 Terrenda in the Emins.
 NAFLES, July 31.—The search of the ruins was continued during the night. All the bodies recovered are buried immediately to prevent miasma.
 An eye-witness describes the scene at the theatre at Casamicoiola when the earth quake occurred as awful. The curtain had just risen when a tremendous shock was felt. A fearful roar followed, the ground rocked like the sain a storm. A great cry of terror arcse from the aulience, who were thrown into a heap and a large number buried baneath the timber which fell upon them. Two more shocks occurred. All who could rushed outside. The boundary dispute has been produc tive of an immense amount of talk and fuss and unseemly squabbling. The people, not of Ontario alone, but of the whole dominio are becoming heartily sick of all this sort of thing. What they want is a settlement. The question has been long enough the

puppet of the party game. It is now nearly five years since the award was made ; and from that time to the present the politicians have been kicking the boundary question about like a football, without advancing one tep towards its settlement, until Mr. Mowat the other day boldly took posses.

In taking this course we are convinced that he has the overwhelming support of the right-thinking people of Ontario, notwithstanding the senseless-not to say unpatriotic — vaporing of a few a reckless partisan sheets, fitly generalled

In the United States the demand that the government should take the telegraph business in hand has already the far greater weight of press opinion in its favor; and it is evident that the question must be a leading one in congress next year. The New York Herald takes strong ground in advance against the government't buying out the lines and plant of the Western Union or other company. What it advocates is

ompany is the result of the New Brunsany and the Halifax company joining their forces. It is stated that the first steamer of the line, the Sicily, 1675 tons, will sail from London for Halifax and St. John about August 18. A VICTIM OF THE FALLS. Retrospect of a Terrible Scone Which Occurred at Ningara Fells.

Mr. Cyrus Cobb, the artist, of this city, ays the Boston Transcript. was a witness o the terrible sight of a human victim of Niagara tossed in the toils of the dreadful whirlpool of the rapids below the falls, where Webb lost his life. Mr. Cobb's description was printed in his father's religious journal, the Christian Fleeman, in September, 1859. We make the following extract:

We next walked down to the whirlpool. The greeting here was a sad one. Two men were seeking, with a telescope, the form of their brother, who slipped into the the right-thinking people of Ontario, nor-withstanding the senseless-not to say unpatriotic — vaporing of a few reckless partisan sheets, filly generalled by the Mail. Their efforts to inflame the public mind by exaggrated and untruthful accounts of the Rat Portage disturbances, by describing the Ontario constables as Mowa's rufinas and Mowa's lambs, and by representing Mr. Mowat is the patron and associate of low whisky sellers, rowines, bummers, and hard oharacters generally, will have no other effect than to make themselves look childish and ridiculons. Does any sensible man-do auv of these writers themselves—for a moment seriously believe these accusations ? If true, they would be sufficient to drive Mr. Mowst in disgrace not only out of political life, but out of decent society. To say that Mr. Mowat's coly motire is to inflamene voters in the coming Algoma election is just what it is worth. Toronto Electric Light Co.

After a careful examination into the merits of the different systems of Electric Light\_ ing, and acting under the advice of an Expert Electrician the system of "The Excelsion Electric Company," of 66 and 68 Duane street, New York, has been adopted. It combines lighting by the Arc, Incandescent and Storage systems, and as these inventions include the latest devices for in door and out-door lighting, as well as vainable improvements is the direction of economy, this Company, it is expected, will be able to furnish light at a cost much less than heret fore done, and at the same time offer a safe and pro-

fitable investment to shareholders. A sufficient number of applications for lights has already been secured to warrant the erection of a 200 light plant, and estimates of the probable results of the operations of the Company, and all other information can be had at the office of Messrs. that the government should put up its own new lines, leaving the companies to do with theirs what they please; a plan which, if carried out, would certainly give the public very cheap and very extensive telegraphic facilities. The Western Union is now paying dividends on some eighty millions of alleged capital, of which threefourths at least is mere "water." But there are experts in telegraph construction who say that, instead of requiring twenty or twenty-five millions, as has been suggested, the whole Western Union system could be pute. duplicated with plant entirely new and of the best for ten or twelve million dollars.

