ORIGINATED BY AN OLD FAMILY PHYSICIAN.

GENERATION AFTER GENERATION HAVE USED AND BLESSED IT.

Every Mother Should have Johnson's Anodyne Liniment in the house for Croup, Colds, Sore Throat, Tonsilitis, Colic, Cuts, Bruises, Cramps and Pains, liable to occur in any family without notice. Delays may cost a life.

Every Mechanic, or person exposed to accidents etc., should keep it near at hand; for it acts promptly, is Soothing, Healing and Penetrating. When once used always used.

Every Traveller Should have a bottle in their satchel. It can be used Internally or Externally in more cases than any other medicine. Cures head-aches if inhaled.

Every Sufferer From Rheumatism, Sciatica, Neutralgia, Nervous Headache, Diphtheria, Coughs, Catarrh, Bronchitis, Asthma, Cholera-Morbus, Diarrhœa, Lameness or Soreness in Body er Limbs, Stiff Joints or Strains will find in this old Anodyne relief and speedy cure.

THE REASON WHY—Generation after Generation have Used and Blessed Johnson's Anodyne Liniment, is because it cures when all other remedies fail. It was devised and used for years in the private practice of old Dr. Johnson, to treat inflammation liable to afflict any person on earth; and which cause the danger in all the above troubles. The medical advice around each bottle is worth ten times the price.

How to Use Economically. Advice sent free. All who buy direct from us, and request it, shall receive a certificate that the money will be refunded if not abundantly satisfied. Price, 35 cts. by mail; 6 bottles, \$2.00. Express prepaid to any part of the United States or Canada. Duty also paid I.S. JOHNSON & CO., Boston, Mass.

MONTREAL PHARMACEUTICAL JOURNAL. P. O. Box 2144, Montreal.

F. L. BENEDICT, Secretary.

CORRECTION. - In our report of the annual meeting, published in last month's issue, on page 48A and 3rd paragraph from foot of the page, Mr. Gray was made to say: "I do not partake of the opinion that we should have all our tinctures according to the B. P.," whereas it should have read: "I do not partake of the opinion that we should not have all our tinctures according to the B. P." We regret that this error has occurred, and take the first opportunity of correcting it.

THE LANCTOT CASE.—Judge Charland has given his dec sion in this important case, which was taken by the Pharmaceutical Association against E. Mathieu for being registered as a partner with H. Lanctot without being a licentiate of pharmacy The learned judge decided that, as Mr. Lanctot has sole control over the shop as regards sales, the preparation of all the medicines and of everything relating to the pharmaceutical portion of the business, therefore the requirements of the law, as set forth in clause 4033 of the Pharmacy Act, had been complied with. The judge stated that he could find nothing in the Act which would prevent a licentiate from obtaining the financial aid of his friends or from dividing the profits of the business with any one as long as he has control of the pharmaceutical portion of the business, and consequently judgment was given against the Association with

We publish the full text of the judgment as given in La Presse June 30, 1893.

THE following letter appeared in the Canadian Druggist:-

To the Editor of the Canadian Druggist :

DEAR SIR,-THE MONTREAL PHARMACEUTICAL JOUR-NAL, Lyman Sons & Co.'s organ, has, in its May number, an editorial on an item which appeared in the last issue of the Canadian Druggist.

I take exception to the paragraph numbered 7 of said ar-

The party who presented the now famous circular to the Council, did so on the request of a member of the Quebec Pharmaceutical Association. I hold that every member of the Council is expected to present to the Council in session any communication or suggestion entrusted to him by members of the Q. P. A. The Council represents the whole society, and should receive any and all communications sent it by members of the Association.

The circular in question was presented as a matter of business, quietly and rationally, and the presenter was not "fult of wrath and condemnation."

I would like to know who gave the fiery information to the M. P. J., as they had no representative there.

The word "only" in paragraph number 5 is open to criticism. The subject of wholesalers selling to doctors (and consumers) is a matter affecting the business of every retail druggist.

The style of the whole article is rather caustic, and not conched in the meekest of language-" bravadoism" is not always the best way to clear oneself of any imputation.

The only way for retail druggists to judge the matter fairly, and the best defence that the aggravated parties can make, is for the circular in question so be published in extenso.

THE ONE WHO PRESENTED THE CIRCULAR.

It has already been clearly shown that there was nothing to "clear oneself" from. Circulars were not sent to doctors, but circulars, as already stated, were sent to druggists and general storekeepers in some new territory which the wholesale house referred to was about to canvas. The party who presented the circular in question to the Council of the Quebec Pharmaceutical Association instead of writing letters of this misleading character should, when he found there was no basis for the charge made, have apologized to the Council for taking up their valuable time.

The first item sent to the Canadian Druggist announcing the "breeze" did not embody the truth, and really the sails have been flapping ever since—to give an idea of the gale in nautical terms. "The one who presented the circular" ought to write to his confrere who complained to him, and find fault with him for not keeping him posted sufficiently in the matter to enable his dropping his onslaught before he reached a ridiculous and untenable position not unfamiliar to lawyers. Amusing stories have been told of clients, at critical moments, repudiating their counsel. The fees are a solace, however, in this direction, but the knight of the circular has only the pleasure of seeing himself anonymously in print to comfort him under the amused gaze of his confreres, for whom he would do battle when they had not the remotest requirement for it.

THE annual meeting of the Pharmaceutical Association, held June 13th, was most disappointing, at least as regards the attendance, which was very small. We certainly think that the druggists of the province should take more interest in the affairs of the Association than they take at present. Of the ninety or a hundred licentiates in the city of Montreal, only a corporal's guard was in attendance, and the members who were there were the same who religiously attend every meeting. It showed that the druggists are either very negligent or have great confidence in the officers, but the officers of the Association would be much better pleased to see a greater interest taken in society matters by the majority than there is at present.

We notice that the Association has been successful in almost all the cases of infraction of the pharmacy law which were brought before the courts, the net financial result of which was the sum of \$129 added to the funds. This shows well for the caution with which the Registrar proceeds in bringing actions into court. The Association would be much better off in every way if some preceding councils and registrars had had a greater regard for the uncertainties of the law.

The Treasurer's report showed that the financial affairs of the Association were in a most flourishing condition, the balance on hand, April 30th, being \$2,348.85, the actual increase during the year being \$430.00. Mr. Manson, as usual, has watched over the finances with his proverbial carefulness, and we notice that the members have given him a pledge of their confidence by re electing him to the treasurership which he has filled for so many years with honor to himself and benefit to the Association

Probably the most important portion of the meeting was the President's address. As usual, it is quite a lengthy document, but its length is repaid by the wealth of material which Mr. Grav presents for the consideration of the members. We heartily coincide with his advice to the incoming council as regards legislation. As Mr. Grav says, our law at present is fairly satisfactory "barring a little ambiguity," and we should be extremely cautious about seeking additions or amendments to our Act, as the fate of the bill of the Ontario College of Pharmacy in the Ontario Assembly should be a warning to us. There can be no doubt about the Ontario College being in a worse position now in the eves of the general public than they were before this bill was presented. The changes which were sought to be inaugurated were of such a sweeping character, and smacked so strongly of monopoly, that the whole mercantile community was aroused by it, and of course, it failed to become law-a lesson which the Quebec Association should study well when again seeking legislation, which may be necessary in a year or two. if only to clear up some of the ambigious clauses in the present Act. The rapidly increasing evil of copyrighted medicines was also referred to. but no remedy was suggested, nor has there been an effectual remedy yet proposed by anyone, although dozens have been ventilated in the pharmaceutical press during the last ten years. The action of the American Pharmaceutical Association in publishing the National Formulary, and of the British Pharmaceutical Conference in publishing the "Unofficial Formulary" was expected to stem the tide, but it seems to have had little or no effect We think a great deal could be done by the retail druggists to remedy this evil if the preparations of these formularies were more forcibly brought to the notice of physicians. If retailers do not care to manufacture these preparations, they can be bought ready-made, and could thus he brought gradually to replace the innumerable lines of clixirs, extracts, etc., now before the medical profession. But our opinion is that this evil will endure as long as manufacturers exist with plenty of capital behind them and smooth-talking travellers to send out broadcast through the land to talk up their goods, and until physicians again get into the old-fashioned habit of reasoning out prescriptions to suit each case instead of ordering so-called elegant pharmaceuticals that, according to the manufacturers, will cure anything and everything.

The President's remarks concerning the preliminary examinations are worthy of serious consideration. His statement that fifty per cent. of the candidates failed in arithmetic is one of great importance, as it showed that there must be something wrong in the present system of education-We have no desire to enter into the discussion on educational matters now going on, but we cannot refrain from remarking on the one-sidedness of the education of students who present themselves for the preliminary examination, as we have found many who could easily make eighty to ninety per cent. in Latin, while they could not make twenty to thirty per cent. in arithmetic, history or geography; some, in fact, seemed to be absolutely ignorant of these subjects. It seems to us as though a knowledge of Latin or Greek was considered the summum bonum of knowledge, whereas in this hustling, bustling century, except to a select few, they are luxuries which can very well be dispensed with, to a certain extent, while without a knowledge of arithmetic a man is very heavily handicapped in the race for life, and Greek are excellent studies in a way, as they bring us in touch with the ancient glories of Greece and Rome; they teach us the modes of thought and diction of Homer, Nenophon, Demosthenes, Virgil, Cicero, Plautus and Horace, but this study should not supplant that of a sound knowledge of arithmetic, 'ookkeeping, history and geography. A business man with a know ledge of the latter studies can make a living and may become wealthy and still know nothing of the Latin or Greek poets, but a business man, if such could exist with a thorough knowledge of the classics and an ignorance of arithmetic and bookkeeping, would soon go to the wall; and this is a business age, an age of the survival of the fittest, when the classics count for lit'le, but practical edu-

cation is everything. We think if more attention were paid to practical studies and less to the classics it would be a decided improvement. In fact, in our opinion, which may seem very radical to some, Latin in the curriculum could be supplanted with great benefit by Euclid, a study of which is exceedingly useful as a preliminary to the study of Chemical Philosophy. Euclid properly studied, in our opinion, is a much superior mental exercise than is Latin or Greek, as it induced habits of close reasoning and a love for the study of philosophy which, judging from the minor and major examinations during the last few years, is sadly lacking, as very few of the students seemed to take any interest in, or have any knowledge of chemical philosophy, without which their knowledge of chemistry was mere memory work, mostly forgotten in a month after.

The most important subject touched upon by the President was the question of the legal standard for galenicals. If there existed any doubt about the matter the President's action would have been most praiseworthy in drawing attention to it and having the matter attended to by the proper legal authorities, but as a matter of fact, there can be no doubt about it, as we pointed out in last month's issue. The Dominion Adulteration Act is very explicit on the matter, in the section which we quoted; in fact, as regards the B. P. being a legal standard and enforcing it we are ahead of England, where there is considerable doubt about this question, as some years ago some cases brought against dealers for selling paregoric without any opium and tincture of opium of half the pharmacopæial strength were thrown out of court by the magistrates, but on appeal the judgment was reversed. It is not generally known that when the Sale of Foods and Drugs Act went before the House of Lords the clause making the B. P. the legal standard for drugs was stricken out, but the Medical Act of 1862 required that all apothecaries and others should not make or compound any medicines or medicinal extract mentioned in the pharmacopæia except by the formula therein laid down. unless authorized to do so by some learned physician, which we think should settle the matter. But admitting there is no legal standard in Canada. every one knows that there is what we might call the practical standard—the standard taught in all the colleges of medicine and of pharmacy in Canada, and there is no doubt about that standard being the British Pharmacopoia. It is the only pharmacopæia which has been studied by the vast majority of physicians, and it is the only one practically known to the majority of druggists; consequently it has been tacitly accepted by the two professions as the standard for drugs, and if the matter were brought before a court we are inclined to lieve that any judge would accept these facts as making the B. P. the standard. But, as we said before, the law is explicit on the subject and leaves no room for doubt. It distinctly states that the B. P. and the U. S. P. are to be accepted as stand-But how many physicians when they order preparations mean the U.S.P., and how many druggists keep U. S. P. preparations generally on the shelves? What druggist would dispense Tr. Aconiti U. S. P., Tr. Opii U. S. P., or Tr. Veratri Vividis U. S. P. on a prescription? None, unless he was absolutely certain that the physician meant the U S. P. and was aware of the difference in strength of the U.S.P., and B.P. preparations, so that in the vast majority of cases B. P. preparations are used and the British Pharmacopogia is practically the only standard. We admit that Mr. Gray is right in his statement regarding Tr. Arnicæ, which is generally made by the U.S. P formula, but it is an exception; but as regards Tr. Rhei, in our experience the U.S. P. preparation is practically unknown. We will not discuss the question of the medicinal activity of saffron, upon which Mr. Gray expresses himself very emphatically, although the compilers of the British Pharmacopæia, who are supposed to know something of medicine, retained it and ordered it in the formula for tincture of rhubarb, so that evidently there is a conflict of opinion between Mr. Gray and some of the leading lights of the General Medical Coun-But very few druggists sell the U.S. P. preparation, which contains no saffron, but the costly Spanish saffron is replaced by American saffron in some cases by those who wish to cheapen the product. Now, this action is decidedly wrong. were much better to use the American formula than to patch up an imitation of the British article with so-called American saffron. Why is this American saffron used, if not for a questionable purpose? It is not saffron and bears no relation to it beyond yielding a color somewhat similar to that of true saffron, but as it is called saffron these druggists think by a peculiar process of reasoning that they are complying with the formula by using it when they know full well that it is no more like what is ordered than chalk is like cheese. It is a fraud on physician and patient. Let them use the U. S. P. formula and be honest about it, and say so, but dont try to make a hodge-podge with safflower and call it Tr. Rhei B. P.

