CHARLOTTETOWN, Dec. 30.-At the closing of the C. B. college the these rights will be exercised by the gov-ernments of the respective provinces of Canada. The question as to whether Ontario and Quebec have any claim against the do-minion for refund of money already re-ceived by the dominion for these licenses in the way of fees was discussed, but no agree-ment come to. claim. Both authorities have the right, for the purposes of revenue, to levy a tax by way of a license fee, the provinces in order to raise a revenue and the dominion under its general taxing power. It was, therefore, agreed that the dominion would not grant any further lincense for the year 1898. This refers chiefly to pound-net licenses and sal-mon stands. The provincial governments will confirm and ratify the leases already granted by the dominion this year. FUNERAL OF A. W. PETERS.

The remains of the late Augustus Winnette Peters, president of the borough of Manhattan, N. Y., accompanied by a delegation of brother Masons, arrived on the western express Monday at noon, in charge of Undertaker C. A. Benedict of New York city. The coffin, a very handsome one of oak, was enclosed in a sealed lead case in an outside casing of ash. funeral will take place on Wednesday. It was opened in the station and the coffin placed in Mr. Powers' hearse

and conveyed to the home of his brother, A. Wellesley Peters, Pitt street. Several large floral pieces were received from Masonic bodies in New York and Cleveland, Ohio. Only a small portion of the numerous floral offerings were brought to this city, including a very large crescent of ivy, a floral fez and some large wreaths. With Mr. Benedict came four other New York gentlemen: Messrs. Charles H. Heyser, James Magee, William T. Goundie and Robert W. Sears, all representative members of the Masonic society. They were met at the depot by A. Wellesley Peters, J. Twining Hartt, Major F. H. Hartt. Messrs. John A. Watson and W. B. Wallace, representing the Grand Royal Arch Chapter of New Brunswick, were also present. The funeral service commenced at three o'clock and the obsequies were largely attended by representative citizens. There were no

vall bearers, their functions being performed by relatives of the deceased. From the house the funeral proceeded to Trinity church, where the impressive burial service of the Church of England was conducted by Ven. Archdeacon Brigstocke, after which coaches were taken for Fernhill. A delegation of members of the Grand Royal Arch Masons of New Brunswick attended, the deceased gentleman being their representative in New York. Mayor Sears and a deputation from the city council also attended to pay the last tribute of respect to a gentleman who occupied important positions in the divic government of the great American metropolis.

An important conference is to be held at the fisheries department tomorrow. There have arrived to attend it, Premier Murray and Attorney General Longley of Nova Scotia, Premier Emmerson, Provincial Secretary Tweedie and Attorney General White of New Brunswick, and Premier Farquharson of P. E. I. Domindominion representatives will be Sir Louis Davies and Prof. Prince, commissioner of fisheries. The object of the conference is to determine the relative powers to be assumed by the dominion and provincial governments respectively under the finding on the fisheries question of the judicial committee of the privy council. of May 26th last. An arrangement, as is well known, was effected with Ontario and Quebec last June. Ontario has organized a fisheries department, but Quebec has requested the dominion to continue to exercise jurisdiction in that province until local machinery can be perfected. While there were differences of opinion as to the fishery jurisdiction before the judgment in question was reidered, the opinion of competent authorities is that the decision of the judicial committee instead of clearing up the differences has hade matters worse. However, all parties being bound by it, they' have to make the best of a bad job. In the negotiations between Sir Louis Davies and Messrs. Hardy and Marchand there had to be give and take, and a friendly settlement was reached. With the maritime provinces, however, different issues seem to arise. For instance, it is understood that whether the dominion or provincial governments have jurisdiction over the three mile limit, the provinces are claiming it, together with the interest on the Halifax award, for disbursement to the fishermen, but before Sir Louis concedes the point he is seeking the opinion of the department of justice. The privy council judgment is an unfortunate one for a deserving class of dominion officers, viz., fishery overseers. The fiat has gone forth that all Ontario overseers, nearly 100 in number, are to be retired and they will have to look to Mr. Hardy for further employment. The notices of dismissal will be sent

out by the department this week. The question of the ownership of the lakes, rivers and foreshores of the country, and of the fish therein, and of the right to lease, license and regulate fishing privileges and fish, was submitted to the supreme court a few years ago, and the case taken to the judicial committee of the privy counwhich announced its findings May 26,

The results of the findings may be sum-marized: The sole and exclusive power of making regulations with reference to fish-ing, the times, seasons and manner, belong dominion, and any regulations on subject affecting the time for fishing or manner, made by the provinces are void

void. The right heretofore exercised by the do-minion of leasing defined areas to fishermen for pound-net licenses, or salmon stands, or for other fishing purposes, is ultra vires of the dominion, because it interferes with the juriediction of the provinces and be eafter

Two Buildings at Kingston Destroyed

by Fire.

