THE ROYAL GRANIERES AND THE GOSWAMI CUP AT OTTAWA.

A Day's Racing at the Newmarket Course.

Ottawa, Sept. 6.—The Dominion of Canada match was concluded to-day. The team prizes were won as follows: 1. H. G. N. S. ... 2. ... 3. ...

HAZARD AT NEWMARKET.

Miss Archibald Wins Two Races—Yesterday Defeats Fluret.

Those who went out to the Newmarket course, on the 6th and 7th, were rewarded by witnessing some good sport. The weather was bright and cool, and the roads leading to the course were in excellent condition.

THE HALF-MILE HEAT RACE BETWEEN MISS ARCHIBALD AND INSPECTOR PROVER.

The half-mile heat race between Miss Archibald and Inspector Prover was an exciting event. Miss Archibald, who had been the favorite, was defeated by Prover in a very close race.

THE 3d EVENT PROVED VERY EXCITING BETWEEN OYSTERMANN AND FLURET.

The 3d event proved very exciting between Oystermann and Fluret. Oystermann, who had been the favorite, was defeated by Fluret in a very close race.

THE OLD WORLD IN BRIEF.

Three large incendiary fires have occurred at Vienna. King Alfonso has arrived at Paris. It is rumored that Thibaudin, the French minister of war, will resign.

A LEVEL-HEADED MAN.

His Ideas on Questions of Government—Protection a Good Thing for Iron Workers.

New York, Sept. 6.—Before the senate labor committee to-day, John Swinton said he had been connected with newspapers since he was 12 years old. He recommended a revival of income tax, the establishment of a national board of industry to collect labor statistics, and the establishment of a board of health, education and public works.

REGATTA AT CARLETON PLACE.

Carleton Place, Sept. 6.—The regatta to-day attracted about 3000 people and passed off very successfully. The professional single scull race was contested by Plaisant and Lee, the latter winning easily.

LYONS AT LEXINGTON.

Lexington, Sept. 6.—Kentucky association fall meeting: First race, mile, Lizzy S won, Liatnah 2d; time 1.45. Second race, mile and a half, Violator won, Obermer 2d; time 2.41. Third race, three-quarters mile, Eva S won; time 1.17.

FRANCE AND CHINA.

No serious change in the relations between France and China. The latter is vulnerable only in those ports which occupy a great international position, and any blow struck would be felt throughout Europe. The shock to English trade in the East Indies would be most disastrous.

PORT ARTHUR'S FUTURE.

A Good Hotel Wanted—Winnipeg Jealous—The Railway and its Treaties—Why It Must Be.

Port Arthur, Sept. 1.—After a trip to the Northwest, I again take up my pen (or rather my "indubitable" pen) to write a few lines on the future of this place. One thing I could wish, and that is, that there was a really good hotel here. The town is full of tourists, and the hotels, which are, of course, not quite equal to the Rossin, are so crowded as to be very uncomfortable.

CHINA'S SILVER AS A WAR POWER.

Just at the time when Spain is trying her best with what success remains to be seen, to be admitted into the council of "Great Powers" in Europe, China is asserting her position as a power in the east, and in a very practical manner. She claims the rights of sovereignty over Annam, which is really part and parcel of China after all, as much as Wales is of England, and even more so, for the Annamese are really Chinese under another name. The present rumor is that Chinese troops have crossed over the very debatable ground which is supposed to cover the imaginary line between China and Annam, or Tonkin, and will try conclusions with the French near the sea coast. One particular point brought out in the latest telegraphic despatches there, in which may be worth looking at for a moment.

A New York reporter has been interviewing Wong Chin Foo, editor of the Chinese American, and the latter, as is duty bound, speaks out patriotically for his country. One point he makes is worthy of special attention. The government of his native country, he says, could order into the field at a day's notice no less than 150,000 fighting men, and besides it has a well filled treasury. No other country than China is at the present time without an enormous national debt. With the great amount of wealth which it possesses, sufficient men could be hired to fight twice the number of men that France could send to that country. With a couple of weeks notice they could show 500,000 men ready and willing to fight. Besides, the Chinese are good soldiers and used to the climate, which will be in itself a tremendous advantage over the French.

