#### **Loyal to Leeds County**

Mr. James A. Case, School Commissioner of Alpena County, Mich., in re-newing his subscription to the Report-

r, says: "You might well think that the Reporter's pages would contain but little of interest to me after 50 years separation from from the scenes of my boyhood. I can assure you, however, that I find many items that forcibly remind me of days and scenes of long ago. It is wonderful how strong the ties are that bind us to the early home It strikes me that if the spirit ever leaves its home beyond to visit earthly scenes, it must first seek out its child hood home. It seems that a boy or girl, raised in old Leeds, might be excused for doing this, at any rate. I often fine a single item in the Reporter that pays the price of five years sub-scription."

### **Birthdary Preparations**

A very enthusiastic meeting of the several committees appointed to develop and carry out the plans in connection with Mr. Thos. Pounder's birthday party was held at the home of R. Harvey, Lyndhurst, on Thursday ev-

Reports were presented of the choirs of the village churches preparing vocal and insturmental music for the occasion. Subjects were chosen for the speakers, and the chairman was authorized

to notify them of same. The decorating committee will assemble at the Agricultural Hall on Saturday afternoon, Aug. 27th, to commence the work of decorating the hall, as arrangemnts have been made to have necessary material on hand to carry this into effect.

As an aid to the musical part of the programme, Mr. C. M. Quinn of Lansdowne, the popular agent for pianos, organs, sewing machines, etc., has con-tributed the use of a handsome goldmedal Newcombe piano.

A strong committee of prominent ladies were appointed to act as mana-ders at the tables, and their names were coupled together in the following

Mrs. F. B. Sheffield and Mrs. J. Kirkland. Mrs. Robt. Wood and Miss E. Rod-

dick. Mr. R. Harvey and Mrs. Geo. Roon-Mrs. Jno. Singleton and Mrs. F. W.

Mrs. E. Kenny and Mrs. Alex. Mrs. Joshua Wiltse and Mrs. Hill

There are still some minor details to be attended to, and the committees of ladies have arranged for a final meeting at the home of Mrs. Geo. Rooney this

Her departure will be regretted by the social circle in which she moved and by the Presbyterian church choir, of which she was organist. Athenians generally will regret the loss of her musical talents to the village.

#### Having a Hot Time

Last week, from St Louis, Mo., Mr. W. G. Parish sent the Reporter a wooden post card on which the following was printed. "All a-board for the World's Fair. Arrived safe. Exposition is more than oak-a, it is ash-ton ishing, you cedar sights of your life. The Pike is fir-straight, more than a pear of peaches and the spielers don't bark like a tree. Board and (s) lumber at poplar prices, no need to pine for what you plank down. Birch ance the last great show for many years. More fun than the beech. I wood spruce up and come. You walnut regret it. Butternut delay,"

To this decidedly ligneous, if no lucid, announcement, Mr. Parish adds: "Fair great and wonderful—beyond description. Canadian exhibits and building are among the finest—Canucks proud of them. Heat intense guess 150 or more in the shade"

Elijah was probably the same and seeking to wandering in despondency and seeking to hide himself. Mount of God—So called because God here revealed His majesty and glory and gave the law to Moses.

#### PRACTICAL SURVEY.

Relying on supernatural power-Elijah engaged in the battles of the Lord. As a man he was a poor, feeble subject, but as the prophet of the Lord he was mighty. During the conflict on Mount Carmel he stood out as one man against

a nation.

Elijah's flight—. By order of Elijah
the prophets of Barl had been slain.
Whn Jezebel learned what had been done Whn Jezebel learned what had been done she despatched a messenger to Elijah, saying, "So let the gods do to me, and more also, if I make not thy life as the life of one of them by to-morrow" (v. 2). Considering former deliverances it would seem that Elijah would have been upmoved by such a threat. What a been unmoved by such a threat. What a victory he might have gained had he trusted in God and held his ground. But in the exercise of human precaution he fled for his life.

