The Finest Train in Canada

The "International Limited" of the Grand Trunk Railway has justly earned the title of being the premier train of the Dominion and unexcelled in America, not only in speed, comfort and up-to-date equipment, but also by its regularity, running invariably on time. The "International Linited" leaves Montreal 9.00 a.m. daily, arriving Toronto 4.30 p.m., Hamilton 5.30 p.m., Niagara Falls, N.Y. 8.26 p.m., Buffalo 9.20 p.m., London 7.38 Detroit 9 30 p.m., and Chicago 7.20 the following morning. It carries wide vestibule modern coaches, parlor and pullman sleeping cars, and an elegant cafe service is operated in connection with this train. It is known as one of the fastest long distance trains in the world and is well patronized by the travelling public. Any one traveling west should not miss the opportun-ity of riding on this superb train which has gained such an enviable reputation throughout the land.

VILLAGE COUNCIL

On the evening of Wednesday, March 8, a special meeting of the Athens village council was held in Lamb's hall. All the members present, the reeve in the chair.

This was a special meeting called to further consider the petition that had been presented asking that a local option by law be submitted to the rate-

payers. As soon as the meeting opened the reeve invited descussion of the petition by any person present. Mr. W. A. Lewis of Brockville appeared as solicitor for the "other side," and addressed the council at some length in opposition to the prayer of the petition being granted at that meeting, asking that action be delayed until his clients could obtain signatures. could obtain signatures to a counter-petition. Rev. L. M. Weeks spoke clearly and forcibly in behalf of the oners. Then the council took the following action:

Moved by W. H. Jacob, seconded by C. L. Lamb, that this council receive this petition and that a by law be introduced and that a vote be taken on the same by the voters of the corpora

Moved in amendment by A. Taylor, seconded by A. J. Slack, that the petition is not signed by a sufficient majority to warrant this council in adopting it, and that it should not be accepted to-night but laid on the table until the next regular meeting of the council.

On the amendment being submitted to the council, it was carried by the casting vote of the reeve. Mr. Holmes, in deciding upon this action, said that he did so in order that he might obtain of procedure in the premises.

In pursuance of acvice obtained, the reeve called a special meeting of the council for Monday evening last "to further consider and dispose of the local option question."

As at the former meeting, there was a large audience, and in opening, the reeve stated the object of the meeting and announced the willingness of the council to hear such remarks as any person wished to make. M. Wm. Karley responded by presenting to the council a petition bearing 125 signatures, praying that the by law be not submitted. Rev. S. J. Hughes then addressed the meeting in favor of the adoption of local option by the people of Athens, and declared most positively that after careful consideration and erquiry he believed that there was absolutely no truth in the statement so freely made that a desire for retaliation for the defeat sustained by certain merchants in the recent early-closing was one of the factors in moving them to initiate and support the movement for local option.

Councillor Lamb was unable to attend the meeting because of illness, and in view of possible contingencies ner, Gwendolyne Wiltse, Florence Wilson, Kate Halliday, Douglas John-his proper course in the matter. In conformity with that advice, he said that all three councillors present must be agreed respecting any business brought before the board or no action could be taken. He said that his power to vote was limited to giving the casting vote in case of a tie.

This attitude of the reeve completely nonplussed the councillors and pro duced a feeling of consternation in the audience. Mr. Berney said he thought the position was not well taken, and later produced the R.S.O. as evidence that the reeve had a right to vote on all questions. The reeve, however, repeated that he was acting under legal advice in the matter, and declined to

alter his ruling. A motion to rescind the resolution passed at the last meeting was made by Councillors Slack and Taylor, but Councillor Jacob declined to vote, and it fell through. Then the business the session was wound up quickly by passing the two following resolutions: Moved by A. Taylor, seconded by A. J. Stack, that the counter petition

presented to night be accepted, and that the question be laid over until the next regular meeting of the council. Moved by W. H. Jacob, seconded by A. J. Slack, that this council adjourn till the first Monday in Anril.

An association to be known as the Eastern Ontario Fairs and Exhibition Association was formed at Ottawa a few days ago. Messrs. N. H. Beecher and R. H. Field represented Brockville fair at the meeting and Mr. Field was elected to the office of president.

From now on this will be a spring store, full of spring goods. Those who know us best know that our goods have been always up-to-date and satisfactory in every way.

This Season is Better than Ever

Our Men's and Boys' Suits and Overcoats are the "Progress Brand," made up of the very newest fabrics and styles, and great varieties to choose from. Our growth is easily explained: We've earned the people's confidence by faithful service, we carry the goods the people want, and we sell them at low prices.

In Gents' Furnishings it is also well known that we carry the largest and newest in Shirts, Ties, Collars, Gloves, Underwear, Hats and Caps, &c. If there is anything new, you are sure to find it in our store.

We trust that we shall have the pleasure of serving you this spring.

P.S.—A few odd lines in winter overcoats and suits to be sold at cost.

For Ladies and Gentlemen

We make a specialty of this work and guarantee

We use only the very best fur and our prices are right. Let us quote you prices before purchasing elsewhere.

NARCH 26TH, 1905.

Summary... Lesson I. Topic: The wonderful divine Saviour. Place: Ephesus. John's gospel was written between 80 and 90 A. D. John was the only apostle living at that time. He refers to Christ as the Word of God; all things were made by Him; He was the life and light of men; reference is made to John the Baptist, the forerunner of Christ; he was "not that light, but was sent to bear witness of that light"; Jesus was the true light.

II. Topic: The believer's true attitude toward his Lord. Place: Bethabara. Acrisis had arisen in John's ministry; the Sanhedrin sent a deputation from Jerusalem to ask John who he was; John said he was not the Christ, nor Elias, nor the prophet about whom Moses had written, but he was merely a voice crying in the wilderness, "Make straight the way of the Lord." John baptized with water; Christ would baptize with the Holy Spirit; John testified concern-Jesus and called him the Lamb of God; John did not know Christ until the time of his baptism, when the Holy Ghost in the form of a dove came upon him, and the Father said. "This is my beloved Son, in whom I am well pleased."

III. Topic: Jesus wins his first disciples. Place: Bethabara. John pointed Jesus; Jesus turned and said, "What seek ye?" They asked Christ where he dwelt; Jesus said, "Come and see"; Andrew found his brother Simon and brought him to Jesus; it is supposed also that John found his brother James! Jesus found Philip; Philip found Nathaniel; when Philip told Nathaniel was soon convinced that Jesus was the Messiah.

IV. Topic: Christ's first miracle, Place: Cana of Galliee. A wedding feast was being held; Christ's mother had been in large the middle that believe that Jesus is the soon of God; and that believing ye might have life through his been in least was been belied, Christ's mother had been in least and progent him to Jesus was the Messiah.

IV. Topic: Christ's first miracle, Place: Cana of Galliee. A wedding feast was being held; Christ's mother had been in least was the care and progent him to J

also that John found his brother James; Jesus found Philip; Philip found Nathaniel; when Philip told Nathaniel that they had found the Messiah, Nathaniel raised an objection; Nathaniel was soon convinced that Jesus was the Messiah. IV. Topic: Christ's first miracle. Place: Cana of Galilee. A wedding feast was being held; Christ's mother had been invited, and Christ and his disciples were invited; they needed wine at the feast; Christ's mother drew his attention to the ract; he instructed the servants to fill six pots with water; they were then

Golden Text.—But these are written, that ye might believe that Jesus is the Christ, the Son of God; and that believing ye might have life through his name? (John xx., 31). The word "believe" seems to be the keynote for the review. the fact; he instructed the servants to fill six pots with water; they were then told to draw out and bear to the governor praised the wise; in this miracle Christ showed forth his glory; the disciples believed that he was the Messiah.

V. Topic: Gateways into the kingdom.

the wile; in this miracle Christ showed forth his glory; the disciples believed that he was the Messiah.

V. Topic: Gateways into the kingdom of Goa. Place: Jerusalem. Nicodemus came to Jesus by night; the subject of miracles was introduced; Jesus said, "Ye must be born again"; Nicodemus failed to understand; Christ brought an illustraticu of the wind; also referred to the serpent Moses made in the wilderness; said that the Son of Man must be lifted up that whosoever believeth in him should have eternal life.

VI. Topic: Vital laws of spiritual work. Place: At Jacob's well in Samaria. Jesus goes, through Samaria; stops at Jacob's well; meets a woman; asks a drink: she expresses surprise; Jesus speaks of the gift of God—living water; she desires it; Jesus asks her to call her husband: she says she has none; has had five: calls Jesus a prophet; asks about place of worship; true worship must, be record of a great life-work Andrew did.

speaks of the gift of God—living water; she desires it; Jesus asks her to call her husband; she says she has none; has had five; calls Jesus a prophet; asks about place of worship; true worship must be in spirit and in truth.

VII. Topic: Christ's power to restore life. Place: Cana in Galilec. The Galideans received Christ gladly. A nobleman of Capernaum heard that Jesus had come into Galilec, and hastens to Him to entreat Him to come and heal his son; Jesu told him to return and that his son was healed; the man believed Christ's words; the son began to recover at the very hour that Jesus had said, "Thy son liveth."

VIII. Topic: The Lordship of Jesus Christ. Place: Jesus went to Jerusalem to attend the feast of the Passover; Jesus saw an infirm man at the pool of the min of God. The bride or church was chosen before the foundation of the world (Eph. i., 4).

VIII. Topic: The Lordship of Jesus Christ. Place: Jesus went to Jerusalem to attend the feast of the Passover; Jessu saw an infirm man at the pool of the world (Eph. i., 4).

VIII. Topic: The Lordship of Jesus Christ is the first thought in the mind-of God. The bride or church was chosen before the foundation of the world (Eph. i., 4).

VIII. Topic: The Lordship of Jesus Christ is the first thought in the mind-of God. The bride or church was chosen before the foundation of the world (Eph. i., 4).

A FLAITHY OLD AGE was chosen before the foliated of the world (Eph. i., 4). V. Believe that ye must be born again. "Except a man be born from above he cannot see the kingdom of God' (John iii. 5, margin). Jesus "must" be (John iii. 5, margin).

Help for Women Passing Through

Change of Life Providence has allotted us each at

least seventy years in which to fulfill our mission in life, and it is generally our own fault if we die prematurely.

of earth

Believe that Jesus is the living water. "Whosoever will, let him take of the water of life freely" (Rev. xxii.

A free gift implies something giv

eth sin is the servant of sin (John viii.

He who makes choice of sin; who

trade of sin—such a one does the work of sin and supports its interests.