Twenty-seven Degrees Below Zero-Leased the Union Hotel-Six Inches

of Snow.

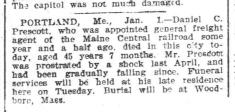

RICHIBUCTO, Jan. 2 .- A fire broke out in William Britton's tenement house at Kin-zston today at noon. In a short time it spread to the store and dwelling of the late Hon. O. McInerney. Both buildings were completely destroyed, but the contents were all saved. Britton's building was insured for \$800 in the Quebec Co. There was no insurance on the McInerney property. Three families occupied the Britton house. Assistance was asked from here, and the fire engine was sent up.

The funeral of the late William Barnett took place yesterday afternoon. Rev. H. A. Meek conducted services in St. Mary's Church of England and at the grave.

Jas. P. Bobain has leased the Union hotel, and intends opening up at once. Six inches of snow fell yesterday. The thermometer registered 27 degrees below zero this morning.

AN EARLY MORNING FIRE.

Early on the 1st inst fire broke out in. a large three story frame dwelling situate on St. Patrick street and owned by John A. Stanton. The building, which was occupied by Jacob Bourgeois in the lower flat and was badly gutted by fire and water. The fire is supposed to have started near a flue and the flames made rapid progress through the structure. The deserve great credit for the way they worked, considering that the thermometer at several points about the city at that time registered 10 o 12 de-

table. I see in it no ground for re-proach. Mr. Tarte is in good com-pamy. Mr. Gledstone was a convert when he was led gradually by the inflexible force of his judg-ment and his spirit to no longer hold the tory creeds in which he had been trained. The liberal party was only too happy not merely to open to him its ranks, but to place him at its head. I could cite any number at its nead. I could clie any number of such examples. I only recall the most illustrious. However, I shall mention another, for it is well known in Montreal. The liberals of my gen-eration have not forgotten that they rever had in their ranks a partizan more active, more vallant, more de-voted than Alfred Perry, and yet he was an old huresucrat of 1822. When was an old bureaucrat of 1837. When the honesty and the courage which were the basis of his future made it clear to him that he had entered on clear to him that he had entered on the wrong path when he took sides with those whom he had opposed so vigorously, was there a single liberal from Mr. Dorion, the leader of the party, down to the humblest partizan, to reproach him with having, sword in to reproach him wish raving, sword in hand, ever-stood against the men whose memories are most revered? No. The liberal party has never been and will never be a party of exclusion and ostracism. Above all, it is a parand ostracism. Above all, it is a par-ty of progress, open to all intelligences, to all generous sentiments, to all noble aspirations. May it be closed only to base jealousy, odious envy and narrow selfishness. I pray the members of the Club Nationale not to give further the Club Nationale not to give further attention to the petty quarrels by means of which it is sought to divert them from the prosecution of the pat-riotic work which they have had on hand for the last twenty-five years. Let them return to serious matters, to the discussion of the problems and the questions which concern our coun-try's future, and let them continue their confidence in a man who does nothing by halves, who, when an op-ponent fought me with all the ardor nothing by haives, who, when an op-poment fought me with all the ardor of his nature, who when a friend by my side in opposition supported me with perhaps more ardor still, and who when a colleague in the govern-ment has given me the most enthusiastic and most effective support. Ac-copt, my dear senator, the assurance of my most sincere consideration." WILFRED LAURIER. BANKRUPT HOOLEY

MIGHTY MOUSE HUNTER. Henry Braithwaite's Forty Years' Work in New Brunswick. Important Discoveries in Calling

Moose and Caribou That He Has Made. His Troubles and Triumphs With Bears-A

Thrilling Series of Fights All in One Day.

