The Atlantic

THE FOOTPATH.
Path, by which her feet have gone,
Still you climb the windy hill,
Still the hillside fronts the dawn—
Fronts the clustering village still.

THE FATAL ERROR.
On a brisk November morning, about
the beginning of the present century, two young
men sat out together, from a certain city

including the host and hostess, and the
various guests of the previous night. Upon the
table before him lay his pipe, port-
folio, instrument case, and the bloody knife

On Monday the 10th inst. the representatives
from ten subordinate lodges of the I. O. G. T.
will convene with O'Connell Lodge at Hamp-
stead road for the purpose of organizing a district
lodge for the County of Queens.

At a regular meeting of Olive Branch
Lodge, I. O. G. T., at the residence of Mr.
Carters, on Tuesday evening, the 7th inst.,
the following officers were elected:

At a meeting of the Board of Supervisors
of the City of New York, held on Tuesday
evening, the 10th inst., the following
resolutions were adopted:

At a meeting of the Board of Supervisors

The Weekly Sun

SAINT JOHN, N. B., AUG. 18, 1888.

SPECIAL NOTICE TO SUBSCRIBERS. In remitting money to this office please do so by Post Office Money Order or Registered Letter, otherwise we will not be responsible for the loss of money by mail.

LEGAL NEWSPAPER DECISIONS. 1. Any person who takes a paper regularly from the Post Office, whether directed to his address or another, or whether he has subscribed or not, is responsible for the pay.

THE P. E. ISLAND COAST. It was given out a short time ago that American fishermen were swarming about the mouth of the Miramichi. A Canadian cruiser is there now and there are no poachers.

By and by the great democracy of Canada will come to understand the peril in which this nation is placed by the new Quebec movement, supported as it is by the leaders of the political parties of Canada. The British race is sometimes a little slow about taking in the full meaning of things, and it is not over quick to act.

A DANGER TO BE FACED. The new national party of Quebec has organized with the object of making a decided change in the Canadian system of government.

THE WESTERNLAND SHERIFFALTY. The Moncton Times republishes the St. John Globe's statement that the new sheriff of Westernland will perform his duties in a manner so satisfactory to the people of Westernland that they will enjoy a new sensation.

A Great Fortune. A THREE TREE WOMAN HAS \$600,000 LEFT HER. Mrs. Moore, of Three Tree Creek, Sanbury County, was very fortunate in the matter of money.

THE CUTTING CASE. "It England were in the place of the United States and the United States in the place of Mexico, England would fight," somebody says. Well if an Englishman went to the United States and acquired a domicile there, and afterwards transgressed the law of the land in which he was domiciled, and was punished for that man, there is, however, little doubt that Mexico would let cutting go, and glad of the chance, if it would only obey Mexico.

ONE of the questions to be discussed in the forthcoming meeting of the general conference of the Canadian Methodists is the length of the pastoral term. There is no quarrel with the itinerant system, but many are in favor of extending the term.

ATTORNEY GENERAL MOWAT'S friends have discovered that he is of French descent, the name they say was originally Mouant (pronounced Mo-an). The friendly report says that the family left France many centuries ago and settled in Scotland, receiving several large grants of land from the crown.

BOSTON market reports for the past week do not indicate a large catch of mackerel by the New England fleet, either in Canadian waters or anywhere else.

THE Nationalists of Quebec are taking a vigorous and characteristic part in the local contests. Pieces of rope are thrown at the government speakers, the crowd about "hangman," "hangman," and the Grit press declares that the meeting is a great triumph for the Grit party.

An Apologetic Sensation. APOHAQU, Aug. 16—Whoop! whoo-coop!! whoo-coop!! That was the kind of a noise which was heard here in the wee wee hours of Sunday morning.

DEATH OF A BAPTIST MISSIONARY. A telegram received in this city on Saturday announced the death at (Calcutta) of Rev. Wm. George, a missionary stationed at Zue Gong, Burma. Rev. Mr. George was a native of Nova Scotia and married Miss Zoude Lowe, daughter of Dr. Moses Lowe of Amherst.

REPORTING ON THE ST. JOHN RIVER. The late rains in the St. John has flooded into the Fredericton booms about 30,000,000 superficial feet of logs that were scattered along shore from Woodstock to the Fredericton limit.

It is but fair to the Indians of the vicinity to say that while it is true that they are a perfectly quiet and law abiding people, strong objection is sometimes made to the admittance of Indian children to the schools of the province, and no active effort is put forth to ensure their education.

