it would be hard indeed to imagine him sitting on the college lawn read-

The Crossing of Grains

The name of Luther Burbank, the Californian who crossed various species of flowers and obtained new and beautiful blooms, has become famous on the American continent. With this Californian wizard Professor Zavitz spent some weeks last year. It will be some time before the practical results of this visit are known in Ontario, but the work of crossing different varieties of the same kinds of grain is now well under way at the Agricultural college. There are varieties of oats, barley and wheat now growing without a name on the college experimental plots. In other words, there are new kinds of these grains, and the best of these kinds will be sown by farmers in the years to come. The crossing of grains is a tedious task. The professor himself confessed that, though he added that it was extremely interesting.

"Luther Burbank obtains his results from grafts and runners. Our work of crossing is more difficult."

been obtained by the crossing of dif-ferent varieties. The professor is simferent varieties. The professor is simply waiting to be absolutely certain of his results. Supposing smut does appear on these few rows of oats, he will doubtless again start out with the pur-pose of attaining this ideal with refer-

One of the aims of Professor Zavitz is to produce a spring wheat for Ontario which will be hardy, as free as possible from rust, with a compact head of fair length, without a beard, and with a grain of high milling qualpresible from rust, with a compact head of fair length, without a beard, and with a grain of high milling quality. There are at present varieties of wheat without the beard, which, the professor says, is of no practical value, but these varieties have not the requisite length of head to be good producers. On the other hand, many good yielders have bearded heads. Then, again, a whee that gives many bushels to the acre may not be high in milling quality. A combination of all the good qualities produces the ideal, and to get this combination is the problem of the experimentalist of the crosman and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is inserted. Thus the mixture is obtained. Then the head upon which this operation has been performed '1st under the pollen from another variety is inserted. Thus the mixture is obtained. Then the head upon which this operation has been performed '1st under the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out and then the pollen from another variety is quite green the stamens are taken out another variety is quite green the stamens are taken out another variety is quite green the

together? That was the idea that occurred to the professor. He knew that barley ripened a week or ten days before oats, and the problem was to make up this difference in time. Apparently he has succeeded, though the grain in the experimental plots have not come near enough to maturity to enable him to be absolutely certain of the results. Barley and oats that can be sown together and reaped together the results. Barley and oats that can be sown together and reaped together will prove another benefit to the On-tario farmers. It is the general con-clusion among agriculturists that a lowed to ripen and then threched. The oeardless barley is a poor producer. The heavy-producing varieties are all heavily bearded. Any farmer's boy can tell of the annovance and discomfort Select High-Class BUARDING College for BOYS of 8 to 15 years. Befinements of well-appointed Gentleman's home in lovely BEACON HILL PARK. from grafts and runners. Our work of crossing is more difficult, since we have to deal with seeds," explained

have to deal with seeds," explained the professor to the Globe.

"You see those few rows of oats there?" he added, pointing to a small patch of grain. "There we have oats upon which there appears no smut. I figure that between one and two million dollars a year is lost by Ontario farmers through smut in the oatfields. If we can produce a variety upon which smut does not come we can save that much money."

How the Crossing is Done.

have been growing oats and harley as feed for five stock. After threshing, the grains are generally mixed and the whole ground. If farmers eventually mix the grains, why not grow them together? That was the idea that occurred to the professor. He knew that Offers a Choice of 2 to 4 Positions 10 every graduate. SETLERS HAVE

HIGH TO COL

First Career of the State of t

per inent to this subject are two showing cor ferries and one giving a view of Seymour Narrows.

The points of view from which we invite Colonist readers to regard "The Awakening of the Island" are, speaking generally, five, namely:

The development of the Island as

The east bound traffic which the Island can contribute.

The advantage offered by the Island harbors as shipping ports for a large section of interior Canada.

The strategic value of the Island as a part of one of the greatest of the Imperial frontiers.

It will be necessarily impossible to

It will be necessarily impossible to much more than direct attention those several aspects of the ques-on. To deal with any one of them tion. To deal with any one of them in full detail would require many columns. But we regard it as a matter of no small importance that in discussing what is now considered a matter of great local importance, and we ter of great local importance, and we hope will come to be regarded as of great provincial and federal importance, we can without laying ourselves open to the charge of exaggeration make the claim that Vancouver Island may be treated in the broad and farmany he treated in the broad and the broad

Set of great pool importance, and we get the post of the content of the post pool of the pool of

The active the country of the control of the cont

purposes. If a line were drawn from the Southwest corner of Manitoba to the Northwest corner of Alberta it would be to the eastward of what would be to the eastward of what will be the greatest grain-growing region in the world, and for all this immense area, a land now rapidly filling up with people, where new towns are springing up and railways cannot be built fast enough to accommedate traffic, the Pacific Coast affords better shipping facilities than the Atlantic Coast, and yet up to the present the energies of the Dominion government and the transportation companies have been devoted to forcing this traffic to the Atlantic Coast. To this policy no objection can be justly this traffic to the Atlantic Coast. To this policy no objection can be justly taken, but it is submitted that the time has now come when greater attention ought to be paid to affording means whereby the products of the area mentioned can be brought to the Pacific Coast.

ported on a small area properly irrigated; in other words irrigation means intense farming, and intense farming means a dense rural population, and a dense rural population means the highest educational and social conditions.

THE ALL-RED LINE.