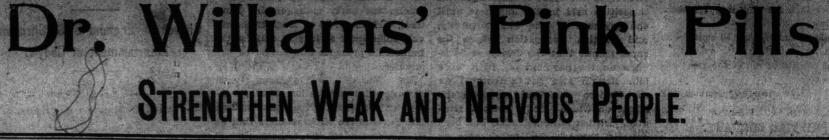

(Cor. New York Sun.) FREDERICTON, N. B., Dec. 26.-FREDERICTON, N. B., Dec. 26.— The most widely known guide in the moose country of New Brunswick is Henry Braithwaite of this town. Hen-ry has lived nearly all his life in the woods, trapping and hunting, and has a remarkable record of success as a guide for American sportsmen in the autumn months. The region where he hunts is known as the Crooked Deadwater, away in the heart of the Miramichi wilderness, where the rid-ges are alive with moose and the bar-ren grounds with caribou. In all his many years' experience Henry has many years' experience Henry has failed only once to secure a moose for the party employing him. This was a New York gentleman who was unpracticed in the use of snowshoes and who would not shoot a moose unless he had a very large set of antlers. Even this sportsman bagged a fine

bull caribo That Braithwaite is a master of every branch of woodcraft is largely due to his powers of observation.He has found out many things that were has found out many things that were formerly unknown regarding the hab-its of animals and the properties of trees and plants. He was the first in New Brunswick to discover that a buil moose could be called as readily by a really skilful caller in the daytime as at night. It is a great adtime as at night. It is a great ad-vantage to the sportsman to have his moose brought up in the daytime, as he can then see clearly how to shoot. Moreover, he escapes the cold and hardship incident to lying out on the barro nall night under a single blanket or sitting cramped up in a birch cance waiting for the moose to come

torious rival had carmly walked off in a different direction. Henry and Billy concluded to follow the smaller bull, as he was heading for a mole open country. They had rot gone twenty rols before another exciting chapter was found written upon the snow. The bears had cir-cled the foot of the lake and were again in close pursuit of the little bull. The latter had showed fight when his foes reappeared, but took to his heels when he found he was being flanked. It looked as though his fight with the big bull had greatly weakened him, for he had fallen twice in his strug-gling flight. The bears, however, could not have been in much better shape, as they floundered through the deep smov- on the open ground. The chase now ed along the sum-mit of a sort of horseback, or narrow

birch canoe waiting for the moose to come. Braithwaite has established the fur-ther fact that moose may be called at seasons of the year other than the rutting period, which is supposed to extend from about Sept. 15 to Oct. 15. It has succeeded in calling up a number of bulls as late as the mid-die of November, and has even thad them respond in May, when, of course, they cannot be shot legally. It not the actual inventor, Braith-waite was the first man to perfect he canboy call. This is produced with the same kind of birchen horn as is used for moose. The call is a pscu-liar sort of bark or cough, the note being common to both bucks and does. On hearing this call a single carlbou, or even an entire herd, will proceed rsually to the place of origin, and,

NERVOUS DEBILITY.

SEMI-WEEKLY SUN, ST. JOHN, N. B., JANUARY 4, 1899.

> Mr. Jas. Purtelle, a well known farmer living mear Crofton, Ont., says:-"For several years I have been a sufferer from nervousness and general debility. I believe my troubles originated in over work, ag-gravated by a severe cold. I had ad-vice from dootors in Picton and Belle-ville, but did not get any better. Then I want to Torgette for treatment and ville, but did not get any better. Then I went to Toronto for treatment, and for a time experienced some relief, but it was only temporary, and soon I was worse than before. Some of my neighbors advised me to try Dr. Wil-llams' Pink Pills. Before the first box was gone I found relief, and after I had used a few boxes more I was rejoicing in complete recovery, and my health has since been excellent. Words fail to express the value I now place fail to express the value I now place on the little pink messengers of health, and I only hope other sufferers will follow my example."

NERVOUS AND RUN DOWN-CURED.

Mrs. C. Roblin of Kingsville, Ont., says:-"I have derived much benefit from the use of Dr. Williams Pink Pills. My nervous system was completely run down, and the nerves of my eyes were so much affected that I could scarcely see, and I had to go to an oculist and have glasses made to order so I could walk about. I tried

many kinds of medicine without any teneficial effect whatever. One day a little book advertising Dr. Williams' Pink Pills was left at my house, and after reading it I determined to try this medicine, and to my supprise I began to feel better before I had fin-ished the first box. I have used three boxes and find my nervous system as strong as ever it was, and my eyesight has improved to such an extent that I go around half the time without using my glasses."

Dr. Williams Pink Pills build anew the blood, strengthen the nerves and restore the glow of health to rale and sallow cheeks. They are a cure for all troubles peculiar to the female system, young or old, and also cure such diseases as rheumatism, neu-ralgia, partial paralysis, locomotor ataxia, St. Vitus dance, nervous head-ache, nervous prostration, the after effects of la grippe, influenza and se-vare colds, diseases depending on hu-mors in the blood, such as scrofula, chronic erysipelas, etc. Do not be per-suaded to accept any imitation, no matter what the dealer may say who offers it. Imitations never cure any one. See that the full mame, Dr. Wilthe wrapper around every hox you buy.