Marine Disasters. Our Grand Manan correspondent writes on the 16th: The three-masted schooner reported on Ganant rock proved to be the Nesbit.

Railway Expansion. In climates having a difference of seventy degrees in temperature between the hot and cold seasons, a railway track of 400 miles is 388 yards longer in summer than in winter.

Charlotte Harbor, light passed over, the two boats were on the beach, the escape from their boat was effected by the boat.

Boston, A while ago Sir Charles was slightly demented, but was slightly demented.

FREDERICTON NEWS was slightly demented, but was slightly demented.

FRUIT. The 21st of August, 1888, is a fine day for the fruit.

LOCAL MATTERS.

A BAZAR will be held at an early day by the congregation of St. Rose's church, Spur Cove. JOSHUA DICKER of Frenchville, Me., intends to lumber extensively on the St. John river next season.

AN OLD MAN.—The death is announced of Wm. Folea, at Fairville, at the advanced age of 97 years. He was a native of Cork and had resided at Fairville for over sixteen years.

WOODSTOCK.—St. Gertrude's church picnic was held last Wednesday on the ground adjoining the church. The sports, of which there was a great variety, were well patronized and the result financially was a great success.

SEA SHORE LODGE, Good Templars, at St. Martins, have elected and installed their officers for the current year as follows: Charles Sullivan, C. T.; Miss Hannah Vall, W. T.; John Kelly, R. S.; Allan Fowler, P. S.; Mrs. Richard Treves, Secy.; Wm. G. Priddy, Chap.; David Brown, Mar.; Lenora Vaughan, D. M.; Charles Hastings, G.; Wm. Gendry, S. M.; John J. Macdonald, J. M.; Delong, L. H. S.; Miss Laura Shreve, A. S.; Wm. White, P. O. T.; Miss Maggie Cutler, Secy.

A SERIOUS MATTER.—The case of the crown against James Mahar, George Mahar and Joe McElroy, for interference with Customs Officer John O'Shaughnessy while in the discharge of his duty, was completed before Justice Crilly on Saturday, and the parties were remanded for trial at the county court in October.

MONCTON, Aug. 16.—The annual meeting of the Moncton and Beauséjour railway company was held at Scotch settlement yesterday. The report of the managing director, Killiam, represented that a large proportion of work had already been done, and that he expected to have the iron horse run on Big Beauséjour by November, and the road in operation next year.

THE CANADIAN fishery cruiser Yucimita sailed from New York on Friday for Halifax. SPORTING MATTERS. CRICKET. (Special to The Sun.)

PETITODAG, Aug. 16.—An eleven from the St. John cricket club played the eleven of this place today, the result being a complete victory for the visitors.

THE annual meeting of the Provincial Rifle Association opened at Sussex this morning. Some 700 delegates are expected to be present. Nearly all the marksmen are now in the grounds, and the competition between St. John yesterday was—62nd Fusiliers—Capt. Hart, Lt. Thompson, Lt. Lordly, Lt. Mansel, Sgt. O'Connell, Sgt. Adams, Sgt. Jones, Pte. A. Lordly, Pte. H. Lordly, Corp. Henderson, Sgt. Henderson, James Hurst.

71st bat.—Lieut. Perkins, Lieut. Smith, Sgt. McFarlane, Bandman Miller and Pte. Hollis. Infantry School Corps.—Serg. Curtis, Serg. Chappell, Corp. Kearney, Corp. Doherty and Pte. McPherson.

THE Irish Liverpool Team are having hard luck. Last Friday they were beaten three straight games in fifteen minutes by the Canadian team, and in two of those games were PERKINS BEATEN BY THE AUSTRALIAN SQUAD.

LONDON, Aug. 16.—Matters, the Australian sculler, beat Perkins today in a race over the Thames course from Putney to Mortlake. The stakes were £200 and £250.

WALLACE BOB'S CHANCES IN ENGLAND. The matting of Wallace Bob against Beach for a race is significant. Bob's English backers must have seen his rowing form since he arrived, and last Thursday had ample opportunity to judge of the Australian's speed.

Portland Matters. The committee of the whole had a lengthy session last night, the principal subject being for discussion before the city council.

DROWNING ACCIDENT. EASTPORT, Aug. 16.—Henry B. Hunt, foreman of the Eastport wharf, went out sailing in a small boat today and was drowned by the capsizing of his craft in a sudden gale. Mr. Hunt was thirty-three years of age, single, in-law of Collector Nutt, and leaves a widow and two children. His body was recovered.

