Home Made Electricity

How a Farmer May Utilize a Little River.

Why not more electricity for our farmers?

Easy to get, and mighty cheap, if there be on the farm even a tiny stream.

There are scattered throughout the country innumerable brooks and streamlets capable of supplying enough electric power for all farm and domestic needs.

A brook ten feet wide, with an average depth of two feet and flowing two feet per second under a "head" of five feet, can supply ten horse-power continuously—enough to light the average farmstead and leave enough over to operate motors for many of the needs of power on the farm.

Electricity on the farm is as helpful to the farmer's wife as to the farmer. It may be so utilized as to relieve her of much drudgery.

The first thing for the farmer with a brook at hand to consider is how much power he requires—the unit of electrical power being the "watt." One horse-power is the equivalent of 746 watts.

To run a twelve-inch electric fan requires forty watts; a toaster, 400 watts; a four-inch disk heater, 450 watts; a coffee percolator, 500 watts; a small hot-water heater, 1,500 watts. Lights consume ordinarily twenty-five or forty watts.

To run a churn takes half a horse-power, a cream separator the same, a milking machine the same, an ice cream freezer the same, a washing machine the same, a grindstone half that much, a wood-saw three horse-power, a hay press the same, a feed grinder five horse-power.

Even an insignificant streamlet may supply all the current needed on a farm, for lighting if for no other purpose, when properly harnessed. With storage batteries provided it can use all of its energy throughout the twenty-four hours in loading them—the power to be drawn off during only a few hours each day.

Hydro-electric outfits suitable for farm use are inexpensive, and their upkeep costs almost nothing.

Where Wood Is Money.

Who ever heard of wooden money? The only known currency of this kind is issued by the Hudson Bay Company, and circulates all over the vast territory controlled by that powerful trading concern.

It is a coinage consisting of pieces of wood known as "castors," which are stamped with a die. These are accepted everywhere in that territory as cash, and are exchangeable for all sorts of supplies and commodities at the widely scattered stations of the corporation.

The area governed by the company is vast. In one straight line it extends as far as from London to Mecca; from King's Posts to the Belly Banks is further than from Paris to Sarmacand. Over all of this region the corporation exercise a complete dominion, employing the native Indians, chiefly Ojibway and Crees, to collect the furs which furnish its revenue.

Hudson Bay is about two-thirds the size of the Gulf of Mexico. It is an almost landlocked sea, with 3,000 miles of coast line. More than 300 years ago Hendrik Hudson, trying to find the northwest passage, wintered there. His crew mutinied and set him adrift in an open boat with his son and seven others. He and his companions were never seen again.

The unit of value in that part of the world is a beaver skin. Two martens are equal to one beaver, and twenty muskrats are equivalent to one marten. The trapping is done in winter, and in spring the Indians bring the pelts to the stations, receiving in payment for them wooden money. With the latter they buy what supplies they need at the store maintained by the company at the stations.

Bill's Pension.

"Well, Bill, what are you going to do when you gets demobilized?"
"Live on me pension, of course."
"You don't think yer goin' to get a pension from the army, do yer?"
"No, not army—old-age pension, I mean."

Time Lost In Disputes.

The time lost on account of industrial disputes in Canada during April was much greater than during either March, 1919, or April, 1918. There were in existence during the month 37 strikes, involving 12,415 workpeople and resulting in a time loss of 111,083. Twenty-seven strikes were reported as having commenced during April. At the end of the month 14 strikes affecting approximately 1812 workpeople remained un-terminated.

The New School

Work on Waterdown's fine new \$75,000 Public school began last Monday when Architect Arms staked out the grounds. The work of erecting tool shed and storage room for cement has been finished and the excavating will be proceeded with at once.

As the contract calls for the completing of the building this year the work will be rushed as rapidly as men and material can be secured.

The school, when completed, will be one of the finest village schools in Ontario and equal to any city school in Canada. It will contain its own private water system, steam heating plant, electric fans and other modern improvements. The building is being erected on the old Fair grounds, which was purchased by the School Board some time ago, and will front on Mill street. An ideal location. Mr. Henry Slater of this village has the contract for the entire construction of the building.

Song Service

Next Sunday evening there will be a special service of song in the Methodist church to which everyone is invited and will be cordially welcomed. The choir will be assisted by Miss Chrystal Sharpe, soprano soloist of Ancaster, and Messrs. Galivan and Langton, violinist. The following music will be given.

Organ	Andante in G	Batiste
Anthem	Awake, Awake	The Choir
Trio	O for a Closer Walk with God	Mrs. Thomas, Misses Featherston and G. Everitt
Solo	Thy Will Be Done	Marsten
Miss F. Dale Sinclair		
Male Quartette	My Anchor Holds	Messrs. Sawell, Sparks, Smith and Allen
Violin Offertory	Air from Il Trovatore	Mr. C. Galvan
Solo	Miss Chrystal Sharpe	
Anthem	"Sail On"	E. Sparks and Choir

It Pays to Smile

It pays to wear a smiling face,
And laugh our troubles down,
For all our troubles wait
Our laughter or our frown.
Beneath the magic of a smile,
Our doubts will fade away
As melts the frost in early spring
Beneath the sunny ray.

It pays to make a worthy cause
By helping it, our own,
To give the current of our lives,
A true and noble tone.
It pays to comfort heavy hearts
Oppressed with dull despair,
And leave in sorrow darkened hearts
A gleam of brightness there.

It pays to give a helping hand
To eager earnest youth,
To note with all their waywardness
Their courage and their truth;
To strive with sympathy and love
Their confidence to win;
It pays to open wide the heart
And let the sunshine in.

MARIE

Yeoman-Buchan Wedding

A quiet wedding was solemnized at Grace church on Saturday afternoon last. Rev. H. J. Leake officiating, when Miss Mary Mabel Buchan, youngest daughter of John and Mrs. Buchan, Dundas street, was united in marriage to Mr. John Yeoman of Hamilton. The young couple was unattended, and only immediate relatives of the contracting parties were present at the ceremony. The bride, who is one of Waterdown's fairest and popular daughters, was the recipient of a number of useful and costly presents which amply testify to the high esteem in which she is held by a large circle of friends who will wish the young couple many years of happy married life. Their future home will be in Hamilton.

Mrs. Marion Inksetter

After an illness of many months duration, death relieved the patient suffering of Mrs. Marion Inksetter last Friday at her home here. Deceased was the widow of the late Col. Geo. A. Inksetter of the 2nd Divisional Engineers who was killed at the Somme in October 1916. She was the youngest daughter of Thos. Gibson of Copetown, where she was born 31 years ago. She was widely known and highly respected by a large circle of friends who regret her death and extend to the sorrowing relatives heartfelt sympathies.