The London Chronicle, a prominent Liberal paper of the 19th inst, referring to the "All-Red" project, said:
"We can imagine nothing more damaging to the good faith and good name of the Liberal government, and few things more unfortunate for the maintenance of the inter-imperial relations on a good footing than a repudiation of the pledges so seriously given and so seriously taken."

It was expected that Sir Wilfrid mand

It was expected that Sir Wilfrid Laurier would have something to say on this subject in replying to the ad-dress of welcome at Quebec. His ob-servations were as follows:

"During the last days of the confernce I announced an idea which has ecome almost historic, the all-red ine. This means that the different parts of the empire wish to share the

friends of Mr. J. H. Turner that he will very shortly be in Victoria for the purpose of making a short visit to British Columbia and observing for himself the changes in condition nimself the changes in conditions since he left here to assume the office of Agent-General in London. When Mr. McBride was in London he was much impressed with the very excellent work being done there by our old friend and themer representative, and also with the desirability of giving him an opportunity to pay a visit and also with the desirability of giving him an opportunity to pay a visit to the province. In so doing he has given expression to the opinion of every one, who has at all considered the situation. Mr. Turner deserves the holiday, although it will not be much of a holiday either except that it will give him a change of occupation, and the provincial interests demand that he should be afforded an opportunity of seeing what has been portunity of seeing what has been transpiring here during his absence, It will be very gratifying, we are sure to Mr. Turner to be able to observe the results of the policy of develop ment into which as premier he so heartily and courageously entered. Few men had as great faith in British Col-umbia as J. H. Turner. In the hour

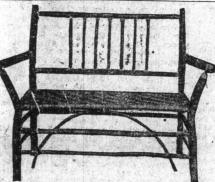

Summer Furniture Line

floor. We have there an exceptionally big lot. We this year placed a large order with the manufacturers, and this was further augmented by our receiving, through an error on the part of the transportation companies, a large shipment intended for some other firm as well as our own lot.

We are making the prices interesting on this account, and we advise you to come in if you want to see something real nice in Summer Furniture at a fair price.

Gifts

Fruit Canning Accessories

We suppose you intend to put up some fruit this year, as usual, and as berries and other fruits are now plentiful, you most likely will soon be busy-if not already.

You will need new jars, rubber rings and jelly tumblers - one always does. Jars are so ridiculously cheap nowadays it is folly to risk spoilage with old and unsafe ones, for the contents are always worth much more than the jar. Then there's the disappointment after one's labor-that's the most distressing feature.

We have the best kinds in all these lines

Worthy Enameled Kitchen Things

We dare say every woman who keeps house, has had at least one experience with poor enameled ware—the prices quoted on "seconds" and "thirds" are very alluring at times, and one is tempted to take a chance.

I With the prices of the very highest grade as low as at present it is fallacy to buy inferior grades.

¶ With ordinary care good enameled ware will last a lifetime—it is the safest to use and the cheapest in the long run.

I Only sort we sell.

Crystal Table Services for

A most practical offering to the "newlyweds" or "about-to-beweds," and one that will surely be appreciated, is a table service of crystal.

It may consist of a few dozens of the most necessary pieces, or may include glasses for every drinkable thing, as well as Decanters, Water Bottles, Oil Bottles, Finger Bowls, etc.,

It may be plain, etched, engraved or cut, according to the amount you wish to

as to the cost of construction and operation.

The engineer presented a report regarding the drainage of the property from the Willows to the sea, stating that the cost of widening and deepening the existing drain for a distance of 1,000 feet would be \$450. The report was referred to the roads and bridges committee.

A. T. Goward, local manager of the British Columbia Electric Railway Company, wrote regarding the request of the council that the company cut down its grade at St. George street, stating that no matter whatever work the company undertook it would look to the council for recompense. He suggested that the road bed might be lowered six inches or the street built up to the level of the roadbed.

The letter was referred to the engineer with instructions to prepade a report as to the coast of the two systems, raising the street level or lowering the tramway roadbed.

In this connection Councillor Newton rose and asked the question: "What are the rights of the tramway company on the streets?"

"All they can get," was Councillor in the offices of the lieutenate and sayed many to the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the offices of the lieutenate and the province in the province in the offices of the lieutenate and the province in the province in the offices of the lieutenate and the province in the province in the offices of the lieutenate and the province in the province in the offices of the lieutenate and the province in t

The finance committee was delegated as the body which should give him instructions on the matter.

In connection with the discussion on the point, Ald, Bird stated that Ald, Heaps had recently told him that Mr. John Hendry was not favorably disposed to holding a conference with the city on the question of the railway extensions as affecting the city's interests, but that he expected that in about ten days' time a full plan of the proposed work of the company would be laid before the council.

for any other mineral, but outside of that we find minerals scattered over the whole of the Island. . . We have coal measures running all the way through from Cowichan harbor way through from Cowichan harbor has been formed by the San Juan valley—quite promising deposits of both iron and copper. Then following down the coast, we have copper and iron occurring at the Sarita river. Then we have copper and iron occurring at the Sarita river. Then we have copper and iron occurring at the Sarita river. Then we have copper and iron or completely and iron or completely considered the sound iron or completely construct the sound iron construction in the sound iron or completely construct the sound iron construction is a sound in the construction of the same an ore of mercury. Passing along the coast, we have found iron ore up on Maggle river; in running one one of our survey lines we had to stake it off, as the magnetic attraction was so great that the compass turned