China has no national debt, and with the great amount of wealth which it possesses, might do something more than would generally be expected. The great amount of ready hard cash which China possesses is the point. For nearly two hundred years China has been selling tea to the western barbarians, taking just a little of their merchandise in exchange, perhaps ten per cent, certainly not over twenty-five per cent, at the very best. For the balance of any seventy-five per cent, putting it at the very lowest, China takes neither Bank of England notes nor American greenbacks. With the "celestial" gold still does not fill the bill; they take nothing but silver. Now, the accumulation of silver in China, received in payment of balance of trade on tea, must by this time have reached enormous proportions. The best statisticians of the civilized world know nothing about it, they can only guess and make estimates; but it must be some gigantic unknown quantity is certain. We can allow a good deal for fear to India in payment for opium and still feel sure that the accumulation of silver in China, on the balance of the tea trade, must by this time have reached enormous proportions beyond all ordinary calculations of government surplus. Looking at the Chinese system, we may conclude that a very large proportion, probably the greater proportion, of the tea trade balance has either passed to the government or is otherwise promptly available for national purposes.

The Chinese editor says, in effect, that his country's wealth in ready money will be freely used in the event of war. And doubtless it will be, we may take his word for that. It is the peculiarity of the situation which looks at it. If war there is to be, China has hoarded money—silver money—wealth which to buy the most improved arms and ammunition of the day. In the United States there are several able manufacturing companies engaged in the manufacture of just this kind of merchandise, which will promptly fill orders for cash. With the money-making American citizens who constitute these companies sentimental regard for France would count as little as British patriotism does with the Birmingham gun manufacturers, who regularly export arms for sale to far distant savages engaged on the hostile side in Britain's little wars. Now, would French men-of-war venture to seize American citizens carrying arms to China? Or, supposing they were to attempt such a blockade, could the French sea and naval forces enough to these seas to prevent the passage of piratical Chinese craft in the Gulf of Tonkin and thereafter from receiving and carrying arms to owners of the Chinese coast where the blockade would be non-existent? We should say not; but perhaps the experiment is not to be tried this time.

One point must be worthy of present attention is the unlimited quantity of the most improved war material which China's vast accumulation of hard cash enables her to immediately buy. Perhaps this particular observation is not so much a threat as it would seem to be. But that it will be used, and with effect too, on some future occasion not very far distant, nobody who observes Chinese movements need doubt. The thing may not come now; but it is destined to come before long.

GOVERNMENT PRINTING.

The Mail in its issue of yesterday charges that the Ontario government "is working a printing job just now." That "instead of advertising for tenders for the work the government has issued private circulars to four or five firms calling upon them to make offers," and goes on to assert that "there is no guarantee that the lowest tenderer will receive the contract"; on the contrary, "that Mr. Mowat has his arrangements so made that he can give the contract to whomsoever he pleases to favor."

Had I the perseverance of the "critic," I might have pointed out through the columns and show the childishness and folly of his remaining attempts at criticism. I have not met more than the one mistake found with only one slight mistake—then do not think it is pretty carefully corrected. In the "Royal" or Campbell-Nelson series, I have with my exception, stated that his criticisms are entirely gratuitous. New, further; that the book is correct in every case except the acknowledgment of the "Royal" on page 21. That is the only error in the book, and that could be corrected in half a minute.

having taught him how to make butter. I hope the poor man has found out by this time that the book is right again. His next is an objection to "Potatoes are the underground fruit of a plant." Mr. Collins has convinced the public that he knows nothing whatever of philology or of the synonymy of words, and that he has no conception of the rudiments of botany. Apples are the fruit of the apple tree; potatoes are not the fruit of the potato vine, but the tubers which grow from the vine tops are the fruit of the potato vine. I do not know what Mr. Collins is doing for teaching him this fact.

His next, on "Sugar" need not create any surprise. When a man, posing as a critic, does not know what "potatoes" are, how could he be expected to understand what "sugar" is from?

by the time they get to this page syllabically such easy cases. Assimilation is the name given to the process of the change of the vowels in the words "tribed" and "warrior." I shall not refer to his scornful reference to the beautiful passages from Scripture found on page 128. made in the last page of Gage's than in the last page of Campbell's second reader. Nor can I see how any unbiased man can, after a deliberate comparison of the Orange County series and the Campbell-Nelson series, come to a decision in favor of Gage's. I have written a resolution to have some directions from inspectors, and among others from Mr. Morgan, M. A. Barrie, inspector of schools for Simcoe, in which he says, "In every respect Gage's is the best."