The funeral took place Sunday afternoon from her late residence here to Christie's cemetery, services at the home and grave being conducted by the Rev. J. F. Wedderburn, pastor of Knox church. A large number of friends attended to pay a last tribute of respect to a kind and noble woman.

The pallbearers were D. Meyers, Thos. Work, J. Inksetter, R. Smith, W. Smith and Thos. Foran, all relatives of deceased.

Stanley Bean Electrocuted

Mount Elgin, July 15 —The funeral was held yesterday, from Dereham Centre Church to Mount Elgin cemetery, of Stanley, the ten-year-old son of Rev. J. W. Bean, of Dereham Centre, formerly of Onagh, Halton County, who was killed on Thursday afternoon by coming in contact with a high voltage Hydro wire, which had been broken down by limbs of trees, torn off by the high winds and which was lying by the roadside. Apparently he did not see the wire, screened by leaves. Rev. Dr. Ross conducted the service, assisted by several other ministers. Sunday School class-mates of the little lad bore the floral tributes. Relatives and friends were present from Kitchener, Woodstock, Ingersoll, St. George, Millgrove and Hamilton.

The Rev. J. W. Bean was a former pastor of the Millgrove Church and well known in this locality. The many friends of the family will be sorry to learn of their sad bereavement.

Died of Wounds

Sergt. J. H. Robertson, who was reported missing on Oct. 1st 1918, is now officially announced to have died of wounds on or after Oct. 1st, 1918. Word to that effect having reached his wife and family here last week.

Millgrove

A number from here attended the funeral of Stanley Bean which took place at Dereham Centre.

Mr. and Mrs. Moorehouse of Sault Ste. Marie is visiting at Arthur Mc Intyres this week.

Vivian Smith of Hamilton is spending her holidays in the neighborhood.

Mrs. Mosher of Toronto is visiting with her daughter, Mrs. Kenneth Cummins.

Mr. and Mrs. Hugh Drummond of Hamilton attended church here last Sunday.

Mrs. Lindsay, of St. Thomas, is ill at the home of her daughter, Mrs. Roland Cummins.

A large number of our young people attended the Grocers' Picnic at Wabasso Park and the Garden Party at Waterdown last week.

Harry Allen another of soldier boys has returned home, and is staying at Geo. Lises.

A Community meeting was held here last Tuesday evening in the interests of our returned soldiers.

GILLETT'S EYE LINIMENT
USEFUL FOR OVER 500 PURPOSES
MADE IN CANADA

A CLEVER GYMNAST.
Some Exploits of the Zebra Spider—A Noted Hunter.

Most of us are acquainted with the tiny red spider that careers about the herbage with such amazing agility. He is a hunter par excellence, and quite puts to the blush his long-legged cousin that wambles over the dry moorland floor, his legs always, as it were, in his way, and ever aimlessly seeking for the land of nowhere. Doubtless his eyes being fixed in the middle of his back accounts for his ineptitude. He is also more noticeable for the fact that he himself is a veritable quarry, the hunter in this instance being secure in his immobility. The brilliant scarlet dots on him are not part of his own autogeny; they are six-legged parasites which even his immense legs are unable to brush off. One virtue accredited to him deserves mention, for more than one local weather-forecaster swears by the "etercap." And they are rarely far out either.

My favorite of the spider tribe, however, is one that has given me much cogitation. He seems quite too clever, for he apparently eludes the force of gravitation. This is the zebra spider, a famous jumper. His gymnastic feats are not limited to solid earth, but take place caught one the other day, I took one on the walls and ceilings or, indeed, anywhere upside down or vertical. Having opportunity to find out if his wonderful powers were understandable to us, so I put him under a glass bell, and gave him a fairly long fast. In the interim, he had a good look at him. He is "spotted like a pard," the grayish markings resolving themselves under a lens to aggregations of oblong scales on his black body.

Lachute, Que., 25th Sept., 1908.
Minard's Liniment Co., Limited.
Gentlemen,—Ever since coming home from the Boer war I have been bothered with running fever sores on my legs. I tried many salves and liniments, also doctored continuously for the blood, but got no permanent relief, till last winter when mother got me to try MINARD'S LINIMENT, the effect of which was almost magical. Two bottles completely cured me and I have worked every working day since.

Yours gratefully,
JOHN WALSH.

Over all he has a "birry" hairiness that is quite fearsome, and the manner in which he chases his pedipalps, or hands together must prove very annoying to his enemies. Later he finds these appendages of great use, for after a meal he continually touches up his whiskers with them. Indeed, they are so flexible and gritty, and so well furnished with brushes that it might well be supposed that that is their primary purpose, for they are of no military use whatever, however, fearsome they may look. The time appearing propitious for my experiment of spider versus gravitation, I placed a fly on the ceiling of the bell-jar, very soon he saw her; approaching nearer and nearer with movements that vividly recalled the stalking of a bird by a cat. Both being upside down I was quite sure he would never manage it.

However, I was so intent on watching the attitude of the hunter and hunted that I omitted to observe a very important happening, indeed, the very thing that would explain what I wanted to know. In due time, doubtless when his fixed focus eyes—he has four by-the-by—synchronised with his leaping powers, he made his terrible leap. Instantly both were struggling in the air, suspended by a thread. This then, was the secret. He was—and this was what I did not notice—anchoring himself safely with a life-line before the attack. This holding firm, all the rest of the struggle took place in mid-air. Then, with his fangs in the fly's neck, he regained the firm foothold.

It was only then that I saw how, every few paces, the spinnerets attached the invisible thread to the glass so that no risks might be run. I could see the spinnerets perform the action; the thread I could not see, even under a powerful lens, so fine was it, yet so efficient, that it bore the weight of the struggling combatants immediately it was spun. On a horizontal surface this anchoring line

Dr. Martell's Female Pills
For Women's Ailments

A scientifically prepared remedy of proven worth, recommended by physicians. Sold for nearly half a century in England and the United States. Beware of cheap imitations. At your Druggist or by Mail Direct from our Canadian Agents, Leonard, Ryan & Co., Ltd., Toronto, Ont. Price 25c per box.

would only be a hindrance, so that he must exercise a certain judgment in his procedure, measuring, as it were, all the risks involved in the audacious leap into the air. He rarely misses once he gets into striking distance. This, however, is always just his difficulty.—The Sportsman.

Husband Alleges Deception.
A California man testifies in the divorce court that when he was courting his wife she always met him at the front door with a kitchen apron on, leading him to believe she was domestic in her taste, and after he married he learned to his dismay that she had never even learned how to boil an egg, and that she gave him the alternative of boarding or clearing out.—Houston Post.

