy; they were surrounded by British troops and driven to a point on the river opposite the present town of Moncton, there to be embarked and carried exile. In despair many cast themselves into the river. Some escaped; some were drowned; the balance were carried away into captivity and sold as slaves. Since then he said he had lived alone, subsisting by hunting and fishing. He had observed the approach of the sloop; had stealthily entered the settlement, and hearing that the language the people spoke was not English he had ventured to make his presence known to the new settlers. He was accorded.

A HEARTY WELCOME. The colonists shared their supplies with him and he in turn supplied them with game and fish. He taught them to track and trap. His ammunition had been long expended. They supplied him therewith, and he in turn supplied their larder with moose, deer and bear.

The chronicler says that when winter came he found the settlers comfortably housed in wooden log cabins floored and plastered with clay. The place was more intense and the days shorter than had ever experienced. It was a long time till spring came, but they relieved the tedious monotony by an occasional moose hunt on snow shoes made by Bellevue. In April under his directions they made much maple sugar, and this unexpected treasure together with the fruit from the old orchards added much to their comfort. At last spring came and they looked forward eagerly to the arrival of the sloop. The ground was prepared, but they had no seed. Spring passed into summer, but no sail greeted their longing eyes. Provisions grew scarce and were carefully husbanded. The masses of fatted plenty of greens, the fields abounded in berries; the orchards yielded plenty of fruit which they preserved with maple sugar. Summer faded into Autumn, yet no sloop came. Another dreary winter stole upon them in the face.

All their stores of bread and provisions were exhausted. Not a charge of powder remained. Fruit they had in abundance, but that was all. Could human existence be great if they were limited to milk from the houses they had left and knew not that any human being were nearer? They had not a single grain of seed to give them hope for the future. In this extremity Bellevue was invaluable. He understood how to snare the moose and to set deadfalls for the weasels and to preserve the luxuriant greens of the marshes (then only vege-

table for winter use. On what is known as Gray's island were immense pines. These they felled and hollowed out. At high tides they filled them with the turbid waters of the Petitcodiac; a day sufficed to settle it. The clear solution was evaporated and salt thus secured to preserve their meats and fish.

In this manner they lived for six years, never the face of man other than themselves. At times food such as the forest and field afforded was scarce, but generally they had plenty. But they longed for bread. They had not even the consolation of a little tobacco so dear to the German heart.

At intervals during their exile they had heard at sundown the distant boom of a cannon, but they knew not where or what it was. By some it was thought to be thunder; others attributed it to a supernatural agency. Bellevue alone knew, but his dread and hatred of the English was such that he was careful to conceal his knowledge, and rather encouraged the idea that it was supernatural.

HENDRICH STEVES, the smith of the colony, was a very ingenious mechanic. A cuckoo clock made by him during their exile, and the possession of one of his descendants who inherits his mechanical genius. Steves determined to build a boat and coast the shore till he found out whether others lived in the world beside themselves. He did so, and rounding up the moose and his own people, he came to Fort Lawrence, it was no longer a uncertain and indistinct sound. It reverberated over the waters with unmistakable distinctness. Doubt gave way to certainty. The world was peopled with others than themselves. Next morning, despite the protestations of old Bellevue, who dreaded nothing so much as falling into the hands of the English, he turned the prow northward, and in a few hours sighted Fort Lawrence, surrounded by the English flag. Coming aboard with a crew Steves advanced alone. On reaching the fort he was questioned, but having entirely forgotten the little English he knew he was unable to make himself understood. Luckily a German named Jacob Beck was attached to the fort. Quoting his own words, "He was der king's paker." By means of this interpreter Steves was able to tell his tale of suffering. He was hospitably received and his companions welcomed with him. Food they had long been strangers to was set before them. Never before had they tasted anything so good. The boat was loaded with provisions; ammunition and guns were supplied. Seed was scarce, so only a peck of barley for each family could be spared. One ear of corn sufficed for all. But few potatoes could be had. A few beans and beans were also given them. With hearts overflowing with thankfulness they returned to their homes bearing with them the promise of a future. The seed was planted and harvested, and a single grain could be used as food. It was seed, precious seed; every kernel was priceless.

