

### CIVIL SERVICE REFORM — BRINGING FIRST MEASURES

Expected Will Come Before Parliament Early in the Session  
LIKELY RESTORE THE PENSION SYSTEM

Was Abolished by the Liberals—Understood Re-Classification With Higher Salaries Has Been Decided Upon.

Special to The Standard.  
Ottawa, Jan. 16.—It is expected that one of the earliest government measures to come before parliament will deal with the question of civil service reform. The Minister of Finance, who has had the matter under consideration since the publication of Sir Geo. Murray's report, has already carried into effect an important change in the manner of the preparation of the estimates. The principle of treasury control has governed the change made in this respect, as the result that the estimates have been thoroughly digested and are in such shape that the minister will be able to lay them before the house much sooner than has been the rule in past sessions.

Certain other changes in the method of administrative routine and affecting the great body of civil servants are considered desirable by the government, but cannot be brought about without legislation. The coming bill will provide for these changes. Members of the civil service confident of the fact that in connection with this legislation the system of superannuation which was abolished by the late government will be restored and that the provision may be made for the widows and members of the service.

It was pointed out by Sir George Murray that the absence of a pension system in two ways, men whose services might well be dispensed with are retained after their powers have begun to fail, and men whom the state would be glad to retain are allowed to be tempted from the service at a time when their value is highest. I would therefore strongly urge as one of the most important items of civil service reform that some system of pensions such as that which was rescinded in 1898 should be re-established.

The understanding in civil service circles is that the new bill will fix an age limit of sixty-five.

It is further expected that a partial reclassification of the civil service will be decided upon, and that this change carries with it somewhat higher salaries.

### STRIKERS ARE ARRESTED IN THE REGION

Charged with Carrying Concealed Weapons—Clears up Mystery of Secret Indictments.

Houghton, Mich., Jan. 16.—The mystery of the secret indictments returned yesterday by the special grand jury, which has been investigating disorders growing out of the copper miners' strike, was cleared up today with the arrest of four strikers charged with carrying concealed weapons. Although the jury continued its deliberations this morning only one other true bill had been found and those who had expected a return on the indictment of Chas. Moyer, president of the Western Federation of Miners, admitted today that there was nothing on which to base a predication as to its probable action. Only one indictment remained unfinished according to information at the county clerk's office.

### CAPTAIN CLIFT'S SLANDER ON BAY OF FUNDY REFUTED BY MEN WITH EXPERIENCE

St. Lawrence Nautical Assessor's Statement Product of Ignorance or Insanity  
WHAT WILL THE BOARD OF TRADE DO ABOUT IT?

Shipping Men, Sea Captains and Other Authorities Indignant Over Attack on St. John Published in Montreal Telegraph—Immediate Action Advocated.

Montreal, Jan. 16.—Captain R. D. Clift, a leading assessor of the St. Lawrence River Wreck Commission of inquiry, spoke indignantly to the Daily Telegraph reporter today regarding the risks incurred by ocean liners in entering the Bay of Fundy. "The sea passage past Cape Sable to Brier Island and Grand Manan Island," he said, "is the very worst which can be experienced in stormy wintry weather. The entrance to the bay is, with its contrary currents and its heavy tide in thick fog and driving snow, a positive danger and trial to the bravest and most experienced shipmaster."

### MR. MCGIBBON SILENT ABOUT RUMORED SALE OF MONTREAL HERALD

Received Queries as to Truth of Report from all over Country—Nothing to Say Yet.

Ottawa, Jan. 16.—"I have received letters and telegrams from all over the country asking me whether I am going to sell the Herald. I am not ready to make any statement about it, however," said Mr. D. Lorn McGibbon, of Montreal, tonight, when seen in regard to his rumored sale of the Montreal Herald to the Montreal Trust Company. Mr. McGibbon intimated he would not be able to make a statement for a few days.

### WRESTLER TREMBLAY RETAINS CHAMPIONSHIP.

The first fall was secured in thirty-five minutes and the second followed in twenty minutes.

### THE DRIVER UNCONSCIOUS AT THE THROTTLE, TRAIN SPED ON

Engineer Found Senseless in Cab of Fast Express—Train had Gone Considerable Distance before Discovery—Believed Piece of Falling Rock Struck Him

Baltimore, Jan. 16.—With the engineer unconscious in his seat from a fractured skull, the New York and St. Louis express on the Baltimore and Ohio Railroad sped over the rails for a brief time yesterday evening without a controlling hand on the throttle. President Willard and other high officials of the road were aboard the train. The pilot of the engine, J. H. Moxley, of Baltimore, was discovered by the foreman of locomotives, who was riding on the engine, and had his attention drawn to Moxley by the latter's failure to blow a crossing signal. The express was running through Brunswick, Md. The train was stopped at the Brunswick station where a physician's examination disclosed the nature of the man's injuries. It is believed he was struck on the head by a piece of ice or a rock falling from a cliff a short distance east of Brunswick. Moxley was rushed to the hospital at Frederick in a special train upon Mr. Willard's order. His condition today was critical.

SAFE FOR 12 HOURS  
UNLESS HULL PIERCED

The A-7 Was With Flotilla at Practice at Whitesand Bay—Made Plunge and Didn't Come to Surface Again.

Plymouth, Jan. 16.—Two officers and nine men, comprising the crew of the British submarine boat A-7, are trapped tonight in their craft beneath the waters of Whitesand Bay, about five miles southeast of Plymouth. Whether the men are dead or alive has not been established, but navy officials here expressed the opinion tonight that all of them had perished. The exact spot where the little vessel sank has not been definitely fixed.

A CALL TO ACTION.

It must be taken for granted that every member of the St. John Board of Trade is vitally interested in all matters affecting this port.

To permit Captain R. D. Clift to rush into print with the statement that "Halifax is the safe port and the trip round to St. John should be forbidden?"

The Globe, last evening, published in a despatch from Montreal an interview that a Montreal Telegraph reporter had with Captain Clift.

The business men of St. John, a few months ago, subscribed liberally to assist in the reorganization of the Board of Trade.

According to advices from The Standard's Ottawa correspondent, which we are inclined to accept as reliable, Canada, at this moment, is menaced by a peril from which only the watchfulness and devotion of the immigration authorities can save us.

The Times quotes cabled information to the effect that Hon. George E. Foster, Minister of Trade and Commerce, now in England, is returning to take his place in parliament, and sagely concludes that his presence "will add spice to the debates, and may not add much to the peace of mind of some of his colleagues."

Fatality of Whooping Cough

Many parents think lightly of whooping cough, and treat it as a necessary evil, not giving the child who has it any special attention.

The seriousness of whooping cough was emphasized by the Medical Health Officer in Toronto a few months ago, when he reported fourteen deaths during the month from whooping cough, and only ten from scarlet fever, typhoid fever and measles combined.

So many people write to us about the relief and cure of whooping cough by the use of Dr. Chase's Syrup of Licorice and Turpentine that we can recommend it with the greatest confidence.

It loosens the cough, aids expectoration, and by its soothing influence prevents the terrible paroxysms of coughing which are so distressing to witness, and which wear away the strength of the child.

#### SOME THOUGHTS FOR THE NEW YEAR

#### Real Weakness in Church Today is Great Number of Places where it Does not Count.

Brooklyn, Jan. 12.—Yesterday morning Rev. Dr. N. McGee Waters pastor of the Tompkins Avenue Congregational Church, preached a striking sermon on the subject "Old Year Wisdom for New Year Living." The text was from Genesis xli:30: "And when Jacob had made an end of commending his sons, he gathered up his feet into the bed, and yielded up the ghost, and was gathered unto his people." Dr. Waters said:

The Old Year is like an old man, the New is most like a laughing boy. The world interest centers in the youth. It hardly thinks of the old man at all, save to have him hurry. The youth can afford to leave of his laughing a little. The Old Year is dying. Moreover, the Old Year is interested in him too. He is the Old Year's heir and will reign in his stead. The New Year does well to wait before the Old in solemn reverence. Joseph never was greater than when he hung on the charge of dying Jacob. The honor of old age is the glory of youth. If we are wise we will go into the New Year with the wisdom of the Old given on our hearts. Therefore, I have brought you the Old Year and the year—one word for the nation, one word for the church, and one word for the individual.

The Old Year's counsel for the nation was perhaps never better expressed than in the Old Testament saying, "Righteousness exalteth a nation, but sin is a reproach to any people."

Now, righteousness means doing what is morally right, whether it is legally right or not. Some things legally right are morally wrong. This means that a nation in its affairs must do the right thing in the sight of God if it wants to lay a foundation for prosperity, and if it does the wrong thing it takes away the cornerstone of prosperity. Do you believe that? More than one-half of the Old Testament is taken up with the proposition that when Israel did what was right, it prospered, and when it did wrong, and transgressed, not the laws of Solomon, or any other king, but the laws of God, it was destroyed. I think most of us believe that for Israel.

If you go to Rome you will see the modern city. If you dig down you will come upon the ruins of the old city, and you will see how the modern city came upon the primitive city. Take Gibon or Monrovia, and you will see the story of the different Romes, and this is what they say: The primitive city was a brute city, and violated the laws of justice, and it went down. The classic city was a glorious city, but it violated the laws of righteousness, namely, purity, justice, honesty, and industry, and it went down. The medieval city was full of dead men's bones—simony, gluttony, and adultery, and it went down.

Our fathers used to believe that for America. That is why in the Constitution James Madison would not allow the word "slave" to appear. He knew that sin was the reproach of any nation. That is what Thomas Jefferson meant when, after he had fought the greatest battle of his life to eradicate slavery from Virginia and had failed by two votes he said: "I tremble for my country when I ponder the commonwealth founded upon a volcano."

Some years ago a band of men, ignorant, primitive, and uncivilized, came into the church, went out to Utah, and set up there a state in a state, which at every point was disloyal to this American nation. It took them a while to appear. They employed a lawyer to smother the conspiracy. Most of us believe that it has breathed its last. But if after a while it should spring up again, then we will call it a commonwealth.

#### In Religious Training of Child Throw Burden On the Mother.

#### INFLUENCING THE MIND OF THE CHILD

Opinion Prevalent that Influence Should not be Brought to Bear Until Able to Judge for Himself.

THE SUPREME RIGHT OF THE CHILD.

The Sunday School Lesson By Evangelists.

Jan. 4th, Mark 9: 30-41 and 10: 13-16.

Two incidents from our lesson today. The one in chapter nine took place shortly after that strange mysterious vision on the mount where Peter, James and John beheld Christ's face and figure change to "a dazzling shape of wondrous radiance so glorious that they could only gaze and gaze with all their souls entranced in wonder," and reveals the true condition of greatness and of entering the kingdom via humility capable of receiving children, the other in chapter ten, again spiritually as definitely as the child is born thus obtaining new privileges, new appetites, new aspirations, new functions.