Elijah's discouragement. The miracle at Carmel not having resulted in the conat Carmel not having resulted in the courty as Elijah had expected, he became greatly discouraged. A journey of ninety-five miles brought him to Beer-Sheba. Desiring to be alone that he might be less likely to be discovered, he left his servant and plunged a day's journey into

the wildernes. Causes for Elijah's discouragement Physical exhaustion. Outward conditions affect the inner life. Many saints have suffered intolerable depression from physical and nervous causes. The body is It must be cared for. If ne glected or overtaxed the spirit suffers proportionately. It has been truly said, "By violating the laws of physical rightiousness we only make moral and spir itual righteousness more difficult to at attain. Hold steady amid the tests. You attain. Hold steady amid the tests. For many not see God in the "wind" or in the "earthquake" or in the "fire." Perhaps it remains for the "still small voice" to convey to you the message of his will. A life devoted fully to the will of God can not be a failure. Looking away from God. Elijah became alarmed at Jeze-bel's threat. So long as he looked only unto God he did not fear the wrath of man, but when he descended to take cirman, but when he descended to take cirman transfer in the consideration he weakened and at once fled frmo his pursuers. "Look unto me." saith the

suers. "Look unto me," saith the Lord. Circumstances, difficulties, human imposhibilities are all overcome by the person who looks only to God.

No man is an absolute necessity to God's work. Possibly Elijah had thought himsely absolutely necessary—"an indispensable agent for the local to the contract of the local to the local t God's work. Possibly Elijah had thought himsely absolutely necessary—"an indispensable agent for the task of delivering Israel from the guilty and demorating apostasy of Baal worship." His cry had been, "I, even I only, am left, and they seek my life to take it away" (v. 10). He had yet to learn that God

had reserved to himself seven thousand in Israel, all the knees that had not bow-ed unto Baal (v. 18). God has ordain-ed that "no flesh should glory in his presence" (I Cor. j. 29).

Mrs. Rosa Adams, niece of the late General Roger Hanson, C. S. A., wants every woman to know of the wonders accomplished by Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKEAN: —I cannot tell you with pen and ink what good Lydia E. Pinkham's Vegetable Compound did for me, suffering from the ills peculiar to the sex, extreme lassitude and that all gone feeling. I would rise from my bed in the morning feeling more tired than when I went to bed, but before I had used two bottles of Lydia E. Pinkham's Vegetable Compound, I began to feel the buoyancy of my younger days returning, became regular, could do more work and not feel tired than I had ever been able to do before, so I continued to use it until I was restored to perfect health. It is indeed a both to sick women and I heartily recommend it. Yours very truly, Mrs. Rosa Adams, 819 12th St., Louisville, Ky."

medicine has such a record of female cures.

"DRAE MRS. PINKHAM:—I am very pleased to recommend Lydia E. Pinkham's Vegetable Compound for womb and ovarian difficulties from which I have been a sufferer for years. It was the only medicine which was at all beneficial, and within a week after I started to use it, there was a great change in my feelings and looks. I used it for a little over three months, and at the end of that time I suffered no pain at the menstrual period, nor was I troubled with those distressing rains which compelled me to go to bed, and I have soot had a headache since. This is nearly a year ago. I always keep a bottle on hand, and take a few doses every week, for I find that it tones up the system and keeps me feeling strong, and I never have that tired out feeling any more.

"I certainly think that every woman ought to try this grand medicine, for it would prove its worth. Yours very truly, Miss Elsie Danforth, 203 De Sote St., Memphis, Tenn."

Bradstreet's on Trade.

At Montreal this week wholesale trade has been on the quiet side. The between seasons period is seldom productive of trade expansion, and the backward condition of the wheat crop in the West and the fears of damage by frost, to-gether with the delay in fixing the prices of cotton goods, tends to curtail business commitments, Toronto wholesale busi-ness is of normal volume for this season. At Quebec business, as a rule, still continues quiet, and likely to remain so until after the holidays. At Victoria and Vancouver wholesale business is good for this time of the year. Wholesale trade at Winnipeg has been a trifle quiet in wholesale circles since the close of the exhibition. Before the ceremony the princess, in the presence of witnesses, gave Rigo, her violinist paramour, \$3,000, upon the receipt of which he signed a paper resigning all claims upon her.

During the wedding the princess, who was handsomely dressed and rouged and powdered, kept weiting her fingers at her lips and plastering down Ricardo's scalp lock, and otherwise fondling him. After the ceremony was over the newly-married couple left immediately for Paris on their honeymoon.