XII. Believe that Jesus is the light of the world. "I am the light of the world" (John ix. 5). As he opened the eyes of the blind man to the beauties of the natural world, so he opens the eyes of the new-born babe in Christ to the glories of the spiritual world.

Abbie C. Morrow.

Abbie C. Morrow.

17). A free gitt implies something given without asking or entreaty. Christ was not an object of desire to the world. No man asked for him. God so loved that he gave his only begotten Son" (John iii. 16).

VII. Believe that Jesus' word has the proper your that it had when he

Nervous exhaustion invites disease. When everything becomes a burden and you cannot walk a few blocks without excessive fatigue, and you break out into perspiration easily, and your out into perspiration easily, and your face flushes, and you grow excited and shaky at the least provocation, and you cannot bear to be crossed in anything, you are in danger; your nerves have given out; you need building up at once! To build up woman's nerveus system and during the period of change of life we know of no better medicine than Lydia E. Pinkham's Vegration of the provided of the pr ctable Compound. Here is an illustration. Mrs. Mary J. Dabbruzz, of 150 Main St., Winnipeg, Manitoba, writes

Main St., Winnipeg, Manitoba, writes:
Dear Mrs. Pinkham:

"Lydia E. Pinkham's Vegetable Compound has been a blessing to me through that delicate period known as the change of life. For six years it disturbed my entire system. I had hot flushes, was extremely nervous, became pale and debilitated, very irregular in the monthly flow, and the blood all seemed to be in my head. I had frequent palpitation and throbbing of the heart; in fact, my whole system seemed to be in disorder.

"I received no relief from the suffering incident to this period until I took Lydia E. Pinkhan's Vegetable Compound; but I date my relief from the time I took the first bottle. I gradually improved, nature took her course peinlessly, and in due time I was a well woman."

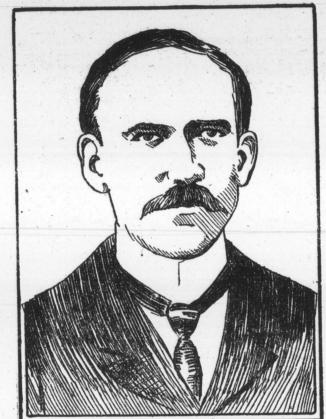

Mrs. Pinkham, of Lynn, Mass., invites all sick and ailing women to write her for advice. Her great experience at their service, free of cost.

Bethesda, who had been sick thirty-eight years; asked him if he desired to be made whole; the man replied that he had no one to put him into the pool; Jessu told him to rise, take up his bed, and walk; the man did as he was commanded. "Not Simply Passably Good"

CEYLON Tea. Black, Mixed or Natural Green Sold only in sealed lead packets. By all Grocers Received the highest award and Gold Medal at St. Louis, 1904.

JOSEPH KENNEDY SUICIDED IN BRANTFORD JAIL.

Sentenced to Life Imprisonment and **Ended it This Morning by Hanging.**

JOSEPH KENNEDY.

Determined to avert the punishment named by Mr. Justice Teetzel, Joseph Kennedy, found guilty of having had carnal knowledge of little Irene Cole, income trial with Doyle, its conversation being confined to a complaint that the food was not of good quality nor of sufficient quantity. But he was cheerful, assuming that indifference to his fate which has characterized him ever carnal knowledge of little Irene Cole, and sentenced to life imprisonment and seventy-five stripes, committed suicide in his cell at the jail shortly before 8 o'clock this morning. A guard was placed over the prisoner last night, and to him Kennedy talked freely of the trial. He protested his innocence, but urged bitterly that he had not had a fair trial. This morning he had breakfast with Felix Doyle, who is charged with mur-This morning he had breakfast with The jai'er was gone but a short time. Felix Doyle, who is charged with mur. after this was left alone by the jail officials.

Kennedy had his plans well formed, evidently, for he immediately went to his cell, tore a blanket in two and, making a noose, fastened the sheet to an iron bar across the cell door, and hanged himself. The body was discovered by Doyle, who gave the alarm.

The body was cut down, but the prisoner was beyond the aid of man. Death was caused by strangulation. At the morning meal Kennedy would not dis-

\$30 to \$40 each.

\$30 to \$40 each.

Veal Calves—Prices ranged from \$3.50 to \$6 per cwt., or \$2 to \$10 each. Only 2 calves out of the 100 brought the \$6 per cwt., and they were not what could be called choice.

Sheep and Lambs—Export ewes sold at \$4.50 to \$5.12 1-2 per cwt.; bucks, \$3.50 to \$4.25 per cwt.; mixed lots of ewes and bucks of common quality, \$3.50 to \$4.50 per cwt. Grain fed ewe and wether lambs at \$6.50 to \$7 per cwt.; barnyard lambs at \$5.50 to \$6.50 per cwt.; spring lambs sold at \$4 to \$8 each.

Hogs-Selects, \$5.75; fats; lights, of which there was a large number, at \$5.25 per cwt.

Bradstreet's on Trade.

Montreal reports to Bradstreet's say: Montreal reports to Bradstreet's say: Wholesale trade here continues to 1c-flect the air of quietness that is more or less usual at this time of the year. Collections and remitances have suffered somewhat. Orders for spriag delivery in all lines are heavior and the outlook is generally bright. outlook is generally bright. Heavy hardware goods and leads and paintsa re particularly active, and from Western canada there is a very active demand for goods for immediate shipment. There has been some talk of pending inhor trouble in the building trades, but nothing definite is yet known. Money is plentiful and the banks announce they have ample funds for building purposes while the stock brokers are also taking

large amounts.

Toronto.—The condition of wholesals trade here is fairly good. Fairly heavy shipments of drygoods are being mad-and buying in all lines of spring goods is active. The continued bad state of the country roads is having considerable effect upon some lines of trade. Gro-ceries are quiet, with the exception of a light sorting trade. The hardware fortunes. Trade is showing more activity, and orders are coming in well. Prices have

trade is showing more activity, and orders are coming in well. Prices have a firm tendency. Heavy goods are in active demand and paints and oils are moving briskly. There is continued activity among the manufacturers, and the prospects for trade generally continue bright.

At Quebec wholesale trade is slowly improving and is likely to continue as 'the season advances. Collections are still slow. Several shoe jobbers have been in the city during the past week and some good orders are said to have been placed. City trade is fairly active. Winnipeg.—Trade is a little quiet. The mild weather has also checked the demand for some lines of goods. Collections are still slow. The proposal continue as the season advances. Collections are still slow. Several shoe jobbers have been in the city during the past week and some good orders are said to have been placed. City trade is fairly active. Winnipeg.—Trade is a little quiet. The mild weather has also checked the demand for some lines of goods. Collections are as still slow. mild weather has also checked the de-mand for some lines of goods. Collec-tions are still slow. The outlook for trade, however, is bright. Great num-bers of immigrants are pouring into the country, and trade promises to increase in volume. Prices have shown a declining tendency during the past week.

Victoria and Vancouver.—The mild sunny weather along the coast has had

sunny weather along the coast has had an enlivening effect upon trade generally. Wholesale business is brisk and collections are good. Logging and mining camps are calling for large supplies of groceries and provisions and trade in fish is active. Trade prospects are bright for all lines of business.

IT WAS NOT STEALING.

But the Woman May Be a Com Cheat.

Toronto, March 13,-Mrs. Sarah Southwood, the proprietress of the Queen Laundry, 590 Yonge street, was arraigned in the Police Court yesterday on a charge of the theft of \$200 from Charles Gorrie. Mr. T. C. Robinette, K. C., appeared for the prisoner, and pleaded not guilty.

ed not guilty.

Gorrie said he answered an advertise ment in one of the papers for a reason ager of the Queen Laundry and as employed, on the stipulation that he should provide \$200 to pay off the "silent partner," and half pay for the machinery. The witness took a his money, and worked for a little over two months, when the business went into liquidation. went into liquidation.
"There is no theft there," said Mag-

"There is no theft there," said Magistrate Denison.

"She played this same trick upon at
least seven others," said Crown Attorney Curry. Among those who lost are:
S. Jarrett, \$195; Mr. Varley, \$750; Mr.
Meldrum, \$55; Miss Angell \$200; Miss
Huck, \$200; Dr. Frawley, \$500, and Mr.
Crosshan for a small amount."

"Perhaps you can make out a case
against her as a common cheat," said
Magistrate Denison. "But this case is
dismissed."

"FATHER, HELP MY BABY." A Betrayed Girl's Pathetic Appeal to Her

Fall River, March 13.—A male baby, a few days old, was abandoned on the steps of the St. Joseph rectory last night by a woman who arrived on a train from Providence and took a hack to the rec-

by a woman who arrived on a train from Providence and took a hack to the rectory. Pinned to the infant's clothing was this letter:

"I ask you, father, to take my little baby and give it shelter. Its unhappy mother is starving and sick, and followed by an enemy. Dear father, put it in a home in this city, or board him somewhere, but, oh, for God's sake, don't lose track of him. His mother will come for him in a few months. He has been baptized. I can carry him no farther, and rather than have him lose his faith, I give him unto you, father, and may the good Saviour, who said: He who giveth one of these little ones in My name, receiveth Me, and who rejected them, rejecteth me,' bless you and reward, and may the prayers of an unhappy mother be heard for you in this world and the next. Good-by, my darling baby, may the God of Heaven and His blessed mother watch over and proteet you. Oh, father, father, help my baby."

ONE PERIL OF WARSHIPS.

Bulkheads in Modenr Fighters Are Perfectly Useless.

London, March 13.—The Expres publishes the following: The startling discovery that the bulkheads of some of our modern warships are perfectly use-

our modern warships are perfectly use-less to resist sea-water pressure was-made during a recent inspection of the Channel fleet.

By order of the Admiral, the steel walls of all the spirit-rooms were shor-ed up with battens and uprights, and water was then pumped in. Long be-fore the compartments in several of the ships were full the water-tight doors and walls began to give, and buckled several inches.

and waits began several inches.

Had the rooms been filled with water, as they might be in the event of collision, and had there been no shores, the walls would inevitably have burgt, and the other bulkheads gone in turn, with disastrous results.

Pumping was not continued farenough to cause an actual burst, but the movement of the walls was accurately measured from the shores which had been erected. several inches.

had been erected.

WERE WRECKED BY WHALE. Fisherman's Seventeen-Mile Swim to Shore.

London, March 13.—The Daily Main publishes the following: Two fishermen. William Fraser and Thomas August, were sailing recently seventeen miles off Dungarra, near Fremantle, in miles off Dungarra, near Fremantle, in West Australit, Fraser lying asleep and August running the boat under full sail. Suddenly the craft came into collision with a whale and the monster, becoming enraged turned and made a vicious ing enraged turned and made a victorial attack upon it, eventually sinking it, and leaving the men with several spars, masts and oars around them, floating in the water. After doing this damage

the water. After doing this damage the whale disappeared.