RAILWAY EXPANSION.—In climates having a difference of seventy degrees in temperature between the hot and cold seasons, a railway track of 400 miles is 388 yards longer in summer than in winter.

FRUIT. The 21st of August, 1888, is a fine day for the fruit.

FRUIT. The 21st of August, 1888, is a fine day for the fruit.

Halifax Found Gully.

The trial of Daniel Hatfield, charged with committing rape on Catherine O'Donnell, was finished at the circuit court on Saturday and returned in a verdict of guilty against the prisoner. Mr. Bunick testified that his daughter, one of the witnesses summoned, was out of town.

The closed case for the crown and Mr. Carleton announced that the defence would be an alibi. O. F. Belyea, P. Gorman, Robert Cochran, Geo. Murray and Francis Brown testified to seeing the prisoner about the middle of the day on the assault between Hatfield and Miss O'Donnell.

Mr. Welden then addressed the jury at great length and was followed by Solicitor General Ritchie. The judge having charged the jury, the reporter read the evidence to the jury, who retired.

The jury, after an absence of about half an hour, returned to court and gave a verdict of guilty against the prisoner. It is understood that the jury on the first ballot stood 11 for guilty and one "guilty," with recommendation to mercy.

The Country Market. The market has been slack this week, with the exception that raspberries and blueberries have been plentiful. Raspberries have been so plentiful that it was found necessary to send large quantities of them to Boston. C. W. Perkins of Blomidon shipped eight cases of them on Thursday. Other shipments were also made.

THE quotations are: Butcher's beef, 61 to 75 per lb; mutton, 6 to 7 per lb; veal 3 to 5 per lb; lamb, 7 to 9 per lb; butter, 18 per lb; roll, 10, 13 to 20 per lb; eggs, 23 per doz; chickens, 50 to 60 per pair; lettuce, 25 per doz; radishes, 25 per doz; potatoes, 50 to 60 per bushel; blueberries, 40 to 50 per bushel; cranberries, 20 per bushel; squash, 50 to 70 per bushel; beans, 40 per doz; corn, 25 per doz; apples, 45 to 10 per half pint; cabbages, 50 per doz; cauliflower, 10 to 15; squash, 4 per lb; cauliflower, \$2 per doz.

FATAL ACCIDENT. A LITTLE BOY CRUSHED TO DEATH AT INDIAN TOWN. An accident occurred at Indian Town Thursday evening which cost a young son of James Collins his life.

CHARLOTTE HARBOUR, light passed over, the two boats were on the beach, the escape from their boat was effected by the boat.

BOSTON, A while ago Sir Charles was slightly demented, but was slightly demented.

FREDERICTON NEWS was slightly demented, but was slightly demented.

UNCLE SAM'S LOSS OUR GAIN.

This first full year after the abrogation of the fishery treaty is the worst that the New England mackerel fleet ever met. The Gloucester men have no monopoly of the home market because they have no mackerel for the market. With all their alleged stealing the landings at all ports last week were less than one-fifth of those of the corresponding week last year, and the total New England catch to date, including fares from the North Bay, is only 25,928 barrels against 152,755 barrels in 1885 and 133,138 barrels in 1884, a deficiency compared with last year of 120,827 barrels. These are the figures of the Boston fish bureau. Portland, Maine, papers say that vessels with 18 to 25 barrels continue to arrive. Dealers in this city are paying 10 cents per pound for shore mackerel, and cannot get supplies at the price. A Boston paper reports that the receipts of the day before publication were only 40 or 50 pounds of mackerel, and that the ruling price was eleven dollars per hundred, which is beyond all precedent. Large dealers are not able to fill more than two-thirds of their orders.

From this it is evident that the provincial fishermen sending fish to Boston stand in a much better position than in the days of free fish and free fishing. The increased price far exceeds the duty. Recent stories about scores of American poaching vessels taking large fares in Canadian waters are evidently based on a remarkably small substratum of fact. If these big hauls had been taken they would have been placed on the market, Canadian mackerel fishers, with ready means of transportation, easy access to ice and other supplies, and the whole range of outside and inside waters open to them would be able to more than hold their own with the Gloucester men in spite of the fish duties.

