## General Intelligence.

## Timber and Deals.

We learn from Farmworth & Jardine's timber circular of the 3rd instant, that the arrivals from British North America during the past month have been 37 vessels, 21,230 tons, against 32 vessels, 26,919 tons during the like period last year.

Business during the month has been a dragging and unsatisfactory character, though the deliveries have been fair, buyers for the most part restricting their operations to their immediate requirements, and are only tempted by very low prices. Stocks, though comparing favourably with last year, are still above the average, and far too heavy for the diminished demand.

**Canadian Woods.**—Pine Timber has been rather more doing, but to effect sales very low prices have been taken. Pine deals have been arriving too freely by the steamers, and, consisting mostly of odd sizes, have been very difficult to sell even at the falling prices. Staves have been dull, and no late sales.

**Spruce Deals.**—The import has been large and in excess of the demand, and coming upon a weak market prices have had a downward tendency; the latest sales being the lowest on record, considering the time of year, being nearly double what it was last year. Pine Deals are most difficult to sell, and prices are excessively low. Of Birch the consumption has been light, and prices are low.

During June, birch timber sold at 15d. to 15d. per foot. Spruce deals, 25 to 25 1/2 d. per foot. Standard Third quality birch timber, pine deals brought only 25 1/2 d. per standard. Scantling, 6 inches and under, 25 to 25 1/2 d. per standard. Spruce boards, 1 1/2, 1 3/4, 2, 2 1/2, 3, 3 1/2, 4, 4 1/2, 5, 5 1/2, 6, 6 1/2, 7, 7 1/2, 8, 8 1/2, 9, 9 1/2, 10, 10 1/2, 11, 11 1/2, 12, 12 1/2, 13, 13 1/2, 14, 14 1/2, 15, 15 1/2, 16, 16 1/2, 17, 17 ### Doing up Men's Linen.

Some time ago my husband used to complain that his linen collars did not set nicely in front. There was always a fulness which, in the case of standing collars, was particularly trying to a man who felt a good deal of pride in the dressing of his neck. As it spoiled the effect of his cravat, and often left a gap for the display of either the collar, band of his shirt or a half inch of bare skin. While talking with a particular shirt-maker one day he mentioned his annoyance, and enquired if there was any way of relieving it. "Yes," answered the man, "the fault is in your laundry. While doing up your collar, he stretches them with the wrong way. Damp linen is very pliable, and a good pull will alter a fourteen inch into a fifteen inch in the twink of an eye. She ought to stretch them crosswise and not lengthwise. Then, in straightening out your shirt bosom she makes another mistake of the same sort. They also ought to be pulled crosswise instead of lengthwise, particularly in the neighbourhood of the neck. A lengthwise pull draws the front of the neckband somewhat directly under your chin, where it was never meant to go, and of course that spoils the set of your collar. With the front of your neckband an inch too high, and your collar an inch too long, you have a most undesirable combination." The speaker was right. As soon as my husband ordered the necessary changes to be made in the method of our laundry, a wonderful difference manifested itself in the appearance of that most important part of his clad anatomy—his neck. Let us commend the shirt-maker's hint to other distressed men.—*Cor. Evening Post.*

### To those who use Mowing Machines.

Our own observation, and the experience related to us by those who run mowers and reapers, lead us to offer a few words of advice to some who are using these implements to great disadvantage. There are no machines, perhaps, which are so much neglected as mowers and reapers. We notice that some farmers run these machines when out of order, neglect to sharpen their knives, and when worn out, and the plates or under cutters, worn round and thin so that the grass draws through, making hard work for the team, and leaving enough hay on the ground to pay double the expense of fixing. By a little care in keeping bolts tight and snug, your machine will be nearly as good as new and do equally as good work. If the cutting part of the machine be not kept in good order, you will take more out of your team in a day or two than will pay for a new set of section plates, beside leaving much grass on the ground.

ANOTHER REMEDY.—A gentleman correspondent of the *Country Gentleman*, writes his recent experience with the Colorado potato bug. His remedy has two important recommendations—safety and cheapness. It is tar water—applied with a syringe or watering pot. In the case in question the remedy is said to have been immediate and complete. Next morning all the bugs which were not dead had disappeared; not one was left. Our farmers should try it; they left to have Paris green on their premises.

CUCUMBERS.—Dust the young plants freely with a mixture of ashes and plaster or air-slaked lime, to keep away insects. Unless seed is to be saved, cut away all that are large enough to use, whether needed or not, to prolong the bearing. In sowing for pickles the last of this month or the first of next, it is well to sow in well manured rows, as in hills, putting in 12 to 20 seeds to the foot, to allow enough for the bugs. When well established, thin out the vines to a foot apart, and let them spread on each side of the row.