The second in chapter ten occurred when Jesus had left Galilee for Perea on his way to Jerusalem for the last time and revealed the rights of the child to become more than

A Vulgar Fraction of a Being. with mind and body well developed but with a soul starved, neglected, dwarfed.

As there is not time to consider the two incidents let us study the second.

Kate Wiggin in referring to the subject of children's rights, said:

"I spoke to the French dressmaker who fitted the collar of an effect civilization on my nineteenth century neck with a view to getting at the level of her mind in the matter." "The rights of the child," she said, she asked, her listeners pointed in the air.

"Yes, the rights of the child," she said, "of the American child, mamma?"

"Yes," said I nervously, "of the American child."

"Misericordia," he has them!" The dressmaker's view is undoubtedly shared by many, but is it true? What is the supreme right of the child?

"You, sir, are not an earnest man. You may be an honest, but you are not earnest. You do not believe in God. You do not believe in God. You do not believe in the forgiveness of sins. You do not believe in the Christian kindness. You do not believe in the Christianization of this city, or of every body, did what you do, simply praise the Church and take no part in it, there would be no church on this corner, and there would be no child to have for his mother, and your children would not be safe, and your womanhood would not be worth twenty-five cents on the dollar."

And of the people of the church, what would a visitor from Mars think? Suppose he were to find out that you like rain, and how many always stayed at home if the sun was too hot, and how there were some of social attention they could get out of it, or how many calls the minister made on them, or how much they were coddled, then, "What would you say to a body of people who called themselves loyal if they acted like people who called themselves an army if they did those things. What did the apostle say to the churches of his day when he said, 'I have mercy upon your churches of America for their indifference and labor in earnest?'"

The old man always keeps his best and last word for his son. So the Old Year's last counsel is withheld until after he has spoken to the nation and the Church, and is intended for the individual. "Be more of the church," he says to the people in earnest, "Be more in earnest." Earnestness on fire and zeal that is aflame would conquer the city for Christ in a single generation.

The Church counted in Wesley's time. You could tell a Methodist by his dress. You could tell him by his sorrow for his sins. You could tell by his walk and conversation. The Church always counts when the Church is in earnest.

One day there is a good deal of patronizing the Church. One man says that the Church is well enough and he intends at Easter and sometimes at Christmas, and if he happens to like the music he will go every pleasant Sunday evening when he has no company. If the minister get acquainted with a deacon, and seeks him out and urges him to come into the Church, as he ought to do if he stands for moral things, the man will be very positive in the affirmative, and he believes in the church, but he cannot unite with the church. He has a great many excuses which fool nobody but himself. What are you going to say to that man? Am going to say this to that

#### is it not that he should have The Right of Way to the Master?

Her Lack of Management.

If a reason were demanded for their need to wait in grave, many would reply, "I believe it unfair to influence a child's mind by inculcating any religious opinions before it is old enough to stand in the way of choice, and be able to choose for itself."

A botanist once had a friend who held this view and as they walked together he came to a patch of weeds when he remarked,

"This is my garden."

"Why so?" said his friend. "It is covered with weeds."

"That is because it has not yet come to its age of discretion and choice. The weeds, you see have taken root in the soil, and grow, and flourish, and are able to choose for itself."

If fathers do not bias their children against Christ, they will be blessed against Him.

Mothers are often the obstructionists. Here is a mother, a church member, who was her way to be a boy or a Christian, but she has a fatal tendency to expatriate him by commands given in a peremptory tone, who sends requests would be quite as effective. By scolding him before strangers and by pointing out his faults to the whole family circle she loses his confidence and sympathy, and in so doing effectively bars his way to the Saviour.

Edgar Hill tells of a man upon whom he was pressing the claims of Christ, who said in reply to his question, "Would you not like to be a Christian?"

"No, Sir, Not if It Would Make Me Feel as You Look."

The boy referred to, would doubtless rather not be a Christian if he would make him feel as his mother looked.

There is another mother whose lastness prevents her child from getting into touch with Jesus. Her intentions are good but her version of the apostle's injunction to children is

"Parents Obey Your Children"

that your days may be peaceful in the home which the Lord our God giveth thee." If the whim or the caprice of the child led her in the opposite direction the mother meekly followed instead of placing herself at the head of the column and saying "Come on, boys, this way."

But the chief reason why so many parents are obstructionists is their indifference to their lack of grit and determination to bring their children to Jesus at any cost.

Chapman says "We were crossing the China Sea recently and one of the ship's doctors who had brought his wife and children was talking to one of my friends. Just after the vessel had got out of port, one of the sailors said, 'What are you doing?' "Doctor, just as we were about to leave port a boy fell overboard. We rescued him and we have done all that we can for him. He is still unconscious."

"What have you done?" asked the doctor.

"We have done this, that, and the other," answered sailor mentioning various methods used on such occasions, "but he is still unconscious. Is there anything else we can do?"

The doctor remained seated and looking up in a careless professional way said: "I think not." "Doctor, would it not be a good plan for you to go and see the boy?"

So they summured down the deck till they came to the little crowd surrounding the boy. The doctor bent over him and turned the little fellow's face around so that he could look at him. Suddenly his indifference vanished.

"My God—my God!"

"It is my own Boy!"

He exerted all his strength used every method to resuscitate his crying all the time "Help me! Help me! O my God help me."

Never shall we feel our responsibility to get our children saved until we realize their peril. Torrey said "I would not dare to send a child of mine to any modern high school or college unless they were very strong and intelligent Christians before entering."

Even Sunday School teachers are

FINANCIAL AND COMMERCIAL NEWS AND COMMENT

WEEKLY LETTER ON MONTREAL MARKET

(F. B. McCURDY & CO.) Montreal, Jan. 16.—Undoubtedly there is a more optimistic feeling in the local market this week than there was a week ago.

The effect of the earlier money is now being felt on the local market. Today the tone was very optimistic and the trading was active and prices for the most part were quite firm.

On the local street fifty is predicted as the price of the Tram Power in the near future and many recall the fact that only once before it was up to sixty, when the earnings were not as large and the stock was nearly so large as it is at the present.

Another feature of the week and perhaps more especially the day was the strength in Quebec railway. Upon several occasions recently the stock has gone up to close to fifteen, but has never quite made the mark.

Undoubtedly in the fixing up of this Quebec railway affair and the Montreal tramways difficulty will be to boom the price of these stocks as well as to inspire the entire local market with a much stronger tone.

**Fremmen's Smoker.**  
A smoker attended by more than ordinary success, was held in Orange Hall, Simonds street, last evening, under the auspices of the Tubercular Fremmen's Union. On invitation extended there, the various tubercular fremmen in the city were attendance, and an interesting programme was carried out. The attendance was large, and much interest was taken in the evening's programme which consisted of addresses and a number of musical and literary contributions.

**Successful Concert.**  
The Philathea and the Y.M.A. of German St. Baptist church held a successful entertainment in the mission hall of the new building last evening. H. J. Macburn, president of the Y.M.A., was chairman, and the programme was carried out as follows: National Anthem; selection by Y.M.A. orchestra; reading, Mrs. Irvine Malcolm; solos by Elmer Belding, Mrs. Grant, Albert Belding and Gordon Scott; quartet, composed of members of the Philathea and the Y.M.A.; Mrs. Irvine Malcolm of Moncton who gave several readings during the evening was presented with a bouquet of roses. Members of both classes were in costume and the hall was decorated in an appropriate manner. Refreshments were served at the close.

**I. L. and B. Smoker.**  
The rooms of the Irish Literary and Benevolent Society, Union street, were the scene of a very happy gathering last evening, when the society entertained at one of the most enjoyable smokers of the season. There was a large number present and a well arranged programme of addresses, readings and musical numbers added much to the enjoyment of the evening. Edward Fitzgerald, president of the society, occupied the chair and representatives of the various Catholic societies of the city were in attendance. Much interest was taken in the programme and all present pronounced the smoker a very enjoyable function.

**Welcome to Pastor.**  
The school room of Calvin Presbyterian church was the scene of a very happy gathering last evening when a reception was given in honor of Rev. F. W. Thompson. A large number of the congregation of the church were present and the evening was passed in a most entertaining manner. The occasion was marked by the carrying out of a nicely prepared programme and during the evening many welcoming hands were extended to the honored guest of the occasion. The feasts of the congregation of Calvin church towards Rev. Mr. Thompson were well shown in the hearty reception tendered him and all present joined in making the event one which will long remain fixed in their memories.

**Royal Scimitar Chapter.**  
The annual meeting of St. John County Royal Scimitar Chapter of the L. O. A. was held last evening in Orange Hall, Germain street. The officers reported a successful year in all lines of work. The following officers were elected for the ensuing year and installed by Grand Master W. E. Wallace, assisted by Past Grand Master David Hipwell: William M. Campbell, W. Com. in C.; R. P. Goodrich, E. Com. in C.; E. B. McIntyre, Com. chaplain; M. Day, Com. secretary; C. B. Ward, Com. treasurer; W. Rogers, Com. herald at arms; W. N. Earle, Com. 1st lecturer; Wm. Reid, Com. 2nd lecturer; Fred Niles, com. 1st conductor; George Atterly, Com. 2nd conductor; H. C. Moseley, Com. inner herald; Oscar Grant, Com. outer herald; Roy Spencer, Com. pianist.

NEW HOSPITAL PROPOSED FOR ST. JOHN

**Discuss Preliminary Plans at Joint Meeting Yesterday—Will Cost in Vicinity of \$250,000.**

Plans for a new public hospital, which it is said will involve an expenditure of between \$200,000 and \$250,000, were discussed at a conference held yesterday between a committee of the county council and members of the Board of the General Public Hospital Commissioners. The proposed building will have accommodation for 140 patients, and will be complete in every way. It will be provided with a new operating room, with X-ray facilities, and every department will be equipped with all the improvements that advanced science calls for. In connection with the new building there will be a power house, which will be used to light and heat the old building as well as the new.

The plans submitted were of a preliminary character and were prepared by architect H. C. Mott.

The committee will submit a statement, covering the project, to the meeting of the county council on Tuesday, and if the council approves the proposition, an expert will be secured to report on the plans, and assist in working them out in greater detail.

The new building is to be erected on Wright street, in front of the present hospital, and is to be so located as to make it the nucleus of a new system of hospital buildings, when it may become necessary to tear down the old buildings and put up new structures.

CANADA MUST HAVE PEACE

**Rev. Dr. John H. MacVicar in Forceful Address on "Canada's Deeds of Renown."**

Rev. Dr. John H. MacVicar, lecturing in St. Andrew's Church Hall on "Canada's Deeds of Renown" last evening gave a graphic and comprehensive survey of early Canadian history. The meeting opened with music, selections by Mrs. Curran and Messrs. Guy and McKean, with Mrs. Curran as accompanist.

