**UNIVERSITY COUNCIL.**

The Council consists of the Chancellor, the Trustees, the members of the Senate, and thirty-three elective members.

The Chancellor is elected by the Council, except when two or more candidates are nominated, in which case the election is by registered graduates and alumni. He holds office for three years, and, as highest officer of the University, presides at meetings of Council and Convocation and at Statutory meetings of Senate. In his absence he is represented by the Vice-Chancellor.

Of the elective members seven retire annually, except in every fifth year, when only five retire. Successors are elected by registered graduates and alumni. Retiring members may be re-elected.

The Council has power to discuss all questions relating to the College and its welfare, to make representations of its views to the Senate or the Board of Trustees, to decide on proposals for affiliation, and to arrange all matters pertaining to the installation of Chancellor, its own meetings and business, the meetings and proceedings of Convocation, and the fees for membership, registration and voting.

Convocation for the conferring of degrees, etc., is held upon the last Wednesday of April in each year.

**ELECTIVE MEMBERS.**

**ENDOWMENT FUND.**

In connection with the endowment scheme, begun in January, 1869, and also with the building and endowment scheme begun in May, 1878, paid subscriptions secure privileges according to the following regulations:—

1. A donor of \$500 founds a SCHOLARSHIP bearing his own name or any other which he may give it, and acquires the privilege of naming annually one student to attend College for one session free of class fees. On the founder's death his lineal representatives become entitled to the privilege of free attendance in the order of seniority.
2. Donors of \$100, \$200, \$300, and \$400 may nominate, at any time during life, one, two, three, or four students respectively, to a course in Arts free of class fees.

## GENERAL ANNOUNCEMENTS.

QUEEN'S COLLEGE has, under its Royal Charter, "the style and privileges of a University."

The forty-first session will be opened on the first Tuesday (4th) of October, 1881, at 3 o'clock P.M.

*Students are particularly requested to give attention to the contents of the following pages, as all intimations shall be strictly adhered to.*

A complete compilation of statutes and by-laws, containing information as to scholastic requirements and defining the duties of students, is published separately. The regulations in the compilation are applied consistently with any changes introduced into the Calendar. Copies are to be obtained from the Registrar.

**BOARDING.**—No student is allowed to board or lodge in any house not approved of by the Senate, except by permission of parents or guardians given in writing. Information as to approved houses may be obtained from the Registrar. The expense of suitable boarding is moderate.

**REGISTRATION.**—All students are required to have their names, with other particulars, entered in the University Register. At the time of registration they must produce the Treasurer's receipt for fees. Intrants must also present a certificate of character from their ministers or other competent persons, and sign a declaration promising due respect and obedience to the University authorities, diligent attention to their studies, and a courteous behaviour towards their fellow-students.

**ATTENDANCE AT CHURCH.**—All students must at-

tend the church and produce certificates of the clergymen

tend the churches to which they profess to belong; and produce certificates of attendance from their clergymen when required.

THE LIBRARY contains over 11,000 volumes. All registered students are entitled to the use of it, subject to by-laws.

THE OBSERVATORY.—In 1855 subscribers, aided by the City Corporation, founded an Astronomical Observatory, which was transferred by deed to the University in 1861.

THE MUSEUM.—The Mineralogical and Palæontological collections are extensive and valuable. Occasional demonstrations are given to students. Friendly services towards the furnishing and enlargement of the Museum are solicited.

ACADEMIC COSTUME.—The dress so far as it is common to members of the University, without respect to rank, consists of black gown with long sleeves and cap with one tassel.

The gown worn by undergraduates has red trimming on the front and sleeves. Every undergraduate, when attending class or any college meeting, shall wear the academic costume.

The distinctive part of the costume of Graduates is in the hood, as follows:—B.A., black, bordered with red silk; M.A., scarlet; D.Sc., black, lined with blue, bordered with white; M.D., scarlet, bound on edge with white; B.D., white, with crimson plush border; D.D., black, with white lining; LL.D., black silk, lined with blue silk.

**MATRICULATION.**

I.—There are two Matriculation Examinations, a Junior and a Senior. Candidates who pass the Junior Examination take rank as Undergraduates of the first year, and those who pass the Senior Examination take rank as Undergraduates of the second year.

II.—In both of these Examinations, the candidate is required to pass in *one* of the following groups of subjects:—

(1)	(2)	(3)

V.—To pass the Junior Examination at least one-fourth of the marks allotted to each subject must be obtained, and to pass the Senior Examination, at least two-fifths.

VI.—A student passing in any subject may attend the class connected therewith, and is eligible for a scholarship.

VII.—Ungrammatical language, incorrect spelling, or illegible writing, may lead to the rejection of the papers of a candidate.

☞ The examinations for 1881-2 will begin in the Convocation Hall, on the 5th October, at 10 o'clock A.M.

**DEGREE OF B.A.**

I.—The course of study for students who have passed the Junior Matriculation examination extends over four sessions, and for students who have passed the Senior Matriculation examination, over three sessions.

II.—Junior Matriculants must take *one* of the following groups of subjects :—

V.—The class of Senior Mathematics must be taken before the class of Senior Physics.

VI.—The candidate for graduation must, in each session, pass an examination upon the subjects he has studied; but he is not allowed to present himself for examination upon more than three subjects at one time, unless he has previously failed in some subject.

VII.—To pass in any subject the candidate must obtain at least *two-fifths* of the number of marks; but if at the same examination he obtains Honours in any subject, he may pass in the other subjects upon which he has been examined by obtaining *one-third* of the marks in each subject.

VIII.—In exceptional cases the Senate may allow a candidate to come up for examination without attendance on classes, but he will be examined not only on the class-work indicated in the Calendar, but also on work specially prescribed.

These regulations, adopted in 1880, apply in their completeness only to matriculants of session 1880-81 and thereafter. Matriculants of 1877-78 must, to complete their course of study, take at least two classes, those of 1878-79 at least four classes, and those of 1879-80 at least seven classes; in other respects they are entitled to avail themselves of the options indicated above.

IX.—Graduates of other Colleges are admitted *ad eundem gradum* on producing satisfactory proof of rank and character.

Matriculants of years previous to 1880-81, who have passed in Junior Latin and in Junior Greek, may substitute, for the Senior class in either, the two classes in French and German.

DEGREE OF M.A.

I.—This degree is conferred upon the candidate who obtains first class Honours in Mathematics, Physics, or any two of the subjects appended, or the equivalent in second class Honours (second class Honours in two subjects being equivalent to first class Honours in one).

II.—The degree cannot be obtained until two years after the date of graduation as M.A.

III.—After passing the required examinations, the candidate must compose, and send in to the secretary of the Senate, not later than the last day of March, a series of three or more lectures on some topic connected with one of the departments of study in which he has passed. These lectures he will be expected to deliver, in the first session after he has obtained the degree, to the students in the department chosen.

IV.—Candidates who already possess the degree

of B.Sc. may obtain the degree of D.Sc. by conforming to the foregoing regulations.

V.—Any B.A. or M.A., on payment of the registration fee, may attend the classes in Honours free of charge.

**DEGREE OF LL.D.**

This degree is honorary, and is awarded for literary, scientific or professional distinction.