CHOLERA RAGS EN ROUTE. Last week the American consul at Liver-One question occurs to us here-could the government use those patents, and there are pool telegraphed to Washington that the many of them, the ownership or control of steamer Bavarian having on board 155 which has been acquired by the Western bales of Egyptian rags, had sailed on Wed-Union? If not, it is surely a grave defect nesday for Boston. Secretary Fulger has in the law, whereby the nation grants a ordered that the law bearing on such cases patent to an individual or company without shall be enforced against the vessel on her reserving its own rights. But probably it arrival, "from the mildest to the severest, may be found that the right to use any pat- as occasion shall demand." The American may be found that the right to use any pat-ent that itself has granted is inherent in the g.vernment, and cannot be signed away by ent that itself has granted is inherent in the authorities will doubtless do their best to any device of paper or parchment. If we recollect aright, Sir Charles Tup-

per intimated, during the session of 1882, that if the government determined to do telegraph business for the people it would from a cholera-infected country? Of not buy old lines from the companies, but course this matter concerns Canada too : would build new ones. The fact is that much for cholera rags landed at Boston would be of what opposition there is to the postal very little better for us than if landed at telegraph is based upon the plea that the apy of our own sea-ports.

government cannot acquire existing lines Whether the Western Union consents to without paying double what they are worth. negotiate or not, the subject of the s'rike Undoubtedly something like this happened will immediately be inquired into by a c min England; the telegraph owners having mittee of the American senate on labor and been influential enough in parliament to sewages. That committee, which was to concure compensation far beyond the fair tinue during the life of the forty-ninth conmerchantable value of what they turned gress had been summoned to met August : over. Some years ago, it was while Disat Manchester, N.H. Senator Blair, the rachi was at the head of affairs, the government had a scheme for buying out all the London water companies. The need of place originally proposed. The investigasuch a measure was very generally tion of the telegraph strike, with the causes conceded, and, with reasonable money which led to it, is the immediate reason of figures inserted in the bill, it would have the change of place. After taking testimony passed easily. But the sums demanded by in New York the committee will visit the the companies were so enormous, so outvarious manufacturing centres in New Eng-

rageously in excess of what their works were worth, that the government at last declined to pass the bill and let the whole business drop. There is really no good rea-sol, however, for paying companies fifty or a hundred per cent. above fair value in such cases. The government can quickly bring incomparise to fair and honest. Various manufacturing centres in New Eug-land. In the present crisis of the boundary dispute, when, according to the Mail, this a hundred per cent. above fair value in such cases. The government can quickly bring incorporated expertioners to fair and honest terms by simply telling them that if they refuse to sell at fair market value it will build for itself; leaving them to calculate what their very high'y valued property will be worth after that.

The Herald is probably right in thinking that the existing lines and new government

lines might both be wanted in the United States ; but perhaps it might not be so in Canada. The question may be worth considering-would Gould and Wiman's Great Northwestern, with its capital of five million' dollars, more or less, long continue to pay eight per cent to the Montreal company, after a government telegraph vatem was established in Canada ? This issue can be carried to the privy council, and it is the only issue which that tribunal can de-cide—is the award valid, or is it not? cide—is the award valid, or is it not? If they decide affirmatively, Ontario keeps the territory, and there is an end of the matter; if negatively, the question would be still open, and there must be either a ratification by the dominion, or another ar. bitration. In such an event, which course would be taken it is idle to surmise so far in advance. Mr. Mowat's action is an in-vitation to the Dominion to contest his right. Let Sir John now respond, and we cide-is the award valid, or is it not? right. Rent, water rates, city taxes, gas, etc., a saving of \$3600 a year. Fuel, that has heretofore been delivered ex-yard, will be delivered ex-cars, at a wing of nearly \$2500 a year.

The Building being specially constructed for the business, every evil attaching to other premises in which leakage, waste and tinkering expenses were unavoidable, will effect a very large saving that cannot be fully estimated in figures.

Every convenience exists for doing more and better work, as well as greater variety, han heretofore, at a less cost of production and with more satisfaction to all concerned.