The lecturer, in the development of his theme, dwelt upon deeds that have given renown to our wide land both under the French regime and in connection with the British conquest. He carried the story as far as the year of 1812. This he characterized as a "senseless war" that should never have been entered upon and to the waging of which some of our best men have given their lives.

He then dwelt upon the history of Boston flags were set flying at half mast. Those who persisted in starting upon the war dreamed that in consequence of the state of Europe, had passed, as it was by Napoleon, Canada would "fall into the union like a ripe plum."

At the start, all the odds in the conflict seemed in favor of the States. There was a long frontier line with a population of little over a quarter of a million on our side, and upwards of 8 million on the other side. If our noses were to be counted, Dr. MacVicar said, the result could only have turned out disastrous to Canada; but the people who belonged to the noses, or to whom the noses belonged, had to be reckoned with.

Dr. MacVicar, in an extended aside, gave an account of investigations he had carried on whilst a resident in Nova Scotia as to the origin and significance of the term Bluenose. Some had told him it referred to the effect which the cold weather had upon people's noses. Others had connected it with the blue streak in their potatoes but he was perfectly certain that so far as the Pictou-born were concerned, at all events the "smoke potato" theory did not have application.

Still others had informed him that Halliburton had invented the term in describing the numerous adventures of Sam Slick; but he was persuaded that it ante-dated the fertile imagination of that great writer. One day, in talking with a Nova Scotia judge, he was informed that the term Bluenose was to be traced back to the days of the U. E. Loyalist when an attack was threatened which in council of war they had despaired of being able to meet. Someone suddenly exclaimed: "Don't lose heart! Let us line up and count noses and see whether we are strong enough." As the early Loyalists wore blue clothes, when they lined up and were counted, the bluenoses were found to be numerous enough to front the foe with reasonable expectation of success.

Counting noses, the lecturer considered, was a poor business at best. During the war of 1812, over and over again it turned out there were larger numbers on the defeated side than on the victors. Even though the situation were that of 3,000 Canadian facing 13,000 Americans, the conflict ended in favor of the smaller body. At Chateauguay, not far from Montreal, 250 Canadians, blowing their bugles over a wide territory, to conceal their poverty of numbers, had routed 3,500 Americans on the march against Montreal. At Chrysler's Farm, 800 Canadians had routed another 2,000. At the Battle of Landy's Lane, 3,000 Canadians had routed 5,000 Americans. There had been humiliating British reverses at sea, upon which the school children of the States were nowadays thoroughly drilled, but they seemed to learn nothing or little about the land engagements. ADVISES STAGE AS  
CAREER FOR GIRLS

Ancestor a Full Blooded  
Indian—Girls who would  
Join Work and Disap-  
pointments.

Although not a regular member of the Thompson-Woods Stock Company, Miss Elizabeth Delmore (Mrs. Cecil Drummond), has appeared to advantage in several of the productions with which the company has entertained St. John audiences. One of the roles in which she was particularly pleasing was that of Phyllis Lee in The Charity Ball. Miss Delmore's last engagement was in the stock company in Portland, Me., where she and her husband were playing in support of Sydney Toler, now leading the Halifax Stock Company. When the Portland company closed and Mr. Drummond was engaged for the Thompson-Woods forces his wife came with him to this city for a rest.

Miss Delmore was a member of the Toler companies for three seasons, playing leads and second business. She has been especially successful in emotional parts and for a time played big time in vaudeville in a dramatic sketch written for her by her husband. When seen by a Standard reporter a day or two ago, after a rehearsal of next week's bill she briefly spoke of her ambitions and experiences in stage life. She was born in Cincinnati and spent her childhood in Portland, Me. "I am a real American," she said, "a member of one of the 'first families' for generations back; one of my ancestors was a full blooded Indian and I am very proud of the fact. I always had an ambition to be an actress, being particularly fond of the plays of Shakespearean parts. I have played Juliet in the balcony scene from Romeo and Juliet, which we used in vaudeville and it was quite successful. I admire all Shakespearean characters but prefer Juliet to the others, even though it does not afford such opportunities as Lady Macbeth.

"Have I a private ambition? Well, if I have it is to have a home of my own and my grandchildren around me. I do not, however, expect to realize it for some years yet. Professionally, my ambition is to play Shakespearean parts. That, I think represents the acme of theatrical ambition, for there is no other stage literature that after all will retain its hold on the public as the Shakespearean productions."

Speaking of the stage as a career for girls, Miss Delmore advised in favor of it. "Of course it all depends upon the girl, but if a girl has talent, the ability to work hard and put up with all sorts of discomforts, including the practical loss of home as most girls know it, the temperament that will enable her to smile at disappointment and work and wait for the triumph to come the stage offers a splendid field. There is an opportunity to secure an independence and a position after one's work, and that does not always come in other lines, but it means work, unending work, and if the talent is not there, and desire to act, it is better to abandon all thought of stage life and turn to something else."

Miss Delmore also took occasion to express her appreciation of St. John. "I like the Maritime Provinces," she said. "I have played in Halifax and now in St. John and I like them both very much. There is a sort of friendly 'we want you to feel at home' spirit about the people and they are quick to appreciate one's work. I have noticed that both in St. John and Halifax. Your audiences are responsive and sympathetic even to a greater degree than in many places in the United States. Yes, I like St. John very much indeed."

# "TYPHOID MARY" MAKES HER APPEARANCE

The Female Species of the  
Hog Cholera Germ Said  
to be as Deadly as the  
Male.

Special to The Standard.  
Ottawa, Jan. 15.—The department of agriculture has discovered that there is such a thing as a "Typhoid Mary" among hogs. It appears that "Hog Cholera Harry" the porcine equivalent to the disease-carrying female herein before mentioned, is a menace to the health of the pig community.

An imported hog may have been immunized by the injection of virus and still carry the disease for distribution. An order in council has therefore been passed prohibiting the importation of hogs so immunized. It reads:

"The importer will also be required to produce an affidavit to the effect that the swine he proposes to import have not been immunized to hog cholera by the simultaneous injection of hog cholera virus and serum."

# TUG HELENA NOW IN PORT

Pilot McKelvey Tells of  
Adventures of one of  
Rescue Ships—Cobequid  
Island.

Pilot Fenwick M. McKelvey, who left port on the tug Helena on the morning that the steamer Cobequid was reported wrecked, arrived in port Thursday night and in conversation with the Standard said that the morning that he left port the weather was very thick, the sea was high, they were not given any further information other than the ship was on Brier Island, and after they put into Beaver Harbor they heard that perhaps the ship was on the Murr Ledges off Grand Manan. They went to Grand Manan and the first possible chance was taken to search for the wreck. The Cable Steamer Trylon was also there. On Thursday morning the Helena returned to Trinity Ledges, but the Languard had taken of the Capt. and the fourteen of the crew before the Helena got there.

Speaking of the wreck, Pilot McKelvey says that it is a miracle that the ship was saved. The weather side of the ship was simply a mass of ice and the ice had so fastened to the hull that the water for the sea which was breaking against the cabin in which the survivors were huddled together. The sea had been breaking over the ship for what was seen of her was a mass of ice. The ice had formed even to the top of the ship's funnel and the stays that held the funnel in place were coated with ice almost the size of a man's body. It was high water when the pilot arrived at the scene and he said that what could be seen of the ship presented nothing more than a large piece of ice.

It was too rough weather to be out to sea in a tug on the day that they left port, but if they had known just where the vessel was wrecked at the time, a chance would have certainly been taken.

**HARMONY.**

His limbs were huge and so were his boots; his face, fringed with frosty stubble, and his neck were deeply tanned by years of exposure to wind, rain and sun. Dried clay-stains on his mole-like features proclaimed him a sailor and apparently he had taken to street-singing as a palliative for temporary unemployment. He stood along the quiet suburban road and upwards of the windows of the trim villa, as though considering what item of his repertoire would suit the occasion. Then, so explosively and in such a loud and raucous voice that a cat who had been lazily blinking at him from the top of a gate-post made a precipitate descent and retreat, he broke into song with—

"Who-on my baby sister calls me,"  
Manchester Guardian.

Ten years ago today marked the beginning of a period of extreme cold in eastern Canada, which broke all January records for many years. On this date in 1877 a weekly mail service was established between the United States and Canada. Seven years ago today the Dominion government voted \$50,000 for the relief of the Jamaican earthquake sufferers.

GENERAL TRINIDAD RODRIGUEZ

General Francisco Villa, after shooting more than half the three hundred prisoners he took after the fall of Ojinaga, sent troops, of which General Rodriguez is commanding a division, toward Torreon as the next step in his advance on Mexico City.

General Salazar and Orozco, who General Villa said he would kill if he captured them, were among the last of the federal generals to leave the city. For a while it was feared that General Orozco had fallen into the hands of the rebels, but later the report circulated that he had reached the American side, had eluded the American officers, and was on his way to the Texas mountains.

# MR. CARVALL FAILS TO BREAK DOWN MR. PENDER'S TESTIMONY

Cross Examined, Defendant in Southampton Railway  
Case Emphatically Denies Most Important  
Details of Stewart's Evidence.

Special to The Standard.  
Ottawa, Jan. 15.—The cross-examination of James K. Pinder, president of the Southampton Railway Company, in the case brought by John M. Robinson and D. King Hazen in York Circuit Court this afternoon, and there was standing room only for the late comers.

Mr. Carvall was strikingly unsuccessful in his efforts to break down Mr. Pinder's testimony, and when it came to repartee, and it often did come to that, honors have almost invariably been with Mr. Pinder. The witness stuck stoutly to his story that Stewart obtained his contract by fraud, that he was going to build the road for \$13,000 per mile and the vice-president of the C. P. R. stated to him that it could not be done at that price. "I found out later that Mr. MacNicol was right and that it could be built for that sum," added Mr. Pinder.

Mr. Carvall submitted a letter from Mr. Pinder to Mr. MacNicol telling of Mr. Robinson's intended visit to Montreal in which Pinder stated that Mr. Robinson of St. John was to meet Mr. MacNicol regarding the financing of the road and for the latter to

make the proposition appear as good as possible to Mr. Robinson. The witness stated that he did not write the letter and did not know who did. All his business with Mr. MacNicol was done personally. All the directors were present at the meeting when the Stewart contract was rescinded. Witness recited the fact that Hazen had informed him that Stewart had not put up all the securities. He said that Stewart had obtained the contract through fraud and misrepresentation. Regarding the money, \$1,000 that Dr. H. H. McNally had given Stewart the witness said that after he had discounted the first and second note he did not believe that Stewart had used the money on construction of the road. The engineers had made changes which increased the cost of the road in the opinion of the witness, one at the Nackawick crossing and the other at Pinder's Mill.

