THE POWERS ANXIOUS

An Austrian Army May March Into Servia at Any Moment.

London, June 11 .- The Servian minister said there were many causes leading to the revolution. A large section of the people were greatly dissatisfied with the tendency of King Alexander to eliminate the radical element from the Government, and by the constant rumors of his intention to appoint Queen Draga's brother, Lunevitza, heir apparent. In addition to this the Queen was disliked by the people, who were also intensely outraged at the recent suspension of the constitution. The minister did not angers to the country. He pointed out that the original Karageorge was not a prince. He was a rich swine owner. The father of the new king was made

The minister also related a curious incident. He said that a month ago he was present at a clairvoyant's eign office for the present is simply seance, at which a letter written by the murdered King was handed to the clairvoyant, who immediately became intensely agitated, predicted that King Alexander would be assassinated very shortly and even depicted the scene which appears to have been enacted at the palace at Belgrade during the

Mr. Chaplin's Amendment Defeated, the Liberals and Nationalists Supporting the Government.

London, June 10.-By a dexterous and extraordinary speech Premier Balfour tonight temporarily smoothed over the differences in the Cabinet, relieved Colonial Secretary Chamberlain of resigning, and for the moment averted a crisis which threatened the Uniquist party. This Mr. Balfour accomplished without committing the Government either to protection or free trade, though the effect of his speech will generally be taken to mean that the tariff issue is to be shelved for the present. Henry Chaplin's amendment, which gave rise to the most interesting debate of the present Parliament, was defeated by overwhelming majority of 396 votes, composed of Unionists, Liberals and Irish members. The vote stood 424 to 28. The minority who supported Mr. Chaplin's amendment were almost all followers of the Government, while many others of the Conservative party abstained from voting. The total strength of the camp in progress on Carling's Heights is 1,500. This includes the divisional and brigade staffs, the staffs of the several regiments, company officers and the rank and file--in fact, every man under canvass. The marching in states of the brigades were submitted to the district officer, Col. Peters, yesterday, and they were found to contain some figures of interest. The first infantry brigade was shown to comprise 650 men, all told, with the Twenty-seventh (Lambton) Regiment the strongest, numerically speaking. The Twentysixth (Middlesex), which is the first infantry regiment in the lines of the first brigade, has 170 of the rank and file, 5 field officers, 8 captains, 12 subalterns, 28 sergeants and 2 buglers, mak-

damaged in a collision which occurred at Paris station on Tuesday afternoon. A second engine and a number of cars were also wrecked, involving a the second member of the family. His considerable loss.

The acident happened at the end of one of the siddings. The train known as the Hamilton way-freight reached Paris about noon on its return to this city, and had done some shunting before the arrival of a freight from the tunnel, drawn by one of the 900 class engines. The way freight backed into the siding to let the through freight pass, but the engineer of the latter did not wait for the switch to be set for the main line for him, the result being that the trains came together on the siding. Both engines were derailed, and badly damaged, while several of the cars on both trains were wrecked. The 900 class engine was one of several used on the passenger trains runing between the tunnel and the falls, and it had only been out of the shops few days after undergoing some repairs. It was making its first trip to the bridge, the practice of the company being to use the big engines freight after being repaired until they are running properly, when they are placed on the passenger runs. Enginer Forbes, of Sarnia Tunnel, was in harge, and it is said at the time of he aciddent the semaphore at the vest of the siding was set against him, was also the switch.

AN IMPERIAL COUNCIL

Ion. Mr. Haldane Advocates One for Settling All Questions.

London, June 11. - In an address upon "The Cabinet and the Empire," before the Royal Colonial Institute at the Whitehall rooms Tuesday night, do the same for your baby, dear Right Hon. Richard Burden Haldane,
M. P. for Haddingtonshire, advocated the creation of a council on imperial affairs, consisting of the Premier, the a number of Privy counselors, nomwith the targets. WHAT ROSEBERY THINKS

Says English People Won't Tolerate a Food Tax.

London, June 11.-Lord Rosebery, addressing the Essex agriculturists yesterday, declared that any preferential tariff for the benefit of the wheat growing industries of Canada, Australia and India would intensify the British rural depopulation, British labor preferring the virgin bounty-fed lands of the colonies. Lord Rosebery "Will the small loaf fill the asked: empty belly any better because it is Canadian or Australian?" The in-creased wheat production in the colonies would also lower the price of home grown wheat. The people England would never tolerate a food tax. In the event of the failure of colonial crops Great Britain would be compelled to reopen her ports, and if reopened, they would never be closed again. In short, Lord Rosebery heads the anti-Chamberlain campaign.

**Heat Conservation** 

A hot oven and a cool kitchen is what every housewife is looking for this summer. It is absolutely impossible with a coal range, and almost as impossible with the ordinary gas range. The

## Oxford Gas Range

makes a hot oven and a cool kitchen a practical certainty. The oven is lined with asbestos—this keeps the heat in and leaves the kitchen cool. It also heats the oven more quickly to a higher degree and with less gas than any other range. The illustration shows that immediately outside an oven hot enough to cook a roast it is comfortably cool.

We would like to show you this and many other improvements peculiar to the Oxford Gas Range. Won't you call at one of our agencies? We can prove to you that this range does away with kitchen drudgery. If you can't call, write for our leaflet-it will interest every housewife.

disclose any trouble in the Street. Foreigners at once started to buy our stocks in London, and later on were large buyers here. This induced shorts to cover heavily in our market, which resulted in advances ranging as high as 3 points. There was some hesitation after the opening, and some slight reaction became evident, but there were few stocks for sale, and further covering carried prices up to the opening level. There seems to be good grounds for believing that the urgent liquidation is over, and the danger of failures has disappeared, and that the market is in a stronger condition than for a long time. The short interest is probably still large, but the bears have been so extremely successful that they may be stubborn about covering, and may make further attacks upon values. The opinion of the best houses is that purchases should be made on any dips. Sales to noon, 455,000 shares.