This leads The Sun over more to correct the mistaken idea that Canada protects her fisheries in order to force the United States into a new treaty. We do it to give our fishermen a chance to carry on their business without a treaty. We recognize the fact that the United States can live without fish, and will do so rather than yield to force. But if at any time our neighbors (who we take this opportunity to say, are a great and glorious nation) come to the conclusion that there is money and comfort in restoring the old status, Canada will take the subject into consideration. But there is no coercion expressed or implied in Canada's present action. It is not our fault that the good fishing is nearly all within the three mile limit. The mackerel, in their courses, fight against Gloucester, for some reason which we cannot explain.

THE MARINE POLICE IN 1870-73.

The treaty of 1818 was enforced during the seasons of 1870, 1871 and 1872. Hon. Peter Mitchell being minister of marine and fisheries. In the spring of 1873 fishing privileges were conveyed to the United States by the Washington treaty, and Mr. Mitchell's orders were not commissioned. During the period the Prince Edward Island coast was not protected by the Canadian fleet. The province was not until 1872 a part of Canada, and yielded in advance the privileges of inshore fishing allowed by the treaty. Moreover the headland limit was not maintained by Mr. Mitchell, who was hampered by advice from the imperial government, the home authorities being anxious to adopt a conciliatory policy in view of pending negotiations.

Mr. Mitchell's fleet in 1870 comprised six schooners. These cruised did excellent service. About four hundred American fishing vessels were boarded. Many of these were found to be in Canadian waters for legitimate purposes, a law and were warned off, and several which disregarded the warning were seized. It appears from the reports that during this season, or rather at the beginning of it, very little regard was paid to the treaty. The Gloucester men came close in shore, spread their seines and made themselves perfectly at home, until the several seizures were made, when they began to be more wary. But it was impossible to protect all parts of the coast at once, and as a matter of fact fishing in Canadian waters was largely prosecuted through the three years twenty vessels were seized by the marine police. Five of these belonged to the provinces and were charged with violation of the customs laws. The J. H. Nickerson and White Fawn were seized and tried, the former for purchasing bait in Canadian waters with intent to fish, the latter with preparing to fish in Canadian waters. The offence was the same in both cases, but the form of the proceedings differed. The Nickerson was condemned by Sir William Young in the vice admiralty court, Halifax, and sold, the Dominion government being the purchaser at \$2,500. She was seized early in 1870. The White Fawn was released later in the same year and was released. Another American schooner, the Grenada, was seized in 1870 for infringement of the customs laws. Of the remaining twelve vessels seized eight were condemned. Five were forfeited and sold. Seven of the vessels condemned were seized during the

first year and the eighth in January of 1871. The Wampatuck, which, we believe, was the first prize, was found engaged in taking cod fish close to the Cape Breton shore and the crew were in the act of hauling in the lines when the vessel was boarded. The Lizzie Tarr was found within 300 yards of the St. Lawrence coast. She had halibut lines out and her crew were tending them. The master admitted that the owner of the vessel had directed him to fish there, as the government cutter was seldom seen in those places. The A. H. Wazner, which was condemned but not sold, was actually engaged in fishing on the Cape Breton coast when seized. Her lines were over the rail and were freshly baited. She had been previously boarded and warned. The A. J. Franklin, which was condemned and forfeited ball, was taken on the Cape Breton coast. She had been warned, and was afterwards found with net lines, freshly baited hooks and fresh mackerel gills and scales on deck. The captain declared that the fishing had been done before he came within the line, and the vessel was not seized. Sabotage, it was found that the captain had lied, and the next time an opportunity was afforded the Franklin was taken on the old charge. The Romp was sold. She was seized in Charlotte County, and her captain confessed that he had taken fifty barrels of herring in Canadian waters at Grand Manan. The Perseverance was seized in January, 1871. She was found with herring nets out at Eliza Harbor. The Samuel Gilbert was taken in 1871 in the Gulf of St. Lawrence. Her crew were fishing for cod at the time, but the vessel was released, the owner pleading that he was under the impression that the Washington treaty was in operation. It will readily be seen that the Gloucester folk were much hindered in 1870 than they are now, or were after the first season. It appears that many vessels found inside the limit which had been apparently engaged in fishing, but whose crew pleaded ignorance of the law, or claimed to be under the impression that they were not nearer than three miles, were not hard pressed.

Montreal has three workmen's candidates in the field for the local assembly contest. They are all said to be strong men, and claim to be strictly independent of political parties. One of the labor candidates, a printer, is to oppose the attorney general in Montreal East, and his Radical antagonist in Montreal East. William Robertson, a saddler, is out for the western division between G. W. Stephens, Rouge, and Hall, the young lawyer chosen by the Liberal Conservatives. In Montreal Centre, the party candidates are the present Reille member McShane, and C. J. Doherty, president of the Junior Liberal Conservative club. The labor candidate is William Keyes, an engineer. The labor men have published their platform which includes the prohibition of the liquor traffic. The workmen's canyvas has so seriously complicated the situation as to throw the commission all out of their reckoning. The Montreal Witness which is a straight opposition paper finds the Reile canyvas too much to swallow and shows a tendency to compromise on the labor men.