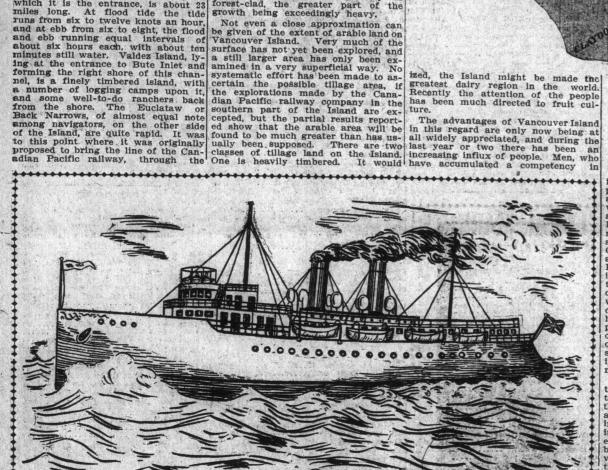

some idea of the magnitude of our resources there. Then up in the neighborhood of Comox the Chemainus Lumber Co. have a very fine timber area. They have one single block there of 20,000 acres, and others—all averaging about 50,000 feet to the aore. All this has not been touched yet. On the West Coast instead of fir we have cedar, and there is considerable cedar scattered all through siderable cedar scattered all through the timber limits on Cowichan Lake and Comox and to the north. But the cedar decreases as we go northward, and here we have more spruce. I have not been through the Klaanch portion of the country, but reports have been made by Mr. Fry and Mr. Gray. They report considerable areas of redar and spruce.

circumstance that it is separated from the Mainland of British Columbia by a small strip of water termed Seymour Narrows; and it is to devise ways and means of removing this disability, in so far as it may be feasible, that public attention is now being directed to an extent never before manifested. The Narrows proper are about 800 yards wide and about a mile and a half long, though Discovery Pass, to which it is the entrance, is about 23 miles long. At flood tide the tide runs from six to twelve knots an hour.

The Children's and the shaded.
The Children's cut of distances as how present inflicions to the country of a galaxy transport of the partners of the country of the country

The above map is designed to show the route recommended by Marcus Smith. C. E., for the Canadian Pacific railway: also the route for a railway to the northern end of the island, and in a general way the way by which connection may be made with the 100 miles.

Mainland Incidentally, certain other features are also shown.

The distance from Yellow Head Pass, which will be found just north of the letter "K" in Kootenay Central to Waddington necessary to get to the Island by way of Seymour Narrows. The Harbor, at the head of Bute Inlet, as shown by Mr. Smith's survey, is 546 miles. The estimated cost of the line in 1873 was \$33,000,000, which was considerably less than the cost of any other line across British Columbia, except one coming out to the coast at Dean Inlet. The distance from the head of Bute Inlet to Elk.

Arran Rapids

Arran Rapids

Cardero Channel

Cardero Channel Bay, on Vancouver Island, by water is 64 miles. By using rail to Frederick Arm, the distance would be somewhat less. It is thought probable by persons, who have examined the country, that by leaving the Smith line somewhere in the neighborhood of Waddington Canon, and striking across to Loughborough Inlet, the distance would be further shortened. This is one of the reasons why the Transportation Commission recommended a new survey.

Arran Rapids	1.100 feet	
Cardero Channel	1,350 feet	
Cardero Channel	1,140 feet	
Cardero Channel	640 feet	Q.
Middle Channel	1,110 feet	
Seymour Narrows	1,200 feet	
Seymour Narrows	1,350 feet	
Total	7,890 feet	
The route of the Island railway is that laid do	own by J.	1

The greatest elevation reached on this route in British Columbia is 3,590 feet, which is a short distance east of the crossing of the Chilcotin river. An almost equal altitude is attained at the divide west of Tatla Lake. This latter ascent is made in approximately 100 miles.

The line as drawn follows what Sir Sandford Fleming called "a perfectly feasible route," that is a route which avoided the bridging necessary to get to the Island by way of Seymour Narrows. The increase of the country to be developed is one containing great resources.

The greatest elevation reached on this route in British Columbia is indebted for the location of the lines upon this map. Mr. Grey has not traversed the country, between Alberni and Gold River, but he knows the route from Wellington to Hardy Bay very well, having, in point of fact, surveyed and located the line from Campbell River to Hardy Bay. Speaking from his knowledge now possessed by engineers the was available in 1873, a shorter and better route than that of Marcus Smith can be found.

The line as drawn follows what Sir Sandford Fleming called "a perfectly feasible route," that is a route which avoided the bridging of the between Duncan and Nitinat, or between Alberni and Gold River, but he knows the route from Wellington to Hardy Bay very well, having, in point of fact, surveyed and located the line from Campbell River to Hardy Bay. Speaking from his knowledge now possessed by engineers than was available in 1873, a shorter and better route than that of Marcus Smith can be found.

The line as drawn follows what Sir Sandford Fleming called "a bell River to Hardy Bay. Speaking from his knowledge now possessed by engineers the line was available in 1873, a shorter and Gold River, but where Alberni and Gold River, but when was available in 1873, a shorter and better route than that of Marcus Smith can be found.

The line as drawn follows what Sir Sandford Fleming called "a bell River to Hardy Bay very well, having in order to the line would not be country to be developed

The route from Yellow Head Pass to Fort George will be that The route from Yellow Head Pass to Fort George will be that followed by the Grand Trunk Pacific railway, unless a more favorable line can be found to the south of it and nearer Barkerville.