Curing Hay in the cock is preferable to sun drying. The sweating or fermentation improves, and prevents heating in the mow or stack. The writer prefers to put hay after the dew is off, in moderately large cocks, four feet wide and high—after it has lain in the sun for one day. It may thus stay safely for a week, if necessary, and a hay cap will protect it from a 24 hours' rain. The day it is drawn in, a man should start early and throw open the cocks, to get a final airing for two or three hours before it is taken up.

Onions.—Those from seed will need weeding early. A top dressing of wood-ashes helps the growth wonderfully. A dressing of salt is said to prevent a rust that sometimes appears. Keep those from sets clean.

INSECTICIDE.—One glass of paraffine in four gallons of water will destroy insects upon rose bushes. Great care must be taken not to make the liquid too powerful, for it will destroy the foliage of the bushes. The beauty of a rose is greatly increased by a bright green spray of leaves. Weeds placed in at the root of roses have a most beneficial effect. For keeping the color of the foliage, a spoonful of soot in a quart of water is very beneficial.

Tomatoes in a private garden should always have a trellis or support of some kind and should be tied to it before the plants fall over. If the plants once get out of shape, it is difficult to manage them. The simplest frame of poles to keep them from the ground will answer.

### Look out for Strange Weather.

The following, which went the rounds of the press, may be interesting just now, in view of our late experiences with the weather:—  
"We are not to be surprised by a queer weather this year, nor for several years to come. 1880-1881. The astronomers tell us that extraordinary phenomena may be expected during these years, which contain the perihelion periods, or nearest to the sun, of the four largest planets, Jupiter, Saturn, Uranus and Neptune. The perihelion of all these planets coincidentally has not occurred for more than 1800 years. Dr. Knapp, writing in the *New York Medical Journal* last year, remarked that 'at former periods it has been observed that the approach of one or more of the great planets of the solar system occasioned disturbances in the atmosphere causing great heat and cold, rains, drought, blighting of crops and fruits, epidemic diseases among the human race and epizootics among animals, consequent on the interference with or abstraction of the normal amount of light and heat.' No one will seriously dispute Mr. R. A. Proctor's assertion in his admirable work 'Our Place Among Infinites,' that 'not an atom in the remotest corner of the heavens is without producing in every other atom throughout the universe an effect infinitely minute to our perceptions, but as manifest to the Almighty as the noonday sun.' On Monday, the 26th of June, there happened a conjunction of Mars and Saturn in the 16th degree of the sign Aries. Ramsey, who wrote a treatise on forecasting the weather in 1865, says that such a conjunction happening in a fiery sign (Aries) shows that 'the earth shall be barren through extremity of heat and drought.' So keep your weather eye open.

### Going on an Excursion.

(New York Express.)

They had been preparing for the excursion for about two weeks. The day at last dawned, and as the boat was to start early, the young wife determined to be on hand. The clock struck 8 and still she was in the kitchen, her hair down her back, packing edibles in the basket.  
"Hurry up," said John, her young husband.  
"I'll be presently," and away she dashed to blacken her shoes and put on a clean collar. Then she struck her head out of the window to ask her next-door neighbor to lend her a breast-pin.  
"Hurry up, John," said she. "You bring the basket; now I'm all ready and am going down to the boat, and say, John, don't forget a box of sardines you'll find in the closet, and bring the pickles and tongue, and be sure and bring a big knife. Do you hear me, John?"  
John recoiled into the kitchen and began his work. He was interrupted by his wife's voice from below yelling: "John, there's a can of strawberries in the ice-box, don't forget them. Now hurry, we'll be fearful late; and say, bring one or two more handkerchiefs and a sun umbrella—or I don't know, it looks like rain, bring my waterproof. Oh, you old poke, you're going to stay there all day. Now run to back and close those back shutters, and put the cat in the kitchen, and leave a pan of milk for her; and say, just stop around to the butcher's and tell him we won't need any meat to-day, and leave the key of the cellar under the parlor door-mat. Now hurry, John. I'm off. And don't forget anything or I'll go wild!"  
He didn't forget anything, but when he reached the wharf he found the boat had been gone two hours.

Lower Province Grievs are eminently of the world, worldly. They are persons of your team in a day or two than will pay for a new set of section plates, beside leaving much grass on the ground.

may be provided for making the evening hours pass pleasantly, and a time to look forward to with pleasant anticipation. We visited once in a large family, where it was the duty of each sister in turn to provide the evening's occupation, and there was a pleasant rivalry between them as to whose evening should be the most enjoyable. As a natural consequence, the brothers were rarely absent from home.