The permanent, fixed and steadily increasing portion of the business is with Hardware robants and other manufacturers all over the Dominion in Carriage, Stove, Tire, Fancy and other Bolts.

The capacity of the works now aggregates 30,000,000 bolts a year, one car load of railway Bolts and Spikes per day. This extent of trade slackens some portions of the year, but with the opening of the Northwest it will largely increase, and the track renewals with repairs will alone constitute a large trade. The Works are a necessity in the country, almost as much so now as the Telegraph or Telephone Companies, the Railways being in absolute need of the Works, without which Railways would not be built as fast as they are now being rushed through the

country. The Agricultural Implement Works throughout the Dominion depend for their sup-plies upon this Factary, other Works also look to this Factory for their supplies, making its products as staple as cottons; and each kind of Bolts are sold in every town in all the Provinces of the Dominion on the name alone without call for samples, which are now rely ever asked for.

Tarely ever asked for. The Company own over 200 acres of land, bought at a low price, within the proposed city limits, portions of which have already been sold at Four Hundred per cent profit, and sites as well are allotted for three other factories about to be erected. This is the only available property fronting the Humber Bay or west of the too much crowded Esplanade, that is available for use by railways. It combines advantages not possessed by any other property in or near Toronto in having lake and river frontages for wharfs and docks with safe open harbor all the year round ptotected by Mimico and Parkdale points. The property is also well situated as a pleasure resort, having parks on three sides with the lake in front. The annual meeting was held on the 13th instant for the first six months' business of the Company, at which a Dividend was declared at the rate of ten per cent per annum for the half year ending on the lat of May last. #### THE CONDITION OF MANITOBA. THE TORONTO WORLD

## WEDNESDAY MORNING, AUGUST 1, 1883. LOOAL NEWS PARAGRAPHED.

Emancipation day.

'Mancipation day. The colored folks will have a great time at Exhibition park. The charge of indecent assault preferred by Mrs. Laurine against Wm. Bell has been dismissed at Leslieville.

Two of Ardagh & Leonard's teamsters, named Skelton and Duggan, were yesterday fined at Riverside for fighting.

Brakeman Robinson of the C.V.R. had his right hand badly crushed between the bumpers of two cars at Parkdale.

A quorum of the markets and health committee of the city council could not be got together yesterday afternoon.

Among recent arrivals from Winnipeg are W. E. Perdue, Isaac Campbell and Robt. Houston, all former Torontonians. A girl named Irving was admitted to the hospital yesterday suffering from the effects of a fall down a hatchway in a factory on Adelaide street west.

A lad 8 years of age samed Matthews, belonging to this city, had his left hand taken off in a planing machine at Bowmanville yesterday

Charles Davis, 14 years of age, was up in the police court yesterday for drunkenness, being the fourth time within six weeks. He was sent down for a month.

and until they are reduced the pro-gress of the city will be retarded. "Speaking of the recent action of the banks, I am not inclined to condemn it as many people do. I believe the banks have been too liberal. They have been launching out money for speculating purposes. The result is that they cannot afford to discount paper and extend the same amount of ac-commodation as they ought to do. There is no doubt that the merchants have been indiscreet in their sales, but goods were forced upon them by the wholesale people of Ontario and Quebec. I must tell you that our inquiries into the state of business The many friends of Mr. George Mitchell of the Black Bull hotel, will be glad to hear that he is slowly but surely recovering from his serious illi

of Ontario and Quebec. I must tell you that our inquiries into the state of business here have been very satisfactory indeed. Business is all right, the country is perfect, and abundance of capital can be obtained for legitimate purposes. Everything seems to be working in the proper direction, and I believe inside of a year Winnipeg will be in a better position than ever before. All that is required is patient confidence." The young man Gerald Fitzgibbon, ar-rested on suspicion of having robbed his employer, Mr. Simpson of Leader lane, was discharged yesterday afternoon, Mr. Simpson being unable to identify the property as his. The Excelsior band (colored) went up to Hamilton last night and will return to-day at the head of a deputation from the am-bitions city who will participate in the emancipation celebration here to-day. Last night a musical festival was given