Minard's Liniment Cures Diarrhoea.
Ability of the Aged.

It has often been said that a man cannot learn a new trade after he is forty, but this statement has frequently been disproved. Peter S. Du Pont was eight when he wrote his valuable treatise on the Cochon Chinese language, and had only then recently taken up the study; and the late John Bigelow was still an author turning out a book when he passed his ninety-fifth birthday.—Philadelphia Public Ledger.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A HEROIC DEED.
British Officer Risked His Life for Foe.

Valor and glory shine brightest when we behold them in sacrifices such as that of Gen. John Gough, V. C., who went from his place of safety far down the line to take comfort to his old regiment, and was killed while on his mission of mercy.

If where a high officer sacrifices himself for his men is glorious, what shall we say of the deed of a British officer who offered himself to save his foe? During an attempted daylight raid on the part of the Germans, they were held up by a withering machine gun fire and retired with great loss to their own trenches. One poor Hun, who was terribly wounded, was impaled upon his own wire, and he hung there writhing in agony in the eyes of both armies. Finally the sight of his suffering and his cries for help were too much for an English officer in the trenches opposite. Vaulting over the parapet, he walked boldly across No Man's Land in the direct face of the foe, and, lifting his wounded enemy from the impaling wire, he carried him across the Hun parapet and down into his own trenches. When he arrived there a German officer took an iron cross which he wore off his own breast and placed it on the breast of the brave British officer. The firing on both sides ceased while he returned to his own trenches. After looking on, both friend and foe alike knew that he had beheld the highest form of glory.—Capt. Arthur Hunt, Chute in Leslie's.

Minard's Liniment Cures Garget in Cows.
PURCHASERS OF LAND.
Why One Should Buy for Use and Not for Speculation.

It is human and natural that those who have land to sell should desire to obtain the best prices. Owning or selling land is not less legitimate than deal in any other commodity. Criticism of real estate owners and operators is often unfair and many men who are engaged in land dealings suffer from the odium drawn upon their profession by unscrupulous vendors. People, however, should blame themselves when they are deluded by improper speculative real estate operations.

It is in the interests of those who own land or those who represent the best type of real estate operator that the public should be educated to understand what should be avoided in dealings with land. During the past ten years, millions of dollars have been lost in real estate speculation. This has destroyed confidence in land investment, has increased municipal taxation and created incalculable hardship to small purchasers.

One of the fallacies which receives general acceptance is that there is no distinction between the ownership of property through borrowed money and the renting of property. Ownership of houses and land only possess the merit that is claimed for it when it is free or comparatively free of mortgage. When property is heavily mortgaged, the payment of interest is equivalent to paying rent and is often more burdensome and irksome than

CUTICURA HEALS PIMPLES

In terrible rash on face which made skin sore and inflamed. Irritated face by scratching and was disfigured. Could not sleep well and made feel unpleasant. Trouble lasted 3 months before used Cuticura and after using 2 cakes of Soap and 1 box of Ointment was completely healed.

From signed statement of Miss Gladys Nabel, R. R. 3, Brussels, Ont.

Cuticura Soap, Ointment and Tablets promote and maintain skin purity, skin comfort and skin health often when all else fails.

For free sample each of Cuticura Soap, Ointment and Tablets address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

60 foot lot. If, therefore, \$400 is the payment of rent to a landlord. The following facts should be considered by those contemplating the purchase of land for building:

1. If land is purchased for immediate use, a higher price can be paid for it than if purchased for future use. If held for future use, the cost of the lot will increase by reason of the taxes plus compound interest on the purchase price. To a purchaser of a lot costing \$400 and held for six or seven years without being built on, the real cost will be about \$800. If the purchaser proposes to hold land for six or seven years, he should only pay half the price he thinks he can afford to pay for a site for his home.
2. In the final analysis, the cost of land should be estimated to include the capital cost of local improvements, and these may be roughly estimated at \$10 per foot frontage or \$500 on a paid for a lot 50 feet wide, its real cost when improved for the purpose of a residence, will be \$900. Thus, fully improved land at \$18 a foot front is worth as much as unimproved land at \$8 a foot front in a case where the local improvements are paid for and are of reasonably high quality.
3. A purchaser of a lot at \$400 in 1919—to use exact figures—must estimate that the lot will cost \$701 in 1924 and \$983.50 in 1929, allowing compound interest at the rate of seven per cent and without any allowance for taxes, which should also be capitalized during these periods. Negotiable bonds paying 5% to 6 per cent, are as good or better than money earning 7 per cent if tied up in real estate.
4. When land is unimproved and is held for speculative purposes, it injures the person who wants to buy for immediate use, inasmuch as the price is increased to the latter by the competition of men who buy for speculation. Any one who speculates should take into account the fact that he is working against the interests of those who wish to buy for use.

Minard's Liniment Cures Colds, Etc.
THE MAIN THING.
"My poor man," said the sympathetic prison visitor. "Do let me send you some cake."
"Thank you, mum. Dat would suit me fine."
"What kind would you prefer?"
"Any kind, mum," said the prisoner, lowering his voice to a whisper, "just so it's got a file in it."—Birmingham Age-Herald.

Such a Change
in feelings and looks! "After suffering pain, feeling nervous, dizzy, weak and dragged down by weaknesses of my sex—my eyes sunken, black circles and pale cheeks—I was restored to health by the Favorite Prescription of Dr. Pierce." So write many women. Changed too in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. Druggists sell it in tablets or liquid. It's a woman's best temperance tonic, made from wild roots.

HAMILTON, ONTARIO.—"Dr. Pierce's Favorite Prescription helped me greatly at the turn of life. I commenced to have heat flashes and dizzy spells and became nervous and run-down. These conditions very quickly left me after I commenced with the 'Favorite Prescription.' I took several bottles of it and truly believe that I owe my good health of to-day to the medicine I took and the care exercised at that trying time."—Mrs. Rosamund, 65 Bay Street, S.

A Great Cataract.
What is set down as the greatest cataract in the world is on the Igazu River, which partly separates Brazil and Argentina. The precipice over which the river plunges is 210 feet high, that of Niagara being 167 feet. The cataract is 15,123 feet wide, or about two and a half times as wide as Niagara. It is estimated that 100,000,000 tons of water passes over Niagara in an hour. A like estimate gives the falls of Igazu 140,000,000 tons.

A French Wonder.
The police force of the Ninth Paris Arrondissement boasts a policeman named Costy, whose powers of calculation are attracting the attention of the scientific world. The moment he hears a spoken phrase he is able to tell the number of letters it contains. He takes no time for reflection and says he does not even need to think, the calculations being automatic.