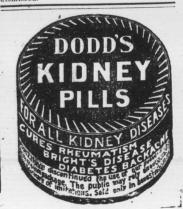

Fraser, unlike his companion, was unable to swim, but August collected the floating timber and constructed a raft and pushed it over the long stretch of seventeen miles to the shore. Of course seventeen miles to the shore. Of course during that time neither man had food

CHAPTER XXXVII.

"I shold have perhaps stated before," Mr. Leighton continued, "that
as soon as I was able, I wound up
my father's affairs in Sidney, as
well as I Sould, and then started
tumediately for London, to ascertain
what setil ment I could make there.
I was kindly received by the firm what settl ment I could make there.
I was kindly received by the firm with whom we had been dealing, had a long talk with them, stating plainly the predicament in which I found myself, and asking for their forbearance with I had a time to proceed myself, and asking for their forbearance until I had time to recover
from my ill-luck. I found them most
courteous and considerate—yonder
they sit—Messrs. Saunderson &
Richards, wool merchants, of London," the narrator explained, and
indicating by a gesture the strangers who entered with the attorneys.
"They commissioned me to go to

ers who entered with the attorneys.

"They commissioned me to go to American and ascertain what terms I could make with the New York branch, giving me letters of introduction and recommendation to them, and encouraged me with the assurance that they believed that the whole business could be amicably and satisfactorily settled I accordingly sailed immediately and arrived in New York late in June of last year. I interviewed the members of that branch, but was told that they must have time to consider the proposi-Interviewed the members of that branch, but was told that they must have time to consider the propositions made by the London firm. It thea occurred to me that, while I was waiting, I would look up the daughter of my father's old Iriend and former partner. Not, I assure you," interposed the young man, darting a quick glance at Florence, "with the intention of referring, even in the remotest manner to the plans that our parchts had once entertained for us; for my position at that time did not warrant any thought of marriage, and my pride would have revolted against the idea of aspiring to the hand of any one for the sake of money; but I had a desire, to meet Miss Richardson: simply because she was the child of my father's old friend.

"I learned that her guardian, Mr. Seaver, lived some miles out of town, and one evening I took the train" they oung man observed, with some show of emotion, as he again the young man observed, with some show of emotion, as he again glanced at Florence. "I looked for him every instant, scarce heeding what the clergyman was saying, and going through with my part of the ceremony when the ring was called for that I began to realize to what extent I was carrying the farce. I was appalled! I had no wedding ring! What should I do? How account for my remissness? Should I stop the service then and there and explain everything? Such were were some of the disconnected thoughts that flitted through my brain. Then, guided more by instinct than reason, as I hastily fumbled in my vest pocket, my fingers suddenly, came in contact with the young man observed, with some of emotion, as he again claused at Florence. "I looked for him every instant, scarce heeding what the clergyman was saying, and going through with my part of the ceremony was called for that I began to realize to what extent I was carrying the farce. I was appalled! I had no wedding ring! What should I do? How account for my remissness? Should I stop the service then and there and explain everything? Such was a part of the service th

and one evening I took the train and started forth to make my call. The day had been intensely warm, and the air was still heavy and lifeless, and, before I was aware of it, I fell asleep in the car and was carried several miles beyond my lestination.

carried several miles beyond my destination.

'On alighting, I found there was no train back until after ten o'clock. It was ten nearly eight, and dense clouds in the west, with occasional flashes of lightning, portended a shower. I went to a livery stable and hired a horse, telling the owner my errand and asking him to direct me how to find my way back to the me how to find my way back to the town I had passed. My plan was to go and make my call, then return with my horse, catch the train if I with my horse, catch the pull but, in case of failure, remain and go back to the city in the morning.

e city in the morning.
The man gave me minute directions regarding my road and kindand the state of t agrined to find I had lost my way. 1 turned back, retraced a portion of the distance, and finally found myself again on the right road. But But the storm—a fearful one traveled faster than I, and overtook me, and set I peared a little village. I

ed faster than I, and overtook me, and, as I neared a little village I observed a dim light in a small church by the roadside.

"It occurred to me that I might take shelter within it until the shower should pass. I guided my horse into the adjoining shed, discovered to the adjoining shed, discovered the adjoining mounted, and tied him, and then sped for the church.

carriage was at the entrance two men were standing in the bule, which was densely dark. Neither observed my approach, and, thinking that something might be occurring within the church upon which I should not intrude, I stood

letly where I was. "Suddenly I was startled to hear my own name,—Walter Leighton— uttered by one of the men. Involun-tarily I shrank behind a pillar, and to the speakers, and waited to hear more, wondering who, in that region, could know anything

Thus I was amazed to learn that the man of whom they were speak-ing was on the point of marrying some wealthy girl for her money; who she was I falled to ascertain, as she was mentioned only as the girl; but for some unaccountable reason the bridegroom had not arrived yet, and the whole wedding party were impatiently awaiting him.

The affair was very freely dis "The aliair was very freely dis-ensed, and it was gradually unfold-ed to me that my cousin was also in America, masquerading in my name, but still as great a villain as ever; that he had won the affecas ever; that he had won the affections of a lovely, innocent girl with a large fortrne, had persuaded her to consent to a secret marriage because her friends disapproved of him; and these minions of his were to receive a handsome return fort heir services.

"Filled with indignation, and de-termined to unmass's the pretender

laugh that brought the hot blood in a quick flood to Florence's brow. Whereupon Mr. Seaver marched straight across the room, took the

straight across the room, took the insulting maid by the arm, with a grip that made her wince, and led her out into the hall.

"Go! leave this house immediately," he thundered. "If you show your face in my presence again, I will have you arrested as the accomplice of that villain yonder."

The girl was thoroughly frightened, and well she might be, for the man's aspect

frightened, and well she might be, for the man's aspect was something terrible; and, having been paid her wages only three days before, she hurriedly packed her trunk and precipitately left the Towers, neither Florence nor the Seavers ever seeing her again. "Ah! now it is easy to understand how Andrews was enabled to describe the ring so accurately to you," Mr. Leighton observed, as the two disap, eared frmo the room. "The girl, having seen it in your possession, could give him some idea of it, when he must instantly have recognized it, for he had seen it a great many times upon my mother's finger, and knew its history. It must have been times upon my mother's finger, and knew its history. It must have been quite a revel tion, as will as a shock to him, for it doubtless explained to him at once the mystery that had hitherte surrounded the ceremony that took place in Rosedalo chapel, and told him who the stranger was who had acted the part of the groom upon that occasion."

He glanced at the man as he spoke, and the guilty color that surged up to his brow plainly betrayed that

to his brow plainly betrayed that his surmises were correct.

"To go back to that seene in the chapel," the young man resumed, and still addressing Florence; "when my fingers came to contact with this ring, I mechanically drew it forth and passed it to the clergyman, who hurriselly finished the cremony, and still the missing bridegroom had not come. I was apalled—my brain was in a whirl—fort knew that the whole affair had been but a sacreligious farce, and in unother moment I should have concessed the pirt that I had played; but you turned suddenly to me and began to beg me to take you home. Your entreaties were abruptly terminated with a cry of terror, just as a fearful crash of thunder shook the building to its to my amazement, they selzed upon me as the belated bridegroom, and hurried me inside the gloomy church, and straight to the altar."

"Blast you! I suspected as much when I found out!" the prisoner here interposed, but abruptly paused and dropped into his old attitude. "It was all so quickly done," Mr. Leighton proceeded, without noticing the interruption, "I had no time to reason clearly, and before I scarcely realized my position, the trembling little bride and her attendant were standing beside me and the clergyman had begun the service. "I could not distinguish the features of either of the ladies, for both wore spotted lace veils, and the place was very dimly lighted—to avoid attracting attention, as I surposed. I knew, that the real groom was liable to appear at any instant; but I was boiling with indignation, and determined to denounce and expose him, and so I resolved to carry out the farce until he did come, and then have it out with him. It did not occur to were abruptly terminated with a cry of terror, just as a fearful crash of thunder shock the building to its foundations, and you fell fainting into my arms, which I extended to save you. I carried you quickly from the place and put you into the earriage, telling the driver to get you home with all possible dispatch. Then I turned back to have it out with the person who and acted as bost man. He had just secured the certificate from the clergyman. I demanded it of him, for I knew that it shound not be allowed to exist, resolved to carry out the farce until he did come, and then have it out with him. It did not occur to me that he might not come at all," the young man observed, with some show of emotion, as he again demanded to a line, for I have the standard of the should not be allowed to exist, and, as I spoke, he realized for the first time that I was a stranger. He was greatly disturbed for an instant, but he refused to give me the

"The ring! There was a ring! Describe it was till heavy and life, do before I was aware of it, and every particle of color receding from her face, while her agonized by ack to the town, where I had procured my horse, spent the matter up through him, but the sexton told make had gone—having left by the rear door, I included more by in the case a strange minister from out of town, there being no resident rector there is the first matter up through him, but the sexton told make had gone—having left by the rear door, I included more by in the sexton told make had gone—having left by the rear door, I included more by in the sexton told make had gone—having left by the rear door, I included more by in the sexton told make had gone—having left by the rear door, I included more by in the sexton told make had gone—having left by the rear door, I included more by inc gentleness.

"Yes, Miss Richardson, here was a ring," he replied; "a queer little affair, composed of three strands braided together and fastened with a small plate upon which some Greek characters were engraven, and which signify "Love and Hope."

It beloves the door. I knew, of course, there must be serious liness within, and so weat away again without even making any inquiries, and thinking that perhaps later I would make an or a small plate upon which some and which signify "Love and Hope," It belonged to my mother—she gave it to me boily a short time before she died. It was a peculiar relice that had been in her family for more than a hundred years, and she requested me to keep it and pass it down to my son should I ever lave one."

"Ah! Then I am glad that I can restore it to you," said Florence, and the structure of the hotel where I was stopping declaring he could not have a restore it to you," said Florence, Lave one."