The address was delivered before a crowded, fashionable audience in the Corn Exchange, among those present being the Duke of Devonshire, who is Chancellor of the University, and distinguished persons from all parts of Great Britain and the continent. The subject of Mr. Balfour's address was "Reflections Suggested by the New Theory of Matter."

This is the first time in the history of the association that it has had a Prime Minister for its president, Mr. Balfour paid a splendid tribute to the University of Cambridge, toward which, he said, he might be pardoned if he displayed partiality, because it was his own university.

The attendance at the meeting of the association this year is larger than that in 1903.

"Hush!" commanded the other, with a glance at the sexton, who had entered from rear, with a lantern, to put out the light at the altar. "It is in bad taste to be irreverent here. Could it be possible, she asked her-self, that the other members of the party had also been deceived, and be-leved that she had really been made the wife of Walter Leighton? Should she undeceive them, or would it be better to keep the secret to herself, telegraph Walter to come to her early in the morning, to explain his absonce, and consult with him what to do in her perplexity?

If the marriag ceremony was not legal, they could both keep their own counsel, be really married at the ear-liest opportunity, and thus save all gossip about the affair.

But—did she really want to be re-cognized as Walter Leighton's wife? Did she wish to marry him now, un-der any circumstances?

ment to Walter's proposals of a secret marriage.

But where could Walter have been all this time? What could have detained him from an event of such vital importance—at least to him? Who was the stranger who had so mysteriously appeared to take his place? How had he happened to present himself so opportunely, and how had he dared to personate the missing bridegroom? Was she really married to him? Would the ceremony be regarded as binding, from a legal point of view? Could it be possible that she was the wife of a man whom, until that moment at the altar, she had never seen, and whom, shold she ever umeet him again, she doubted that she would recognize?

"Oh!" she gratefully breathed to herself. 'I have barely escaped committing the greatest mistake of my life! I see it now—and Walter was self sh, cowardly and unprincipled to urge me to such a step, against my inclinations."

All these thoughts had flashed through her mind with almost lightning-like rapidity, during a brief interval of lesitation, before answering Anna's question.

"No, Anna," she said at length, "it was not fright that made me faint."

"Then it must have been the excitement," said the girl, wondering somewhat at her young mistress' strangely grave tones.

"No; only I thought he might, at least, have turned down the collar of his mackintosh; it concealed his face so that one could scarcely see a bit of it. But I suppose, in the hurry and

confusion of being late at his own wedding, he didn't think of it."

"That is a mystery; the storm, perhaps."
"Do you imagine that—anything could have happened to him?"
Florence started at the question.
"Oh, I hope not!" she exclaimed, with a quick catch in her breath.

Dividing the apple crop into fall and
winter varieties, the reports show a medium to full crop of the former. The reports from Great Britain and Europe
and the show that a very large crop of Commissioner's Branch generally show that a very large crop of fruit, that will come into direct compe-tition with our fall varieties, and may tition with our fall varieties, and may slightly affect the market for winter fruit; but up to the present time European fruit has not competed seriously with our best keeping winter varities. The apple crop in Canada appears to be singularly free this year from the attacks of insects and fungus diseases. It is quite probable that the codling moth will not be a serious pest, but there are indications that the spot may yet develop to a slight, if not a serious, degree, Pears—Pears, except in British Columbia, will be a slight crop. There will be very few for export, but the quality of those will be good.

Peaches and Plums. — Peaches and plums are almost an absolute failure.

Peacnes and Plums. — Peacnes and plums are almost an absolute failure.

Grapes.—The grape crop will be fairly good, but in the large producing districts of the Niagàra Peninsula, black rot has shown to a serious extent and it is imposible to predict the extent to which

shown to a scribus teacher to which the crop will be curtailed by this pest. Small Equits.—Strawberries have been yery uneven. Where they were not winter kileld the crop has been good, but the winter killing was so general that the yield has been a small one. Raspberries were also a light crop.

Cherries.—Cherries in British Columbia have been a full crop, but a light crop throughout Ontario. Black Curgants are a full crop. Red Currants not quite so good but still a large crop.

