OF THE

TRADE AND NAVIGATION

OF THE

DOMINION OF CANADA,

FOR THE YEAR ENDING 30TH JUNE,

1873.

COMPILED FROM OFFICIAL RETURNS.

*Presented to both Houses of Parliament by Command of His Excellency,
ISAAC BURPEE, Minister of Customs.*

O T T A W A :

PRINTED BY I. B. TAYLOR, 29, 31 & 33 RIDEAU STREET,
1874.

To His Excellency The Right Honorable Sir FREDERICK TEMPLE, Earl of DUFFERIN
K.P., K.C.B., P.C., Governor General of the Dominion of Canada, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY :

The undersigned has the honor to present to Your Excellency the Tables of the TRADE AND NAVIGATION of the Dominion of Canada, for the Fiscal Year ending 30th June, 1873, as prepared from Official Returns, and laid before him by the Commissioner of Customs.

All which is respectfully submitted

ISAAC BURPEE,
Minister of Customs.

OTTAWA, 23rd March, 1874.

To the Hon. ISAAC BURPEE,
Minister of Customs, &c., &c., &c.

SIR,—In laying before you the Trade and Navigation Tables for the Fiscal Year ending June 30th, 1873, as deduced from the Returns of Exports, Imports and Shipping transmitted to this Department from all the Ports of Entry of the Dominion, it is satisfactory to be able to state that the statistical aggregation of those Returns shows a progressive increase in the trade and commerce of the country.

This fact is exhibited in the following Comparative Statement of the value of Exports, the value of goods Imported and the amount of goods entered for consumption in the Dominion of Canada during the six years following the Confederation of the Provinces :—

The only year in which the Imports appear to have fallen short of those of the preceding year, is that of 1869. This was, no doubt, due to the increased importations in the Maritime Provinces in 1867 to avoid the duties of the Canadian Tariff, which were rather higher than those in New Brunswick or Nova Scotia, thus producing a depression in the Importations of the year mentioned (1869).

This table shows that the Exports of the country increased in six years 55·95 per cent. ; the Imports entered for consumption, 77·13 per cent. ; the amount of Duties, 47·59 per cent. ; and that the average yearly excess during that period of the value of Imports over Exports, was \$19,334,094—the average yearly excess of goods entered for consumption being \$15,762,818—This last amount includes an average of \$6,015,091 of Free Goods, of which again an average of \$1,100,000 yearly consists of the value of property brought into the country by Immigrants, under the name of Settlers' Effects, which latter amount, it is considered, may clearly go in deduction of the excess of Importations, thus reducing that excess to \$14,662,818.

It is not my province to examine into or to speculate upon the bearing which the received theory of Political Economists, touching the balance of Trade, may have upon this feature of the statement. It is my duty to confine myself to figures, but I trust I may be permitted to notice that there exists one momentous item of gain to Canada which does not appear in figures in our Commercial Statistics, and that is the value of our

British and Foreign Carrying Trade, which is almost exclusively in the hands of our large ship owners, whose magnificent steamships and sailing vessels bring the products of foreign countries to our shores, and carry from our shores the products of Canada to foreign markets.

The statements of Canadian Shipping, to be found in this volume, will show the large amount of Tonnage employed in our carrying trade seaward, from which some inference may possibly be drawn of the value of that branch of our trade, measuring it by the magnitude of our Import and Export Trade as exhibited in the statements which are now submitted.

The value of Canadian Exports to Great Britain and Foreign Countries is shown in the following Comparative Statement for the Fiscal Years ending respectively on the 30th June, 1872, and 1873—the details of which will be found in Table No. 9, page 468 :—

The aggregate increase of the Exports in 1873 over the Exports of 1872 is \$7,150,259. That increase is most conspicuous in the products of the mine, the Exports under that head shewing \$3,936,608 in 1872, against \$6,471,162 in 1873. Gold-bearing quartz dust, and nuggets, the exports of which were almost nominal in 1872 (only \$50), rose to \$1,035,254 in 1873, and silver ore increased from \$1,087,839 to \$1,379,380. The increase in the exportation of mineral (or earth) oils is also worthy of note—the quantity exported in 1872 being 7,897,054 gallons, value \$1,341,099; in 1873, 9,355,325 gallons, value \$1,819,183.

The Exports under the other heads of classification exhibit the following increase respectively in 1873 over 1872, viz. :—

	Increase.
Produce of the Fisheries	\$430,769
do Forest	4,901,434
Animals and their products	1,826,404
Agricultural products	1,616,778

The value of Imports entered for consumption, and the amount of Duties collected thereon, as also the countries from whence the goods were Imported during the Fiscal Years 1871-2 and 1872-3 are shown in the following Statement, by which it will be seen that the value of goods entered for consumption in the latter year exceeds the value entered in the former by \$19,805,478 :—

The collective trade of Canada in Imports and Exports with the undermentioned countries during the Fiscal Years 1871-2 and 1872-3, as exhibited in the following Statement, establishes a steady maintenance of our commercial relations with the Mother Country, and largely increased commerce with the United States. With Great Britain the increase of 19.35 per cent. noted in my last Report as representing our Trade with that country in 1872 over 1871, has been more than maintained, the increase being 20.5 per cent. in 1873 as compared with 1872. With the United States, however, the

percentage of increase in 1872 over was 1871, which only 10·19 per cent., is shown to have risen in 1873 over 1872 to 24·9 per cent.