The discussion which took place after the reading of the address was rather tame, as only a few members took part in it, whereas we should have expected that there would have been such a desire to speak on the subject that the president would have had difficulty in deciding who had the floor; but probably the members were a little bashful, and as it was nearing lunch time they probably did not wish to have a lengthy discussion on the matter.

. Mr. Contant and Mr. Morrison both spoke upon a subject of very great importance to the professich generally, namely the formation of a Dominion Association on the lines of the American Pharmaceutical Association. It certainly is time some move was made in the matter. Almost every State in the Union has its association for the mprovement of its members professionally and socially, their annual meeting combining these two objects. Retail druggists then meet to discuss the problems of their everyday life from financial and professional points of view. They there become better acquainted with each other; socially and in every way these annual meetings tend to elevate the profession, and if the United States can support the national society, the A P. A., and also the host of State societies surely the pharmacists of the Dominion have sufficient pride and ability, patriotic and professional, to organize and support a Dominion Pharmaceutical Association. Many Canadian druggists have joined the American Pharmaceutical Association or the British Pharmaceutical Conference, and some have joined both, and we have no doubt that these would be the most enthusiastic workers in the formation of the proposed Dominion Association. The Provincial Association now in existence undoubtedly have done a great deal to advance pharmacy in the way of laws, examinations, etc., and in that respect resemble the State Board of Pharmacy, whose work is entirely distinct from that of the State Association, which this new society would resemble, as it could not take an active part as such in obtaining legislation, leaving that to the present Provincial Associations; but the main object of the new society

would be the discussion of scientific questions, the reading of papers, on the subjects of legislation, on the methods of improving the business part of pharmacy and such questions as generally interest the profession, and at the same time it would take the pharmacist away from his business for a few days, give him a chance to see new faces and make new acquaintances, and make him forget the worries of business and have a good time generally. From every point of view we think this proposal a good one, and hope that as Mr. Contant has been elected President for the coming year that he will be able to make a success of it.

PHARMACEUTICAL ASSOCIATION OF THE PROVINCE OF QUEBEC.

Reports of the first meeting of the new council of the Pharmaceutical Association of the Province of Quebec, held in the committee room, 595 Lagauchetierre street, Montreal, on Tuesday, July 6th, at 3 p. m.:

Present: J. Contant, Alex. Manson, R. W. Williams, Rod. Carriere, A. D. Mann, Ed. Giroux, jr., C. E. Scarff, A. LaRue and L. A. Bernard.

A letter from Mr. Gray, President, was read, informing the meeting of his inability to attend owing to important public business which required his presence elsewhere, and also informing the members that he was not a candidate for election to office.

On motion, Mr. Alex. Manson took the chair.

The minutes of the previous council meeting and also those of the special meeting held on the 31st of May were read by the Secretary and duly confirmed.

The election of officers being now in order, the chairman called for nominations, and the following gentlemen were duly elected, namely: Jos. Contant, President; R. W. Williams, first Vice-President; Ed. Giroux, jr., second Vice-l'resident; Alex. Manson, Treasurer; L. A. Bernard and A. D. Mann, Auditors; S. Lachance, A. E. DuBerger, R. W. Williams, W. H. Chapman and J. R. Parkin as the Board of Examiners for the major and minor examinations.

The appointment of the preliminary examiners was left over for consideration at an adjourned meeting.

The following recommendation from the annual

meeting was presented:

Moved by Mr. D. Watson, seconded by Mr. Joseph Contant-That the sum of one hundred dollars be handed to the Registrar as a bonus for services during the past year, and that this meeting endorses the President's suggestion recommending the new council to add the sum of one hundred dollars to the present salary of the Registrar.

Moved by Mr. Williams, seconded by Mr. Manson-That the recommendation from the annual meeting regarding the increase to the Registrar's salary be adopted, Carried unanimously.

A letter from Mr. Jos. E. Morrison was read, resigning his position as a member of the board of

A communication was read from the American Pharmaceutical Association requesting this Association to nominate delegates to their forty-first annual meeting to be held in Chicago on the 14th of August, when the Secretary, Mr. Muir, was authorized to represent this Association in his official capacity, and as this Association is entitled to nominate five delegates to their convention the Secretary was instructed to issue to any member intending to be present at that convention the necessary credentials, so that any member of the Association desiring to be credited as a delegate, to the number of four, can do so by communicating with the Secretary.

A committee from the council composed of Messrs. Alex. Manson, Henry R. Gray, L. A. Bernard and C. E. Scarff was appointed to confer with a committee of the Montreal College of Pharmacy consisting of Messrs. D. Watson, Ed. Giroux, jr., W, H. Chapman and Jos. E. Morrison, to discuss matters affecting the interests of both bodies and to report to the next meeting of council.

A protest on behalf of Mr. A. E. Giguere was received, disputing the legality of the late election of members of council on account of two voting papers having been rejected by the annual meeting, After discussion, it was resolved that this protest should be submitted to the attorneys of the Association for their opinion.

The following communication from the annual

meeting was received:

Moved by Mr. H. F. Jackson, seconded by Mr. Jos. E. Morrison-That the Secretary be instructed to write to the various Provincial Associations of with a view of obtaining united action in approaching the Federal Government with a view of defining our position in relation to the pharmacopæia d in this country, and also to get their to be views the feasibility of forming a National Pharmaceutical Association on similar lines to that of the American Pharmaceutical Association, and that it be a recommendation to the new council to take this important matter up for consideration. Carried.

Moved by Mr. Williams, seconded by Mr. Mann-That the recommendation of the annual meeting referring to the pharmacopæia beadopted. Carried.

Resolved—That this meeting do now adjourn until the 5th day of September next, and that the first business of that meeting be the appointment of the preliminary board of examiners. Carried.

E. Muir. Registrar.

THE PRESIDENT'S DOUBT.

To the Editor of the Montreal Pharmaceutical Journal:

DEAR Sir,—In view of the doubt expressed by the President of the Pharmaceutical Association of the Province of Quebec in his address recently delivered in this city, and reported in full in your journal of June, as to whether any legal standard existed for the guidance of pharmacists in manufacturing tinctures, we thought it advisable that so important a matter should be settled beyond the question of a doubt, and have therefore issued the circular and postal card (copy given herewith) to our leading medical men. Although issued only a few days, from the replies already received (a summary of which, with comment, we will give in your next issue) there is, in the opinion of the medical profession, only one standard for prescriptions written in this country, that of the B. P.

Sincerely yours, W. A. DYER & Co.

CIRCULAR LETTER.

DEAR SIR,—On June 12th the following item appeared in the columns of the Gazette:

ADULTERATION PROSECUTIONS.

Several city druggists have been served with notices from the Department of Inland Revenue calling upon them to pay the cost of analysis for certain samples of tinctures sold by them to the inspector of food for the province, which on examination were found to be adulterated within the meaning of the Adulteration Act. The costs in each case amount to \$12. 2

To the ordinary reader this would appear that some unscrupulous druggists (names not mentioned) had produced tinctures of a cheap quality, possibly to undersell their neighbor or to increase their profit.

Therefore the action of the Government as stated in the above paragraph is well meant, and any punishment meted out to the offenders would receive

the endorsement of the public.

A few days since, was held in this city, the annual meeting of the Pharmaceutical Association of the Province of Quebec. The President, in his address, drew the attention of the members to the action of the Government and raised the question as to what standard of strength druggists should be held to conform. To quote his own words, he says: "Nothing that I can find obliges us legally to use the British Pharmacopaia."

We maintain that custom obliges us to conform in all cases, unless otherwise ordered, to the B. P., and our business has always been conducted upon this line as an invariable and strict rule, and, we confidently believe, to the satisfaction of the medi-

cal profession.

The British Pharmacopæia occupies the first place in all the medical and pharmaceutical col-

leges of our various provinces.

Being such an important subject and one of such vast interest to the physician, and about which there should be no doubt whatever, that one standard only should be followed in manufacturing tinctures, we venture to enclose a few questions, and

would ask you to reply to same and return to us at your earliest convenience.

"1. Is there a standard for tinctures in this country?

- "2. In your opinion is there any doubt whatever as to the British Pharmacopæia being the standard in the Dominion of Canada for all tinctures named in that work?
- "3. When you write a prescription calling for a tincture named in the British Pharmacopæia and when you do not specify B. P., what should the dispenser supply?" Sincerely yours,

W. A. Dyer & Co.

STUDENTS prepared for minor and major examinations. Classes for October exam. in chemistry, materia medica and botany will commence July 24th. Address J. E. Morrison, 23 Church street, or care Messrs. Lyman Sons & Co.

Iodide of Strontium.

While the salicylates answer all purposes in acute rheumatic fever, they are of little value in the nonfebrile forms. Two such cases have been under my care during the past winter. As long as they took sodium salicylates in full doses, the symptoms were reduced to a minimum, but immediately returned on a discontinuance of the drug, which, moreover, had a deleterious effect on the health. I then directed these patients to take the solution of Strontium Iodide (Paraf-Javal,) beginning with four drachms daily. Improvement followed, and the dose was gradually reduced to one-half. The effect was very good; the symptoms gradually subsiding while the general health improved. Both patients resided in damp houses, and the rheumatism showed a tendency to recurrence, though at intervals much longer than when under the salicylates - Waugh, in The Times and Register.

The will of the late John F. Henry has been admitted to probate. The widow receives one-third of the real and personal estate, and the daughters and two sons each two-ninths. Although Mr. Henry had been in the wholesale drug business for a quarter of a century, and was once thought to be worth over \$200,000, the real estate he left behind him is estimated at only \$2,000, and his personal property at only \$10,000.

Hor Milk is a most nutritious beverage—a real luxury, the value of which but few people know. Many who have an abundance of milk never think of using it as a drink. A drink, did we say? That's a mistake. We should eat milk instead of drinking it. That is, take it in small sips. Why? Because the caseine of the milk, when it comes in contact with the acid of the gastric fluid, coagulates and forms curd; and if swallowed in large quantities at once a large curd is formed, which the stomach handles with difficulty. The gastric fluid can mingle so much more readily with the small curds that result from sipping the milk.—Dietic and Hygienic Gazette, Feb., '93.

The Warner Failure.

The publication of the assets of H. H. Warner, of Safe Cure fame, as given out by his assignee, Mr. Job E. Hedges, was considerable of a surprise to the trade in this city, who, while they knew that Mr. Warner's affairs were in a very bad state, still scarcely believed him as poor as this schedule would make him appear. Fifty thousand dollars is named by it as the probable extreme figure of Mr. Warner's assets, which, when the millions he has made in the past are considered, is extremely small. This includes also Mr. Warner's real estate, his handsome yacht Siesta, and all stocks and bonds. In discussing this list as already given out, a gentleman who has known Mr. Warner a number of years said the other day: "The sink holes where the great bulk of Mr. Warner's wealth was lost are plainly seen in the mining and industrial stocks, mostly in western companies, and in the unitemized parcels of western lands in the State of South Dakota, and territory of New Mexico. Of course, these do not represent it all, nor do their present values indicate their actual soundness as investments, but Mr. Warner was simply too daring a speculator, too versatile, and, it seems, too sanguine. Lack of ready funds caught him weak and the crash completed the ruin of schemes and securities, which, had he been able to contloue, might have turned out vastly profitable."—N. Y. Pharmaceutical Era.