Insects and Fungi.—Only one or two districts report serious depredations of Insects and Fungi.—Only one or two districts report serious depredations of

Other Countries.—The reports from the United States, particularly those portions that compete with Canada, indicate a large but not an extraordinary erop of fruit. The indications in England, France, Germany, Holland and Belgium point to a crop somewhat above the average.

General Comment. — The export trade for Canadian and American fall apples will be somewhat restricted, but owing will be somewhat restricted, but owning to the better quality of our apples they will still have the preference in the European markets. Fall fruit of first class quality will in all probability bring a fair price. The supply of good winter stock of apples suitable for the British market during the months of January, February and March is not excessive.

Selection of Strawberry Plants.

A striking illustration of the value of plant and seed selection, as advocated by Prof. Robertson, is reported in the Maritime Farmer of July 19 by a New Brunswick correspondent. He says: "A few days ago while visiting a neighbor the conversation turned to berries, and small, but there were plants to be proud of. His plan is as follows: He tells his children, when they are picking, to carry along some little sticks, pieces of laths, and when they find an extra strong plant and when they find an extra strong plant with a good fruit stem and plenty of berries, to put a stick down alongside of it. After the berries are picked he takes up these-plants and sets them out in a bed, letting them 'throw out runners in all directions. In the spring he has some fine plants to set, and his berging are improving every very." Yours ries are improving every year." Yours

#### A DANGER TO BABY.

Doctors have preached against the Doctors have preached against the so-called soothing medicines for years, but they are still used altogether too much. The fact that they put children to sleep is no sign that they are helpful. Ask your doctor and he will tell you that you have merely drugged your little one into insensibility—that soothing medicines are dangerous. If your little one needs a medicine give it Baby's Own Tablets and you give it a medicine guaranteed to contain no opiate or harmful drug. You can give these Tablets just as safely as a new born infant as to the well- grown child, and they will cure all the minor ills of childhood. Mrs. J. M. Gilpin, Bellhaven, Ont., says. "Since I gave my little one Baby's says. Since I gave my little one Baby's Own Tablets there has been a marvel-lous change in her appearance, and she is growing splendidly. You may count me always a friend to the Tablets." Ask your druggist for this medicine or sen 25c to the Dr. Williams' Medicine Co Brockville, Ont., and get a box by mail post paid.

To Horse Breeding-An Outline of the Irish System.

Department of Agriculture,
Commissioner's Branch,
In the year 1900 the Department of
Agriculture and Technical Instruction
for Ireland devised a scheme for encouraging improvement in the breed of live
stock, particularly of horses and cattle,
in that country An outline of the Irise in htat country. An outline of the Irish system may be of interest to Canadian horsemen, who have for some time been discussing the problem of obtaining for service throughout the country a sufficient number of the most praidable types

cient number of the most profitable types.

Horse Breeding Scheme—The buse breeding scheme, as outlined by the Advisory Committee and approved by the Agricultural Board, provided for the registration of suitable and sound those oughbred and agricultural sires, and the selection of a number of the best brood mares in each country to be served by these sires. The owner of a registered stallion is entitled, under the scheme, to a fee of £3 for each selected mare put to his stallion. The mares selected were the property of persons deriving their means of living from farming, whose valuation did not exceed in the counties £150, and in the more wealthy counties £150, and in the more wealthy

The first year 410 stallions were offered for registration, of which 298 were thoroughbred and 112 of the agricultuthoroughbred and 112 of the agricultural type. From the first it was deemed advisable to spare no pains in making a searching examination of the stallions offered for registration, and, accordingingly, before any of the stallions offered ed under the scheme were accepted, the Department's inspectors had to certify 1. As to suitability, and 2, as to the soundness of the animal. A register was published in March, 1901, which contained the names and pedigrees of 97 published in March, 1901, which contained the names and pedigrees of 97 thoroughbred and 31 agricultural stallions that had been accepted. Upwards of 1,800 free nomination tickets of £3 each were offered at 150 shows of mares held during March and April, and near-ly 1,700 of these tickets were issued.

In addition to subsidizing stallions by means of £3 nominations to mares, the Department offered in a few countries where there was an insufficient numwhere there was an insufficient number of stallions for the purpose of the scheme, premiums varying from £50 to £100.