EXTREME NERVOUSNESS

requently Brings Its Victims to the Verge of Insanity—The Case of a Young Lady Given up by Two Dectors. (From the Smith's Falls News.)

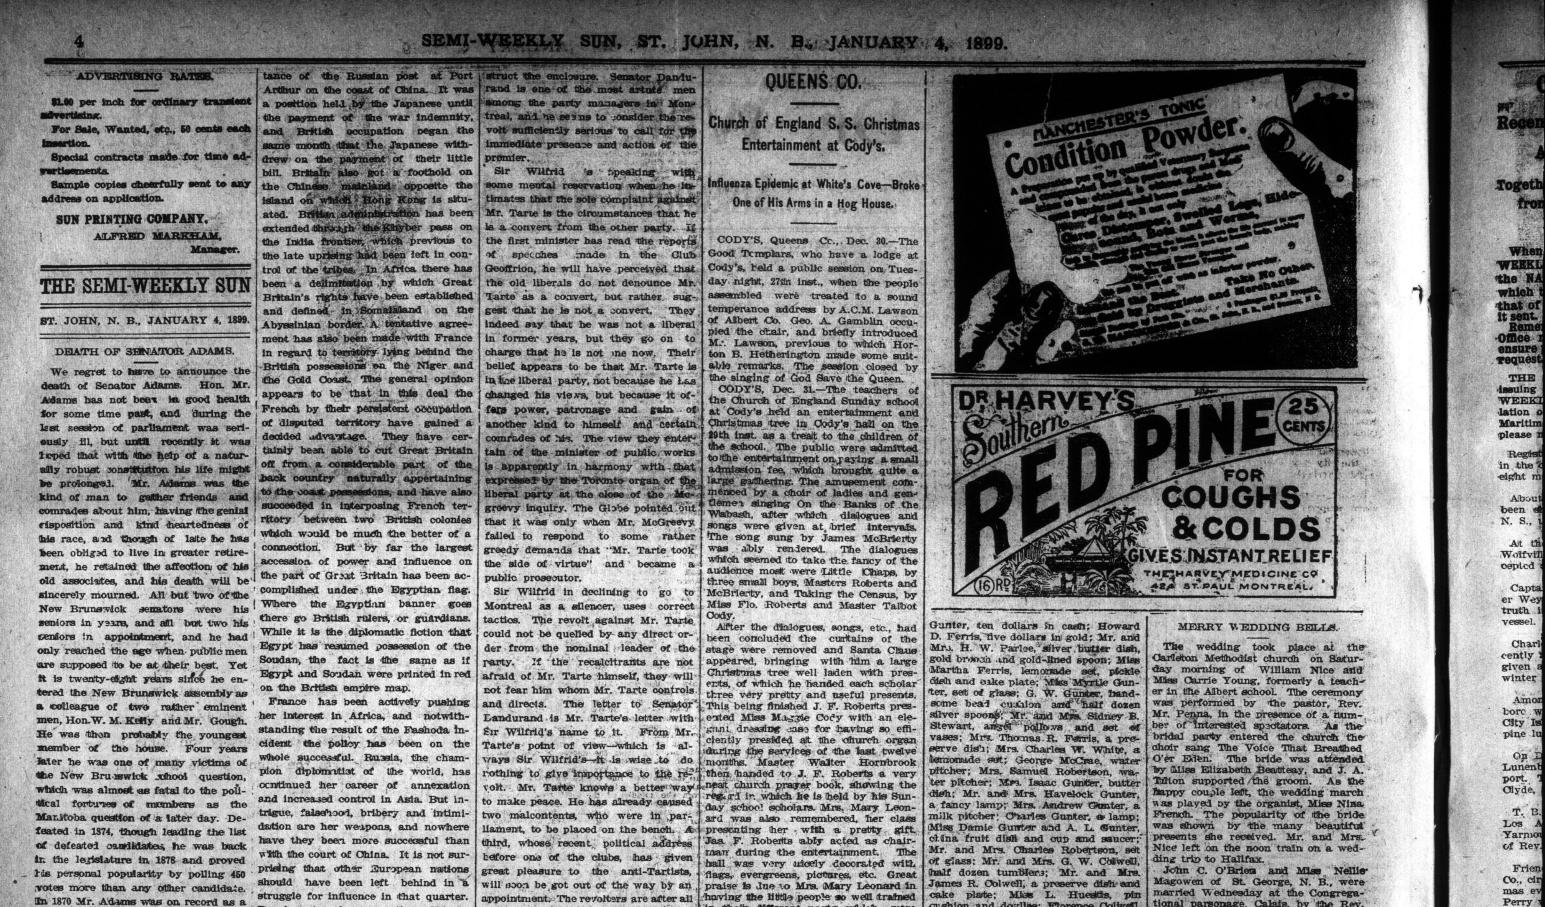

Given up by Two Dectors. (From the Smith's Falls News.) Many cases have been reported of invalids who had suffered for years, and who had been given up by the ad-tending physician who have been re-stored to health and vigor through that now world-famed medicine. Dr. Williams' Pink Pills, but we doubt if there is one more startling or more convincing than that of Miss Eliza-beth Minshull, who resides with her brother, Mr. Thos. Minshull, of this town. The News mething Mr. Min-shull asked him it the story was cor-rect. He replied:--''All I knowl is that my sister had been given up as in-cyrable by two physicians. She is now well enough to do any kind of housework, and this change has, it is my honest conviction, been brought about by the use of Dr. Williams' Pink Pills. My sister is 20 years of age. She came to Canada from England about ten years ago, and resided with a Baptist ministar, Rev. Mr. Cody, at Sori, Que. In April of 1896 she took il and gradually grew worse. She was under a local physician's care for over five months. The doctor said tration of nervous diseases and that he was under a local physician's care for over five months. The doctor said that she was suffering from a compli-cation of nervous diseases, and that he could do little for her. The minister then wrote ne and I had her come to Smith's Falls, in the hope that a change and rest would de her good. When she arrived here she was in a very weak state, and a local physician was called in to see her. He attended her for some time, but with poor re-sults, and finally acknowledged that the case was one which he could do very little for. My sister had by this time become a pillable object; the slightest noise would disturb her, and the slightest exertion would almost make her insame. It required someone to be with ther at all times, and often after a fit of extreme hervousness she would become unconscious and remain in that state for hours. When I went home I had to take my boots off at the doorstep so as not to disturb her. When the doctor