The witness and Carvall engaged in some repartee and the former at one stage said "all you are here for is political training by your connection with such an active interest in the case."

The witness said that he received the first bonds of \$50,000 about April 1st, 1912, after an order in council had been passed some time earlier in the year. There had been considerable work done on the road previous to receiving the bonds.

The witness stated that he knew nothing of railroad building and roused Mr. Carvall's ire once more when he remarked: "You had some good training by your connection with the National Transcontinental Railway and ought to know all about railway construction."

# PRaise FOR HON. MR. HAZEN AND THE WORK OF HIS DEPARTMENT

New Journal Devoted to  
Fisheries Makes  
Its Debut.

THE RIGHT MAN IN  
THE RIGHT PLACE

Since Taking Charge of  
Department Hon Mr. Hazen  
has Studied Needs of  
Trade, and Done Much  
for its Development.

A new journal called the Canadian Fisherman has just been issued by the Industrial and Educational Press, of Montreal, publishers of a string of trade papers, devoted to the interests of Canada's principal industries. Numerous journals are published for farmers, but this is the first periodical to appear devoted to the interests of the Canadian fishermen and those in the fish business. It should fill a long felt want. Compared with developments along agricultural lines the advance

in the technique of the fisheries has been very slow, a fact no doubt due in some measure to the lack of means of disseminating information of progressive methods.

In its first issue the Canadian Fisherman publishes a photo and the following brief sketch of the career of the Minister of Marine and Fisheries: The Honorable John Douglas Hazen, Minister of Marine and Fisheries, is a "Downeaster" by birth, having been born in Oromocto, Sunbury county, New Brunswick, in 1860. Educated at the school and University of New Brunswick, Fredericton, Mr. Hazen studied law and was called to the bar in 1885. During the succeeding years he took an active interest in politics, and after holding the offices of Alderman and Mayor of Fredericton for several years, he removed to St. John and was elected to the House of Commons during the general election of 1892. In 1899, 1900 and 1908, he was elected to the Province of New Brunswick as member for Sunbury, afterwards becoming Premier and Attorney-General for the Province in 1908. When the Conservative government went into power in 1911, Mr. Hazen was chosen as Minister of Marine and Fisheries for the Dominion.

Mr. Hazen's interest in the fisheries since he took over the portfolio has been an active one, and coming as he does, from one of the sea-girt provinces, he is probably one of the

SENATOR COX  
DIED YESTERDAY  
AT TORONTO

A Giant in Financial Circles of Dominion—  
Connected with a Long List  
of Enterprises.

Toronto, Jan. 15.—Senator George A. Cox died this morning. His death removes the most active and influential financial magnate in Ontario, and one of the outstanding financial giants outside of the financial circles of Canada. It is a difficult matter estimating his wealth, owing to the vast number and complex character of his enterprises and the monetary institutions in which he was interested. His estate has been said to be anywhere from ten to eighteen millions. He was one of the incorporators of the \$15,000,000 transcontinental railway company, and might have been its president had he so desired. He founded the Canadian Loan and Savings Bank in 1885, was president of the Canadian Bank of Commerce for seven years, was a director of the National Trust Company of the Western Fire & Marine Insurance Company, the British American Fire & Marine Insurance Company, and a member of other companies.

He was a director of the Canada Cement. Nine companies were amalgamated in this merger. He was one of the principal shareholders of the Mexican Light and Power Company, a director of the Dominion Iron & Steel Co., a director of the Toronto Railway Co., and of the Canadian General Electric Co.

The funeral, which will be private, will be held Monday.

# EIGHTEEN SENATORS HAVE DIED SINCE 1911

Death of Senator Cox Reduces  
Liberal Majority to  
Twenty-two—Further De-  
crease due.

Ottawa, Jan. 15.—The death of Senator Cox leaves the Liberal in the Senate still with a majority of twenty-two in a House composed of eighty-seven members. When the vacancy is filled the standing of the party will be fifty-four Liberals and thirty-two Conservatives. When the Borden government assumed office in October, 1911, there were sixty-two Liberal Senators and nineteen Conservative Senators, with six vacancies. Since then there has been eighteen deaths, ten among the Liberals and eight among the Conservatives.

The nine additional senatorial representatives from Western Canada in the Senate this year by the passing through both Houses of the Premier's bill providing for increased senatorial representation from the west, the Liberal majority in the Senate will be reduced to twelve, not taking into account any further changes through the death of the present members of the Upper House.

best informed of the many Ministers who have presided over the Fisheries Department. An enthusiastic amateur fisherman himself, he has gone to a great deal of trouble to get acquainted with the conditions of the commercial fisheries of Canada. Last summer, he made an extensive tour of the British Columbia coast, and as a result of his trip, he has made an arrangement for a survey to be undertaken of the Pacific fisheries with the object of development. Since he took over the Fisheries Department, he has realized how much depends upon the co-operation of the fishermen and the trade with the government in promoting the welfare of the fishing industry, and with the object in view, he organized the Fishery Advisory Board—a committee of practical men from the various provinces—to suggest ways and means for the progress and development of the Dominion Fisheries.

It would be a hard task to get a man who has served a time in the dory handling trawl or twice to fill the office of Minister of Fisheries, but Mr. Hazen, though he can not lay claim to ever having been a trawl handler, is a native of a province which breeds good fishermen, and he loses no opportunity of educating himself in the practical business of the fisheries. With men of this class in command of the Department, those in the trade will find in Mr. Hazen a man who will do his utmost to further their wishes without throttling the welfare of the fisheries and the fishermen by political prejudices.

Farmers Telephone Company Directors Hear Report of Good Year.

DEMANDS FOR THE  
'PHONE INCREASING

Heavy Snowstorm in Carleton  
Causing Men who  
Haul to Camp Considerable  
Inconvenience.

Hartland, N. B., Jan. 15.—At Windsor, on Monday, the stockholders of the Farmers' Telephone Co., Ltd., held their annual meeting. After routine business the election of a board of directors was proceeded with which resulted in the old board of directors being re-elected with one exception, this being that of George McPhail of Woodstock takes the place of Dr. Macintosh of Hartland.

The report of Manager Britton showed that the line was in good condition and that construction work during the year had been more extensive than ever before. More new phones had been installed than in any year since the company started business, the public appeared to be well satisfied with the service and pressing demands for instruments cheaper.

The report of Dr. Macintosh, the secretary-treasurer, was very encouraging and showed an increased balance after paying two half-yearly dividends of 6 per cent. each.

A new schedule of rentals was drawn up and may be put into effect whenever the directors deem it advisable. The new schedule, when put in operation, will make the annual rental of instruments cheaper.

Arthur Kyle, bookkeeper for Hartland and Scott, who went to Boston on business for the firm over a week ago, was stricken with an illness there which necessitated his removal to a hospital at that place to undergo an operation. Later news, however, is that the patient's condition is much improved.

A. R. Foster, C.P.R. police officer for this division, has had, what was thought by those tendering it, a very tempting offer from the city of Fredericton to take the position of chief of police of that city. The bait was not especially alluring, however, and Mr. Foster will remain in the employ of the railway company, who are well satisfied with his services.

The extreme cold weather of the past few days has caused a general drift of the roads of the city of Fredericton. The northbound express has been from one to three hours late for two or three days. The other scheduled trains have been more or less affected. Travel on the country roads is only indulged in by people who are compelled by circumstances to visit Hartland, and the merchants have lots of opportunity to complete their stock-taking.

Since the last snow storm, and the drifts which followed it, much hardship is experienced by the men who are engaged in hauling supplies to the lumber camps around the Miramichi district. The snow now lies in places coupled with the biting cold winds makes the negotiation of the roads anything but a pleasant task.

# REPORTS ADOPTED BY BOARD OF TRADE

Meeting of Council of  
Board Last Evening—  
Studying Proposed City  
Paving Act.

The Board of Trade met last evening and adopted the report of the council on its work since last meeting.

G. Fred Fisher wanted to know if anything had been done about the Gutellins agreement and about the proposed city paving act.

The president said the city paving act had been referred to a committee to report.

Mr. Fisher said the Board was on record in regard to the taxation system, and had approved a certain system, and had had a draft act of taxation tucked away in his archives.

After the summary of the council's work was adopted G. Fred Fisher moved that when the meeting adjourned it should be understood that the Board meet next Tuesday evening to discuss Com. Agar's paving by-law.

W. F. Burditt, said that as chairman of the committee, he could not undertake to have a report ready by then.

The motion was lost.

D. F. Pidgeon—Have you any information to give us about the Gutellins agreement.

The President—Nothing yet. A memorandum on the subject will be submitted to an early meeting of the council.

This concluded the business meeting and J. R. Brown addressed the gathering on the single tax.

## THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Beautify your hair! Make it soft, fluffy and luxuriant.

Try as you will, after an application of Danderville, you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp. A little Danderville immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderville and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair.

Get a 25 cent bottle of Knowlton's Danderville from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured—no serious treatment—that's all.

J. M. Robinson entertained at dinner Mr. and Mrs. Richardson of Indian Head and Mr. and Mrs. Leonard Tilley of St. John.

One pint of oysters, three tablespoonfuls of butter, four and one-half tablespoonfuls of flour, one half cup of chicken stock, one-half cup of cream, one-half tablespoonful of lemon juice, yolks of two eggs, one tablespoonful of grated horseradish, two tablespoonfuls of capers, salt and pepper. Parboil the oysters, drain, and reserve the liquor; there should be one-half cup. Make sauce of butter, flour, stock, oyster liquor and cream; add the yolks of eggs, seasoning, and salt and pepper to taste. Add the oysters, and as soon as oysters are heated, fill party shells.

## RS. H. P. WHITNEY, SOCIETY LEADER, WHOSE DESIGN FOR TITANIC MEMORIAL IS CHOSEN

MRS. HENRY PAYNE WHITNEY.

The Fine Arts Commission has accepted Mrs. Harry Payne Whitney's plans for the Titanic memorial to be built in Washington commemorating the heroes of the men who sacrificed their lives that the women passengers might be saved. The memorial will cost \$43,000. Seven designs were submitted. Some of the prominent sculptors of the country were among the competitors.

Mrs. Whitney's design is a figure of a man symbolic of heroism. The figure, in white marble, stands with arms outstretched and head thrown back, giving the impression of a distance of the crucifix.

## FREDERICTON

Fredericton, Jan. 15.—The most brilliant entertainment of the week was the dance given by Mrs. Ketchum on Thursday evening at her beautiful home "Elmwood." The hostess, dressed in black satin with diamond ornaments, received the guests in the drawing room, and was assisted by her niece, Miss Sprocket, who looked extremely well in a gown of soft black satin with an overdress of gold dotted net. The library and large dining room adjoining were used for dancing, and both rooms were effectively decorated with red and green, palms and ferns being largely used.