Loans for the Purchase of Stallions. Loans for the Purchase of Stallions.—
In order to encourage farmers of small means to provide themselves with a registered stallion a sum of money was allotted by the Department for the purpose of granting loans for the purpose of approved sires. The money was lent at 2½ per cent. interest, payable in five annual instalments. It was a condition precedent to those loans that the animal should be insured for its full market value.

Premiums for Female Stock.-As Premiums for Female Stock.—As a further means of encouraging improvement in stock breeding the Department adopted the principle of awarding premiums and prizes tot female stock. The Advisory Committee on horse breeding pointed out that that industry in Ireland is, to a great extent, injured by young mares being sold out of the country, thus leaving only second-class animals for breeding purposes, and the Department adopted their recommendation that the prizes and premiums should be mainly confined to young mares from two to six years old, served by a registered sire, in the hope that the farmers would thereby be induced to retain these mares. Yours very truly, W. A.

#### GUARDED BY THE JUNGLES. Malay State of Jahore Has Never Beer

Explored by Whites. Although known to the civilized world for two centuries and currently believed to possess mineral deposits of great richness, the state of Johore, situated richness, the state of Johore, situated just at the end of the Malay peninsula and separated from the prosperous Is-land of Singapore only by the narrow Strait of Selat Tebrau, in places less than half a mile in width, has never yet

been explored by civilized man, Though its neighbors on all sides are vassals of the British crown, as regards its internal policy. Johore is as free and independent to-day as ever it was in bygone days, when the sovereignt of its ruler extended far out into the Indian Ocean, embracing Lingga, the Rhio group and many other islands, when piracy flourished unrestricted and Johore was indeed the home of the Johore was indeed the home of the orange laut—the fierce men of the sea. And it is on account of the curious position in which Johore stands that it affords an interesting study to the student of empire, for while, to all intents and purposes, it is an independent state, ruled over by its hereditary Malayan sultan, and the manners and customs, religion, laws and internal contents. toms, religion, laws and internal gov-ernment are the same as those which prevailed in the land before dream of aquest first led Britons to this little known portion of the globe, Great Britain has the right to determine the

foreign policy of Johore. Subject to Great Britain.

It is safe to say that England would permit no other power, European or Asiatic, to set foot within its borders. For the time being it meets English views to preserve the independence of he state, to acknowldge its ruler, where there is external influence in the where there is external innuence in the land such influence is British, where government is modelled on any western lines the standard adopted is that of Great Britain, and where any foreign language is spoken to any great extent it is that of the Britisher.

Considering the fact that it forms the

Considering the fact that it forms the southernmost point of the vast Asian empire, Johore deserves to be more widely known than it is. With an area empire, Johore deserves to be more widely known than it is. With an area of 9,000 square miles and a population hard to estimate because jungle-dwellers are somewhat adverse to censustaking, but which may be safely reckonded at 250,000, Johore is one of the few remaining unexplored lands of the world and one that offers temptations to explorer and prospector alike far above the average. Towns are almost unknown. There are a few unworthy the and one that offers temptations to explorer and prospector alike far above the average. Towns are almost unknown. There are a few unworthy the name, and the capital, Johore Bahru, would not bear favorable comparison with a third-rate country-town in Fngwould not bear favorable comparison with a third-rate country town in England. Roads, good, hard ones, practically do not exist, nor harbors round the coast, nor docks, wharves nor other trading facilities, and the "iron horse" has not yet entered this Malayan domain. Nearly the whole of the country is covered with thick virgin jungle, dense, almost innegativation, where the light of almost impenciralic, where the light of nal,

day rarely pierces the pre-and the only sounds the silence, the weird, oppres-of the forest, are the harsh-beasts of prey, the incessant chattern of jungle apes, and the melodious sou of gaudy-plumed birds.

Where Riches Lie.