C. AND I. EXHIBITION.

The Australian Colonies and What They Show.

AN OUTLINE OF THEIR GROWTH AND PROGRESS.

Western Australia—Her Imports and Exports—Queensland and its Riches—Fiji and its War Clubs.

A colony that shows the richest treasure of the colonial and Indian exhibition—the "South-eastern Crescent" is a perfect copy formed of nine pearls together in one solid mass, a wonderful freak of nature, valued at \$50,000, is one not to be passed over lightly. Western Australia includes all that portion of the antipodean continent situated to the westward of 120° east longitude. Its greatest length is 1,250 miles from north to south, and 800 miles from east to west, though the settled or occupied portion of the colony is only some 600 miles long by 100 miles average breadth. The total estimated area of the colony is 975,824 square miles, including islands, including islands on the coast. Western Australia was first settled in 1829 and by 1850 the colony had increased to 200,000 inhabitants, which had increased to December 31st, 1884, to 33,000, exclusive of some 5,000 convicts. Its capital, Perth, has a population of 8,000.

The agricultural property of the colony has been on the rise within the past few years. In 1884 it was valued at \$20,000,000, and the value of the produce of the colony was \$30,000,000, of which 5,500 to barley, 1,500 to oats and 24,000 to hay. In 1885 the value of the produce of the colony was \$30,000,000, of which 5,500 to barley, 1,500 to oats and 24,000 to hay. In 1886 the value of the produce of the colony was \$30,000,000, of which 5,500 to barley, 1,500 to oats and 24,000 to hay.

including bullion and specie of Western Australia in 1884 were: Imports, \$2,600,000; exports, \$2,000,000. The exports of the colony to Great Britain consist almost entirely of wool, which, in the form of raw and dressed, is admirably adapted for export to the United States and other markets. Good wheat growing soils exist over large areas in the northern district, and the production of grain is increasing. Magnetic iron, lead, copper and zinc ores are found in large quantities. The salubrity of the climate is equal to that of any part of the antipodean continent. The colony has some 125 miles of railway in operation and several new lines are in progress of construction. In 1884 there were 1,187,729 passengers and 45,212 tons of goods transported by the railway. The colony has a large population of sheep, and the wool trade is its most important industry. The colony has a large population of sheep, and the wool trade is its most important industry.

WORKINGMEN'S CANDIDATES.

They are all said to be strong men, and claim to be strictly independent of political parties. One of the labor candidates, a printer, is to oppose the attorney general in Montreal East, and his Radical antagonist in Montreal East. William Robertson, a saddler, is out for the western division between G. W. Stephens, Rouge, and Hall, the young lawyer chosen by the Liberal Conservatives. In Montreal Centre, the party candidates are the present Reille member McShane, and C. J. Doherty, president of the Junior Liberal Conservative club. The labor candidate is William Keyes, an engineer. The labor men have published their platform which includes the prohibition of the liquor traffic. The workmen's canyvas has so seriously complicated the situation as to throw the commission all out of their reckoning. The Montreal Witness which is a straight opposition paper finds the Reile canyvas too much to swallow and shows a tendency to compromise on the labor men.

ATTORNEY GENERAL LONGLEY of the Nova Scotia repeat government announces that "direct efforts in the direction of securing repeal will be delayed until the Dominion elections are over."

He also asserts that the repealers will all oppose Sir John Macdonald's government. The genuine repealers are already distinguished with the alleged leaders of the movement, who having worked the scheme to keep themselves into office, now propose to work in the interests of Blake and the Dominion. Mr. Fraser, M. P. P., who started the movement and who is credited with an honest desire to secure repeal, has stated that the secessionists cannot belong to the fold of the great parties in the Dominion. But Mr. Longley is not a secessionist. He is only a agitator.

SENIATOR POWER of Halifax has written to the Dublin Review suggesting a scheme for home rule in Ireland. It is nothing less than an adaptation of the federal system. The senator's scheme demands much machinery. He wants a local parliament, with delegated powers, and Irish representation in the imperial chamber. His local legislature would have two chambers, and he wants a governor appointed by the Queen, and holding the right of veto. Senator Power's scheme does not involve special legislation for Ireland, as it applies to Scotland and England as well. Senator Power, it will be seen, is not a Gladstonian home ruler. But he is on the winning side, for the federal home ruler, he is Parcellite, whig, or tory, will win in the long run.