told me he could do nothing for her I consulted with my wife, who had great faith in Dr. Wil-liams' Pink Pills, and I concluded it would do no harm to try them any-way, and mentioned the fact to the doctor. The doctor did not oppose their use, but said he thought they might do her good, as they were oer-tainly a good medicine. In September of last year she began to use the Pills, and before two baxes had been used she began to show signs of improve-ment. She has continued their use since, and is today a living testimony

In Europe the national frontiers have not changel. Turkey has received the last of the Greek indemnity and has vacated Thessaly. But while the unfortunate war which Greece took up for the sake of Crete was immediately disastrous to Greece, there are no more Turkish soldiers in Crete. What the protest of Greece could not do was accomplished by the Turkish mob which burned to death a British vice consul in his own house at Candia. Beto:e many days a British the town, and the murderers had been n onths every Turkish soldier had been bundled out of the island. A fortnight later the Turkish governor and the Turkish flag went after them,

NATIONAL EXTENSION IN 1898.

The year 1898 has seen some important changes in the map of the world. and in the relations of nations to each other. The nost notable transfer of territory was the acquisition by the United States from Spain of the Philippines, Porto Rico and Guam. The control of Cuba has also passed to the United States, whose flag was raised there on New Year's day; and the annexation of their island is inevitable. During the year the United States has also annexed the Hawaiian islands. The additional territory thus brought under the control of the United States amounts to about 170,-000 square miles, peopled by some 8,-000,000 inhabitants. This assumes the population of the Philippines to be only 5,500,000, which is far below the ordinary estimate.

It is a poor year in which Great Britain does not make some extension of the boundaries of the empire. The may accept the statement of the Laurenlargement in 1898 was rather an ex- ier and Tarte organs, these anti-Tarte tension of the area of control than of nominal possessions. A NOTABLE LETTER.