Another year passed. Their hardships were somewhat lessened and it was the happiest year they ever spent. Their hearts were buoyed up with hope and again they were ready to Fort Lawrence. His ingenuity under him valuable and he was given a cow for his services. The great trouble was to get her home. Nothing daunted, he built a large boat and took her home and another luxury was added to the community. As last there was grain enough for seed and to spare. Wooden mortars were prepared by placing a live coal on the end of a maple log; the bellows kept it alive till a hole of sufficient depth was burned in the end to make a mortar. The hulls were heated with a fire of maple bark and a pestle was made. "Tat was got—der sweetest best dinner ever vos" in the language of the narrator, a descendant of the old stock.

PROSPERITY BEGAN TO DAWN. Their sons and daughters intermarried, the chaplain at Fort Lawrence officiating. Their descendants are now scattered all over the continent, but their province, principally in Albert, Westmorland and Kings counties. A few grains of wheat were found in the barley. The whole crop was carefully examined and every grain of wheat was secured.

Hand mills were made, consisting of a fixed millstone surrounded by a kerb. The upper stone had handles fixed in it by which it was turned by two women, and in this laborious manner meal was ground. The hulls were separated by a sieve made of splints. On the outbreak of the American war new troubles overtook them. After the unsuccessful attack on Fort Cumberland, bands of marauders occasionally made their visits, robbing them of their food, killing their stock and subjecting them to many injuries. As these marauders represented themselves to be British soldiers the settlers offered no resistance, but the religiously observed the oath of allegiance and they looked forward eagerly to the arrival of the sloop. The ground was prepared, but they had no seed. Spring passed into summer, but no sail greeted their longing eyes. Provisions grew scarce and were carefully husbanded. The masses of fatted plenty of greens, the fields abounded in berries; the orchards yielded plenty of fruit which they preserved with maple sugar. Summer faded into Autumn, yet no sloop came. Another dreary winter stole upon them in the face.

All their stores of bread and provisions were exhausted. Not a charge of powder remained. Fruit they had in abundance, but that was all. Could human existence be great if they were limited to milk from the houses they had left and knew not that any human being were nearer? They had not a single grain of seed to give them hope for the future. In this extremity Bellevue was invaluable. Coming aboard with a crew Steves advanced alone. On reaching the fort he was questioned, but having entirely forgotten the little English he knew he was unable to make himself understood. Luckily a German named Jacob Beck was attached to the fort. Quoting his own words, "He was der king's paker." By means of this interpreter Steves was able to tell his tale of suffering. He was hospitably received and his companions welcomed with him. Food they had long been strangers to was set before them. Never before had they tasted anything so good. The boat was loaded with provisions; ammunition and guns were supplied. Seed was scarce, so only a peck of barley for each family could be spared. One ear of corn sufficed for all. But few potatoes could be had. A few beans and beans were also given them. With hearts overflowing with thankfulness they returned to their homes bearing with them the promise of a future. The seed was planted and harvested, and a single grain could be used as food. It was seed, precious seed; every kernel was priceless. Another year passed. Their hardships were somewhat lessened and it was the happiest year they ever spent. Their hearts were buoyed up with hope and again they were ready to Fort Lawrence. His ingenuity under him valuable and he was given a cow for his services. The great trouble was to get her home. Nothing daunted, he built a large boat and took her home and another luxury was added to the community. As last there was grain enough for seed and to spare. Wooden mortars were prepared by placing a live coal on the end of a maple log; the bellows kept it alive till a hole of sufficient depth was burned in the end to make a mortar. The hulls were heated with a fire of maple bark and a pestle was made. "Tat was got—der sweetest best dinner ever vos" in the language of the narrator, a descendant of the old stock. Prosperity began to dawn. Their sons and daughters intermarried, the chaplain at Fort Lawrence officiating. Their descendants are now scattered all over the continent, but their province, principally in Albert, Westmorland and Kings counties. A few grains of wheat were found in the barley. The whole crop was carefully examined and every grain of wheat was secured. Hand mills were made, consisting of a fixed millstone surrounded by a kerb. The upper stone had handles fixed in it by which it was turned by two women, and in this laborious manner meal was ground. The hulls were separated by a sieve made of splints. On the outbreak of the American war new troubles overtook them. After the unsuccessful attack on Fort Cumberland, bands of marauders occasionally made their visits, robbing them of their food, killing their stock and subjecting them to many injuries. As these marauders represented themselves to be British soldiers the settlers offered no resistance, but the religiously observed the oath of allegiance and they looked forward eagerly to the arrival of the sloop. The ground was prepared, but they had no seed. Spring passed into summer, but no sail greeted their longing eyes. Provisions grew scarce and were carefully husbanded. The masses of fatted plenty of greens, the fields abounded in berries; the orchards yielded plenty of fruit which they preserved with maple sugar. Summer faded into Autumn, yet no sloop came. Another dreary winter stole upon them in the face. All their stores of bread and provisions were exhausted. Not a charge of powder remained. Fruit they had in abundance, but that was all. Could human existence be great if they were limited to milk from the houses they had left and knew not that any human being were nearer? They had not a single grain of seed to give them hope for the future. In this extremity Bellevue was invaluable. He understood how to snare the moose and to set deadfalls for the weasels and to preserve the luxuriant greens of the marshes (then only vege-