It is this jungle, matted thick and close over valuable mineral deposits, which jealously guards the from human despoilers, but for the pioneer who can successfully withstand the difficulties which beset his path at almost every turn—a most essential pioneer who can successfully withstand the difficulties which beset his path at almost every turn—a most essential qualification—who possesses the necessary amount of capital to enable him to bear the heavy initial cost of the undertaking, a sure reward lies in store. In tin the country is wonderfully rich, and gold is to be found in many parts, especially in the vicinity of Mount Ophir, on the Malaccan border. Mount Ophir is held by many to be that wonderful mountain often referred to in boly writ as the place whence Solomon\_drew untold golden treasure, and for generations Malays living in the neighborhood have found gold deposits in the beds of little streams which course down the mountain slope and percolate the surrounding forest. But apart from that which lies beneath, there is wealth above the surface; immense tracts of valuable timber and thousands of acres of soil the most fertile, capable, after clearing and with slight cultivation, of preducing most remunerative crops of pineapples, pepper, gambier, sago, tapicca, coffee, etc. To be brief, resources are there in abundance and their development is sadly needed. Not that there has ever been opposition on the part of the powers that be to pioneering, but the Malay needed. Not that there has ever been opposition on the part of the powers that be to pioneering, but the Malay mind is exceedingly slow in its working and is not always sure, and where at certain times a little encouragement might have gone a very long way toward introducing European capital into the country, unfortunately the initiative was lacking, and opportunity after opportunity was missed in the manner.

By this will the interest on \$1,200 was left will the interest on \$1,200 was left "for educational purposes for children of color and of both sexes in Canada, apart from all sectarian or traditional dogmas." The Rage for Insurance.

A curious case in insurance has come to light lately, and is causing much comment in London. A Canadian lady married a nobleman who was in his eighty-first year. The Marquis of Donegal had taken out an insurance policy in his seventieth year against issue being born to him. The first Marchioness died, and by his second wife he had a son, who now claims from the Norwich Union the sum of £2,500 payable on his father's death. It is the first time that this company have had to pay, and it brings to light what the rage for insurance is in this age. The old Marquis paid one premium, a lump sum of £131, and doubtless the mother of his heir rejoices in his forethought. I am told by those who ought to know that among the middle class in England insurance in every form is popular to a degree, and that romances without number could be written on the extraording the marked of the pubcould be written on the extraordin-ary credulity of the mass of the pub-

woman had ever climbed."

In the summer of 1902 Mrs. Workman and her husband made the exploration and ascent of the Chago Lungma, a glacier in Baltistan, which is 30 miles long, two or three miles wide, and which rises at its source te a height of 19,000 feet. Camped in Mummery tents in the mow for many sights together, they spent weeks far away from the nearest spot which human feet had trodden hitherto. The glacier was full of dangereus ice-falls and bottomless chasms. At some places immense avalanches threatened instant destruction.

struction.

Three record ascents were made in five days under the severest of condition. On Aug 12 two unnamed peaks were ascended, one being 21,500 feet high and the other 22,568 feet. Thus, twice in one day Mrs. Workman broke her own world's re-

ord.

Her husband went on still higher, climbing 28,394 feet up a mountain 24,470 feet high, and breaking the world's record for men by 311 feet.

On one occasion 15,000 feet high, the transport coolies bolted, and the couple were left with two guides and one or two servants in a snowstorm, which lasted for 60 hours. They were reduced to their last sticks of firing when more cooliss, sent by the authorities to leok for them, came to their assistance. o their assistance. Dr. and Mrs. Workman are now

busy writing their experiences. Two books are to be published, one deal-ing with their climbing and one de-scribing their cycling trip of 14,000 miles across seldom-visited plains.

PARIS BY NIGHT.

Police Unable to Stem the Tide of hooliganism.

The Paris correspondent of the London Morning Leader is authority for the following:

In the boulevard de Clichy two men had bullets put through them early yesterday morning, and close by another quarrel ended in a man benig stretched on the pavement with a knife stuck in

he explained:

"Did you notice how little foam there was on that pitcher of berr. Well, I got worked for about twice as much as we usually sell for a dime. The trick is very simple. Before those people sent in that pitcher they drew a ring around the inside of it with butter or something of that kind.

"What difference does that make?

Why, it acts this way: Most of the growlers we send out of here are about one-third beer and the rest foam, but with one of these greased pitchers it is with one of these greased pitches it is all the other way.

"When you draw the beer into one of these the stuff flats very quickly. As the beer hits that ring it drops down, It doesn't spoil the beer either. When the beer is poured into glasses it will have all the original life in it, just as if fresh from the keg."—Sun.

on the pavement with a knife stuck in him.