On Saturday afternoon Mrs. Waycott entertained informally at the tea hour. Miss Cora Waycott presided over the dainty tea table, which was set in one corner of the living room. Mrs. W. C. K. Parlee left for her home in Moncton on Saturday evening.

### Was Confined To His Bed For Four Months With Rheumatism.

Mr. W. H. Riley, Ruddell, Sask., writes: "It is with the greatest pleasure that I can recommend Doan's Kidney Pills to all suffering with rheumatism. I was so bad with this terrible disease, I was unable to get up from my bed for four months, and nothing seemed to relieve me until I started on Doan's Pills. I had my doubts about them, but was so desperate I would try anything suggested to me. After taking half a box I was able to get up, and after taking two boxes could get around quite well. After taking six boxes I was completely cured, and able to work for the first time in five months. I have not had a touch of rheumatism since. Anyone who saw me then would scarcely believe me now, as I am strong and active since taking your valuable medicine."

Doan's Kidney Pills help the kidneys to flush out the acid and poisonous impurities which have collected, and thus clean out the kidneys, and dispel the rheumatism from the system.

Doan's Kidney Pills are 50 cents per box, or 3 boxes for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Millburn Co., Limited, Toronto, Ont.

If ordering direct specify "Doan's."

### HOUSE UP TO DATE

The modern house builder insists on sunshine in every room, fireplace that will draw, an upper balcony that can be used for out-of-door sleeping, and for airing bedding and brushing clothes without having to drag everything down into the yard, says the Chicago Journal. There must also be plenty of pantry and store room, a good cellar, and window boxes inside and out. The store room must be so arranged that there will be good ventilation. Closets too, should be built with some ventilating arrangement.

### HEALTH FOR BABY

To keep the baby healthy and strong his little stomach must be kept sweet and his bowels working regularly—that is the secret of health in little ones. The mother who keeps a supply of Baby's Own Tablets in the house can feel reasonably sure that her little ones are going to escape the results of childhood ailments. For the Tablets instantly relieve and cure such troubles as constipation, indigestion, colic and worms by regulating the stomach and bowels. Concerning them Mrs. Jas. Dereche, Cache Bay, Ont., writes: "I have used Baby's Own Tablets for three years and have always found them the best remedy for little ones." They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WRIGHT'S AUTOMATICALLY-BALANCING AEROPLANE IS DEMONSTRATED TO THE EXPERTS.

THE NEW WRIGHT AUTOMATICALLY BALANCED BIPLANE AT THE AERO CLUB OF AMERICA'S RECENT MEETING.

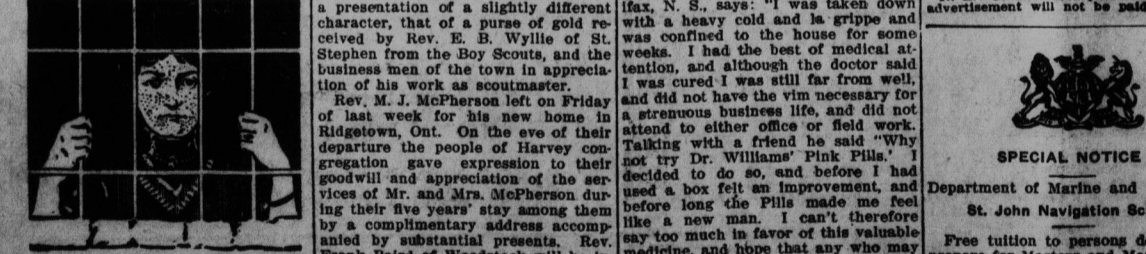

Orville Wright's new automatically balanced aeroplane has convinced experts who witnessed his recent demonstration for the Aero Club of America at Dayton, Ohio, that the day for aerial acrobatics is passing. Mr. Wright, as seen by the committee that awarded to him the Collier trophy for the most important achievement in aviation during the last year, had comparatively little work to do while making the seventeen test flights. There was no noisy working of levers to warp the wings and swing the rudder or to tilt the elevator as puffs of wind struck the light craft.

News of The Churches

BAPTIST
Those who complain of certain stereotyped sameness in reports of preachers and sermons may find something new in the way in which one minister has reported a brother minister and his work at a great international gathering. In his report this minister says "I cannot say that I find a certain tendency to word juggling. But he attempts to guard his own opinions from over-enthusiasm by using a mere suggestion an opinion which many a man with less of reason would have shouted as an indubitable fact. He holds his audience. Are his sermons too long? One might answer both for him and his sermons, in the words of Abraham Lincoln, that a man's life should be long enough to reach the ground; and by the same token a man's sermon should be long enough to convey the message to the people who hear it. He holds his audience. Few men could speak

Pimples Will Not Be Pardoned
The Failure to Use Stuart's Calcium Wafers, a Proved Remedy for Pimples, Convicts You of Unpardonable Negligence.

Pimples are an offense to others and a crime against yourself. People have only to tolerate you because they considered the condition of your face to be a misfortune against which you had no remedy. But now that Stuart's Calcium Wafers will cure the worst cases of pimples, blackheads, blotches, eruptions, and liver-spots, your continued negligence will be considered inexcusable. The person with a pimply face is always unattractive and a disfigurement in society. Those ugly disfigurements set at naught the effect of the most perfect features. If your face and figure had the classical outlines of a Greek statue, a mass of pimples would still destroy your beauty. A clear, fresh skin is absolutely essential to any real beauty.

"I Feel Like I am in Jail I am Ashamed of These Pimples."

A beautiful complexion is entirely dependent on a rich, pure, abundant supply of blood in the skin. Calcium sulphide has long been recognized as the most effective of blood purifiers. Quickly converting all impurities into gaseous form that readily escapes from the pores, it purifies the most vitiated blood in remarkably short order. Calcium sulphide is the chief constituent of Stuart's Calcium Wafers, which contain besides certain mild alteratives that invigorate the blood. You will be surprised at the rapidity with which all face disorders will disappear, once the blood has been cleansed of its impurities through their use. Stop being a nuisance and an annoyance to other people. You have a right to beauty and health and happiness. You have a right to the admiration and respect of others. Take the step that will save you all of these. Get a box of Stuart's Calcium Wafers of your druggist and see how quickly your complexion will be cleared of all blemishes.

IN THE COURTS

Chancery Division. In the matter of Oscar Jacobson, an infant, application was made before Chief Justice McLeod yesterday morning for the appointment of a guardian of the property of the said Oscar, by A. A. Wilson, K. C. and another by D. Mullin, K. C. and by consent of all parties Minnie Block and Morris Block were appointed guardians of the personal estate, which amounts to about \$3,000, on entering into bonds themselves, each in the amount of \$4,000, with two sureties of \$4,000 each. The costs are to be paid out of the estate.

ALL ARRANGED. Benjamin Gaskill, ex-postmaster of North Street, Moncton, was brought into the police court yesterday morning and his case was disposed of. His brother, Joseph Gaskill, arranged for the restoration of the postal authorities for the amount of money defaulted \$972.62. A bill of upwards of \$28 due the Victoria Hotel was also arranged for.

Starting the Day Right

Do you begin the day with a "groch"? Are you tired in the mornings? Do you fall to bed in the restorative influence of sleep, which should make good the energy and vitality consumed by the day's work? Then you are rapidly becoming bankrupt so far as health is concerned. You should look to your habits of eating, make sure that you get lots of fresh air in your sleeping quarters, and restore your vitality by using Dr. Chase's Nerve Food. This great food cure does not induce sleep by any drugging effect, when you have been using it for a few days and get the nervous system into condition you find yourself resting and sleeping naturally and healthily. By keeping up this restorative treatment you will be able to make good the waste and fill the exhausted nervous system with new vigor and energy. This means thorough cure of such symptoms as headache, sleeplessness, indigestion and tired, listless feelings.

THE CANADIAN BANK OF COMMERCE

Report of the Proceedings of the Annual Meeting of Shareholders Tuesday, 13th January, 1914.

The forty-seventh Annual Meeting of the Shareholders of The Canadian Bank of Commerce was held in the banking house at Toronto, on Tuesday, 13th January, 1914, at 12 o'clock.

The President, Sir Edmund Walker, having taken the chair, Mr. A. St. L. Triggs was appointed to act as Secretary, and Messrs. Amilius Jarvis and Edward Cronyn were appointed scrutineers.

The President called upon the Secretary to read the Annual Report of the Directors, as follows:

REPORTS Table with columns for Dividends Nos. 104, 105, 106 and 107, Bonus of one per cent. payable 1st June, and Balance carried forward.

This has been appropriated as follows: Dividends Nos. 104, 105, 106 and 107, at ten per cent. per annum.

In accordance with our usual practice the assets of the Bank have again been carefully revalued and ample provision made for all bad and doubtful debts.

The following branches were opened during the year: In British Columbia: Comox, Courtenay, Pandora and Cook (Victoria), and Parksville; in Alberta: Highland, Monitor, Peace River Crossing and Retlaw; in Saskatchewan: Kincaid, Redlyn, Shanavon and Wieston; in Manitoba: Kelvin, St. James, and Port McNeill; in Ontario: Oshawa and Port McNeill; in Quebec: Upper Town (Quebec), and in New Brunswick: Campbellton, Moncton and West St. John.

The sub-agencies mentioned below have been made independent branches: Labrador, Chamby, Clarenceville, Dunham, Iversville, Lacolle, Roxton Falls, Stanbridge East and Upper Town (Sherbrooke), all in the Province of Quebec.

The branches at Stewart, B. C., Black Lake, Que., and St. Elizabeth, Que., have been closed and the business of the branch at 367 Main Street South, Winnipeg, has been transferred to the main office in Winnipeg. The business of the sub-agencies at Naramata, B. C., Beloit Station, Henryville, Lawrenceville, St. Philippe de La Prairie, St. Sebastian, Sweetburg and Upton, all in the Province of Quebec, has been transferred to their respective parent branches.

The directors wish again to express their appreciation of the efficiency and zeal shown by the officers of the bank in the performance of their duties.

ALEXANDER LAIRD, General Manager. B. E. WALKER, president. Toronto, 13th January, 1914. Z. A. LASH, vice-president.

GENERAL STATEMENT 29th November, 1913.

Table with columns for LIABILITIES and ASSETS, listing various financial items and their values.

Other current loans and discounts in Canada (less rebate of interest) 138,474,874.82. Other current loans and discounts in Canada (less rebate of interest) 18,102,015.13.

Before moving the adoption of the Report, the President called upon the General Manager to address the shareholders.

General Manager's Address. We have closed our accounts for the past year and have great pleasure and satisfaction in presenting you with statement of the results of the Bank's business.