In conclusion, I am pleased to see by your editorial of yesterday that the Ontario Education Department has taken the country on the reader question. Since the minister has deprived the inspectors of their powers every Ontario section is a prayer for a better condition of affairs before long, and also "at right will prevail."

NORTON TRACHER.

OUR PUBLIC SCHOOLS.

To the Editor of The World.

Sir: We cannot pay too much attention to text books, reader, etc., but I think it opportune for the attention of teachers in the appointment of home work, and in order to prove the necessity, I give the following illustration which to my mind proves a very good one. I have one child who has been in the fifth book two years, and another who has just taken that step. Yet the latter with no previous knowledge of the subject had for home work the first 24 definitions of the first book of Euclid, while the former had the first 6. The result was—when they compared notes—an appeal to me at the unfeeling hour. To the one child I said, "but in different rooms; and also there was the same discrepancy in all through it is any wonder that the boy so overworked felt discouraged, and that the girl who had worked with a would such a feeling help him to overcome the difficulties?" But after a really struggle with the above case, I was discouraged, having a bad headache; and when he was done with the same, and would rather see hard work with a "education." Such, I maintain, is all wrong on children have no right to meet to such a task as the above case presents. Had the two children had the same no such bitter feeling had been engendered. The way to do this is to have such a book as the Campbell-Nelson series (Charles the first's reign), one page of grammar, geography (the countries of Europe and Asia), and one page of history, with all these things at his fingers' ends—to speak the above may seem as an easy home lesson, but would any of your readers, who are not to be completed the list in one evening? There is evidently work for the inspector and school board. Their business is to help in the selection of every wise instructor, order and discipline, and to win the confidence of the children by an exhibition of perfect firmness in the application of work and the distribution of rewards.

A good house again attended the performance of Iolanthe at the Zoo last night by the Holmans. The same opera will be produced the balance of the week with a matinee on Saturday.

Judgment will be given to-day at Welland by Judge Baxter in the Jarrod extradition proceedings. Mr. Weston, Mr. X. Murphy, Mr. E. B. Oler, Q. C., and Mr. E. L. Martin of Hamilton have all gone to Welland to be present.

The Trades and Labor council meets this evening. Among other business will be the presentation of the report of the late demonstration committee. The net proceeds, it is anticipated, will be in the neighborhood of some \$600.

Buffalo News: The Toronto World wants the aldermen of its city indicted because they do not look to the sanitary arrangements in public buildings. If aldermen should be indicted for every neglect of duty they would be in jail the whole time.

From the standing of the talent volunteered for the occasion of the concert under the auspices of the Trades and Labor council to take place in Albert Hall on Monday evening next in aid of the locked out telegraphers, promises to be a very successful entertainment.

DOMINION DASHES.

The latest and best news found in our Canadian Exchanges.

The Galt small-pox hospital has been destroyed by fire.

St. Thomas barbers have been notified that they must cease doing business on Sundays.

The Quebec corporation is threatened to be inundated with investigations into alleged municipal scandals.

The voting in the township of Yarmouth on the by-law to purchase the St. Thomas and Aylmer gravel road resulted in the by-law being carried by 26.

Daniel Stoddard's hired man stole \$38 from his vest, which was hanging in a field of his in Yarmouth township. The money was found in the h. m.'s pockets.

The L'avis corporation has accepted the offer of the Dominion government of \$25,000 for the town hall and surrounding property at L'avis for a new station for the International and Quebec Central railway.

The editor of the Caledonia Sachem offers his paper for one year to the person leaving with him the heaviest potato of the present season's growth. This is a good scheme to keep the wolf from the door the coming winter.

Social circles in Thameville are getting excited over a rumored scandal connecting with one of its ministers and a member of his flock—a leading society lady. It is expected that the gentlemen will be compelled to prove his innocence or rest under the ban of excommunication.

Highop Cleary, Kingston, will leave for B. m. about October. Prior to his departure, says the Whip, collections will be taken up, the amount to be presented to the sovereign power on the occasion of the bishop's visit to the "Threshold of the apostles," ad lamina spoliatorum.

The steamer Lamport, Capt. Cross, from Baltimore for London with cargo of cattle, grain, lumber and general merchandise, has put into Halifax in distress, having been disabled in last week's storm. Out of 170 men on board 130 were swept away by the heavy seas. The cattle were saved by F. R. Lingham & Co., Boston, and worth in the English markets \$20 per head.

The Boss Blair.

"Talkin' about high winds," said a ready ranger to a crowd who were discussing the published account of the Rochester disaster as it appeared in the Tribune.