Sir Wilfrid Laurier's open letter to Senator Dandurand is a remarkable epistle, but not more striking than the occasion which called for it. The premier has been requested by his leading supporters, and by the party organizations in the great city of Montreal, to go to that town on a solemn errand. The mission is "to silence at once and for all time" the attacks which prominent liberals are making on Mr. Tarte, who is Sir Wilfril's nearest and dearest colleague. Sir Wilfrid in his letter says that these assailants are "enemies who assume the name of liberals," but it appears that they comprise the majority in at least two of the older party clubs; that they have always been supporters of Sir

Wilfrid, and that the older men among them were in other days followers of Mackenzie, Blake and Dorion. If we men were sufficiently numerous to cone for the leaders of the party to fix the limits of independence within British flag weat up at Wei-Hai-Wei, the ranks. Sir Wilfrid has been sum-

Harry W. Covert, barrister, of Halifax, is home for the holidays with his garents, Rev. and Mrs. W. S. Covert. About thirty years ago Captain Warren Chaney of Cheney's island, Grand Manan, was engaged in the coasting trade in China and master of a vessel. It would seem that communication between some parts of the coast was both difficult and dangerous in those days. A Frenchman doing business in China, at Hong Kong, was prevented from making a certain trip prevented from making a certain trip up the coast, and as he found cut that Capt. Chenev's vessel was about to sail he sought an interview with him and asked him to perform or grant him a certain favor, which the genial captain consented to do and did per-

form for the stranger. The circum-stance had long passed from the mind of Capt. Cheney when a few weeks ago he had occasion to take his sloop yacht to Meteghan, N. S., for repairs, and while at the hotel a stylish 'turnout drove up and the driver inquired for the captain, saying that the founder and owner of the little village of New France, which is a short distance from Metegnin, requested a visit from the captain. He went out and was most hospitatbly ententianed by the French gentleman, who leaving "La Belle France" has come to found New the dance, and the majority of those present availed themselves of the priv-ilege. At midnight a sumptuous re-past was served in the dining room, and Mrs. Oraft proved henself a most efficient hostess. Though a stranger among the people of Mace's Bay, this estimable lady has von the hearts of all who have met her. Together with her hospitable husband, she rendered last Monday evening an occasion never to be forgotten by those whose privileze it was to emjoy their kindhis gratitule to the man who through his obliging disposition and courtesy had unknowingly been the means of adding to his wealth. BRIDGETOWN, N. S., Dec. 31.-Aaron Wilde of Dalhousie met with a very painful accident one day this week. He was preparing a decoction

consisting largely of kerosene oil for medicinal purposes and in order to mingle the ingredients thoroughly, he put the dish containing the mixture on the cooking stove to heat, but watched it carefully to see that it did not

explode. Mr. Wilde thought the stuff was about as warm as it would be safe to allow it to get and reached out his hand to remove the dish from the further influence of the heat, but [as he did so the inflammable materials burst into a flame and in the excitement Mr. Wilde pulled the dish off the

stove and some of it spattered on his arm, causing him to accidentally upset the whole affair on the floor. Being in fear of it setting the house on fire, he gave the flaming and smoking dish a kick, which sent it out the door and so saved the house. Mr. Wilde's hand, one foot and shin are so badly burned that it will be some time before he will have the full use of them again.

D. S. Noble, civil engineer of the Midland railway, was in town this week consulting with John Ervin about the proposed railway from Stony Beach to Middleton. Some time ago the people of Middleton took occasion to express their disapproval of a road from Stony Beach to Bridge-

Schatt condition. His recovery is despared of a critical condition. His recovery is des-paired of Instances of the waste of public money by the government of New Brunswick are coming to light every day. Those instances are especially numerous in Premier and Chief Commissioner Emmerson's own coun-ty of Albert. In the parish of Coverdale, in that county, a new road was built last fail at a cost of about \$500. It is some four miles long and there is not a single house on it. It does, however, run past a stone quarry which is owned by two of Mr. Em-merson's prominent supporters in the dis-trict. In the chief commissioner's report for 1897, Albert county expenditures, there is the item "Gold Mine bridge, \$1,100." Now there is no such structure as Gold Mine bridge, but there is a road to a gold mine property where some capitalists were pros-pecting, though the work did not continue very long, and the road is only used now by the boys who go shooting partridge or snaring rabbits. It is sub this is the sec-ond road to this gold mine property, road No. 1 having been built by some previous prospectors, but this did not suit the new company, hence the expenditure of eleven hundred dollars, as given in the accounts of 1897. It is also said that when this road was projected the work was sold at auction and bid in by Hamilton McManus for 5500, but this did not suit the government, and it was let in sections at more than double MI. McManus figures. Another job in the par-ish of Alima is worth noting. A hridge was carted out in the big freshet in the fail of 1896. A resident deeply intrested in having the bridge restored at once offered to do the work for \$650, but this did not suit the government, and it was decided to build without calling for tenders. for the Manchester Liners, Limited, was in the city Thursday, and in reply to the Sun's enquiries made some observations of special interest in connection with winter port development. In the first place, Mr. Hugill pointed