If such a line is available, the distance from Vancouver Island to Yellow Head Pass would be correspondingly shortened. One survey indicates that a still shorter route can be found by running as near due east as possible from the crossing of the Chilanco to Yellow Head Pass. This is also one of the reasons why a further survey was recommended. It must be understood that no difficulties are encountered in any part of the route as laid down. It is a perfectly feasible one. The opinion is held, however, that in

been prolonged to the coast. Mr. Grey did not feel warranted in doing any more than indicate the probable course which this road will follow through the central part of the province. Kaien Island, which is the site of Prince Rupert, will be found near the upper

In regard to appliances for embarking or disembarking trains, careful design is also necessary. Difficulties exist, no doubt, and these vary in different localities; but they can be readily overcome. The use of hydraulic or electrical power ensures freat rapidity of movement in embarking and disembarking trains, and gives absolute control. On the coast of Great Britain and Ireland, where there is a great rise and fall where there is a great rise and fall of tide, arrangements are required which are not necessary in non-tidal waters, because of the varying heights of the fixed land approaches above the sometimes it only goes that far, but generally provides for all such variations. During the operation of embarking or disembarking trains the steamer must, of course, remain in a practically fixed position in relation to the plers and lifts, and must be placed in a sheltered harbor. In practice, the fulfilment of these conditions presents no insuperable difficulty of an engineering nature, although the choice of the ferry stations at the terminal ports must be greatly influenced by considerations of the points mentioned.

Sometimes it only goes that far, but generally it develops into Diarrhoea, Dysentery or Summer Complaint and has a tendency to weaken the whole system.

When the bowels get loosened up in this way and you wish to check the unatural discharge without bringing on constipation, there is only one remedy to use, and that one is Dr. Fowler's Extract of Wild Strawberry. This remedy is not an experiment as it has been used in thousands of families dur-

The feasibility and safety of rail-way-ferry steamers is no longer a matter for debate. The question has been settled by actual experience in various parts of the world. For 30 gists will try to palm off a cheap subseasure safully worked in Denmark, chiefly for the conveyance of goods, but in later years, largely for the transport of through passenger carriages. In The feasibility and safety of rail- ing the past sixty-two years. later years, largely for the transport of through passenger carriages. In 1903 railway ferries were established between Gjedser, in the Island of Zeeland, the steamers making a run of about 27 nautical miles on the open water of the Baltic. This service has been carried out with complete success in all weathers. Two types of ferry steamers are employed: the first manufactured by The Milburn Co., carries an express passenger train in-olving a load of about 180 tons; the Limited, Toronto, Ont. Price 35c.

In regard to appliances for embark- can also be ascertained.

Looseness of The Bowels.

It is very seldom during the summer months that most people are not troubled with "looseness of the bowels."

Sometimes it only goes that far, but

The constitution, by-laws, and other maeshinery be provided, hawfms in view
spermanent organization.

The college of Colorado, was
then introduced, and delivered an interesting address on what had been
accomplished by trigation in that
state. Colorado, he said, was only an
other sister of Alberta in this respectand the conditions were much the
same. Little was known of Alberta
the visit of Mr. Dennis and The
United of the procession so far as irrigation was concerned. The highest
and earliest development of civilization
was in irrigated countries. Seveneighths of the food supply of the
world is produced from irrigated lands.
Irrigation is not necessarily a dry country proposition. It is equally applic
able where there is a large rainfall.

From experiments it has been proven
that every pound of vegedas of water,
The the whole country.

The old aphorism that "more water
means more grass," is true in regard
to grain crops.

From he had learned that the
highest rainfall was 35 inches in any
year. In Italy the average was 36
inches, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, where they had six cuttings of
grass per year, and a a consequence
the separation of the carbon necessary
for plant life from the carbonic acid in
the rail is more rapid.

The model system of irrigation is to

ner in which the reports of the proceedings had been reported; to the C. P. R. for the special rates which the delegates received; to the citizens of Calgary for courtesies received, and, as the chairman said, to everybody in general, "including ourselves."

It was decided to hold the next convention in Vernon, B. C., although the delegates from Kamloops made a strong bid for it, but were satisfied that even although they could not get

that even although they could not get the convention all the delegates from Alberta and Saskatchewan would have to pass through their city.

Prof. Carpenter then resumed his address, giving an interesting history of irrigation in Colorado and other southwestern states. This concluded the first meeting of the first irrigation convention ever held in western Canada.

The control of the co

ada.

An extremely able paper was then read by C. W. Peterson, as follows:
To the Chalrman and Members of the First Western Canadian Irrigation

Convention.

The enormous capacity of irrigated lands for the production of succulent foods of all descriptions, renders it one of the greatest factors in any system of farming under irrigation. It is appropriate to remark just here that Convention.

Mr. Chairman, I have been asked by the committee on arrangements to prepare a paper on "The Industrial Development Fellowing in the Wake of Irrigation." While I am not technically qualified to dear with this subject, I will submit a brief observation.

The labor problem stands in the way

highest rainfall was 35 inches in any year. In Italy the average was 36 inches, where they had six cuttings of grass per year. In this northern country the sun power is stronger than further south, and as a consequence the separation of the carbon necessary for plant life from the carbon necessary in the air is more rapid.

The model system of irrigation is to sive the plant just sufficient moisture to ensure growth and development. If too much water were put on the ground the plant might be smothered. The ground should also be well prepared before the moisture was placed on it in order to produce the best reresults.