There was enough difficulty and perplexity in the general financial situation at the close of 1913 to make us apprehensive at the beginning of the past year. Canadians had some reason to hope for an early return to normal conditions, but were doomed to disappointment, and the continuance of the unfavorable influence then evident, and the aggravation of some of their worst features.

You will readily see from the statements included in the Report of the Directors that the Bank has had another satisfactory year in the matter of profits. After a very careful re-

valuation of our assets, making liberal allowance for depreciation in securities and providing for all bad and doubtful debts, you will be pleased to know that the Directors recommend the profit, after making suitable and zealous efforts our success is largely due.

There has been a widespread agitation in the Central Western district as to the supposed need for greater recognition of the claims of farmers' deposits from the banks, but investigation does not support this contention, so far as this bank is concerned.

In our last report the urgent necessity for provision for the extension of the Head Office and Toronto Branch premises was referred to; and arrangements have since had to be made for the extension of the premises.

The decennial revision of the Bank Act is an important feature of the last session of Parliament. A most searching examination and discussion of every conceivable part of the Act resulted in a measure evidently framed with the object of meeting every reasonable requirement, and the Act is generally regarded as a piece of unusually good legislation.

The enrolled members of the staff now number 3,540, an addition of 54; during the year. In accordance with our usual practice the assets of the bank have again been carefully revalued and ample provision made for all bad and doubtful debts.

The President then said: At our last annual meeting for the first time we presented the information of our disposal regarding industrial deposits in Canada, which we do business in the form of an appendix to the ordinary report to our shareholders.

You will notice that after paying dividends, making appropriation for Bank Premises and Pension Fund, we transferred to the main office in Toronto, 300,000 and carried forward a balance of \$384,529.98 to profit and loss account.

We deem it prudent to restrict the opening of new branches, carrying out in some measure of a programme we had planned early in the year; and we consequently confine ourselves to districts where we had no representation, except in some cases where we opened for the protection of other branches.

Before moving the adoption of the Report, the President called upon the General Manager to address the shareholders.

before the public in the interests of this country. We turn to the Clearing House returns with unusual interest at such a time as the present. There are now twenty-two Clearing Houses in Canada, but leaving out two with records for part of the year only...

The building permits of the four chief cities were as follows: Montreal—1911, \$14,580,000. 1912, \$19,642,000. 1913, \$27,032,000. Toronto—1911, \$24,974,000. 1912, \$27,401,000. 1913, \$27,932,000. Winnipeg—1911, \$17,550,000. 1912, \$20,476,000. 1913, \$18,821,000. Vancouver—1911, \$17,652,000. 1912, \$19,388,000. 1913, \$10,423,000.

We have made the comparisons for three years in view of the contraction which has begun in some cities. Toronto has just kept even and the decline in Winnipeg is trifling. The marked contraction in Vancouver, and this, no doubt, represents conditions in many other western cities.

The fact remains that under all this pressure England has taken more of our securities this year than ever before. She has patiently remembered that we are obliged to finish the many public and important enterprises, public, semi-public and private, which had been undertaken before the financial clouds began to gather.

## Farm Dairy Cheese

By Miss Bella Miller. The Journal of Agriculture and Horticulture. In the making of Cheddar Cheese in the farm dairy a short and simple process is desired. The following method will require about four hours time, thus enabling the maker to be through by noon. For every ten pounds of cheese required, take 100 lbs. of milk (10 gallons). The milk should be of good quality, clear and sweet, as it is impossible to make the cheese of any better quality than the milk from which it is made. Take the fresh morning's milk and mix it with the night's milk in a vat, or some vessel suitable for holding milk; a clean wash boiler will answer the purpose. Heat the milk to 86 F. by placing a clean can of hot water in it, or by setting the vessel and stirring until the desired temperature is reached. If colored cheese is wanted, use one teaspoonful of cheese coloring for each pound of milk. Add the coloring to a dipperful of milk and stir thoroughly with the milk in the vat before adding the rennet. Use one teaspoonful of rennet for every 25 lbs. of milk. Dilute the rennet with a pint of cold water and mix it thoroughly through the milk by stirring with a dipper for about three minutes. Cover the vat until coagulation takes place, which will be in about twenty minutes, depending on the ripeness of the milk; the sweeter the milk, the longer the time required. To ascertain when the curd is sufficiently coagulated for cutting, push the forefinger into the curd at an angle of 45 degrees, until the thumb touches it, make a slight break in the curd with the thumb, then gently move the finger forward. If the curd breaks clean across the finger without any flakes remaining on it, it is ready to be cut. For cutting, regular curd knives are best. Use the horizontal knife, first cutting lengthwise and crosswise with the perpendicular knife. This gives small cubes of even size. After the curd has been cut, it should be gently stirred with the hand, or with a small wooden rake for ten minutes before applying heat. Heat the curd to 98 degrees, taking about 30 minutes to do so. Continue stirring; this is usually about 2 3/4 hours, from the time the vat was set. When the curd becomes firm and springs and falls apart when a handful is pressed together, it is ready to have the whey removed. The whey may be drawn off and the curd piled in one end of the vat, or the curd may be removed from the vat by means of a strainer dipper, spreading a large cheesecloth over a level butter worker and placing the curd on it to drain. Stir the curd for 10 or 15 minutes, to allow the surplus whey to escape, before salting. Sprinkle the salt over the curd, allowing one ounce of salt for every 25 lbs. of milk. Mix it thoroughly, and when the salt is dissolved the curd will be ready to put to press. Between 80 and 84 degrees will be a suitable temperature to have the curd at this stage. The cheese hoop, or hoops, should be made of heavy tin with two handles on the outside. A suitable size for home use would be 7 or 8 inches in diameter and 12 or 14 inches high. It is also necessary to have a wooden follower, which will fit nicely on the inside of the hoop. Place a piece of cotton at the bottom of the hoop, as a temporary

## Egg-Laying Contest Results

The Journal of Agriculture and Horticulture. During the past year there have been running three large competitions in egg production, and since the beginning the records produced in the three competitions have been very close. The results obtained are extremely interesting from an egg-producing standpoint as well as from a breed standpoint. Then again, these competitions, though not at all arousing interest in poultry raising in general, and in increased egg-production in particular. Egg-laying competitions have been held in Austin and New Zealand for a number of years and such high records were obtained during the last few years that poultrymen began to question the validity of the reports. As a result of the publication of such phenomenal records much criticism was hurled against egg-laying competitions in general, and against the Australian competition in particular. Since that time, however, some of the American competitions have been running for two years and equally high individual records, and in some cases as high average records have been attained. Thus criticism has been abated to a certain extent. At the same time some of the criticism was quite justified, but with this matter we are not here concerned, as we merely wish to see what results have been obtained in the three American competitions which are nearing the end. I have before me the latest reports of the Second Philadelphia North American International Egg-Laying Competition conducted at Storrs Agricultural College, Storrs, Connecticut; the Second National Egg-Laying Contest conducted at the Missouri State Poultry Experiment Station, Mountain Grove, Mo.; and the Second International Egg-Laying Contest conducted by the British Columbia Department of Agriculture at Victoria, B. C. The contest at Storrs has just completed its forty-eighth week and thus has four weeks more to run. The Missouri contest has forty-six days before the contest closes. The British Columbia has ended, having been run for ten months only. In the Storrs contest there were entered 100 pens, each containing five birds; these were entries from England, the United States and Canada. The highest pen production in the 48 weeks was 1158 eggs, laid by a pen of 5 C. White Leghorns from England. This makes an average egg production of 231 3/5 eggs per bird—a phenomenal record indeed. The second highest pen was of the same breed also from across the Atlantic. The total production in this contest in the three American competitions was 215,155 eggs. An American pen of the same breed came third with an average production per bird of 109 2/5 eggs. The fourth pen is an American owned pen of English-bred birds with an production of 196 3/5 eggs. A notable fact here is that out of the 100 pens in the contest, 43 were white Leghorns. But even then the average production of the Leghorns is high compared with the other breeds. The first pen in the contest in this competition is an English pen of White Wyandottes with 188 2/5 was the average production. In the whole competition there are a number of low records, particularly in the less popular breeds. The average production per bird for the 5000 birds is 156 eggs for the 11 months. This is indeed a wonderful record and shows what can be done in the way of egg laying. There is much room for improvement in the laying qualities of the stock of our country. The Canadian pens entered in this competition are standing up fairly well.

## The Boy And His Father

The Journal of Agriculture and Horticulture. Your article in a recent issue entitled "Dad and His Partner" brings to mind an incident that happened some time ago. I decided to take a vacation and boarded the evening train for the Dakotas. After riding a while I decided to look through the train to see if there was anyone I knew. I met a farmer I knew and asked him where he was bound for. He commenced to cry. I sat down beside him and asked what the trouble was. He said his boy had run away and he had just learned where he was and was going after him. I asked him if he and the boy had quarrelled and he said no, they had never had any trouble. The boy packed his things and left without telling them where he was going and had been gone two weeks before they knew where he was, that no one could ask for a better boy as he could trust him to do any kind of business, and knew it would be done right; that when the boy was at home he knew everything would be looked after as if he had looked after it himself, as if he owned several farms. I asked him, "Do you keep and help?" He said, "Yes I keep two men by the year and another help in the rush of the season." "Do you pay these men good wages?" "Yes, one \$35 and the other \$40 per month and keep a horse for one of them." "Do you pay your son a salary?" "No, but he has the best home on earth." "Does he own a horse and buggy of his own?" "No, but I have some of the best horses in the country and one of the best buggies that money can buy and he knows he is welcome to them whenever he wants them." "Do you expect your boy to be a slave to you until he is twenty-one, then turn him out in the world a pauper to start life and make a home for himself?" "No, I expect to give him a good start." "Did you ever tell him that?" "No, but he should expect that." "Now, my friend, go hire that boy and pay him good wages; give him the best team on the farm and the best buggy and tell him just what you will do for him when he gets ready to start a home of his own, and you are getting off mighty cheap for the service he has rendered you and you will have no trouble in getting the boy back." He put out his hand and shook mine cordially and said he never looked at it in that light before. A little of that, that a boy can call his own, looks mighty good to the boy on a farm. Try it and see the effect." Hoard's Dairyman.