Will Grow Hotter.
According to an English scientist's theory, if the radium in the interior of the earth equals in quantity that grow hotter in time instead of colder in the surface rocks, the world will

MURDERED.
Put right out of business, a whole family of corns by Putnam's Corn Extractor, which cures corns and warts in one day. No pain or sore if "Putnam's" is used. Refuse substitutes, 25c per bottle at all dealers.

PLENTY OF WAR LEFT.
(Montreal Herald.)
The signing of the treaty between Germany and the allied and associated powers has brought peace to only one part of the world. Here are some of the conflicts still in progress:

The Poles are fighting the Russian Bolsheviks.
The Ukrainians also are at war with the Bolsheviks.
The Germans are fighting the Lithuanians, who themselves are at war with the Bolsheviks.
The Finns are fighting the Bolsheviks.
Civil war continues in Russia, where the Bolsheviks are hard pressed by their Russian enemies on several fronts.
The Hungarian communists are fighting the Czechoslovaks and the Rumanians.
The seizure of Smyrna by the allies has led to fighting between the Turks and the Greek forces of occupation.
On the northwestern frontier of India and Afghans are fighting the British.
China is again in the throes of a civil war.
Carranza is fighting Villa and other rebel leaders for the control of Mexico.
In Costa Rica the Tinoco Government has driven the rebels over the border into Nicaragua, and the latter country fearing an invasion, has appealed to the United States for protection.

Catarrah Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrah Deafness, and that is by CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrah Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrah Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All Druggists &c. Circulars free. E. J. Cheney & Co., Toledo, Ohio.

England's Literary Officeholders.
Among living English literary men who have taken the king's shilling are Edmund Gosse, librarian of the house of lords; W. W. Jacobs, who was in the postoffice; Sidney Webb, who was in the colonial office; Austin Dobson, who was at the board of trade; and Sir Sidney Colvin, who was, and Laurence Binyon, who is, an official at the British museum.—London Express.

Minard's Liniment Cures Diptheria.
Eskimo Kayak.
One of the oddest crafts ever seen near Provincetown, Mass., was the Eskimo kayak, in which Explorer Donald B. MacMillan paddled about The kayak is a man's canoe and is built on a frame on which is stretched skin water tight. It is handled with a double paddle, is decked over, and, with an expert in it, is one of the safest small craft known.

BOYS FOR ADOPTION
The Hamilton Shelter of the Children's Aid Society has several fine little boys from five to ten years of age, which it desires to place in good homes for adoption.

Among the number is a fine little colored lad of twelve years.

A letter to Inspector Wyllie, 67 Hughson street, south, Hamilton, or telephone Regent 285, will bring full information.

Pajama Frivolity.
Gorgeous materials, some handpainted. Reverses ornamented with little green frogs.
He himself wears a silken suit with broadened hip sash.
Black and white newest note for miliary, who affects white satin, black velvet striped trousers with plain white coat.

RICHEST SOIL IN AMERICA

Crescent City, Florida.
June 26th, 1919.

Florida Land Owners' Association,
Crescent City, Fla.

Gentlemen:

Coming from St. Catharines, Ontario, Canada, which is in perhaps the best fruit and truck farming belt in the Provinces, naturally I was more or less sceptical of lands in any Southern States, but after looking over many tracts in Florida, it remained for me to see the lands you were offering, and I must say that they are the RICHEST LANDS I have ever seen. I would be pleased to have any Canadian write me for further verification of this statement and can honestly recommend not only your wonderful lands, but the Association as a whole. The easy terms you offer makes it possible for practically any one to purchase and, no one need hesitate about buying before they examine the lands as I know you will select only the best, and make a better selection than the purchaser would himself.

Wishing your Association much success I am,

Very truly yours,
David Deaver.

A Constipation Cure Sold on Guarantee
Dr. Hamilton Says His Remedy Never Fails to Cure Quickly.

Mine is a marvellous remedy. There are others, but not one possesses the peculiar merit so prominent in mine.

With my remedy I guarantee to cure constipation.

I also guarantee to prevent it.

My preparation, which is in pill form gives tone and regularity to the bowels that quickly rid the system of effete matter, accumulations of bile and other injurious results of costiveness.

I call my pills Dr. Hamilton's. I am sure they are safe because composed of such health-giving vegetable extracts as Mandrake, Butternut, Hyocamus and Dandelion.

My pills are not harsh or drastic. They cause no pain, no distress; they are prescribed by physicians because of their mildness and certainty to cure.

For women and children I know of no better medicine and headache, and can strongly recommend them in these troubles.

My personal guarantee stands behind every box of Dr. Hamilton's Pills; and this means much to you in selecting your remedy.

Every dealer sells Dr. Hamilton's Pills of Mandrake and Butternut Pills per box.

WATERDOWN,

ONTARIO

PLAN ENORMOUS DAM.

Ingenious Scheme to Heat Maritime
Provinces.

Modern ingenuity has discovered a most efficient mode of heating houses in winter—that of hot water. Furnace and caldron are sometimes, in the case of hospitals or other large buildings, placed at a distance from the apartments to be warmed. In such cases pipes conduct heated water into the radiators and back again when cooled. Thus, cool water is continually entering the bottom of the caldron while heated water flows from the top. It is now proposed to apply the warm waters of the Gulf Stream to the eastern portions of Canada and the United States, that such regions might enjoy a more even temperature throughout the year and permit a more luxuriant vegetation.

The closing of the Straits of Belle Isle, which are about 11 miles wide at the narrowest point, thereby shutting out the Labrador current, the harbinger of Arctic blasts and the reason why St. Lawrence ports are closed during the winter months, would divert the "Cold Wall" to the Atlantic and allow the warm waters of the Torrid Zone to circulate freely around eastern shores. Such a change, it is thought, would increase the value of lands and natural resources by billions of dollars; would greatly improve living and public health conditions; would release vast quantities of fuel, now necessary for heating purposes, to be used in industry; would be the means of augmenting the population, commerce and revenues of Canada.

The project has been pronounced possible by engineers. The cost would be great, but nothing in comparison to the results to be gained. The saving in fuel alone to the benefited areas, it is thought, would repay the entire expenditure.

The Labrador current sends a large volume of water through the Straits of Belle Isle; thence southwesterly along the coast of Nova Scotia, New Brunswick and the United States, creating a cold current, technically known as the "Cold Wall" between the Gulf Stream and the North American coast.

The climatic effect of this Labrador current on Canada covers a wide extent of territory. It brings winter earlier; makes spring later, and materially lowers the temperature.

In the Province of Prince Edward Island, having an area of 2,184 square miles, and a population of about 100,000, the only disadvantage this fertile island labors under is its long winter, owing to the piling up of ice in the Gulf of St. Lawrence under the low temperatures caused by the Labrador current.