Report of the Quebec Preliminary Board of Examiners.

At the meeting of the Quebec Preliminary Board of Examiners six candidates presented themselves, and the following, named in order of merit, successfully passed: M. O. Dion, W. P. LaRoche, Miss N. A. LaRoche. Two of the candidates failed in one subject and will require to present themselves again at the next examination, and one candidate failing on two subjects will reguire to take the whole examination over again.

PHARMACEUTICAL ASSOCIATION OF THE PROVINCE OF QUEBEC.

Written Preliminary Examination.

Montreal, July 6th, 1893.

N. B.—You are requested to—

1. Write on one side of the paper only.

2. Number your answers so as to correspond with the printed questions.

3. Number the sheets of paper in their proper order and attach them together, then fold them up and place your name in full on the outside.

 Candidates will be careful not to commence a new subject on same sheet with another, and fold each subject separately, putting on the back of the sheet your name and name of subject treated.

Correspondence.

To the Editor of the Montreal Pharmaceutical Journal.

SIR,—I have read the account of the annual meeting of the Association, and especially the President's address, with mingled feelings of approval, disapproval and surprise; approval of some of the suggestions and remarks on legislation, proprietary medicines, and the examinations; disapproval of his remarks on the pharmacopæial standard, and surprise that at the meeting but one member combatted the idea that there was no standard for pharmaceutical preparations.

It is simply astounding that a man of Mr. Gray's supposed intelligence and experience, one whom the younger generation of druggists have always been taught to regard as one of the pillars of orthodox pharmaceutical faith, one of the shining lights of our profession, should thus rudely attempt to shatter our pharmacopecial idol; truly this is an

iconoclastic age.

Before bringing up such a matter as this the president should have thoroughly informed himself upon the subject; it would have taken but little study or investigation to have proved that the idea of there being no standard was all nonsense. quotes the preface of the edition of 1867, but states that this proclamation has no legal weight in Canada. Now, there can be no question whatever about the legality of the Act of Parliament by which the General Medical Council was brought into existence, and consequently if they issue the British Pharmacopæia by virtue of the powers granted them by that Act, there is nothing further required to give it all the legal weight necessary in England. Now, if there be no law expressly defining a legal standard in Canada. I have no doubt whatever that any judge would accept and enforce the standard in use in England; but Mr. Gray says in his address that custom has sanctioned the use of the B. P. as the standard, then, where there is no law bearing directly on the subject, Mr. Gray surely ought to know that custom, if proven to exist, has all the force of a law. But in spite of the president's assertion: "Nothing that I can find obliges me legally to use the B. P.," there is a law bearing directly upon the subject, namely, the "Adulteration Act," which distinctly names the standards for Mr. Gray's investigations on this subject cannot have been either very searching or very profound if he has not read this Act. One would have naturally supposed that the first step in the process would have been a study of the Adulteration Act, which Mr. Gray must have known was in existence, and a postal card to the Minister of Inland Revenue would have brought him a copy by return mail. If he had taken this simple means of information Mr. Gray would not have written so carelessly upon such an important subject, and the President of the Pharmaceutical Association of the

Province of Quebec should take care to be thoroughly informed upon any subject which he brings up in his annual address, and I regret to say that Mr. Gray has heedlessly and carelessly, in his official position, cast a slur upon the profession in this province.

In writing an address, with plenty of time in which to compose it and correct it, one may be to a certain extent rather non-committal, but in the discussion upon the subject which took place after the reading of the address, the president came out without any beating around the bush and stated his

position upon the subject.

According to your report, Mr. Morrison stated in his remarks that when the average physician prescribes a tineture he meant the B. P., unless he specified the U.S.P. or Codex. Mr. Gray then asked him how was he to know unless there was a law on the subject. It is very strange that, although Mr. Gray has been in business longer than I can remember, that if he receives a prescription for tinctures he does not know what to put up. Either Mr. Gray regards the whole subject as a joke or his reputation has been vastly overrated. Why, any youngster coming up for the minor exam. and who did not know more than to ask such a question as that would be sent back for a few years more of study.

Further on in your report Mr. Gray says: "There is no law on the subject, and it can be proved that it is not a universal custom to make tinctures according to the B. P." Well, well, is Mr. Gray joking again, or is he serious when he makes such a statement? Mr. Gray was one of the founders of the Association, has held various official positions and was an examiner for many years, and should know what was the standard and the book upon which students were examined in materia medica; he must assuredly know that it was the B. P. Mr. Gray is likewise aware of the existence of the Montreal College of Pharmacy, and he must know that the only materia medica preparations studied there are those of the B.P. and if students are taught the B. P. at college and examined upon it only at the examinations, surely they have been 'aught to regard it as the standard. I have had some years' experience in the drug trade, and I have yet to find one conscientious druggist who did not make his tinctures B. P., or, if he hought them ready-made, always expected them to be B. P, except a few cheap Johns who did not care what were the contents as long as the label and price were all right. I wonder if it was to cast the official ægis of the Association over these cheap Johns, some of whom have been caught in the I. R. net, that Mr. Gray has, in his official capacity as President, thus lowered the whole professional standing of the Association and of every individual member of it.

If the President's ideas were carried out to their logical conclusion pharmacy in the Province of Quebec would be a chaos; every druggist could

put up his preparations of any strength he wished; physicians could not depend on their prescriptions being prepared twice of the same strength or appearance, thus reducing the practice of medicine to the same chaotic condition. According to Mr. Gray, we can now use the British, the American, the French, the German, in fact any pharmacopæia from that of Valerius Cordus down to the Danish, published a few months ago-a pretty state of things to contemplate, certainly. If I received a prescription for Tr. Aconite I might put up the B. P. article; the next time the patient required it he might have it put up at my neighbor's, who perhaps uses the U. S. P., and supplies the U. S. P. Tr Aconite, which is three times the strength of the B. P., which would result in serious injury, if not death, and if the druggist were brought before a coroner's jury he could claim that, according to the President of the Pharmaceutical Association of the Province of Quebec, he could use any pharmacopœia whatever, or none at all if he wished, but mix his drugs in any proportion to suit himself. Perhaps the President will say this picture is overdrawn, but it is not; it certainly represents a condition of pharmaceutical anarchy, but anarchy is the only result obtainable when every man is a law unto himself. Evidently the President did not take into consideration what might be the possible results of such a theory.

But an explanation for his conduct may be found in his statement towards the end of the discussion, when he found that, perhaps, he had gone too far, and that he had been forced into a dangerous position: "I am not taking sides on the question; but I wish to help our confreres who may, and in good faith too, get into trouble." The first part of this statement disagrees with all that he had said previously, as he most distinctly takes the side that there was no standard, but the second part gives in a nutshell the reason why he took this stand; but I deny in toto that anyone can get into trouble over this matter if in good faith, because first, every druggist can make his own tinctures; secondly, they can buy tinctures strictly B. P. if they are willing to pay the price. Aye, there's the rub-if they pay the price-but some of our confreres, I am sorry to say, will buy their preparations where they can get them the cheapest. It is not a question of B. P. or the health of their clients, but dollars and cents, and if any of these have been caught it serves them right and I hope that they will be made examples of. But if there be any who have got into trouble in apparent good faith they have done so through unpardonable ignorance, since every druggist should see that his goods answer the necessary tests before putting them into stock.

I think that the President of the Pharmaceutical Association should take a higher stand and a more ethical position than to attempt to defend or palliate the offences of men who, through their own greed, endanger the lives of the sick, are stumbling blocks in the advance of science, and disgraces to

their profession. As Mr. Henry R. Gray, he can take any position in the matter that suits him, but as President of the Pharmaceutical Association it is entirely another matter, and one that affects every member of the Association, and as a member I most certainly cannot allow his action in the presidential chair to pass without entering as vigorous a protest as I am capable of. Yours truly,

To the Editor of the Montreal Pharmaceutical Journal:

PHARMAKON.

DEAR SIR,—I very much regret the error made by me in my address at the annual meeting of the Pharmaceutical Association, instating that "neither the Dominion Parliament or Local Legislatures have as yet legislated on the subject."

It appears, according to clauses 1, 2 and 3 of the Adulteration Act, as published by you, that there has been legislation, and that druggists in this province are at liberty to adopt either the British or American Pharmacopoeias.

When the late Hon. Dr. Paquet first began to agitate the necessity for an Adulteration Act, he sent me a sketch of his proposed bill and asked me, in conjunction with the late Dr. Larocque, to send him suggestions. It was this proposed bill I had in my mind when I wrote the paragraph in my address. At that time it contained no clauses relating to the pharmacopæia, Hence my mistake.

So far as my own pharmacy is concerned, I would remark that in dispensing prescriptions, the preparations of the British Pharmacopæia are alone used, except when foreign preparations are ordered, and I believe others do the same.

Permit me to point out an error in your report of the annual meeting, which I would like to have corrected. At page 48A, I am made to say, "I do not partake of the opinion that we should have all our tinctures according to the British Pharmacopæia." What I said was, "I do not partake of the opinion that we should not have all our tinctures according to the British Pharmacopæia."

My pretension is that the authority by which all tinctures and pharmaceuticals should be prepared in this province requires to be sharply defined by law. The Adulteration Act is evidently too vague and does not define whether the British or United States pharmacopæias shall be the standard.

You say the Ontario Legislature has passed an Act making the B. P. the standard in that province; it is therefore highly probable our Local Legislature will have to do likewise, and make the B. P. our sole official guide. The College of Physicians and Surgeons is the proper body, I presume, to have that done.

The very favorable critique of the new U. S. Pharmacopæia, published in the *Chemist and Druggist*, of London, received in town yesterday, almost makes one hesitate as to which pharmacopæia we ought to adopt.

Believe me, truly yours, HENRY R. GRAY.

Montreal, July 12, 1893.

tandard * Pharmaceutical * Products

E have pleasure in announcing that our Laboratory at Walkerville is so far completed that we are prepared to supply our Fluid Extracts, Pills, Tablet Triturates, Capsules, Elixirs, Wines, Syrups, etc., in Assortment, Variety and Quantity, suited to the demand.

OUR FLUID EXTRACTS

have established themselves firmly in the confidence and appreciation of the profession of the United States on their inherent merit.

Substantial merit is incontestably the secret of their present general employment. Our facilities for the procurement of

CRUDE DRUGS

are unsurpassed. Every parcel of drugs delivered at our Laboratory, before being placed in stock for use, is identified by our Botanist and submitted to the rigorous examination of our Analytical Department. No Fluid Extract is permitted to leave our Laboratory until assayed and approved as of Standard Quality.

The Preparations of

TINCTURES, SYRUPS, WINES, ETC.

are greatly simplified by the use of our Fluid Extracts and miscellaneous pharmaceuticals with those of other manufacture, and shall be pleased to furnish samples to any who desire to make such.

> Complete Descriptive List of our products and any information concerning them will be gladly and promptly forn, hed on request.

Pharmaceutical Notes.

Mr. Carteighe has again been re-elected to the Presidency of the British Pharmaceutical Association, making the twelfth consecutive year he has held the position.

Damiana.—Gawalowski publishes the result of his investigations on this drug. An analysis of the dried leaves gave the following results:

Water	. 9.02	per cent.
Ash		
Benzine extract		££
Ether extract	_	**
Alcohol extract	•	**
Watery extract		**
Cellular tissues. etc		**

DULCIN, the new sweetening agent patented by Riedel, is claimed to be 450 times as sweet as sugar; it is prepared from para phenetidin. It occurs in fine, needle-like crystals, moderately sweet on the tongue; its solubility is very slight, even in boiling water, a trouble which must be overcome before dulcin will become a commercial rival of saccharine.

SWEETENED COD LIVER OIL.—Dr. Eisenchitz, in La Medecine Moderne, recommend the following formula for a pleasaut cod liver oil mixture:

Cod Liver Oil ... 5iij
Saccharine ... grs iv
Acetic Ether ... 3 ss

Essence of peppermint or essence of cinnamon, one or two drops, may be used instead of the acetic ether.