**REGULATIONS FOR HONOURS.**

I.—Honours are given in the following subjects :

- |                       |                        |
|-----------------------|------------------------|

| 6. Moral Philosophy,  | 12. Chemistry,         |
|                       | 13. Natural Science.   |

II.—To obtain Honours in any subject, the candidate must have passed the examinations connected with both the Junior and the Senior classes in that subject.

III.—If a candidate fails to obtain Honours in any subject, or if he only obtains second-class Honours, he may come up for examination again.

IV.—*First-class* Honours are given to the candidate who obtains at least three-fourths of the number of marks allotted to the subject.

V.—*Second-class* Honours are given to the candidate who obtains at least two-thirds of the number of marks allotted to the subject.

MENTAL AND MORAL PHILOSOPHY, AND POLITICAL ECONOMY.

JUNIOR CLASS.

This class meets six days a week, four of which

are devoted to Metaphysics and Ethics, one to Logic, and one to Political Economy.

The text-books are Jevons' Lessons in Logic, and Rogers' Manual of Political Economy.

In Metaphysics and Ethics, no text-book is used, but students are recommended to consult Ferrier's Lectures on Greek Philosophy, or Schwegler's History of Philosophy, in the composition of their weekly exercises.

The lectures embrace a critical account of the main philosophical systems of ancient and modern times, and a systematic discussion of metaphysical and ethical problems.

#### SENIOR CLASS.

This class meets four days a week, and deals with the higher problems of philosophy. During the present session special attention will be paid to recent views in Psychology and Ethics. Kant's Critique of Practical Reason (Abbott's translation) is recommended for reference.

Students are required to give in fortnightly essays.

#### PRIVATE CLASS.

This class is voluntary, and is devoted to the study of some classical author in philosophy. This session Aristotle's De Anima and Kant's Critiques of Pure and Practical Reason will be taken up.

#### HONOURS.

##### A. MENTAL PHILOSOPHY.

Candidates will be examined on the following books :

- Plato's Republic and Theætetus.
- Aristotle's De Anima.
- Descartes' Discourse on Method and Meditations.
- Locke's Essay on the Human Understanding.
- Berkeley's Philosophical Writings (Fraser).

The following books are recommended to be read :

Herbert's Realistic Assumptions of Modern Science.  
Caird's Critical Account of the Philosophy of Kant.  
Stirling's Secret of Hegel.  
Wallace's Logic of Hegel.

### **B. MORAL PHILOSOPHY.**

Candidates will be examined on the following books :

Aristotle's Nichomachean Ethics.  
Spinoza's Ethics and De Intellectus Emendatione.  
Hume's Treatise on Human Nature, Vol. II., with Green's Introduction (Green and Grose's edition).  
Kant's Critique of Practical Reason (Abbott).  
Hegel's Philosophy of History.

Books recommended to be read :

Bradley's Ethical Studies.  
Sidgwick's Methods of Ethics.  
Mill's Utilitarianism.  
Spencer's Data of Ethics.  
Grant's Ethics of Aristotle.

Familiarity with the substance of the main philosophical systems of ancient and modern times is expected.

### **C. POLITICAL ECONOMY.**

Candidates are required to show a thorough knowledge of the Principles of Political Economy. They will be examined on the following books, although a minute knowledge of them is not expected :

Adam Smith's Wealth of Nations (Rogers' edition).  
J. S. Mill's Principles of Political Economy.  
J. E. Cairnes' Essays in Political Economy.  
H. Fawcett's Manual of Political Economy.  
W. S. Jevons' Logical Method of Political Economy.

In addition, they are required to write an essay on the Practical Results of the Free Trade and Protective Systems in England and the United States

respectively. The essay must be given in to the Secretary of the Senate not later than April 7, 1882.

CHEMISTRY.

JUNIOR CLASS.

The subjects of study in this class are :

The leading elements with their more prominent compounds. Chemical system of weights and measures. Specific weight. Atomic weight. Gaseous volumes, &c. Solution. Diffusion and osmose.

Heat in its more observable manifestations. Thermometry. Potential heat. Conduction. Convection, &c.

SENIOR CLASS.

The chemical elements more thoroughly studied.

Chemistry of Carbon compounds, Chemical Philosophy. Crystallization. Principles of Crystallography. Heat in its phenomenal and dynamical relations. Theory of a gas.

Radiant energy. Its prominent laws. The spectrum. The Spectroscope.

In the Junior Class the subject will be studied more in its phenomenal relations ; in the Senior Class, more in its theoretic and fundamental relations.

Books for consultation—Roscoe's Elementary Chemistry—Fownes' Chemistry by Watts—Youmans' Chemistry—Miller's Chemistry—Remsen's Theoretical Chemistry—Lockyer on the Spectroscope.

HONOURS.

The course for Honours extends over two years, and consists of book-work and laboratory work.

BOOK-WORK.

FIRST EXAMINATION.

A thorough knowledge of all the prominent chemical reactions, with their explanations, where well understood.

Solutions of problems involving chemical equivalents.

Crystallography and Physical Mineralogy.

SECOND EXAMINATION.

A thorough knowledge of the more important Organic compounds with their nuclei and derivatives.

The principles of Organic Analysis.

Chemical technology of the more commonly employed products.

The composition and uses of the more commonly occurring minerals.

### LABORATORY WORK.

The Laboratory may be attended for the first time during the Senior class.

The first year's work will consist of experimentations for the purpose of determining or illustrating the chemical properties of matter and the nature and action of chemical forces. Principal blowpipe and moist reactions of prominent minerals.

The second year's work will consist of a complete separation and detection of bases and acids in a single salt or a comparatively simple mixture of salts. Detection of common minerals by the blowpipe and in the wet way. Gravimetric and Volumetric Quantitative analysis of a few commonly occurring compounds.

A working examination in the Laboratory will be held upon the second year's work.

Books for consultation—Fownes' Chemistry, by Watts—Roscoe and Schorlemmer's Chemistry—Schorlemmer's Chemistry of the Carbon Compounds—Harcourt and Madan's Practical Chemistry—Fresenius' Qualitative Analysis—Thorpe's Quantitative Chemical Analysis—Wagner's Chemical Technology.

### NATURAL SCIENCE.

The lectures embrace an outline of the subjects of Botany, Zoology and Geology.

The Botany deals with the minute Anatomy, the Physiology and the Morphology of plants, together with the principles of Botanical Classification, and with a study of a few typical orders.

The Zoology includes the study of the leading types of animal structure, together with a general view of comparative Anatomy and Physiology.

The Geology includes Dynamical Geology, Lithology, Palæontology and Systematic and Chronologic Geology.

No text-book is used in this class, but the following works should be consulted :

Gray's Structural Botany.  
Bessey's Botany.  
Packard's Zoology.  
Dana's Manual of Geology.  
Lyell's Principles of Geology.

HONOURS.

FIRST EXAMINATION.

Gray's Manual of Botany.  
Wood's Class-Book of Botany.

A practical acquaintance with the leading orders of the Phænogamous plants of Canada will be required.

Huxley's Vertebrated Animals.  
Vertebrated Animals of Canada.  
Dana's Manual of Geology.  
Lyell's Principles of Geology.  
Geology of Canada.

SECOND EXAMINATION.

Gray's Structural Botany.  
Bessey's Botany.

A practical acquaintance with the leading orders of the Cryptogamic plants of Canada will be required.

Huxley's Invertebrated Animals.  
Packard's Zoology.

A practical acquaintance with some class or branch of Invertebrates.