out that the city or the C. P. R. or whoever is responsible, should provide more sheds for live stock on the west side. The Manchester steamers will carry a lot of cattle. The Trader can carry 389, the Enterprise, 582, and the Manchester City close to 650. The last named takes 453 cattle and 150 sheep tomorrow. There is not accommoda

tion enough for that number. Cattle are to be given twelve hours rest before being embarked. In the case of the Scotsman, a special permit had to be got to place them at once on board the vessel. This might not be done again. The intention of the authorities is to carry out the law. If large his property, was tried, convicted and numbers of cattle are to be shipped sentenced to six months in jail and to and that is the intention of the steam ship people, there must be accommodation for them, and more is needed st once. The sheds should be enlarged immediately to double their present capacity.

Regarding increased berth accommodation for steamers, which has been discussed by the board of trade, Mr. Hugill says that more will be need ed next winter, and would have b reeded this wiater if the direct London line had been secured. He advised that new berths should be at

least 500 feet long, to accommodat the larger steamers that will come. In fact, such berths are desirable now, with vessels like the Manchester City and Scotsman in port with several others at the same time, as has been the case this week.

Mr. Hugill things that if the berths are constructed on the opposite side of the present slip a grain conveyor should be carried around the head of the slip, from the elevator, so that it would not be necessary for steamers to shift to take cargo.

Captain McClusky, assistant district Attorney McIntyre, Chief Devery and Coroner's Physician Weston were at police headquarters this afternoon in consultation on the case. Acting under their instructions, letectives were sent to the Adams flat at No. 61 West 86th street, and requested Mrs. Florence Rogers, Mrs. Adams' daughter, and her friend, Mrs. Hovey, to accomrany than to headquarters to give their version of the case. Arriving there, they remained in consultation with the authorities for about an hour. Capt. McClusky said after the women were taken home that he had learned rothing from them. He said it was deemed best to get the versions of the roisoning directly from Mrs. Rogers and Mrs. Hovey.

"But they told us nothing we did not know," he said. "The case is as n-uch a mystery as ever. Nothing has developed. I have no theory. I have no person under suspicion."

Cart. McClusky denied that he had placed or contemplatel placing Mr. Cornish under surveillance. He sent word to the Knickerbocker A. C., howover, acking if Mr. Comish were able to come to headquarters. Dr. Coffin who is atetn ling Cornish, "eplied that his patient would not be able to leave

his bed for two days. When they found he was unable to crme to them, Capt. McClusky and Mr. McIntyre, accompanied by a sten-ographer, went to the Knickerbocker A. C. and were in conference with Cornish for more than an hour. Capt. McClusky said little had been learned that had not already been published. He stated that Cornish told him that the sliver holder had evidently been used and while it was marked "sterling," it was plated. It was not a Tiffany article, but came in a Tiffany box and had a Tiffany card in the packing.

Late this afternoon an autopsy was

At 9 o'clock last night Captain Mc-Clusky stated that he would have Clusky stated that he would have the culprit in custody within twelve hours. The name of the suspected nurderer is withheld from publication lest its anno incement should defeat the ends of justice. The man under surveillance was formerly a member of the Knickerbocker Athletic club. He was at one time a man of high social and financial standing in this city. In later years, through habits and evil associations his de-scent was rapid. From being unpopular at the athletic club, he latterly developed into a person with whom the embers of the club would not assoiate.

Bitterly resenting his expulsion from the club, the man vowed vengeance on Oornish and others. The death of Mr. Barnett, another memil ver, was due to poison sent by this fiend. The police has two definite clues that point to this suspect only, the handwritting on the parcel and the silver toothpick holder which contained the pctson.

BETTY TO HERSELF

(On Christmas Morning.) How kind they have been to their Betty! What girf is so favored as I? The sum of my virtues is petty, But hove sees the figures mile high. The pleasing array's almost endless, They're humored my every whim, Yet I feel quite forsaken and friendless-There's nothing from him!

His income I know is a small one With which a great deal must be Persooth, it's enough to appal one, His burden from sun unto sun. But surely I've kept within reason. Expecting, by good-will inspired. A greeting becoming the season— It's all I desired!