NEW OINTMENT BASE.—G. Hell recommends a mixture of 1 part anhydrous lanolin and 3 parts petrolatum as forming a superior ointment base.

The Faculty of the Philadelphia College is very much excited over the rumor that a large publishing house is about to erect a seven-story building adjoining the north side of the college building, and that the presses are to be placed close to the dividing wall, against which on the college side are placed all the fine balances, which would thus be rendered useless from the vibration of the floors. The college hopes to have influence enough to either buy off the publishing firm or to have the city buy the property for the continuation of a street on the north side of the college.

PHENOSALVI. is a new antiseptic. It is a syrup fluid, sp. gr. 1.409, slightly soluble in water. It is prepared by heating together molecular proportions of lactic, salicylic and carbolic acids, and when cold adding a mixture of menthol, eucalyptol and glycerine. It has been used at the Hotel Dieu, Paris, with good results.

AN EXPLOSIVE MIXTURE.—In preparing an ointment composed of 5 parts of iodol, 2 parts yellow oxide of mercury and 10 parts vaseline, it was found necessary to add a little vaseline before rubbing up the powders, as otherwise an explosion was produced.

KAOLIN AS AN EXCIPIENT FOR TAR PILLS.—Dr. Ivanoff recommends kaolin as an excipient for pills of wood tar, by means of which two grains of tar can be made into a pill of small size and suitable consistence.

FOWLER'S SOLUTION.—Brantigam finds that the precipitate often found in Fowler's solution is composed principally of silicic acid, due to the action of the alkali on the glass.

SPIEGLER'S ALBUMEN REAGENT.—Spiegler has lately improved his formula for test solution for albumen by replacing the sugar by an equal amount of glycerine, which is a better preservative. The formula now is:

Hydrarg. Bichlor					
Acid tartaric					1
Aq. distill					
Glycerine					5

M. Moissan, the famous French Chemist, has obtained metallic uranium by heating together a mixture of nitrate of uranium and carbon in the electric furnace for about ten minutes. Uranium decomposes water at ordinary temperatures but melts only at very high temperatures. He has also prepared manganese and chromium by the same means.

MICROBES IN MINERAL WATER. Vichy and other waters are originally destitute of microbes, but are quickly contaminated, and experiments show that the contamination arises from the air at the apertures through which the water rises. During the first fortnight after bottling the number increases, but later and in equal period decreases. The number of germs found in waters from various springs differs according to the temperature of the spring, the higher it is the more numerous the microbes.

AMYLOID is a constituent of milk and dairy products, showing under the microscope a structure strikingly similar to starch, in appearance, size and behavior to iodine, though a point of difference is found in the action of boiling water, which fails to gelatinize the granules. Heated the granules become soft and can be enveloped by casein or gluten, but without forming an intimate mixture, as iodine will sharply define the position of these substances. It is not definitely decided whether this is a constant constituent of milk, or what is its bearing upon the use of the milk.

PHEDURETINE occurs in white crystals, tasteless, sparingly soluble in cold, more so in hot water. It is given in doses of 5 to 15 grs. twice a day, as a diuretic.

Therapeutical Notes.

METHYLENE-BLUE.—Dr. Guttman, in a paper read February 1st before the Berlin Medical Society. extols the virtues of this remedy in malaria, but insists that it must be given for at least four weeks in doses of ten centigrammes in capsules five times a day.

CRESOL-SAPONATE is a new antiseptic resembling lysol, except that it is of a lighter color and less disagreeable odor. It is prepared by heating together equal quantities of soft soap and crude carbolic acid. It is a clear, reddish liquid of neutral reaction, soluble in water. alcohol and glycerin.

FORM.-ANILIDE.—C. H. N H C H O occurs in prisms melting at 46" C., and is soluble in water, alcohol and ether. It is used as a local anæsthetic and as an analgesic and antipyretic is fully equal to antipyrin or antifebrin, and also as a local application in tonsillitis, pharyngitis, etc.

HYPNAL AS A HYPNOTIC. — Dr. Filehue has studied the effect of hypnal in 124 cases. He obtained good results in incipient delirium tremens, in chorea minor, and in slight excitations of lunatics. Insomnia caused by pain was sometimes benefited, while at other times the drug was useless.

Antipyrin in Epistaxis.—E. G. West recommends the use of pledgets of cotton, saturated with a concentrated solution of antipyrin, or dusted with the powder, introduced into the nostrils in persistent epistaxis.

ANTISPASMINE is a new combination composed of one molecule of narceine with three molecules of salicylate of soda. It is a white powder, easily soluble in water. According to Dr. Demme, of Berne, it acts as a hypnotic and sedative, and is free from the risks which accompany most remedies of this class, especially in the treatment of children. It has been used with success in whooping cough and spasm of the glottis in infants in the following form:

CHLORAL HYDRATE is advantageously given in lemonade instead of water, the disagreeable taste being entirely covered. Two or three drachms of syrup of chloral with two ounces of water and two or three ounces of wrated lemonade.

Pharmaceutical Association of the North-West Territories.

A meeting of the council of the Pharmaceutical Association of the North-West Territories was held in Regina, June 18th.

Present: J. G. Templeton, Calgary; W. W. Bole, Moosejaw; W. Boydon, Qu'Appelle; Robt. Martin and W. G. Pettingell, Regina.

The following officers were elected for 1893-94:

President-W. W. Bolc.

Vice-President-J. G. Templeton.

Registrar-Treas.—W. G. Pettingell (re-elected.) Examiners—Robt. Martin, W. Boydon, J. G. Templeton.

Regina, N. W. T., June 24th, 1893.

UNITED STATES TRADE-MARKS.

The following list of United States trade-marks pertaining to the drug trade is reported expressly for The Montreal Pharmaceutical Journal by James Sangster, Solicitor of Patents and Trademarks, Buffalo, N. Y.:

REGISTERED JUNE 6, 1893.

23,170—Natural Mineral Waters. Victoria Mineral Spring Company, Rotterdam, Netherlands. Filed March 21, 1893. Essential Features—The word "Victoria" and the representation of the figures of two lions standing upon ornamental scrolls bearing the words "Je Maintiendrai" with two shields between them, and surrounded by a crown. Used since January 2, 1889.

23,171—External Remedy for Man and Beast. X-Zalia Medicine Company, Portland, Me., and Boston, Mass. Filed April 20, 1893. Essential Features—The word "X-Zalia" with a hyphen between the X and Z. Used since April 1, 1893.

23,172— Chemical Substances Prepared for use in Medicine and Pharmacy. James B. Halcrow, London, England. Filed May 15, 1893. Essential Features—The word "Halviva." Used since September, 1890.

23,173—Wash for the Prevention and Cure of Schsual Diseases. William D. Mann, Chicago, Ill. Filed March 25, 1893. Essential Features—The capital letter "P" inclosing within its loop other letters. Used since March 2, 1893.

23,174—Remedy for Eye Troubles. August P. Roth, Montie E. Van Harlingen and Matthias C. Van Harlingen, Georgetown, Ohio. Filed Dec. 19, 1892. Essential Features—The portrait of Narcissa Waterman. Used since Nov. 1, 1892.

23,175—Remedy for Catarrh. Frank C. Fowler, Moodus, Conn. Filed May 8, 1893. Essential Feature—The word "Khala" and the pictorial representation of a plant. Used since January 1, 1893.

23,176—Anæsthetic. Hale Dental Company, Boston, Mass. Filed May 5, 1893. Essential Feature—The word "Orinda." Used since April 1, 1892.

23,177—Cosmetics. Wakelee & Co., San Francisco, Cal. Filed Feb. 7, 1893. Essential Feature—The word "Cameline." Used since June 1, 1878.

23,178— Perfumery, Soaps and Cosmetics. Charles E. Foote and Charles C. Jenks, Jackson, Mich. Filed March 31, 1893. Essential Feature—The word "Santa Maria." Used since April 1, 1884.

23,170—Tooth Brushes. Florence Manufacturing Company, Florence, Mass.. New York, N. Y, and Chicago, Ill. Filed May 15, 1893. Essential Feature—The word "Dental Plate." Used since 1885.

REGISTERED JUNE 13, 1893.

23,203—Toilet, Laundry and Scouring Soap. The Ke-Li Manufacturing Company, New York, N. Y. Filed April 24, 1893. Essential Feature— The word "Ke-Li." Used since February 6, 1893.

23,208—Spring and Mineral Waters, both plain and ærated. Edward E. Hoyt, New York, N. Y. Filed May 16, 1893. Essential Feature—word "Purity." Used since September, 1892. Essential Feature—The

23,210-Liquid Food and Systemic Tonic and Restorative. Frederick A. Loveraft, New York, N. Y. Filed May 17, 1893. Essential Feature— The word "Proteinol." Used since October, 1890.

23,211—Tonic Medicine for use in Fevers. Diffusible Tonic Company, Sturgis, Mich. Filed May 19, 1803. Essential Feature—A monogram consisting of the letters and abbreviation "D. T. Co." Used since May 22, 1888.

23,212—Certain Named Remedies. Bernhard Fisher, Logansport, Ind. Filed May 16, 1893. Essential Feature—The word "Petrolac." Used

since March 1, 1893.

23,213—Remedies for Gonorrhea. John Kremer, New York, N. Y. Filed May 12, 1893. Essential Feature—The figures "88518" superimposed within or upon the letter "R." Used since May 1, 1893.

23,214—Laxative. The Bordeaux Prune Company, Louisville, Ky. Filed May 10, 1893. Essential Feature-The representation of a cluster of plums or prunes and the word "Pruneen." Used

since January 15, 1893.

23,215 - Veterinary Powders J P. Hull. Horse, Cattle and Poultry Powder Company, Wesminster, Md. Filed April 22, 1893. Essential Feature— A barn-yard scene, showing a barn with a fence upon two sides of it with various animals within the inclosure. Used since March 20, 1893.

22,216—Liniments. Andrew W. Sward, Sheldahl, Iowa Filed April 14, 1893. Essential Feature-The words "Sward's Spavin Cure" above the representation of a spirited horse in an inclosure, with horses and riders in the background representing a race. Used since October 28, 1892.

23,217—Disinfecting Chemical Compound for Purifying Water. James Q. Lemmon, Latrobe, Pa. Filed May 11, 1893. Essential Feature— The representation of a river marked "Allegheny," with falls to the left of it, and on the farther shore hills and the sun on the horizon, and in the air above the falls the figure of an angel pouring a fluid into the water. Below the falls on the shore are five robust children, and in a boat marked "Death" on the river appear two skeletons rowing and a third skeleton at the end. "Typhoid and Cholera" respectively associated with the word "Bactericide." Used since May 1, 1893.

REGISTERED JUNE 20, 1893.

23,223-Perfumes. Williams, Davis, Brooks & Co, Detroit, Mich. Filed May 9, 1893. Essential Feature-The word "Dabrook's." Used since March 15, 1893.

23,225—Adhesive Fly-Paper. Detroit Fly-Paper Company, Detroit, Mich. Filed Oct. 17. 1892.

Essential Feature—The word "Decoy." Used since January 2, 1892.

33,527—Suspensories of all kinds. Curtis & Spindell, Lynn, Mass. Filed May 18, 1893. Essential Feature-The word "Athletic." Used since October 16, 1889.

23,228—Remedy for Headache, Neuralgia and Rheumatism. Jacob C. Vossler, Dayton, Ohio. Filed April 28, 1893. Essential Feature—The word "Kamatine." Used since January 1, 1891.

23,229-Remedy for diseases of the Throat and Lungs. Richard L. Hicks, Thomasville, Ga. Filed May 1, 1893. Essential Feature—The word "Anti-Microbe." Used since July 10, 1892.

23,230—Remedy for Eczema, Tetter, Sunburn, Freckles and all other Blemishes of the Complexion. Samuel A. Richmond, Tuscola, Ill. Filed May 23, 1893. Essential Feature—The representation of a rose in bloom on its stem, and the words "White Rose." Used since January 1, 1890.

23,231-External and Internal Remedies for Certain Named Diseases. Charles I. Hood, Low-ell, Mass. Filed May 22, 1893. Essential Feature-The word "TusSano," in which the letter T and the second S appear in larger and longer type than the other letters. Used since March 1, 1893.