table for winter use. On what is known as Gray's island were immense pines. These they felled and hollowed out. At high tides they filled them with the turbid waters of the Petitcodiac; a day sufficed to settle it. The clear solution was evaporated and salt thus secured to preserve their meats and fish. In this manner they lived for six years, never the face of man other than themselves. At times food such as the forest and field afforded was scarce, but generally they had plenty. But they longed for bread. They had not even the consolation of a little tobacco so dear to the German heart. At intervals during their exile they had heard at sundown the distant boom of a cannon, but they knew not where or what it was. By some it was thought to be thunder; others attributed it to a supernatural agency. Bellevue alone knew, but his dread and hatred of the English was such that he was careful to conceal his knowledge, and rather encouraged the idea that it was supernatural. Hendrich Steves, the smith of the colony, was a very ingenious mechanic. A cuckoo clock made by him during their exile, and the possession of one of his descendants who inherits his mechanical genius. Steves determined to build a boat and coast the shore till he found out whether others lived in the world beside themselves. He did so, and rounding up the moose and his own people, he came to Fort Lawrence, it was no longer a uncertain and indistinct sound. It reverberated over the waters with unmistakable distinctness. Doubt gave way to certainty. The world was peopled with others than themselves. Next morning, despite the protestations of old Bellevue, who dreaded nothing so much as falling into the hands of the English, he turned the prow northward, and in a few hours sighted Fort Lawrence, surrounded by the English flag. Coming aboard with a crew Steves advanced alone. On reaching the fort he was questioned, but having entirely forgotten the little English he knew he was unable to make himself understood. Luckily a German named Jacob Beck was attached to the fort. Quoting his own words, "He was der king's paker." By means of this interpreter Steves was able to tell his tale of suffering. ## Why Melissa is the Best.

The water-proof garments at present in use have been universally condemned by all classes of wearers and also by the medical profession, because they are uncomfortable, unsightly and injurious to the health. The reason is simple. While they exclude the rain they also exclude the air and confine the insensible perspiration, quickly causing the under-garments to become damp, unhealthy and disagreeable to the wearer.

The demand is for a garment that is porous as well as Rain-Proof.

The Melissa Garments combine these 2 qualities.

The several tests have proved them to be a perfect protection from the rain, but the process by which this property is attained does not affect in the least degree the natural porosity of the cloth, as there is neither rubber, gutta percha, paraffine, oils, gelatine, varnish, gums or other preparations of like nature used.

These are not their only points of superiority. They have others equally important.