PRESENTATION TO ALL SAINTS CHURCH, ST. ANDREWS.—Mrs. C. P. Wetmore, of Fredericton, has made and presented to All Saints Church, St. Andrews, a pair of communion or altar cushions, 22 feet long and 12 inches wide. They are worked on canvass with crimson, green and gold colours, and are remarkably handsome. Judging from the fine texture of the work, they must have taken considerable of the lady's time and attention to make them. They are a valuable gift.—*Globe.*

Henry W. Longfellow, the poet, has five children. Osgood, the eldest, is married and a man of business in London, New York and Montreal. Ernest is a rising young painter studying abroad; Alice, the eldest of the girls, is a pleasing writer, unmarried; Edith is a golden-haired, young lady of 25, who has just married the third son of Richard H. Dana, Jr., and Anna is decidedly literary in her inclinations.

A few days ago, one J. W. Benton, a poor fisherman, was digging worms for bait near the old hospital, at St. Mark's Place, dug up an old brass kettle, which upon examination, he found contained \$100 in gold coin, which raises him above the fishing business.

McMaster, an Ohio temperance lecturer, was taken suddenly ill in railroad car, and a physician told him that a glass of brandy was the only thing that would save his life, but he refused to take the liquor and died.

An infidel said sarcastically to a clergyman: "I always spend Sunday in setting my accounts." The Rev. gentleman did not wince as expected, but simply replied: "And you will probably spend the Day of Judgment in the same way."

CONSUMPTION, COUGHS, COLDS, HOARSENESS, BRONCHITIS, SKIN DISEASES, GENERAL DEBILITY, CHRONIC RHEUMATISM, RICKETS, DISEASES OF THE BONES, SCROFULA, IRRITATION OF THE MUCOUS MEMBRANES AND DIFFICULT EXPECTORATION, WASTING DISEASES OF CHILDREN AND ADULTS, NERVOUSNESS AND PROSTRATION, AND WHENEVER IT IS NECESSARY TO INCREASE THE VITAL FORCES AND BUILD UP THE SYSTEM.

In offering this beautiful Preparation to the consideration of the public, we do so confident that if they will give it a fair and impartial trial it cannot fail to give satisfaction.

The beneficial effects of Cod Liver Oil in all Lung troubles and Scrofula affections are too widely known to need any comments from us; and Dr. Dobell, of London, England, has proved by a series of experiments that Pancreatic Emulsion is even of greater benefit in Consumption than Cod Liver Oil, as it is much more readily retained by the stomach.

In Mattison's Emulsion you have both of these great remedies combined, the Pancreatic Emulsion rendering the Oil much easier of digestion.

It is pleasant in appearance, agreeable in taste, and easily taken by children and invalids.

FOR SALE BY ALL DRUGGISTS.  
\$1.00 PER BOTTLE. . . . SIX BOTTLES FOR \$5.00.  
TRIAL SIZE 25 CENTS.

NO AGENTS! NO COMMISSION!  
THE system of employing Agents or Commissionaries at a high commission has been strictly abandoned by us. It having proved very unsatisfactory both to ourselves and customers. In future we will sell our

Pianofortes and Organs  
At Net Wholesale Prices,  
direct to purchasers. Any buyers of Pianos and Organs will save from twenty to forty per cent. by dealing directly with us, and, moreover, far better satisfaction can be guaranteed.

We claim to sell the best instruments to be had, and at the lowest prices consistent with first class articles.

The cash system enables us to sell at a very small advance on cost of manufacture, although to honest and reliable parties we do not object to allow a reasonable time for payment.

Parties ordering by mail can rely upon getting as fine an instrument as personally selected by themselves. Any Organ or Piano not found exactly as represented can be returned at our expense. We refer with pleasure to over Fifteen Hundred Pianos and Organs sold by us the last ten years.

Thankful for the very liberal patronage accorded us hitherto, we can only say that we will continue our endeavors to thoroughly satisfy our customers in all their dealings with us.

## NOTICE.

To the Harbor Master, Pilots, Owners, Masters, and persons in charge of Vessels entering or leaving the River Miramichi:  
The Department of Public Works of Canada, being about to resume operations at the Harbor of Miramichi, and the improvement of the Channel, at the entrance to the Miramichi River, will from this date have the Dredge "St. Lawrence" engaged in performing the dredging required and the said Dredge will have a number of Anchors, Cables and Lines for Mooring purposes deposited in the channel and on either side of the channel, all of which when put down will be buoyed.

All Masters of Steamers are cautioned to keep clear of Buoy, Cables and Lines, so as to prevent their being taken up and fouled in the paddles or propellers, as the fouled or moored moorings will be in place and, moreover, far better satisfaction can be guaranteed.

As, whilst working, it is not possible to shift or remove the Dredge, Vessels will be required to give it a wide berth, so as to avoid collision and damage.