23,232-Salve. George P. Benson, New Orleans, La. Filed April 17, 1893. Essential Feature—A portrait of the registrant. Used since 1892.

23,233—Ammonia Carbonate. Michigan Carbon Works, Detroit, Mich. Filed Feb. 9, 1892. Essential Feature—The representation of a key-Used since December 10, 1891.

23,235-Food for Horses, Cattle, Sheep, Swine and Fowl. William D. Carpenter, Chicago, Ill. Filed May 8, 1893. Essential Feature—The word "Carnolactogenes." Used since April 1, 1893.

23,236 -- Food for Horses, Cattle, Sheep, Swine and Fowl. William D. Carpenter, Chicago, Ill. Filed May S, 1893. Essential Feature—The word

"Lactofarina." Used since April 1, 1893. 23,237—Food for Horses, Cattle, Sheep, Swine and Fowl. William D. Carpenter, Chicago, Ill. Filed May 8, 1893. Fssential Feature-The word "Nutriotone." Used since April 1, 1893.

REGISTERED JUNE 27, 2893.

23,245-Mineral Spring Water. Henry K. Wampole & Co., Philadelphia, Pa. Filed May 31, 1893. Essential Feature-The representation of an Elk. Used since May 6, 1893.

23,252-Milk Product in the form of a Prepared Food for Invalids and Infants William Clark, Montreal, Canada. Filed May 18, 1893. Essentia Feature-The word "Milk-Granules."

Used since March 1, 1893.

23,264-Headache Remedy. Crisdof F. Neubert, Chicago, Ill. Filed April 28, 1893. Essential Feature-The name "Dr. DeTrecœur between two devices, each consisting of the representatiou of a divided ribbon terminating in an olive branch and surmounted by a crown. Used since February 20, 1893.

23,265—Remedy for Throat and Lurg Troubles. James F. Goldaine, Pittsburg, Pa. Filed May 12, 1803. Essential Feature—The compound word "Kill-Cough. Used since January, 1892.

23,266—Certain Named Remedies. Joseph 1. Lavoie, Quebec, Canada. Filed May 8, 1893. Essential Feature—The word "Anchor."

since May 1, 1891.

23,267—Salve for Lumpy Jaw in Animals. Frank C. White, Peoria, Ill. Filed May 29, 1893. Essential Feature-The word "Excelsior." Used since October 1, 1892.

23,270-Medicated Soap. Byron J. Douds, Canton, Ohio. Filed March 13, 1893. Essential Feature—The word "Disinfectine." Used since

December 15, 1892.

23,272—Perfumery. Lazell, Dalley & Co., New York, N. Y. Filed April 11, 1893. Essential Feature—The words "Meadow Lily." Used since November, 1892.

23,273-Perfumery. Lazell, Dalley & Co., New York, N. Y. Filed June 2, 1893. Essential Feature-The words "Queen Isabella." Used since January 1, 1893.

Artificial Camphor.

L. Nordheim, of Hamburg, has patented a process for the artificial production of camphor from the crude turpentine distillates (Pharm Rec) The terebenthine from the latter is treated with a current of chlorine gas until a desired chlorine compound is obtained. The latter is separated from its fluid isomer and treated with an alkali carbonate in a distillatory apparatus at 120° C. (248 F.) to form camphene. The latter is obtained sufficiently pure to be at once treated with ozone or ozonized air so that the camphene, C, H, is oxidized into camphor, C., H,,O.

Motes and Queries.

J. D. W .- Ferrum Tartaratum and Potas. Bromid. make an unsightly mixture, some precipitation of oxide of iron occurring. The appearance being the only objection, the combination may be dispensed with a "shake"! l. It is a curious fact that if these ingredients are dissolved separately in water and then mixed, the precipitation does not occur for a time; but if they are rubbed up to gether it occurs immediately.

Post Pastum-After meals.

Pastus Pastus-Feeding; good Latin, but a form seldom met with in prescription.

Re Cocainæ, griij; Morph. Sul., grij; Ol. Theobromatis Q. S. Ft. Supposit. No. vi.

The Latin is here ambiguous, but the quantities would clearly indicate that into six was the intention of the prescriber.

T. D. R.

A HANDSOME DRUG STORE,

The Establishment of Messrs. W. A. Dyer & Co., Montreal.

A PRONOUNCED IMPROVEMENT AT THE CORNER OF ST. CATHERINE AND UNIVERSITY STREETS-AN ENTERPRISING FIRM.

Accuracy and despatch are the most essential qualities of a competent druggist. When one is racked with anxiety over the condition of a sick friend, the physician's prescriptions must be filled as speedily as is consistent with the importance of the task. Under the most favorable circumstances it is wearying to sit in a drug store and wait while the medicine is compounded, but how much influence cheerful and artistic surroundings have in making the time seem shorter. Messrs. W. A. Dyer & Company have realized this, and in arranging the interior of their handsome new store at the corner of St. Catherine and University streets especial pains have been taken with this end in view. The store where for so many years Messrs. Dyer & Co.'s business was carried on, at the corner of Phillips square, has been torn down, and a new position was necessary. Having been so successful at the old stand, Mr. Dyer wisely moved only a few doors, in fact, no farther away than the next corner, and there a comfortable and spacious store has been fitted up with all the modern conveniences necessary to carrying on a first-class drug business. By day it is lighted by three large plate glass windows on University street and two larger ones on St. Catherine street; by night through the same windows the rays of numerous incandescent electric lights throw the gorgeous reflections of the red, green and yellow bottles far into the street. The counters supp rt handsome show cases, containing staple goods and druggists' sundries, while outside the counter dainty stands containing perfumes, and other fancy articles such as ladies love to look at, are surrounded with comfortable chairs for customers who are waiting. At the south end of the store is the dispensing department, and if proof of W. A. Dyer & Company's success in this line were wanting, it is to be found in the forty-nine huge volumes in which the 268,-230 prescriptions put up in this establishment, are pasted. By keeping a large staff of competent assistants, all of whom are licentiates of the College of Pharmacy, the firm has attained a reputation for accuracy and despatch

But the business of Messrs. W. A. Dyer & Company is not confined to the counter and prescription desk, for the four flats of the building are all utilized. The top story is devoted to the manufacture of hospital dressings Tute and gauze are here washed, dried, stretched and pulled from their natural state until they become as white as snow and in a condition to be applied to the wounds of the weary sufferers tossing on their beds of pain in the various hospitals. The intermediate flats are used as warerooms for the large stock of almost every

known drug or chemical which is carried by the firm. Arranged in packages varying from the immense parcel of some bulky herb down to the little air-tight bottle which contains some rare and costly chemical, each separate article is distinctly labelled with its Latin name. Some complicated and expensive machinery is to be seen here, one of the most interesting being a machine for the manufacture of compressed tablets. It can be so modified as to make any size from a tiny pin's head up. When our representative was shown through the manufactory, this machine contained some of Dyer's Quinine Chocolates, the latter being a new. vehicle for the bitter drug, in which its taste is entirely disguised by that of the more pleasant chocolate. It would be impossible to describe the many interesting processes through which the various proprietary articles of Messrs. W. A. Dyer & Co. go before they are placed upon the market in such attractive forms. A batch of Dyer's Infants' Food takes five days to prepare and many others almost as long. Caswell and Massey's Emulsion of Cod Liver Oil is well known to the medical profession as one of the most elegant articles of its kind. Dyer's "Kumyss" is such a delicate preparation that although it is of speedy sale it is necessary to keep it on ice in order to retain the life giving properties so beneficial to invalids. After the ingredients of the various preparations have been carefully and thoroughly mixed there is still a great deal of work to be done in bottling or canning the medicines, and most of the subsequent labelling and sealing is done by young ladies whose deft fingers give the finishing touches and give to the preparations that appearance of delicacy and neatness that has done so much towards gaining for such an invaluable toilet requisite as "Dyer's Jelly of Cucumber and Roses," its world-wide reputation.

Having more suitable premises now than ever before in a business career extending over a quarter of a century, Messrs. W. A. Dyer & Company are now in a better position than ever to maintain the high reputation gained for them by the supe-

riority of their goods.

The site of the store is an excellent one, being situated at one of the principal corners of St. Catherine street, and the building, four stories in height, can be seen for a long distance in any direction. The outside has been entirely repainted, and bright colored awnings to all the windows and fancy stained glass transoms over each of the two principal entrances, have lent additional beauty to the general effect of the well-appointed establishment

JUGEMENT IMPORTANT.

L'honorable juge Charland a rendu, le 26 juin courant, un jugement important pour les pharma ciens et pour toutes personnes auxquelles la loi défend de faire commerce, sans être munie d'une li cence. Il s'agit de savoir jusqu'à quel point l'on peut s'associer à un porteur d'une licence, en formant une société avec lui. M. Euclide Mathieu

s'étant associé à son neveu Henri Lauctôt, pharmacien licencié, pour tenir une pharmacie, rue St-Laurent, fut poursuivi par l'Association pour \$25 de pénalité. Voici les remarques du juge en rendant son jugement:

"La société demanderesse poursuit le défendeur en recouvrement de la pénaiité imposée, par la loi, contre ceux qui tiennent magasin de drogues sans être médecin ou pharmacien licencié. Le défendeur, qui est épicier, plaide par une dénégation

générale.

"La question qui se présente est importante, comme toutes celles qui tendent à restreindre certains droits, pour le bénéfice d'une classe en particulier, sous prétexte d'intérêt public. Il faut donc voir jusqu'où s'étend le statut pour bien constater l'intention du législateur; indiquer la limite qu'il a fixée, et au delà de laquelle il y aurait empiètement regrettable sur la liberté individuelle. On ne saurait contester, qu'en thèse générale, tout citoyen qui se voue à la carrière commerciale a le droit absolu de choisir son genre de négoce. Cependant il y a une exception de créer dans l'intérêt général. La liberté d'un chacun s'arrête où com mencement les droits et la protection de la société, et cette liberté est subordonnée à certaines règles qui rendent son action limitée utile à la masse.

"Le commerce sur les substances médicales requiert des connaissances indubitables pour l'efficacite de son but. La manipulation et la disposition des poisons demandent une prudence et une discrétion qui dans la plupart des cas ne peuvent résulter que de commaissances toxicologiques. Dès lors on comprend l'importance qu'il y a de ne pas laisser entre les mains de tous indifféremment le commerce de la pharmacie. Aussi notre législature a-t-elle judicieusement légiférer sur la matière. Il fallait protéger le public et parer à nombre d'accidents, comme ceux qu'on pouvait signaler à l'époque où le commerce de la pharmacie se déroulait sans restriction ni contrôle.

"Par la 53e Vict., chap. 46, art. 4033 il est décrété que, "tout magasin de drogues doit être tenu sous le nom de son propriétaire, bona fide, qui doit être un licencié en pharmacie ou un médecin ou

chirurgien régulièrement inscrit."

" Pour soutenir sa prétention, la demanderesse devait tout naturellement prouver que le défendeur, qui est épicier, tenait un magasin de drogues contrairement aux dispositions de la loi. Elle a réussi à établir que le désendeur avait des intérêts, comme associé, dans une pharmacie tenu par M. Lanctot, son parent. Mais la preuve constate et ce sans l'ombre d'une contradiction que ce M. Lanctot seul a le contrôle de la pharmacie quant aux ventes, la préparation des remèdes, et la disposition pleine et entière des substances médicales et chimiques, en un mot, de tout ce qui est du ressort de la pharmacie ("est lui qui tient la pharmacie et pas d'autre. Le défendeur Mathieu, dont le non ne figure nulle part, si ce n'est qu'à un certain acte existant entre lui et Lanctot, son associé quant à certaines fins du commerce. Le défendeur est le beau-frère de Lanctot auquel il a toujours porté le plus grand intérêt. Voulant le protéger d'une manière tout spéciale, il lui a fourni des fonds nécessaires pour établir et alimenter son commerce, mais en vertu de leurs conventions, telles que dévoilées à l'enquêtte, le défendeur s'est assuré un certain contrôle, sur la partie exclusivement financière de la pharmacie, pour ne pas exposer Lanctot, relativement jeune, aux accidents que provoque l'inexpérience des affaires.