Hooliganism is as rampant in Paris just now as it was in London on the south side during the first year of the Boer war. In both case the constant record of fighting in the journals has been an amportant contributory cause.

After one in the morning in the boulevards are infested by the most murderous looking cut-throats. They are lurking and loitering about for provocation. In company with a friend who knows his Paris like a book, I watched them all the way from Montmartre to the boulevards, and I am not surprised to read the daily stories of outrage which are told in the press with a frequency comparable to the relation of motorcar calamities.

The local police are powerless, because they would be marked men if they intervened too actively. Officers

they intervened too actively. Officers from other quarters are told off into favorite districts, and when arrests are made it is the outside "agents" who

made it is the outside "agents who make them.

A few nights ago the entire "Brigade Mobile," aided by 50 detectives and 45 "agents" from distant arrondissements, comprising a police force of 500, raided the fortifications between Porte de Bercey and the Porte Dore, and arrested 65 hooligans. All had revolvers.

The "battu" was in charge of M. Hamrad himself. The police formed companies, and by the aid of repeated lightning drove the vagaoonds in all directions. They were hiding in that ample dwelling place, "l'Hotellerie de la Belle Etoile." They howled and shrieked and seampered like frightened rats driven by dogs and ferrets from a barn.

At one place where the "guns" (that is to say, police in plain clothes) were waiting, they bagged 37 men and five women. One honest man was so frightened at the approach of the 500 that he ran for all he was worth till he tumbled down a well, and it was only with great. and ferrets from a barn. down a well, and it was only with great difficulty that he was rescued. HEREDITY AND SOCIAL PROBLEMS.

The real traitors to race are those who would degrade and weaken it by so dimishing the opportunities of a swarming population that discontent and a fiercer struggle tor existence will bring the gestial qualities uppermost. To give one well-born and correctly brought-up son to the commonwealth is to serve it better than by burdening it with a half dozen ill-conditioned boys. to your rifle bullet. To have an elephant break cover immediately beside you is not so serious a matter on hard open ground, where you may bave good footing, trees and it is not impossible to dodge; but in a jangle where you cannot make your way except by constant use of knife, and sink your ankles in muck at every step, is quite another story, and one full of trouble on occasion.

Needless to say, sleep was impossible while the elephants ripped the jungle into pieces, and it was too black to attempt hunting; so we lay anxiously, not to say fearfully, awaiting developments, given now and then an extra start by shrill trumpeting of the elephants, which shortly before daybreak suddenly moved away, to leave all quiet once agani. If anything is more disconcerting than the bungling of elephants in the still of the jungle night, as they enclose you in a jungle night, as they enclose you in a erashing circle, I have yet to experience It.—Caspar Whitney in Outing.

A cat living in the power house, they say, was asleep in the rim of a fly-wheel when the engines were started, and for five hours pussy was whirled round at the rate of sixty miles an hour.

When at length the engine was stopped, the cat jumped down, staggered about confusedly for a few seconds, and then walked quietly to its corner, none the worse for its extraordinary experi-ence.

It is suggested that the cat has now experienced more revolutions than any recognized South American republic.

#### Capture of Wolf's Hill,

An unofficial statement shows that the capture of Wolf's Hill by the army operating against Port Arthur was a most arduous operation. The assault began on July 26. The Japanese, however, failed to reach the crown of the erer, falled to lead the characteristics of the night wing midway on the slopes. At dawn on the 27th the artillery played on the summit and seemed to have silenced the enemy's guns, but when the infantry advanced they were met by of the enemy's quick-firers which had hitherto been concealed besee carried the position, but were driven out by strong Russian reserves, which had been prepared for this emergency.

During the night of the 27th the Japanese assaulting force was greatly nereased, thus enabling an attack to be delivered in three directions, Under the cover of darkness the Japanese crept to within 50 metres. Moreover, the artillery on the 28th succeeded in causing a breach in the Russian shelter trenches, and thus the position was fin-ally carried. The Japanese right reached the crown of the hill first from the direction of the enemy's left rear. The Russians, therefore, retreated castward, thereby enabling the Japanese to ad-vance and win other positions. The Russians abandoned two Maxim guns Russians abandoned two Maxim guns and one Nordenfeldt gun. The last bore the mark of the revidently a gun taken from one of the land steamers sunk in the attempt to seal the harbor of Port Arthur.