Evening Session.

At the evening session, before the continuation of Prof. Carpenter's address, the convention passed votes of thanks to the press for the fair man-

mon disorders of the several varieties of the animals on the farm, frequentity prove an immense boom to those living in isolated places and remote from professional assistance. The objections to this plan are, however, that the composition of the remedies are the secrets of the proprietors, and many men very properly want to know what they are giving to their stock.

A third plan is to ask the veterinary surgeon usually employed to supply a small stock of mixtures for the different common disorders of animals. These should be accompanied by plain directions for use, and when the emergent case has become chropic, or has proved of a character obviously requiring professional skill it is then easy to say to the veterinary surgeon on his arrival, "I have given one or more of your drinks," when he will be in a better position to decide what further measures to take than large and the dressing repeated.

Mith an example of a simple blister for the horse, we may complete our isst of useful stock mixtures: —Pow-darch 10 drops; lard, 10 z.

With an example of a simple blister for the horse, we may complete our isst of useful stock mixtures: —Pow-darch 10 drops; lard, 10 z.

For splints, spavins, ringbones, and whose that have been carefully tended of mercury to seven parts of lard.

In using the blister, the part should be first clipped closely and the ointiment vigorously rubbed in with the directions for use, and when the emergent case has become chropaic, or has proved of a character obviously requiring professional skill it is then easy to say to the veterinary surgeon on his arrival, "I have given the interpretation of the half for four or five minding the blister of the horse, with the part should be the limit of the half for four or five minding the part of blindide of mercury to seven parts of lard.

In using the blister, the part should be first clipped closely and the ointiment vigorously requiring professional skill it is a little bit more troublesome.

A week before the plants are those to cannot expect home will be in a better position to decide what further measures to take than if something of unknown composition had been administered.

The fourth plan is to keen a stock complete.

The fourth plan is to keep a stock of the more common and useful drugs in separate bottles or receptacles, with a glass measure or two, and weights and scales for compounding them as occasion may arise. The different plan of them are occasion may arise.

complete

drachm; water, I quart.

No stable medicine-chest is complete without a bottle of ambrocation, but it is a safe thing to say that the abuse of such preparations has wrought more harm than they have get a number of mixtures of drugs made up the chemists, according made up the chemists, according to some recognized formulae, and keep them ready for immediate use, of course tightly corked and sealed, and properly labelled. Examples are drinks for colle in horses, fever mixture for calves, lambs, and young jies and dressing drinks for colle in horses, fever mixture for calves, lambs, and young jies and dressing for minor wounds and injuries.

Another plan is to stock the preparations sent out in compact form you will known firms of animal medicine vendors, whose medicine chest is complete without a bottle of embrocation, younds and injuries.

Another plan is to stock the preparations sent out in compact form more mixture, and it is better by well-known firms of animal medicine vendors, whose medicine chest is complete without a bottle of subnovable and the specific remedies for the common use, and sold by chemists, than to attempt its domestic fitted an animals on the farm, frequention, prove an immense boom to those it in the prove an immense boom to those it in the prove an immense boom to those it in the prove an immense boom to those it in the prove an immense boom to those it in the possibility of the prove an immense boom to those it in the prove an immense boom to those it in the provention of the animels on the farm, frequention in common use, and sold by chemistry and the scale of the animels on the farm, frequention in common use, and sold by chemistry and the provention of the scale of the animels on the farm, frequention in common use, and sold by chemistry and the provention of the provention of the scale of the animels on the farm, frequention in common use, and sold by chemistry and the provention of the provent

if it is a little bit more troublesome.

A week before the plants are to be put into the new bed, some time about the middle of August, they are separated from the old plants by cutting the runner, abd watered so as to be kept growing. Separated from the parent plant, the young ones will become thoroughly established on their own roots and develop strong and vigorous, ready to be lifted without suffering a shock.

AROUND THE FARM

On the farm at often happens the remedical attentions of consumers of the state of the way seed for the consumers of the cons

tables, being a much cleaner job than doing it with a watering can, besides giving more benefit to the plants, in proportion to the water carried. The cans will last more than one season. We have some experiments in view. Lettuce thrive on the water treatment. Raddishes are improved by nitrate of soda, which can be dissolved in water, and beets are benefited by sait. We intend to plant a double row of each, with a can here and there between the rows, and administer the doses in that way, comparing them with rows of the

Milk, butter and cheese are always cash products, and the dairyman is not obliged to wait six months or longer for return from his efforts. Consequently he runs no bills of any kind. He sells for cash and buys for cash and gets the benefit of al discounts. He always has money, and many dairymen pay their hired men every Saturday night, the same as manufacturers do.

facturers do.

Dalrying is not a good business, however, for the man who likes to be away from home part of the time and who entrusts the management of his

business in part to others.

Dairying by proxy seldom proves satisfactory or remunerative, and men with many frons in the fire had better cut out dairying; they will do far better in some ether line of livestock farming that does not require the constant watchfulness and personal sustant watchfulness and personal su-pervision.

A Feeding Experience.

The format planes of memory better of the protection of the protec

Tennant, a lumberman of William, who has undertaken to supply vari-sus railroads with wooden ties, pass-d through yesterday morning. He is

there.

"If we don't get ties very soon," he said, "the G.T.P. may have, to quit work for a time. At present thousands of ties are being consumed daily and there are no more ready. The supply on hand will not last very much longer, but I hope to get all I want in British Columbia, no matter what the cost will be."