"Ah! Them I am glad that I can restore it to you," said Florence, as she nervously extended one hand, and, opening it, showed him the ring upon her palm. ping declaring he could not have a lever pittent in the house. It was nearly five weeks before I was able to get out again, and then I devoted myself to the business which had brought me to America. After a few days the New York firm information The moment he had begun to tell

ed me they had decided to accept the proposition of the London firm, and, this matter sottled, I determined to sail for England the following Wedby the roadside on that tempestuous June evening, the mystery of the strange marriage ceremony was solved for her, and, slyly unfastenng the chain about her neck, she nesday. "Meantime, I thought I would look had slipped the ring from it to reand slipped the ring
turn it to him.
"Yes, that is the very ring," he
observed, as he took it from her;
"her I mover expected to see it up Andrews and demand of him the papers which I knew he had stolen. I did not get track of him uatil two I did not get track of him until two days before I was to sail, when I learned that he was located for the summer is the town where Mr. Seaver had his country home. It was evening, when I arrived at the place, and Andrews was out. But I was determined to see him, and insisted "but I never expected to see it again—I never knew, until this hour, when I heard yonder adventurer claim you as his wife and so cruelly expose that long-kept secret, upon whose hand I had placed it." termined to see him, and insisted upon awaiting his return. He found me-in his room when he came, and was as startled as if one had suddenly risen from the dead before him, for, until that moment, he "But he told me that it had be-"But he told me that it has longed to his mother," said Florence, indicating Andrews by a gesture; "he described it to me only the night before last, and it was this fact alone that made me fear, for the first time, that possibly after all, my brain had been half turned had believed me to be dead. We had a stormy interview for he refused to restore the paper. I demanded, and when I taxed him with with fear and fever, as he claimed, palming himself off as my father' and I had imagined a stranger stood beside rese that night. Even now I cannot understand how he knew it was in my possession, or

son, and threatend to expose him, he only sneered at me and said that would be a difficult matter, since he had everything to prove his position, and I would only make myself A sneering little laugh from Anna Folsom at this moment caused Florence to glance toward her. ridiculous "I realized the truth of this, and disgusted and discouraged, I finally left him, without even referring to that clandestine marriage and taxing him with trying to deceive an innocent girl, as I had fully intended to do I found I was half. ceive an innocent girl, as I had fully intended to do. I found I (was helpless, at that time, to prove anything; but I resolved that as soon as I was firmly re-established in business I would make another effort, and, backed by the London firm of Sanderson & Richards, who had it in their power to identify me, I believed I should be able to show uny cousin up as a rogue and estab-"have you seen this ring before and did you tell him about it?" The girl sneered again.

"Yes," she retorted, with an impudent toss of her head; "I was belind the curtains of your bed one morning, and saw you looking at it. Perhaps it may be interesting to this company to know that Miss cousin up as a rogue and estab-lish myself as Walter Carrol Leigh-

Richardson has worn it upon a chain next her heart, as a treasure too sacred to be trusted anywhere else," the girl concluded, with a boarse Julien had never been discovered."

Mr. Seaver here observed, as the narrator paused.

"Yes," the young man replied, "for it was my mother who was sister to Lady Page's father; there is not a drop of Vincent blood in Andrews' veins. O m. retu a to N.w York on the evening following the interview with Andrews! I found, on glancing over the World, the names of Mr. and Mrs. Seaver and Mrss Florence Richardson as booked to sail for Europe upon the same steamer in which I contemplated taking passage. Now, I thought I would have a fine opportunity to ascertain what the daughter of my father's former partner was like. But I resolved that I (would not force myself upon her at all; I was poor, she was rich; and if she should learn who I was she might be embarrassed by my presence. Besides, I reasoned, she might possibly have met the man who claimed my name, and that might occasion unpleasant complications. Accordingly, I engaged

the man who claimed my name, and that might occasion unpleasant complications. Accordingly, I engaged my passage under an assumed hame, or rather by simply transposing my names and calling myself W. L. Carrol. Miss Richardson and I did not become acquainted until the voyage was nearly over, but even then I never dreamed that she was the poor little bride who had stood beside me in Rosedale chapel. That incident was becoming like a dream to me, and I believed that no one would ever discover that I had been connected with it in any way. But I and I believed that I had been connected with it in any way. But I was destined to be disappointed in this, for almost the first person I met on board the steamer was Mr. Merrill, yonder, who had acted as best man, and we instantly recognized each other."

"Why! now I understand something that has always puzzled me," murmured Florence, as she recalled the shock that had quivered through Addison Merrill that morning when

Addison Merrill that morning when they had encountered Mr. Leighton on the upper deck.

upper deck.

MONSTER BOAT.

A Craft to Take the Place of a \$3,000,000 Bridge Soon to be Built.

What is beyond doubt the largest ferryboat in the world, says J. B. Moor n The American Inventor, is owned by

This colossal craft is christened the Solano. The boat is not only large in dimensions, but also in power. The Solano has a net tonnage of 3,057 tons; is 430 feet long, 116 feet wide, and has a mean draught of 15 feet. Her two en gines have a combined strength of 2,000 I. H. P. This ferryboat is larger than most of the great battleships United States or other navies.

Solano transfers, on an average 10,000 trains a year—that is, all sorts of Often the boat carries trains. large, heavily loaded freight cars at one trip. Not less than fourteen trains are handled each day. The boat has made as high as forty-two trips during the twenty-four hours. Owing to the great length of this boat, it is unnecessary to ever cut a train, as she frequently car-ries a full train of cars, including two tracks extending the entire length, so that four trains may be acommodated at

one time.

The Solano has four smokestacks and steel boilers. The two engines work tirly independent—one to each baddle wheel. This monster craft is constant wheel. This monster craft is constantly on duty—day and night. At the crossing oint Carquinoz Strait is about a mi wide, and it requires from eleven to thir ten minutes to make a trip each wayrom slip to slip. On an average, about hirty trips per day are made. So sys-tematically, and swiftly are the trips scheduled that there is very little, if any, delay to the many trains. Thousands of passengers travelling each way are trans-

erred every day. The maintenance of this transfer boat involves a very heavy expense to the railroad company. A bridge is the only solution of the problem; a suspension bridge of a mile in length would be too costly to be feasible for a private corporation, and a draw bridge would prove a serious obstacle to navigation. However, a number of surveys have recently been made across the Strait to ascertain the nature of the bottom. Bridge pplans there is the proporation of the provarded to the War strains. have just been forwarded to the War Department for examination. According to the plans submitted, the bridge will be 6,800 feet long. There will be a draw be 6,800 feet long the clear on each side with a green ribbon box. The men can

THE OUTLOOK FOR SEED CORN.

The difficulty of getting reliable seed corn of desirable types and varieties during the last two years and the expensive lessons learned by many corners who used seed of unknown vitality make the question of reliable seed for 1905 of more than ordinary interest. A survey of the available supply of northern grown seed of this important fodder crop indicates that the difficulties of getting good seed will be even greater this year than during the two previous years. The best varieties for fodder or ensilage purposes, along the northern limit of the corn belt in Canada, are undoubtedly of the "Flint" type. In the latitude of Ottawa only a few special strains of the "Dent" varieties give good results for ensilage in the average year.

Life much to be recommended then that, wherever possible, farmers obtain their supplies of seed corn in the ear only. To meet the demand for seed corn in this condition growers would do well to adopt the style of shipping crate that is used for this purpose in the States of Iowa and Illinois. This crate is two feet nine inches long, one foot wide, and one foot deep, and is made of half inch lumber three inches in width. Its capacity is one bushel, or between one hundred and twenty-type areas. If the corn can be planted in the ear of the strain of the survey of the available seed orn, tested in the Seed corn, tested in the Seed corn, tested in the Seed corn, tested in the ear, 95 per cent.

It is much to be recommended then that, wherever possible, farmers obtain their supplies of seed corn, tested in the serd orn, of per cent.

It is much to be recommended then that, wherever possible, farmers obtain that, wherever possible, farmers obtain that, wherever possible, for event.

It is much to be recommended then that, wherever possible, farmers obtain that, wherever possible, farmers obtain that, wherever possible orn, 68 per cent.

It is much to be recommended then that, wherever possibl

erage year.

Unfortunately for progress in corn raising in Canada our supplies of seed have been drawn largely from the country to the south and have been of types and varieties that required a longer season to mature than is afforded in some of our best dairy districts, where the corn crop is most needed and most valuable. We have a number of very good men who are making a specialty of growing corn for the purpose of seed along Lake Erie, and who have a limited quantity of good seed for sale this year. The tity of good seed for sale this year. The Canadian Seed Growers' Association has taken up in a business-like way the matter of creating a supply of reliable seed corn, and it may be said that the

in all parts of Canada where corn can be grown, with success.

The severe frost during the carly part of last autumn rendered the bulk of the corn crop in Ontario absolutely aseless for the purpose of seed. A belt about a mile in width along the Northern shore of Lake Erie was affected only slightly, and from some sections in this district there is a supply of very good seed.

The cost of the small quantity of seed grains, clovers or timothy, thus treated, will have germinated at the end of five me comparison with the cost for labor of some of the garden vegetacorn that is required to plant an acre, in comparison with the cost for labor in cultivating and handling and the ultimate value part of the cost for labor in the cost for labor in cultivating and handling and the ultimate value part of the cost for labor in the c in cultivating and handling and the u-timate value per acre of a good crop, would seem tomake it clear that the best available seed of the most satisfactory type and variety should be obtained at any reasonable cost. It would be much etter for Canadian farmers if they were better for Canadian farmers if they were able to obtain their supplies of seed form the ear; they would then have a fair idea of what they were getting. While in the ear, the danger of injury to the vitality of the seed from damp and its after effects is reduced to a minumum. Corn that is shelled by a machine and left in sacks for six weeks or more will seldom germinate more than 75 per cent.,

ty ears. If the corn can be planted in hills, this crate will hold sufficient need for five years. While it is true that there may be some additional cost for freight, on account of the weight of the cob and of the crate, and that extra work is required in shelling the corn, these become insignificant when the dif-ference in value between an acre of good

tory crop is considered. Seed Testing on the Farm. To find out whether seeds are capable of producing plants requires neither ex-pert knowledge nor special apparatus. Satisfactory material is to be found in every farm home, for making germina-tion tests of practically any kind of seed used on the farm. The simplest and seed corn, and it may be said that the future promises for a permanent basis of supply of a high-class article and of varieties that are exceptionally well suited for ensilage and fodder purposes in all parts of Canada where corn can be grown, with success.

The severe frost during the carly part of last autumn rendered the bulk of the corn crop in Ontario absolutely use-them in an ordinatry dinner plate and invert another plate to cover them.

matured corn and an acre of unsatisfac

The seed should be kept moist but not wet. The temperature of the average farm house living room would be quite suitable, but some care should be taken to guard against excessive heat or cold.
All good strong seed of corn, cereal

grasses, of some of the garden vegeta-bles and of beets or mangels, may be germinated to better advantage by scattering them in a saucer (belonging to a flower pot) that has been soaked in water, and set on a cloth that should be kept damp, or in a pan containing not

plans provide for a single track, with the floor of the bridge twenty feet above potato bonbon boxes, clay pipes and Bar plans provide for a single track, with the floor of the bridge twenty feet above low tide. It is estimated that such a structure will cost at least \$3,000,000. It would be the most expensive bridge west of the Missouri River. vest of the Missouri River.

west of the Missouri River.