Mivart's Elementary Anatomy.  
Huxley's Elementary Physiology.  
Nicholson's Paleontology.  
Croll's Climate an Time.

HISTORY.

- Lectures. I. Ancient History—(1) On the antiquity of man and primitive culture. (2) On the development of Greek and Roman civilization; on the Political Economy of the Greeks.  
II. Modern History—(1) On the fall of Rome and rise of new nationalities. (2) On the progress of civilization in Modern Europe (3) On the constitutional history of England.

## DEGREE OF BACHELOR OF DIVINITY.

### REGULATIONS.

I.—Candidates for the Degree of Bachelor of  
Divinity (B.D.), must be graduates in Arts of this  
University or of a University whose degrees are  
recognized for this purpose by the Senate.

II.—The degree shall not be conferred until the  
candidate has completed his theological curriculum,  
with a view to the ministry in the Church to which  
he belongs, and has passed a satisfactory examina-  
tion in the branches of Theology taught in this  
University.

III.—The subjects of examination shall be in two  
departments, the first embracing—(1) Hebrew and

(2) the Evidences of Religion and the Inspiration of Scripture ; and the second embracing—(1) Church History, (2) Biblical Criticism, and (3) Systematic Theology.

IV.—Candidates who have completed their theological course may be examined in either of these departments, and may defer their examination in the other department, provided there be not a greater interval than two years between their two examinations.

V.—Students who have completed all the sessions but one of their theological course, may be admitted to examination in the first department.

VI.—A candidate may, subject to the preceding regulations, appear at any University examination in Theology, provided he gives two weeks' notice of his intention to the Registrar.

VII.—When a student, who is a candidate for the degree, shall obtain at a pass examination on any subject two-thirds of the marks allotted to the subject, he may, on recommendation of the examiner, be exempted from further examination on that subject.

#### SUBJECTS OF EXAMINATION.

##### DEPARTMENT I.

1. Evidences of Religion, and Inspiration of Scripture.
2. Hebrew, Isaiah xl—lxvi. Chaldee, Daniel ii., iii.

##### DEPARTMENT II.

1. Church History — Centuries i—iii ; the Reformation ; the Church in Scotland.

### STUDENTS' MISSIONARY ASSOCIATION.

This Association holds a weekly meeting on Saturday morning, in the Divinity class-room. In addition to devotional exercises and the ordinary business of the association, reports are read by members from time to time, respecting the fields occupied by them during the preceding summer under the Home Mission Board of the General Assembly. A Sabbath morning prayer meeting is held in the classical room under the management of the association. The association also assists the convener of the Presbytery's Home Mission Committee in filling appointments for Sabbath day services in the neighbourhood of Kingston.

## GRADUATION IN MEDICINE.

---

The degree of Doctor of Medicine (M.D.) is conferred upon candidates who comply with the following regulations:—

I. Except as provided in the next regulation, every candidate must pass a matriculation examination upon the following subjects:—

English Language, Grammar and Composition.  
Arithmetic, with Vulgar and Decimal Fractions.  
Algebra, including Simple Equations.  
Geometry, first two books of Euclid.  
Latin, Grammar and translation (Cicero in *Catilinam*, II., III.; Virgil, *Æneid*, Bk I., vv. 1—304; Ovid, *Fasti*, Bk. I., vv. 1—300; Translation from English into Latin prose, 30 exercises in Arnold, part I).  
Natural Philosophy, as in Stewart's *Physics*.

II. Graduates from a recognized University are not required to pass the above Matriculation examination. Matriculants of a recognized University are required to pass an examination, or to show that they have passed an examination, in Natural Philosophy only.

III. Candidates, who are not Graduates in Arts, must furnish evidence of having attended some recognized Medical School for not less than four full sessions, must have passed all the required examinations, and must be recommended by the Faculty of the Royal College of Physicians and Surgeons, in affiliation with Queen's University, and by the Examiner in medicine appointed by the Senate.

Candidates, who are Graduates in Arts, will be required to attend only three sessions.

## EXAMINATIONS.

IV. The examinations required are a Primary, an Intermediate, and a Final.

1. The Primary examination is upon the subjects of Botany, Theoretical Chemistry, and Physiology, and is only open to students at the close of their second session. One session in Botany, two in Chemistry and two in Physiology are required.

2. The Intermediate examination is upon Anatomy, Materia Medica, Practical Chemistry, Medical Jurisprudence, and Histology, and is open to students only at the close of their third session.

But students who are Graduates in Arts are allowed to take the Intermediate and the Primary examinations at the same time. One session in Practical Chemistry, and two sessions in Medical Jurisprudence, in Anatomy and in Materia Medica are required.

3. The Final examination is open to students at the close of their course, and is upon Practice of Medicine, Surgery, Midwifery, and Sanitary Science. Two sessions' attendance upon each is required.

V. A candidate cannot be admitted to any of the foregoing examinations, until he has furnished satisfactory evidence of having complied with the regulations in regard to Matriculation.

## PRIZES.

Four valuable Prizes are offered by the Medical Faculty every year, viz. : Two House Surgeoncies of the Kingston Hospital—six months each—and two Demonstratorships of Anatomy, in value from \$60 to \$75 each. These Prizes are awarded to the four students making the highest number of marks at the second professional examination. Also, two

prizes, of the value of \$15 and \$10 respectively, for the best two dissected preparations. Conditions to be announced at the beginning of the session.

Also, two prizes : a first and second, of the respective values of \$15 and \$10, will be give next session for the two best Anatomical preparations. Subjects to be announced at the opening of the session, and preparations to be approved of by the Faculty.

For University Prizes, Medals, etc., see pages, 40, 41.

#### NOTICES.

1. The Examinations of the Medical Council will be held in the City of Kingston as well as in Toronto, so that students of this College will be saved the trouble and expense of attending examinations in Toronto.

2. Persons desiring to obtain full information respecting the curriculum in Medicine, Fees, etc., should apply to the Registrar of the Medical Faculty, Fife Fowler, M.D., Kingston, Ont.

## SCHOLARSHIPS.

### SCHOLARSHIPS IN ARTS AND LAW.

Scholarships in Arts have *endowment nominations* connected with them, securing exemption from class fees for *one* session, and thereby adding from \$18 to \$24 to the given value of each.

A student, though not an *undergraduate*, is eligible for a scholarship ; but scholarships marked *close* can be held only by students having in view the ministry of the Presbyterian Church, being given by their founders upon that condition.

Scholarships awarded upon matriculation examinations are tenable during the first session, and those awarded upon sessional examinations are tenable during the following session, except open scholarships, gained by students in the last year of their course in Arts, which are paid at once.

Successful candidates for scholarships must make *at least* one-half the number of marks allotted to the subject or subjects upon which the scholarship is awarded.

EXAMINATION PAPERS.

SESSION 1880-1.

FACULTY OF ARTS.

MATRICULATION EXAMINATION.

JUNIOR MATRICULATION.

ENGLISH LANGUAGE.

1. Analyse the following passages and parse the words in Italics :

Here rests his head upon the lap of earth  
A youth to fortune and to fame *unknown*,  
Fair science frown'd not on his humble birth,  
And melancholy mark'd him for her own.

Large was his bounty, and his soul *sincere*,  
Heaven did a recompense as *largely* send ;  
He gave to misery all he had, a tear ,  
He gained from Heaven ('twas all he wished) a friend.