Building Progress for This Year Will BRITISH PARLAMENT

Kamloops had its commencement away back in the beginning of the last century—in 1813 in fact—when the Hudson Bay company selected the confluence of the North and South Thompson rivers as a site for one of their main posts, says the Standard. It is a curious fact that in the development of the great west the original H. B. C. posts have in the natural order of things become centers of modern business activity and in many cases have become great cities. Winnipes, St. Paul, Edmonton, Calgary and Fort William were all Hudson Bay posts, which the original Ideators had chosen for natural and apparent reasons as distributing points. Kamloops was chosen for the same reasons, and the wisdom of the choice has been made apparent by the steady development of the city keeping pace with the opening up of the district of which it is the center. Each year has witnessed substantial growth, but in no one year has it reached any such an extent as it has during the present one. cases have become great cities. Winnipeg, St. Paul. Edmonton. Calgary and Fort William were all Hudson Bay posts, which the original ideators had chosen for natural and apparent reasons as distributing points. Kamboloops was chosen for the same reasons, and the wisdom of the choice has been made apparent by the steady development of the city keeping pace with the opening up of the district of which it is the center. Each year has witnessed substantial growth, but in no one year has it reached any such an extent as it has during the present one.

Considerable interest has been occasioned by the fact hat the United States authorities are showing no haste to prosecute the case against the Carlotta G. Cory which will be learned in the local admiralty Court. It is a well known fact that the Admiralty Court is especially speedy in giving judgments and the fact that the Rush, the United States authorities are showing no haste to prosecute the case against the Carlotta G. Cory which will be say well known fact that the Admiralty Court is especially speedy in giving industributions and the fact that the Rush, the United States authorities are showing no haste to prosecute the case against the Carlotta G. Cory which will be say well known fact that the Admiralty Court is especially speedy in giving industributions and the fact that the Rush, the United States authorities are showing no haste to prosecute the case against the Carlotta G. Cory which will be say well known fact that the Admiralty Court is especially speedy in giving industributions and the fact that the Rush, the United States authorities are showing no haste to prosecute the case against the Carlotta G. Cory which will be say the fact that the Admiralty Court is especially speedy in giving industributions and the fact that the Rush, the United States authorities are showing no case of the Carlotta G. Cory which will be say the case against the Carlotta G. Cory which will be say the case of the case against the Carlotta G. Cory which will be say the case of

one year has it reached any such an extent as it has during the present one.

Counting up the buildings now, in course of construction, we have the new Ramsey & Philip block, to cost \$30,000; the store and warehouse for N. S. Dalgleish, which will cost, when completed, \$20,000; the new Leland hotel, which is being built for R. Dowswell at a total cost of \$30,000; the school house, which is to be completed at a cost of \$35,000; the addition to the provincial home for old men, costing \$4,000, and several residences which will cost from \$1500 to \$3000. In the list of buildings not yet commenced but upon which operations will begin shortly, there is the court house and provincial government offices to be erected at a cost of about \$70,000. The new buildings to be erected for the St Ann convent will cost \$20,000. Mr. C. T. Cooney has in view the erection of a buildings on the Govett property recently purchased by him, which will cost \$12,000, and will bring the total value of buildings now under construction or well under way to realization up to \$273,000. way to realization up to \$278,000

the Carlotta G. Cox was captured, and what were the respective positions of Canada and Japan in regard to fishing rights in these waters.

Sir E. Grey, (Northumberland, Berwick).—His Majesty's ambassador at Washington has reported that he is informed by the United States government that the sealing schooner Carlotta G. Cox, of Victoria, British Columbia.

gers on Steamer Tango Maru Which Left Yesterday

Tuesday over 1,500 Japanese reachcd William Head quarantine station.
The steamer Kumeric of Andrew Weir
& Co., which has 6,600 tons of Welsh
ocal in her holds for the United
States navy to be discharged at Bremderton, brought 1,177 Japanese from
Honoliu, which port she left on July
t 13th, and the Aki Maru of the Nippon
Yusen Kaisha line, which sailed from the outer dock Tuesday
for Yokohama, and the usual ports of
the Far East, carried among her passengers Admiral Baron Gombei Yamonoto, one of the Genro or supremmouncil of Japan, and probably a future premier for the Progressives are
now seeking to have him elevated to
that position following the defeat of
the Saionji cabinet, which they believe
they can encompass with reference to
the Kumerie when the arrived at the
Hawalian islands with a cargo of Portuguese laborers from Funchal, Madniera, were several cases of smallpox,
and at Yokohama, from which port
comes the Ami Maru, there is plague.
Therefore the quarantine officers will
to the company of the Saint
at Vakohama, from which port
comes the Ami Maru, there is plague.
Therefore the quarantine officers will
to the standary of the Kumaric are, it is stated, to be discharged
at Vancouver, will those on the Aki
Maru will be departed here. The Aki
Maru left Yokohama on July 10th. a
day prior to the Empress of China,
which reached port, on Sunday.

Honduras Had to Pay
Mexico City, July 23—According to

DESIGNER FIFE DECLARES CHALLENGER IS ON WAY

America's Cup Next Year For a Certainty

New York, July 22.—Wm. Fife, the designer of Sir Thomas Lipton's cup yachts Shamrock II and Shamrock III, declared Saturday on his arrival from Europe that a British challenger for the America's cup would likely be found in American waters next year to try to lift the historic international yachting trophy. No intimation was given by Mr. Fife as to whether the challenger would come from Sir Thomas Lipton or some other yachtsman in England, but when asked if the report from Scotland that he had accepted a commission to design a Shamrock IV. was true he smillingly replied that he would have to decline to make an answer under the circum-

to make an answer under the circumstances.