They are fitted to the figure, well made and finished, and will answer every purpose of an overcoat.

They retain their qualities in all changes of temperature.

They are perfectly odorless.

They are moth proof.

They will prove more durable than any other kind of water-proof now in use.

These qualities are not combined in any other kind of water-proof and justify our statement that Melissa is the Best in the World.

The Melissa Manufacturing Co.

Montreal.

**C. PICKARD.**  
AGENT.

N. B.—We are closing out our stock of Cooper Bowls and other makes of Cape Coats at cost, as we intend handling the above goods exclusively in future.

## NEW FALL STOCK!

that Extra Attention is given to compounding Prescriptions, as they make a Specialty of such work.

### Special Locals.

Pure Jersey Cow, registered, 3 years, now in milk.  
Persons desiring a copy of the history of Charles Dixon, one of the earliest English settlers of Sackville, a work recently published can be supplied on application to the undersigned, or to H. D. Archibald, C. P. R. Telegraph Office Sackville.

Nov. 12, 41. JAMES D. DIXON.  
KODAK CAMERA FOR SALE.—One Kodak, size No. 2, in perfect order, has only been used a few times. For full information write to H. R. Tremaine, Amherst.

To Let.—Cottage lately occupied by subscriber.

DR. SANGSTER.  
Take out an Accident or Life Policy in the Travelers.

J. F. ALLISON, Agent.

### Around Town.

Post desires to thank Mr. John Lund for late Winnipeg papers.

SHIPPING.—Brigade Herbert Robinson, from Sackville arrived at Barbados on Nov. 1st.

LAMBS.—P. G. Mahoney, Esq., of Botsford is shipping lambs from Antigonish to Portland Me. He has shipped over 5,000 this season already.

HORSEWHIPPED.—The other day Hon. J. W. White of Centerville, publicly horsewhipped Rev. Samuel Howard, Methodist minister of that place for an offence not named. An action has been entered against Mr. White, Mr. Howard graduated from Mt. Allison in 1889.

SAVING.—Mr. John Fawcett, Esq., Upper Sackville, raised this fall 2½ blood-turkey hens, each measuring 2 ft. 3½ inches. The combined weight of the two birds was 17 lbs. Who can beat this!

PAVING BRIDGE.—A small bridge on station road near Gill's corner is in a condition very dangerous to the lives and limbs of horses. One of the planks or poles has rotted out and a hole large enough to allow a leg to go through, is right in the track of the horses. At night it is practically impossible to see it.

CHIGNECTO HALL.—The supper given by the ladies of St. Paul's Church in Chignecto Hall on Wednesday and Thursday evenings of last week was attended by a large number, though many yielded to the attractions of the Cow Boy Picnic in Music Hall on the first night. About \$100 was realized.

HAIR BIRD.—Mr. Wm. M. Wheaton of Fairfield road tells the Post he has a goose which this season performed a feat in egg production which is not often met with. In the spring she laid eight eggs and hatched therefrom the same number of goslings. A short time ago she took to laying again and up to date has presented Mr. Wheaton with six eggs.

OVER JUNGLES RAILWAY.—Mr. Wm. Moffat has been appointed station agent at River Heights—Minidie Mine is shipping coal.—The Lawson mine is busy running up and running down the shaft.

It is said that a suit for \$2000 damages will be brought against the city of Moncton by Captain Newcomb of the schooner Parnassus, which was wrecked before Moncton some time ago. The action is brought on account of a berth at the wharves not being available, compelling him to go down river.

The breakwater at the Joggins coal mines which had been damaged by recent severe storms has been thoroughly repaired under the supervision of Mr. Dodwell, Dominion engineer, and is now in better order than ever.

The Methodistists of Pt de Bute circuit have had a furnace put in their parsonage for the comfort of the minister and his family. There was a large gathering on Saturday evening ostensibly to see how the furnace worked, actually to assist Mr. Pickles with a valuable fur coat and Mrs. Pickles with a sum of money for her own disposal.