No farther seek his merits to disclose,  
Or draw his frailties from their dread abode.  
(There they alike in trembling hope repose),  
The bosom of his Father and his God.

—Gray's *Elegy*.

Could nature's bounty satisfy the breast,  
The sons of Italy were surely blest.  
*Whatever* fruits in different climes are found  
*That* proudly rise, or humbly *court* the ground ;  
*Whatever* blooms in torrid tracts appear,  
Whose bright succession decks the *varied* year ;  
*Whatever* sweets salute the northern sky  
With vernal *lives*, that blossom but to die ;  
These here *disporting* own the kindred soil,  
Nor ask luxuriance from the planter's toil ;  
While sea-born gales their gelid wings expand  
To winnow fragrance round the smiling land.

—*The Traveller*.

“The Traveller.” Name some of the contemporary poets.

3. Scan the first stanza given above from “The Elegy,” and the last two lines from “The Traveller.”
4. Explain “vernal lives” and “court the ground.”
5. Give the derivation of the following words:—  
melancholy, sincere, recompense, repose, trembling, satisfy, climes, humbly, blooms, torrid, vernal, disporting, luxuriance, gelid, fragrance.

Besides answering the above questions, candidates were required to write from dictation, and to compose a short essay.

JUNIOR MATHEMATICS.

1. Employ contracted processes and not more than six decimals in the solution of

$$\frac{1.414214}{8.449490} \times \frac{4.242641}{1.224755}$$

2. Find the value of  $\frac{3\sqrt{3}}{\sqrt{2-1}}$
3. A, B, C, working together can do a work in 8 days. If they work together 2 days, then A and B can finish it in  $8\frac{2}{11}$  days, A and C in 9 days, and B and C in ten days. In what time could each do it separately?
4. The simple interest on a sum of money for 6 mos. at 6 per cent per annum is \$10 greater than the interest on the same sum for 8 mos. at 4 per cent. Determine the sum.
5. Find the value of

$$a^{-1} [a^2 b^{-1} - c^{\frac{1}{2}} (c^{\frac{1}{2}} b^{-2} - a^{-1} b^0)]$$

when  $a = 2, b = 3, c = 4.$

6. Divide  $a^3 + b^3 + c^3 - 3abc$  by  $a + b + c$ ; and find the remainder when  $x^4 - 2x^3 + 3x^2 - 4x + 5$  is divided by  $x - 1.$

7. Resolve  $4b^2c^2 - (b^2 + c^2 - a^2)2$  into four factors.

8. Find  $x$  from the equations :

i.  $\frac{x}{x+3} + \frac{2}{x-3} = 1$

ii.  $\frac{a}{a-x} + \frac{b}{b-x} - \frac{a+b}{a+b-x} = 0$

9. Given  $a + b = 2c$   
 $b + c = 3d$   
 $d + a = 4b$

To find  $a, b, c,$  in terms of  $d.$

10. If 19 lbs of gold weigh 18 under water, and 10 lbs. of silver weigh 9 under water; how much of each metal is in a mass which weighs 106 lbs. in air and 99 in water?

11. What in Geometry is meant by a theorem? by a problem? What instruments are allowed in the solution of problems?

12. Any two sides of a triangle are together greater than the third. Is this true of the angles? Show that the difference between any two sides is less than the third.

13. In a right-angled triangle the square upon the side subtending the right angle is equal to the sum of the squares upon the other two sides.

14. If  $ACB$  be a triangle and  $CD$  a perpendicular up  $AB.$  Then  $AC^2 - CB^2 = AD^2 - DB^2.$

15.  $ABC$  is triangle right-angled at  $A,$  and  $BCDE$  is a square upon  $BC.$  Denoting  $AB$  by  $c,$  and

$AC$  by  $b$ , determine the length of the line  $AE$  in terms of  $b$  and  $c$ .

16. It is required to erect a perpendicular at the extremity of a straight line which cannot be produced. (No proof is required).

I. Cicero in Catilinam, II. and III.

- I. Detail the leading incidents in the life of Cicero.  
II. What were the circumstances which led him to deliver his orations against Catiline?

III. (a) Translate II. 9 :

Alterum genus est eorum, qui, quamquam præiunguntur ære alieno, dominationem tamen expectant, rerum potiri volunt, honores quos quieta republica desperant, perturbata se consequi posse arbitrantur. Quibus hoc præcipiendum videtur, unum scilicet et idem quod ceteris omnibus, ut desperent id quod conantur se consequi posse.

- (b) Parse : *ære, potiri, idem*. (c) Give the derivation of *genus, alieno, scilicet*. (d) Explain the construction of *rerum potiri ; volunt ; quibus hoc . . . posse*.

IV. (a) Translate II. 13 :

Quæ quidem ego neque mea prudentia, neque humanis consiliis fretus, polliceor vobis, Quirites, sed multis et non dubiis deorum immortalium significationibus, quibus ego ducibus in hanc spem sententiamque sum ingressus ; qui jam non procul, ut quondam solebant, ab externo hoste atque longinquo, sed hic præsentibus suo numine atque auxilio sua templa atque urbis tecta defendant.

- (b) Parse : *fretus, deorum*. (c) Explain the construction of *Quæ quidem . . . vobis ; quibus ego ducibus*. (d) What prepositions govern the *accusative*, and the *ablative* ?

V. (a) Translate III. 7 :

Quæ nunc illo absente sic gesta sunt, ut nullum in privata domo furtum umquam sit tam palam inventum quam

hæc tanta in republica conjuratio manifeste inventa atque deprehensa est. Quod si Catilina in urbe ad hanc diem remansisset quamquam quoad fuit omnibus ejus consiliis occurri atque obstiti, tamen, ut levissime dicam, dimicandum nobis cum illo fuisset, neque nos unquam, quum ille in urbe hostis esset, tantis periculis rempublicam tanta pace, tanto otio, tanto silentio liberasset.

(b) Give the compounds of *gero*, *curro*, *sto*. (c) Decline *domo*, *pace*. (d) Give the ancient divisions of Italy.

2. Translate into Latin : Many men are unfaithful to truth and friendship—a circumstance which is the cause of great unhappiness. We are of the opinion that praise should be given to the king that he may be more faithful. The government of Greece was within a little of being overthrown. There can be no doubt that diligence brings its own reward.

II. Translate into Latin, and use the Latin words subjoined : But when I had determined to write something to thee at this time, [and] many things hereafter, I wished especially to begin from that which is most suitable to thy age and to my influence. Sed quum statuo scribo ad te aliquis hic tempus, multus posthac, ab is ordior volo magis, qui et ætas tuus sum aptus et auctoritas meus.

FIRST PAPER.

Translate into English : Un Philosophe sous les toits. Chap II.

Six heures.—Je suis allé frapper chez le voisin, qui m'a ouvert lui-même et auquel j'ai remis la lettre, enfin terminée et destinée à la veuve de son fils. M. Antoine m'a remercié avec effusion et m'a obligé à m'asseoir. C'était la première fois que j'entrais dans la mansarde du vieil amateur. Une tapisserie tachée par l'humidité, et dont les lambeaux pendent ça et là, un poêle éteint, un lit de sangle, deux chaises dépaillées en composent tout l'ameublement. Au fond, on aperçoit un grand nombre de cartons entassés et de toiles sans cadre retournées contre le mur.