## What The Social Center Does For A Community

The Journal of Agriculture and Horticulture. The real social center provides for relaxation and amusement. Beyond a doubt young people need some fun—and they will have it. It is better that this fun be had under community leadership than that it be sought in the pool halls and "joints" and other places where it is often had. The social center provides for games and for social gatherings in many places for neighborhood dances. There are playgrounds and equipment for athletic sports—base ball, tennis, etc. Our average country boy or girl is sturdy and strong, but alertness, poise, agility. Older people also need some fun. That is the way to keep from being old. The social center should have a young atmosphere. There is a good deal of strain in raising and saving crops, and we need some way of throwing it off. A place where we can resort for a game of some sort or for a quiet chat will help to avoid heart disease and leaden life. The social center will provide for means of more serious relaxation and for instruction. It will give a place for lectures, debates, etc., and for seeing one of the greatest educational features of our modern world—moving pictures. Moreover, it is the natural place of meetings for the clubs, groups, and other organizations which are transforming country life. The social center helps to help to better community business methods. In particular it should help towards community methods of marketing crops. At present a whole lot of our market our crops in a haphazard manner. The individual has little show today in dealing with organized business. If he sells in less than carload lots, he takes what the other man wants to give; if he alone tries to ship a carload, he often gets plucked. Back of the individual should be an organized community—a community which may have its paid business secretary at the social center. A social center, in fact, helps to make a community. A number of people living in the same neighborhood do not necessarily form a community. They may have, and do have, so much of jealousy, bitterness, and downright hatred as to make community feeling and action impossible. The social center is the set-together place where people learn the greatest art of our modern world—how right to live and work as citizens of a community. Hoard's Dairyman.

## Selling Surplus Cockerels

The Journal of Agriculture and Horticulture. At the approach of cold weather many farmers will be gathering together all their chickens—the pullets to be put into the laying quarters and the cockerels to be sold in the disposal of the cockerels, after the breeders for next year have been selected, it is the common practice to market them right off the range in a lean condition. This is just the same as selling a lot of steers without fattening them, which of course is never done by a good feeder. It is not profitable to market lean stock whether it be steers or cockerels. Well-developed cockerels should weigh from 3 1/2 to 4 1/2 lbs. when taken off the range and this is just about the right weight to start fattening. From one to two pounds can be added in two or three weeks and a higher price per pound can also be obtained. I should like to point out here the fallacy of marketing young stock alive. When shipped they shrink considerably in weight and the highest price cannot be obtained. Poultry buyers offer a much higher price for well-fattened and well-finished birds when they are well-dressed for market, and it certainly pays to fatten and kill all the birds you have for disposal. Watch the markets and get your birds off while the prices are good. M. A. JULL. When He Sang. He never sang until the night. # SAVED FROM OPERATIONS

Two Women Tell How They Escaped the Surgeon's Knife by Taking Lydia E. Pinkham's Vegetable Compound.

Swarthmore, Penn. — "For fifteen years I suffered untold agony, and for one period of nearly two years I had hemorrhages and the doctors told me I would have to undergo an operation, but I began taking Lydia E. Pinkham's Vegetable Compound and am in good health now. I am all over the Change of Life and cannot praise your Vegetable Compound too highly. Every woman should take it at that time. I recommend it to both old and young for female troubles." — Mrs. EMILY SUMMERSALL, Swarthmore, Pa.

Baltimore, Md. — "My troubles began with the loss of a child, and I had hemorrhages for four months. The doctors said an operation was necessary, but I dreaded it and decided to try Lydia E. Pinkham's Vegetable Compound. The medicine has made me a well woman and I feel strong and do my own work." — Mrs. J. B. PRINCE, 1590 Sargent St., Baltimore, Md.

Since we guarantee that all testimonials which we publish are genuine, it is not fair to suppose that if Lydia E. Pinkham's Vegetable Compound has the virtue to help these women it will help any other woman who is suffering in a like manner.

### ON LOVE

THE FIRST WORD—Don't pour all your glorious love upon one object.

Among my numerous letters recently was one which interested me greatly. It was from a woman who said that she had a husband and two beautiful children and who complained that her husband was neglecting her; that while he gave her enough money to take care of the house and children comfortably he seemed to care nothing for her society. She asked me what she should do.

As I never have been married my advice would be more or less theoretical, but I believe if I found that my husband cared little for my society I would immediately try to interest myself in the other affairs of my life.

It has always seemed to me one of the greatest mistakes for a woman to pour all the great wealth of love of which she is capable, out upon any one person; or to allow her interest to become completely bounded by one person.

I am not advocating fickleness nor free love, but I am pretty sure that love in my life will be an incident, just as it is in the life of any busy person of many responsibilities—very beautiful incident which may color the entire fabric of my every-day life, but still if it should be taken out, I could turn my attention to the building up of other interests and other loves.

First, however, I think I should look to myself and see if I had made myself as interesting as possible to my husband or had allowed myself to become stolid and uninteresting, with little originality of thought or desire. If he still persisted in neglecting me, I would not allow him to make me unhappy. I would fill my life so full, with the love of children, the care of the home and the interests of my friends and relatives that I would not miss the thing that he did not care to offer.

JUST ONE LAST WORD—Many a woman has loved a man devotedly and bored him to death by doing it.

CONFESSES SHE HAS A FEW FRECKLES!

That the following rays of the sun are responsible for freckles is an unscientific prejudice. Prof. Hebra of Vienna, a great authority on skin diseases, regards freckles as "a freak of nature rather than a veritable disease," and thinks they are "analogous to the plebeian appearance met with in the lower animals."

And he says that if we examine closely the skin of an individual who

is afflicted with freckles, at any other season of the year we will find the same spots but of a somewhat lighter color than in summer. All that summer does to a freckled skin is to make them visible by making the skin more transparent.

If the sun caused freckles we would find that the southern brunette races would be troubled with the pests, whereas they are less liable to them than the yellow haired and especially the red-haired individuals of the north.

Dr. Hebra's opinion is that they are the result of an abnormal action of the pigment-secreting glands. In his treatise on the skin he does not give very much comfort to the freckled girl, except through continuous and delicate care of her face. Anything that will thicken the epidermis will help.

A good skin food can be used night and morning and is of great help. Butter-milk which is slightly acid is consequently a bleach, and also a skin food, is very fine to use. The juice of a lemon, half of it taken in a half a glass of water and rubbed on the face, will also be found to be a good bleach. Constant cleanliness, massage and rubbing which brings the blood to the surface of the face, will be found to be the best cure for freckles, but it takes time and constant effort.

I know this because I am apt to be freckled myself. Red-headed women usually are.

If one is very much freckled peroxide of hydrogen may be dabbed upon the face occasionally, being very cautiously not to put it upon the eyebrows, eyelashes or hair, as it is a very strong bleach. Do not do this very often—once a week is all that is necessary.

JUST ONE LAST WORD—Don't be discouraged if you are freckled. Remember that if he truly loves you he will be apt to consider every tiny freckle just as much gold dust upon your lily skin.

Health And Beauty

of borax and strain through thick brown paper, the sort used by butchers. Any solution that is to be used about the eyes must be strained, with as fine a filter as possible. The hands come in contact with many germ-carrying objects during the day, and the eyes are the most sensitive exposed parts of the body and the most susceptible to infection. If you need to rub the eyes do so with the lids closed and always rub towards the nose, never outwards.

To Relieve Inflammation. Weak eyes in many cases are merely sympathetic with some bodily trouble, and as soon as the true source of the infection is corrected, the eye trouble will disappear. Styes, swollen and inflamed lids, and eyes that materate at night, may be indicative of a weakened vitality, but they can all be relieved temporarily, at least, by external applications.

A twenty-five per cent. solution of Argrol will relieve a most angry inflammation in twenty-four hours. The treatment is simple and painless, though the solution may prove unpleasant to the taste. A wisp of cotton should be wrapped about the end of a knitting-needle and dipped into the bottle of Argrol, then the lids raised and moved well under.

or a slight inflammation of the eyes or lids hot water and boracic acid is soothing and effective; one teaspoonful of powder to a pint of water as hot as can be borne. Apply either by holding the face over a basin and dashing the solution into the eyes, or with a wet eye-cloth. Eyes that are inflamed from tears, or from some foreign particle, can be cleared up with hot water. Wring out cloths in hot water and use as a compress on the eyes. Repeat as soon as the cloth cools.

Campbor water strengthens tired eyes and may be kept on hand and dropped into the eyes several times a day. To one ounce of camphor water (not spirits of camphor) add one grain

of borax and strain through thick brown paper, the sort used by butchers. Any solution that is to be used about the eyes must be strained, with as fine a filter as possible. The hands come in contact with many germ-carrying objects during the day, and the eyes are the most sensitive exposed parts of the body and the most susceptible to infection. If you need to rub the eyes do so with the lids closed and always rub towards the nose, never outwards.

Health is Read in the Eyes. Twitching of the lids is frequently caused by nervousness and again by the need of glasses. A pain between the eyes, better becoming indistinct when reading, or the eyes watering, are all indications of eye strain and a need of glasses. Dark spots dancing before the eyes are generally a sure symptom of internal disorder, and if they persist a doctor should be consulted.

Almost every organic disarrangement shows itself in some form in the eyes, a black settlement of blood under the eyes indicates female disorder, a puffiness of the eyes shows bad indigestion, and so on. A doctor recognizes these signals at once. That is why he turns his patient's face to the light.

Never use any lotion on the lashes that could harm the eyes. As careful you may be in applying there is always a possibility of the lotion getting on to the ball and eventual reaching the pupil.

Red vasoline makes a splendid tonic for the brows and lashes. Vasoline (ten grams), with ten centigrams of borax acid makes a good solution. —Modern Prellcia.

EGZEMA STARTED IN A RASH. Suffered Terribly. From Eyebrows Spread to Neck, Chest and Arms. Completely Cured by Cuticura Soap and Ointment.

Brereton, Sask. — "When my baby boy was about four months old he suffered severely from eczema. The trouble started in a rash and was very itchy. It made him very cross and fretful. I treated the rash first in his eye-brows. From there it spread to his neck, chest and arms. When he would scratch, it would make sores. I got medicine but it did no good. I tried different remedies without result. At last I got a sample of Cuticura Soap and Ointment and after using them for two days I noticed a change. I then purchased a full-sized cake of Cuticura Soap and Cuticura Ointment. I would give him a hot bath with the Cuticura Soap every night after washing the Cuticura Ointment. Before I had used half of the Cuticura Soap and Ointment he was completely cured." (Signed) Mrs. H. L. Brereton, May 20, 1913.

The regular use of Cuticura Soap for toilet and bath not only tends to preserve, purify and beautify the skin, but also helps to prevent inflammation, irritation and clogging of the pores, the common cause of pimples, blackheads, redness and roughness, yellow, oily, scaly, and other unsalubrious conditions of the skin. Cuticura Soap and Ointment are sold by drug-gists and dealers everywhere. For a liberal free sample of each, with a book, send post-card to Foster Drug & Chem. Corp., Dept. D, Boston, U. S. A.

ST. JOHN OUTCLASSED SACKVILLE IN STRAIGHT HOCKEY LAST NIGHT-- ROLLIE NORMAN HELPED THE VISITORS

Fast individual work against young and inexperienced players gave St. John another victory over Sackville last evening at Queen's Rink. The final score was eighteen to one, but in the last period Sackville showed class and went to St. John in what was good and helped to keep up the interest. Norman is perhaps one of the best known hockey players in the lower provinces and his presence with the Sackville team should stimulate interest in the game. If he is kept on the team there is no doubt that Sackville will be a factor in the league before the close of the season.