The portions of the Province of Quebec having water frontage on the estuary of the River St. Lawrence, the Gulf of St. Lawrence and the Strait of Belle Isle, including the Laurentian Highland region, a substantial portion of the valley of the St. Lawrence and the Island of Anticosti, the Bird Islands and the Magdalen Islands. Throughout all these areas the winters are long and cold and the summers short and hot.

The Province of New Brunswick has an area of about 28,000 square miles and a population of about 400,000. The winter conditions throughout the entire province are rendered more difficult by the influence of the Labrador current.

The Province of Nova Scotia has an area of about 22,000 square miles and a population of about 500,000.

In explanation of the certainty which is stated of benefits resulting from the bringing inshore of the Gulf Stream current, one may, as a particular instance, refer to the case of Atlantic City, New Jersey, which owes its world-wide fame as a winter resort entirely to the local effect of the Gulf Stream.

The stream may, by way of average, be stated to pass 20 miles offshore at Cape Hatteras; 60 miles off Nantucket Shoals, and 120 miles southward of Nova Scotia; the warm waters of the Gulf Stream being there shut off from the Canadian coast by the "Cold Wall" of the Labrador current, through which no heat can pass.

War Saving Stamps.

A handbook issued by the Canadian Government in furtherance of the campaign for the sale of war savings stamps, contains a concise statement of this plan of investment, its attractive features, the methods of conducting the campaign and reasons why the money is needed. The attractive features of this form of investment are its absolute security, backed by the collective wealth of Canada, easy payments by means of small savings made at the investor's convenience, protection against loss by registration if desired, power of redemption with interest before maturity, and a fair rate of interest of five per cent. on the investment. The Government has authorized the issue of \$50,000,000 of war savings stamps during 1919, and it is expected that they will all be absorbed. This money, says the handbook, is required in order to meet the interest charges on the war debt and to furnish funds for needed development in Canada, as it is probable that Canada will be thrown on her own financial resources for a considerable time to come. "Overseas in the devastated countries there is an immense demand for commodities such as we produce, but those lands devastated by war have not at the moment the cash with which to purchase. If we are to supply them with goods we must do so on credit and the banker of the situation is the Canadian Government."

TOO MUCH SPEED.

Reason For the Increase of Heart Disease in Dominion.

The coming census will strikingly show how, while the death rate from some diseases has greatly fallen off, it has steadily and rapidly risen from certain other maladies during the last few years.

Most noteworthy is the fact that heart disease has leaped to the front as the foremost cause of mortality in Canada, taking in this respect the place formerly held by tuberculosis.

There are now as many deaths from heart disease in this country per 1,000 of population as were attributable to tuberculosis twenty years ago. In the meantime mortality from the latter plague has so far lessened that fewer than sixty persons die of it where it killed eighty in 1900. But heart disease takes nearly eighty lives to-day where in 1900 it destroyed fifty.

Heart disease fifty years ago was a relatively rare malady. It has now become exceedingly common. Why? Physicians say that the increase is due to the excessive "drive" of Canadian life. The strain to which the heart is subjected is too great.

It is the same way with apoplexy, the death rate from which has risen steadily and fast during the last twenty years. And the cause is the same. A blood vessel breaks in the brain, and there you have it. Four people will die of apoplexy this year for every three that succumbed to it in 1900.

Again, it is the same way with kidney trouble. Bright's disease will kill four this year for every three that died of it in 1900. Too much drive; too much strain. Heart and kidneys work together; what affects one will almost surely affect the other.

Three people will die of cancer this year for every two that succumbed to this fell complaint in 1900. As a killer it is gaining ground much more rapidly than heart disease. Already it destroys nearly half as many lives as the latter, and it is going ahead by leaps and bounds.

But cancer is a problem all by itself. Nobody knows what causes it, or why it should spread and increase in the way it does. It is a total mystery—which makes it all the more horrible.

The decrease of tuberculosis is due to improved sanitation, the malady being typically infectious. Typhoid (thanks chiefly to preventive inoculation, but also to sanitary measures) has so diminished that only one person will die of it this year for every four killed by it in 1900.

The death rate from diphtheria has declined by two-thirds during the same period owing to the use of a specific antitoxin. Pneumonia has just about held its own. It is a disease hard to deal with, frequently following measles, or "flu" or other sickness. Commonly its germs are present in healthy mouths and throats, waiting for a chance to make an attack.

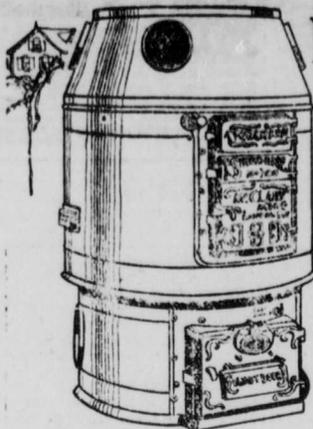

Education.

A professor of a Western University has evolved a series of test questions for the educated which he avows are the best evidences of a real education. If you can answer "yes" to each and all the questions you are truly educated, the professor says. Here are the questions:

1. Has education given you sympathy with all the good causes and made you espouse them?
2. Has it made you public-spirited?
3. Has it made you a brother to the weak?
4. Have you learned how to make friends and keep them?
5. Do you know what it is to be a friend yourself?
6. Can you look an honest man or a pure woman in the eye?
7. Do you see anything to love in a little child?
8. Will a lonely dog follow you in the street?
9. Can you be high-minded and happy in the meanest drudgeries of life?
10. Do you think that washing dishes or hoeing corn is just as compatible with high-thinking as playing the piano or playing golf?
11. Are you good for anything yourself?
12. Can you be happy alone?
13. Can you look out on the world and see anything but dollars and cents?
14. Can you look into a mud puddle by the wayside and see a clear sky?
15. Can you see anything in the puddle but mud?

"Cold Feet" Saved Canada.

Investigation being made by the United States Senate Committee disclosed the efforts made in 1916 by Bernstorff and Albert on behalf of Germany to gain control of the marine war risk insurance business of the United States, the evidence of these activities being supplied by the Department of Justice and read into the records of Bruce Bielaski, the chief of the Department's Bureau of Investigation. Mr. Bielaski also made a reference to the activities in America of the German organization known as the Kriegsbund, from the ranks of which he said the German authorities had hoped to mobilize an armed force to invade Canada. The invasion scheme failed because of what may be termed "cold feet" on the part of the members of the War Brotherhood, who were expected to invade Canada.

McClary's Sunshine Furnace

WOULD you experiment with such an important thing as the heating of your home?

It is a job for experts. The comfort of your home for years depends on it.

You can call on us to sell you not merely a furnace, but COMFORT—guaranteed.