J. W. Hunter, timber contractor, of Cumberland, N. S., has just closed his contracts with the Springfield mill for eleven years. Mr. Hunter has been engaged in getting out booms and props for the mines. Last year he delivered 120,000 pieces, 90 carloads have been got out in one month. Sixty men and twenty horses are employed.

MISSION BAND.—The children were greeted by a full house, in Bethel on Sunday evening last and succeeded in holding the attention of the audience as they rendered their varied programme.

RECEIPTS BY LENA ANDERSON, LOUISA BEAL, LIZZIE TINGLEY, ALBERT BOWSER, LIZZIE HARPER, ZENIA TINGLEY, JESSIE HILL, SON AND BERTIE. Recited by Miss Ethel Ayer, Grace Smith and Lida Estabrook. Dialogue by Vera Tingley, Grace Smith, Zenia Tingley and Jennie Estabrook. Solo by Winnie Thompson and Master Walter Grace. Choruses were also given by the Mission Band.

Rev. A. H. Lavers in a neat little address presented the needs of Regina Mission Station, for which the Mission Band are devoting their funds. The President, Miss Ethel Thompson very creditably occupied the chair. A short report was given by the Secretary, M. E. Estabrook, stating that the Mission Band was organized in June last with 12 members, and has since increased to 41.

They held meetings fortnightly which are of full interest to the children. The success of the work is largely due to the kind and patient efforts of their Superintendent, Mrs. I. C. Harper. Miss Julia Hicks, assisted by different members of the Band presided at the organ.

The congregation showed their appreciation by contributing \$7.30 for Regina.

—An attempt at train wrecking by placing obstructions on the track a short distance this side of Sussex, was made last Thursday evening. The obstructions were removed and officer Collins is looking for the miscreants.

### Local Matters.

Dr. C. Black of Amherst, had his left shoulder dislocated by being thrown from his carriage last Thursday.

The new Wesley Methodist Church at Moncton was dedicated on Sunday last. Rev. G. M. Campbell preached both morning and evening.

J. E. Peaks, a Boston embezzler who ran off with \$20,000 was captured at Halifax, by Detective Power last week.

Mr. J. A. Murray, of Moncton railway office has been appointed station agent at Shediac, in place of Mr. Henderson, deceased.

Thos. Roach Nappan, this season raised one cabbage weighing 18 lbs.; and several others 15 lbs, and one turnip weighing 18 pounds, and girthing 30 inches.

Malcolm McDonald who worked in Holmes carriage factory, Amherst some time ago, has been sentenced to five months imprisonment at Toronto for burglary.

On Saturday or Sunday night of last week the station house at Nappan was broken into and \$40 stolen therefrom. The authorities are after the thieves.

Arrangements have been made in Moncton to commence classes in the University extension course. Prof. Andrews of Sackville will be one of the lecturers.

Frank Beckwith, son of John Beckwith, of Harvey, Albert Co., fell from a wharf in St. John, Friday morning and was drowned. He was 19 years of age and a sailor.

The school commissioners of Cumberland have decided to erect a large academy containing twelve departments and all other necessary rooms, and to be of stone and brick.

One of the 100 ton engines built by the Kingston locomotive works for the Chignecto ship railway was completed last week, another will be finished this week, but the remaining two will not be ready until spring.

Mention has previously been made in THE POST of the discovery of gold in the old ballast pit at Memramcook. An American syndicate has taken hold of it and a 50 stamp mill will be put up at once.—Sun.

The agricultural managers of the farm in connexion with the Dorchester penitentiary give very favorable accounts of this seasons yield. The root crop is far above the average, 5000 bushels of turnips have been raised some of which are very large.

Says the Sun of Monday, 16th inst.—At St. Paul's, valley church, Saturday morning, William J. Skynner of Toronto was united in marriage to Audie, only daughter of the late Wm. J. Gilbert, Q. C. of Shediac. Mr. and Mrs. Skynner will leave in a few days for their future home in Toronto.