Crowned heads of Europe in the role of a hockey player, while a member of the Oxford Canadian team that won the ice championship of Europe a few seasons back, was another point of strength for St. John and his demonstration of hockey was favorably commented upon by all in the rink. Perhaps not as brilliant as some still he has the earmark of being one of the best that has appeared in these parts during the last few years.

The other men who played for St. John did all that was required and judging from the performance given last night St. John has a team of which to be proud. Jimmie Philips was also out in St. John uniform and played through the first period. His condition was not as good as it will be but he showed the same aggressive spirit that marked his work here several years ago. The details of the play would be a mere repetition of the same play but too much praise cannot be given to all the players who helped to provide the entertainment.

WALTER JOHNSON, WHO TURNED DOWN \$40,000 OFFER OF FEDERAL LEAGUE

WALTER JOHNSON

Walter Johnson, the famous Washington pitcher, has refused an offer of a salary of \$30,000 for three years and a bonus of \$10,000, made by "Joe" Tinker, manager of the Chicago Federal League team, Tinker announced recently. Johnson said he "was sorry, but had already signed with Washington and would not jump his contract."

McFARLAND IS NOW SORE AT THE CRITICS THE PHILLIES WILL GO LIGHT NEXT SEASON

Packey McFarland, peerless boxer, is peeved and refuses to permit his neighbors and friends to see him box—not if they pay for the chance. Packey wants to be a member of the Illinois legislature—a Democratic member, as his name indicates—and to help make laws although it peevish him when he is called upon to obey the laws which other legislators formulate. Packey is a clever boy. He has climbed the pugilistic ladder to the pinnacle by the effective use of clever hands and feet, ably seconded by the most remarkable match-making in pugilism.

Although the Phillies made more sacrifice hits last season than any other club in the National League, Manager Dooin has become convinced that such a play can be overworked. If Charlie can get one or two men to sacrifice hits, he had last season the chances are that he will cut down on his orders to sacrifice next year. "The sacrifice hit play, in my opinion, should not be worked very often. Here is the way I figure it out," Dooin says.

HANS WAGNOR IS THE KING OF THE SWAT

Great is John ("Hans") Wagner, king of swat. Greater than any of the usurers who have at one time or another reigned temporarily. For 17 consecutive years "Hans" has, in the verbiage of George Coban, "peeled that old pill" for an annual average better than .300. For the 17 years, beginning 1897 and including 1913, "The Dutchman" has a grand swat average of a mere .342. In 1897 Wagner denoted the fences for .344. This year he hit .306, his lowest save in 1898, when he hit .305. In no other year has he batted below .320.

REAL BATTER HITS THE BALL BY INSTINCT

People who think a batsman keeps his eye on the ball from the moment the pitcher delivers it until he connects, or misses, are badly mistaken, says Ty Cobb. "A man hits a baseball by instinct. He sees the ball leave the pitcher's hand, of course, but doesn't keep his eye glued to it until he hits. If he did, his batting average would be minus zero or thereabouts. Cobb has applied his baseball hitting to golf. Instead of driving the gutta perch from a tee, he has his caddy throw the ball to him and when it bounces an inch or so above the ground, swats it. Ty easily drives the ball when it is thrown, but finds it hard to hit when it is resting on a tee.

A PITCHER'S WILDNESS DUE TO FADEAWAY

Falkenberg isn't surprised at a defeat to the Phillies yesterday by a total score of 138 to 109. Eight rinks aside curled and the interest was most keen. An eight end made by James Scott against Skip George Bishop. The Carleton club which are the juniors in the curling line as a club, are becoming more keen each year, and the members are proud of yesterday's victory. The score by skips for the day follows: Thistles.....8 Chas. Coster..21 Barnes.....18 Driscoll.....12 Myles.....9 Geo. Scott.....15 McAndrews.....6 Roxborough..19 Bishop.....18 Jas. Scott.....27 Mitchell.....13 S. M. Wetmore..20 Leametrock..21 J. F. Belyea...9 W. Currie.....19 Wm. Ruddick..15 Total.....108 Total.....138

TAYLOR ISSUES CHALLENGE

Norman Taylor, the strong man of Massachusetts, who last spring lost two wrestling bouts to Dan McDonald in this city, writes to The Standard yesterday that he has much improved and would like to challenge McDonald for another match. McDonald is back in the city from New England and may be heard from today. Taylor has a lot of friends in St. John and gave McDonald a couple of hard battles.

WILLIE RITCHIE-TOMMY MURPHY FIGHT IS OFF

San Francisco, Jan. 16.—The championship boxing match between Willie Ritchie, the light weight title holder, and Tommy Murphy of New York, scheduled for January 20, was declared off today by Ritchie. Dr. Galway informed Ritchie, after an examination, that his left scapula tendon was badly strained, and the sheath of the tendon seriously inflamed. It might improve temporarily, he said, but exercise would surely make it worse.

OXFORD TO SEND TEAM

Oxford University will send a team from England to compete at the annual relay races under the auspices of the University of Pennsylvania next April. There are three men on the Oxford team capable of running the mile in less than four minutes twenty seconds. They are Taber, formerly of Brown; Jackson, the Englishman, who won the 1,600 meter race at the 1913 Olympic games, and Ridd, the South African half mile champion.

CARLETON TRIMS THE THISTLES

Carleton curlers landed out a defeat to the Thistles yesterday by a total score of 138 to 109. Eight rinks aside curled and the interest was most keen. An eight end made by James Scott against Skip George Bishop. The Carleton club which are the juniors in the curling line as a club, are becoming more keen each year, and the members are proud of yesterday's victory. The score by skips for the day follows: Thistles.....8 Chas. Coster..21 Barnes.....18 Driscoll.....12 Myles.....9 Geo. Scott.....15 McAndrews.....6 Roxborough..19 Bishop.....18 Jas. LOCAL BOWLING YESTERDAY

In the two men league match on the Victoria alleys, last night, Johnston and Simpson took four points from Sloum and Kiley. The individual score follows: Sloum.....83 93 99 81 94 446-89-45 Kiley.....90 104 86 84 71 426-85 Johnston.....102 107 185 165 165 874 Simpson.....89 95 90 80 97 442-83-25

IMPORTANT BASEBALL NOTICES

Auburn, N. Y., Jan. 16.—Secretary John H. Farrell of the National Association of Professional Baseball League, today gave out two important notices. All National Association players' contracts for 1914 are subject to the agreement made at Cincinnati, January 8, between the Players' Fraternity, the National Commission, and the National Association relative to the changes and modifications in the present players' contracts. "It was because he was used to handling fadeaways that he was sent behind the bat in all games I pitched. I'm to be congratulated that only thirteen wild pitches got away from him all season."

SYDNEY DEFEATS SOCIALS

Hallfax, N. S., Jan. 16.—The Socials received their seventh consecutive defeat of the season tonight, when they were again defeated, this time by the score of five goals to one. There were about 1,500 fans present at which proved to be the most uninteresting game of the season. The Socials opened up well, Lowther scoring the first goal after twelve minutes fast hockey, but two minutes later Fraser, after a pretty run, equalized. The end of the first period found both teams with the score one-one. The second period was productive of the best hockey of the evening. Trenouthe made several sensational rushes, all of which were dangerous and finally ended by scoring a grand total, after Hague had made three smart saves in succession. Randall followed with a third after fifteen minutes of the period had gone. The third period was not as interesting as the previous periods, and the Socials failed to score. Richardson got away about eleven minutes after the opening of the period and drew Hague out of goal, finishing up by banging the puck past Hague for the fourth score. A minute later Jimmy Wilkie, the star of them all, ended a pretty run by scoring the fifth goal, giving Sydney the victory by five to one.

SOCCER ONE OF OLDEST SPORTS

Even soccer, the grandmother of American football, used to be a leader among games. Legend has it that in 962, during the Danish invasion of England, a good man of Chester captured a Dane, beheaded him and knocked his head out into the street to furnish sport for the "fellows." The game of kicking bleached skulls around the city streets and even outside the walls of the ancient Roman built city grew in favor. The game was indulged in whenever a Cheshire sport could annex a Danish head.

PRINCETON TO LOSE STARS

Next fall Princeton loses Captain Hobey Baker and Phillips by graduation, and Streit on account of the three year rule. All the other members of the football team will be able to play. They include S. Baker, Law, P. Trenkman, E. Trenkman, Hammond, Brown, Click, Semmens, W. Swart and I. Swart, Ballin, Shear, Lamberton and Bordson. From the freshmen team, Driggs, Eberstadt, Rogers, Dickerman and Charles will most likely prove valuable recruits. Three men who were ineligible this year will be available next fall, Boland, Kirby and Dolton. Ballin, who played left tackle last season and is an all-American man, will be captain.

OLYMPIC FUND IS A FAILURE

The Duke of Westminster's appeal for \$500,000 for the Olympic games found less than \$50,000 has been subscribed up to date, and the rate at which the subscriptions are coming in is steadily slackening. The fund committee announced that unless \$125,000 was subscribed by the end of the year the scheme will be abandoned. Lieutenant Blair, secretary of the committee, said: "A serious condition has already arisen as regards our funders on account of this lack of money. The best of them have been approached by foreign nations with definite offers for their services, and therefore they will not only be lost to us, but employed in training our rivals unless the public makes a speedy decision. "The sum of \$50,000 is practically useless. The organizations which we must assist cannot be helped by such a sum. When they ask \$5,000 a year for four years there would be no earthly use in offering them \$500."

GRAND TRUNK CLERK CHARGED WITH STEALING PASSES

Edmonton, Jan. 16.—William Holmes chief clerk in the mechanical offices of the Grand Trunk Pacific Railway, was arrested today on a charge of stealing passes from the office in which he was employed. Donald R. Pierce, proprietor of the Hub Employment Agency, was also arrested on a charge of illegally selling Grand Trunk Pacific passes.

LANKY BOB MAKES A COMPARISON

New York, Jan. 16.—Bob Fitzsimmons, once the world's champion heavy-weight boxer, now 51 years of age, grained indignity today as he listened to counsel for the State Athletic Commission argue that he was too old to re-enter the prize ring. Fitzsimmons said the state had no more right to prevent his boxing than it had to keep a preacher of the same age out of the pulpit. Decision was reserved.

"BATTING EYE" A MYTH?

People who think a batsman keeps his eye on the ball from the moment the pitcher delivers it until he connects or misses are badly mistaken, says Cobb. "A man hits a baseball by instinct. He sees the ball leave the pitcher's hand, of course, but doesn't keep his eye glued to it until he hits. If he did his batting average would be minus zero or thereabouts.