It is generally concede that as the very heavy traffic is constantly increasing, in a few years at farthest a costly bridge will span Carquinoz Strait.

Probably the next largest railroad ferryboat in the world is the giant steel transfer North Pacific. This boat is employed in thansferring the Northern Pacific Railroad Company's trains across the great Columbia River on their transthe great Columbia River on their trans-continental line to Portland, Or.—be-tween Kalama and Globe Point.

tween Kalama and Globe Point.

Very recently a large transfer boat
was launched at Detroit, Mich., concerning the size of which there was much
press comment. However, it may be
stated that the great ferryboat Solano
is at least one hundred feet longer than the new Detroit boat.

oring will produce any shade desired, and almond, pistachio and vanilla added to creams and cakes, will produce variety, while mint ices, bonbons and cyrstalized foliage will add daintily to the

white can be decorated with citron shamrocks, hats and pipes, The darkest citron is used for this, and after cutting in thin slices, lay in just enough to cover and simmer until a straw will pierce it; drain and wipe dry; then cut into shape with sharp scissors or knife. The hats are cut into two pieces, and it is better to cut patterns from stiff paper, which lay on the citron shape.

TREES BUT LITTLE KNOWN. Tropical Forests so Dense it is Difficult

According to an expert in the bureau of forestry of the Department of Agriculture there is, comparatively speaking, ists and botanists are constantly exploring the regions near the equator. In-cieed, there must be many hundreds of

tional conditions of the tropical forests.

In temperate zones forests are fairly

In the tropics, on the other hand, the case is exactly the opposite. Forests composed of one variety of tree or even composed of one variety of tree or even of only three or four kinds are practi-cally unknown. So many different sorts of trees grow close together that frequently more than 100 varieties may be counted within a short radius. More-A clever entertainment for March is over all these grow together in great confusion. They tower to extraordinary heights, each tree, it would seem, striv-ing its best to reach the sunlight. Con-sequently the trunks are extremely long and thin, because each tree is reaching to get higher than its neighbors, in order to escape the twilight of the primeval, tropic forest. Leaves and branches are so confused that in many forests one can see neither sky nor sunlight for miles, the crowns of the trees interlacing and forming a thick, impenetrable roof.

To add to the confusion great vines

and creepers and hundreds of varieties of vegetable parasites overgrow the

is said that it is well-nigh impossible to cut down any one tree for pur-poses of examination, for the reason that the forest is so dense that there is that the forest is so dense that there is insufficient room for the tree to fall, even after its trunk has been cut through. It would be necessary to clear a great space, and that is impracticable from the standpoint of the naturalist or botanist. Hence the world is still in comparative ignorance of the wonders of the tropic forest.

There was a good deal about long heads, in the form of long words, in the Huxiey memorial lecture, delivered the other night before the Anthropological Institute, of London, by Dr. J. Deni-ker, of Paris. The following are some

Women as Fruit Growers

"I must state," says Madeline Reilly writing of raising small fruits for profit, in the New Idea Woman's Magazine for April, "that if fancy prices are to be given for your products, only the most perfect fruits must be sent to your customers, and that after they have passed under your personal super vision, as a careless picker may ruin basket of luscious berries by adding me or two overripe specimens." This imply illustrates the principle to be barved in all successful enterprises, that the hand of the master must show in every detail. Miss Reilly continues by taking up in turn the growing of strawberries, raspberries, blackberries, currants and gooseherries, which she says "are always staple articles and apt to find a ready market, although the variety of plants selected must be governed entirely by the demand for certain fruits in your locality."

This is about the time when there is speculation and interest in the question as to whether the maple sugar output for the year will be large or small. Those in a position to speak from No woman therefore who has any menstruation trouble, the whites or inflammation of the wombor corries should delay one mement in table of the wombor corries and the should delay one mement in table of the wombor corries should delay one mement in table of the wombor corries with the question says: "Maple sugar with the question says: "Maple sugar with the question says:

ought to be plentiful again this year. Long, cold winters, with heavy snows, are usually followed by great maple sugar seasons. For some unexplained reason, snow is necessary to ensure a flow of sap.

Our attention has been directed to the beneficent work being done by the Institution for the Deaf and Dumb at Belleville and the Institution for the Blind at Brantford. At the former, tuition, books and medical attendance are furnished free, and at the latter everything is free, including board of the pupils. The Reporter will be pleased to forward the name of any person between the age of 7 and 21 who desires to take a course of instruction at either of these institutions.

A BIT OF JUGGLING.

Clever Trick With the Backgam

Take from the backgammon board the two dice and the dice cup or shaker. Hold the cup in your right hand by putting your thumb and second finger around the bottom of it, at the same time holding one of the dice with the tips of the same finger and thumb. Next put the other die on top of the one you are holding. You will of course need the aid of your left hand in arranging the dice and cup in your

Now by a quick upward moveme of your right hand send the top die flying up into the air and as it comes down catch it in the cup.

Now comes the real trick-to get the other die in the cup also. If you try

HOW TO HOLD THE DICE.

to do this by throwing the die upward as you threw the first one you may catch it in the cup all right, but at the same time you will be pretty sure to throw the first one out of the cup. As for catching both together as they come down, you will find that almost impossible. The proper way to get the second die into the cup without losing the one that is already there is to let your hand drop suddenly, at the same time letting go the die which you have been

The die will drop, too, but not as rapidly as your hand, so that you will have no difficulty in getting the cup under it and catching it.

ANIMAL WONDERS.

The Way Some Wild Creatures Hide From Their Enemies.

Nature has strange and wonderful ways of helping her wild creatures to protect themselves from their enemies. She teaches them how to hide so that hardly the sharpest eye can discover their whereabouts, even though they are not covered up at all. There is a bird-its name is ptarmigan-which in the winter time wears pure white plumage, so that when the snow is on the ground the bird can hardly be distinguished from it. In summer time the ptarmigan grows a new set of feathers which exactly match the dull mosses and weeds where it is usually to be found. There are birds' nests which are so like the tree limbs that hold them as to deceive the keenest eye, and other nests closely resemble mosses or the ground upon which they rest. Insects there are, too, no end of them, which are to be found, if one has the skill to see them, upon foliage or branches having exactly the same coloring as themselves. One of the most curious of these creatures which are so well protected by their coloring from discovery is a butterfly discovered by a naturalist in the ju gles of Borneo. When flying it shows the most brilliant hues upon its wings, but when it settles upon a bush it can scarcely be distinguished from the leaves about it.

Game of Duplicate Letters. Here is a game that can be started at a moment's notice anywhere and that will make fun for many a quarter of an hour that otherwise would lag. One girl propounds a question such

"If I were a lamp post, what would

you do with me?"

The girl whose turn is next must answer with a sentence that shall have least three words in it that begin with the same letter as the noun "lamp post." For instance, she might reply:

"I would leap loyally to light you." The next girl may ask: "Will you lend me a dollar?"

The reply may be:
"I dare say I would donate it if I were not so dolefully poor." The answers that are made on the spur of the moment are often so ludicrous that they would make an owl laugh.

Fish and the Sixth Sense. It is stated that there are some indications that fishes possess a sixth sense, the organs of which are the pores of the head and of the latteral band. This band is a row of little canals connected with the external world by holes through the scales. In these cavities, under which runs a large nerve, are found nerve heads or terminations like those of other sense organs. The use of this apparatus is un-

No Tax Wanted on Fencing Wire Disquieting rumors have reached the WEST END GROCERY "Farmer's Advocate" that when the Dominion Government starts its Tariff Commission upon a mission of enquiry it will somewhere encounter a proposal to hothouse into existence a new industry, viz., the manufacture of wire. For fencing purposes, the farmers of Canada now practically depend wholly upon this material. Putting wire upon the free lis a few years ago was sane and sagacions step, and because one or two concerns, without either the facilities or the experience requisite to supply the demand, would like to mak" a "preserve" of this trade, we fail to see that the time has come for a reversal of the present policy. To clap on a tariff of twenty-five or thirty per cent would simply mean a tax of about \$150 extr a on the fencing required on a medium sized farm, for very moderate tariff advance the cost of fencing from ten cents to fifteen cents per rod. If anybody were now making the wire required, and had the plant and process hat would enable them to supply the farmers and the large number establishments now successfully en-gaged in the manufacture of wire fer eing, there might be some excuse for policy that would conserve a home industry and compel United States concerns, to set up their plants in this country. But this is not the case, and would dislocate a genuine industry mper farmers in the older sections

d spite the fact of a high rate of waves is reliable. for 1 bor, etc., prices have been tend-ing downward, because of c mpetit on and in sympathy with the declining cost of wire in the States, ever si c the organization of the U. S steel trust. Barbed wire is tree under the tariff, and also Nos. 9, 12 and 13 smooth galvanized wire, the ours chiefly used in wirefence manufacture. while on Nos. 7 and 11 there is a duty of twenty per cent. In our opinion. this should be wiped out also, and the revenue would not suffer, for these grades are not extensively imported, but if th y were tree farmers would be enabled to get a very much strong and more satisfactory style of fence without enhancing the cost. Under present conditions a wire tariff 'would be injurious to the interest of the farmer. It would demoralize the fence manufacturing is dustry for which wire is a raw material, and by torcing up the cost of fencing would cur ai production and consumption, hinder farmers everywhere throughout Canada in making improvement upon their farms. The Canadian G ve. ment received a very decisive mandate from the people at the recent general elections, which we apprehend they Brockville (leave) 9.40 am 3.40 p.m. able. Irigla nolitans makes a whining noise like a puppy, while the scievia gather in bands to hold regular concerts, which no doubt originated the fable of the sirens. Some naturalists have likened the note of the gurnard to that of the cuckoo. There are many different kinds of fish which give utterance to more or less musical notes The maigre, a large sea fish, when swimming in shoals, utters a purring noise that may be heard from a depth of twenty fathoms. Lieutenant White, in his "Voyage to the China Seas," relates that his crew and himself were extremely astonished by hearing certain musical notes from beneath and around the vessel. They were various, like the bass notes of an organ, the sound of belis, the croaking of frogs and a pervading twang which the imagination might have attributed to the vibrations of some enormous harp. For time the mysterious music swelled upon them and finally formed a universal chorus all round.