It is said that a suit for \$2000 damages will be brought against the city of Moncton by Captain Newcomb of the schooner Parnassus, which was wrecked before Moncton some time ago. The action is brought on account of a berth at the wharves not being available, compelling him to go down river.

### Around Town.

OFF THE TRACK.—The day express from St. John got off the track near Petticoat on Tuesday and was detained about 2 hours in consequence.

INSURED IN THE STATES.—Word was received here on Tuesday night that Walter Welling, of Shediac, who was on the I.C.N. for a number of years was nearly killed by an overhead bridge at Boston.

THE LOCKER.—Following the Post's reference to our locker, a writer in the Moncton Times gives a vivid description of the place. The locker has been copied by the Montreal Star with appropriate scare lines and comments.

ELECTORAL REVISION.—Judge Landry held court in the Brunswick House on Monday for the final revision of the electoral list for the parish. About 100 new names were added and a number of dead ones removed.

PERSONAL.—The many friends of Mr. W. B. Dixon were greatly surprised to see him out on Saturday last. He has quite recovered and will be at business again shortly.

—H. A. McKeown, M. P. P. was in town on Saturday.

—Mr. F. B. Black returned home from Quebec on Thursday last, after a successful course in Cavalry drill. Mr. Black made some of the most interesting made at the school by a short course man.

CAPE TORMENTINE.—The work at the breakwater at Cape Tormentine has been closed for the year. Mr. Murphy, Sr. is now at his home in Toronto and Mr. Murphy, Jr., goes there in the near future.

—During the past season eight crabs, 100 feet in length and about 175 feet deep each have been sunk and 900 feet of superstructure built. The work is entirely finished now out to 2900 feet from the shore; 1200 of stone work and 1600 of crib.

One of the two angles at the end of the pier has been completed and the second angle has been finished with the exception of three crabs which will be the last of the foundation work. A crane will be put on the angles so that cars can run out the entire length. Work will be commenced in the spring as soon as the ice goes. Next summer the work will be finished.

CIVIL COURT.—On Friday last James Tower was sent to jail to wait trial on the charge of feloniously stealing goods from Solomon and Hyman Phillips, at Colas Island.

—Scott Act—Calixt Sonier was convicted on 2nd offence, fined \$100 and costs or 2 mos. imprisonment and was also convicted and fined \$50 and costs or 2 mos. imprisonment for unlawfully keeping for sale intoxicating liquor.

—Barbara Dobson, wife of Jas. Dobson, Bayfield, was convicted on second offence and fined \$100 and cost or 2 mos. imprisonment and also for 2 mos. imprisonment for sale of wine and beer or 2 mos. imprisonment. The other cases before the court were dismissed. Inspector McAllison prosecuted and Frank Sweeney defended.

MR. ALLISON NOTES.—One of the most useful additions to the Art Studio is a charcoal pen for firing decorated china. A large number of the students and several local artists are availing themselves of the opportunity to indulge in china painting.

The football team has brought its share of glory to St. Allison this season. On Friday the club played the University of New Brunswick at Fredericton and defeated them by a score of 16 x 0.

The day and grounds were all that could be desired and the boys speak in great admiration of the manner in which they were treated, both while in the capital and in St. John. On Saturday they fought the crack team of St. John and after the hardest fought game of their lives, were again victorious by a score of 4 to 2. They returned home by the night freight Saturday.

The players were: Forwards.—E. Beer, J. L. McWilliams, J. Jay, W. Custin, E. P. Cary, S. C. Leonard, A. M. Sanford, R. H. Burrell, A. Potts. Quarter Backs.—C. H. Rice, A. Bonnell. Half Backs.—F. Sprague, H. E. Housley, L. H. Housley. Full Backs.—J. L. Berra (captain).

On Monday evening a grand oyster supper was held at which appropriate speeches were made by the faculty and the students. This will probably close the play for the season, although St. John is talking of a return match.

Miss Baird whose ability as an elocutionist excited much favorable comment last year is back to prosecute her studies further.

The general health of the students is excellent, not even the usual number of cold