McClary's heating engineers will advise you and plan your heating system, without charge.

CAN'T PUNCTURE OR BLOW OUT

Dayton airless tires in the past six years have been used by thousands of owners of light passenger and delivery cars in all parts of the civilized world, and have conclusively demonstrated:

- 1st—They can't puncture nor blow out.
- 2nd—They ride much longer as smoothly as pneumatics.
- 3rd—They give much longer wear than the average pneumatic.
- 4th—They absolutely will not injure the car.

They have been endorsed by 50,000 or more satisfied users, including the late George Westinghouse and Edward Grey formerly Chief Engineer of the Ford Motor Company.

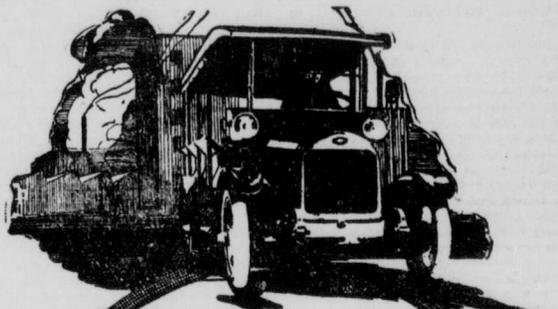

Piers of live elastic built about one inch apart inside the casing and vulcanized or welded to it take the place of an inner tube.

Nothing can happen but wear. We have standardized on 30x3 1/2 and the price is right.

SIR WILLIAM'S WILL

"Is he dead?" she asked.
"The dog?"
"No; the man, stupid!"
"Oh, no," he said. "But," he added, almost to himself, "he won't ill-treat anything again for a while."
She looked at him approvingly, and yet with a woman's maternal pity for the man whose goodness of heart is certain to lead him into trouble.
"Yes; you look the sort of man who would stand by a dog or a helpless woman in trouble. There! drink up your tea and have some fresh and hot. James, give him the tobacco-jar when he has finished." As she went out of the room with a comfortable waddle, her husband, pushing the tobacco-jar across the table, said:
"The missus has settled it, Douglas—or Jack, if you prefer it? We want a boundary-runner, and we'll take you on. A pound a week will do, I suppose; and you won't object to giving a hand to anything that may be going on?"

"A pound a week will do very well, Mr. Jarro," said Jack; "and as you say, I'll take a turn at anything." He was silent for a moment or two, then he added: "Perhaps you won't mind giving me a month's advance."
Mr. Jarro seemed rather taken aback and, scratching his head, not unreasonably demanded:
"What for?"
Jack glanced up at the ceiling, to the room where the girl was lying. Mr. Jarro laughed quietly.
"You take my advice and don't interfere with what doesn't concern you. The missus has taken that affair in hand, I can plainly see; and she don't stand any interference from you—or me."

It did not take Mr. Jarro many days to discover that in Jack Douglas he had gained a treasure. The young man was not only a magnificent rider, but understood all the work of a station, and did it—willingly and cheerfully. He was so strong and active that he seemed incapable of fatigue; and, as he had said, he was perfectly willing to turn his hand to anything. It was to Jack and Mrs. Jarro when she wanted anything done that needed a strong hand and a quick brain. He promptly made friends, not only with the animals, but with his fellow humans, even the boy of the farm, who was called Teddy, because his name was Algernon Sidney, and who had hitherto been the torment and the despair of everybody about him.

Mr. Jack Douglas' method was simple, quiet, but deadly effective. When he wanted a thing done, he asked for it pleasantly, and if it were done he smiled and nodded approvingly; if he were disobeyed, he repeated the request just as quietly, but in a tone, and with a look in his hazel eyes, which obtained prompt obedience. With Teddy he had a few preliminary words, on the first misunderstanding between them, which brought that ingenious and trying youth to Jack's feet, and made the boy his enthusiastic adherent and devoted slave.
For the first few days Jack worked upon the farm so as to get his bearings, and in those few days made every one feel that he had been there for years. The girl he had rescued was still up-stairs; but Mrs. Jarro

told him that she was getting on as well as could be expected. They had buried her child in a little cove behind the house, and Jack had read the service, Mr. Jarro declaring that parson-work was "out of his line."
Mary Seaton was still up-stairs when Jack started on his boundary-run. He was gone a little over a week; and it is much to his credit that everybody about the place had missed him, especially Mrs. Jarro.
"He is the nicest man we have ever had, James," she remarked. So willing and so clever. And it's a pleasure to have him about the house and to look at him. I do like a good-looking man."

"Of course," said her husband. "That's why you married me."
"Of course," retorted Mrs. Jarro, with a laugh. "It couldn't have been for anything else."
They were all glad when Jack returned from his solitary ride; and Teddy, who had suffered a relapse during the absence of his heart's idol, announced Jack's return with a grave face, and a manner that had already undergone a change.

As Jack drew up to the stables, a woman crossed the yard with some washed linen over her arm. It was Mary Seaton. She was still pale, but she looked a very different girl to the one he had found lying by the roadside; but her life's tragedy still lurked in her eyes, and about the corners of her mouth, and her face looked as if it had been impossible for a smile to have ever rested on it. She stopped as Jack dropped from his horse, and looked at him; so might the dog, which Jack had rescued, have looked at him; but suddenly the expression in her eyes changed to a questioning one, and her brows came together as if she were perplexed, as if she were trying to remember something; but she did not speak, and Jack, with a cheerful nod, said:
"Glad to see you out again. All right now, I hope?"
Her eyes, fixed on his face, grew thoughtful, absent, as if she were listening intently, and there was almost an embarrassing pause before she replied, in a low voice, the toneless voice of a person numbed by a great grief:
"Yes; thanks to you, sir."

Jack looked rather surprised at the "sir," but made no comment and turned to Teddy who, with hero-worship in his eyes, was hovering about him.

"So they haven't killed you yet, Teddy?" said Jack, in his pleasant fashion. "No; I'll rub down the horse; you go and ask Mrs. Jarro for some bran, and we'll give her—Sally, not Mrs. Jarro—a little gruel. You've had a long day, my beauty, haven't you?"
Teddy bounded to the store-room, where he was found by Mrs. Jarro helping himself from the bran-tub. She raised her huge hand to box his ears; but it fell to her side as he squeaked out:
"It's for Mr. Jack!"
"Oh, all right," she said. "You tell Mr. Jarro to hurry in. I've got his supper ready for him; and you brush his clothes and his boots for him. And look sharp, so that he is not kept waiting, or you'll get that box on the ears, after all."