DURING the year 1885, the number of applicants to the board of examiners in Canada for masters' and mates' certificates was 204. Of these 147 succeeded and 57 failed. Masters' certificates were granted to 96, and mates' certificates to 51. Of the successful candidates 61 applied in Halifax, 44 in St. John, 33 in Yarmouth, and 9 in Quebec. Only one candidate failed in re-examination, the remaining 56 unsuccessful applicants being unable to pass the examination in navigation. Either the examination in the management of vessels must be wonderfully easy or the Canadian boys take naturally to the more practical part of their business.

Two objections were taken in the House of Commons to the Dominion franchise bill, and it was decided that it would be deferred. It is true, but it would cause the lists to be doctored in favor of the Government. Now the publication of the lists shows that the new act has added from twenty-five to a hundred per cent to the number of electors, and the opposition journals are claiming that their party has been the largest gainer in the new names put on.

A horse theft, lately arrested in Denver, had taken place on the night of the 17th. The thief had stolen a horse valued at \$400 miles from Nebraska.

THE AUSTRALIAN COLONIES AND WHAT THEY SHOW.

THE GREAT GOLD TROPHY.

THE TROPHY OF THE QUEENSLAND MINE.

Supplementary to this trophy is the collection of minerals from the mining department of Victoria, the cases with the specimens of auriferous quartz including the pioneer specimen, found at Ballarat June 11, 1850, and the "Wolcome" nugget, which weighed 2,300 ounces. The "Wolcome" nugget, found at Ballarat June 11, 1850, and the "Wolcome" nugget, which weighed 2,300 ounces. The "Wolcome" nugget, found at Ballarat June 11, 1850, and the "Wolcome" nugget, which weighed 2,300 ounces.

The "Wolcome" nugget, found at Ballarat June 11, 1850, and the "Wolcome" nugget, which weighed 2,300 ounces. ANGRY BELFAST.

The Riotous Element Persistent and Bloodthirsty.

A RELIGIOUS FEUD. The City Divided into Protestant and Catholic Quarters.

COMMENTS OF THE LONDON PRESS. (Quoted from the N. Y. Herald.)

BELFAST, Aug. 9.—There is a raging epidemic in Belfast now, as there has been during the past three weeks...

For instance, the Catholics severely injured a Protestant woman found on Saturday in the Catholic quarter...

Only a dozen or so of persons have been killed in the riot of the past few days, but over four hundred gunshot wounds...

Your correspondent does this evening three things in the riotous element, as he has done before...

The slight of a policeman in many parts of Belfast is sufficient to get together a mob...

In order to make this policy possible 1-200 troops were brought to the city today...

GOOD NATURED, BUT WAITING. As I drove along Shankill street, where a single doctor recently treated 48 wounded...

A curious feature of the riot is the refusal of many severely wounded persons to be taken to a hospital or allow doctors to come...

I saw the mayor today, who said: "The rioting began when Gladstone's bill was defeated. The Orange walk on the 12th of July...

Attempt to Steal the Body of a Millionaire. MONTREAL, Aug. 5.—In December, 1884, George K. Foster, one of the wealthiest residents of Richmond, Quebec, died...

THROUGH THE WHIRLPOOL.

The Two Daring Buffalo Cooper's Make the Perilous Trip.

JUST AN HOUR IN THE RAPIDS, SHUT UP IN FOUR FEET OF WATER—THEY WERE BADLY SHAKEN UP, BUT LANDED SAFELY AND UNHURT.

NIAGARA FALLS, Aug. 8.—George Hazlett and William Potts, the adventurous Buffalo cooper, made their perilous trip through the Whirlpool Rapids late this afternoon...

Flight of an Heiress.

HER COMPANION A MARRIED MAN OF MORE THAN DOUBTFUL REPUTATION.

CHICAGO, Ill., Aug. 6.—Society here is shocked over the announcement that Miss Madeline Kessler, a fresh and attractive twenty-two-year-old heiress, has eloped with one of the most noted rascals in the city...

Madeline was always quiet and discreet in manner, and never had gentlemen friends calling on her...

Rickard's wife, who is the keeper of a disorderly house, says she saw her a few days ago, and that she was in a very bad way...