Notice to Creditors

In the matter of the Estate of Alice Earl late of the Township of Leeds in the County of Leeds, Spinster, deceased.

NOTICE is hereby given pursuant to "The Revised Statutes of Ontario" 1897, chapter 129, section 38 and amen'ing acts that all creditors and others having claims against the estate of the said Alice Earl, who died on or about the twenty-first day of January. 1905, are required, on or before the sixth day of April, 1905, to send by post prepaid or deliver to the undersigned, solicitor for Annabel Moulton, the administratrix of the estate of the said deceased, their Christian and surnames, 'addresses and descriptions, the full particulars of their claims, the statement of their accounts, and the nature of the securities, if any, held by them. Muly verified.

AND FURTHER TAKE NOTICE that after the last mentioned date the said administratix will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which she shall then have notice, and that the said administratrix will or be lightle for the assets or any part thereof to any person or persons whose cliams notice shall not have been received by her at the time of such distribution.

KENNEDY & KERGAN,

148 SHELBY ST., DETROIT, MICH. KAK KAK KAK KAK KAK KAK

"Yes, I know," said the trunk man, "some people think that everybody in Burope has his trunk marked with some sort of a distinguishing mark—a red line around it, or a blue stripe, or a yel-low diagonal stripe, or a star—so that it low diagonal stripe, or a star—so that it can easily be discovered; but as a mat-ter of fact there is no such custom gen-erally prevailing there, and never was, and if such a custom were general it and if such a custom were general it wouldn't work at all. Let me illustrate:

"There was an Englishman once who conceived the happy notion of so mark-ing his own trunk that he could identify ing his own trunk that he could identify it anywhere in any pile of baggage with certainty and despatch, and he had painted all around his trunk a broad black stripe. That was good and great as long as he had the exclusive use of the broad black stripe as an identifying mark of his own; but he didn't have it

ong.
"It struck other people favorably, as it had the original inventor, and other people had their trunks marked that the people had been people had b

people had their trunks marked that way, and finally a London trunk maker put it on trunks in stock. Therefore that stripe was only a confusing instead of an identifying mark.

"No, the custom of putting distinguishing marks of such character on trunks has never generally prevailed in Europe. The common custom there is to letter trunks, as we do here.

"We have lately made for a customer a steamer trunk which he has had us paint in English vermilion on either end of the lid, his initials being lettered on that red base. Bear in mind that the lid of a steamer trunk is shallow, that its of a steamer trunk is shallow, that its ends are narrow from top to bottom, and I will tell you the rest.

"In Europe it is a common custom for hotels to paste their labels, like steamer labels, on their guests' trunks. If you keer going long enough in Europe, and stopping at hotels, you will get your trunk covered with those hotel labels of all sorts, this being a custom that is now followed in this country also, to a greater or lesser extent.

"It is easy to paste those labels on the smooth, flat end of a trunk, and with them any distinctive markings that you might have there might soon be completely covered over; but there isn't room for them, or it would not be so convenient to paste them, on the narrow ends of the lid of a steamer trunk; and there, as long as it remained uncovered such a marking as I have described might be useful.

But the trouble about distinguishing marks in general lies in the likelihood of their duplication. It would be difficult if not impossible to devise a mark that could not be duplicated and multiplied. "A while ago we had in this country a little fad for a distinguishing trunk mark in the shape of a letter enclosed in some sort of device, say an S in a diamond. But you are not the only man in the world whose name begins with an S, not are you the only man who might think of heaving that, initial letter put in a of having that initial letter put in a diamond on his trunk; and there is therefore still danger of confusion. "If you were to walk along the bag-

If you were to waik along the bag-gage piles in any big baggage room in America it might surprise you to see how few pieces you would find with odd marks on them. You would find plenty with labels on them, but mighty few with bands or stripes or other od marks. You would see some peculiarly solid looking trunks marked, some with a single letter and some perhaps with a number, these the trunks of commercial travellers, and the mark being put on for strictly business purposes by the house owning them, which keeps an ac-count with each one of its trunks; and count with each one of its trunks; and you might see some oddly shaped, solid looking trunks with unusual markings and labels on them, these belonging to a theatrical company on the road, and you would not various other pieces odd as to construction or shape; but, after all, the great majority would be plain.

"Of course, the only really convenient

system of handling and identifying bag-gage is the American baggage check system. This is already in use on various trunk lines in the British Isles, and they are trying it on shorter lines in the continent. No doubt the time will come when in all the countries of Europe baggage will be checked just as it is here, and then there will be no further need there for painting trunks with bands and stripes, a practice even now not common."—New York Sun.

Princeton Student Improvises Foot-Warmer out of Light.

Warmer out of Light.

The introduction of electric lights into the dormitories at Princeton University during the last year has brought many new cares to the office of curator of grounds and buildings and the faculty as well. The undergraduates seem to regard the lighting system as an opportunity to study electricity in charge of the university that a serious fire or accident will be the result.

During the first month after the installation of the electricity the lights were nightly put out in some building or other by the burning out of a fuse. The cause was always the same-some student play go with the lights had made a short circuit, which left that part of the campus in darkness. This condition brought a series of raids from the curator and insurance agents, who last summer gathered in many electric fans connected with the power system in the crudest and most dangerous fashion. This winter a different set of problems has appeared. Instead of fans water heaters were introduced. Shortly after Christmas one young man, mindful of Santa Claus' beautiful mechanical toys, laid out a miniature trollew system in his room.

The undergraduate daily paper has come to the assistance of the college with the following announcement:

"Whether Frinceton undergraduates are

The undergraduate daily paper has come to the assistance of the college with the following announcement:

"Whether Princeton undergraduates are unaccustomed to electric lights, or whether the realization of danger does not enter into their mental make-up, is a question we will leave to others to decide. It is certain, however, that the electric lights have been put to some strange uses, thereby involving no small danger to the university buildings.

"In silence and patience the curator sought out and destroyed the beautiful red tissue paper shades which the aesthetic but thoughtless student had carefully placel around the electric light buibs, unmindful of the fact that it was merely a question of time before a fire would occur.

Finally, however, the limit of the curator's patience was reached when a student was discovered who had a long wire from the electric light to his bed, and was accurated to the constaint of the curatom of o

pute.

"The question of establishing a course it the use of electric lights has been suggested but we believe that the necessity can be avoided by the use of a small amount of common sense by the undergraduates." Newark News

Death by Pantomime.

-That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedying improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment-the kind of nourishment that cannot be obtained in ordinary food. No system is too weak or delicate to retain Scott's Emulsion and gather good from it.

We will send you a sample free. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

A BUILDING OF GLASS.

To be Built in Classic Design for a Na tional Bank of Des Moines.

the officials of the Des Moines National the officials of the Des Moines National Bank for a bank building of classic design, to be built of glass, after his new plan of glass construction. The building, if constructed, would be most unique and would be especially attractive, with its heavy columns of wire glass. The general plan follows:

umns of wire glass. The general plan tower lows:

It consists of a steel framework, supported by brackets, attached to the beams of the floors, in duplicate making two walls of opalevent wire glass, the glass being set in the steel framework.

The glass walls are appropriately a foot apart, making an insulating dead air space to prevent a loss of heat in winter and to prevent undue heat in summer.

The system of construction allows of any awaragement of floor plan, because windows are unnecessary; and for the same reason the exterior will admit of any style of treatment entirely free of the restrictions.

the exterior will admit of any style of treatment entirely free of the restrictures fenestration.

Mr. Eastman believes windows to be insurmountable evil in buildings because the admission of air through them which responsible for the dust, smoke, odors, sects, leakage of heat, danger of falling of admission of rain, not to mention the dager and necessity of washing them, loss papers, colds from draughts, etc.

The wall is fire resisting to a practical dagree, as it has been demonstrated that will glass will resist a hot fire, and though nicessary to replace it, the fire damage would be local and easily replaced.

The inside treatment allows of a marbk wainscoating half way to the celling with glass over so that the wall space is available for desks, counters, shelving, etc., or all sides of a room, and at the same time more light is produced than with windows.

N. Y. Mail.

AUSTRALIAN TEA DRINKERS. The tea drinkers of Australia rival hose of China and Japan, not, however, in the quality, but in the quantity consumed. The men especially drink the beverage in large quantities, and all day long and at a strength which would make the queue of a tea-drinking Chinaman curl. On Sunday morning the teadrinker starts with a clean pot and a clean record. The pot is hung over the fire with a sufficiency of water in it for the day's brew, and when this is boiled he pours into it enough of the fragrant herb to produce a deep coffeecolored liquid. in the quality, but in the quantity con-

fragrant herb to produce a deep collectioned liquid.

On Monday, without removing yesterday's tea leaves, he repeats the process; on Tuesday the same; likewise on Wednesday and so on through the week. Toward the close of the seven days the pot is filled with an acrid mash of tealeaves, out of which the tea is squeezed by the pressure of a tin cup. By this time the tea is the color of rusty iron, incredibly bitter and disagreeable to the uneducated palate. The natives call it incredibly bitter and disagreeable to the uneducated palate. The natives call it "real good old post and rails," the simile being obviously drawn from a stiff and dangerous jump, and regard it as having been brought to perfection.

MESSRS. C. C. RICHARDS & CO.:

Gentlemen,—My three children were dangerously low with diphtheria. On the advice of our priest my wife began the use of MINARD'S LINIMENT. In two hours they were greatly relieved, and in five days they were completely well, and I firmly believe your valuable Liniment saved the lives of my children. Gratefully yours,

ADILARD LEFEBVRE, Mair's Mills, 10th June, '99.

People Eating Less Nowadays. People Eating Less Nowadays.

"Health fads, no doubt, have their uses," said the manager of a fashionable restaurant, "but they are bad for our business. You would be surprised to know how many people go without breakfast nowadays. They call it the fasting cure. Some limit their meals to one a day while taking the cure. They don't touch food until the dinner hour, and then take a light meal. Otherse take a snaek in the morning—probably a toasted biscuit and a cup of hot milk, and a fairly substantial meal, without meat, late in the afternoon. People, as a rule, do not cat as much as they did a few years ago. Many of the doctors advise light eating and all the books His Doctor, Who Said There Was No
Hope for Him, Now Pronounces Him

"MY SON BILL." ocratic State of Things in the Brit

ish Consul's House. captain of a second-class cruise has lately returned to Devonpo

The captain of a second-class cruiser, which has lately returned to Devonport from the North American station to pay off, tells an amusing story against himself. The ship touched at one of the French Islands of the West Indies, and the captain went ashore in due course to return the visit to the British Consul. On his arrival he beheld one of the senior petty oficers of his ship, to leave, sprawling in a luxuriant chair on the veranda, and putfing at a big Havana. The captain curtly asked him what he was doing there. The sailor, between the puffs of his big cigar, blandly retorted that he was there on a visit to Bill. "And who the deuce is Bill?" snapped the skipper. "Why, the consul here—him as I'll allow you've come to pay your respects to." "How dare you speak with such familiarity of one of His Majesty's consuls:" explained the petty officer, complacently. "He's my son." And as the captain fell back breathless with indignation and increduilty, the consul l'm glad my old man was here to receive you!"—St. James' Gazette.