These verses I longed for so deeply Are puerlie things after all; And none must discover how cheaply The strains of this rhapsody brawl!--Int whose card is this with the roses? tem in St. John is entirely different to that in Ottawa. 'The entire board of al·lermen and mayor are elected by the popular vote of the whole city, and the council consists of an alderman for each ward, who must either live or do business in the ward which he represents, together with two alder-men at large and the mayor, all of whom are elected by the same voters. In Halifax each member of the board is elected for three years, a part of the council retiring each year. . It is claimed that this system has worked vell. Civic business in St. John is managed by four poards-public works, safety, board of management and treasury board, composed of from five to nine members each. The work is carried on by the soverall boards, which report to the council at its regular nceting, and this pody has the option of approving, rejecting or amending their reports and recommendations.

"All the late harbor improvements looking to the providing of trade facili-ties and the building up of the city, as a commercial and manufacturing centre, have been brought into effective operation since the abolition of the ward system, and the reduction of the council from 26 to 15 members. There is, however, nuch difference of opinion as to the advantages of the present system, with annual elections of the whole board. It is generally admitted that the council is alive to the necessity of the city making strenuous efforts to develop its trude. During the rast few years we have expended nearly a million dollars to provide railway and wharf accommodation for the trade of Western Canada during the winter months. The C. P. <section-header><section-header><section-header><text><text><text><text><text><text> NEW YORK, Jan. 1.-The American line steamer Paris, which arrived today from Southampton after a tempestuous passage, reports that on Tuesday, Dec. 27, lat. 49.29 north and lon. 31.29 west, at 8.30 in the morning, she sighted a steamer flying signals of distress. On bearing down to her she proved to be the British tank steamer Vindobala, Captain Clarke, from Rouen Dec. 15 for Philadelphia. She showed the signal letters "N. D.," meaning "Must abandon vessel." A life boat was launched in charge of Chief Officer Bradshaw, Fourth Officer Webb and eight seamen. A dangercus sea was running at the time, and a hearty cheer was given the life savers as they left the side of the Paris. The boat was unable to go alongside the Vindobala, owing to the heavy sea, but the Vindobala's crew were fastened to lines thrown to the boat and were hauled on board. The ship's carpenter unfortunately let go of the line fastened to him and was lost. Al-though the distance between the two steamers was not great it took two and a half hours to rescue the men

REV. MR. LEARD'S MARRIAGE. At Robie street church, Halifax, on Wed-needay, Rev. Levi J. Leard of Grand Manan and Miss Matilda E. Thealaston, daughter of Henry Theakston, were united in marriage. The ceremony was performed by Rev. Dr. Smith, assisted by Rev. R. S. Stevens. Key. L. R. MoDonald of Mount Allison acted as best man, and Miss Minnie Theakston, sis-ter of the brids, was the bridsemaid. The chancel of the church had been decorated by the Epworth League and the bride and groom stood under a floral bell while the ceremony was performed. The choir was present and terdered appropriate music. The bride wore a travelling costume of blue cloth, and the bridesmaid a dress of dark brown material. Frank C. Woodill and John Redden acted as ushers. After the ceremony the happy couple left for Carle-fon, N. B., where they will spend a few days tefore going to Grand Manan. The happy couple received many presents. The groom's gift to the bride was a gold watch and chain.-Chronicle.

PARIS, Dec. 31.—Jos. Vacher, the French "Jack the Rhpper," was guillotined at Bourg-on-Brosse, capital of the department of Ain, this morning. He protected his inno-cence to the last. Vacher, who was 28 years of ase, was condemned at the October as-sizes at Ain. He is known to have brutally murdered four boys, six women and girls and an old wildow. Most of the victims were tending herds when Vacher came be-hind them and cut their throats.

were tending herds when Vacher came be-hind them and cut their throats. The orimes of Jos. Vacher have surpassed in number srd atrocity those of the White-chapel murderer known as "Jack the Rip-per." His homicidal mania first broke out seriously in 1894. He claimed after his str-rest thut-as every action has an object, and as his motive was neither their nor ven-gaance. Als irresponsibility was established. Physiologically, physicians have regarded the case interesting. It was shown that Vacher had been confined in an azylum for the insane, and that while doing military duty a love affair caused him to attempt self-destruction by shooting. The victims of Vacher were shepherds and shepherdesset and his rage was periodarly directed against young girls. He first out the throats of his victims with a knife and afterwards intiliated them with a razor. He was ar-rested last year after the police had search-ed for him for a long time in vain. In defence of Vacher it was pointed dut that when a youth he was blitten by a mad of and that the village herbalist gave him some medicine, after drinking which he be-came strange, irritable and brutal. It also appears from those statements that from time in stime he developed a passion for hu-man blood.
