Is it not a fact that this Company has been doing business without regard to its capital or its resourc against losses in the case of great disasters? There is great danger in this to the property of others, as was stated by a correspondent in the Globe the other evening, who complained of insurance offices taking risks on every little rum hole in the City Another feature of its management might be noticed—the extremes which its agents run to in fixing rate of premiums. There is scarcely a man, or woman either, so dis-honest or so borne down by debt, or pursu-ing so dangerous a business, that he can-not get fully covered in these offices. The temptation to fire buildings for the sake of the Insurance is very great under these cir-cumstances, the danger corresponding great danger in large, wooden towns like ours. "The Wisdom of the King is well worth careful reading. Indeed you cannot read much of it at once. There is a constant play of fancy about the thoughts, and often the very words, that is admirably suited to the Scripture book, of which this is an exposition, but which demands such constant attention on the reader's part that he gets tired, for he does not know where it is to end.