"However tired he may be, however hard set, he always has a good wash and changes his clothes," she remarked to Jarro, as, with her own hands she laid the supper for the treasure. "He's a real gentleman; that's what he is, James."
"Thank you for the information," retorted Jarro. "Even I can see that, missus, by the way he works. I've always noticed that your real gentleman—I don't mean your scallywag, your 'remittance man'—but a right down real gentleman—always works twice as hard as a navvy, and thinks nothing of it, and is always reliable. I'd trust that young fellow with untold gold."
"So would I," said Mrs. Jarro; "but there's no need to hawl it—he's coming down-stairs."
Jack came in from his bath, with that well-groomed appearance which was always so pleasant and flattering to Mrs. Jarro's eyes; and she made his report as he ate his plentiful supper. Mrs. Jarro had discovered that there were one or two dishes which he favored, and she had cooked them with her own hands to-night.

"You have covered a lot of ground," said Mr. Jarro, with an air of satisfaction. "I couldn't have done it better myself."
Mrs. Jarro very impolitely laughed.
"Any news?" asked Jack.
"No," replied Jarro, as he let his pipe and, with vicarious enjoyment, watched Jack put away the good things. "A sundowner or two. One of them said he was from Mintona. A rough-looking fellow; we got rid of him early in the morning."
"Mary Seaton's about again," remarked Mrs. Jarro.
"So I see," said Jack, wiping his mouth with the napkin with which

LIMITED
MONTREAL

Mrs. Jarro always supplied him. "You've kept her on, then?"
Mrs. Jarro nodded. "Of course," she said. "And very useful she is." Jack looked thoughtfully across the table. "You've not learned—she has not told you—"
"No," said Mrs. Jarro. "She hasn't asked. It's no business of ours. The poor thing has evidently had a lot of trouble, and I'm not one to open old wounds."
Jack nodded. "You're a good woman, Mrs. Jarro," he said.
"Somebody's been telling you," she retorted; but she looked pleased.

There was some work on the farm, and Jack set about it with his usual promptitude and thoroughness. He seemed to be all over the place at once, as Mrs. Jarro remarked; and the hands worked as if he used some spell, some magic with them. One day, while he was breaking a colt which had successfully resisted the blandishments of every man on the station, Teddy came running to him, his face aflame, his protuberant blue eyes almost starting from his head.
"Mr. Jack!" he gasped. "There's a man—in the wood—Mary!"
As he paused for want of breath, a woman's scream clove the still air. Jack tossed the colt's halter to Teddy and ran swiftly in the direction of the sound. Mary Seaton was standing with her back to a tree, struggling with a burly, rough-looking man, whose countenance was not improved by a bulging bruise on his forehead. She was as white as death, and her eyes were gleaming; but her screams stopped at sight of Jack, and the man, with an oath, turned to meet him.

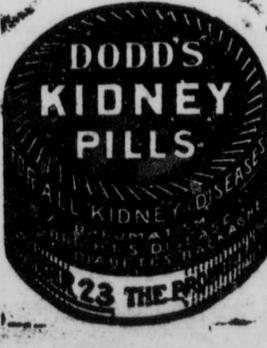

Jack was on him like a knife, and the two men were locked together in a deadly embrace. The man was heavier than Jack, but what there was of Jack was muscle and sinew, and very soon the ruffian went down and Jack's knee was on his chest. But as he fell, with outstretched arms, the man's right hand struck a stone; his fingers closed it, and dealt Jack a blow on the temple.
Jack saw stars, the great trunks of the trees danced in the sunlight in an absurd and grotesque manner, his grip of the man's throat relaxed, and a deadly faintness assailed him and he fell back full-length.

The man sprang to his feet, bestowed a kick on the prostrate form, swore at Mary, then sprang heavily toward the sheltering trees and disappeared.
Mary Seaton bent over Jack, her face white as death, her breath coming and going painfully; but she covered herself in a moment or two, and tearing open the collar of his

shirt drew his head upon her knee. Jack had not been badly stunned and he came to almost immediately.
She drew a long breath as he opened his eyes, and bending down, so that her hair swept his face, and her lips touched his ear, whispered:
"Mr. Wilfred—Mr. Wilfred Carton!"
Jack started, an expression of recognition and acknowledgment of the name crossed his face and was visible in his eyes.
"Yes? Who—what?"
His eyes closed again, and she bent over him with tightly compressed lips, and nodded. She knew that he would soon recover again, and she held his head against her and waited; and presently she helped him to stagger to his feet.

"Are you hurt?" he asked, as he wiped the blood from his face.
She shook her head. "No; you came in time—again."
"That's all right," said Jack, with satisfaction; then, with disappointment, as he looked around: "The scoundrel's got off, of course! It's the man I licked for beating the dog, at Mintona. It's a pity I didn't give him a little more." Then he gazed before him in a confused, puzzled fashion. "I seemed to have been knocked out of time," he said. "Been kind of dreaming. Did you—say anything just now—mention my name?"
"No," she said.
He frowned. "That's strange," he said. "Only fancy, I suppose. I must have been clean off my head for a minute or two. Come on to the house. You must be frightened out of your life. Here, lean on me."
He offered a wavering arm; but she drew it within hers.
"No," she said quietly, but with a tremor in her voice. "It's you to lean on me this time, Mr.—Jack."

CHAPTER V.
Hesketh Carton scarcely glanced round him, but looked straight ahead as he left the hall after his interview with Clytie; he held his body erect, and his countenance under command, as he paced slowly down the Broad drive, for the two girls might have been watching him from the window; but the tenseness of his figure relaxed as he got out of sight of the house, his head drooped, and an expression of lassitude and disappointment settled on his face. He went down by a narrow road to the Pit and entered the house which had now become his.
It was a small and gloomy building, close under the shadow of the great factory which loomed above it and to which it was connected by double doors leading to Hesketh's private room, or office. Hanging his hat up in the narrow passage—what a contrast to the vast, hifi he had just left!—he went into the small sitting-room—how shabby and mean it was compared with the magnificent one in which he had left those girls sitting!—he sank into a chair, and, letting his head fall back, wiped the perspiration from his brow.
He had been very ill, his nerves were all unstrung; one does not attempt to destroy a will, to steal a large estate, a quarter of a million of money—and bungle the business—without undergoing a severe mental strain. And how he had bungled it! In the whirl of the machinery, the motions of which vibrated through the small house, seemed to mingle, in a ghastly fashion, the words, the furious tones of the old man's voice.
Hesketh closed his eyes and saw the whole hideous scene. Yes, he had bungled the affair, had failed irretrievably? He sat up and peered at the opposite wall, his eyes narrowed to slits, his lips drawn straight, by the tenseness of his thoughts. Was there no way out, no way of recovering all that he had lost by an act of what seemed to him now, incredible stupidity? Was he to surrender the Hall and the large fortune that went with it, and be content to mull and toll all his days, just "Mr. Hesketh Carton, of the Pit Works?"
The foolish, farcical will would stand; there was no one to dispute it. His only chance lay in the possibility of Wilfred's refusal to marry Clytie, and in—her subsequent death. A poor chance, indeed; for, of course, Wilfred would not be such a fool as to refuse; and if he were to do so, the girl was young, strong, and aggressively healthy.
Why should Wilfred refuse? She was a charming girl, a pretty girl; quite lovely, in fact. He had never seen a girl half so lovely. Why, if he had destroyed the right will and become master of Bramley, he himself might have married her. Yes; that would have been right enough; the Bramleys, as represented by her, would have been restored to Bramley; his position would have been assured. As the owner of such an historic estate, the husband of Clytie Bramley, he would have had full play for his ambitions, and might have risen to any heights. A brilliant political career, a baronetcy, a peerage floated before him.
He rose and paced the room, looking remarkably like a lean, but respectable tiger, say, rather, a jackal; with his thin hands, thinner by illness, clasped and working behind him, he was like the aforesaid tiger, crammed full of energy, panting for freedom of action, and yet cribbed, cabined, and confined by his insensate folly.
Suddenly he heard the second, the outer, of the two doors leading to his office open, and a knock came to the inner door. He thrust away his thoughts with a gesture and, opening the door, met the manager of the works—he had recently been raised to that position—a man named Merril. He started slightly as he came upon his master's pale, set face.

