The copy filmed here has been reproduced thanks
to the generosity of:

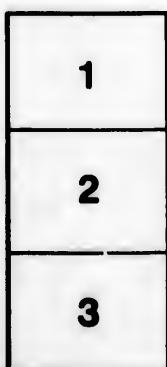

National Library of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:

L'exemplaire filmé fut reproduit grâce à la
générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le
plus grand soin, compte tenu de la condition et
de la netteté de l'exemplaire filmé, et en
conformité avec les conditions du contrat de
filage.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plat et en terminant soit par la
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plat, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par la
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
la dernière page qui comporte une telle
empreinte.

Un des symboles suivants apparaîtra sur la
dernière image de chaque microfiche, selon le
cas: le symbole → signifie "A SUIVRE", le
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaire. Les diagrammes suivants
illustrent la méthode.

RIVER ST. JOHN

A LANDSCAPE PANORAMA FIT FOR

A Theme for the Song of Poets, the Praise of Admirers of Tourists — The Scenic Glories of the Beauties of the Hudson combined.

The breadth, scope and ensemble of the St. John, the leading city of the Maritime Provinces and its scroll from Nature, a fitting panorama for the gods.

It is one grand array of classical natural beauty, and rolling bottom lands, gorgeous in vivid colors, it at this time clad with all the glorious promises of the future. This river should be one of the most admired scenes of beauty on the North American Continent. The Hudson has its majestic splendors, and the Rhine of Germany has its special attractions, but after all there is but one St. John, in a special and favored location in the conformation of the land, ed for its entire length with the grandest outlines of nature. It is the central geographical location of the above country, and stands down in history as among the greatest of picture scenes in the world. Tell me, will you, what you can find to compare with the natural features which nature has provided on this canvas along the section through which the St. John flows? The sea? Stretching back from its confluence with the Atlantic for hundreds of miles towards its source, are romantic promontories, productive levels, and a sky that rivals the varied colors of the Adriatic.