Au moment où je suis entré, le vieillard était à table, dînant avec quelques croûtes de pain dur qu'il trempait dans un verre d'eau sucrée. Il s'est aperçu que mon regard s'arrêtait sur ce menu d'anachorète, et il a un peu rougi.

—Mon souper n'a rien qui vous tente, voisin! a-t-il dit en souriant.

J'ai répondu que je le trouvais au moins bien philosophique pour un souper de carnaval. M. Antoine a hoché la tête et s'est remis à table.

—Chacun fête les grands jours à sa manière, a-t-il repris, en recommençant à plonger un croûton, dans son verre. Il y a des gourmets de plusieurs genres, et tous les régals ne sont point destinés à flatter le palais; il en existe aussi pour les oreilles et pour les yeux.

1. Parse : *ouvert*, *remis*, *m'asseoir*, *eteint*, *aperçoit*.
2. Why is the form *vieil* used here? Mention other adjectives having two forms for the masculine.
3. State the derivation of and difference in signification between *mur*, *mūr*.

Cæsar complaining one day that the senate was so thinly attended, Quintus Considius, who was advanced in years, told him that the senators purposely absented themselves, because they feared his arms and soldiers. Cæsar, pretending to take this freedom in good part, addressed the old man in the following words: "Why, then, Considius, does not the same fear keep you at home?" To this Considius replied that old age freed him from all such dread; for that the short space of life that now remained to him was hardly worth his care. Such reproaches must have been unpleasant to Cæsar; yet he continued acting in such a manner as to deserve them daily.

Delos, an island in the middle of the Cyclades, is said to have been originally a floating island, and subsequently to have become fixed and immoveable. It was held sacred on account of its being the birthplace of Apollo and Diana, the former of whom had a famous oracle in it, and a no less celebrated fountain, at which various rites were performed. In the island were many magnificent edifices, of which the most renowned and costly was the temple of Apollo, which Plutarch says was of great antiquity, and constructed with such wonderful art as to be deserving of being ranked among the wonders of the world. No one, who could be prevented, was suffered to die in Delos. Those laboring under any mortal or dangerous disease were ordered to be carried away to one of the neighboring islands.

10. Find  $x$  and  $y$  when

$$\text{Cos. } (x + 2y) = \text{Sin. } (2x + 2y)$$

$$\text{Sin. } (3x + y) = \text{Cos. } (2x + 2y)$$

SECOND PART.

11. Two circles of radii  $a$  and  $b$  touch each other externally; find the sine of the angle included between their common tangent.
12. Write expressions for—
- (a) The distance between two points;
  - (b) The equation of a line joining two points;
  - (c) The equation of a perpendicular to (b).
13. Write the determinant conditions that—
- (a) Three points may lie upon a straight line;
  - (b) Three lines may have a common point.
- The vertices of a triangle are  $(1, 5)$   $(3, 2)$   $(4, 6)$ ; find its area.
14. If one point lies upon the polar of another, then conversely the latter lies upon the polar of the former in respect to the same circle. Find the polar of  $(1, 2)$  the radius of the circle being 4.
15. If a straight line cuts a parabola in two points of which the abscissae are  $x'$ ,  $x''$ , and cuts the axis in a point whose abscissa is  $z$ , then  $x'x'' = z^2$ .
16. The tangent to an ellipse makes equal angles with the lines from the foci to the point of contact.

17. Explain what is meant by "the angle of the vertical," and obtain an expression for its value.
18. From the equation of a hyperbola referred to its axes deduce the equation referred to the asymptotes.
19. In Lord Rosse's telescope the parabolic mirror has a diameter of 6 feet, and a focal length of 52 feet. How much does it deviate, at the edges, from a spherical mirror having the same diameter and focal length?

SECOND PAPER.

1. Into what two classes are bodies divided in static electricity? State briefly the theories of Franklin and Dufaye.
2. Define Induced electricity, and thence explain the action of the Leyden Jar.
3. Into what two classes are bodies divided with regard to their behaviour when suspended between the poles of a powerful horse-shoe magnet?
4. State Ampere's theory of the magnet.
5. What advantage has the use of two fluids in Daniell's and Grove's batteries?
6. State Ohm's law. State also Ampere's laws.
7. Explain the structure and action of the Induction coil.
8. State the laws of the reflexion and refraction of light. What does the index of refraction represent in the undulatory theory?
9. How is the adaptation of the eye to distinct vision of objects at different distances effected?

How do you explain its essential achromatism, and freedom from spherical aberration?

10. Find the equation which expresses the relation between the conjugate foci, and the radius of curvature in a spherical mirror. Where is the focus of a luminous point 30 inches distant from a spherical mirror of 12 inches radius?
11. State the equations expressive of the relations between the conjugate foci, and the radius of a double equi convex lens, and of a plano convex lens. Where is the principal focus in each?
12. A person requires a book to be placed at the distance of 20 inches from his eye to see the letters distinctly; what must be the focal distance, and kind of spectacles which he must use to read easily at the distance of 12 inches?

JUNIOR CHEMISTRY.

FIRST PAPER.

1. What do each of the following terms mean, and how is it employed :  
Valence or atomicity—saturation—osmotic rate reducing agent—antiseptic—mordent—potential heat.

2. Give one practical method of obtaining each of the following substances, describing in each case the apparatus, the process, and the chemical changes:
  - (a) oxygen—(b) nitric acid—(c) carbonyl—(d) olefiant gas—(e) hydric sulphide—(f) chlorine—(g) phosphine—(h) arsenic trisulphide.
3. State merely how the following are obtained, and describe them carefully:
  - (a) nitrogen trioxide—(b) chlorine tetroxide—(c) carbon disulphide—(d) iodine.
4. Classify the common impurities in water, and show how they may be got rid of. What is "hard" water and when and how may it be softened? Explain the action.
5. Give the common sources of the potassium and sodium compounds, and explain how from these you can obtain (a) sodic thiosulphate—(b) potassic hydrate—(c) potassic chlorate, and (d) potassic ferrocyanide.

SECOND PAPER.

6. Show how to obtain the haloid salts of silver—distinguish between them, and give their uses.
7. How would you obtain the following:
  - (a) Dry magnesian chloride from epsom salt.
  - (b) Lead from lead acetate.
  - (c) Cuprous oxide from blue-vitriol.
  - (d) Yellow mercuric iodide from corrosive sublimate.
  - (e) Chrome green from potassic dichromate.
  - (f) Ferric oxide from green vitriol.
8. Describe the two leading thermometric scales, and change  $442^{\circ}$  F into centigrade.

9. Explain the formation of clouds, and the causes of the trade-winds.
10. If 8 grams. of ice are dissolved in 40 grams. of water at  $60^{\circ}\text{C}$ , and the resulting temperature is  $37^{\circ}\text{C}$ , find the potential heat of water.

FIRST PAPER.

1. How could you find the sp. wt. of a liquid, and to what practical use could you apply such determination? How find sp. wt. of a gas?
2. Distinguish between empirical, molecular, and rational formula, giving examples.
3. Explain the results, when—
  - (a) A solution of sugar is partly frozen.
  - (b) A burning hydrogen jet is placed in an open tube.
  - (c) A tube of ammonia is placed, mouth downwards, in water colored with cupric sulphate.
  - (d) A soap bubble filled with air is dropped into a vessel of carbon dioxide.
  - (e) Air is drawn through ether in a closed tube.
4. How would you prove by experiment, that—
  - (a) Water of crystallization gives form and sometimes color to a salt.
  - (b) Color sometimes depends upon crystalline form,
  - (c) Stannous chloride is a reducing agent.
  - (d) Magnetic oxide of iron is a combination of ferrous and ferric oxides.