shirt drew his head upon her knee. Jack had not been badly stunned and he came to almost immediately.

She drew a long breath as he opened his eyes, and bending down, so that her hair swept his face, and her lips touched his ear, whispered:
"Mr. Wilfred—Mr. Wilfred Carton!"
Jack started, an expression of recognition and acknowledgment of the name crossed his face and was visible in his eyes.

"Yes? Who—what?"
His eyes closed again, and she bent over him with tightly compressed lips, and nodded. She knew that he would soon recover again, and she held his head against her and waited; and presently she helped him to stagger to his feet.

"Are you hurt?" he asked, as he wiped the blood from his face.
She shook her head. "No; you came in time—again."
"That's all right," said Jack, with satisfaction; then, with disappointment, as he looked around: "The scoundrel's got off, of course! It's the man I licked for beating the dog, at Mintona. It's a pity I didn't give him a little more." Then he gazed before him in a confused, puzzled fashion. "I seemed to have been knocked out of time," he said. "Been kind of dreaming. Nasty Throat Droppings Catarrhal Discharges Quickly Cured

Doctors recommend Catarrhoxone, it is nature's own cure. It drives out the germs, heals sore spots, cleans away every vestige of Catarrhal taint. You lend the soothing vapors of the pine woods, the richest balsams and healing essentials, right to the cause of your cold by inhaling Catarrhoxone. Little drops of wonderful curative power are distributed through the whole breathing apparatus by the air you breathe. Like a miracle, that's how Catarrhoxone cures bronchitis, catarrh, colds, and irritable throat. You simply breathe its healing fumes, and every trace of disease flees, as before fire.

So safe, infants can use it, so sure to relieve, doctors prescribe it, so beneficial in preventing winter flus that no person can afford to do without Catarrhoxone. Used in thousands of cases without failure. Complete outfit \$1.00, lasts three months, and is guaranteed to cure; smaller size 50c, all dealers or the Catarrhoxone Co., Kingston, Int.

"I beg your pardon, sir," he said. "But you asked me to bring the returns as soon as they were finished." "Quite right, Merril," said Hesketh. He went into the office, closing the doors behind him; and, taking the papers, seated himself at his large table, almost covered with account-books, samples, and files, and ran through the returns.

"Quite right," he said. Merril took them from him, but seemed to hesitate. "Anything else, Merril?" asked Hesketh. "Well, sir," replied Merril, reluctantly. "I think I ought to speak to you about Stephen Rawdon." Hesketh had drawn a sheet of paper toward him and had begun to write; he arrested the pen, and without raising his eyes, said coldly:
(To be continued.)

Carrot Pie.
Scrape and boil the carrots until very tender, then mash thoroughly and to one cupful of carrot add one pint of milk, one-half teaspoonful each of salt, cinnamon and ginger, one well-beaten egg, sugar to sweeten to taste. Bake slowly in an earthen crust, like squash pie.

Birds and Aeroplanes.
Compared with a recent aeroplane ascent of 15,000 feet, the common birds are mere groundlings, for generally they fly at no greater height than 300 feet. When migrating, however, they mount higher, though even then the wild goose (the loftiest of them) seldom reaches 2,000 feet. The highest flier in the world is the great condor, which sometimes rises five miles.

LISTLESS, PEEVISH GIRLS

When a girl in her teens becomes peevish, listless and dull, when nothing seems to interest her and dainties do not tempt her appetite, you may be certain that she needs more good blood than her system is provided with. Before long her pallid cheeks, frequent headaches, and breathlessness and heart palpitation will confirm that she is anemic. Many mothers as the result of their own girlhood experience can promptly detect the early signs of anemia, and the wise mother does not wait for the trouble to develop further, but at once gives her daughter a course with Dr. Williams' Pink Pills, which renew the blood supply and banish anemia before it has obtained a hold upon the system.

Out of their experience thousands of mothers know that anemia is the sure road to worse ills. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anemic girl, every pain she suffers in her back and limbs are reproaches if you have not taken the best steps to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills.

New, rich red blood is infused into tube system by every dose of these pills. From this new rich blood springs good health, an increased appetite, new energy, high spirits and perfect womanly development. Give your daughter Dr. Williams' Pink Pills, and take them yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicine or by mail post-paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

HUSBAND SAVES WIFE

From Suffering by Getting
Her Lydia E. Pinkham's
Vegetable Compound.

Pittsburgh, Pa.—"For many months I was not able to do my work owing to a weakness which caused backache and headaches. A friend called my attention to one of your newspaper advertisements and immediately my husband bought three bottles of Lydia E. Pinkham's Vegetable Compound for me. After taking two bottles I felt fine and my troubles caused by that weakness are a thing of the past. All women who suffer as I did should try Lydia E. Pinkham's Vegetable Compound."—Mrs. JAE. ROEBBERG, 620 Knapp St., N. S., Pittsburgh, Pa.

Women who suffer from any form of weakness, as indicated by displacements, inflammation, ulceration, irregularities, backache, headaches, nervousness or "the blues," should accept Mrs. Roebberg's suggestion and give Lydia E. Pinkham's Vegetable Compound a thorough trial.

For over forty years it has been correcting such ailments. If you have mysterious complications write for advice to Lydia E. Pinkham Medicine Co., Lynn, Mass.