Mr. Fife was a passenger on the Cunarder Lucania, which came into port Saturday. He will remain in this country for three weeks and his purpose in coming is to attend the races for the Canada's cup which will be sailed in the middle of August in Lake Ontario off Port Charlotte, N.Y. The Canadian challenger for the Canada's cup, the Crusader, was designed by Mr. Fife, who made it clear that he felt that a British challenger would have an excellent chance of carwood the control of the

pars. It was the custom a few years ago for the Thames Conservancy to the course for househoats, launches, and other crafts, but this year the number has dwindled down to forty-eight. The reason of this decline is said to be the increased facilities for travel by rail and motor car are most responsible, and also the popularity of the club enclosures.

Artillery visit to Canada (from Daily Mail): The king, to mark his interest in the coming visit of a team of British Artillery volunteers to Canada, has presented a cup worth to the competed for by rival teams in the contest. The Prince of Wales has contributed £50 towards the expenses of sending out a detachment, and the Duke of Connaught, who is subscribing £250 has express-

Feminine Fancies and Home Circle Chat

sence. The mitteu sleeve will now be the connecting link between the elbow sleeve, and the long sleeve, and this style is already being largely adopted by many women. There are always certain sensations in the world of dress, which appear towards the end of each season, and which save the situation when the famine in ideas appears to threaten. This year filet lace has taken first place, and nothing seems likely to oust it from its dominion, before the close of the season transfers the scene of action from London to Scotland or abroad as the case may be. Some of the newest sowns are almost reminiscent of fishing nets, so wide meshed is the ground work, and really accentuates the idea, that they have been netted in the cottage of some fishermen. When on the subject of hats just now, I forgot to say that among the many eccentricities which are crowded on the new halts, without a series of order of drrangement, is pure white maiden hair ferm. This is often combined with natural colored flowers and leaves, the result often alas! being

Disparaging People

There are poople who disparage everything, and everything, and everything, the conversation is made under the c

largety of adverse judgments of everybody and everything. Where every character is dissected and the flaws rather than the good traits held up to view. Whether these judgments are just, or not, the effect upon the children is the same. They learn suspicion, contemptuousness and denunciation, three things quite unnatural to the child mind. As a result we have pessimists, made such, not by the hard experiences of life, but by the hard experiences of life, but by the habit of looking on the wrong side of everything. Parents should remember that their view points, are those of the little ones, and will be theirs, until each young life has its own experiences.

A Few Reminders

Strong green tea, well sweetened and set about in saucers in the rooms where flies are most numerous, will to the consistency of cream be done in the consistency of cream between the flaws in th

where flies are most numerous attract and destroy them. This plan is much to be prefecred to the unsightly fly papers and much kinder to the poor insects, as the fly papers catch them alive and condemn them to a slow and lingering death.

Ingredients: Two quarts of stwo ounces of butter, one small two ounces of butter, one small cu-cumber, one large lettuce, one table-spoonful of flour, three eggs, half a pint of cream. Method: Prepare the stock, melt the butter in an enamelled pan, and put in the cucumber peeled and sliced and the lettuce finely shred-ded: cook for ten minutes without browning. Mix the flour with a little Daily Dinners for the Week

Sunday — Roast chickens, bread sauce; potatoes, pears, fruit salad, devenue for twenty to thirty minutes. Beat up the yolks of the eggs with the cream, and put into the soup tureen; pour care, the boiling soup gradually stir-

hains; thence

CERTIFICATE OF THE REGISTRA-TION OF AN EXTRA-PROVINCIAL COMPANY. "Companies' Act. 1897."

"Companies' Act, 1897."

I hereby certify that the "States Lumber Company" has this day been registered as an Extra-Provincial Company under the "Companies' Act, 1897." to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends except the construction and working of railways.

The head office of the company is situate at Davenport, Iowa, U. S. A.

The amount of the capital of the company is five hundred thousand dollars, divided into five thousand shares of one hundred dollars each.

The head office of the company in this province is situate at Victoria, and Albert Edward McPhillips, barrister, whose address is the same, is the attorney for the company.

The time of the existence of the company is twenty years from the seventh day of June, nineteen hundred and seven.

The company is limited.

Given under my hand and seal of office at Victoria, Province of British Columbia, this eighteenth day of July, one thousand nine hundred and seven.

S. Y. WOOTTON,

Registrar of Joint Stock Companies.

S. Y. WOOTTON, Registrar of Joint Stock Companies.

Registrar of Joint Stock Companies.

The company has been established to operate a saw mill or saw mills, to buy, sell and deal in logs and lumber, to acquire and hold such real estate as may be appropriate for the conduct of its business, to dispose of such real estate at its pleasure; to build and operate lines of railroad, and carry passengers and freight for hire, and to construct, lease, and operate docks, wharfs, warehouses, and elevators, own and operate tugs, barges and other vessels, to improve rivers and other waters, and conduct the husiness of sorting, holding, handling and delivering logs or timber; and to purchase, hold, own and sell stock in other corporations, and the objects for which it has been registered are the same except the construction and working of railways.

THE COLUMBIA

The Sunker Steamer.