"Le demandeur dit'qu'il suflit que le défendeur fournisse des fonds, qu'il bénéficie de ce commerce, qu'il soit associé pour tomber sous le coup de la loi statutaire. Cette disposition du statut, eont la violation comporte une pénalité doit être interprétée in stricte sensu et verbatim comme tout statut pénal. Or, cette disposition dit "tout magasin de drogues etre tenu sous le nom de son pro-

priétaire bona fide, etc.',

"La preuve fait par la demanderesse elle-même a dévoilé que c'est Lanctot qui tient la pharmacie, bien qu'il soit obligé de partager dans les profits qu'il réalise. Que veut la loi? Que le magasin soit tenu, conduit et contrôlé, quant à ce qui constitue essentiellement la pharmacie, par un homme de l'art présentant constamment au public la protection et les garanties voulues. C'est là toute l'intention qui a présidé à cette législation.

"D'ailleurs, dansquelle partie de ce statut trouve-t-on une clause prohibitive, défendant péremptoirement à un pharmacien licencié d'accepter des argents, de faire partager les bénéfices de son travail par un associé, pourvu toujours qu'il garde le contrôle de la pharmacie et la direction et surveillance constante que lui impose la loi? Nulle Et peut-il y avoir ici à faire des déductions, part. tirer des conséquences, ou raisonner par analogie pour couvrir un cas imprévu ou combler une lacun, pour satisfaire des rigoristes trop intéressés? Evidemment non. Il est de principe que la punition d'infractions spécialisées, énumérées dans un statut, n'autorise pas même à punir une offense participant de la même nature, répréhensible, mais imprévue par la loi.

"Voici comment Endlick, sur l'interprétation des

statuts, s'exprime à ce sujet :

"To determine that a case is within the intention of a statute, its language must authorise the court to say so, but it is not admissable to carry the principle that a case which is within the meschief of a statute, is within its provisions so far as to punish a crime not specified in the statute, because it is of equal atrocity or of a kindred character with those which are enumerated, (pg. 454 et 455), unless the proper meaning of the language of the statute brings a case within its letter, the rule of strict construction forbids the court to make a crime or penalty by construction, and requires it to avoid the same by construction; and although the court may be unable to conceive any reason why the case in question should have been omitted and

considers it highly improbable that an omission was intended, it is not at liberty to extend the enactment to cases not included within the clear

and obvious import of the language."

"Je ne vois rien qui m'autorise à interprêter le statut de manière à lui faire dire, qu'un pharmacien licencié, sans ressources pécuniaires, quelque soit le brillant de ses aptitudes, la profondeur de ses connaissances, ne peut bénéficier des avantages qui lui sont offerts, comme dans le cas du nommé Lanctôt. La loi telle que faite ne me parait pas défendre à un père dans l'aisance ou la fortune, ayant un fils pharmacien, de s'associer à ses intérêts pour mieux le favoriser. Dès que cette société se limiterait surtout à la partie exclusivement financière d'une part, et qu'aux termes du statut le pharmacien tiendrait le magasin avec contrôle de la vente et disposition de ce qui constitue la pharmacie, le but de la loi serait efficacement atteint.

"En ayant en vue la protection de la société et les intérêts des pharmaciens, le législateur n'a pas dû vouloir être injuste à leur égard. Je crois qu'il y aurait perpétration d'injustice grave si ces Messieurs, surtout au début de leur carrière, ne pouvaient mettre leurs talents et connaissances comme mise dans une société, et accepter des argents d'un associé qui, tout en partageant le bénéfice du commerce, resterait en déhors d'attributions que lui

refuse la loi.

"La question qui nous occupe a déjà été agitée, en Angleterre, dans une cause de "The Pharmaceutical Society vs. The London and Provincial Supply Association." consignée dans les rapports du Conseil Privé (L. R. P. C, vol. v, p. 857.) Bien qu'il y ait quelques variantes dans les faits, les principes qui y sont énoncés me paraissent pleinement justifier la position que j'ai prise pour l'interprétation du statut régissant cette cause.

"A raison de ce qui précède, je crois l'action pénale dirigée contre le défendeur malfondée, et je la renvois en conséquence avec dépens distraits à Maîtres Beauchamp et Dorval, avocats du défen-

deur."

Books and Pamphlets Received.

We are in receipt of "A Treatise on Wine of Cod Liver Oil and Peptonate of Iron" from F. Stearns & Co., Detroit. It is an epitome of the work of Messrs. Gautier & Mourgues on cod liver oil, with drawings of alkaloids and other principles which they obtained. It also gives considerable information on peptonate of iron, and a number of clinical reports on the use of this new combination of cod liver oil and iron.

PHARMACEUTICAL EDUCATION.

Henry Kraemer speaks as follows in Science:

During the past year a number of papers have appeared in Science demonstrating the "onward march" of institutions of the highest learning, as well as that of professional and technical schools in The one cry to be heard all along the America. line is to raise the standard. The requirements for a preliminary education have been markedly increased and the courses of studies materially lengthened both as to the number of hours required per week and the years of study. In our colleges of pharmacy there has been a similar awakening and a desire to extend the course from two to three years. It may be well, however, at this point to state, for the benefit of those who are unfamiliar with the requirements of our best colleges of pharmacy, that before a diploma is granted the student must have been engaged in the drug business not less than three and one-half or four This means practically an apprenticeship of six years, although a great many students find it necessary to work in drug stores while attending college.

The teachers of pharmacy have for a number of years been discussing ways by which students will be compelled to devote all their time to cotlege work during the sessions of study. Yet while they claim that students should not be employed as clerks in the stores and at the same time attend college, the employers are opposed to the students devoting so much of their time to college work during the winter session. There has been more or less of a compromise, but, nevertheless, colleges of pharmacy are raising their standard, as are the other schools of learning, and it is very probable that, in a few years, three solid sessions of undivided work as well as four years apprenticeship, will be required before a candidate shall receive his

or her degree. The position of the pharmacist is a peculiar one. He, in the majority of cases, does not make his living by means of his actual business in medicines and prescriptions. He finds it necessary to carry a line of goods known as "druggists' sundrits" and "patent medicines." These, and more especially the latter, he would give up if he could, but the line of competition is so great and the public still expect the pharmacist to carry any and everything to suit their convenience, that it seems only practicable to a very few to abandon these in their business. The public also expect the pharmacist to know something of everything, and whatever it be, whether ills, or troubles or discomforts of any kind, they run to him. I remember when attending college, one of the professors, who was a practicing pharmacist for a number of years in one of the best localities in a large city, telling us that one night he was hastily summoned by a neighbor to his house where, in the midst of a splendid recep-

tion, the gas had suddenly gone out, and not know-

ing what to do they sent for the pharmacist. He went' and being of a practical mind and true to the instincts of his discomforted neighbor, he remedied the trouble. This simply illustrates the very close relations of the pharmacist to the public.

Now as soon as the public will expect the pharmacist to deal in medicines only, and all other articles related to the art of medicine, then the pharmacist as a business man (which he must be), will confine himself to the labors of his profession. And as soon as he can confine himself solely to the art of pharmacy as taught in our colleges, there will be no question of an extended curriculum of studies as complete as that of any institution of learning. Then we shall have laboratories fully equipped in the particular kind of analytical and chemical apparatus which he needs for the assay of drugs and in their examination for purity. Likewise will the course in microscopical work be so extended that the pharmacist will make such analyses for the busy physician as the examination of urinary sediments and other discharges, such as sputum for tubercle-bacilli, etc. Indeed it is in these two fields that the advanced work in pharmacy is tending, and accurate results will only be obtained by thorough instruction in chemical and microscopical manipulation. There must be such a blending of chemical and botanical instruction that the pharmacist, while not a specialist as a chemist or a botanist, yet indeed is a specialist with regard to the practical application of these sciences as an aid to the physician in his healing art and in the preparation of pure medicines of definite and authorized strengths. This condition of specialization will come, for pharmacists are marching onward in the line of progress, and it is only a question of a few years when the host of young men graduating by the hundreds from our colleges of pharmacy, and who are thirsting to apply their teachings and make their living in this practical application, will unite and raise the standard of their business to the profession which it is theirs to make it.

Lamentable Lack of Enterprise.

"Let me have three fingers of whiskey, he said to the clerk of a drug store in a Kansas town.

"I can't," repl ed the clerk, who did not know the customer "This is a prohibition state."

"I can't get a drink of whiskey, eh?"

'No, sir; not without a physician's prescription, when it is to be used as a medicine."

"Is there no emergency at all in which you you would be permitted to dispense a small quantity of whiskey without that formality—a case of life and death, for instance?"

" Why, yes," replied the clerk.

"I suppose if a man were to be bitten by a rattlesnake, and it would require some time to go to a doctor and get a prescription, in that case it might be allowable to give him whiskey." "Do you know where I could find a snake?" was the next question.

"Why, no," replied the clerk, greatly surprised

at the query.

"Well," commented the thirsty one, with a great deal of disgust in his tone, "it seems to me that if this drug store had any enterprise it would keep a rattlesnake on hand for use in cases of emergency,"

— William Henry Siviter in Harpe s Magazine.

PIL. DIPSOMANIA.

DR. MANN.

At a meeting of the American Association for the Study and Cure of Inebriety, held at the New York Academy of Medicine, March 23rd, 1893, Dr. Edward G. Mann, of Brooklyn, N.Y., Medical Superintendent of Sunnyside Private Hospital for Diseases of the Nervous System, Alcoholism and the Opium Habit, read a paper on "Science vs. Folly in the Treatment of Disease Caused by the Abuse of Stimulants and Narcotics: A Plea for the Suppression of the Nostrum, Patent Medicine, and Specific in Rational Therapeutics." After comparing scientific medication with charlatanism and showing the physiological action of alcohol on man and his offspring, as well as the diseases produced by indulgence, Dr. Mann proceeded to the subject of the Treatment of Disease of Inebriety. He recommended the following as a good tonic and sedative in dipsomania, having a good effect on the stomach and tending to antagonize both the degenerative changes in the brain, and the effects of alcohol on the structures of the body.

R	Quininæ sulph	grs. ii
	Zinc oxide	grs. ii
	Strychnia sulph	gr. 1.40
	Arsenic	
	Capsicum	grs, ii

M. et ft. pill No. i. Sig.: One pill three times a day.

Together with this pill, Dr. Mann uses in his private hospital for sixteen days the following hypodermatic dosiometry:

R	Strychnia nitrat	gr. i
	Aquæ dest	รี ss

M. Eight minims daily for eight days; four minims daily for another eight days. To quiet the morning nausea of alcoholics, two or three drops of wine of ipecac on the tongue, fasting

The patient is kept in bed for the first few days, and fed on milk and meat juice for nourishment. Hydrotherapy and electrotherapy are employed. To induce sleep, the following sedative is administered at night for a few days:

R	Ext hvosev. fld. Choral hydrat. Pot. bromid.	á	3i
	Tr. capsici		
м	Aquæ menth. pip.	ad	3iv

M. et Sig: Two tablespoonfuls at bedtime for a few days only, freely diluted with water.

If the patient is very much excited and is bordering on delirium tremens, the following is useful for two or three nights:

15	Hyoscin, Hydrobromat	gr i
	Aquæ dest	3ix
	Spt. vini rect	3i

M. et st. hypodermatic solution. Sig.: Dose from 5 to 10 minims pro re nata.

The diet table in Dr. Mann's hospital consists of milk, eggs, oysters, meats, fish of all kinds, buttermilk, koumiss, plus a minimum amount of cereals. Vegetables and starchy foods allowed only very sparingly, the idea being to rely on a diet which requires the least vital force and oxygen to digest, assimilate and appropriate, and to have ingested into the body such material as will, when brought under the influence of oxidation, yield energy, which is the expression of vital activity, and give the largest working power for the amount of food By such a plan of treatment patients are sent out with restored health, the craving for alcohol gone, the lost will-power restored, the shattered nervous system built up, and with a concentration of energy, physical ability and mental activity obtainable by no other plan of treatment.

In order to render Dr. Mann's pill available to the medical profession, Parke, Davis & Co. have added it to their list of gelatin-coated pills, which they are now prepared to supply in bottles of 100

or 500.

A Popular New Remedy.

There are few of the newer remedies that have met with more approval from the profession than has Pichi (Fabiana imbricata.) It has proved one of the most valuable of remedies in general vesical and genito-urinary troubles.