LOGIC.

1. Give the opposites of these propositions :  
(a) Electricity will travel along a tied nerve.

- (b) Electricity cannot be the nervous fluid.  
(c) Some discoverers have been persecuted.
2. What did Hamilton mean by “quantifying the predicate?” What advantage does he claim for his doctrine ?
  3. Give the rules governing valid syllogisms.
  4. Name the fallacy in these arguments :
    - (a) Some *A* is not *B*  
All *B* is *C*  
∴ Some *C* is not *A*
    - (b) All *B* is *A*  
Some *C* is *B*  
∴ All *C* is *A*
  5. Reduce to the First Figure the following :
    - 1 What is expedient is conformable to nature.  
What is conformable to nature is not hurtful to society.  
Therefore, what is hurtful to society is not expedient.
  6. Expand this sorites into distinct syllogisms :
    - All *E* is *F*

étonnée du changement qu'une si courte absence avait opéré dans toute sa personne. Sa taille s'était développée de la manière la plus avantageuse, et prêtait une grâce particulière à tous ses mouvements ; sa figure avait pris un caractère de fierté qui, sans affaiblir la douceur que j'y avais toujours remarquée, inspirait le respect, et me força moi-même à voir un homme dans celui que je n'avais encore regardé que comme un enfant chéri. Ce n'est pas qu'il fût moins tendre pour moi, moins prévenant pour tout ce qui pouvait me plaire ; mais l'habitude du monde lui avait appris ce qu'il valait. Tout en lui m'offrait un ami dont ma raison se glorifiait ; mais je regrettais involontairement les caresses ingénues de mon fils. Il n'y a que le cœur d'une mère qui puisse expliquer les contradictions qu'apporte en nous ce passage de l'adolescence à la virilité, si rapide chez les Français ; et, si nous aimons nos petits-fils jusqu'à l'adoration, ce n'est, sans doute, que parce qu'ils nous rappellent ce temps heureux de l'enfance de leur père, et qu'à la douceur de leurs caresses se joint le souvenir de celles dont nous avons senti la privation.

One day Canute the Great, king of England, was on the shore of the sea with all his court. His courtiers, who, according to custom, were flatterers, told him that he was the king of kings and the mas-

ter of the sea and of the land. Canute, who had piety and good sense, seized this opportunity to make sport of these flatterers, and to make them see that he had too much intelligence to become the dupe of their foolish remarks. For this purpose, he caused a chair to be brought, and he sat down thereon; it was the time of the return of the tide. Canute, addressing the sea, said to it:—"The land on which I am belongs to me and I am thy master; I command thee, therefore, to remain where thou art, and not to advance to wet my feet."

All that heard these words thought the king was mad to imagine that the sea was going to obey him. However, it continued to advance, and at last it washed the feet of the monarch. Then Canute, rising, said to the flatterers:—"You see how I am master of the sea! Learn from this, that the power of kings is a very little thing. There is in truth, no other king than God, by whom heaven, earth and sea are governed."

##### I. Translate into English :

"Tout ce qui doit arriver arrive, faisait-il. Puisque ces Républicains ont chassé leurs seigneurs et leurs religieux, c'était écrit dans le ciel depuis le commencement des temps : Dieu l'a voulu ! Maintenant, de savoir s'ils reviendront, cela dépend de ce que le Seigneur Dieu voudra ; s'il veut ressusciter les morts, cela dépend de lui. Mais l'année dernière, comme je regardais travailler mes abeilles, je vis que tout à coup ces petits êtres, doux et même jolis, se mettaient à tomber sur les frelons, à les piquer et à les traîner hors de la ruche. Cela revient tous les ans. Ces frelons font les jeunes et les abeilles les entretiennent tant que la ruche a besoin d'eux ; mais ensuite elles les tuent ; c'est quelque chose d'abominable, et pourtant c'est écrit !— En voyant cela, je pensais à ces Républicains : ils sont en train de tuer leurs frelons ; mais soyez tranquilles, on ne peut jamais se passer d'eux ; il en reviendra d'autres ; il faudra les remplumer et les nourrir ; après cela les abeilles se fâcheront encore et les tueront par centaines. FOURTH PAPER.

Translate into Latin Prose :

The two brothers did not wish to live at Alba, but loved rather the hill on the banks of the Tiber, where they had been brought up. So they said that they would build a city there; and they inquired of the gods by augury, to know which of them should give his name to the city. They watched the heavens from morning till evening, and from evening till morning, and, as the sun was rising, Remus saw six vultures. This was told to Romulus; but as they were telling him, behold there appeared to him twelve vultures. Then it was disputed again, which had seen the truest sign of the god's favour, but the most part gave their voices to Romulus. So he began to build his city on the Palatine Hill. This made Remus very angry, and when he saw the ditch and the rampart, which were drawn round the space where the city was to be, he scornfully leapt over them, saying, “Shall such defences as these keep your city?” As he did this, Celer, who had the charge of the building, struck Remus with the spade which he held in his hand, and slew him; and they buried him on the hill Remuria, by the banks of the Tiber, on the spot where he had wished to build his city.

MATHEMATICS.

FIRST PAPER.

1. Prove that surd roots enter only in pairs into an Equation, whose coefficients are rational, and that an Equation of an odd order must have at least one irrational root.
2. There cannot be more positive roots than changes of sign, or more negative roots than permanences.
3. Prove the rule for freeing an Equation from the 3rd term.
4. Find by the method of divisors one root of the Equation  

$$x^4 - 9x^3 + 23x^2 - 20x + 15 = 0$$
5. Show that the Equation  $2y^2 - 3xy - 2x^2 - y + 2x = 0$  represents two straight lines at right angles to one another.
6. Determine the position and form of the curves  

$$x^2 = 3y - x$$

$$5x^2 + 2xy + 5y^2 - 12x - 12y = 0$$

PHYSICS.

FIRST PAPER.

1. If  $h$  represent the area described in a unit of time, the force at any point P of an orbit is measured by  $\frac{2h^2}{SP^2} \frac{QR}{QT^2}$ , or by  $\frac{2V^2}{PV}$ ,  $PV$

being the chord of curvature through the centre of force.

2. A body revolves in an Ellipse; find the law of force tending to one of the foci.
3. A body moves in a Hyperbola; find the law of force tending to one of the foci.
4. In different Elliptic orbits, having a common focus, the squares of the periodic times are as the cubes of the mean distances.
5. Compare the velocity at any point of a conic section, described about a centre of force in the focus, with that of a body at the same point moving in a circle, (radius SP) and described about the same centre of force.
6. Investigate the differential Equations, expressing the relations which exist between force, the space described, the velocity, and the time of motion.
7. A particle moving obliquely is attracted towards a fixed point; determine the differential Equation of its path referred to polar coordinates,  $F = h^2 u^2 (d^2 u + u)$ .

SECOND PAPER.

1. Explain the action of the differential pulley block.
2. Find the centre of gravity of a parabola.
3. The distance between the earth and moon, and their relative masses 80, and 1, being given, find the point of equal attraction between them in semidiameters of the earth.