Have you heard of the New Century Ball Bearing Washing Machine? If you use it once you would ring this in on all your friends. It is the acme of perfection-you sit when using it—no handling of the clothes necessary to clean them perfectly—five minutes does a tubful. Costs only \$5.50.

Your dealer can procure them. We will send a descriptive booklet on application.

BRITISH AMERICAN ASSUR-ANCE COMPANY.

The seventy-first annual meeting of the shareholders of the British America Assurance Company was held at the of-fices of the company on Monday last, the President, Hon. Geo. A. Cox, presiding. The statement presented showed that the premium shoome for 1904 had been larger than that of any previous year in the company's history. In common with other fire insurance companies the British America suffered from the conflagrations at Baltimore and Toronto, but the action of the share-holders in writing off a portion of the capital after these disasters and subscribing for new capital to the amount of \$350,000, coupled with the favorable experiences during the latter months of the year, resulted in placing the company in a stronger financial position than it occupied a year ago. The security which it offers its policyholders is, as shown in the financial statement published in another column, \$1,874,042.95 The board of directors were unanimously re-elected, and at a subsequent meeting Hon. Geo. A. Cox was re-elected President and Mr. J. J. Kenny Vice-President for the ensuing year. capital after these disasters and sub Vice-President for the ensuing year

Energy, Integrity and Printer's Ink. senergy, integrity and Frinter's IBE.

"Untiring energy, strict integrity, the liberal and judicious use of printer's ink—these are the fundamental requisites of business, and many a man has been swept from the commercial board of industry because he failed to recognize their importance," said L. B. French, a successful merchant, at a recent meeting of the Salem (O.) Business Association. With a foundation of energy and integrity there is no limit to the height integrity there is no limit to the height of the commercial structure that may be built with the aid of newspaper advertising. On those rare occasions when a business edifice reared by advertising topples, the flaw is almost always trace-able to the foundation.

THE ANNEX DEFENDENCE VALUE OF THE

Japanese Admit a Loss of 50,000 Men and Russians' Loss is as Large.

Doubts Regarding Kouropatkin's Ability to Escape From the Ring Surrounding Him.

Tokio, March 10.-The Japanese troops occupied Mukden at 10 o'clock this (Friday) morning.

MUKDEN HAS FALLEN.

Thousands of Prisoners and Enormous Quantities of Stores and Guns Captured.

Yinkow, March 10 .- Mukden fell at 10 o'clock this (Friday) morning. The Russians are panic stricken. Thousands of prisoners and enormous quantities of stores and guns have been captured.

bloodiest of the war. Upon the ground that Gen. Oku alone gained are eight that Gen. thousand Russian dead. The reports from the other armies are expected to triple this figure. It is estimated that the Japanese have lost 50,000, making the joint slaughter thus far exceed one hundred thousand men. Details of the combat are lacking, but it is believed that the Japanese have cut the railway north of Mukden, leaving only the roadways and a light railway from Fushun to Tie Pass as avenues for the retreat of the Russians, but army headquarters re-frain from affirming or denying a report must be abandoned; and they received to that effect.

It is thought that Mukden is still in the hands of the Russians. The details of operations against Fushan are not yet to hand, but it is understood that, following the capture of Machuntan, the Japanese renewed the assault on Tietai and dislodged the Russians.

Various reports are in circulation con cerning prisoners of war, but it is impossible to obtain reliable information

possible to obtain reliable information as to the number taken.

Field Marshal Oyama, in an order directing the pursuit of the retreating Russians, yesterday prohibited his troops from entering Mukden in masses, in order to respect the tombs and sacred places of the Imperial Chinese household, and to protect the welfare of the inhabitants.

ESCAPE DIFFICULT.

Kouropatkin Will Have Hard Work to Extricate Army.

A London cable: The advices of the State Department at Washington to the effect that the Russians are in full retreat from Mukden is the only official news that has been received here of the Japanese victory, and beyond the fact that the Russians are in flight hardly anything is known of the situation. A telegram from Mukden, dated March 8, 10 a. m., says that heavy cannonading was going on northwest of the city, causing the walls of houses in the town to shake. An engagement was being fought near the Imperial tombs. Ten thousand Russians attacked Tafangshan, but were repulsed with severe loss. They but were repulsed with severe loss. They any of their dead on the field The Japanese were progressing with their operatoins on the heights five miles west of Mukden, and they were also pressing the railway. It is reported that there is continual skirmishing near Simminting, where the Japanese occupa-tion became more definite on Wednes-day. Traders there are not allowed to ship even non-contraband goods.

There is abundant speculation, and ttle else, in reference to Gen. Kouro patkin's chances of withdrawing his army successfully. Tokio believes i will be impossible for him to do so un Tokio believes it ess unforéseen circumstances arise, but there is nothing reliable to show that the Japanese will be able to convert the retreat into a rout. The predictions that they will envelop and cut off the Russians do not seem to take into account the undoubtable fact that the Japanese are as exhausted as their enemy. There are not wanting critics worthy of being listened to who point out that Gen. Kouropakin is not necessarily en-

The St. Petersburg correspondent of the Standard says it is considered that peace can be read in the laconic foreign bulletins announcing the Russian retreat to Tieling. He adds that no despatches the city. most of the despatches received Monday

OYAMA A NAPOLEON.

Masters of Strategy.

A St. Petersburg cable says: The ese guns westward Battle of Mukden has resulted in a Russan defeat. Field Marslal Oyama once more has proven himself one of the greatest masters of offensive strategy has already reached a point opposite the since Napoleon, while Gen. Kouropatkin station of Souhatai, half way between now is engaged in endeavoring to defend his title of master of successful rethat his left is swinging still further treats, and bring off his army, with its north for a blow at the line of communications which would realize Field Maraposition long ago was prepared with shal Oyama's plan for closing the railroad.

General Nogi, according to the datest authentic Russian reports, has already reached a point opposite the station of Souhatai, half way between treats, and bring off his army, with its north for a blow at the line of communications which would realize Field Maraposition long ago was prepared with shal Oyama's plan for closing the railroad. a position long ago was prepared with shal Oyama's plan for closing the iron this contingency in view. The problem view before the Russian Commander-in-Chief

The continuous battle is already the is much more difficult than the one he theless, Russian military men here ex-press a fair degree of confidence in Gen. Kouropatkin's ability once more to extricate his army and avoid a Russian Sedan. Besides his skill in rear-guard action, they base their hopes on the physical condition of the Japanese soldiers, who, though they are conceded to be the greatest marchers in the world, are well nigh exhausted by their strenuous endeavors of the last fortnight.

Only to the initiated is the news of the reverses positively known at this time. Emperor Nicholas and high milidetails of the beginning of the with-drawal as they appeared in excised por-tions of the official despatches given out yesterday.

VILLAGES TAKEN.

Desperate Hand-to-Hand Fight in Houses.

A Mukden cable: The chief objects of the bloody combat west of Mukden yesterday were the Villages of Ushuntun, seven miles west of Mukden station, and Tatchekiao, where the results practically were a draw, but a further turning movement has developed. The Japanese are extending their forces still

Japanese are extending their forces still further toward Tie Pass.

At dawn yesterday, after a night broken by irregular musketry fire and cannonading, the fight began at Ushuntun and Tatchekiao, both of which are large villages surrounded by high clay ramparts converting them into fortifications inversions to villa bullets. Each bouse opervious to rifle bullets. Each house had to be taken singly by hand-to-hand combats. The Russians held Ushuntur combats. The Russians held Ushuntur for a night, but were forced to withdraw at dawn the next day by a fearful fire of shrapael and Shimose shells. Rein-forced by riflemen and reserves, the Rus-

THEIR WAY IN RUSSIA. Brutal Officer Kills a Boy of Eight Years of Age.

London, March 13.—The Times publishe the following extract from a letter of a Russian lady in St. Petersburg to an English friend, under date of Feb. 10:

They put high duties on iron and steel nd, not content with that, the Canadian Government was actually giving a bonus on pig iron sent to England. These gentlemen might be very patriotic, very kindly disposed to us, and he would be very pleased to welcome them socially,

was wanted, and not more than ten minutes could be allotted to each person speaking, whereupon the officer drew his sword and struck the attendant on the hand, cutting off three fingers! And no protest can be made. The other day a little boy eight years old saw a Cossack officer on a horse in the street and put out his tongue at him, whereupon the officer drew his sword and cut the little boy over the head, who has since died in consequence of the wound received.

Woman Tells of Massacre in Streets of St. Petersburg.

London, March 13 .- Mrs. Millard Hun siker, wife of Colonel Millard Hunsiker representative of the United States Steel Trust in London, who was pros trated at the spectacle of the massacre in St. Petersburg, is beginning to recover somewhat. She has told friends that the newspaper accounts which were published here were in no way an exaggeration of the actual facts.

Mrs. Hunsiker could see from her bed Mrs. Hunsiker could see from her bed-room window a long sweep of the street where the killing of the workmen was at its worst. She tells how, fascinated, she watched the Cossacks charging through the crowded streets, again and again, cutting savagely at women and children and cleaving the skulls of un-armed workmen.

children and cleaving the skulls of unarmed workmen.

"I could not tear myself away from the horrible sight, but stood transfixed as the sabres of the soldiers rose and fell to the screams of the terrified people. The crowds at first seemed dumb with fear, then as they awoke to the realization of the soldiers' purpose they tried to escape. But there was no escape from those relentless demons.

"They fled, treading on each others' heels, while thte mounted soldiers struck at them time and time again. At last the sickening horror overcame me and I turned back into my room. I did not dare go to the window again, and the scene of that awful tragedy will never leave my mind."

Mrs. Hunsiker was ill for days after her trying experience and has not yet

her trying experience and has not yet entirely recovered. The Hunsikers are thinking of taking a quiet place on the Thames for the summer, where Mrs. Hunsiker may recover her health.

ROOSEVELT'S BLUNDER.

The London Globe Gets After the U. S President.