On the evening of July 30 all the outworks were in the hands of the Japanese, who began to mount siege guns.

#### Togo's Great Victory.

Commander Ogura, of the Mikasa dmiral Togo's flagship, who has arriv ed at Sasebo, wounded, gives the follo ing description of the action with the Port Arthur fleet on Aug. 10th: On the morning of that day the guardship telegraphed the information of the en emy's sortic. The news was received with delight by Togo, who rapidly made all dispositions. His plan was to draw the Russians as far south as possible in order to prevent a repetition of the fiasco of June 23. He did not know whether the enemy's destination was Vladivostock, and therefore steered Vladivostock, and therefore steered south, being constantly informed by the scouts of the enemy's movements. The squadrons gradually approached, the Japanese squadron being on the east. At 12.30 p. m., being then 30 miles south of Port Arthur, Togo signalled for the ships to go into action. The Russians thereupon formed in single column line the state of the state of the state of the single column line the state of th thereupon formed in single column the abroad, their force consisting of six battleshipe, with the Czarewitch in the van, four cruisers, eight destroyers and one hospital ship. #### SUNDAY'S BATTLE.

#### Interesting Story of Defeat of Vladivostock Squadron.

An unofficial account of the ith the Vladivostock cruisers on with the Viadivostock cruisers on Sunday, the 14th, states that a warning was issued on the night of the tenth, that the enemy's Port Arthur squadron had made a sortic and had broken up; that parts of the fleet would probably try to force the Tsushima Straits and make for Viadivesteels and the fleet make for Vladivostock, and that the Vladivostock squadron was likely to co-operate in the enterprise. Due watch was set against both contingencies. The morning of the 14th broke beautifully clear. Admiral Kamimura's four cruisers, forming one squadron, steered south from a point on the Corean coast. At 5 a. m. the three Vladivostock cruisers were sighted on the port bow steering outh at a distance of 70,000 metres. The Japanese prayed earnestly that these troublesome vessels would not again elude pursuit. Every precaution was taken to avoid observation, the Japanese steering across the rear of the Russian vessels, which advanced southward, apparently unconscious of the enemy'

#### The Battle Begins.

Presently sighting the Japanese, the Russians put about and steamed north-ward at full speed, the Rossia leading and the Rurik in the rear. It was now 5.20 a. m., and the two squadrons were 8,000 metres apart. The Japanese opened fire and soon there was a hot in-terchange. The Russians were in sin-gle column line ahead, while the Japan see were crossing the course in two squadrons in T shape, raking the enemy fore and aft, whereas the ships masked each other's fire. The Japanese projectiles repeatedly took effect, whereupon the enemy, recognizing the disadvantage of his position, changed his course for the purpose of hinging his course for the purpose of bringing his line parallel to the Japanese, but this manoeuvre threw the Rurik out, owing to her inferior speed, thus enabling the Japanese to concentrate their fire upon her at a range of 4,000 to 5,0000 metres. Thereupon the Rossia and Gromoboi, obhereupon the Rossia and Gromood, observing the Rurik's plight, circled round her for the purpose of giving her succor, thus again exposing themselves to the Japanese raking fire, which was poured hotly into them, the Russian vessels re-

Flames poured from their port-holes and there was evidently much con-fusion on board, but the crews succeeded in extinguishing the fires. Meanwhile the Rurik began to go down by the stern, and had a list to port. Her brave crew, however, never flagged, serving the guns repeatedly. The Rossia and Gromoboi came to her assistance, but only exposed themselves again, suffering heavily and inflicting little saffering heavily and inflicting little damage in return. # **Bargain Sale** of Furniture

Our stock of furniture is very large and we have more ordered. We have, in fact, more goods than we can accommodate, and so we have determined to conduct a low-price sale until stock is reduced.

This sale will afford careful buyers an opportunity to obtain exceptional values. The reduction applies to every line, and if you need an article of furniture for any part of the house it will pay you to inspect our stock.