The steamer Columbia was an iron with his ship. Flynn is also credited with saying that not one of the hundred odd women passengers were saved.

Shortly after the collision the steamers Roanoke and George W. Elder and the steam schooner Daisy Mitchell, all southbound, came on the scene and stood by. The Elder took the San Pedro in tow, and the intest resonable to splinters; one of the mark. The stem of the San Pedro was smashed to splinters; one of the marks was snapped off at the deck. She was satisfance to the Elder, but this was declined. She pleked up a life boat and a rart of the Columbia.

Near the scene of the wreck the Roanok pleked up a life raft and found underneath it the dead body of a place of a place of the wreck the Roanok pleked up a life raft and found underneath it the dead body of a place of a place of the Wreck the Roanok pleked up a life raft and found underneath it the dead body of a life place of the Wreck the Roanok pleked up a life raft and found underneath it the dead body of a life place of the Wreck the Roanok pleked up a life raft and found underneath it the dead body of a life place of the Wreck the Roanok pleked up a life raft and found underneath it the dead body of a life place of the Wreck the columbia.

Near the scene of the wreck the Roanok pleked up a life raft and found underneath it the dead body of a life place of the Wreck and a raft of the Columbia.

Near the scene of the wreck the columbia and the rescued remained unanswered. The resolution of the victims and the rescued remained unanswered. The resolute facts that Butler was drowned and that Captain Doran went down with list ship, few details of the captain of Province of the Wreck the last the was a life to an appellant scounsel, who will at the collembia was registered at the server and the province and the province and the province of the work and the resolute of the work and the rescue of the work and the resonable of the work and the resonable of the work and the resource of the work and the

Cheers).
After a brief reference to the re-After a brief reference to the remarkable spectacle presented by the colonial conference, whose object, he said, was to achieve imperial unity, the premier concluded by thanking his audience once more for their kindness to Lady Laurier and himself. On leaving the building Sir Wilfrid faced a mass of cheering citizens in the square, and in reply to cries of "speech," briefly expressed his pleasure at finding himself at home again. Premier and Lady Laurier then drove I

NEW DEPARTURES

No Case Against Great Northern Railway Assistant Paymaster

Vancouver, July 22.—R. C. Johnston, the Great Northern Railway assistant roadmaster for the Everett-Vancouver division, was acquitted in the County Court by Judge Cane, Johnston was charged with conspiracy to defraud the company by padding the pay lists and himself abstracting money for work alleged to have been done by Chinamen, but which was really never performed.

Judge Cane held that the only witness for the crown was Tierney, the local section foreman, who claimed in himself to have been a party to the conspiracy, but he could not believe he evidence, and as it was uncorro-

CAUSE SEVERAL

Former Emperor Persists in Efforts to Keep Hold of Power

The Dominion railway commission supporters placed in Office will meet here on July 31.

Capital Full of Intrigues-Property of Foreigners Apparently in Danger From Rioters

Tokio, July 22.—Telegrams from Seoul state that intrigues on an extensive scale are now in progress. It is declared that the palace is now a hotbed of illicit plots and conspiracies.

cies.

The placing on the throne of the new The placing on the throne of the new emperor has aggravated the jealousies between the followers of his mother, Princess Ming, and the mother of Prince Ying, each having a large following. This state of affairs is be-Prince Ying, each having a large following. This state of affairs is being taken advantage of by the politicians, who are distrustful of one another. Dissatisfaction is spreading rapidly and riotings of the people throughout the peninsula are apprehended.

Seoul, July 22.—The discovery of a plot against the throne resulted in the arrest between midnight and dawn today of one of the elder statesmen of Korea together with Pak Yung Ho, who was yesterday appointed minister of the imperial household; Yi Do Chai, grand chamberlain of the former emperor, and four Korean officers

grand chamberlain of the former emperor, and four Korean officers

The Japanese residency here has placed the whole responsibility for the arrests made this morning generally on the throne, disclaiming intervention, which it is asserted would be an unnecessary invasion of affairs which are purely Korean.

On account of the fact that every Japanese soldier here is needed to guard the barracks of the Korean troops, guards have been refused to protect houses of foreigners in the suburbs and their occupants, who have been threatened in anonymous communications, and have been given refuge in the foreign quarters of the city. Reinforcements of Japanese troops are not expected until July 24, and it is impossible to adequately patrol the city so as to prevent the gathering of the mobs which have assembled during the last two days.

sembled during the last two days.
The intervention of the former emperor in the affairs of today is evidenced by the fact that he prevailed upon his nephew, the present emperor, to refuse his signature to a proclamation framed by the cabinet, the object of which was to calm the people and restore order.

The appointment of Pak Yung Ho to his present post is another evidence.

Business men in the city remark on the number of strangers who are here every day. With a large population such as Vancouver's, the addition of one or two hundred people a day is not noticed, but the fact remains that not only are hotels crowded, but down town rooming houses are all full, and accommodation is sometimes difficult to obtain.

ACTIVITL ON TEXADA

Vancouver, July 22—"The iron mine in the southwest of Texada Island is being developed by James A. Moore, a Seattle capitalist," said A. Grant, manager of the Marble Bay mines, also on the island. "While iron predominates, this property is now being worked for copper, a layer of that ore overlying the iron at various points. The grading for a tram line from the mine to Gillies Bay has been completed and ore bunkers are being erected.

D. Fogh, of Seattle, and Swedish capitalists, are opening a property at