London, March 13,—The Globe, referring to Roosevelt's inaugural speech, says he appears to have got somewhat mixed in his ideas of the political geography of North America when he said: "Never before have men tried so vast and so formidable an experiment as the admin stration of the affairs of a continer istration of the affairs of a continent under the form of a democratic repub-lic." "We are unaware that the Wash-ington Government ever aspires, much less undertakes, to administer the af-fairs of Canada and Mexico. Both are as independent of the United States con-trol as of Patagonia or Chinese, and Processed has until now always been she saw no footprints. This evidence was brought out by the Crown in order to discredit Felix's story.

Another witness also said that Felix remarked that "there was a lot of fuss made over the death of one old woman; that thousands of people were killed in war, and nothing was thought of it; that there was a man killed in Brantford, too, and nothing came of that."

Dr. Richardson, of the Hamilton Asylum staff, swore he had examined Doyle were killed in the case of Patagonia or Chinese, and Roosevelt has until now always been careful to recognize that status. Cleve-land and Olney, in one of their 'spreadeagle' adventures, made something of a claim to extend Monroeism to the Dothinion, but the trouble they got into through that egregious blunder should by itself warn off such discreet states-lum staff, swore he had examined Doyle men as Roosevelt from treading so danmen as Roosevelt from treading so dan gerous a path."

THE MIDLAND MYSTERY. No Reason Known for Fred A. Mann's

A Midland report: After going over the ice of the bay between the town and the smelter, Chief Richards is sat-isfied that Fren A. Mann, the missing his nerve and struggled hereely. He was thrown and killed, while long trumpets fanfared. The chief bandit was a mild mannered old man, wearing a Japanese swod. He watched the executions unmoved. "They are spies," he said, "and we should kill them. Besides it is difficult to transport them."

"LONG LIVE ANARCHY!"

Cry of Unemployed at Riotous Meeting in Barcelona.

Madrid, March 13 .- A meeting of th memployed was held at Barcelona today to protest against the holding of the carnival while 40,000 of the working classes are starving. Those attending the meeting shouted, "Long live Anarchy!" and a number threw stones. The police charged the crowd and many persons were injured. A number of ar-

resis were made A bundred striking waiters here to day invaded the Cafe Colonial, which had excited the ire of the strikers by employing non-union waiters. The place was wrecked. A free fight occurred between the strikers and their symppthizers and the police, in which revolvers, chairs, and bottles were used. Forty-nine arrests were made.

FOUR MINERS KILLED

AND TEN OTHERS SERIOUSLY HURT BY BREAKING OF A CABLE, Wheeling, W. Va., March 13 .- By the

breaking of a cable in the Shrewsburg oal mine near Charleston to-day four miners were killed and ten others seriously hurt. Four of the injured will probably die. The killed were: Andrew Hunt, William McCurley, John McCurley and Edward McGlothin. Those fatally hurt were: Herbert Harrigan, James Sheets, William Martin and Chas. "The officers, as a class, make themselves most objectionable here. In one instance an officer went into a shop in the miners from work when the cable L. Hastings. Three cars were conveying the Sadovia street and asked the proprietor whether he would let him use his telephone for some message. He was left at the telephone, but as he staved ations which would realize Field Mar-hal Oyama's plan for closing the iron but it must be remembered that they were coming here to ask us to injure our-tree Tokio report that the railroad is

CAR STRIKE.

Service on the Various Roads Crippled.

A Collision Injures Twentynine Persons.

Hundreds of Strike Breakers at Work.

New York, March 13 .- With one colision, in which twenty-nine persons were injured, but none killed. New York has passed through the first day of the general strike on its rapid transit system. Beyond this accident and some minor easualties due to the abnormal conditions, the sum total of the day was annoyance and vexation to a million or more people usually dependent upon the Interborough Company's lines for transportation to and from their business. So far there has been little disorder. Sporadic encounters between individuals, some bad language, and the action of a few hoodlums in throwing missiles at passing elevated trains, tell this phase of the strike.

of the strike.

The annoyance to the multitude was increased by a wet snow which began falling this afternoon. Service on the elevated roads and subway, while not tied up, was badly crippled. Trains were run on irregular schedules in the underground, beginning with the early morning, but the elevated lines did not fare so well. On the east side practically no attempt was made to institute a service, while the Sixth and Ninth avenue lines, which serve the west side, were service, while the sixth and Ninth avenue lines, which serve the west side, were run in a fashion woefully inadequate; in fact, the elevated system of the Interborough's lines was pretty well paralyzed. The company's entire energy seemed to be directed to an effort to maintain service in the subway, and this was partially energeful.

was partially successful.
Strike-breaker Farley and his crew
of seven hundred or eight hundred men
were thrown into the tunnels of the company and gave this system their personal attention, and an enormous number of policemen were detailed to the trains poncemen were detailed to the trains and stations. The attempt to run express trains was abandoned early in the day. Every available man was put on the locals, and a fairly good schedule was maintained during the evening rush hour until the accident at Twenty-third street occurred. This upset things, but after strenuous efforts a service was after strenuous effforts a service was resumed on a headway of from five to seven minutes. The accident at Twenty-third street

was in the nature of a rear-end collision due, it is said, to the inexperience of the men running the trains. Two cars were smashed. There was a panie among the scores of passengers. Of the injured fifteen were so severely hurt that they had to be sent to hospitals. Traffic was delayed for over two hours, from 5 o'clock until after 7.

"FORBIDDEN TO SPEAK."

Welsh Revivalist Takes Refuge in Complete Silence.

London, March 13.—Mr. Evan Roberts, the Welsh revivalist, states that the Spirit has forbidden him to speak for

Spirit has forbidden him to speak for six days.

He has shut himself up at the house of his host at Godrecold Neath, and has wired to his secretary, the Rev. C. Mardy Davies, of Pontycymmer, cancelling his engagements at Margam, Taibach and Peycae, Aberaven.

The Par. William Pichards of Bothel.

The Rev. William Richards, of Bethel, Briton Ferry, where Evan Roberts was to have attended, called with a large bundle of correspondence for the missioner, and, in the hope of seeing him, was accompanied by the Rev. Edwin LEDio

But Mr. Roberts declined to see them. He keeps absolutely silent, and all his communications are made in writing.

It is stated that Mr. Roberts is again attacked by nervous prostration.

MENELIK IS TO VISIT EUROPE. Emperor of Abyssinia Said to Contemplate Trip Soon,

Geneva, March 13 .- That Menelik, the Abyssinian Emperor, is soon to take a trip to Europe is the information sent by a Swiss engineer employed by the Abyssinian Government in a letter to

his family in Zurich. According to the letter, the Negus intends to visit London, Paris and Rome, and the journey is to be made within a few months. His advent is arousing deep interest in these capitals, for he is more than a barbarian, and his little country has shown itself great in war, Not only this, but Europe realizes that Abyssinia is a valuable customer and

can be made much more so. Menelik traces his descent in a direct line to King Solomon and the Queen of Sheba.

AN UNDESIRABLE ALIEN. Countess Hohenfelson, Wife of Grand

Duke Paul, Not Wanted.

London, March 13.—The Daily Express publishes the following cable from Berlin: The report that the Czar, in forgiving the Grand Duke Paul, had also

agreed to receive the Grand Duke's wife, turns out to be inaccurate. The Grand Duke was himself mistaken as to the terms on which he was permitted to return to Russia. On his way to Moscow he left Paris with his morganatic wife, the Countess Hohen-felsen. At Eydtkahnen, the frontier town on the Russo-German line, the authorites refused to admit the Countess on the ground that she was an unde-sirable alien.

ed. The Grand Duke, therefore, continued his journey, while the Countess returned to Paris.

Brockville Times: Mr. Francis Wiltse, of Athens, who has been a here for about two years purchased yesterd y through William Shearer's Real Estate Bureau, the fine residence of Mr. Thomas H. Parsley, corner of Buell and Pearl streets.

On Wednesday last, in Smith's Falls, Rev. Mr. Sykes united in matrimony Mr. Wm. Henry Seymour, of Toledo, and Miss Lena May Johnson, of the same place. The bride looked charm-ing in a blue suit and a creem waist. The couple were attended by Mr. Richard Johnson, brother of the bride, and Miss Susie E. Stewart.

Marked fervor and enthusiasm characterized the sessions of the Holiness Movement held here last week, and the Sunday afternoon service was largely attended. Bishop Horner is carrying on the work he initiated with unabated zeal, and the reports issued of the extension of the field are very encouraging.

Those of our citizens who think dry measure should be used in dealing with wet goods haven't any time to lose. The local option by-law cannot be finally passed by the council until one month after the first publication thereof, and the board of license commissioners must hold their meeting for the issuing of licenses at least one week before the first of May. All licenses, however, are dated as being issned on May 1st.

On Monday, March 6, the coroners jury appointed to enquire into the circumstances attending the death of Wm. Dobbs, who was killed by a G. T.R. train at Kingston, brought in a verdict declaring that the deceased had not exercised due vigilance, and that the evidence did not show clearly that the train hed given warning of its approach. This verdict leaves the question of liability in a very unsatis-factory condition to all but the lawyers

who may be retained in the case. They had a long drawn out government crisis at Toronto, they are having a cabinet crisis at Ottawa just now, and in Athens we are having a happy combination of both. Our village council is up against the real thing in the crisis line, and the lovers of this kind of excitement are thoroughly enjoving themselves. At present a deadlock is imminent, and just how this will be avoided forms an interesting subject for conjecture.

There was a large attendance at the League meeting on Tuesday evening, and the interesting programme was thoroughly enjoyed. Mrs. Wm. Johnston presented the topic in an able manner and subsequently read a story written by Mr. Fred Blanchard of New York. Miss Edith Young also gave a reading, Miss M. Morris, Maude Wiltse and Mr. E. Mayety

With this country still buried under three feet of snow, and with a depth of North Toronto's local option by law seven feet in many of the roads, it is ten plows, a corrugated roller and drill.

Mr. Wm. Bess, 1st vice president o Delta Fair were in Athens on Tuesday The board of directors are already be stirring themselves in the interest of Mr. Tennant, expert accountant of their great fall exhibition—an institution of which they are becomingly tion of which they are becomingly proud. Their list of special prizes was a most attractive feature last year, and this matter will be first to receive attention this spring. Delta Fair has grown so rapidly of late that in giving a special prize a man brings his bus-iness before the leading farmers of the whole county. At the organization meeting of the Eastern Ontario Fairs Association held at Ottawa recently, President Morris and Mr. A. Stevens of Phillipsville represented Delta Fair, and brought home a highly satisfactory report as to the interest manifested and