"Talkin' about high winds, that wasn't nothing. Why out y'er on the Tongue river in '69 I seed it blow so hard that it pulled the bark off every bush and tree in the valley. It actually blew every dry log of water outen the river, an' for three days the catfish lay around under the stones, with their tongues lo'in' out a panin' an' prayin' for the water to come back.

When he had ceased a small man advanced toward him and said:

"'Tis that I can prove you to be the biggest liar in America."

The stranger drew him aside and asked: "Are you from Clay county, Missouri?"

"I am not."

"Ever live in Coffee county, Kansas?"

"Never did."

"Then your assertion that I am a liar is entirely based on recent observation and not on previous knowledge of my acquirements?"

"Quite so."

"Then, pardner, I'm disappointed. You spoke so confident like that I thought you might know me down below and that I might get some late news from you. Come up an' drink with the biggest liar in America."

Caracasian Druggists for Chinese Merchants.

Here is another Chinese warning: The Chinese merchants in San Francisco are taking every year with greater enterprise to compete actively with the Canadian business men in the manufacture of clothing, underwear, shoes, cigars, and other important articles of merchandise.

They have taken to employing commercial drummers, who travel along the whole length of the Pacific coast and overrun Mexico and Central America with the smiles of their Mongolian employers.

The drummers are of course Canadian and all nationalities at all times. The Chinese manufacturers could not dispose of their wares except by labeling them "white labor," but now it is not only the "white labor" but the Chinese themselves who find it advantageous to imitate the Chinese labels.

A Royal Example.

It has been particularly noticed lately that the daughters of the Prince and Princess of Wales are always dressed with great neatness and with a charming simplicity. It would be well if the mothers of many of the other children, and what Lord Beaconsfield termed "unfledged" girls, who are constantly seen about, were to imitate the pattern in this respect and array their offspring in a quiet style, which would be more in accordance with their years than the gaudy costumes which their distempered parents lead them to think are becoming.

If you experience bad taste in mouth, salivaceous or yellow color of skin, low and stupid and drowsy, appetite unsteady, frequent headache or dizziness, you are "bilious," and nothing will restore your liver to action and strengthen up your system equal to Dr. Pierce's "Golden Medical Discovery." By druggists.

"Buy rum, sir," said a Hartford barber to a customer. The man nodded and elevated his chin. When the saturated towel was applied to his face he honored from the chair and began acting like a madman. The barber had mistaken a bottle with exorbitant acid in it for the buy rum bottle. An application of glycerine m. maid mittai: a little.

The Oyster's Recollections.

My thoughts to-day are far away.

Dreaming of that blue sea, you'd say.

Each lily white, when you were here.

I used to watch the moon's soft light.

My mates and I would calmly lie.

And laugh at lovers' blushing night.

We thought that they would pass us by.

Long ere we saw the light of day.

While in the bed we did not dream.

The shadow of the white forehead;

But oft we'd smile, and hand to hand.

By chattering crabs, mile after mile.

Then we'd play tag.

Behind some snag.

And ride on anchors when they'd drag.

With wickered wheel.

And seek some quiet spot to drink.

But yesterday.

There passed a shadow where we lay.

Here we could lie.

As a pig in a rick.

Can't sweeping down, and us did take.

Now, on a bar.

We can't get it.

As Novice of that great northern star.

For, when we say, "oh, by."

For we must die.

And I've lived up to the morning of my day.

The Prince and the Settler.

A German settler who came from Wirttemberg last spring and took up his residence at the outlet of Phipps lake into the Qu'Appelle river, writes expressing his delight with the visit he received from Prince Hohenzollern who inquired concerning his welfare, and that of his German friends in the Northwest. The writer states that in answering the prince's questions fully and freely he had nothing but good to tell. He also states that Prince Hohenzollern is very well pleased with the country, and shares his best fields for German immigration. He considers that, as the prince is greatly benefited in Wirttemberg, and also in other parts of the land, such an opinion from him, formed from personal observation, will exert a great influence in Germany.

Our Old Corner.

Well-headed—a dog-dancer.

When the shades of night fall nobody hears them drop.

Always true a cold shoulder to the fire.

A summer resort—Firling on the beach.

An unprofitable matrimonial—A free ticket to the show.

A high-toned affair—This dinner bell at a mountain hotel.

Hard to be a china egg.

A dead man never throws tons.

An overdraw account—The report