CHEMISTRY.

FIRST PAPER.

1. Write graphic formulae for—hydroxylamine—potassic dichromate—hypophosphorous acid—anthracene—carbomide.
2. Write formulae for all possible modifications of butyl alcohol, indicate which can be changed to butyric acid, and how the change can be effected; and give the common source of that acid.
3. How is fluosilicic acid made, and for what purpose is its use ?
4. You are given lime, salt, sulphuric acid, pot. dichromate, starch and water, and you are required to make chloroform and acetic acid.
5. How do crystals, not of the cubic system, act with respect to heat and light? Explain the action as far as you can.

6. A pound of a certain metal is heated to  $197^{\circ}$  F., and then cooled in 3 pounds of water at  $40^{\circ}$  F., and the resulting temperature is  $53^{\circ}$  F. Find the atomic weight of the metal.
7. What is "magnesia mixture" and for what is it used?
8. How would you separate arsenic from much organic matter, and determine whether it existed in arsenious or arsenic form? How and for what purpose would you apply Fleitman's test?

SECOND PAPER.

9. How would you separate,—iron from cobalt—calcium from magnesium—silver from lead—the acids from a mixed solution of sulphate, carbonate, phosphate and chloride?
10. What tests would you apply to distinguish between cane, grape and milk sugars?
11. Find the formula of an acid, the silver salt of which contains C=13.79, H=1.15, O=18.39, and silver oxide=66.67 per cent.
12. Give fully the distinctions between gravimetric and volumetric analysis. What special apparatus is required in the latter? What is a normal solution, and how would you make one of sodic carbonate?
13. 15 c.c. of an oxalic acid solution is precipitated by calcic chloride, and the precipitate, after ignition, weighs 0.236 grms. What is the percentage strength of the oxalic solution, and what volume of decinormal alkali solution would exactly neutralize 1 c.c. of it?

MENTAL PHILOSOPHY.

FIRST PAPER.

1. Λέγω δ' ὕλην ἢ καθ' αὐτὴν μήτε τί μήτε ποσὸν μήτε ἄλλο μηδὲν λέγεται οἷς ὠρισταὶ τὸ ὄν. Explain the sense in which ὕλη is here used. Mention its other senses, and show how they are all connected together.
2. State the main points in Aristotle's discussion of οὐσία, pointing out the mutual relations of (1) τὸ ὑποκείμενον, (2) τὸ τί ἦν εἶναι, (3) τὸ ἐκ τούτων, (4) τὸ καθόλου.
3. "Science and Definition deal on the one hand with the universal, and on the other hand with substance which is individual." Is there any contradiction between these two views of Aristotle?
4. τὸ ἀτελὲς μέγεθος γενέσει μὲν πρότερον ἐστὶ, τῇ οὐσίᾳ δ' ὕστερον. Explain and illustrate the contrast here indicated.
5. State Aristotle's view of the *τι ὃ οὐ κινούμενον κινᾷ*.
6. How far are the imperfections of Plato's Ideal Theory corrected by Aristotle?

7. Give the main points in Berkeley's defence of his *Principles of Human Knowledge*. Is the defence valid ?
8. Distinguish between the so-called Idealism of Berkeley and the Critical Idealism of Kant.

SECOND PAPER.

1. Explain the views in regard to "abstract general ideas" of Locke, Berkeley, Hume and Mill, and examine the general principle on which they rest.
2. Compare Locke and Hume on the origin of the idea of Extension.
3. State the views of Descartes, Hume, Mill and Kant on the foundation of mathematical truth.
4. Explain and examine Hume's account of our belief in the uniformity of Nature, and Mill's doctrine as to the basis of Induction.
5. Examine, with special reference to its bearing on the Critical theory of knowledge, the view of Lewes that "the *a priori* elements of knowledge were originally formed out of ancestral sensible experiences."
6. On what grounds does Kant distinguish between *mathematical* and *dynamical* categories and principles ?
7. "The 'permanent' of Kant, as a 'substratum,' is either (1) not an object of perception, or (2) as a mere relation, is not an object at all." Examine this objection of Balfour to the proof of Substance.
8. "Did not sense itself offer material irreversible sequences, the Category of cause and effect would be null and void." Is this objection of Stirling to Kant's proof of causality relevant ?

THIRD PAPER.

1. Consider the bearing of Kant's criticism of Rational Psychology on Spencer's doctrine that the "substance of mind" is unknowable.
2. Are there any points in which Kant's theory of knowledge seems to need correction or development?
3. Estimate the validity of the Critical solutions of the mathematical and dynamical Antinomies respectively.
4. "Hegel accepts the principle of Spinoza, *Omnis determinatio est negatio*, as the principle of his own dialectic." How far is this true?
5. "Hegel's pure Being is just as much a shot out of a pistol as Schelling's intuition of the Absolute." Examine this criticism of the Hegelian method.
6. "To be conscious of a Limit is to be already beyond it." How has this principle been applied to solve the Dualism of mind and matter, and of finite and infinite? Is the method of solution valid?
7. Explain and examine Hamilton's doctrine of the Conditioned.
8. How are the conceptions of Substance, Cause and Reciprocity related to one another? Can any of them be regarded as the "ultimate of ultimates?" Is the conception of Force such an ultimate?

MORAL PHILOSOPHY.

FIRST PAPER.

1. What modern social problems are dealt with in Plato's *Republic*? Are the solutions there given satisfactory?

2. Compare the views on Education of Plato and Aristotle.
3. Explain fully Aristotle's idea of the State, and compare it with that of Plato.
4. "The good must be *κρητόν ἀνθρώπων*." Show (1) how Aristotle applies this principle in criticism of Plato's idea of the Good, and (2) how it may be applied to the hedonistic view that the Good is a sum of pleasures.
5. Why does Aristotle find it necessary to refer back to his Psychology? Give a table showing the relations of *εὐδαιμονία*, *ἀρετὴ ἡθικὴ* and *ἀρετὴ διανοητικὴ* to each other and to the faculties of the soul. Add remarks.
6. Distinguish between Aristotle's views of *φρόνησις* and *ἡδονή*, and the corresponding modern views.
7. State and criticise the ethical and political views of Hobbes.
8. Compare the views as to human freedom of Locke, Hume and Spinoza.

SECOND PAPER.

1. Give and criticise Spinoza's definitions of *Substantia*, *Attributum*, *Modus*, *Aeternitas*.
2. *Omnes ideae, quatenus ad Deum referuntur, verae sunt*. How does Spinoza reach this conclusion?
3. *Ordo et connexio idearum idem est ac ordo et connexio rerum*. Explain the view here indicated, and compare it with the "Transfigured Realism" of Spencer.
4. *Amor dei intellectualis, qui ex tertio cognitionis genere oritur, est aeternus*. Explain this.

THIRD PAPER.

1. State fully Kant's view of the relations of Theoretical and Practical Reason as regards (1) Freedom (2) Immortality (3) God.
2. Compare Plato and Hegel on the relations of Art and Philosophy.
3. What, according to Hegel, is the final cause of human development, and what are the main stages of that development?
4. What are the postulates which form the foundation of modern international law?
5. Show the connection between ancient Roman conveyance and the idea of contract.
6. "The fact that 'I am I' cannot make *my* happiness intrinsically more desirable than the happiness of any other person." Compare this argument of Sidgwick with Mill's proof of utilitarianism. Is either satisfactory?
7. "Hedonism only values life for the pleasure it yields; evolution only values pleasure for the life it subserves." Explain the alleged discrepancy in recent evolutionary ethics here referred to. Is the criticism valid?
8. What are the relations of Morality and Religion? Is either independent on the other?