* The distribution of this amount would slightly diminish the increase of trade in Great Britain and United States, but would not affect materially the figures of the other countries.

The Statement shows the value of goods entered for consumption from Great Britain and value of our Exports to that country, aggregated, to have been in 1872-3, \$107,266,624. The goods from the United States and goods exported thereto during the same year show an aggregate value of \$89,808,204.

We have thus a total Trade, in Imports for consumption and Exports, with those two countries of \$197,074,828, equal to 90·73 per cent. of the whole Trade of Canada.

The only British North American Provinces outside of the Dominion on the 30th of June last, were Newfoundland and Prince Edward Island. With these two Colonies our Trade ranks next in order, the aggregate value of Canadian Imports from, and Exports to, those Colonies having been, during the last Fiscal Year (1872-3), \$4,609,552, thus retaining the position assigned to them in my last Report; and if we include our Trade with the British West Indies, which amounts to \$2,933,548, exhibiting for the Fiscal Year under consideration "between Canada and Great Britain and Canada and "Britain's other possessions in this hemisphere, an aggregate amount of purely British "Trade" of \$114,809,724, being an increase of \$20,128,326 upon the amount stated in my Report of the previous year.

The value of the Goods in Bond in the Queen's Warehouses at the various Ports of the Dominion on the 30th June, 1873, was \$6,710,420, representing Duties computed

under this present Tariff of \$2,523,449.11. For the distribution of these amounts in the different Provinces, reference is made to Statement No. 16, page 508.

The Returns of the *Sea-going* Shipping entered Inwards and Outwards at the Sea-ports of the Provinces of Quebec, Nova Scotia, New Brunswick and British Columbia show an increase in the Tonnage engaged in that branch of the Carrying Trade, as will be seen by the Comparative Statements following, in which British is distinguished from Foreign Tonnage.

Number and Tonnage of Sea-going Vessels entered and cleared.

Total Inwards and Outwards	20,256	5,946,704	21,597	6,085,535

With regard to the tonnage of vessels employed in the Inland Trade between the Provinces of Ontario and Quebec and the United States, the Returns, if correct, show a falling off which cannot well be explained when coupled with the fact of a large increase of our Trade with the United States. The increased facilities for the transport of merchandise by railway between the two countries may, it is believed, partially account for the anomaly; and the inference is strengthened by the official statements we see of the large increase which marked last year the traffic of our great railway lines crossing or connecting with the International Boundary.

The statement of the Tonnage employed in the Inland Trade last referred to for the Fiscal Years, 1871-2 and 1872-3, is here presented:—

	1871-2.	1872-3.
	Tons.	Tons.

The Returns showing the Number and Tonnage of ships built during the last Fiscal Year in each of the Provinces of this Dominion, of which an abstract is here given, affords evidence of the tendency to build ships of a larger class than heretofore. A comparison of these Returns with those of the year preceding whilst showing a numerical increase of ships built—of two, only—established an increase of 26,315 tons of shipping.

It will be seen upon reference to the statement of Canadian Exports, that the value of our manufactures sent abroad to foreign markets stands at the comparatively small figure of \$2,921,802. It is believed, however, that although this is an advance of \$532,367 upon the previous year, the exemption of machinery from duty under the authority of the 34 Vict. cap. 10, passed in 1871, is calculated to give an impulse to the manufacturing energies of the country which will largely and rapidly increase this branch of the Exports. The value of machinery imported in 1870-71 was \$524,113, of which \$15,218 was free; in 1871-2 the importation amounted to \$829,568, of which \$259,021 was free; and in 1873 the gross value of the imports of machinery was \$1,236,275, of which amount \$119,853 were entered under the exemption.

I stated, in my Report of 1871-2 the proportion which, in each of the six Provinces, the collections bore to the whole Customs Duties collected in the Dominion. The ratios have not widely altered during the Fiscal Years 1872-3, as will be seen by the following Comparative Statement:—

	1872.	1873.
Ontario	29.64 Per cent.	33.01 Per cent.
Quebec.....	47.34	45.15
Nova Scotia.....	10.25	9.56
New Brunswick.....	9.18	9.57
British Columbia.....	2.63	2.33
Manitoba	0.36	0.38

The increased ratio in Ontario (3·37), which has more or less diminished the ratios of the other Provinces, gives unmistakable evidence of its rapid growth and consequent commercial developments, all the more remarkable from the fact of the general growth and commercial advancement of the Dominion at large.

The whole humbly submitted,

R. S. M. BOUCHETTE,

Commissioner of Customs.

* The Manitoba returns do not designate the foreign countries from which the Goods represented by these values, were imported; but though mentioned incorrectly as imports from two other Provinces of the Dominion, they are no doubt foreign goods removed in Bond.

R. S. M. BOUCHEFFE,
Commissioner of Customs.

No. 2.—SUMMARY STATEMENT (by Provinces) of the Principal Articles of British and Foreign Merchandise Imported into the Dominion of Canada, shewing whether Imported in British or Foreign Vessels, or by Land Carriage; also the Amount Entered for Consumption, and the Duties collected thereon, during the Fiscal Year ending on the 30th day of June, 1873.