Pichi is diuretic; favors the expulsion of calculi and gravel, and relieves the irritation caused thereby; modifies favorably purulent discharges; and acts as a general stimulant of the excretory func-

We make of this preparation the fluid extract. the solid extract, the powdered extract, and filled soluble elastic capsules.

The habitat of this drug is South America.

It is diuretic, tonic, terebinthinate. It calms irritability, and quickly modifies the urinary secretions in gravel and uric diathesis.

Among formulæ which have been prescribed in connection with fluid extract of Pichi with success are the following:

	<u> </u>			
R	Fl. ext. pichi 5 ij

M. Sig: A teaspoonful three times a day and at bedtime.

Therapeutic reports of its application, and full information concerning our line of pichi preparations, will be furnished on request to Parke, Davis & Co., who were the first to introduce the virtues of pichi to the American profession.

"Lucilline."

A pure petroleum jelly, adopted by all the pharmacopæias as a base for ointments, pomades, etc., under the following names: British, "Paraffinum Molle"; United States, "Petrolatum"; Prussia and France, "Vaseline."

This product is a pure hydrocarbon, obtained by fractional distillation from Pennsylvania crude petroleum, deodorized and filtered through animal charcoal, is practically free from odor and taste, and does not become rancid. These properties make it superior to lard, tallow, or any other animal fat, as a base for ointments, salves and pomades. It is now extensively used by pharmacists all over the civilized world.

One of the very best brands is known as "Lucilline," manufactured by Bosshardt & Wilson Co., of Philadelphia, Pa., whose output amounts to millions of pounds per annum. The goods are sold by the leading wholesale drug houses in the Dominion of Canada. Lyman Sons & Co. have a full stock in all sized packages and shall be pleased to name prices on inquiry.

Malto Peptonized Porter.

We would call special attention to the advertisement in another column of a new Canadian preparation-Malto Peptonized Porter-prepared by the Malto Peptonized Porter Co., limited, of Truro, Nova Scotia, and now being introduced in this province, where it has already been tested by hundreds of physicians who, without exception, are pronounced in its favor.

No proprietary preparation had ever received such recommendation before. It is claimed that for a dyspeptic it does its work perfectly without any restriction being placed on the food taken. There is no single instance where the stomach has been so weak but what it has been retained by that organ, and the class of cases in which the profession has mostly recommended it has been in convalescence from acute disease; for persons with consumptive tendencies, where it is necessary to build up the system; persons suffering from secondary effects of alcoholism, for women nursing children or for wasting diseases of children, we strongly advise all medical men who have not already done so to give this prepaaration a trial. It meets a long felt want.

Pharmaceutical Examinations.

The board of examiners for the preliminary examination of students entering the study of pharmacy held their quarterly meeting in the Montreal College of Pharmacy, 595 Lagauchetierre street, on Thursday, July 6th, when thirty-six candidates presented themselves, and of these the following young gentlemen passed on all subjects, namely: Louis Rogalsky, Harry Smith, E. Clement, Jas. W. Elcome, C. A. Brault, F. Mariotti, W. F. Roach, H. Brazier, J. P. Cassegrain, O. Tourgeon and A. Gadbois. The following candidates failed on arithme tic, and will be required to present themselves at the next examination to be examined on that subject only: E. Thivierge, Geo. Virolle and A. R. The remainder of the candidates have been referred back for further study, and will be required to take up the whole examination when presenting themselves again.

The examiners were Wm. S. Kerry, Ed. Giroux,

jr., C. E. Scarff.

The next examination will take place on October 5th, and all candidates must file their applications with the Registrar at least ten days before the date of examination

Pharmaceutical Association of the Province of Quebec.

The next preliminary examination for candidates entering the study of pharmacy will be held in the Montreal College of Pharmacy, 595 Lagauchetierre street, on Thursday, October 5th, 1893, at 2 p. in. Candidates must give notice to the Registrar in writing of their intedtion to present themselves at least ten days before the date fixed for the examinations. A printed form of application may be obtained from the Registrar, which must be duly signed by the applicant.

No application will be received after the 26th

day of September.

The preliminary examinations are held on the first Thursday in the month of January, April, Suly and October in each year.

E Muir, Registrar.

595 Lagarchetierre street, Montreal.

LIGHT CAMPHOR OIL is one of the best solvents for resms—It dissolves 46 per cent of colophony, 9 per cent. of conal, and 35 per cent. of mastic and the same of damar—It is thus not far inferior to turpentine, and is, indeed, replacing it to some extent.

Musk, Artificial.

The popularity of this preparation in its present condition of quality is decidedly waning. Not only are the complaints of unequal strength on the increase, but the aroma itself proves to be thoroughly unsatisfactory. A vessel in which we are in the habit of keeping our stock emits when opened a well-defined odor of nitric acid. When used with too liberal a hand in soap-making artificial musk produces a most abominable result, and injures the value of the soap considerably. After an almost interminable series of experiments in our own laboratory, and basing ourselves upon a prolonged observation of the qualities of the article, we are able to say that even so small a proportion as one gramme (15½ grains) of musk baur added to 100 kilos (2 cwts.) of soap, produces an insupportable The largest admissable proportion is ½ gramme (8 grains) to 100 kilos (2 cwts.) of soap, but it is even preferable to take only half that quantity, viz., 1/4 gramme. We here plainly state our conviction that "must baur" cannot be regarded as a valuable acquisition in the perfumery industry, but that, on the other hand, in its present condition, it is rather calculated to deteriorate the value of the products scented with it.

It is therefore necessary to pay serious attention, either to the improvement of the present product, or to the manufacture of an altogether new and better substitute, as the actual article can only serve to cast discredit upon the goods in which it is used The preparation of the so-called "Tonquinol" has already proved that it is possible to manufacture a vastly better product, and, looked at from this standpoint, it is highly regrettable that this last-named substitute for musk has disappeared from commerce as a result of the lawsuit between the makers of the "musk baur" and those of "Tonquinol." Judging by the many enquiries and communications which we have received from our customers on this subject, we are persuaded that the regret which we have here expressed is echoed by many perfumers who have been accustomed to use Tonquinol. - Schimmel's Report.

free Want Department.

Druggists in need of apprentices and help generally, are invited to make free use of this department, and all persons seeking situations in the drug trade are cordially invited to do likewise. Advertisements of business for sale will also be inserted free of charge.

CLERK WANTED. — Must speak English and French. Apply, Cooke & Helmer, Hull, P. O.

SITUATION WAITED.—About Sept. 1st, by a Bachelor of Pharmacy (Toronto University) and graduate of Ontario College of Pharmacy. Four years' experience in a large retail store. Best of references. Address, Norman L McLean, care of A. E. Pilkey & Co., Central Drug Store, Chathum, Ont.

M.P.P.

MALTO PEPTONIZED PORTER,

FOR INVALIDS, CONSUMPTIVES AND DYSPEPTICS.

This combination containing the finest quality of Porter, together with Pepsin (the digestive power of 10,000 grains of albumen to the bottle) Extract of Malt and Dandelion, appeals to the understanding of this profession as being well adapted to a numerous class of cases. In no single instance has it been rejected by the most delicate stomach. It is especially adapted to the following cases:

- a. Convalescence for acute diseases such as Typhoid Fever, Cholera, etc.
- b. In Atonic Dyspepsia its effects have been most marvellous, enabling patients to take all kinds of food with comfort that would not otherwise be retained by the stomach.
- c. In persons of Consumptive tendencies it has been found to be a most perfect substitute for Cod Liver Oil, the extract of Malt supplying the fat-producing elements necessary to the supply of wasted tissue, besides the tonic and stimulating effects.
- d. In the treatment of cases of unnatural craving for Alcoholic Stimulants, or Alcoholism, it has been found to answer admirably in allaying the irritation, vomiting, and consequent desire for stimulants of an unhealthy nature.
 - e. It is especially adapted for administration to Nursing Mothers.
 - f. In wasting diseases of Children.
 - g. Where there is sleeplessness from flatulence, over-taxed brain and nervous system.

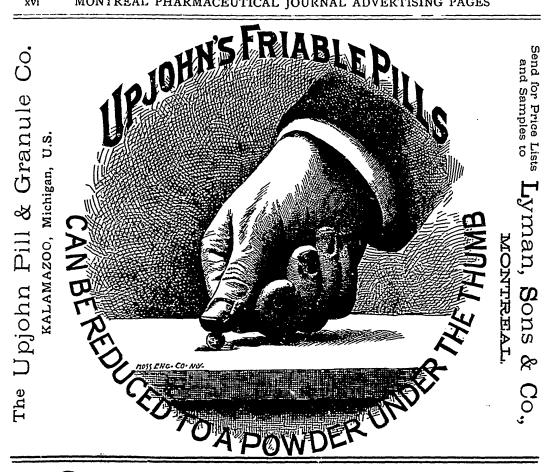

Samples can be obtained free by the Profession, on application to-

The Malto Peptonized Porter Company, (Limited,)

VER COMPLAINTS

SYRUP

The above is the trade name of the liquid laxative remedy manufactured by the CALIFORNIA FIG SYRUP COMPANY, of San Francisco, Cal., Louisville, Ky, New York, N.Y., U.S. A., and has been registered in the Canadian Patent Office.

SYRUP OF FIGS sells well and gives general satisfaction. It will be extensively advertised in Canada during the coming Winter and Spring.

₩ We offer it to the trade at \$6.00 per dozen, and it re ails at 75 cents per bottle.

The remedy is a combination of the medicinal principles of plants known to be most beneficial for the purposes intended, and it is very pleasant to the taste, and gentle, yet effective in cleansing the system, dispelling colds, headaches and fevers, and permanently curing habitual constipation.

Your orders respectfully solicited.

Yours truly,

California Fig Syrup Co.,

San Francisco, Cal.

Louisville, Ky.

New York, N.Y.

DRUGGISTS' ATTENTION!

At this time of the year you cannot afford to be without "ANTI-MOTH" PAPER. A ready seller.

CHAPMAN'S IMPROVED

Anti-Moth Paper

The value of "ANTI-MOTH" PAPER as a protector of Woolen Goods, Furs, etc., from moths, has been fully proved by the increasing demand and sales each year.

Its success has of course brought many imitations into existence.

The Conuino Anti-Moth Paper is clean and will not soil the hands or the most delicate white Woollens and Furs.

It is pleasant in odor, and has the hygienic and medicinal properties of the Pine Tree.

It is better and cheaper than Camphor or any of its worthless imitations.

Mansell, Hunt, Catty & Go. (Ltd.)

Cressy Road, Hampstead,

LONDON, ENG.

TRUSSES.

I.B. SEELEY & Co.

For Twenty Years exclusive Manufacturers or

Hard Rubber Trusses, Supporters and Pile Pipes,

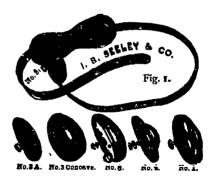

ALSO ALL KINDS OF

Leather and Elastic Trusses.

Abdominal and Uterine Supporters, Shoulder Braces, Elastic Stockings, Knee Caps, Anklets, Body Belts, Rheumatic Bandages, Suspensories, etc.

Seeley's Hard Rubber Trusses.

MADE IN EVERY DESIRABLE PATTERN.

Will successfully retain the most difficult form of HERNIA or RUPTURE with comfort and safety, thereby resulting in a radical cure. Impervious to moisture, may be used in bathing; and fitting perfectly to form of body, are worn without inconvenience by the youngest child, most delicate lady, of the laboring man, ontir. by avoiding all sweaty, sour, padded unpleasantness, being light, co id, cleanly, and always reliable. Endorsed by leading Surgeons, Physicians, Medical Colleges, both here and in Europe. Over 100,000 applied in Philadelphia.

Avoid the various imitations made to look like SEELEY'S and to sell on the enviable reputation acquired by our goods during the past 25 years, by purchasing only Hard Rubber Trusses, stamped, spring and strap, "I. B. SEELEY & CO.—Warranted."

ESTABLISHMENT:

28 S. ELEVENTH STREET,

PHILADELPHIA, U. S. A.

Terms, 4 months or 5% Cash.

Capsules Oleum Santal (Midy) always gives satisfaction in Gonorrhoa

and Cystitis. The oil is distilled by Midy's process, from the best freshly-cut Mysore Sandal Wood, and is vastly superior to commercial sandal oil, copaiba, cubebs, etc. Original bottles contain 40 capsules of 5 minims each—they are value for money and pay to sell.