GOLD MEDAL IN POLITICAL ECONOMY.

1. What is the par value of sterling exchange in Canada ?
2. What effect will the peopling of the North West have on the older part of the Dominion ?
3. Give your views of the advisability of a bi-metallic currency.
4. How do you account for the present low rate of interest in Ontario ?

SECOND PAPER.

1. Lord Chatham said "there were three great political documents which formed the Bible of the English Constitution." What are these? Give a summary of each.
2. What was the origin of the Judicial character of the House of Lords?
3. Give a short history of the Court of the Star Chamber.
4. State the several cases of Impeachment to the close of Henry VI. reign.
5. "During Edward III. reign the Commons established as essential principles of Government three great rights." What were these?
6. What is the earliest occasion when were established the now well-known axioms of Parliamentary law, (1) that all money bills must originate in the House of Commons; (2) that the King ought not to take notice of any matters debated in Parliament until a decision is arrived at and regularly brought before him. Mention any infringements of either of these privileges.
7. What is tonnage and poundage? What is ship-money?
8. What were the circumstances of the impeachment of the five members? What were the grounds of impeachment.

THIRD PAPER.

1. Transfer into modern English the following passage :

The statue of Mars upon a carte stood,  
Armed, and loked[e] grym as he were wood ;  
And over his heed ther schyneth two figures  
Of sterres, that been *cleped* in scriptures,  
That oon Puella, that othur Rubius.  
This god of armes was arayed thus.  
A wolf ther stood byforn him at his feet  
With eyen reed, and of a man he eet ;  
With sotyl pencil depeynted was this storie,  
In *redoutyng* of Mars and of his glorie.  
Now to the temple of Dyane the chaste  
As schortly as I can I wol me haste,  
To telle you al the descripcioun.  
Depeynted ben the walles up and down,  
Of huntynge and of *schamefast* chastité.  
Ther saugh I how woful Calystopé,  
Whan that Dyane was agreved with here,  
Was turned from a womman to a bere,  
And after was sche maad the *loode-sterre* ;  
Thus was it deynted I can say no ferre ;  
Hire son is eek a sterre, as men may see.  
Ther sawgh I Dane turned intil a tree,  
I mene nought the goddes [se] Dyane,  
But Peneus doughter, the whiche *hight* Dane.  
Ther saugh I Atheon an hert *i-maked*,  
For vengeance that he saugh Dyane al naked ;  
I saugh how that his houndes han him caught  
And freten him, for that they knew him naught.  
Yit *i-peynted* was a litel fothermore.

How Atthalaunce huntyd[e] the wilde bore,  
And Melyagre, and many another *mo*,  
For which Dyane wrought hem care and woo.  
Ther saugh I eek many another story,  
The which me *list* not drawe in to memory.  
This goddes[se] on an hert ful hyhe seet,  
With smale houndes al aboute hire feet,  
And undernethe hir feet sche had [de] the moone,  
*Wexyng* it was, and schulde wane soone.  
In gaude greene hire statue clothed was,  
With bowe in hande, and arwes in a cas.  
Hir *eyghen* caste sche ful lowe adoun,  
Ther Pluto hath his derke regioun.  
A womman travailyng was hire biforn,  
But for hire child so longe was unborn  
Ful pitously *Lucyna gan* she calle,  
And seyde, 'Help, for thou mayst best of alle.'  
Wel *couthe* he peynte lyfly that it wrought[e],  
With many a fioren he the *hewes* bought[e].  
Now been these listes maad, and Theseus  
That at his grete cost arayed[e] thus  
The temples and the theatres every del,  
Whan it was don, it liked him right wel.  
But *stynt* I wil of Theseus a lite,  
And speke of Palomon and of Arcite.

But forth she went to seeke him far and wide.  
Ere long she fownd, whēreas he wearie sate  
To rest him selfe, foreby a fountaine side,  
Disarmed all of yron-coted *plate*,  
And by his side his steed the grassy *forage* ate.

3 He feedes upon the cooling shade, and *bayes*  
His sweatie forehead in the breathing wind,  
Which through the trembling leaves full gently playes,  
Wherein the chearefull birds of sundry kind  
Do chaunt sweet musick, to delight his mind :  
The witch approaching *gan* him fairely greet,  
And with reproch of carelesnesse unkind  
Upbrayd, for leaving her in place unmeet,  
With fowle words *tempring* faire, soure gall with hony sweet,

4 Unkindnesse past, they gan of solace treat,  
And bathe in pleasaunce of the joyous shade,  
Which shielded them against the boyling heat,  
And, with greene boughes decking a gloomy shade,  
About the fountaine like a girlond made ;  
Whose bubbling wave did ever freshly well,  
Ne ever would through fervent sommer fade :  
The sacred nymph, which therein wont to dwell,  
Was out of Dianes favor, as it then befell.

## Webster's Unabridged Dictionary

New Edition of WEBSTER, has 118,000 Words, 3,000 Engravings, 4,600 New Words and Meanings, Biographical Dictionary of over 9,700 Names.

See Webster's Unabridged, page 1164, giving the name of each sail,—showing the value of Definitions by Illustrations.

The pictures in Webster under the 12 words, Beef, Boiler, Castle, Column, Eye, Horse, Moldings, Phrenology, Ravelin, Ships, (pages 1164 and 1219) Steam engine, Timbers, define 343 words and terms far better than they could be defined in words.

### ENGLISH TESTIMONY.

*From London Quarterly Review*—On the whole, as it stands, it is certainly the best practical English Dictionary extant.

"Webster's Dictionary forms the basis of the present work."—

*Preface to the Imperial Dictionary, in 3 vols., London.*

"A necessity to every educated man."—*Lord Brougham.*

"The best and most useful Dictionary of the English Language ever published."—*London Times.*

"The book has become indispensable to every student of the English language."—*Morrison R. Waite, Chief Justice U.S.*

# KANT AND HIS ENGLISH CRITICS

*A comparison of Critical and Empirical Philosophy,*

— BY —

**JOHN WATSON, M.A., LL.D.,**

Professor of Moral Philosophy in Queen's University, Kingston.

A new work on Kant, issued from the Glasgow University press, must in the nature of things attract the attention of philosophical readers as an event of considerable magnitude and interest. This is still more natural when the book is known to be by an able disciple of Professor Cairds.

The chapter on "The Metaphysic of Nature," consisting of an admirable analysis of Kant's "Metaphysische Anfangsgrunde der Naturwissenschaft" is a distinct boon conferred upon the English reader.

The book is in all respects to be welcomed. It is the work of a fully-equipped philosophical writer, and contains much vigorous writing and sound reasoning on ultimate metaphysical problems.

Professor Watson is such a vigorous thinker that we are persuaded he does himself injustice sometimes by the vagueness of his formulae and his persistent repetition of them. This fault deserves to have attention drawn to it because it is the fault which writers of his school are most prone to fall into.

His book represents much power, both of thought and of statement, and all students of Kant will recognize his thorough mastery of the system he expounds.—*Scotsman*.