GRIMAULT & CO., Paris,
LYMAN, SONS & CO.,
MONTREAL.

In Amenorrhœa of anæmic

or chlorotic patients, one capsule 2 or 3 times a day, given a week preceding menstruation, rarely fails to induce a normal flow.

APIOLINE

(CHAPOTEAUT.)

The true active principle of Parsley, differing from the so-called Apiol.

Dispensed in spherical capsules of 20 centigrammes.

Original bottles contain 24 capsules.

In Dysmenorrhæa, (congestive and spasmodic) amenable to internal remedies, the suppressed, irregular or painful menstruation is promptly relieved.

WOLFE'S SCHIEDAM ATOMATIC

- Sehnapps -

IS THE BEST STIMULANT, IN THE PREPARATION OF BEVERAGE AND BY ITSELF.

As a general beverage and necessary corrective of water rendered impure by vegetable decomposition, or other causes, as limestone, sulphate of copper, etc., the Aromatic Schnapps is superior to every other alcoholic preparation. A public trial of over thirty years duration, in every section of our country, of Udolpho Wolfe's Schnapps, its unsolicited endorsement by the medical faculty, and a sale unequalled by any other alcoholic distillation, have insured for it the reputation for salubrity claimed.

For sale by all Drugglsts and Grocers.

\$9.00 per case; 5 cases at \$8.50

LYMAN, SONS & CO., Sole Agents for the Dominion of Canada.

In 1 to 5 Days. GUARANTEED Not to cares stricture. Use two or three times a day with a r.4 cz. cone point Syringe. Inject slowly and as far into the urethra as it will go. Wanufactured only by The Evans Chemical So. GINCINNATI, O. U.S. A.

INJECTION "G"

Outsells all Similar preparations Combined.

The most effective and at the same time an absolutely NON-POISONOUS cure for

CONORRHOEA AND GLEET.

All Druggists, who are in the habit of pushing reliable goods only, are advised to carry Big G in stock. Once started, it soon becomes a rapid seller, and remains staple.

-Order so as to Avoid Risk of Freezing in Transit.-

Retailing at \$1.00—1 dozen Big G @ \$ 8.50 3 " " @ 8.25 6 " " @ 8.00 } 5% Cash.

The manufacturers, THE EVANS CHEMICAL CO., Cincinnati, O., will furnish advertising matter, with dealers' card, free upon request.

STRENGTH.

STRICTLY PURE.

PEROXIDE

HYDROGEN

MANUFACTURED BY

A. PEUCHOT,

By a special process for Medicinal and Surgical purposes.

Peuchot's Peroxide of Hydrogen has been recognized by the most eminent Chemists, Physicians and Surgeons as the purest and most reliable product on the market. Adopted in more than twenty Hospitals of New York, including Bellevue Hospital.

A Genehor

IMPORTANT NOTICE.

If the Ozone test is applied to A. Peuchot's Peroxide of Hydrogen, viz.: Starch and Iodide of Potassium paper, it will show a blue reaction, much deeper than any similar preparation.

A. PEUCHOT.

Manufacturing Chemist,

112-114 WOOSTER ST., NEW YORK.

WHOLESALE AGENTS:

Established 1800.

LYMAN, SONS & CO., Wholesale Druggists.

NON-IRRITANT.

A True Tonic Effect

is obtained by the use of Pepsin to assist weakened digestive organs—a more rational course than to over-tax them by stimulating the appetite.

Armour's Pepsin Tablets (3 grains each) are pure Pepsin, of exceptional power and agreeable odor and taste.

Canadian Price List:

Pure Pepsin, soluble or insoluble powder, and soluble scales, 1-oz. bottles, \$14.40 per lb net.

1/4 lb bottles (single bottles) \$12 per lb. net.

½ lb " (single bottles) \$12 per lb. net.

1 lb. of above in one delivery 5 per cent discount.

Tablets of Pure Pepsin, three grains each, in flat bottles for the pocket: Large size, 75 tablets in each bottle, one dozen in a box, per dozen bottles, \$7.20 net.

Small size, 20 tablets in each bottle, one dozen in a box, per dozen bottles, \$2.40 net.

Glycerole Pepsin, concentrated, 10 minims are the equivalent of one grain of our Pepsin possessing a digestive power of 2,500, for the speedy preparation of liquid forms—Wines, Elixirs, Etc. 1-lb. bottles (single bottles) \$1.80 net.

One dozen bottles Glycerole Pepsin in one delivery, 5 per cent discount.

We shall be pleased to send samples of these preparations to druggists upon request

ANTI-DANDRUFF.

THE object in view when Anti-Dandruff was first produced was to offer the public a preparation for the hair that would in the first place remove Dandruff effectually and also act as a perfect hair-dressing without containing any ingredient injurious to hair, head or scalp. Anti-Dandruff has in a short time proved itself a perfect specific for the hair, and now stands in the estimation of its patrons as being head and shoulders above any similar preparation.

Why? It removes Dandruff with 3 applications.

- " It makes the hair soft and pliable.
 - It is not of a greasy or oily nature.
- " It stops falling of the hair—Is not a dye.
 - It is of a nature peculiar to itself.
- " It is pleasant to use—Clear as crystal.
 - It possesses a most agreeable and delicate odor.
 - Men, women and children endorse it.

Price for Anti-Dandruff, 75c per bottle. \$6 per doz We trust there will be no cutting.

DR. S. A. RICHMOND'S TRADE-MARKS.

Are numbered 1, 2, 3, 4, 5 and 6, (including number 7 which is a part of number 2) represents my trade marks, which are printed on the Caddy or Cartoon that surrounds every bottle of SAMARITAN NERVINE manufactured by me. No. 1 represents my picture printed on the front side of the cartoon. No. 2 represents and contains my picture surrounded by four globes printed on the back side of the cartoon. Nos. 3 and 4 represent the sides of the cartoon, and contain the pictures of two men devoid of skin, showing the nervous system and blood vessels. No. 5 is printed on the top of the cartoon, and represents a man falling in a fit. No. 6 is printed on the bottom of the cartoon, and represents a temperance fountain. No. 7 is a part of No. 2 and represents a pictorial illustration of the Good Samaritan of bible history, and is printed below my picture which is surrounded by four globes I am the sole owner and proprietor of said trademarks and any one who attempts to use the same, other than myself are imitators and frauds. The penalty for counterfeiting or imitating or offering for sale is a penitentiary offense or a fine of \$1,000.00 or imprisonment. The law does not screen the druggist who offers to sell goods of a fradulent character, but binds him equally with the manufacturer of said bogus goods. I warn the trade and the public in general, that they are forbidden the use of any said trade-marks.

DR. S. A. RICHMOND,

The People's Medical Servant,

Formerly located at St. Joseph, Mo.

T'. A, ILLINOIS.

HOUSEHOLD STANDARD $\mathbf{REMLDIES}$.

DR. S. A. RICHMOND'S Family Medicines

Are prepared with great care expressly for family use, under the immediate supervision of Dr. S. A. Richmond himself, who is thoroughly acquainted with each drug and its effects upon the human system

Richmond's Samaritan Nervine

MANUFACTURED BY___

- BOSSHARDT & WILSON CO.,

PHILADELPHIA, PA.

Sold by Wholesole Druggists.

MAKE YOUR OWN SYRUPS?

You make a mistake. We'll prove it; read. Now and then you may save a trifle of money on strawberry, raspberry, peach, and two or three others perhaps; but generally you use such fruit as we wouldn't touch; your syrups are not like ours, and they cost you more as a rule. You like to say "I make my own syrups." You'd better say "I can't afford to make my own syrups."

We are right in the midst of the fullest and closest fruit-market in the United States. Even pineapples we can buy for half of what you pay for those not half so good. We buy a ship-load; you a wheelbarrow-load. We bought ten tons of red currants last summer—one of our minor flavors—people are finding it out though You pay more for inferior fruit.

The amount of fruit we can press in a day depends on the handling, first of the fruit and then of the juice; we bottle a good many tons a day with ease.

This shows we can sell the best fruit juices there are to be got for less than you can press them for. We can; but do we?

Fruit juices are our advertisement. What is an advertisement good for if nobody sees it? We want all the soda-water druggists to have our bottled fruit juices; do you imagine we are stupid enough to hinder their sale by putting a higher price than necessary on them?

There: we call that proof enough. Fruit is plenty with us and scarce with you. We have our pick of a bounteous market; you can't afford to pick. We make a business of it; you make a stop-gap of it. We press by the ton; you press by the quart. We seek an advertisement; you economy.

Leave it to you who make the best juices and whether you can afford to make your own. We even ask: Can you afford to use your own? Suppose we were foolish enough to make our advertisement dear; suppose our juices cost more than you could make fair juices for; could you afford to use fair juices instead of fine ones? We doubt it.

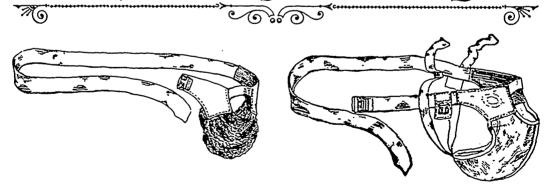

Seems to us we've got to the end of this advertisement. Have you ordered yet?

WRITE FOR PRICE LIST.

Our Goods are carried in stock by LYMAN, SONS & Co.

Prescribed by more than 25,000 physicians during the present year.

It will sustain and nourish babies, children, invalids and aged people when all else fails.

Creates new and vitalized blood faster than any other food preparation in the world. For overworked and insufficiently nourished people; over-taxed professional and laboring men.

Builds up the system after severe illness when recovery is slow and the appetite poor. Nursing mothers, teething infants and puny children thrive surprisingly by its

use, a change for the better being perceptible often within 24 hours.

It is the only thing that will permanently cure nervous prostration, dyspepsia, cholera infantum and excessive irritability of the stomach from any cause.

Read the remarkable testimonial from Col. Fred. Grant, regarding the prolongation of his father's life by the use of Bovinine:

"During the last four months of his sickness, the principal food of my father, Gen. Grant, was **Bovinine** and milk and it was the use of this incomparable food alone that enabled him to finish the second volume of his personal memoirs. FRED. D. GRANT." October 1st, 1885.

Send for pamphlet containing testimonials from a large number of the leading physicians of the country. Put up in 6 and 12 oz. size, at 60 cts. and \$1.00 per bottle. 12 ozs. contains the strength of 10 pounds of beef.

Removes the Toe Corn Every Time! The Best Corn Remedy Known!

HOUSANDS of Druggists in the United States have found that it is the quickest seller of its kind ever introduced because it is the best CORN Salve in the market.

VERY dozen is mounted upon our handsomely Lithographed Counter Stand which attracts immediate attention and thus helps to advertise the goods.

We are advertising in a number of Canada papers, and in response to our offer are sending out many trial size boxes to individuals. This method will at once create a demand for the "A-CORN" in Canada. To meet this first demand you should have the goods in stock. Send to your jobber for a single dozen. We know you will soon order in gross lots.

We give a few extracts from letters we have already received from Canada from those who have sold it, and from some who have used it:

GIANT CHEMICAL CO., Phila., Pa. YARMOUTH, N.S., Dec. 10th, 1887. GENTLEMEN:-I can recommend A-Corn Salve ahead of all other corn cures. I cannot sell any other corn medicine since I introduced A-Corn Salve, and once used by anyone suffering they send others far and near to buy it, and in no case has it failed to cure. J. A. CRAIG.

as it failed to cure. Yours, &c., (Signed), J. F.
"I find it a ready seller and a good article."—R. GORHAM, Hamilton, Bermuda.
"The A-CORN beats all other kinds of Corn Salves. It has taken out two large corns for mother."

WAY MCGERP. -WM. McGIRR, Medina, Ont.

"It is an excellent remedy."—A. ATKINSON, Cascades, Quebec.

REMEMBER this is not a new article you are asked to buy as an experiment which may possibly prove worthless, but a well tried remedy in the United States and an established success, and we desire to make it the same thing in Canada.

A trial order for 1 doz. from your Jobber will verify all we have said.

Price in Canada \$1.00 per doz.

Sold by LYMAN, SONS & CO., Montreal, Canada.
